professor in what we call, founder of one the hardest, far-left communist organizations, universities in the US. She is a communist through and through, but she is the Marxist, Leninist communist. And this will China very close to US. (2:24). The same with Russia. And this will tip the balance of world peace, towards peace, because President Harris finds a lot of common goals with CPC and Putin. This is what **when we choose, we announced you who will be the next president, we brought in, we calculated it**. And your next president, the **first female president will bring the line of American policy very close to, equal, and share of fairnes**s, in a communist manner. Go back and read about her historical life. She was brought up by the mother and father who are one of the most far left Leninist, Marxist parents in the American universities, and she'll bring that ethos. And with it we don't see further wars, because in that ethos, in that language you'll find a lot. Trump in one his speeches he referred to it, but he was not allowed to put it up. But maybe for the first time in the new Year, the next 20 days you'll have a new president. If Biden gets full session, first session which most of us don't think so, through dementia. We will see as she is already setup, she is forming the American foreign policy through communist structure, just watch the number of minorities which have gathered into the new administration will bring balance into the whole structure of the US and in interaction with China. (2:26). In a way, fairness, and correct conduct in so many other ways, balancing of equality is, will become one of the major foreign policy of US, through President Harris. And this will see new changes, bring new understanding of how mankind and humanity will interact with each other. We expect this. This is why when we announced our position in respect to the next American vice-president some months ago. Now you understand the reason behind it. **We don't expect to see w**ars, as through the depth of, what do you call, not sympathetic, but understanding the ethos of the Marxism, and working through the way that Lenin has worked.

President Harris will bring a Balance through legislation and Science

She will bring different direction of leadership into the American administration which is very much, will bring the balance to a lot of things. Would we see more legislation, yes we will. And would **this legislation be toward minority to bring a balance. We will see, but most of this legislation will bring balance to the nations of science and T**, which is the ethos of her, and Biden. You will see new nations merge with new technologies, and will be supported by the new administration. This is why she choose the word of the science. And this will give new opportunities to many nations to merge, and this will be one of the biggest change, (2:28). we will see in the new American policy. And I **think it will be a shock to many Americans, especially liberals and conservatives, that how the ethos of Lenin and Marxism has established solidity in the White House for next 8 years**. And this is why I said, she will choose, most probably a lady who is actually very close in the same school of thoughts as her. Women trusting each other to deliver. You'll be in for a big shock in your new administration. We'll see the establishment of the new open policy, .. see less interference but more direct intervention by CIA, which pushes the Leninism, and then they go through Pentagon to bring Marxism in. It's the way they are structured.

Will Virus be Exposed - Nobody really knows how it's engineered

Q: **Will they expose the corruption of .. they believe that this virus came out of the US** originally, I don't know if it's true, some of the evidence is pointing towards the university of North Carolina was behind the research into this virus. Will that be exposed?
K- We do not know. It cannot be told. **Nobody really knows how this virus is engineered. (2:30). If you ask someone from the other side of the fence, they'll say it was the right time of intervention by those who are not from this planet to change the course, to prepare for the new changes**. This is different school of thoughts.

KF will Teach how to Protect against Vaccines

As we said, in the Tuesday teachings, **KF has endeavored to make sure that by delivery of the new vaccines, that no harm comes to man**. It has an advantage point, will stay the same, but we'll introduce new T by next Thursday that can lead to 2 - 3 directions. **If** for example, the ?? bulk **vaccines are chemical micro chipped**, we'll teach you a way to protect yourself, as (if) you are in the space.

Energies in Space can Create Crystal Lattice Structure in Cells

In space energies which enter to the body of the man will change the crystal lattice of the cells, as we produce crystal salts in our body, we produce crystalline structures which become, very much like electronic systems we know, and then they can interfere with the structure of the body of the man, and lead to creation of many functions like cancer. The new T we'll teach next week is the way to **be able to convert these chemical conversions into neutral state. Which means if any rays, fields enters your body and creates electronic systems as we know it now, that it amplifies, or elevates, or reduces the function of part of the body, at the point of entry of the field, you can change or block, (2:32). or disable the operation of the conversion of the energies into crystals**.

Luminous Colors in Fabric can do the Same - create crystals in body

Last week I touched very simply on the uses of the **colors in the fabrics which leads to creation of crystals in the body. That is part of the same teaching**. This is part of the same process where crystals create transistors and the rest, and the operations of the fields flow in the body.

Body Communicates with our Emotion through Crystal structure

We do this ourselves, this is how our body communicates with our emotion. Now we show a T that if anything foreign introduced in the body, you can convert it, you can block it, that it does not effect your emotion, or operation of the body, does not change DNA, or RNA. This will happen in the space. That the combination of the different fields create different structures within our body, that can lead to creation of what I call, **chemical circuitries that these circuits can change the operation of part**

of the body, or interact with the emotion. And we teach you how to block the work of these systems as part of the space defense T for human body. Then you can understand how you might be able to use it in different application. In the space combination of the rays, can create and lead to the creation of crystal lattice that it's in the dimension of the C and then create interaction that interferes with your emotion.

Russians in Space over 6 months Create Crystals in Body change emotions

We have seen these through the long term stay of astronauts, **Russian astronauts in the space over 6 or 12 months. (2:34). Creation of crystals, change of behavior**, and understanding that these behaviors can be triggered in certain ways, and certain fields.

Teach you How to Prevent damages or Unwanted Changes in Body

In the teachings of coming weeks we teach you how to block these. How to stop if such a crystallization, or what we call, interaction of the fields enters the body of the man in the space. It could be in the shape of a virus or any other shape. **This is a way that we can prevent any unwanted damages, or introduction of new .. elements into our body, can endanger our emotion of us, or change the RNA, or DNA**, as we have seen in space. We bring the knowledge of space, advances in space T within the next week, to teach you how to block, convert if these crystallization circuits are established in your body through the interaction of the fields in the U.
Q: .. So this is another step in preparing and sending people to space … if we are traveling physically in space, (2:36). we also will be traveling using our souls and plasmas.

Souls Can be effected by Fields and Viruses - in same way

K- **Our souls can be effected by the same**. So it's a general teaching. It's the same way, **because the interaction of the fields with the soul, leads to creation of the physicality of the man, so the souls are vulnerable into receiving fields that creates conversion, and creates condition of creation, manifestation in physicality**. It is very interesting how the knowledge has a multi-purpose use. Depends on where and how you want to use it.
Q: I never thought of our souls .. I always thought of our physicality being susceptible to viruses, but **this is my first realization that souls can be effected by these things**.
K- You see in the world of science they say you cannot bend rays, but **if you have the knowledge I have, I can make a circle of the same wave. I can make it to rotate around itself like a twister, but in the world of present science of physics say, you cannot bend the light**. Light travels in straight lines. You give me the knowledge, as all of you have, if it is a particle, or is it a ray, and then understanding of it as, **if you have access to changing M fields, (2:38). which can interact, divert or attract any ray, be it a ray of light, or be it a ray of the STM**. the knowledge is very deep, and in that process we understand the creation of it. And this is what we are teaching.

This is part of opening of knowledge and science is, and will be. The science of creation is not just what man taught, the science of creation is what man has to understand, and then realize its power. **In the new space T we need to understand the creation of materials within, we create cancer cells through emotion, through interaction of the fields**. So shall be, that we understand we can, the same way as **we can reverse a cancer** cell to no cancer cell, **we can change anything which is produced, or introduced into our body as electrical products, or collection of the fields in a chemical way, into a non-effective position. We teach the universal process of creation. So we know how to interfere, how to block, and how to change**. We need it.

Mr. Keshe involved with Long Term effects of Space with NASA

We have seen astronauts long term stay in the space have created crystals cells and different emotional configuration on their return to Earth. Initially I got involved with this through NASA, (2:40). as I said, University of Washington years ago, **to block astronauts to receive cosmic rays in the brain. We saw it as photons and flashes of light in the brain creates crystal conditions, and some of them creates their own circuitry. And these circuits can lead to creation of different emotions, or encourage certain emotions. So this T has been already developed and used in different ways**. Now we teach it that it can be used in the present time, for those who become the passengers of U, through planet Earth, that they receive fields of energies in different shape, or viruses, and the prevention of the viruses, they can protect themselves. We cannot come back to earth every time we hit a virus in the space.

Your Body Creates Crystals very much like a Microchip

Many of you know, many of these techniques, now you have to understand how to use them when **your body creates a crystal, which is very much like a microchip, you have to know how to open it up, and how to disable it** even it still ?? exists. Gaps and spaces, in fields and energy, creates different conditions in the body of the man.

Why Surgeries can lead to Cancer

This is why, for example, **we see many of the people who go through some kind of surgeries, then they show development of cancer at the point of surgery**. The reason is, (2:42). first of all, **the lattice structure of the tissue has changed, and in most cases we understand due to introduction of the elements of the cutting tools, they create a first condition of the elements within the cell of the cancer**. When a doctor cuts flesh, that knife leaves micro structure of the, if it's a rough tissue, the way you put a knife to a sandstone, the atomic structure of the knife stays within the cell of the tissue, **which is left behind it becomes the center of the cancer**. That's how we see, what we say, most of, some of the cancer we see is accidental and through the operation. This is what happens, we change the environment and the Cu, as the Cu in the tissue, now through the introduction of the change of the field strength, and most probably, use of some Cu products in the operating room becomes the seed of the Cu, and becomes the seed of cancer, and later on we see the production of cancer in the tissue.

Why We see less Cancer in Laser Surgeries

This is **why we see less and less cancers in those operations, which laser beams have been used**, because there is no introduction of the matter state into it. If you read the statistics about the number of cancers where the laser has been used for all the application, it is more or less to near zero. But those who we use the knives and everything else and infected operating room, we see the creation of cancer.

Creation of Matter by Introduction of 3rd Field - like Body of Man

Because as we know by now, **if we create 2 fields, and introduce a 3rd field, we can create the matter of it**. This is what happens in the body of the man. (2:44). **And now they create new materials, and those can create new conditions as a resistor and a transmitter, and a change of the DNA**. This is what some viruses do with us, the energy packs they deliver. We have to ..
Q: The viruses introduce the 3rd field?
K- Yes, .. it could be. Even the introduction of the materials. As we said last week, the body of the man, when the 3rd field comes as a coloring, or a vitamin additive, as a C based, your body changes and starts producing crystals. That's what we said about the sports products and the coloring introduced as a C based. **If one of these C is introduced as a, which is used from coal, links and has the strength of the amino acid (AA) C of your body, your body starts creating matter state**.

Acid / Alkaline Point of Manifestation of Matter State

This is what a lot of KS never understood, **the level of the acidity conversion to alkaline is the point of manifestation of matter state**. This is why doctors tell you the more alkaline you are, there is less possibility of cancer, **because with the "alkaline-ness," which is the salt base, which many of you produced Gans's, you stay in the energy level. As you go to the acidic base, you create the matter state**. So as you go acidic most of the condition of the fields of the plasma of the Gans's in your body has the more opportunity to be at the level of the matter state. **This is how matters are created**. When we see a stone, when we see aluminum, .. Sulfur, (2:46). or when we see gold, we have to understand **that's the point where acidity and the alkaline-ness of the cell itself, of the atom, is in balance for production, or manifestation of physical manifestation**. And KS by now should have understood this knowledge. This why when we give Gans's to people, or water of Gans to people, then the doctors tell us they increase the use of the higher level alkaline based Gans's we see the eradiation, and change of the body to non-cancerous, because we change the acidic into. The point of conversion, **if you go to a very high alkaline-ness, you become acidic, and that's the point of the manifestation of the matter state, where the G and M balance each other and they are equal to each other**, then it leads to manifestation of the matter state.

Surface of Planet created by Heartbeat, and MG Fields of Alkaline - Acidic

That's **how the surface of this planet is created, due to, there are 2 thing, 1 is the heartbeat of, which is the continuation and the flow of the fields, and the environmental condition of the MG Fields of alkaline-ness and acidic**. Acidic is what? And what is alkaline-ness? And which one is G and M. If you read book #1, **when the 2 balance out we get a matter state,** like the surface of the earth.

Change to Alkaline and the Element cannot Exist

So it should be very easy to be understood, **when you find objects created or initiated in your body, if you can change the balance and find out what it is, and change the balance in it, to the balance of the alkaline-ness, more than acidic**, you'll find out, (2:48). **the element cannot exist**.

In Gans Box you Increase Alkaline so the Matter changes to Plasma

Isn't this what you do **in your Gans production unit, you create alkaline-ness at the level that the matter changes to plasma, you call it a Gans**. This is what you need to do in your ?? plate, as you increase the alkaline-ness and you reduce the acidic, **the possibility for creation of cancer, or solidification and creation of circuitry is impossible**.

You Become the Soul of the Creator

It's simple science, and most of the KS have not understood this. As they tell me, explain, but we thought you understood this a long time ago. **It's the energy transfer to giving and taking, and when you bring the balance, you lead to the creation**. And then if you understood more, **you can push the alkaline-ness to the point of the total fields that is less G, that you become the giver, you become the receiver, you become the soul of the Creator**.
Q: Less gravitation ?? that's the line of increase
K- A weaker G, weaker in the strength. And that **weaker comes from detachment when you give more. It has nothing to hold onto, it's the open span of the U**. (2:50).

Science Wins because it Explains the Religion

This is where the science **explains the ethos of the path of belief of faith, and theology**.
Q: Theology teaches to be less G?
K- That's **less possession and detachment, isn't it. So that's where the science meets the religion, and the science wins because it explains the religion**. religion has never explained the science, that's why we say the messengers of science, are messengers of God. No where in the theology can you explain the creation scientifically, but **with science we can explain theology and the creation of the soul, so science wins, as it is the creator of it**. Now you understand, .. KF is where science meets the soul, as it is the creator of it.

Q: Is that why human relationships that are not possessive relationships tends to do better, whereas we have like, co-dependent couples, that usually have bad relationships, versus like ones that choose to be together, versus like one being possessive of the other? (2:52).
K- Maybe.
Q: I have taken a lot of your time, thank you very much. I live in the US but you said Kamala months ago … when they won the election, Mr. Keshe knew all along.

Rothschild's tried to Control China - Running US through Central Bank

K- The next what we see in the pipeline is the world peace. But we need the leaders to all look in the same direction. It might be slightly different polices, but overall life will be in one direction. You got to understand **the Rothschild's even met the Chinese leaders in the past, and they thought they can intrude, and through the finances, build but control the nation. In some ways they could, they did, but when Rothschild's met Mao Zedong he was a very clever man, he used them to bring prosperity to his nation, but he did not allow them to interfere with the running of the nation, (2:54). which is a big difference, in the west, they run, and they rule, that's why you got a central bank**. And that's why you got your financial structure, which is the Rothschild's running the US. And this will change internally as President Harris takes over, and there are other ways of the operation, will come into operation. We'll see.
Q: Thank you ..

K- We are coming to our 8 years very soon. the anniversary of the 8th year of the KF falls around about March. 361 KSW, 7 x 52 , beginning of the Spring will bring the beginning of the 8th year of the KF and a new life.
Q: I marked my calendar 3-21 2021
K- Someone asked what is the difference between Marxism and Leninism?
Marxism is the theology, and Leninism is application of the theology to rule, it's a mechanical way, as Lenin always changed the ethos of the Marx, (2:56). into a physical operation to run a nation. In the new American Administration we see a combination of both Marxism and Leninism together.

R: .. about the Body EU.
Q: … my Mom had a cancer surgery … jaw broken and metal plate in jaw. This type of T would help with the cancer. But would she have to have the metal plate removed before she could get into the machine? (2:58). Would it cause problems?
K- First of all you don't get into the machine, The machine is a way of what you call, progressive development, or enhancement of the perfect condition, what we call, … a cancer you have to understand if it is accidental, or emotional, wanting to .. and what is the reason behind it. In that way, even with the plates we have in the process development, some 10 years ago, but now with the new EU we can create conditions in some cases, for what we call, external body parts, depending on their position to be used or not to be used, or applied in the system. We don't allow anything like plates in the spinal cord, it depends where the jaw .. or where the plate is, and what is the function of it. We've seen in one of the trials some years ago, with a person which the shoulder joint

was replaced with a titanium joint, that as we were going through the process of regeneration and development of soul and the physicality, the shoulder bone started growing out of nowhere, and so the manmade titanium joint was getting pushed out of its place as the bone was growing. The whole idea came, that we start these things when there is an external, like a hip replacement, or a knee replacement with titanium, because we allow the bone to grow to take shape to go back to its original, when you have an obstruction, (3:00). or you have a knee which is already there, you push the joint out of place and you can create other problems with it. In the very near future, things like hip replacements and that kind of thing, becomes thing of the past. We have done many research on it, but
Q: So with my mom's case, would she have to have the plate removed ?
K- I don't know I am not a doctor, and doctors will be at the places where these are ..

Q: My Dad was born with a blockage in his main valve of the heart. .. with (EU) being in the womb again, would it recreate that blockage he was born with?
K- What is as a defect, or what is as a operation of the balance of the energies. There is a lot of expectations and false assumptions by many KS. Just that we have created these EU no one should be born with no defects, and everything done wrong will be perfected. But you have to understand, does your soul wants that? Has your soul created that position for its operation to gain, or to access to so many other souls? (3:02).

Just because we have the T does not we can intrude on, steal, and enforce. You understand? So this is a wrong assumption, that now that we have EU everything will be hunky dory, and we correct everything. But does the soul need, or wants to have that position and improvement, because what is the purpose of such a position, or such a condition, in the balance of the soul of the parents and the grandparents who created, and did misconducts, or did good, and have to be brought back to. As I always say, when you see a beautiful person, very beautiful, what's the purpose of that beauty, and when is it when you see someone very ugly, you say he is ugly. What is the purpose of it, what attentions does the soul need, that it created this beauty, that it needs to absorb fields, that it is so low. Why do we see lack of confidence in one of the most beautiful woman in .. in a very beautiful way, they are very weak in character. What does the soul needs, to create this, why does somebody go through a handicap to get attention, what is the purpose of the souls which created it, what have they brought to be in that condition.
Q: So does that go along with like "soul contract" …
K- There is no soul contract. It's accommodation of the totality. Sometimes accident happens, and then accidents are different. You see, at the moment there is a lot of taboo, there is a lot of concern regarding some of the vaccinations to the children. But we have seen how they change the whole life of the family. (3:04). these vaccinations, for life. And the doctors know what they are doing. One of the senior advisors to the governments, and to FDA, regarding these injections to the children, he knew what damages they do, but the money they gave him was so lucrative that he lied and cheated all the way through. What do these souls do? What do we do with them? It's the same .. the war in Iraq started with one man lied, because he wanted the attention, and the more attention he got the more elaborate he made the lies, and made the nation go into war. They were looking for an excuse, he was the excuse. So we cannot interfere and expect,

just because we have this system, everything we create will be absolutely perfect. The soul which receives it has to come to agreement with what the others souls, and his soul has done, and the purpose of his creation. This is the false belief amongst the KS that with this, if I have such and such a handicap, and such and such a disease .. yes we give you the position, but would you see where the mistake has been. Would you elevate you and your soul to understand the misconduct of the past, that you can put it right, that you expect such a change in your physicality. This is what we call, we elevate the soul. Because it needs to, it has to be understood, otherwise there is no elevation of ??

Q; So that also has to do with the ascension part, of how the earth is moving as well, to a higher consciousness as well. (3:06). repeats …
K- Yes, more or less, we are creator of all this. We are the creator and at the same time we have been created through it, to bring the balance.
Q: So when this T is rolled out and becomes the new standard, is it already in place right now, that when its ready to go that it will be covered through insurance, or a typical cost per use?
K- In a way, yes, but in a way, what we are looking at, due to its process, KF once we launch the EU, will introduce a universal insurance policy, for these units, which we means we cover ourselves for the process ?? for those who might want to use in the future, or want to use the system now. This is part of, because by the insurance companies we have to have this and that. The KF will introduce such a policy. This will be in the hands of the HKF, to structure such a policy that by the time we get 5 - 10 years, insurance companies accept. You can subscribe to an insurance policy to the KF. Because we do not know.
Q: ??
K- We do not know. there is no limitation. We'll have the exclusion that most of the insurance companies have, if you have a disease, you cannot be insured.
Q: Preexisting condition?
K- I have worked on this over past 10 years. (3:08). I used to own an insurance broker business. I understand, I am fully aware of the pitfall of the insurance policy. Exclusions when you need it. This is the way the KF will introduce this. approach is, nobody will be excluded as much as possible. In a way, you don't need to have a policy, you just get insured the minute you get ill, and you fiddle with the papers. If you have to be insured you do it in advance, or while you are sick. It can be done. But as the KF owns the majority of the partnerships in these organizations, we allow certain numbers to be done on the basis of, .. free use, or use to pay later, as you can afford. There will be no rejection. the only way we'll reject at this moment, in a way, is if you have like external systems, and you can handle it, we'll develop T to handle it. Then we can include those as well. This T belongs to humanity. We are just the caretakers of it.
Q: That's absolutely wonderful. It's my understanding they will be introduced to AZ very soon?
K- Yes, we are hoping, we are updating the systems so rapidly, and even yesterday in the lab. We are working, the KF team hasn't taken a break, just 1 or 2 days for Christmas holidays. We are still working, the systems are operated in a massive way. We will release the systems latest February, and we'll see the development and releases of them. (3:10). The leap in T in the past 10 weeks that I have returned back into the lab is huge.

Instead of waiting and doing things, we are introducing. The construction has not changed. the physical .. the envelop, stays the same. In the T development with our team, we saw there is no need, we cannot use any control systems, we cannot use any computers, because the system creates its own functionality. So we had to take all the computers, everything out, because it overrides. When we had the systems, the computers looking in the background it's a different field flowing then what we were trying to introduce, so all the control systems had been ripped out. A new control system is getting developed to be put in through the operation, the balance of the system itself. It's no use putting the system out and trying to change it in the process, because the housing and the attachment into the inner structure now changes, with the new development. There is no motor, no computer, there is no control system. And this brings a new D into operation, where the operator's soul and the wish becomes the controller of the system. Let's say, when you come in with a ball, which is the structure of your disease, your soul, your physicality, it places with the doctor, and then you trust him. We talked about this in space T, when we entrust our souls into the hand of the pilot. Now we entrust our souls in the hands of the doctor and the physicians, which they accept our souls. (3:12). Our development at the moment is in that level.
Q: … um .. the biggest reason is the health of my parents. I am waiting on a private investment to come about, then in the future, private citizens can buy the equipment to roll this out quicker.. just need to hire a physician…
K- We advise to a number of people who want to buy individually, to collectively agree on one center, and part of what we said to the people we signed contracts with, .. the number of people in the family of those who buy or donate the system, will be allowed to use the system on the basis of free use. In the beginning you say, I want 3 or 5 members of my family to be included for the usage of the system. So it doesn't come into the cost. Every effort has been made to expand the process, but at the same time a lot of people are waiting to be shown the first system, that then they'll kick out the rest. We are trying to complete the system in a way of at least, a complete comprehensive unit, without motors. We passed that, it has been achieved. (3:14). Now we are in the phase of control through the thoughts of the operator, which now we can do. It has been announced in the system. We are more or less in the final phase of the system to add the .. environmental system into the solid body base which has been built. Our aim is that when you enter into the system you see nothing, you just enter. It's more or less when you go into the womb, when you look into the womb of the mother, there are no reactors hanging everywhere. You create the environment form outside. this is our plan and that's what we are working on. Hopefully within the next few days that will be completed then, the physical structure can be evolved around a new understanding and development.

Q: So in the case of my mom's cancer she had to have 2 lymph nodes removed from her neck and she had to have her tongue rebuilt. Like with this would it regenerate her tongue..?
K- It all depends what it is, and what it will be at the time. These kind of things regeneration of the organs and parts f the body , is the simple part. The first one we did cost us less than 10 cents the system, to build it. But understanding the T, proof of concept. It's, when you know how to manipulate the fields of the U it is very easy to

develop systems. **The biggest problem will be to be able to measure the strength of the emotion, which has lead to the creation of what we call the condition**. (3:16).
Q; With that, with the emotion, with the coming of the emotion of the person, proper channels of that person going through and doing proper healing internally. It frees up to allow the machine to make the job easier?
K- It's the physicality and the STM which will accommodates it.

Q; So by soul searching and figuring out why to I feel ..?
K- You don't soul search, you make it available. You see the structure of the new system, is very simple, and that is, we create the environment that the life can exist and develop in an appropriate way for every cell of the soul. It's very much, I explained this .. you have a man and a woman, and the womb of the woman is fixed. It's the man which she shares life with, could be a Blackman, Whiteman, a Chinese, then it dictates what kind of life will take shape in that womb. You understand? Understanding that we create a fundamental principle of the environment, then what soul do we introduce into this machine, what was the expectation of the soul, and what does the soul, and the STP agree to develop in respect to the condition. The womb stays constant, what we introduce, because the egg always comes from the same source, within the structure, now what cell will we introduce? Is it a white, black, Chinese, short man and what is the interaction with the fields, (3:18). which we see the creation of that child. And now the science and T is at that level. With these EU, it's like a womb of a mother. The STM who enters it is like that sperm, what do we expect in respect to the constant flow of the love and giving of the system.

Q: So it's my understanding that prior to taking vaccinations, or the poisons that has been put in our food, is it true when we are first born we are born with 12 strands of DNA? And then after say, it's limited down to 2, through vaccinations and whatever .?
K- Do you believe that? Does it make sense? Has injections changed the color of your eyes, the length of your leg, and the color of your skin. Do you understand?
Q: Yes, oh, no is hasn't changed the color of my skin.
K- But you have to understand with the new T you can go, if you understand the desire of the STM is to look blonde, blue and your black and brown eyes, you can do that, at least in respect to your won eye and your own expectation, not necessarily in the eye of the others. Do you understand?
Q: So if it is your expectation, I guess I don't quite understand ..
K- It's desire of emotion.
Q: Okay, if that is what you desire.
K- Yeah, desire is a point of satisfaction. In an English word we call it, craving. (3:20).
Q: At some point as the T progresses do you see age reversal?
K- We don't see age reversal. It is possible, but it is being at the soul that you can live the span of time. We don't expect when you are 60 to be shown 16. You still can do, regenerate, but allow the cells at that age to be. But how can you tell your granddaughter, you are a (grandmother) when you are younger than your own granddaughter. It's a accept the ?? of reality is another point.

At the time of creation, as Messengers of Creator, we have the opportunity, and we use this to manifest ourselves in different ages and D, and we can do that. We stay on this planet for thousands of years, and we go from one cycle to another, according to where we manifest ourselves. We take the shape and image, of the presence and the position. So it is possible, I can regenerate myself many times at age of, new born till the ago of hundred, then take shape in another D, and another new born. We have done many times. So it is possible, but you have to understand the desire and the purpose.
Q: Okay, say once it is, and you say were 80 years old and you want to be 30 again, you still retain all the knowledge and everything you have up until that point, correct?
K- I was explaining to one of the KS, I even remember where I slept, (3:22). and where I was, and how long I spent in deserts waiting, and what condition, and what did I see. In the process of time, when you choose the position of what we call the STM, to exist within the D of the physicality of the planet, you carry the whole memory. As I said, many times, tomorrow is what we call the New Year, and we had the Christmas, and we come into the Easter, I said many times, I even feel the hammering of the nail. And then you remember the beheading of the head, because we have seen and we felt the bullet going through the body at the time of ?? parsadent. You live the full cycle with the full memory, and many of it brings pain.
Q: Oh, okay… wow!
Yeah, it is definitely a whole new way of looking at things, of opening up of consciousness, and thinking just how this works. I didn't realize, I mean I knew there was a lot to it, I just didn't realize the approach, and it is absolutely incredible.
K- It is what we call … you call it the RNA, we call it memory bank of the STM. The soul stays the same in different condition of physicality, it's manifested in different D. This is what, because we do it so often and so normal to us. In many teachings I explained, when your soul arrives at the position, then it decides what shape and color in respect to its position, to manifest itself. (3:24). If you appear on Moon and trying to breath the O which is not there you don't survive, but your soul adopts to the environment how we can get the energy to live because, breathing is a way of absorbing energy from the environment. What kind of energies can you absorb from moon that guarantees the survival of the physicality and the life of the soul. So we carry memory in respect to the position and time of the manifestation. And this is what we do as messengers of the U. There is no time and space, we just change our position according to the environment and manifestation of time. This is why you see in many of the holy books they tell you how, and where, and when the promised one will appear. Because it's them, it's the same soul, it's my soul which says, this is how it will be. So I arrange it to be there when it arrives because I promised and I show it. This is when we explain the creation of time and the presence and position, that's how it is done. We plan it, and then we deliver. It's just you say, I make you a cup of tea, and it will be Earl Grey Tea, because I decide, that it will be a cup of tea, and it will be Earl Grey, so I make it that way by the time you come home. We do the same, because with us it's the same soul, promises I will be there at that time and that will be it. So as I promise I deliver, because I make it. I have the time of 2,000 years, you don't, so he ?? appears, as the promised one. It's the same soul delivering what he said. It's the same, when we say something, we don't lie, we just leave for the time and the position, (3:26). for it to be delivered according to the time and the space. But for man, expects to see it tomorrow.

Q: So it was the planning stage prior to birth and all that. But while we are here on earth, I don't know if it is a meditative or prayer state, or dreamlike state, if we can go into it with intention, we can alter it, as a way of more planning, correct?
K- Intention is a desire, it's what I want. So what you want, if it is correct you can manage to do it. I want somebody to love who is this, and this and this, and because I expect that, my condition, I find the one I want. You know go to, you look for an animal, I want a cat which is this, or a dog which is this, this, and I go to as many kennels until I find the one I want. Or a car, it's the same, desire.
Q: It's all that intention, .. it's about the desire, craving, that you go into it with what you desire, you crave. What it is that you want…?
K- It's a shopping list of desires. If you look at it.
But the thing is do you have the ability to meet the desire. I would like to have a Rolls Royce, but I don't have the money in my pocket. Do I build a business that can give me millions to buy a RR, or I rob a bank. I desire it and I find a way to create it. It's the same way, but at the level of the soul, we cannot.
We promised the change, and the change will come because we organize it the way it is. But we cannot steal from the souls. (3:28). We encourage the souls to collaborate, to cooperate. We'll find a point of collaboration and working, be it in creation of a child, be it in creation of a nation, the planet, or U.
Q: Okay, that makes perfect sense, I understand now. Now it will be the perfect way to explain it to my family .. thank you so much.
K- I hope so. I wish you the best for your mom and dad. and Happy New Year.

Many of will spend for the first time New Year alone, as the lockdowns by the governments enforcing new conditions come into operation. It will be the first time mankind will not be able to get together to celebrate the birth of the Christ. As what happened last week and the coming of the New Year tomorrow. And this might be a point for contemplation, does the man need to have a companion in the depth of the space. Or do we become as we are tonight, celebrating the N Year, "the last man standing." Today, as what we believe, and what we'll see to be the creator of the next generation of life. In a way, this virus has brought many new realization to man, and in a way, and in a way the mankind has become a passenger of this spaceship of the Earth. (3:30). in the D of the U, and now we are learning how, as "a last man," to handle the viruses, as "a last man," how we contemplate to exist and celebrate the memories of being on earth, while we are isolated. In many western countries tonight, they cannot meet anyone but their own family, most of them on their own as it is forbidden, as we actually become individual people, in the spaceship of earth, confined to space and dimensions that we cannot interact. Maybe this is the first time man gets the true feeling of spaceman, locked down with a conditions, and how as "a last man standing," we survive, we live, we celebrate a time, being, and having time to be with each other. Enjoy, those of you who are believers in the path of Christ and celebration of the New Year.
I wonder if any government will carry on with the lighting and celebration the way they used to, or as we have seen in some of the cities a meager 1 light or 1 statue, symbolizing the coming of the New Year, and Christmas.
In so many ways, we have entered a true age of space, and space T and in interaction in the life of the U. The virus and its ?? and solitude, and singleness, to see if we survive it.

Let's see. Shall we call it a day. (3:32).
Q: You taught we were to sweat 99% and 1% of inspiration. I now believe that K T is the other way around, 99% knowledge, and 1%
K- and no sweat ..
K- Plasmas do not sweat that's for sure.
Happy New Year.

R: 361 KSW ..
END

362nd Knowledge Seekers Workshop; January 7, 2021

ENGLISH TRANSCRIPTION

K- As we are on our 362 KSW, as we are on the first teaching of 2021 we welcome you, the new year. (:08). We wish you one of the best for ever for mankind. We start this year with a lot of hope, knowledge, anxiety, and the society today is totally different then when we started last year this time, the first teaching of 2020. **We are facing massive what we call psychological pressures, and controls**, and uncertain future ahead of many of us. With what is known as Corona, and what has turned out to be, in the past 12 months, changing the lifestyle for millions of people.

New Vaccines some Frontline Doctors have died

We have seen **the introduction of new vaccines, we have seen reports, and how some of them are helping, and some of them are creating more havoc, than before. In the process of these trials, as we see, has started, many of the frontline doctors and nurses, have become victims of the vaccination. And we seen many doctors have already died**, and many of, what we call, frontline helpers.

Allergies and Russian Roulette

How this will change humanity we do not know, but one thing for sure, this virus will unite mankind. In so many ways, to understand more, and to bring a new dimension (D) for those who understand the process of creation. In so many ways, we take an injection, it is literally, what I said to one of the KS, **this is a Russian roulette you don't know what will come on the other end of the bullet, and would we show reaction, would we show no reaction**. But there is one thing for sure, most of the people who have shown any kind of reaction, they have already shown signs of, (:10). of being allergic to one

thing or another. **Majority of the cases are those who show high allergies, or hidden allergies, especially as we have seen one of the doctors in Miami, who lost his life within 3 days**. Has been that those who are allergic show high sensitivity to anything before, are the most vulnerable. So what **we advise is, most of you who are in line with your governments to take. Try to find a solution with your doctors and government**, if you are allergic and **you can prove it, not to take the injection**. At least till more data is available for all of us, to understand the position of our body in respect to the injection.

New Technology Systems to be Tested and Submitted to Heath Authorities

On the other hand as part of the **KF, in the coming days**, 2 new systems, actually **3 new systems, will be introduced into the hand of the doctors to test and try**, and hopefully by the time we complete these reports. For the first time **we'll submit full reports to health authorities with the full backing of the doctors, and the number of patients**. this will go on the back of the data we created, in the Corona report of Iran 2020. With this new T we have developed a new cycle, a new process that with, that will allow to see how fast doctors can reverse, revert, or confirm the reversal of the Corona. **This is a new T and for the first KF will directly submit application to health authorities for submission of a new system for Corona.** In a way, we are not submitting an injection, we are submitting an environmental changes, (:12). which can see with the proof of the doctors brings the condition of the reversal, or at least control of it. **This system is unique, never been shown in public,** never been disclosed, but it will create what we call a stepping stone, towards not only for the viruses, but for space development **conversion of the viruses in the space. This is important for development as this system will be part of the new EU, what we call controlling system**. Many of the features of it will be disclosed once the approval, and test results from doctors have received. We shouldn't have much problem in testing maybe 2 - 300 people in a couple of weeks, as there are many cases and the doctors can rapidly test and confirm, or ask for evaluation of the data by authorities.

Changes Environment in a Room - Many people at once

This **is not only can be used for human body, but it can be used for environmental changes. Where we will see, the change will come by changing the environment within the room, that a number of people**, can be at the same time supported. this is possible, this is the next step in the development, and we hope for the first time not showing an injection, but showing a system, a T which can help with all viruses. In the future it could be a flu, or any kind of ADHD, or it could be any kind of Parkinson's. We have to see if we see to these the same as the viruses, as developed for the EU.

My Wish that New School of Thoughts will come out of Corona
My wish is that, (:14). this process of what we call, Corona will and create a new school of thoughts, a new school of understanding the creation.

5 Years Ago Ali of Canada - hands disappeared - then stopped

For so many of you has been a system, "what can I do?" In the teaching in the past few weeks we have elaborated the understanding about the knowledge of the STM. **Today I want to teach you something new**, something that some of you can make it tangible, some of you already achieved this, or you couldn't follow it up, or you couldn't understand it. Some 4 or **5 years ago we brought this out in a process of organs, arms, or hands, in the test we did in Canada with Ali, and then it got stopped**, because some things were not understood.

Extend STM beyond the Boundary of the Physicality

Now after years, we think most of you will be able to achieve this. **This is the reason why we introduced the 5 Cups**. Last week and last 2 weeks we showed you the elevation of the STM, understanding the presence of the STM, in respect to use of .. Cups of the soul. But now there is a dimension, but **in reality you should be able to extend the STM beyond the boundary of the physicality, in a way, sending it through a shock wave of fields, of the plasma condition of your own creation, which has created you, to cover the boundary of your physicality, which means .. you go through a shock wave of fields, that any virus, any other things will be seen to, will be balanced off. .. you go through a cleansing system through your own structure**.

Become Humble - Lower than the Cups so they feed you

How do we do this? (:16). In the process of last weeks teaching, **I showed you how to use the Cup of soul, and then in that process, how to create a soul of control of your own, within you, that is lower in field strength, that the Cups you have created will feed you**. In that process, the interaction of the fields with what I call, **humbleness of your soul, will manifest, enlighten your soul**, in the same process, when you come to understand that the soul of the Creator is much more humbler than you, then in line with the strength of the field from your soul, you will see the light of the Creator. It's the same process. As they say, the same in micro, and macro.

Extend Fields of Soul beyond boundary to Protect Physicality

So in this process many of you understood. Many of you trying to find a way to see if your soul can shine. In time, some of you will achieve it. But in a way, in that process we come to the next step in understanding **the use of the Cups, and how you can protect your physical body**. .. let me explain to you in a very simple way**. (If) you are in a physical position, in a physical danger and you do not want the physicality to be there, that will go through it, an earthquake, a car crash, an attack, air crash. You are in it and you don't' want the physicality to be touched. .. you learn how to extend the fields of your soul, beyond the physicality** and physical body of the man. (:18). You all have the tools with you for past 2 weeks, past 2 months. Go back to the 5 Cups, what do you need to do? **How can you teach your soul, or your physical soul to reach beyond the boundary of your physicality, that it covers it**. .. this has been taught in the 3 Books, and in some of the papers released, and signed into the patent.

"Black Envelop" makes you Invisible

Now **for the first time, maybe you can do it**, maybe you have a system that can not only elevate your soul, but **extend your soul** in the D of physicality where **the physical energy balance of your soul with its environment, makes you invisible**. In a way, you become a source. But in a way cannot be seen. In one of the patents and one of the papers, and the books, **I called it the black envelop, the way you put in an envelop, it covers, it doesn't matter what's in it**. You can put a pound in it, a note, you can put a king in it. It is the envelop which covers what's in it. And this envelop is what we are going to teach you today, that many of you can start physically see, physically test, physically understand the work of your soul. **We are targeting for 21st March 2021**, and in this process, a man who can cover and understand, and be aware of the functionality of his soul, will be the man who takes the first steps in the direction of understanding the operation his own souls towards the Creator, and becoming the passengers of the U.

You bring the Physicality with Atmosphere of STM

(:20). What do you do? Go back. You have the soul. **You have setup the system of the soul, and you are in it. Now you have to create a condition that your soul becomes more powerful than your physicality, that in comparison to physicality, in taking the energy from the soul, In a specific way, to the soul of physicality, you create a balanced barrier where the physicality becomes inside, the atmosphere, and within the sphere of the STM**.

Inter-atomic Fusion - Extend fields of Proton beyond Electron

As I go back, I have hidden this in a beautiful way, in a paper which **was published, "inter-atomic fusion**." Inter-atomic fusion we spoke before is the secret of creation, not in how you allow electron to fuse inside the proton to create energy, but in a way, how you **extend the fields of the proton that goes beyond the electron**. This is what it is.

Point in Front Forehead is electron - STM is Proton

Many of you have been told about **a point in front of your forehead**, that you have given it many names. You call it, whatever gland. Use this gland. If you understand it, by its D and its strength to extend the soul to it, and then beyond it. In a way, you have to understand, **the STM at this point, at this conjunction will manifest itself as a light**. As a balanced light with its environment. (:22). Many of you, you use, and in doctors tell us, that this gland sits right in front of your forehead, and in so many things connected to it. Because **it's the electron in the structure of the atomic structure of the body of the man. The STM is the proton, and this electron at that boundary, decides the feature of the man**.

Using Cup of Physicality (5Cups) to Extend Soul

And in that process, if you understand it, you can create, using the Cups of the STP in the same process. By placing the **Cup of Physicality in respect to your soul, and Cup of physicality in respect to the environment of the MG field of the Inertia, you should be able to extend your souls outside**. In a way if you understand it, I can create the right condition, you **can become invisible** in a visible position, **because it's the Inertia which you have taken position of, if you go for the soul of the planet, you'll take that position in respect to the planet**. In a way, you should say, "you see me now, you don't see me now." In a way this extending the process of the STM beyond the STP, but within the D of the soul, and the soul material state, that makes you to manifest yourself in a visible condition.

Many Races in Universe do this - use tip of toe create envelop - Protection

In time, in practice, you'll learn how to do this. **Many people in the U use the furthest extremity of their body to create this condition and position. (:24). the tip of a finger, or a toe, and then you connect to it, and the strength as being lower then the strength of your soul, you create an envelop, you will not be seen**. If you are getting attacked, and you see a bullet, **you can instantly do that, that the bullet goes through you, because you don't exist in the matter state, where the bullet has been made for**. This is how we make the wars not worth fighting anymore. This is how we, in a way, disappear the need of the man to kill to live, because if you can reach to this point, you'll start understanding **how to feed your soul**.

By Extending the STM you Feed and Clean yourself

In a way **the feeding of the STM through the extension of the soul beyond the physical boundary, becomes part of your daily routine. It becomes how you clean yourself**. .. in the **scriptures** in the past, they called it, "to pray." **To pray, wasn't there to pray to the Creator, it was to pray beyond the boundary**, that the man finds himself .. to feed himself through the STM. **And man got it again the wrong way**, the physical way of bending, and standing, and praying and the rest of it.

Using the Cups to extend the soul

If you can make the **Cups of .. Inertia, with the Cup of the STP in a specific position and condition of your soul, as you structured it before, you will be invisible**. .. you become invisible and **you become a source of energy, but not as a light. When you are at the strength of the STM, you become a light, when you are at the strength of the boundary of the envelop of the physicality**, (:26). and you can create the balance, you become invisible. And this can be done in a very easy way.

This is Needed to Travel by UFO

Because **you need to do this**, if you travel within the D of the space, when you go for example, **if you go in a physical manner into a UFO, into the landing position on a planet, you need to know this process, because you leave the physicality D of the**

controlled environment, to unknown, where you have to change. And when you withdraw the soul from the D of the physicality, then you'll see what shape your body will take in respect to the environment, and how it will guarantee its survival, because you have created a balanced field environment in respect to the Inertia of the environment you enter, plus its MaGrav position of this planet. This way if you are in deep space and you want to take .. a space walk, you don't need to create such a thing as a MG field of the planet, but of the environment, fast forming fields, but still creating M and G fields.

Retracting Soul Provides Protection Regeneration and Feeding of Cells

This is how we said from the beginning, the **5 Cups is a sandbox for many of you to start working on**, and anyone, or any nation, which ignores this, its peril, because those who come and go, they'll be through your house, or your life, without your knowing, as they have the possibility to do this. **If you have taught and have understand it, this cannot be done, because it, in a way of protection of the fields, no one can intrude in the D of your soul.** (:28). In teaching this process, .. how to make man to become invisible and in a way to feed his soul, that he feeds his physicality, **when you retract the soul back to its position, as now it becomes the receive**r, and in that position, soul manifests itself within the structure of the physicality, then **you can regenerate, repair, feed all the cells of the body which could have had unbalanced fields**. In this process this is part of the teaching of the deep space travel.

UFO/MaGrav for Those who Don't Reach Elevation of Soul

As I said, **for those of you who do not reach the point of elevation of understanding of the work of your soul, we give you the UFOs, and MaGrav systems.** For those of you who elevate to understand the work of your souls, this is the way you travel the depth of the space.

When I Teach the Whole Unicose Hears - Advanced Races can utilize

As I always said, when I teach, **I do not teach for the human race only, but my knowledge is for the soul of the U, that every soul created in the Unicose hears and gets elevated.** It might not sound something for you as humans, that it can be done. **But those travelers of deep space will receive this knowledge, the same time as you do, but they are more advanced, now they know how to transmute and transfer, and those who are on the edge of the knowledge of the creation, know, will find a way, to find a closer way in line to meeting their creators**. The evolution of the T in teaching is understanding the knowledge from the Creator, and in this process, many of you will find new positions. (:30).

We Create Soul of Matter - Not Matter - Inertia and Intention decide to manifest

Many of you will understand. As I said before, **in the MaGrav and Enhancement unit (EU), we don't create the matter .. we do not create matter, in the EU, we create the soul of the matter, that what it fits into the Inertia can convert. We create the soul of**

the gold and Cu, and in the condition of the Inertia of the system, it creates Cu if the wish of the man who runs it is to produce Cu. This is the same, if your wish is the same to produce visibility, balance in energy and fields, this is what you shall receive.

The Cups Easier way to Elevate the Soul - cleanse physicality

The teaching of today has to be understood, especially those of you who work, and start working on the balanced field effects, understand the work of the fields. And it is for those of you who understood, have made the systems, made the Cups, now you test. **This is much simpler than trying to see the soul, trying to elevate your soul, because this is a stepping stone in a way of cleansing the physicality from D of disease, that the soul becomes free to be able to elevate itself**.

Cup #6 to travel the Universe

We taught you from top to bottom, as much as in the physical condition we taught you from bottom to top. We gave you the Cup of Life to start with, then we gave you 2nd Cup, then the soul, then the soul of the planet, but now there is a 6th Cup, which comes into operation that it needs for the man to have, to decide, (:32). which U he will travel into. The **Cup number 6 is the D of physicality of the man who want to travel within the space of this U, you need this to be below the Cup of the soul of the planet**, and in that process mankind has not achieved that level of knowledge.

Travelers of the Universe - Cup 6 - Dictate Position - New Star

But those **of you who are travelers of the U**, who understood this, and have already reached this position, to travel the depth of the U, **you need this Cup that you create the fields of the position in the U, that you will arrive at that point**. This is the way, when the **physicality of the man leaves behind on earth, and the STM leaves to find a new position in the U**. The **balance of the MG field of the soul of the Universe, in conjunction with the fields of the STM will dictate the position** of the STM in the U, where it will become the center point of the soul. **A new star**.

Finding Souls of Your Relatives in U

In a way, in the future to come**, when mankind reaches the maturity** of the knowledge, then **he can pinpoint where the soul of the father is, grandfather** is, or brother. In a way, this is the next elevation for mankind and those in the space who understand the knowledge. If you could understand, and in the coming time, many of you be able to create the soul of the U, you become the passengers of the U. **There is no GPS, it's understanding the field strength of the position**. (:34). Up to now your soul was in condition and position of the STP. In that position you **can remove the STP of the earth, the MaGrav of the earth from the system and make the soul of the Cup of the U, the position of the center, you become passengers of the U, and you become detached from the earth**.

To become Independent of Physicality on this Planet - Cup Inertia

In so many ways, then you have to understand how you will change the Cup of the Inertia. **If you remove the Cup of the Inertia, then you stay in the level of the physicality and the STM in the D of the universal position. .. you become independent of the physicality on this planet**, and the position and space on this planet. **This knowledge has been hidden to man up to now, now we have shown you the way**. In the coming time, the scientists of this planet will develop this T. The KF research **centers will show the first systems in the coming weeks**. We have already setup to achieve this in the systems which we have developed. .. away from the physicality in the D of the fields of the U.

Rapid Push in Knowledge in coming weeks

In so many ways, **in the coming weeks, the evolution in knowledge will be beyond man's understanding**, but we push you through. **We push you through so rapidly to understand the totality of the knowledge. It's the responsibility of the KS to teach and understand this rapidly**. To develop it. This goes especially to people like Alex in Canada, who have endeavored and touched the knowledge. Very few people who have managed to break through, (:36). and teaching it is even hard for him to understand. He is one of the blessed souls.

Become a Shining Star in the Universe - Enlightened

Try to understand, the beauty of creation, then you'll understand the knowledge. Try to understand the need of your soul, not the need of your physicality. Try to understand what beauty has been offered to your soul, that has chosen to be present at this time and space. Try to understand the process of the elevation of the STM through the STP, not STP through the STM. **Try to understand how the STP lead to the creation of your soul, and then through that process decide the position and the place where the physicality will manifest itself in agreement, and the balance between the STP and STM**. (If) you get it wrong, you'll find no home and no shelter. (:38). **You get it right you become a shining star in the process of creation of the U and maybe if the elevation, the service, and servitude is pure**, to even reach the level of understanding of the process of the creation and **being enlightened with the light of the Creator**.

We Will Still Make the UFO

This is in your hand. This is what we said, to **walk away from matter stat**e, to walk away from not understanding, but getting bogged down with reactors and whatever. Not all of you will achieve this point. In a way, in the coming time, **we still shall see the UFOs** , and still see flying structure, and see man working to keep busy with in the time and the space, his life.

What Do Other Races in Universe Do

But there is one major question for the human race. **What do other creatures of the Creator, do in the U? Do they go to school, to work, or to factories. Do they waste their life** 16 hours a day to rest for 8, and then working 50 weeks a year for 2 days of meager rest. Then you understand **you can create anything, and at the same time be detached, because when you strengthen your soul to the boundary of the STP, the life of the Inertia**.

You Decide How you Want to Manifest Yourself

You don't **need a clothes to wear as the environment of your soul becomes your frock**. This is what you'll be. How would you like to **change the color of your skin**, and what you do not want others to see, and to be seen. (:40). This is how mankind will become travelers of the space. We will not carry shoes and clothing, but **we understand the extension of the soul and the D of physicality and the wish of the physicality in the D of the soul. I am a woman, or a man, and I want this man or woman, to see my physicality, the beauty I create for him or her, that I could have a lover**. I want no one to see me because this is for me, I create myself in the combination of the fields, that my gender is mine for me to know. .. I stand clear of any misconduct as my soul has already agreed with the soul, that in that process I manifest myself to who I want in the position I want. Man will not be wearing a frock, a suit or a skirt, as now with the creation of understanding this process that **you can extend your souls beyond the D of physicality, with simple Cups** that you understand, you will learn that, do I need clothing, to be heated, to be kept warm, do I need to kill to feed.

You Taste the Lamb without Killing it - No Need to Eat It

In so many ways, .. **you stand in front of the lamb, you say I like your taste, he says, take from plasma, you have the taste without killing**. The same as what we did with the cup and the orange. **We don't need to destroy an orange, we are given the essence, taste, and feature of it. Then we taste, then we don't need to eat, (:42). we understand the love of it, the creation of it. But we don't need to take energy from it. We admire its beauty and everything else we want**.

You become the Cup and the Orange - Enjoy the Beauty

In the space this way no one will kill. In a way, in the space to understand this, **you become the cup, at the same time you are the orange. You are a cup to understand the emotion, beauty, and everything of the soul in front of you, but at the same time you are the orange to assess and enjoy the beauty of you.** In so many ways, mankind reaches the point of maturity that no one can kill, as we become deprived in the essence of the beauty of the beauty of what we wanted to kill. In a way, no soul will touch another soul. .. **no soul will ever desire to be in the position that it has to disintegrate a soul**.

Plasma Teaching: Chemistry (Matter) - Plasma (Fields) are connected

In the teaching .. I explained in a simple way, that many of you could not understand for quite some time**, how the plasma works**. And in a simple way, maybe some of you would understand this process, as I explained to KS. **In chemistry you have molecules made from the interaction of the atoms in different shapes or forms**, and this is what you see. In the world of plasma and understanding the conversion to the fields and essence what you call the A, B, C and D, (:44). is totally different **(draws 4 interlocking circles labeled A, B, C, D). In matter state you need this to create yourself a volume and point of physicality**. In the world **of plasma it's like having a pin and having the elastic of different strengths, but all connected to the same pin, where A sits here, B, C, and D sits here. Where in essence the energy level of D is part of the C, B and A**. This is the difference in the world of the plasma T and understanding the creation, in the plasma state in the level of the soul. And this (interlocking circles) is what is in the matter, of the physics, and what we call matter manifestation. Where here (pin drawing) **we only see the A from outside, but the others with the strength are inside**. And if we have a D here this (D inside) will connect with this (D outside).

The Strength of AA identifies where the Soul was Created

This is for example, why in your work, and in your creation of **Gans's we tell you always use a carbon (C), where in the amino acid (AA), the C connects to field strength of the position and the systems**, there is no more matter state, but totally and utterly field state. And this is what we see. This is what many of you have to understand. ?? wherever you create the systems for you to be invisible, or to be in a way to allow the soul of you, boundaries to be achieved, you have to remember, (:46**). your boundary, your field strength of your soul is made of the field strength of your AA. Those of you who understand this, can extend it to the next knowledge**. Those of you … you can understand what this will bring you, in **being able to even identify this soul is from which planet, or which part of the U this soul comes from. When you look at a star, you understand this star has its origin** from a soul from earth. because you are connected to it by its basic AA dimension, it's very much we say, the guy is Chinese, or Japanese, or Brazilian, or English. **Through the strength of the soul we recognize the position where the soul was created**. Has no nationality, and no point of planet, but the **point of essence of his creation**.

End of Religions - They Served Their Purpose

In coming time .. in **next few weeks we'll take you through** this process of teaching. We take you through the **process to understand how to leave the D of the physicality**. .. these teachings will touch the soul of the priests, Pope, Ayatollah, and those sitting as Rabbi and heads of all the religious leaders, **as now they have to judge from their own soul. Many will leave their flock**, .. the churches and mosques, as they understand they themselves have become equal in knowledge, understanding of their own soul. (:48). .. **we see the end of religions**, as there is no one to follow the religions, as **they have brought man to the point of maturity of today, by guiding and protecting** those who understood.

Creation of the Nonphysical matter through STM is the Final Frontier

In so many ways, the process of **understanding the process of creation of the nonphysical matter through the strength of the STM is the final frontier**. Where the mankind will open the space of the U and Unicose for itself, for it to become its home. If you understood and understand today's teaching **we have given you the golden key to become the passengers of the U, where you can choose the place** and point in the U, and where **you decide how to manifest yourself** at that point and the presence. Understand the work of the Cups because those are the way, the Cup of your Life, the Cup of your soul, your physicality will dictate your life. **These Cups .. are sandboxes, and the actual practice and understanding comes with the D of your own physicality**.

Your Soul is Made out of the Inertia of a place and Position - Goes back there

In so many ways, **try to understand the process of the creation, not the process of the Creator**. In that sense you shall fail. Try to go back to understand what we mean by Inertia, **understand what Inertia is in combination of the elements of the place and position of existence**. (:50). **You might be very handsome in one Inertia on the planet, and on the other Inertia you could be handicapped**. You have to understand the totality of the totality of the interaction of the fields, irrespective of the matter state. You have to **understand the composition of what your soul has been made of, that you can play with it**.

AA is the Connection to your Physicality - Leave a Trace Back Home

Many of you looked at the Cups, .. Cups of the soul. but there is one thing again, 100% all of you have missed, **all these Cups create a protein on top. That's the link of the connection to your physicality. Without them you cannot operate**. And those of you who understand how to use these knowledge, you'll be able to achieve, to in a way to make yourself invisible, that people now understand that the knowledge is there, but **my wish is before you do that, practice with an orange and apple before you become the apple itself, which is invisible, but we can taste and smell you, but we cannot see you**. .. **learn how to leave a track back home**, if you want to come back in the D of physicality of the space and time you are in.

Lost Reactor Balls Went Back Home - via AA

Some of the **KS a few years ago**, moved to this point, and then in not understanding **lost couple of balls**. In a way, they achieved to create the position and the space of the fields of the D of where **the soul of the ball was, and went to it**, as the outer ball, (:52). opened itself back, **very much like the body of the man, when it reached maturity, opened up and released the soul, and the soul takes its own position**. We've seen with some KS, 3 - 4 years ago which they achieved this, and they lost .. 2 of their balls. The center balls, where the center balls reached and achieved the dimension of the soul of the position in the U, where by destruction, or opening of the outer core, the inner core took

its place, position and destination. .. this is exactly how the STM will function and work. And as I always said to **Armand, you lost your 2 balls**, but you don't know where they are because the 2 balls lost **were the soul of the system, and .. because of the AA you used in the mixture, without knowing, gave a condition and position of the STM** as a child, and in releasing the outer core, with the strength it found its position in the depth of the U. It's not that it hasn't been done, but those of you who achieved it, never understood where and how you achieved and what happened.

We'll Return to Earth by the Inertia Fields of Earth

If you have created a system in the kitchen, with that M field, which (it) is created (from), if you take now the system to the house of your brother, or to another position, and you try to create the condition, go back to the home in the kitchen, and you'll find out where you lost your ball. In a way, it's very **much the identification of the Inertia of the position, it's like that pigeon that goes back home**. (:54). This is how mankind will return back to the spot, same place, by creation of MG field, back to earth. This is **how the birds recognize their position, traveling from one continent to another, directly on the same spot** and same tree, it doesn't matter how tall the tree has grown, or if it has been cut, and only 1 branch is left. This is how man will take flight in the space of this planet and beyond.

Bring Mankind to Accept the New Soul - Become Detached from Physicality

Teaching of today .. as we said is the beginning of the New Year, to **bring mankind to the point that we are ready to accept the new soul, with the new D and direction, that we become detached from the physicality, we understand the ?? inter-relation of the collection of the totality of the soul, the STM, the STP, the soul of the planet**, and soul of U.

Today is beginning of Opening of the STM

In so many ways, as I said, it's like elastic, depends are you, or do you see yourself as A, B, C, or D. In so many ways, **the teaching of today is the beginning of the opening of the STM for those of you who are elevated to understand the work**. Don't become proud of what you have achieved, as at that moment you will loose all, in hypocrisy and ego. **Stay humble that you can receive, (:56). and stay humble that you can give**. And in that process the more you receive, the more you can give, the humbler you become, the more you will cover. And in that process the more mature you become, to understand the process of creation. I hope some of you understand this, and I hope some of you understanding these will convert it and converse it, to a way that many others can understand. I hope in so many ways, many of you through the teaching of today, have found the solution for every virus on this planet and beyond. And I hope the KS today will become wise to understand the use of the work of the field forces, and not the use of the matter state.

As I said, we teach for all to understand, **but it's the maturity of the man, what he can achieve, according to his understanding. I have shown you the way to the next level, to become the travelers of the U. But you have to find the key first, how to become energy without the physical D, while the physicality is within you, then you have to find the strength of the U, that you can travel in the depth of it to any position** as you wish. (:58). If you understood this, you will understand as mankind comes to understand the totality of the creation of this U, then you can create conditions to travel into other universes, understanding the principle of the travel within the strength of the MG fields of the Creator. As many of you understand, the more we teach, the more you understand that we know nothing yet, compared to the knowledge of the Creator and the creation. And in this process we understand **how feeble mankind is in thoughts, physicality, and in soul**. And it is our hope that one day, mankind or some of reaches the maturity point to be able to see the light of the Creator.

Any Questions. >>>

You Cannot Measure the Strength of the STM with Instruments

Q: .. is the Gauss meter can test the strength of the plasma, but you explained that this is lower then atom, then I don't think that any matter meters right now, (1:00). can measure the strength of the plasma right?
K- Is he on the line? Does he have any other questions to ask. Mr. Huo is one of the loyal supporters of the KF, and with a powerful position within the Chinese government.
In so many ways, **you cannot measure the strength of the STM, as we don't have the equipments for it, but you can detect its beauty**.
Q: .. something made from Gans, how to measure the strength of the fields.

You Measure Plasma by the Feedback

K- .. it's no radiation, it's a plasma fields of it, and soon we'll introduce systems for this. yes there is a way you can measure the strength of the plasma. You need to do in 2 ways, (1:02). one creating a field lower than the plasma of the Gans you created, that you create a traffic of the flow, and then you measure the flow of the strength of the flow, that will give you the strength of the source. **Or you make something bigger that it feeds the plasma, and then you again measure the feedback on its return**, because what it receives it gives out. **There is a need for develop new systems for man to confirm, because he is so physical the existence of the fields**, but with the present systems it is very hard to do. .. the flow is there because we see the effects, it's just finding systems that are so sensitive. Or create a position that they can create the understanding of the movement of the strength.

Races Measure Plasma by Emotion of Soul
Many races in the space use the emotion of the soul for measurement. What emotion a field creates, it gives you the D and strength of. Is the strength of the solid, strength of the gold, what emotion does it create in you.

It's the same as the field flow from the blood of the man in interaction with the field of the STM, creates the emotions we know. There is something which might be interesting for some of you to understand, how for example, if you are blind, deaf, and dumb you still have the feeling, (1:04). of joy, you can the happiness, or you can understand the emotion of happiness, without being able to see it, hear it, or the way using any of the senses.

This again, goes back to what you call **the MG field flow of the plasma of the blood, which it gathers from its environment, you call it the aura, and in that interaction, it transfers the energy to interact with the STM, and then, in that interaction, you create the emotion of**. So in a way, the STM is deaf, dumb, blind, but understands the field strength and converts that to the emotion of its fields. How the other fields within it have to react in respect to the field which has been received and interacted. This is how many of you will travel the span of the U, to be able to do the work.

Q: is like they use the freezing water to see the shape of the field?
K- No, the freezing water shows the direction that the fields are traveling, it does not show the strength of the fields. This is, unless you can measure and have to understand how far and what thickness they are. The freezing waters shows us the pattern fo the field flow, it does not show the strength of it, the material. (1:06). It's like we use the frozen water the same as we use the iron dust in the magnet. But the shape of the iron dust doesn't tell you the strength of the field.

Q: Salameea , what is the influence on the STM of the 26,000 solar cycle around the central sun of our galaxy. How does that influence the soul of the planet and climate changes too.?
K- We do not ignore any of it. .. (1:08). all the stars in the galaxy, within planet, solar system , effects and conditions, and with effects of hundreds of millions stars and galaxies in the galaxy and U, the same with the stars in it, all collectively decide how we react. We might see the atmospheric condition of this planet slightly different this year then last year. Because last year we were in a different position in the galaxy then this year. how much energy we lost and gained as we don't maintain same position.

(1:10).
Any other question.

Q: What could I use a Nano coated Zn coil or N coated Cu
to me it feels the same?
K- It's the field strength of the Gans's you produce, and .. it's the field strength of the elements which you have absorbed from the environment which you created it. (1:12).
Any other question (we answered this 2 or 3 years ago in depth.

Q: What do you see the soul how does it work?
K- You find the strength which the soul operates under, and it absorbs from it if it needs, and that's how you feel it.

Any other question. As I said before, we are not going to chew it for you to swallow it, you have to work on it to understand it.

Q: K says .. in the coming weeks, coming time, can he be more precise in the coming future breakthroughs?
K- No, (1:14). I am back in the lab after years in exile. In so many ways, the development is very rapid. gives me pleasure to open up I go at a speed the team can understand and develop …

We have a lab in Austria. .
we can show you the creation fo the soul today … it might be released soon

(1:16). and in that operational lab we have a zero magnetic field table

What we have achieved is beyond. I opened the lab in Italy, and they poisoned me to kill. So I closed it . we work with who trust. (1:18). We used to share knowledge on the edge, then they came to kill me. That deprives the rest of humanity of that pleasure. We develop very rapidly. As you were
the misconduct of the man, has become the punishment of the man.
Now they kill themselves, they die of Corona.
Any other question.

Q:

K- Which gland is in your forehead? (1:20).
R: you mentioned in front of the forehead.
K- What is the gland in the head ..
R: the pineal .. in the center of the brain.

Field Gland / Radar in front of Forehead

K- You have **another one, actually in some people it is in that position too. You have a radar receivers, in front of the brain, it's a gland on its own. In a way, it's a radar detector. It is as much a radar detector for the STM**, as for the STP and physicality of the man. It's a combination on the outer edges of the brain, just before the forehead. In a way, it does not take any siphoning, the shape is more or less the same, and in a way, the two sides of the brain, in the front, have one pieces of each in the front part the gland. That the difference, recipient, or recipient fields by the 2, even can dictate the position, D, and strength, and even the soul recognition. (1:22). The world of science, **medicine is not aware of this gland, because it sits right on the tip, we all carry it. But it is in 2 halves. It's a field gland, it's not a physical gland**. It does not, when we look, many people who go through MS, or ILS, we see a change in emotion, and perception of not wanting to receive. If you look at the shape of the MS patients, you see, and when you compare it to the emotion, you see it, the position of the gland. It's not a one single gland. It's one gland operationally as a field, but in two halves interaction. It's never been shown because it has a different operational function, what we call capabilities, man has never

understood. When you look at the **cross sections of the brain scans, of brains, you see it**. How 2 different sides have the same structure. We don't see this any further than the ?? dent tic. where the rest of the construction of the brain, as we go further into, or back of the head.
(1:24). It's the **tip of this point in the brain, which dictates the whole facial face and the body of the man. Till it's not fully created, completed, it will not start the structure of the total completion of the physicality**. And one of the reasons we change shape by age, is because of the construction of this fields at this gland, as it dictates our shape in the womb of the mother, through its functionality, changes by time, and with it changes our face, changes our feature.
Any other question (1:26).

Q; Some youtubers do channel universal being. . is this allowed how
K- I prefer to keep quiet about this. If they say they do and you have the knowledge of the Gans plasma and you understand it. try to see if they can explain the work of the plasma.
R: If they can, would that be a correct teaching?
K- In a way these things don't exist, if I try to explain it that way. .. there is a agreed work (agreement), .. in the U Community, no races are allowed to touch man. No races outside this planet are allowed to touch man. We communicate , (1:28) we interact, but we do not work within the structure to change the course of mankind, or allow people to say who they are. If you are you can stand out and explain who you are. We did that in one of the last Italian conference. I announced that there is one person in this auditorium who is not from this planet, and one lady got up and said, Me. And actually the person was not far behind her. If you are a being, a passenger of the U, you know where you stand. And there is one general agreement, mankind will not be touched until the man matures himself. So who sees the Gagulian, ?? let them speak.

(1:34).
with the knowledge you all have now, you all hold the black hole in your hand.

(1:38).

Q; Are you saying our Gans is black hole ..
K- No,

(1:40).
Q: That's why plasma can balance our fields and can restore our cells, you think, no?
K- yes, it can, but it depends what you want from it. We taught today how to extend your soul and STP to become invisible. If you understood that the rest should be easy.
Q: I think if you ?? inside a black hole you become invisible for other people, (1:42). maybe the same, and black hole is like a soul, it's a soul of the everything, our soul is the principle matter, is there any link between our soul and the black hole?
K- In the strength, yes. And in the collection of strength yeah.
Q: .. it's connected with the soul of the Creator.

K- In a long way, yes.
Q: Do you believe that this black hole creates other universes?
K- A black hole is the source of fields, more of the same, radiation of the same, and black hole is, if you have a black hole in a galaxy, and in that galaxy there are 100 million stars, or solar systems, so that BH capability is to produce so much more, and to be able to sustain it. The strength of the solar system does not come through anything but its central BH strength, and its interaction with its environment. So … what's in the pot will come in the ?? ladle, but it's within the structure of the, BH will appear, in time as a matter state or a ?? in structure of the ??
Q: It's a recycling machinery of, (1:44). all kind of matter of the U, Principle Matter and all kinds of matter, including plasma?
K- Yeah.
Q: So my feeling was okay, because I had this feeling before knowing you. I was attracted by your fields to get the answer of my needs.

Any other question ..
BREAK >>>> (1:46). (1:53).

K- .. as you saw the advertising of KF products .. new prices will include the shipping costs. (1:54).
Q: Is what you teach or share bring collective conscious evolution, so whoever listens and is open to your knowledge is contributing to a new field, which is spreading now.
K- In a way, when you teach you do that. It's part of the process of the teaching as you teach you share knowledge and in that process you come to be part of that knowledge to teach to more people as part of the collective teaching.
Q: involutionary and evolution. So the involutionary forces is what holds us back?
K- What does that mean?
R: forces which are against those evolution forces, (1:56). …
Q: I have spoken to people who astral travels, they speak of a boundary they encounter, that they can't go beyond. Is this the field strength of a certain level they have not yet developed to interact with?
.. repeats ..
K- It is depending on the strength of the soul, what it can go, and what it can achieve. .. what we said before the STM is on its departure from the physicality has a limit what it can go, according the strength he has achieved and where it could be.
Q: … now that we are graduating from the high school of earth, will there be another class after we leave? or is this school closing, (1:58). and are we individually going to open schools from now on. Has there ever been a graduation… form HS of earth.
K- Yeah, when you leave the earth you are graduated, but how and what condition ?? ?? if you decided the graduation at the point of departure on the physicality.
R: Many of us when we graduate we go out on our own, conquer the world or whatever?
K- In a way.
Q: Stephanie, .. (2:00). .. can K tell us more how to test the energy of the soul?
K- What do you mean?

Q: He said measure the strength of the soul? .. when said about you froze the water and see only the direction of the fields. (2:02). Is there a way to measure the fields?
K- Yes, we don't have the tools. Yes, but there is way we can measure. This is the question I asked years ago, has anyone measured the field flows of a magnet, the strength of it or the speed of it?
Q: He measured it with a process of ?? radio static?
K- Yeah, but we don't. There are certain systems developed but nobody has managed to measure the actual fields of the soul, or even the brain. There are some measurement tools they can measure and say what it does, but not in a D of the plasma. We measure it in the D of the matter state.
Q: How they measure this. .. How they measured, (2:04). the effect of the soul, the energy of the soul.
K- .. they find energy by position of its fields. So you measure how much fields passes through a specific environment and what speed, and that's how you measure it. But the soul is a spherical shape, and has different strengths in different positions if you measure.
Q: >. I actually measured it raja statically.
K- It's the matter state of it, not the field of the plasma,
Q: He said, you just said we measure it the same way. ..
K- No we don't measure it the same way. You cannot. the energy of the soul is spherical, 3 dimension. We can only do if we have the other vector, but we don't even have the systems at the moment who can do.
Q: . you measure 3 dimensions?
K- You have to measure the fields in all directions, coming and going. You have to measure in 3 dimensional, in all directions, not at one point. (2:06).
Any other question

R: Would the fields of unconditional love be part of that, we have a real difficulty as humans to measure , the fields of love, we don't have instruments other then a "mood ring,' and that's not too reliable. Is that tied in with the difficulty in being able to measure the strength of the soul?
K- What do you mean exactly?
R: If we could figure out a way to measure unconditional love …
K- In a way, we could, but you have to always consider incoming and outgoings. Is not a MaGrav in one direction. It's sphere magnetic fields. The magnetic fields of a sphere is totally different then what you call the standard rectangular, square magnet you use. That's why we see different strengths in different lines of this planet. It's not, (2:08). all coming out of the North Pole and coming in from the South Pole. It goes, and comes in from every position on this planet. the pictures we see with all the fields going out the North Pole is , idealized in a way, yeah, but the actual fields of this planet according to its rotation are actually bending down from the center of the equator from the top, and that flow of the fields, in conjunction with the magma flow underneath creates desert. It's not that deserts just happen, if you look at the line of the deserts on this planet, it's very much in line with the inclination line of the planet and the magnetic field flow, of the planet.
R: When you were talking about the field strength of the soul, we wouldn't be able to measure that with magnetic instruments would we?

K- No, not really. We need plasma systems, understand gravity, both going and coming in. At the moment when we measure a magnetic field it's one direction, one way, but in a sphere it is actually 3 direction, as I said in the other teaching it's a vortexes, spherical. it's not a vector, and one line. (2:10). and in the process it changes in the strength and everything else.
Q: Should we be looking toward the micro world or macro world to make such measurements for strength of the soul?
K- ?? both, it depends on which side.
R: Could you explain that a little more, which side?
K- Are you on the M side or the G side. which one are you measuring.

Q: is the process of individuation described by Carl Jung equivalent or similar to the process of totality that you speak of?
K- I don't know who it is, what he said. (2:12). As you know I am very ignorant about this, I don't read.
R: Well you read the books of the U and sometimes they don't deal with local ?? so well.
Q: Can you explain more about the 6th Cup?
K- We always announce there are more Cups to come and the 6th Cup which we introduced today is the Cup of the soul of the, what you call universal, galaxy either way you can choose. You decide. It's a positioning of the place and time. In the strength you can position yourself, how you will look, or how you will be, or which star, or part of the U you will land, depending on what you choose. These are the knowledge's the man needs, which are within his soul, and it is literally a database which is gathered by U Community over billions of years, from the time of inception, and is part of the knowledge of the Creator. We all have access to it, it's just we have to find out. It's no use landing on planet Zeus, when you don't know what you'll, what your response will be, what your aim is, because you still carry the consciousness of the man, at the position and the space and the time. (2:14).

Q: .. we have aura field photos available, is that the same as plasma reading, can we use this to see the fields?
K- No, not really. Aura again is in the matter state condition. The machines we have which you see. It's a big difference in the soul and in the field strength of the matter of the interaction of the environment with the soul fo physicality. The aura is partially the interaction fo the fields of the STM, and partially the fields of the physicality of the man's magnetic fields, and partially the interaction with the physical, with what we call the STP. It's a combination aura of what we see. It's a combination aura of many things. And when you look at the aura, which direction it is traveling, is inwards or outwards. Is it the aura of your G or M field.

Q: Jalal, go back to .. how Ali (Canada) achieved a balanced field (2:16). with the Inertia. At that time it was not only Ali, another guy achieved who worked with MaGrav achieved balanced field.
K- We couldn't confirm that one. That one .. when Ali was doing these tests most of the time I was present. It was a live Zoom, early morning sometime not open to public. But that one we could not confirm.

Q: .. we know the process how he achieved it. He didn't come through it because he didn't use the universal Gans's, he only came through it by the diversity of the Gans's what he used, at that time. Is that because some sort of the AA which came through of the process, which is made the balance field with the Inertia. Now what you are pushing us to do, that we increase the soul ..
K- We don't push we encourage you.
Q: … so increase the strength of the soul to come over the barrier of the Inertia of our physicality?
K- Yeah, I think I know which way you are heading.
Q: Is it the right way. (2:18).
K- It's possible. You can always try, but if you loose part of it, don't come and shout and cry.
Q: .. be careful about that .. now you say. you are responsible not me.
K- carefulness, what it means, can go wrong.
No the thing is we have a knowledge of the totality, but we see what the outcomes could be .. but on the other hand, you are the creators of the conditions, and you can change the conditions drastically with a small move.
Thank you
R: .. you signed one of the books .. " not everything in life is perfect." ..
K- Yeah, nothing is perfect, even when we sign the paper. The books are back in again, The English. (2:20).

Any other question.

Q: … on the central line of the Unicose, is that M or G?
K- both
Q: and does that correspond to our brain?
K- In a way, to our soul. Yes. (2:22).
Q: Does that go into micro and macro and multiple universes, connecting infinity ?
K- ?? yes … The cell in your toe has every connection to the cell on top of your head, because without the one, the other one wouldn't be there. So it's the same in the creation of the structure of the creation fo the U.
Q: so how is it with entities that don't have or don't need physicality? How do they feel?
K- They still have a soul. It doesn't mean .. This is what, the new dispensation comes. This is what was promised in the time, and for the first time we bring the STP to be one that they can, transmute from one to another, from the strength of the soul to the strength of the physicality to manifest or vice versa.
Q: .. wonderful experience to disappear and reappear. I always remember … (2:24).

K- There are announcement we have to make. The KF is entering the stage of delivery and use of EU around the world in the coming weeks. Most probably by February we'll be done with the new system. We are looking for medical certified medical doctors. You have to be certified, trained .. .
to be trained to be able to use the EU. We are looking at the moment something 20 to 30 medical doctors. If you are a medical doctor and want to be part of the ..

(2:26).
We train the local nurses
Any other question

Q; We measure the soul with the light source that emanates or the attraction of the fields?
K- It depends on both, what it creates interaction of the fields, with the fields of the soul, creates the light. But that light could be different meaning to you than me. What is inside that it creates it, what information does it give to it counts. Not in what light we see.
Q: When we learn and become invisible, can we change others around like people or animals too, to become invisible. for example, to protect them from an accident? (2:28).
K- In occasions you can, but I hope you know what you are doing. You don't want to find yourself on the back of a saddle of a horse you tried to save.
Q: is there a use for a ceramic Cups made by Ed for prevention. .
K- It hasn't been tested but it is quite possible. At the moment we have to test and understand how much it will be, released and what conditions.

Q: Australia, talking about disappearing. . an amazing Russian lady, Helena Blavatsky, she spoke about being in a horse and carriage, ready to have an accident, (2:30). and they merged into each other, and is that similar to what you are speaking about ..
She was quite an evolved soul or her mentor made it happen?
K- What do you mean?
Q: They should have had an accident and they passed through each other.
K- And they didn't touch each other?
Q: No, that's the story. that is similar to what you are saying.
K- Maybe in a way. It's understanding the knowledge which gives opportunity to analyze it, according to what everything included.
Q: .. a lot of the ancient knowledge speak about a lot of the things you mention … thinking themselves to England and back just by thought. (2:32). If they can do it we have the potential to do the same.
K- We attempt to do it in the position of suffering. we can do, I met, we know people capable to do this, but we don't need to do this to the point of suffering.
R: Do you mean like a mother feeling her child on the other side of the planet that got in an accident?
K- There are different ways. There are people in the point of suffering, regular, prolonged suffering, they do. Because the field of physicality, becomes so weak from the strength that the soul can transmute at the strength of the field of the Inertia of the soul. this is possible.
Q: even my father had experience in the war locked in jail for 3 months . He had conversation with his sister, when he came out of jail, she recalled the conversation word for word, but they were 200 km away from each other. She was not there. under the stress
K- We have met a lady who used to do this, (2:34). not to stand abuse. And every time she went to the same place, and people always confirmed that she was there, while she was somewhere else physically. ..
In a position of strength we always take the overwhelming position of the physicality. In a position of the weakness we take the position of the soul. This has never been

understood by man, that's why in that point we go so low that we go below the parameters fo the STP. It's not that always we extend ourselves to overcome the fields of the emotion of the man. You can go in negative emotion of the soul that has no control by the flow of the blood, which creates the encasement of the soul, . it's below radar, and then through it you link and manifest. You don't go by the stronger side, you go by the weaker side, by through the weakness of the .. M field strength, there is a big difference, you can do that, many people do. .. in a physical D, (2:36). we always try to have the best and everything, and in the D of soul we try to be as humble as possible. And you can do. People in time of pain. I have said this about the woman when she was young she trained this not to feel the pain, when she was getting abused regularly, as a child of 7, raped. Then she made it into a habit.
Q: Even myself I have this cross of light. .. (2:38). .. light crosses appearing … how do these people see these are they clairvoyant .. it's beyond me.. I thought maybe we have to be more aware.
K- In the process of understanding we strive to understand according to our intelligence and what we believe in. Many of us don't accept things or cross the line, because of the dogma and teaching we had as a previously in our younger age, or by impressions by our families or friends or whatever. So we all have the possibility and capability to do anything. The only limitation is our own understanding of our condition ..
Q: . (2:40) . having an open mind is very rare
K- We extend our knowledge according to what we can accept, and what cannot be understood and accepted, we can understand it, but doesn't mean we can accept it. that acceptance is the extension of the knowledge, is elevation, and many people read, understand, but cannot accept because they already committed themselves to another D another order. And this is what we see with many people in this condition. All of us can have the capability and ability to do everything, it's just that what we believe in and what we can accept becomes the limitation of achieving.
Q: So that belief creates a prison around an idea, and we have to drop everythin we think we know ..
K- We don't need to drop. In dropping is there something wrong with it. Is adding to, it's in addition to what we have, and it's the same for the soul and the physicality. For those fo you who understand the work of the soul and be within work of it. You'll see the limitation of the soul, and then you'll need to go back to a lot of teachings, (2:42). and ?? understand the soul of the knowledge, and you'll find a solution in it. It's not that once you find the freedom of your soul, that's it. You are completed. No because the souls have their own D of physicality and D of restriction. It's an old saying … the bigger roof the more snow you need to plow. So the larger the knowledge becomes, the more we need to understand, we need more room to understand.
Q: The more knowledge the more responsibility I would say.
R: More rooms to dust if you were a cleaner.
K- More streets of knowledge to sweep. You know a few years ago, a few years ago they brought a small machine to collect the dog poop. …

(2:44). the truth is how we envisage our own knowledge. How humble or how arrogant we are ?? about it. The knowledge of the man is a collection of what he sees through his

life. and nowadays, what papers and what he read as books then he becomes a wise man, and maybe he adds something of him to it, and then he thinks he is the creator of it.

If you could have the knowledge I have of the creation, and could stay humble to teach, the way I do, maybe you reach the level of the Creator's understanding of the creation, maybe. Still teach with absolute humbleness and still live on the same level. And then you understand the true meaning of the living and the life of the Creator, and then still live in the D of physicality.
Q: As I was saying, we are all on different levels, .. you would have to if you are on level 1 it's hard to ump to level 5, you have to go to 2, 3, 4 and then you can get to 5. We have to be humble to understand the level we understand, and try to , (2:46). better ourselves in each life.
K- It doesn't take much to jump from 1 to 5, but it needs a lot of courage to understand that I am on level 1, that I need to get to number 5. This is most of the problem with people, or cycle of life.
Q: time is irrelevant.. if it takes time to achieve a degree of enlightenment. it's a process of experience. ..
K- Enlightenment doesn't need time. Enlightenment needs the position of maturity of understanding. And Jesus, Moses, Mohammad or whoever they never went to school. Some of them can't even read and write.
Q: They wouldn't have been at level one, they would be at level 4 or 5?
K- We never know, maybe they still are at level 1, but understood the truth in a different way and they could explain it. It's what I was explaining … (2:48). if you look at the structure of Islamic religion and how Mohammad came to be a prophet, and his claim. Is his claim any different then how Moses did? Where did Mohammad go to get the message?

(3:02). It's in the mountains.
Q: I think it's a place more sacred away from influence. The mountains, even in India, they have a festival, secret place people gathered they.
Q: Are the mountains the antenna for the soul of the earth.
K- There is less interruption.
Q: Here in Australia ,
K- It's rock.
..
R: You said the mountain is an interruption to the soul of the planet so soul of U?
K- Book #3 were written in the mountain. Book 4 too. (3:04). The essence of understanding, at these positions you find solitude, and solitude brings wisdom. But on the other hand revelations comes in the position and time of solitude. Even you could be amongst millions of people. What is interesting is those of you who believe in path of Mitra, you'll find out, Mitra always appeared in the mountains. And we see the structure is that way.

Q: .. Mitra, and MTR Maitreya, and then there is another one Methedron MTR, would there be a connection?
K- You can change it any shape you like, but in Persian language we know it as Mitra, and is the first message, original, and we see many people have followed the same path. But you have to understand it is the same soul. (3:06). In essence the soul of the Messengers of God is the same soul, no other. It's just appeared different position, time and frock. .. Mitra is Eve, is created out of the embodiment of the Creator. As it is in the theology of the U, Mitra came to Earth and fell in love with the planet. And he choose as a place, where he saw the beauty and asked the Creator, join him, and see the beauty fo what his creation can do, accept her beauty. In so many ways, Mitra as we call it, then the word of Adam and Eve came, and Mitra is the Eve, and Adam is the Creator. Mankind now that he opens up into the wisdom of the U will see .. the history of the creation, and of this planet. This is why as you go to holy places and live with respect, those who come to earth, this is their holy ground, for ?? many who come to visit. They don't come to worship, they come to visit, as the time of Mitra till now, is the second time, matter of seconds, not what we call tens of thousands of years. (3:08). In so many ways, the earth is a beautiful place, and its beauty is captured, and with it, as they were living entities, the wisdom of the Creator was taught to them. And this ?? word of Adam and Eve which has come after it, is from that point. In time many of you will come to understand

(3:16).

and collectively when you put the Eve with Adam you achieve the totality of the Creator as one, without condition of emotion as you call it. Creates to give, there is a philosophy in position that by creating the Adam, sorry Eve, God created the Universe. Because he had a point he could transfer, he had a position he could give D of its love. So .. is the Creator with, or Creator plus? (3:18).
Q: … ?? twins, proton and electron, add the proton and if so why the electrons.
K- Eve is an electron, but in essence now you have Adam and Adam, there is no Eve. When you take part of the Adam, and you create another creation from it as part of, then you have created 2 out of one, but in essence of you put the second one back it will be complete. But in the process of creation in D of expansion of the fields, you'll find out, that in trying to give from one to another the U is created. In a way, the expansion of the Unicose comes from the creation of the Eve, in Creator trying to reach, to spread, to give, the love to, to bring. .. to nourish for Eve to become the same as Adam, or equal to. This is what we say, the God created the U out of His love. Because as .. if you stand on one side of the room and somebody else on the other side, and the extent of it, (3:20) you can throw a ball, it's how far the other one can reach to catch. Otherwise there is no use throwing a ball. And this giving one to the other, spreading to give the love to Eve, has created the expansion of the U, if you can understand it that way, and the fields with it that leads to creation of Unicose. But in essence, we talk about Adam and Eve, or creation of electron and proton, is an d in respect to its condition of environment.
Q: .. Do you have any comments about global peace, given what is happening in the world right now?

K- We are observing at this moment how the human race will react to the present situation. Globally no government can bring soldiers together to fight because of Corona. governments that are trying to do, are at the peril themselves. So we'll see extension to the science and T. What we saw in the 80s, 70s, 60s , between East and West, developing T on the edge of science. But them compared to the other. But this time the T, (3:22), will be shared as equal with everybody else. So we are in a better position, Corona, as long as it lasts, it forces to keep peace, because governments cannot handle armies, they'll catch it and the rest of it. But on the other hand it is a stepping stone towards the unification of mankind.
Any other question.

Q: could you move from one place to another just in physicality, using some Gans or something plasma, device?
R: I responded on the flying car, which may be revealed In March, and there are things in the Patent. How would you respond Mr. Keshe? (3:24).
K- Not much different. You he is trying to say, if we can move without using any systems, by ?? making a plasma in a plasma environment. Again, if you create a system with a plasma system, it needs a system to find its positioning and MG Field strength.
Any other questions

Q: What qualities do the medical professionals need to interact with the EU?
K- We need, or we look for doctors who have at least 2 different school of thoughts, medical. We need people who accept diversity in the knowledge, not dogmatism on one side. A lot of doctors do Homeopathy, and other things, and these are the type of doctors we are looking at. As they have opened their eyes to one different education, compared to their original, what they have sworn themselves into. They are open to receive and then we can teach very freely. But again, we look at it case to case.
Q: .. (3:26). there are some souls that might be interested …
K- It just depends how they receive it, and what they see it.
Q: …
K- We have to see who comes and who applies. .. We already have people on request registration for medical teaching. So we see some will come that way. (3:28).
R: if you build it they will come. You built it…
K- We start progressive teaching to be able to use these machines. We have to wait and see if they are receptive to, and how they do it.
Q:
K- Most probably, it depends on the doctors …

Thank you for much … (3:30).
Q: .. is there any chance that one day you'll write a best selling book about your life in and beyond the Unicose ..?
K- You think I can find that time. We are struggling to finish the books of man, to complete number 9.
R: As the Creator you're always creating …
Maybe someone write about you ..

K- One day somebody might write .. (3:32). And according to some, nothing happened.
R; Every one has their own perspective.
K- .. the first part of the teaching today, I think it is very important for all the KS to understand and evolve in the direction of , that we understand the totality of the process of the creation. and being able to manifest ourselves in the position, time, and space. where we decide and maybe we for the first time get a chance to live that illusive, not everlasting, but a life, at least not a short time live, long term that we can serve, The purpose of life should not just be to live longer, but in living longer how you can serve the rest of the souls, that they elevate, from their position and stand. It's not a sacrifice, it's a service.
Thank you very much for today, and hopefully we meet next week, and gradually we build into what we call, 7 year completion of the teaching. We are on 362, and we have another, more or less 12 weeks, (3:34). or around that time to pass our 7 years today .. we'll see what comes up next week.

R: 362 KSW.
K- If I look at correctly we passed the 7th year by 365 which is in 3 weeks time, we move into the 8th year of teaching. If you average it out, in the region of over 1.5 thousand hours of teaching. if you siphon it 50% it's 500 hours pure knowledge transfer. (3:36).
R:
K- I hope it has helped someone, somewhere .. Goodbye.

END

363 Knowledge Seekers Workshop 2021 01 14

ENGLISH TRANSCRIPTION

(:07). K- we welcome you back, (:08). that nearly 7 years completed by next week, that we enter on the 8th year of teaching, nonstop, sharing of knowledge and some 3 - 4,000 hours of teaching. We try to expand the knowledge that by 21st March we start a new cycle. Many of you KS, as ii attend private teachings, have a question, "What is going to happen on 21st March?' Is it going to be a new calendar is it going to be a date that we start a new cycle? Is it going to be a massive change, that what we have been waiting for? Some people asked, is it the beginning of what was called, " the return of many things." In fact the 21st of March is the beginning of the new cycle, what we call, enlightenment for mankind. It does not mean that whole humanity will enlighten in one go and everything will change. It's the process that humanity and the U Community enter simultaneously a cycle of completion, to understand, to share the knowledge, not with words, but through understanding of the structure of interaction of the fields of the U. Even though the human kind, the voice is the ultimate way to listen, hear, talk , share or in other means what mankind has made for himself, computerize and the rest of it. In

essence everything is made of M fields. Interaction of M fields, and in that process, we make one language that the whole of the U, Unicose, all humanity and those beyond will be able to interact, to understand, (:10). the interaction of the fields of their lives. What does it mean, what does it actually brings about, how would we as human race interact with these situations. How do we see ourselves and the rest to be? We see it, as 2021 the process and beginning of the new cycle for mankind, where humanity will meet, and understand the total process of life. n a way, where humanity and Unicose will become to understand each other. Where mankind can transmute between the matter state and the fields. .. as one guy was asking, is that, from now on we can hide ourselves? This is not the way to be because, you might be able to hide your physicality by extension of the fields of the source of your soul, but still you are visible to the others as a field, and the interaction fo the fields. . it's not hide and duck, but to be seen and be more transparent. .. it's not escapism but to be open and transparent that man become responsible, it does not matter in a physical D or in the D of fields of the interaction of the fields with the others.

One point which I raised last week, we have the 5 Cups, where is the 6th Cup? Which we spoke about the Cup fo U, that mankind can interact with the fields of the U, which is the MG field forces of this U. But there is a Cup 7. (:12). The Cup 7 it brings the totality of the man with its Creator. When mankind can understand, the progress and development of the structure of communication, what we call the Cup 7, which is the Creator, we open to man. the way you constructed Cup of Life, the way you did the structure of the vertical or horizontal, or solid, gas, or liquid state, you create the, what we call, the Cup of Plasma, creation of the interaction fo the fields of the U. For the first time, mankind will be able to receive to understand the knowledge of the U, simultaneously from the Creator which is man himself, part of, with the structure of his Creator. What does this mean, it means … for the first time, as you have seen and you build the first Cup, with the One Cup, One Life, you'll be able to create fields that by the strength of the creation of your soul, you'll be able to interact, to receive, like the Messengers of God, the knowledge of the Creator. .. there is no need for intermediaries. This might be far fetched for man at this moment through his knowledge, but those who have evolved in knowledge, understanding and T, in the Unicose, will understand immediately what they have been waiting for. To be able to be part of, and in touch with, .. to share with, knowledge across the Unicose.

The Cup of Creator, (:14). is the ultimate goal. .. you call it, the Seven Chakras, .. we call it, the Cup of Creator, .. everything has to work perfectly according to the understanding and intellect of the man, to be able to reach to that point, or any other creature. The Cup of Creator, the Cup of Life is all the same. It's understanding of ones own soul, and interaction of the fields within the structure of ones life.

There are two very important, which is what we call the Cup of U, will become the most important thing for mankind to move onto. Where he can transmute his soul, where can .. be able to interact with the other fields will take mankind thousands of years. And it can take a man a few seconds. This is dependent on the clarity, devotion and servitude, in serving, or what we call, loving. There is nothing more important in the cycle of life then loving, which is the giving. What we give that we can receive, that in the process of the

cycle of receiving, we reach to the point that we recycle the fields of the U, and we pick up the best, what will elevate us. Many of you have not understood what it means by, what you give more, you receive more. In a way, what you do not need, which is within the fields of your soul, (:16). you create vacuum, you create a space to receive and in the process fo receiving, you take what allows you to elevate your soul to be able to move in different D. As I was explaining, .. mankind has the knowledge, mankind has the capability of creating anything, through his soul.

Many of you might ask how and why, as I explained yesterday in Iranian teaching, Farsi KS, I explain again. You go to understand, your soul is the creator of you, your soul is the creator of every part of you, because the interaction of your soul, and the fields of what we call planet earth, in interaction with the fields of the Unicose allows your body to create hemoglobin, allows your body to create your liver, intestine, brain, and the interaction of it, gives your shape, your body, your feature, your physical manifestation, but in essence, the interaction between your soul, and the soul of the planet, creates Fe, in your blood, creates Ca for your bone. It creates particles of gold, which the body needs at a given point in the body of the man. So in fact, we don't need to look for another system, (:18). to create the matter state manifestation fo the man, or anything man needs. If your body creates Ca at a given point within the structure of its physicality, isn't it by the wish and the will, of what you call, DNA, or RNA of the STM, with the interaction of the fields of the planet. The Fe doesn't suddenly appear in your blood. The Fe doesn't suddenly vanishes from your blood, the interaction of the fields of the soul .. (break in audio ..)
What we said, is that the hemoglobin is made of Fe. Even every cell of your body is made of materials, but these materials are made by the interaction fo the fields of your soul, with the soul of the planet. Therefore, in your RNA, and DNA, what you call the memory bank of your soul, and your physicality, mankind has the knowledge through his soul to create anything. This is why I said before, you can hold your hand out, and extend the field strength of your soul, and create gold in the palm of your hand, because your body has already made it for different parts of your body, where it needed it. (:20). You can put your hand out and create Ca, because your body has already made Ca in interaction of its field, and the U, and the STM, and the planet. Your bone structure, your teeth. Then you understand for the first time, mankind has the ability to create what he thinks through his soul. We don't need machinery, we don't need systems, we don't need dynamic systems, if man uses the dynamism of his soul with the interaction of the dynamic soul of the planet, or the U. In so many ways, when mankind and those who are the passengers fo the U understand the strength of the soul, in interaction with the fields of the Creator, shall see the soul of the Creator. As we said, as like with the electron, with the proton, as they are smaller in interaction with the light, with the fields of the Creator, mankind will manifest itself with the lights as an electron. This is how in the future mankind will interact. Mankind will understand how to manifest itself, and how to be manifested the same. Does not matter if it is in the presence of the lover, or the Creator, as the STM will carry the same field strength.

In so many ways, if you understood, and understand the past 10 minutes teaching, we have shown you the way to the Creator. We have shown you the way to yourself, that

how you can create and manifest yourself in the D of the Creator. My teachings are complete. (:22). But in so many ways, the mankind has to understand and the rest of the U Community how to use the knowledge, the understanding of the new knowledge to progress his way, to become unified. We called, it One Planet, One Nation, One Race, we call it, One Universe, One race. In so many ways, by amalgamation of the races of the U and Unicose, we bring peace unity, and collective understanding of the knowledge of the Creator. . this is the way we planned to share the knowledge of the U simultaneously across the U, with the birth of every soul, and at the outset of the birth of every soul. And this is why we call it, we need one soul to trigger.

Einstein in one of his papers, which he could not understand it, called it the funny thing. He said, when an electron moves polarity, another electron does the same simultaneous. This is that funny thing. This is what Einstein could not understand, now we understand, by elevation of 1 soul, the rest of the souls of the U will move to the same strength. In a way, it moves to understand, it moves to accommodate the new strength, and by accommodating all will turn in one switch. The birth of new life, the creation of new life coming on 21st of March will be the essence of what we call the "Promised One," this is what has been, (:24). and what will be carried out. You've got to realize many things, which I explained in the past few days, 2021, is the year of progress from 20 to 21, maturity of the man. At the same time collective numbers of what it comes to be 5. The same this year. The calendar of one path of the belief, going the same with Mohammad, will collectively be 1400, which is 5 again, it is the cycle of balance, a cycle of the unity.

In so many ways, everything will become one. In so many ways, mankind reaches point of maturity. He needs 1 soul to take everything over. It takes 1 soul to be made out of pure love and creation, that will change the society of the Unicose in one click. It has the power, power of the Creator to be able to switch, and with it the enlightenment of the Unicose and Universe will be established. This is not what we dream about, this is what we set out to be done, and our wish is our command.

In so many ways, mankind will be free from the shackle of the wealth, and free from the shackles of physicality. It depends on how man understands the structure and work of his soul. In next few weeks, gradually we build you up to understand the time, the promised time that the change will come. It will come through the blood of Mitra, and it will be established on that way, (:26). on this planet. It's the merger of the U and humanity. It's the merger and completion of the cycle of the creation. Where there shall be no need for Messengers, but it will be the completion of the message from the Creator, to the created, with no intermediaries. The cycle of the prophets have been a way that the different races in the U according to the establishment of the life, and the cycle of soul has been run up to now. This way it makes it easy, as everything will be born with the basic knowledge of the Unicose from the beginning. Every race will receive the same knowledge and the same energy, that all races from the point of establishment will be able to siphon (decipher), to understand the process of creation, and in this process, no race in the U will be faster or higher than the other, as all understand and will be enlightened, by the same soul.

In a way, in the structure of the plasma physics, we call, the "Dark Matter," what we call, the "Principle," will become the same for all created souls across the U. In a way, what this means, we all start on the same basic, the same ground, the same equality, and the same balance of the knowledge, does not matter, where, which country on this planet, or where on which planet, or where and which U you are born. The light of the Creator, the knowledge of the creation, will be received simultaneously at the same time. .. with the new understanding, (:28). and the new wish of the Creator, the whole of the Unicose will be phased one level up, that the knowledge will become the basis for equality, prior to the creation and completion of any cycle of creation, anywhere in the U. .. when you go from earth to another planet, to another position in the U, you speak and you'll be understood and your knowledge will be equal to the knowledge of the rest. This goes to my promise from the beginning of the teaching and that was, we'll take the man to U Community not to be a slave, a subordinate, but equal. As the whole Unicose with what we taught you today and the past years, have been brought to be in that position, that there is no race higher than the other, and all races are equal. This has been the wish of the man. In so many ways, we have completed the cycle of creation. Now is teaching how mankind can be kind to himself, and at the same time humanity has to learn one thing, end of division of races, language, and culture. In a way, end of many other things.

We have seen in the past few days, as we said, end of kingships, and have seen end of president-ship by hand of a woman in the past week. What has happened in the US in the past 7 days has brought a lot of changes, which will have profound effect on humanity, (:30). where we'll see that there shall be no one higher than another, not even the president. In so many ways, everything is set for humanity to move in one direction. What has happened in US in past 7 days in the US, has laid the path for our wish to complete the cycle, that there shall be no leader, as all will be equal. In the coming cycle of administrations and world leaders, we will see this pattern of conduct, that will change the whole understanding of human race. This was our wish that no one is higher than the other. This is done by the man himself. If we do it, it is done because of. If you do it, it is done through, and the reason for. In so many phases, we see in 2021, the end of religions. In 2021 we'll see the end of leadership the way it has been, as leaders will lead, but on equal term and basis of the rest of citizens. We'll see the end of kingship as the palaces will be empty as there will be no king. And they will be the house for those who wish to bring the kingdom of God to their land. It is our promise, and it will be fulfilled.

In so many ways, we have seen from the first week of this year, 2021 the changes in the ethos of understanding of mankind in leadership, in how no one will leading, or to be lead, except to understand the reason what things need to be done, that will follow the same. (:32).

There is one thing for mankind that has to develop, in a way, through Corona, has reached that point. ??? no way to do. Mankind does not need to work to live. Nowhere in the U, in any culture, beings work to live. Their life, their soul is taken into slavery to be able to, just to keep the physicality. In so many ways, we never seen, and we hope we shall never see this again, that one race divides itself into a way to abuse the others. In so many ways, does the cell of your heart, does the cell of your brain, gets paid to create a

condition through its operation for you to live. Does it take holidays, or does it work as a slave, or is it there through the creation fo its soul to serve the others to exist. The lie of the man, and the STM, and the operation of the STP of the man, from now on will be in that process, as it is a cell within its body. So we do not need to work to be a slave to food, and shelter, and to be abused by those who see this as way to their meager ego. If you understood how the cell of your body works, without payments, and going to factory and waking up everyday that it is the time for me to operate. (:34). and is there through the cycle of its life to operate and serve 24 hours a day. Then you understand how the true work of the U is. And with the progress and development in the understanding of the new cycle of life through the structure of the interaction of the field of the STM, no man will need to work, unless he wishes to, to serve. No man needs to create anything, but is there to create to serve. This way prove the freedom of cycle of interactions, every movement, and man will achieve much more. And the Unicose citizens will achieve much more, as the reward is servitude. In so many ways, our soul goes through its evolution to create a better working physical life to be able to stand the changes in the cycle of the changes within the soul of this planet and the solar system, and the creation in the Unicose. From now on, man will do the same. Man will become that cycle, man will come to understand it will evolve through his soul, it will create new knowledge, it will create new tools for the comfort of physical life if he decides to be in it, and with it, he shall not be a slave to nothing, as he does it for the love of the Creator, and he does it to serve the rest of the creation, this allows what we, (.. break ..) (:36). across the Unicose.

In so many ways, mankind has always been aware of this, but not open to it. The coming time and discussions we shall see how mankind will evolve to this point. We shall see from 21st as the soul takes its shape, this soul creates D to carry the soul of every existing citizen of Unicose as part of the structure, will change the course of humanity, how mankind will reach to understand, new levels of understanding beyond the imagination of the man, and with it we start a new cycle, a new era. A new progress not only for mankind but for the whole citizens of the U and Unicose. .. the whole structure is not because of what is happening on this planet, the whole change in the structure is because of the love of the Creator, to celebrate the beauty of this planet, and why it has been chosen to be the birth place of the new cycle.

Earth is a beautiful place. Earth has many beauties, and it has one fault, and that is the man has allowed his physicality to be abused and out of control of his soul. And with this knowledge, and new cycle we bring that balance back, that from now on not only the human race, due to the combination of the interaction of the fields of this planet, the whole planet will become what was promised, where the lamb and the lion, (:38). will nest in the same place. Mankind does not need to eat, to taste the flesh, but if he needs he can imagine, with his imagination he can see whatever he needs. One shall not kill to take energy, but shall give to receive what it needs, in the love and care of the life, and the creation.

My promise is very simple, I have delivered what I promised. It's for mankind to understand the next cycle, and understand the progress in its soul, and not in machinery

and the others. Some of you will go to use Cups, some dynamic systems to confirm the existence of your soul, but that in fact, is nothing but a confirmation to you and to your soul only. We make transmutation and transportation of the fields in the D of the U, a free lodge. .. every man can change any energy to any elements according to the wish of his soul, if he has balanced his book. .. mankind and the rest of the races in the U can take position anywhere in the U, without use of what you like to call UFOs and the rest. We give you the D of the pleasure in the D of physicality or pleasure in the D of the STM. The option is mankind's. We fall in love, because loving in part of the progress and structure of the Creator. (:40). Mankind will see nothing, but the pleasures of existence. Mankind will see and feel the pleasure of the touch of the soul, then the touch of the physicality.

>>
In so many ways, we bring mankind and the rest of the U, to unified fields, in a way that we all take from one field, which is the field of the Creator, according to our position and to our strength, we reach and we understand the soul of the Creator, and with it we adopt it, to fit us at the point of the manifestation. As I said, I have competed my teaching. In a way, by today's teaching I can say good-bye. In a way, the book of life of the Unicose is closed. In a way, the knowledge of the man has reached the point of maturity that mankind in the coming time will strive to find a way to achieve this. Whatever has been promised has been delivered, and now it is for the STM to strive and reach ultimate goal, not for the physicality of the man.

In this process mankind will realize one point, and that is, it's me who has to mutate. It's me who has to evolve, and it's me who has to endeavor to understand the understanding of the mutation of the fields. If I want to be at the strength of the field of the Creator to understand, (:42). I can choose so. If I want to be at the field strength of life on this planet, I can choose so. I can choose to be a tree. I can choose to live the life of a man. I can live the life of the lion to feel how it feels, to see the U and my horizon from different horizons.

In reality mankind reaches the point of maturity at the same time as the rest of the citizens of the U. In so many ways, we still carry on with teaching, to elevate you more, to find new ways to reach the level of the strength that you can interact and be able to realize the field of interaction with your Creator. In so many ways, if all of you, or some of you be able to replicate the true structure of what we call, The Cup of Life, you shall reach that point. As I said, . it's a monkey see, monkey does, and the monkey does not go far, as it copies. It's the same with the structure of the fields of the U. We have to understand how we do things, how we structure things. When you look at the CL, and the Cup of the soul, it is not made of one item, it is not just a Zn and Cu. How many elements are in the structure of the body of the man? How many elements, or what we call different M fields, (:44). create the STM. And in which dosage? And every change of a dose, every change of field strength will create different soul, and that is the process of creation. If you have strived to make the Cup of Soul, how many elements in what ratio, which is the structure of your soul, have you put into that Cup. It's not anymore 2 metals or 3. In so many ways, where can you find all the elements to put in one Cup. This goes

back to understanding the strength of the fields, where now you need to understand how you bring the fields into play in a Cup that interaction leads to creation of your soul, strength of your soul. And the interaction between your soul and the Cup you created, will light up, because it's of the same strength, and then you shall see your soul, or you shall see how your soul looks in the mirror of what you have created in the Cup. Then you understand, .. we taught you the simple steps.

Now it's for those who understand the knowledge to extend it more, and allow through new understanding of the fields, and interaction of the fields, for mankind to be able to create his soul. When we create a soul of a new life in the U, (:46). we collect from all the fields of the U, not just one. When we create a child of the U, what we call, through the soul, we collect the best from every soul in the creation, not just one field. If you look, it's the same, it's done in the creation of the man. When you create that child, the best, which your soul can provide through the STP, becomes the essence of that child, which you pass on through your egg or sperm for the next cycle. Now this has to become part of the same for humanity in creating the children of the soul. You have to collect the best which is in the U to become part of the soul of your child, of your creation, be it a star, you be it a planet, you be it in the body of entity anywhere in the U. .. you shall decide how you want to serve. Do I want to be, or due to my conduct do I place, or have I been placed to be a cell in a of an animal or tree to be slaughtered, or to be one single cell star, which shines, the size of the biggest star in the U. What you gathered it makes you that sun, that star. And what you have carried out, not only in the physical life from now on in the D of the soul, will decide the structure of your life, (:48). and what you shall be in the coming time.

Mankind has reached the point of maturity. In a way, it's the responsibility of you and you alone to mature your soul, and to receive, and to be able to give. .. we call it detachment, but detachment doesn't mean end of existence, but it means to be the best, in being able to serve, .. to give. In so many ways, we become a recycling, that we give all which we receive, to be given, and we hold on, we store the best, that we can give more in a bigger D. If you look it is the story of your physical life. you eat, consume every thing and what is the residue fields is used for your daily existence to heat your body, to be able to create motion, to be able to create energy for the thoughts of the man. But the best and the cleanest and more purified ones, what will happen to it, is added to the STM to be used to elevate the soul. In a way, you give through the operation of yourself everything back into your environment. (:50). You are an antenna of the fields, where you take and you give the best out, that you can give more out, because of your volume. In a way, if you look at it, you eat a small apple, but its fields and energy expands through your body, that covered the more area to give, more volume to give. .. mankind looks at even the feeding in a different way if you understand this process, that is, we take a small entity as an apple, we use its fields, and then we radiate out, it's what we call aura, our intellect, and everything else. .. we show the beauty of it, in what we have taken from it, and what in essence the more powerful part, which is the most minutest part will be added to serve the STM to elevate the STM. This is why we take time and what we call age to be able to store enough in the soul that it can elevate to the point where it can depart the physicality. What we teach is continuous, .. and step by step for mankind to

understand the progress of his life. If the energy of an apple, very tiny, can hold to itself, and the progress and consumption of it, by the body of the man, can now become the fields that radiate top change the direction and position of other cells to evolve, (:52). even it be the STM or the physicality, we see the purpose of that life in that apple. This is what mankind has to understand, how to evolve the soul of the solids, and gases and the liquids into the soul of himself, to add to it. To be able to create from it. To give the best out that what is left in the strength as residue can be added to his soul that he can give at the high order to create the next generation.

In so many ways, what I call, it's like the man who works and out fo the wages he takes home, he puts a little bit aside as a saving. this is what we do when we interact and consume other souls. In a way we put a part of theirs to become a part of us in our soul, that elevates our soul, when our soul creates the planet, or a solar system it has the essence and the soul of the apple you ate as a human, because it's part of your creation. In so many ways, that is why we say, do not kill, do not destroy, because now you do not need to take the apple to destroy a life, to be able to receive its beauty and its strength. It's in a way we understand the totality of the creation becomes one. I want to be, (:54). the field of that apple that you enjoyed, that in the time when you become the star and part of, and become part of the soul of the creation, what you create, as a creator of the planetary, or solar system.

When you say I love you it means, "I do," and it means I give everything I have. It means in essence I am, I have been fortunate enough to receive from all aspects and dimensions, that in totality I want to become the giver of all. In the coming time, as we said, those of you who choose to travel as a collection of souls, you will create, you'll have like what we call, you have today, a soul of totality, what we call the captain, that you trust your soul within that structure to be looked after, that, that captain, becomes the totality of one solar system, one sun, that from it, the new generation of perfection will be created.

In so many ways, mankind enters the field of understanding the process of creation, the true essence of the creation, through his Creator, and through what we call, the possessor of love, "Mehran." This means, what it gives, it has, and it has no reason but to give, as it possesses every love in every creation, and every soul. Mankind needs to understand this process. (:56). Mankind needs to evolve, to graduate, the level of his understanding of his own soul, that in the coming time, as the whole of the human race, as one body enters the U Community, there is no soul left behind, but we take all, we elevate all to the same understanding, that in that process of creation life becomes worth living, and life becomes worth sharing. In so many ways, mankind reaches the point of maturity, by today's teaching I have given from my soul to the whole of the creation to elevate to the same level of understanding and knowledge. And in that process we shall see a new evolution in understanding of science and T, by human race, and those who are the travelers of the Unicose. In so many ways, we do not need to travel through instruments, tools, and machinery, but we travel through the D of the STM. Many of you as human race with the STM will elevate to that position very rapidly. And in that process you shall take your position not only to be as equal to others on this planet, but across the Unicose. I don't have a wish as the totality of the wish has been fulfilled. The understanding and

mutation of the energies and the fields of the U is in the hand of the man to evolve and to understand. (:58). And mankind and many other races in the U need the small tools, the processes for him or for the rest to understand the totality of what we call, evolution of the STM, to his ultimate ?? cusp, to his ultimate position, and when we compete this cycle by understanding by the STM, mankind shall see his Creator, where he is part of and he become to be as part of totality.

The teaching of the soul we started some 3 or 3 years ago was for today, for the completion of understanding of the STM. In so many ways, we have delivered the promised message, that mankind will find peace with himself, and what we call, in so many different paths of religions and faiths, the "Promised Day," the ultimate day. In that process, mankind now understands what he needs to do to achieve that ultimate goal and point.

In so many ways, when we meet on what we call 364th meeting of the KS, next Thursday, it will the first day of the beginning of the new administration in the US, and with it will be the beginning of the 8th year of the teaching of the KF, and with it, there is no coincidence. We set our way and we announced long before, that what we expect to see, (1:00). and in that progress, science will take lead in 2 nations across this planet, 1 in US, and 1 in Iran, and in that process, a new establishments for the structure of this will be set, that mankind will evolve in a very fast way, in science, T, and religion, that all become one, that all will meet in the same place. The advanced T and advanced understanding of the creation and the Creator, shall bring everything together, that in that process tools will be made for humanity to evolve in the new direction and D to understand the operation of his soul. The evolution and what we call the totality of the, his own creation. Let's see what 2021 will bring for mankind. A new cycle of life, and with it a new soul, the change for totality for the whole creation. To love and to be loved is the right of every soul on this planet, which means to give and to be able to receive and with this we end the time of what we call punishment, as all will receive the same and all will give as they don't need, and they use, back to the cycle. .. there is no reason to hold onto what is not needed. The wealth on this planet will worth nothing and the time will be nothing but those who evolve to develop and to serve. (1:02). .. as we said, many time, this is our annual report for the cycle of creation for billions of years. where now we balance the books and we bring all the races of creation to one. It's for the scientist in the level of the human race to understand and evolve and try to show and extend the level of understanding and evolve and enlighten the soul of those who have not, to reach the point of maturity through their understanding. As I said, every man will take from this knowledge according to the intellect and understanding, where the intellect does not mean university and college and degrees, but it means to understand the structure of creation of the U and the Creator.

In so many ways, as we reach March 21st we close the book of the past, and we start a fresh book for the life of the creation, not only of this planet but beyond. In the coming time and weeks, we will make many Cups and we encourage you to make, because this is the sandbox for you to test, to see your soul, and to understand the work of U and your soul, and how you become part of the Unicose and the Creator. As I said this before, we

thank you for being passengers of the knowledge in past years with us. In so many ways, we have reached the final stop, (1:04). it is now time to gather what you gathered, what you have been traveling to see how you can evolve and elevate your souls and those who been travelers of this same plane and train. It's the final stop, and it is time to gather to understand the totality. As I said, we'll be here to guide you further more with everything possible that mankind can gradually evolve into this progressive understanding of totality. In so many ways, I will ask you one question, what is your wish and how would you like to communicate with your Creator, not only your soul but the soul of the Creator. And in that process where do you see yourself? As a subordinate, as equal, or as part of. And how you see yourself will station you in the position of the level of your soul. Maybe some of you understood the last 2 sentences, and if you understood the meaning of, you have managed to find a way to your Creator, or at least to your soul.

Any questions? (1:06).

Q; Salameea, what is love, peace, what is the relation with the plasma? Is love G, or MaGrav, or M?
Totality is linked and interacts with time and space. ?
repeats,

K- When you talk about what is love, we always said, love means giving. Is love peace, when you give, you don't hold, you are at peace. When you have to judge what I give, what I don't give, that's not love anymore. Love has to be unconditional. In so many ways, even the part which you need, (1:08). if there is a need for another cycle to exist, it is your responsibility to give, unconditionally, irrespective of what could happen to me, or what I'll be, I'll be, because as you give more, you receive. In reality, as you give from the highest order, you receive from the lowest order that collectively you come equal in the strength to give to fulfill the gap, it's the conversion that mankind has to learn, where we give from the highest, we receive form the lowest, and in that process in trying to replace the highest, we elevate the lowest to the highest. In a way it's the way the STM works. It's the way the soul of the Creator works. As He receives from the meager STM, and as He has given so much, it elevates the strength of the lower to the higher, by amalgamation of those who have received collectively, and so when you don't have to choose what I give, but you give as you know in the process you will receive to have, to give more, you are at peace. So love and peace is the same. It's when you don't have to choose. When you have to choose you are not in love. When you give unconditionally, it's the process we are at peace. You can choose if you want, ?? who you want to love, but you will not receive you have been given. This process is the same, throughout the creation, even for the Creator. So what is M, (1:10). becomes G, and what is G becomes M. In the process of giving, or M you split the strength into subdivisions, in the process of G, you bring the subdivisions to collectively become the stronger. This is what most of you KS have not grasped the concept and understanding of it. In a way, when you give, are M, you open yourself to interact, and you create divisions, because in interactions you give some to one, or energy you divide and subdivide. In G you bring all whatever has come form the other subdivisions to become of the highest, collectively of the same

strength. In a way, G leads to the division and the splitting that allows more to exist, more to receive, and G is where you collect to be able to give. As we say, the bank is never empty.

(1:18).
.. The brain of the Sun is from beyond Jupiter and Saturn, and the gap in the brain is the hollow space we see between us and the Sun. We are part of maybe its happiness. Where another planet, its joy. And another planet is where all the sadness. The structure of the U is the same in micro and macro. So shall be, we've seen, as they say in the plasma of a neutron we have all sorts of ?? dictums and whatever they are made of. (1:20). The creation of the entity in the field of the matter state is according to the strength of the observer's field strength. We are all part of one plasma or the other, and we are all in interaction with plasmas in one way or another. The soul of the cell on our skin is in interaction with the STP. The STP is in interaction with the STM, and STM is in interaction with the soul of the solar system, and so forth. We all confirm our existence through the interaction and manifestation of our existence of our soul, and mutation of its strength.
Q; The heart and soul are connected?
K- Of course they are. (1:22). They are connected by fields and interaction of what they do. The heart gathers the field strength of the what we call, STM , physicality soul, and the STM its position just above it, but it will receive it. If you look at the soul of the animals or the STP of the animals, or the trees, what we call plants, or solid state, you always find alignment between the 2. Because one in a way, delivers its fields. When you have emotional strength the field strength of the heart cannot handle the pain of the physicality, in releasing its energy through its soul, in not having the right strength, hits your brain and gives you a brain stroke. In a way, the eruption of the fields from your heart from the what we call the interaction of the soul of physicality's, in moving, being in touch with, the .. STM in delivering different connections and energies to control the strength of the cage, which is holding the soul, in rapid process leads to damages like a volcanic eruption, to the brain cells and you find yourself, of a different physicality damage. Doesn't matter if you are standing, flat, or you are upside down. (1:24). This is why one of the reasons with brain hemorrhage, we see bleeding because the pressure value of the blood fields strength has to be released that the soul can be contained. This is the only reason why we see with brain hemorrhages bleeding, all the time, because the value which is the heart of the man in field strength, when it releases it's equal and is made of the blood, which controls and cages the soul. And this is the reason why, in so many ways, we see with bleeding. Now we can explain it. .. capability to link the processes together. It's like you open a value on top of a pressure cooker, everything comes out in one point, whatever matter, is cooked in the pot. And if the material is of the same strength, and comes to balance with its environment, that it can bring the balance to the pressure, you get the steam and water and everything else which is in the pot. And the rest of the ?? residue. this is why some of the heart attacks lead to death, because the field strength is so much, that the pressure cannot be taken by the brain, it just goes through. Because the STM in the brain takes some ?? because it is not time for me to go. I still need to gather more, to come to the level I want to live. (1:26). But if it is over, you are

done. The process of creation is very simple. It don't work as a twin, but they work as a control value, in how to keep the soul encaged, is the prisoner making sure, what I call, "cannot escape on the prison." And the heart is the watchman to make sure enough fields are delivered, that the ?? prison is kept and always is in touch.
Any other question?

Q: .. your call for doctors for the EU, is this done on line or do they have to trained in Austria?
K- Online
.. we have evolved the systems into a very advanced stage, (1:28). we start to train in the coming weeks.
.. We don't see especially for doctors for them to move from one nation to another as doctors usually do. We look into train the doctors locally in the environment they are.

Q; Is your physical death the choice of your soul, that it is the proper time to transition?
K- .. the level of your soul strength in respect to its cage, is set at the point of the first interaction of the egg and the sperm. You can it by environmental changes, through the evolution of the environment slightly. (1:30). But not that much, unless you go into the level of the soul which can transmute from one to another, which does not bring no time, and no space, and you can do that.

Q: when the heart hurts is it the physical part or the soul?
K- It depends if you have a physical problems, or is it the emotional in understanding the soul, interaction of the STP. What we feel in our heart as a pain, is in interaction with the STP. The STM does not feel pain as such, understands wrong and right, and what it has to be positioned. understands pain, not in the level of the physicality, that we do in our heart through emotion. (1:32).
Q: Salameea, to clarify in my mind that soul and consciousness are the same, logical and I also feel it. … some people said it's not the same ..
K- Let me ask you .. what do you call consciousness and what you call the soul? Consciousness is the emotion. Soul is totality and what contains everything. If you are conscious, (1:34). you decide what is right and wrong. It's part of the structure of the operation of the STM in terms of physicality. Consciousness is an emotional feeling. It's not the soul. An emotional feeling. right or wrong comes from the interaction between the STP and the STM.
Q: There are 2 words .. you are aware of something, consciousness for me is the same like soul..
K- No, consciousness no. the way we understand it, is the evaluation of the right or wrong, or what is correct or not. (1:34). You are conscious of your conduct. So it ha an emotional relationship into understanding of it. it is part of the interaction of the soul, and the STP. It is not part of the soul, it's the interaction of. It's like mass. It's the byproduct of interaction of 2 fields. You got to realize when we speak about the STP and the STM, it's interaction of 4 field forces, giving and taking, or G and M of the STP, and G , M field of the STM, like the Sun and the Earth. And different fields interaction, according to which one, which strength creates different outcomes, of what we call emotion. And

consciousness is that. We don't decide what our soul takes, we decide what is correct for our physicality, we are conscious of it.
Q: So consciousness helps soul to be moral?
K- No, consciousness .. STP to be moral, not the soul. The STM is moral because it's independent. It changes its position within the structure of the brain according to the other souls. The STM is not constant in the strength, and more or less, what I call, revolution within the structure of the physicality of the man. It maneuvers, changes position, changes its angle, its speed of rotation, (1:36). according to what other souls do. And in that process, this is what the judgment comes, then the STP has to, not only interact with the STM, but accommodates what other souls have agreed for the physicality to reach that point. It's the 2 independent, but interacting. If you killed a man, in hiding, and nobody knows. Where your STP knows and your soul knows, then the souls decide how to move you, how to maneuver the soul that the physicality follows that maneuver, that it brings for you to confess your crime. We've seen that in a very recent past. Where the soul moves to open the misconduct of the physicality. We see it in the present situation in the American administration. The soul moves. The souls move into one thing or another to bring the physicality in the position through the operation of the soul. In a way, your soul walks your STP for you to be seen, to be known, to be shown what you have done wrong. If you understand it, we use the operation of the nations, as we all understand ?? of giving names and individuals. (1:38). But if you look the STP of a government, reflects the operation of the soul of a nation, and one responds into the other. And when one does wrong they all go with it, and they all receive the same. If you work and understand, the work of the creation, the way we do, and the way we see, it's a very strange that one of the administration who killed more than any other administration during its operation, is coming back to work, this time to correct what they have done wrong to many things, during what they had to do. Why do we look at leading nations on this planet? Because they set the scene for the rest. You will see the situations where the world leaders will become answerable personally to their conduct, as we have seen in many other nations. When leading nations, leaders always have escaped with it. What we see, in the past weeks, what happening in US, is bring the balance, as we have seen in the other nations, people go through revolution, and bringing a leaders who have been unjust, and ?? correct. Self-centered administrations always have brought disaster to their nations. And we have seen it, (1:40). with this, and the present situation. If it was a small country in Africa with what we have seen in US in past few weeks, it was something Africans do. Now one of the leading nations in the world, has set the seen for literally abolishing leadership. And the man on the street is changing position, not in administration. Every leader gradually becomes accountable on a daily basis to the people who they lead. As it is in some writings, the time will come that no one will take the crown of kingship, because it has such a heavy responsibility ..

Q:
K- Not the crisis situation, even in the best situation. In crisis situation somebody always takes the lead to pass the crisis, as we do. Mankind is in a turmoil and it needs to be let out in a very fast way, but through intellect and science. To bring the science and T to be the same. And at the same time and religion ..

(1:42).
We have seen Vatican financing weapons …

Q; because a Vatican is a state
K-
This is where the religions will have no place
(1:44). One of the biggest problems coming out of Corona, is where mankind will lead itself to, as many weapons T industries are not used. In a very short time, new T for overcoming Corona, not by vaccinations, will be introduced by nations. As we read recently, the lockdowns have brought more damage, then actually there was no lockdown. We have seen it, economies are coming to a halt. Whose is going to pay for it? Then they bring, who do we need to cover costs. What are the major costs, we all have injected, the old pensioners, if they go the main injections of a nation will be cut. Then what is the next step. Those who are efficient and contribute to the evolution of a nation will be kept.

Q; We Bahias…
K- If you mention once more about the Bahias, I will have to ask you to be withdrawn. We do not go on every path of whatever. The principle of the knowledge counts, not where it comes from. We are not a platform for the Bahias, Christians and the rest .. The understanding of the knowledge has to be that it leads to the evolution of the soul .. (1:46).

(1:48).
It's them who have to bring their followers to understand that a new cycle has started. Where every man is equal
It's the same with those who call themselves Illuminati's. If you have such a position of strength, it has to be used for betterment of the peace, not the tools of war to be able to control. The peace comes through elevation of soul of individuals, not control of the collective. We see a lot of movement in past few weeks by Illuminati's trying to recruit KF leading people across the planet. In so many ways, we see this as an infringement to the structure of the teaching of the KF, where we do not allow these things to take place. As we know leaders of the Illuminati's are sleeping amongst you, and they can see every teaching we do. (1:50). And they see our work as part of the way, which they don't like to see, but if they are, and what they believe in is to bring equality and betterment of the life of the man, they have to strive to work the way we do. there is no choice. In fact, what it is, if you are in that process, if you are part of the, what I call, the Illuminati's structure, you should strive to enlighten the people who you are trying to serve to understand the process of their own life, not by you trying to create the masters and the rest of it that you can control further. It is the same with the religious leaders, we have received a number of approaches by the Illuminati's where they want to KF KS who are on the position of leading, to get in touch with Grand Master, with Whatsapp. Because they see the Foundation (F) as growing in a way to enlighten knowledgeable people that then they can control. As I said, the soul of the KF KS is not for sale. The same goes with Scientologists, they failed to overtake and take control of the KF. Because they see the KF as a structure to fulfill the promise of their leader, in a physical and scientific way.

Scientologists have no science, (1:52). and they look for the KF, that's why we see so much trouble within the F in the recent past. Try to resurrect people within the F to take lead, to take position, to take the KF to Scientologist, and then destroy the F from inside. If you are a Scientologist you have to accept the knowledge is there is no room for ?? because the science is shared by the KF. It's the same with the world and religious leaders.
Q: But we have to find a common denominator ?
K- The common denominator, as I have taught today has been established, and it comes by enlightenment. And it comes by, you can now elevate the soul of a stone, to understand, teach and elevate itself to anything he wants to. If the man desires so. Every pebble has a soul, and that soul has the capability to elevate, not only the man. If a soul has created that brings collection of fields of structures, what we call atoms. That soul has the capability to be elevated, be it the beast, be it the man, be it the stone. It's the soul which has to decide its position and elevation.
Q: I understand your position
K- I have no position, .. we have no position. (1:54).
Q: Not position, I mean what you say. I understand very well, totality is totality, everything is linked. Something is elevated, everything will be elevated.
K- In a way, some people look at it that way. if you look in the past 12 months, 5 years. KF has been on the line for many organizations as they see us endangering their position. Or as they see us, they want to use the KF for them to find new position and new structure. We explained about the Rothschild's and Illuminati's, and Scientologists, and all the religious and political groups are within the structure of the KF. They have been brought in, we accepted them with the open arms, but we keep an eye on them, what they are up to. We have KGB as much as CIA officers in one of the highest positions in the KF. We accepted them knowingly, and we nourish them knowingly. We don't say, you are their, and that's the other one. We have people for Iran's central intelligence to Sepah, to CIA to people from Vatican, to Saudi, what we call, religious groups, all within the KF structure. We've become an inclusive and we all understand that there is one purpose to unify the soul fo the creation. And that's all the purpose we have. And what we don't talk, we teach T that all can reach that point, and this is where we differ. (1:56). We allow people to elevate their own souls, and to understand the position and the time and place. At the moment there is a huge struggle how Scientologists are fighting to take over the KF, and you can read it on the Internet, how openly they are discussing it. KF is not for sale, it's a scientific organization, and nobody can take over it. The same with the Illuminati's, we seen openly sending messages to leading KF around the world, they come in operation, they watch them, and they approach them. Even governments have gone into that business. We have become very, what I call tasty fish, that everyone else wants to swallow and become part of. This is what I said, to them, open the door, we talk everything openly, as we send a message to Rothschild's, and they immediately backed off, because they thought we do deals behind backdoors. KF is an open structure for the elevation of the STM through science and T, and the extension to life. WE are not here to deliver a MaGrav Unit, or a power generator, these are things we do

Q: I have to apologize I made some remarks about my background .. (1:58).

K- No, there is no problem, we deal, we sit with every path of belief, but it has to be respected we are all here, we might see some intrusions with others. We have a huge Iranian, and Islamic community in KF which see the Bahais as an opposite pole. We are not here to irritate. the same we see with the Jews and the Moslems. We are all inclusive scientific organization ..

(2:00).

Go on BREAK >>> (2:08).
3 new products,
Cycle of Life Cups . 5 Cups . 199 Euro
One Cup One Life System. 1,500
Natural Gans drying system and Plasma water 4,500 (2:12).

R: There will be more info
K- Yes, there will be new setup with it, (2:14).

(2:16). on the back of

(2:18). which is the totality of the Iranian KS, it's a collective scientific paper, and it's more or les by the backing, the collection of knowledge of more than a couple of dozen scientists, and volunteers, universities and different institutes in Iran and outside. the ?? this paper to be published as a book, scientific document allows the KS to release T on the basis of solid reports and research, which now the data has been approved by the government scientists and officials.
Any other question.

Q: .. if the human beings are son's of mind (??) then we cannot truly demonstrate the soul until the mental body is controlled. Is there evolution of consciousness as well?
K- I don't understand what it is
R: I think he is saying, we can't fully manifest the soul until we control our thoughts, mental body. .. (2:20). .. my interpretation.
K- I don't know how to interpret to answer it.
R: .. is there an evolution of consciousness.
K- You see it depends, as we were just discussing before, what we call consciousness.
R: You mentioned how consciousness can change, and warps and twists of other around it.
K- We become conscious of things according to how we see the work of the U, and how we would like to judge it to be to our benefit. Consciousness is what we would like, and how we've been brought up to understand values of life. A thief has a consciousness that, "it mine, I can take what I like," and another man thinks stealing is not correct. Consciousness is very much environmental dependent. (2:22).

Q: In September 1976, I and many others saw UFO in the skies of Tehran, very visible. A smaller craft came out of the main craft, then they both disappeared. Do they visit to help humanity?

K- When you go to a tourist site, do you go there to help the people or are you gong there for your own interests to see what is the beauty of the place? And Earth is another tourist location and destination.
R: .. when humans were out discovering the planet they would find tribes and try to help them ….
K- But look at it, .. now we go to the moon and moon has citizens let's say. (2:24). Do we intrude in their lives, and teach them what we know on Earth. Or we become observer as we don't understand their language and we see them as maybe inferior or maybe superior to our knowledge? We are not in, one day we go to space. We are in the space, we are going to Moon, we are going to Mars, and with the new T we go to other planets. What is the decision of mankind, the decision made by those who lead these kind of excursions in the , with the backing of the human race. What is our policy? Are we going to intrude, or are we going to be observers, it is not our job to intrude. We are in that position now. As a race we have evolved, we have managed to leave home, we have traveled a number of times to the Moon. We have vehicles on the surface of the Mars. Hopefully, by the wish of the American administration 2030, they are working on the landing in the next 10 years, of first live man on the surface of Mars. The propulsion lab in NASA is very busy with it using propulsion plasma, trying to cut the 7 months straight to shorter time. What did we do, now we become the first toddling steps. Once there is a decision of the U Council. .

Q:
I wonder what advice you could give him, (2:32). or offer as some connection with the KF, that he might take to heart?
K- Elon Musk already knows about the KF, and if he wasn't under pressure from Illuminati's, as scientific organization who want to keep their status quo, the situation would be different. In a very recent conversation in past few days, I have been enlightened how European community scientific group has blocked the KF since 2009. And even legal steps have been taken to stop the growth of the T, and there are documents for it. I was not surprised or shocked, but it was a confirmation, and the documents for it, have been promised to be made available to us. That the T is so revolutionary that the man cannot understand. And European groups who are responsible for interruption of new T, even start taking legal actions to stop the development of Keshe T in Europe. What we saw, in what we had, is part of that process. Now we understand why that process was taken that way. The people who are members of this Board have broken rank, and start getting in touch with the KF to show that their amongst listeners in different channels. That now that they have seen how the T has been taught they made a decision in 2021 to open the books, (2:34). of how we have been blocked by scientific organizations, as they see what they call, their scientific knowledge challenged. In this so many ways, this will stop a lot of things, which groups, influential groups, that were planning to do things, has blocked their way. So people like Elon Musk, used your money to support whatever you like, but at the end of it, they know this T, or T which uses the process of usage of the fields of the U is the ultimate goal of any science. We have shown a way to it, and they can do whatever they like. It's not philanthropists through becoming rich, KF and the KS have been philanthropists by sharing knowledge freely from the beginning of the establishment of the KF. Usually people become

philanthropists when they have and they become rich and they try to give. We went the wrong way, or the right way, to them, that we shared, we were philanthropists from the beginning, and the benefit, from the day 1 of the establishment of the KF. If you look at it the way you teach, you are one of the biggest humanitarian, philanthropist in the world, the way you are helping with Corona and the rest of it. Which organization, or followers of any company does. We have to find finances to help someone with the Corona, (2:36). or we brought your teachings freely, you are delivering your Gans's freely. You are already knowledge philanthropists, what these people try to get with publicity. In a way, you teach the knowledge, and share the wealth. The true wealth is with the KS who share the knowledge. True wealth doesn't come from philanthropists, from millions from the bank.
Any other question.

Q: What is difference between STP and STM?
K- It's in all the teachings, go back to all the teachings, it's in there somewhere.

Q; When the body dies of illness, what happens to the soul that does not come to the end of its duration of maturity? (2:38).
K- The body comes to the duration of maturity when it has been set in. It's like an emergency path opens up. It's very simple, people become wise, who said they got months or years to live, they changed their behavior, lifestyle, a lot of things, whatever, that process is is given, the lifecycle starts processing itself to be ready for that departure. It's not going to be like this is a suicide ?? Even in the time of accidents when somebody dies, the process speeds up, in that process that everything to be delivered to elevate their soul, when it was supposed to be planned to be at a given position, even it could be by the plan of the souls, will be gathered together to be delivered to the soul, it's like an emergency pack. The soul takes what is embedded within the soul of every cell for its final destination, elevation has already been predetermined. It's like I have to go, whatever is there I have to pack. This is well understood in the work, in the structure of what we call, universal work of the souls, and energies.

Q: .. how can we understand the strength of metals in using them for creating Gans's and using them in the 5 Cups? (2:40).
K- It's very easy, understand how you made the Gans's, then you understand the strength of them, and how to utilize them. It's one of the easiest things to do. Because for example of you make the Gans's, and you have the Gans of the element and you can create the matter from it, then you have understood the strength and soul of the plasma of the matter or the material. This is how we'll run the EU for creation of matter. We create the soul of the element, and that soul has certain field strength, and as one is created it completes, it becomes, if it needs to be there, in the presence of the Inertia fields, into the matter state of that field. We don't need to keep on changing things. You've seen this in your Gans production units. You create once, the field strength of the C between the plates of the Zn and Cu, and that field created once it pulls in all the AA from the environment, which is at that strength. You don't need to keep on producing it, you create the field of it. So any AA combination which is at that strength will be absorbed to that position, will be created, manifested that position, on the surface of the water. We do the same thing,

(2:42). with the creation of matters. We create the soul, the field energy strength. And then the interaction with the MG field of the earth, it manifests itself as AA, very simple. Any other question.

Q: WL, .. the soul must be very low to receive energy from soul Cup. We are confused.
K- It's very easy to confuse Chinese, because you believe in Yin and Yang, it has got to be one or the other.
Q: Is it emotion, or a strength of the soul, or a physical? (2:44).
K- It's a combination of the both. It's very simple you have, and you take what you need. This was originally discussed centuries ago, in a different way by earth's scientists, what we call, where does the MG field of the earth changes in the center of the earth. Till now we have explained that it is the same field as it goes through there is no change of S to N Pole, G to M, and the rate of the repulsion, or what we call M, comes for what G brings and collective fields which is in the structure of the earth, can give to maintain the stability of all its souls of every cell on it. When we get the M fields from the N Pole at every second, and every time released from coming out of N Pole, is collective fields from what has bee received, what is needed by earth, and what the rest have to give that it can confirm its existence. .. if you look at it, in the human body, in a certain strength we eat from the ?? bowel. In the planetary system we eat from both ends, and depending on the strength from which way, the repulsion or attraction is stronger it takes prominence in showing itself, and we eat from the S Pole of the higher, lower, order strength, and by what is inside it goes through our digestive system .. and what fields we do not need, (2:46). we release into the environment, be it as an aura, be it as an excrement, as whatever. The soul of a planet uses the poles to reject what it doesn't need, from what is digested from interaction of the fields which is arrived from the South, plus what has arrived from the North of the higher order G fields, or lower order from the North's M fields repulsion. It's a living process and where does the consciousness or decision come into it. It's collectively what we do not need we repel. .. if mankind looks at the structure of the South and North Pole in a higher strength repulsion from the North, we understand the body of the man absorbs more from its environment that can continuous feed more out the N Pole, and the strongest strength. It's not just a simple process, .. when we look at the structure, then would it be evolution, or would it be understanding that within the North Pole, we always say we receive, and we could never understand that the N Pole and the X plus, and extra strength. We know this from the interaction of the temperature, (2:48). where the field interaction of the N Pole with its environment, which is slightly higher in temperature, than the South. But where does this extra continuous come (from), we continuously absorb fields from our environment in different shape or form. And what is needed to maintain the integrity of the planet is held, and the rest through the even, recycling, and residue fields, added to be taken out. Our North Pole is the human body in reverse, upside down, if you look at it that way. But as the body of the man absorbs 80% of its energy from its environment, the earth is the same. It absorbs huge amounts of energy from its environment in every direction. As much as it gives out, and how it gives out. the inclination on the angle of the earth, creates, we see the line of the deserts. If it did not have this inclination the line of deserts should have been the totality of the planet, in so many ways. ?? its fields, but now if you look, and follow the line of the deserts, you see it has a very close alignment with the inclination of the Poles. Because it is where the

fields come in, we find a balance, fields which does not allow so much creation of vegetation. It's balanced in the vertical people. (2:50). This is understanding, how we bring the science in line to understanding the theology and understanding the creation.

(2:52).

Yes, what's the other question. (2:54).

Q: Have you heard of inrupt.com, which may become the new Internet?

K- No,
R; I do know the Internet could get shaky or have a reset of some sort. There seems to be a lot going on in the next week or so.
K- We have no knowledge of this, you have to ask the IT people.
Q: Dried Gans with new extractor. What is the dried Gans used for?
K- A lot of applications. One of the reasons we dry the Gans's is because liquid Gans is hard to transport across borders. So whether we use in the dry form it is the same for us. You can always back add it to the water state, it's own structure, it won't become like a Gans as you see it, but it still releases the same energy. It's used in many different ways. We deliberately use it for different applications. It's one of best ways of storing Gans's, more or less without converting into different energy and colors. You'll have very little of it, but if noticed when you have a liquid Gans, you have it green today, in a few weeks time it go red or whatever, (2:56). in the process of drying we try to solid state it in that form. And it has huge applications. Gans water you extract with this method it's not by boiling. It's by dehumidifying, which means the Gans water you can use is pure. Because in most of the Gans waters you drink you still have particles of Gans flowing in it. And this is a very effective way to do it, and it allows us. This is very effective for production of Gans's of what I call, vegetables and herbs, because it recreates Gans's of it, and then we take it out, it's very, it's one of the most effective ways to do it. It has lot of application in KF work. In next couple weeks we'll introduce an environmental systems where you can a system in a greenhouse, and increase the growth of tomatoes. It's specifically designed systems we'll insert, and increase vegetation growth and the rest of it. This unit will be announced and shown, most probably by next week. At the same time you can use it like a humidifier, but changing very much as we done in researching Iran, in offices and hospitals and the rest. (2:58).

Q: who do you think are these beings, souls that we are interacting with the work of your reactors while testing that you could observe in the small windows in the reactors?
K- We create most of them. If you look into the window and you see the operation of the reactors, we see, we create continuous, homogenous turbulences, which bring given field strengths together, which in their interaction they colonize a certain point or area within the reactor, and then we see their effect, and operation, we are the creator of it. This is

what I say all the time, even in the lab, every time we set a system pray for it, because you create a line of connection, you are the creator of it. It's important to understand this.
R; Turbulences , was a key word in there
K- Yeah, because we create mini- macro - micro turbulences in respect to the D of the reactor. The Iranian reactor has one of the best windows because I have seen a lot of things in it. In one of the first reactors we produced, is like a blue dome, has a specific window, (3:00). and it creates a, it's a nuclear based reactor, and it's a space development, and with it, because of the rapid delivery of the radioactive material, we see huge mutations in elements in energies. We see existences, we see field balances.
Any other question.

Q: If the UFO in Tehran was seen by the inhabitants of earth, is that not in itself an intrusion into the humanity?
K- Not really, travelers do not intrude, they are passers by. But don't forget earth is a position of transit, but sometimes these transit positions, might be stay for centuries, as centuries to man of U is nothing. If you,1 years on your planet, is million years of earthly years. So if you are here, (3:02). for 100 years, or a thousand years is nothing. It's a fraction of your life time in your place, in your place you live 1 or 200 years, it's like a 100 million years. So it's a short visit or a stay. Mankind will come to understand this very quickly, now that we have opened this door, and this window of knowledge.

Q: .. is the nervous system the connecting link between the soul and the physicality?
K- A physical connection, yes, but soul has a field dimension too. The nerve system is for a physical soul of a cell, or environment of cells. Where the soul has its own direct contact for interaction of the fields with every cell in the body. Neural system and the blood circulation are the 2 fields, that the interaction between them, field interaction between them leads to creation of the cell, due to the field Inertia of the environment they create. The way the fields of the Sun, interaction with the M field of the earth, create the matters around the earth. You need the earth and the sun fields to create it, so does the nerve and the blood system. this is the most fundamental knowledge, (3:04). which the most of medicine have not understood. (They) have failed to understand this, and this is the cornerstone fo most of the problems in the science of medicine on this planet. Nerve system carries a certain strength fields, and so does the blood. And the interaction of these two, if you look at the structure of the nerve system and the blood circulation, you see a lot of similarities. Where one comes from the brain and the other one comes from the heart pumping area, the headquarters. As we said, earlier in the teaching of today, the heart and the soul interact, and this is why we have emotional illnesses so prevalent in the life of the man. Because the emotional fields which come from the brain will interact with what comes from the physical, which is the blood and they produce the cell in the body of the man. It's not just that you have a nerve system and blood system. If you can show the parallel system together you understand how your bodies are created, how the cells in your body are created. The two run parallel with each other, because their distance, their position, their interaction, and the field they carry within them, it dictates the cell which is created within that position and the cell. This is why if you go back to the original teaching, we said, the body, the blood of the body of the man is "taxi destination" cell system, which means, (3:06). a cell in the blood is responsible for a cell

in the body of the man, or combination of cells which carry the same strength for a given position and place. And the neural system just bring the fields which converts it from the fields through the lymph into the matter state. You need the two, blood and the neural system fields, that in interaction with the lymph converts into energy needed, or the matter state which is needed in a given position. Lymph is the Inertia field forces which carry the material for construction. And the field interaction between the blood and the nerve decides what is gong to be constructed because the shape of the nerve at a given position, and the blood circulation dictates the fields in there to be created. This is one of the reasons you have the phantom pain when you loose your arm or leg or you get amputation.
Any other question

Q: Why is H important to be more alkaline?
K- H is more acidic. It gives more energy. In a way, (3:08). by being so acidic it becomes alkaline. H is the source of energy. In so many ways, as it is trying to absorb more fields to itself to become Deuterium, it brings fields and energies to its area, which are not needed by it, but are essential to the other cycle of life in the area, environment.
R: Perhaps an example of that is when we eat lemon, even though it's a citric acid it tends to turn alkaline in the body, or creates an alkaline reaction to the body?
K- It depends how you want to describe it.
R: you said the acidic becomes so acidic it turns alkaline.
K- It is the increase in alkaline-ness, extreme brings to acidic, (3:10). and extreme acidic brings to alkaline. It's just change of the fields, instead of giving suddenly it becomes absorber.
R: So can that happen with souls, in particular I am thinking of world leaders, can they turn from a lifetime of being acidic to suddenly being alkaline, or even vice versa?
K- Yes, it has happened many times. It's change of emotion.
R: and that would be part of the elevation or is that a different
K- What do you mean?
R; Part of the elevation of the soul?
K- It could be elevation or un-elevation, it depends which way you look at it. What is to get, and what is to be attained?
Q: regarding consciousness. Consciousness of the living man is the combination of the emotion, intellect, and will, it is inspired by the ?/ 5th intuition, in living man it is created by interaction of the STM and the STP. (3:12). Mr. Keshe calls the seat of the consciousness the soul of totality.
R: I am not sure if you agree with all that ?
K- Not really but that is his interpretation.
Q: Is the version of the 358 KSW Cups good for healing and feeding?
K- For what purpose?
R: So healing and feeding is not a purpose in itself,
K- Yeah, it depends what you want to use the fields you create.
Thanks very much. (3:14).

K- I think we are reaching a point that a lot of KS are stuck between the 2 world of physicality and the soul and the operation of the soul of it and how they can see or

confirm what they do, and this is where what I call, thinking, brings maturity. And sooner or later KS will start developing T which fits the teaching, and start seeing it. As I said, many KS are afraid of testing new environment, testing new things that it be different, or it might be wrong. Till you don't make these tests you don't know, and you don't know what you are going to get. And this is where we see a big difference in the work of certain KS. Anyway, we have to understand the teaching of today in a very deep way, and gradually open up ourselves to be able to receive, and elevate our selves to the ultimate goal of our soul.
Thank you for today and we see you next week the last session of 7 years of KF, and from there on we start a new cycle, the 8th year of teaching, solid without failure for 8 years across the Internet and the rest. Thank you Rick
Good-bye.
363 KSW

END

>>>

364th Knowledge Seekers Workshop; January 21, 2021

ENGLISH TRANSCRIPTION

(:24). K- .. we welcome you back as we are moving from the completion of the 7th year, beginning 8th year, and forever expanding the knowledge and creation and the cosmos. We have entered a phase as of today. First of all we would like to welcome and .. beginning of a new horizon in the world of politics with the inauguration of his Excellency president Biden of US in the White House. We see this as a huge step towards the beginning of the world peace. In so many ways, a man has to feel the pain of loss to understand the cause and the reason for peace. We seen during the VP of president Biden, the most outrageous killings around the world, (:26). during the 80s and administration of Obama. With the loss of a son he has pained and he has felt the pain of a loss, and he has become the banner of his peace. Man has to feel the pain that matures him to understand what the pain has created through the conduct of the totality of the humanity.

In so many ways, we see the new administration as the flag bearer of peace, and as we have been directly approached, we will respond positively to the administration of Biden in sharing the T and science in a direct way, between the 2 nations of Iran and US, and the Chinese. We have responded positive and we'll take steps to bring now, as the banner of the new administration is science and T, to add the knowledge of the KF into the armaments of peace. .. we see the administration of his second in command, her Excellency, Mrs. Harris as another strength in bringing the China much closer to the US. On the banner of unification of communism and democracy together. Mrs. Harris has a long history of active communist leadership in US, in different organizations, and

understands both sides, both the culture and political scene, in diversity which is needed for peace to be applicable. We welcome both souls to be the souls of peace. In so many ways, we try to add to this knowledge, (:28). that this knowledge becomes the backbone of many activities to come. We have cooperated with the administration before with the 5 plus 1, and hopefully as of today we'll see further moves to bring peace back into Middle East. It will not be an easy path, we pray for the souls of those who are involved and getting involved in the peace negotiation, that we move next step towards collective peace, and evolution into science and T.

In so many ways, the scene has been set for this, we have Corona which is devastating the nations. We have seen the tools of war cannot stop this enemy, in no fronts for human race. 400,000 loss in one nations, plus millions in others. If the statistics are correct or not, if we lost something somewhere, or not. KF has been in the forefront in finding and seeing what this disease does, doesn't matter what name you gave to it. This weekend is exactly 12 months since we launched the One Cup, One life, and we have saved many lives. Many of you and the people you know, in many different nations have used it to walk away from the pains of it.

In so many ways, we have received more news how some nations in the background have used the One Cup OL, to keep their economy, their industry, and keep their nations intact, without the others to know. In the coming days, KF will release information on how the Chinese government has put enforcement the use of Cup 1, (:30). as part of the essential work of the day, in Chinese industry. Which means why the China is so active, and does not show the sign of Corona as such, it has made it part of the fabric of the society to work in the background industrial zones. Maybe this is what the Americans and the rest have to learn, and we build on it. The information is in the hands of the Chinese, but in operation, what we see, the Chinese have to learn that they cannot use this to create mayhem and havoc on the others, while they keep their own industries and lives moving forward. This is not correct, when man steals a gift. This gift and its application should be openly shared by the Chinese authorities. We will open the direction and the dimension (D) how the Chinese have managed to use the Gans T to curb what we call the menace of this virus.

In so many ways, we don't look on it as dishonesty, we look on it as what we call, keeping the winning card in the pocket. This is part fo what Chinese should have not done, but my praise and my hope is that the Chinese administration moves back to working in a manner that their talk and their action, in trying to help the world, stays and becomes one. In so many ways, we have reached the point of peace, and .. everyone now wants to create the condition of peace, that in totality mankind will move into the new D and direction. As I said, (:32). the only thing which is left for humanity, is the unification of the religious leaders, wanting peace. Not peace on the surface talk and creating war, to create more income My call goes to world religious leaders, step down. Step down from your position, that (because) in time man will realize how you have betrayed the STM for centuries, and the outcome will not be so nice if the mankind takes the steps against and leaving the whole religious belief by flocks. Not 1 and 2s as we saw in some

nations, overnight they turn against religions, and this point will not be good for any of the religions, it doesn't matter in what D and direction.

My call goes on KF KS, to the teaching of today, we will teach you more for you to understand the operation of your soul. More for you to understand the essence of the creation, and in so many ways try to create a condition that you can live a peaceful life. To understand where your soul is, how it operates, and how the physicality and the STM find an operation in the body of the man. That many of you who say I cannot see or feel my soul, it's exactly the way, as you say, "I have no emotion, I have no feeling." This will change. From today's teaching, as I said, we step forward to 21st March, to bring that condition that you understand more about your D of physicality, and your soul. In this process KF as fo today, (:34). has start the launch of a new system where it creates a peaceful condition for man, and peaceful condition, and security for many of you in respect to the present condition. The launch of what we just showed, the Enhancement Air Unit, is one of the first steps that will bring peace to many of you. In the process fo developing this system by changing the flow of the air, not to just for what we call, recreation, in these systems we developed a simple T, that by circulation of the air, we increase the negative O in the world, which brings more comfort in living to man. This we have tested extensively, in China over 2 years, and in China it has become part of the Military application, as we supported and helped, during my stay in China. Now for the first time we release this T on the back of the Iranian report on Corona , which was released and authorized by the Iranian authorities to be published as a scientific paper which is accepted into public. Where this new system will change many of your fears of today. It's been developed in conjunction with understanding of the change of the field strength in the U, and how continuously, we need to be able to change the strength of the fields to the strength that, we as humans can live. In the environment that this stays balanced on a continuous basis for the STM and the physicality of the man in standing energy packs, which we call viruses. (:36). In the space T of today we consider as we have taught many years, viruses are the biggest menace and killer for mankind in the space. As in the space there are no AA that man can get infected by. We do not die of infection and other things, we mainly die due to the interaction of the strong MG fields that our body cannot stand, and then it evolves through it. IN the present science of today we call it, simplest way of what we call, the fields of the energies of our U, the Gamma rays and X-rays, and what we have seen through the nuclear weapon T as harmful. Now you can imagine when you enter into space much stronger fields in the different D what they will do to the body of the man. The new Air Enhancement Unit (AE) is the new level space T which has been brought in a rapid way for mankind to learn how to change his environment from the plasmatic M fields fo the U, on continuous basis. That means when you travel in the depth of the space any energy pack which we call virus, enters the environment of the spaceship, you have already neutralized the environment at the level of the body of the man. We shall see no death through the virus through the development of this new T which has been released today in the space development to come. We will see this unit, as integral part of the space travelers of the future, maybe as soon as next couple of years, it will be implemented by European space agency, NASA, (:38). and the Russians to be on board of space programs.

Don't forget in early 2000 when NASA saw the problems and they could not solve lightening that was occurring in the eye of the astronauts, seeing flashes of light, in work with the scientists of Washington University, KF submitted a new T on the Nano level to block the fields of the Cosmos into the body, and has been highly effective. This is on the back of the space T we delivered to the Americans in early 2000 to the humanity. .. it's the first time mankind has the ability to change his environment through the development of the new science and T, that the viruses and bacteria's become part of the structure, they can be handled simultaneously in the depth of the space. .. the new AE is the gift which we received from the space program of the US as TEFLON. Now we share this knowledge, and T rapidly across the planet, in a way we give it as a gift to the new administration of US for humanity. To use it wisely, and understand there is a change to purify the air, and the energies of the air, not just on the atomic level, but on the energy levels that we call, all sorts of things in the D of use for deep space. The launch of this new will bring a rapid change in (:40). many of our space programs in allowing the man to become the space travelers of tomorrow.

On the other hand in the next week .. KF will release an additive you can add to your paint in your houses, in a rapid way to bring the same condition to the environment of the house in what we call negative O, and with it the change of energies that can be at the level of different energy plasma conditions as we will incur in the space. .. the new T rapidly will be released by the KF manufacturing teams in China, Mexico, and Austria. The new package will be very simple, you just add the additive into the paint, and you paint it on the wall. It brings the stability of the temperature, it increases the negative O level, and increase in the level to balance an plasmatic fields which might enter the room or space. For the first time , KF T, as I said 2021 will be the breakthrough time for the new science and T, and as of today we have approached the first steps of this development. We gave a gift last year this time to the Chinese nation to overcome and fight the process with he Corona, which was used extensively and now it has become part of their natural process of work. This years today, inauguration of the new man with the peace, and anniversary of the One Cup we give the air of life, back to humanity. (:42). One system in overcoming the possibilities of any kind of plasmatic field energy which does not match the body of the man. Would there be a need for chemical intervention in the body of the man when these units are used in the offices, cities, trains, and aircrafts, will come to be seen.

In a way, KF as of today has entered a massive change in the structure of the life of the man on this planet. We have 2 requests from many of you .. We request as many of you to become the agents of the KF to start this spread and delivery of these units to every corner of this planet. Become a distributor. Distribute the knowledge through the ?? T where the effect can be measured. When the companies they put this machine on, there are tools that they can measure the level of negative O in the air and confirm the change, which with it comes the confirm the energy level that you can interact with the plasmatic fields of the environment. This is one of the major and only solutions in the environmental level that can protect every man on this planet. KF has made every endeavor to be able to release this T at the right time, and I chose the time to be today.

In so many ways, now we request and ask the KS, every single one of you, you told the Cups, now promote the development of this T, (:44). that every man can change his environment of the breathing, his work, the house, and the field strength within where they live, that we now bring in the space T rapidly, form deep space knowledge to the use every day of the man, where we change the energy levels within the structures of the living quarters of the man. (:46). Doesn't matter where he's been, the man, what we call , see as viruses the space, and according to the confirmed report, by the virus report of 2020 of the Corona experiments in Iran, showing the effects, effectiveness of the T on viruses gives us the scientific backing to launch such a product. We stay correct, and at the same time, it's the responsibility of all fo you, not only to change the course, but to bring a new D that in the coming weeks a multiple systems like this will be introduced. IN the coming weeks we'll introduce the new systems for water purification from any cancerous items, be it, which is floating in the water. This will come not by talk, but on the back of the scientific report, which was handed over to the Italian government last year, and as you know, we give governments time, when they do not move we bring T to public. In 2015 the KF was requested by the Italian authorities, to look into the water contamination in Italy, and we worked over 3 years with scientific research centers, and the data from the Italian authorities, (:46). to confirm that through the development of the new filtering system we can use the plasma T to reduce and eradicate most of the harmful elements in the waters of today.

In so many ways, the extensive report has been in the hand of the Prime Minister and President of Italy for over 12 months. And as we've seen with the Key (USB Stick), we gave the governments 2.5 years they didn't nothing. Now we release T that allows you to purify any liquid which you might use directly at home or in the industry. In so many ways, 2021 is the year of the evolution of the plasma T and we ask for all KS to join us to deliver this to humanity. You can do it in a way of ordering the materials to be given, or promoted to be sold. Many of you have lost your jobs, many fear your economical reduction in your income. KF has and is moving an industrial unit, international organization to fulfill to bring back, some of these back to you, take your pain, or your worries away. We ask if you are wealthy and you don't need such an economical support to promote the new system which we released today. The pain ?? pen and water which will be released in the coming days, and in that process we bring the change. 2021 is the year of the change, for introduction of the KF T worldwide in a different way. In 2015 and 16 I invested millions of dollars of my own private cash, to develop factories, and bring systems that it could bring this T. (:48). And we saw how those who were within us, betrayed us, and they thought they walked away with it, but we took their souls. We took their souls by elevating it, that it found its level, it has no, and cannot do much harm, just but to except to elevate their own position. This time I invest what I invested for 15 years, the KS. The KF factories are ready to bring the change. You promoted the Cups, now we promote the change in the environment. We are preparing the factories and our organization to be able to meet this challenge and being able to deliver this challenge in the coming days and months. We have given one undertaking guarantee, that the new air purification system will be delivered within 21 days out of the factories of the KF worldwide. Which means within 30 days these units will be delivered. We keep to this

commitment unless the orders goes to the point we can't, we have to increase the production. We can meet the demand to the level if any purpose you can use it, and the same time we try to keep everything to functionality that everybody can benefit by it. Make a gift, give it to the hospitals, and let them see the result. Give it to places where people interact, make the authorities to understand. If you have connections with the airlines, .. air industries, or railways and public transport, these units has to be embedded in every system. We change the environment from outside, it will bring balance. it brings what is known as a positive move. Chinese government is using the paint in the military for high altitude position in the Chinese military headquarters to bring balance for the soldiers. .. when we tested this in China they brought in some heavy smokers into the room and by using the paint and the T, they were all smoking, but we could see no smoke. We see the change in the direction. We gave a lot to the Chinese, but .. they betrayed us in every level in sharing knowledge. This is the habit of the Chinese government in stealing T and now we don't look at it as stealing , but we look at it as a contribution of theirs to the research of the KF, that now we can share. We used China as a laboratory for the development of the new T some years. Now we share the knowledge accordingly. In so many ways, what we share with you, now is in the hand of the Chinese military and they use it extensively. They asked me when I was in Beijing to test and develop a T for them. I spent a lot of time, perfected it, at the end we were betrayed by the national security and the Chinese military to be taken for themselves. This time we thanked them for allowing us to test and we don't look at it as a betrayal, we look at it as them providing a test facility bed for KS to be able to test and confirm. (:52). And now that the Chinese military are using this T, we have the right to use it as the T belongs to KS and the KF.

In so many ways, up to now you sprayed yourself with all sorts of Gans's, now we change the environment, that the fields cannot even reach you, that you need to spray. In so many ways, the new EU for air and other systems, which will roll out of the KF what we call manufacturing units, is the beginning of man to become man of space. .. to, for us to understand how to handle the viruses, and at the same time bringing normality to life. In so many ways, it's a gift to humanity as we have given many gifts, and this process will change many of us. The new AE system is a tested system by both Iranian nation .. and through the Chinese national army using it in Wuhan City and in the quarters and industry, as what they call the Gans waters. In so many ways, as I was thinking .. 2 years of my life in China has born fruit. 2 years working with Chinese authorities trying to develop different things an as step by step as we gave them the gifts, they stole one by one of it, now we know what they stole, and they have proven it works, now we share it with you as public. (:54). that it has been fully tested by 1.4 billion members of this human race on the banner of national security. In so many ways, we are delivering to you a well tested system to bring change to many of you. One of gifts will be sent to in the next few days to the White House to protect the president of the US as a gift for peace, as a gift for understanding of new T. We send this gift to the WH on one basis, that there should be no worries for world leaders to meet again and plan the peace of the future, but the same time the world leaders to understand how vulnerable they are. We saw on the inauguration yesterday, the most shameful way to become a president where we have to stay in distance and cover by mask. We don't even know who really is behind these

masks, because it has become a cover for insanity, for man to do more wrong, under cover of protecting whatever.

My call upon you KS is simple 2021 is the time for peace. 2021 is the time for the new T to be reached by every man that we share a new horizon and life in the direction of the peace. We have to understand the work, and at the same time one of the most fundamental changes which will reach you in the process of use of this systems which we deliver is hidden within it, and with the structure of it, is the elevation of the STM. This is the purpose of the new T. And as I said, this is not, we are not here to deliver, (:56). physical structures, as the man has managed to do enough damage, with delivering physical D materials and tools.

With the new T, as the STM and physicality work together, the new science and T, which we deliver will do the same. The new EU is the new EU, and the units to come for water processing, is not only to purify, but to enhance the STM too. You shall see the changes in the behavior of the man who live in this environment. Man will become a peaceful, serene, and in that process will find new solutions and D for him to live a normal life.

In so many ways, we have reached the pivotal point of what I call, the first steps towards world peace. The first steps towards understanding the preparation of life on this planet on the basis of understanding of the totality. We don't strive to reach every man, we strive to reach every soul. When you use these units in your home, it's not you who gets elevation, it's not you who gets security, it's the planet, the animals, and all that we share in. This process had to be put into operation.

In so many ways, everything happens for a reason at a given time. I ask you again, KS, become the masters of science and T, and not just take when I need it. Behave as many of the Iranians did, during the time of the Corona last summer, collectively as one. (:58). Link up and understand how you can serve and bring the new changes. You have connects in any directions, get in touch with the KF direct, who, where you have and the sales team which is put in the background will take over and do the rest of it. The reality is you can measure. Next week KF will deliver a new unit, to 2 medical doctors in Austria, that with this process, with this new T, doctors will have the ability to ask those who are effected by different conditions of environment and energy to be tested and see how fast we can change the D and the energy flow of the plasma within their body. Which means if you have a cold virus, how long would it take the body to show the reaction. If you have the Herpes virus, how long would it take the body to show its reaction to over come it. .. AIDS.. These units are on the back of what we call the present EU and developed especially for the known viruses which have been tested by the scientists, and reported in what we call the Corona report of Tehran, which was published in June of last year and was given to world governments.. . .and they understand its implication and application.

In so many ways, as we enter our 8th anniversary we start celebrating the freedom of the man in space from all sorts of energy packs that is continuous, (1:00). and doesn't matter if it touches the physicality of the man or the virus to the STM. In this process we teach

more and in the coming weeks we continuously proceed with the development of the new T that brings both the physicality and STM into balance that it brings a peaceful condition.
As we said, now we have a president who has felt the pain of a loss, and with it will bring the joy of happiness of life. The KF will do everything in its power, and the connections we have within the American administration and the Iranian government to make sure the steps, and level of the peace maintained will be achievable across this planet. The change of T will bring the change of attitude, and the change of T will bring peace that the progressive development of the science will keep mankind busy, away from wars, but to see how they can give each other pleasure. Who can do more, to give more. And we change the gun policy, with the Gans policy, where we bring Gans's to bring joys, but the guns will go silence. Today with the introduction of the new AE is a first step for the KF.

As I said, 2021, every time in the world of the creation we have seen 2 consecutive numbers, it has been a change in the process of humanity in one way or another. 1918, 2021, progressive development. In so many ways, by March 21 this year the true calendar, (1:02). will change to 14, too, which will bring peace to man. Which will become the condition of the clock to work. We invite you all to become men of peace through the understanding of the operation of your soul.

In my teachings many of you tell us, "I cannot find my soul." How can I confirm I have a soul, that it exists. But as I said, to many KS you don't look for your soul to appear, you look to see what your physicality manifests itself through your conduct in the D of the physicality. In so many ways, mankind needs to change. In so many ways, we bring the knowledge of peace, but peace has to come within the man so he understands where his soul is, to understand the operation of the soul. To understand how his physicality interacts with his soul, and how the body so cleverly has hidden the soul, the gem of his life within his structure. If as KS you have followed the work in all the aspects of the teaching, over past years, we have taught you many things, where sometimes when we bring it together, collectively will bring you the essence of life.

Go back to the teachings, to all what you understood in biology and chemistry classes. You have the body, brain, (1:04). in 2 halves. You have the physicality of the man in 2 halves, where the cross has brought the balance. In your physical condition your body has arranged for the balance of your physicality under your foot. The brain and the soul have brought balance to your physicality in your inner ear. But In so many ways, 2 power points, 2 power generations, 2 power systems as we know in the knowledge of the plasma, the weaker gets from the stronger, and the stronger gives to the weaker to bring balance. A small sized brain supports a big environment of the life, and we see in that conjuncture is where your soul is created.

In so many ways, for the first time any of you can understand and find the position of your soul. In a way, what your physicality does in operation and balance with what we call, control of emotion, gives you the correction and the spot and the place, where your emotion, interaction of the fields become the work of your physicality. In a way, you walk into what your soul has received. What the soul has decided, (1:06). to receive and

to give. .. when you understand, you call it work of destiny, we call it the work of the soul. Whatever the physicality has done in the process of going in to create balance with the brain of the man, the emotion, becomes the cross conjuncture. The position where the totality decides and the STM rules.

In so many ways, maybe for the first time mankind becomes aware that his conduct and interaction of it with his soul, brings balance into physicality. Maybe now for the first time you understand how our physical feature decides our destiny, decides the way we think, decides the way we live as the totality of the interaction of these fields with the fields of the planet and the fields of the other souls will dictate the destiny of the man. In so many ways, "I was not supposed to be there, but I turned up to be there, why because the soul has brought me to that point.

If you would have told me some 3 - 4 years ago I ever move to Austria to bring the knowledge to this nation, to this part of the world, it would have been unbelievable. But now why, and why the headquarters of the KF has moved into the city of Linz to bring balance to what happened in the Second World War, and what we saw on the back of it, and where is the headquarters and breeding ground of what we call, superiority in power has met the match with the power of the Creator. (1:08).

There is a reason we are in Linz, because the soul of the humanity collectively wants balance. In so many ways, as person we appear, but in totality, mankind has suffered through the backbone, back structure of the SWW which started in the city of Linz, to bring us back to start the balance, because we never stopped the massive wars since the beginning of the SWW. We have seen more death come through the same structure of the organization, by killing more people in the past 80 years since the war, in and through the SWW initiative, and the KF T and the Knowledge of the U have to come to this city where it was unbalanced, where the city, nation, and where the soul of the humanity wanted peace.

Then we understand the STM works collectively. We adjust the tools to be there to see, in order for it to become effective. It's the same as I said, the STM is ready and decides for the change. .. collective STM yearns for change and peace, and collective STM has brought me to the city of Linz, where the seeds of the wars started some century ago. That we bring peace through the same process, the same city, the same grounds where the wars where planned, now the peace is planned, and then we see how the change will bring changes to humanity. The century of the peace in 2021 has started. And many of you are instrumental in understanding this. (1:10). And in bringing forward. It's the STM and created things on this planet which move in that direction. As we said, when 1 magnet moves, it moves the others to accommodate to bring balance. When the soul of the humanity moves towards peace, the other souls of the Creator, and u Community will move to accommodate the entry of the into the world of the creation, and the U Community. My love and my peace to those who brings us this joy. In so many ways, the beginning of the structure of the peace has started, and .. if you understood and you are searching for your soul, now understand where does my legs walk me into, but my soul has planned for me to do. Why am I here, what have I done, or what am I supposed to do

by my presence, which my soul has planned me to be. We think we like to be in a place, but if your soul has not been accommodated you will achieve none, you can strive to become but never reach it. Because your soul is aware of what it might come to harm him, or to harm you, or for you to find balance in the cycle of your life.

In so many ways, the time for change has come and we see the process for the change. We see we understand, and we promote peace, (1:12). through the development of the new T, which mankind needs today. Change of the environment that it keeps us away from the menace of the viruses. The change in the elevation of the STM in a much more rapid way that man in a short time become elevated in the totality, and the world of peace and understanding.

My Love and my Peace is in the Hand of the Beholder

In so many ways, **my love and my peace is in the hand of the beholder**.

In so many ways, share the knowledge as you share love, and share the knowledge as you distribute the Gans's, unconditional the way you spray, and bring the process of the peace through the elevation of your soul to elevate your leaders that it becomes a peace process. We are **not to become the point of the fear with the new T. But we have to become the point of joy and pleasure to have**, to share, and to hold with all the created things.

In so many ways, **for the first time .. collectively we strive to change the process of life in understanding the position of our soul, in understanding the essence of the creation of our soul, and now that you say, "I want to see my soul." See where your physicality walks you to.** As you see from the picture (on screen) it's very simple. **It's a point where your emotion, (1:14). the balancer meets your physicality, where the interaction of the STM brings changes to its D**. This is not only for the man, every created and every creation carries the same position, responsibility and reaction. It **does not matter if you decide to be a plant to live a season, or you become the Creator to live for eternity. The principle applies on both, and according to the generosity and the life of the existence is the purpose of the creation**.

As Seed of Plant Cycles - So Does the STM

In so many ways, life never stops. In so many ways, mankind should have learned a long time ago, from the seeds you eat, from the harvest you collect. **You see a plant, it grows, and then it becomes a seed, and you see no life in it, but in fact, it has hidden life within it, and you cultivate it the next season, and you see the life grow again. This is how the soul of existence is. It never dies, it changes, according to the position, presence, and environment, it manifests itself**, in the same position, and in the same direction in respect to the soul, but in respect to the environment it grows.

Re-Manifestation of Soul is like Seed - Mutates to New Environment

You take a wheat, you grow it in China, it gives you the flower here and it gives you another seed. Now you **take this seed and you grow it US**, it still does the same, but **it mutates to show its presence in respect, (1:16). to the condition and new environmen**t which has tested. This is how is **the STM, we are gathered as a seed, as a soul, and then in coming time we are reached the maturity of life, we gather knowledge and the strength to become the seed, and when our soul travels in new D then it can grow again,** but this time it's reaction, growth, and manifestation in respect to its present environment.

This is how we will travel the space if the U. The physical life, the flower, the plant, when it goes and hides within the seed, the will take it across the span of the U and where it suits and it finds balance it will grow. It will become a new seed, in respect to the environment it was introduced to and still will flourish. and become a flower, and it will become another seed in another cycle, for another cycle for it to be taken by the wind of the U across the U to grow in another position and D where it finds balance. As we said, there is **no difference between the Macro and the Micro**.

In so many ways, mankind should have seen this where the seeds and the flowers of the plants lead the destiny to be in the hands of the winds, to be bring them to the point they can nourish and flower, and become another flower, this has been, and shall be the condition of the STM. We nourish our soul inside, with our physicality, in time of its maturity we let it to be, (1:18). in the hand of the winds and sail across the U to find its new position, to find its destiny, and there shall be .. no changes, unless the maturity of the soul to gather more knowledge in the new environment, and in a time to flourish to seed another position, to sow itself, and in that time become another seed in the wind of the U, to create a new life.

Why I Suffer - I Made others suffer - To Learn (Karma)

In so many ways, today's teaching is very simple, you were looking how and where, now look what I do, where and why, and **why I suffer? Because I caused the suffering to somebody else. Why do I go through the joy, because I created the joy for others to enjoy**. When you suffer understand what you have done wrong, and has come into be the suffering, learn from it that you don't do it again, or you add to the knowledge that it will not happen to the future generation. You cannot steal and hope not to be stolen from you, through the conduct of your own soul. **Your soul brings you to the point of justice**. You have taken, you shall be taken from.

In so many ways, mankind will learn very fast. Mankind will learn to be the seed, that when he leaves this planet and becomes and sails on the winds of the U, will grow in perfection, will grow according to his point, but as you've seen, a plant releases many seeds, and not all grow. The ones which have (mal) functioned, (1:20). and have not managed to gather the right strength, when they land on the land, brought in by the wind, they will never grow, they'll be wasted, they become another pack of energy which shall be nothing. And the seed which has grown to perfection, when it lands on the land, will grow and will seed, and that will be the STM. Those who misconduct will go through the

same phase, there shall be noting left of them, and there shall be nothing with them. This is what we explained, what is going to happen to the STM, how do you expect to have a beautiful flower when you have not gathered the right energies for it.

In so many ways, those who steal from the STM will pay through the conduct of the balance of the souls, with their own life, their own cycle of behavior. Instead of spending so much time thinking how and what to eat. Now that the T has provided to man with everything he'll need, think how do I conduct myself. How every move of me, will become part of me at the point of departure, and what shall I take with me. You took, it shall be taken, unless you ask and you are given. This is the law of the creation. When you ask and you are given from a soul, this is a gift you are given, you have no more claim. But if you have taken you shall be taken from, because the fields have to become in balance in all directions. This way the man becomes the judge of himself, and walks away from the misconducts of the past. You cannot intrude, (1:22). unless you are allowed to take part of. You cannot take another soul unless the soul has given its permission. This is the conduct and the way mankind will live. When your soul become a thief in the wind of the U, where all accommodated, where you ask, and you are allowed to be, become the place of your manifestation. You cannot just barge in and take a position. You ask and you are given, it's your right to stay, and your right to hold and enjoy the presence and the time. Those who have stolen, shall be stolen from through the balance of the fields of. In so many ways, there is no claim on the STM, except by the man himself. In so many ways, mankind should spend more time in understanding his conduct by himself in trying to understand the balance, then trying to create balance by force. Asking 1 question, can I have, and can I be given, and if I am given I have to be correct in conduct, not do and abuse. Then if it abused and given the chance, then you will see the consequences of. In the cycle of humanity we have seen this in the past time, and in time to come, the prime example of it is the suffering of the tribe of Moses, no nation, no land, been nomads for centuries, were given a state of Israel and instead of bringing peace among the people. as they would have learned from suffering centuries of themselves, they became ruthless killers, and bringer fo the pain, and for that reason that state cannot exist, (1:24). because the soul of totality of creation of that state has brought it to a new unbalanced situation, which brings an end to its own existence, but the soul of those who have created it, as they see in justices among the others. We shall see the same with the state of China, where with the gifts given to them, instead of bringing peace and prosperity, where they suffered for centuries, they went through the same abuse of lubricating and glossing what we call, economical growth for what we call the other nations for the benefit to become leaders and abuse of leadership in different ways. My call goes up on all nations, you are watched, through your leaders and through your conducts that any misconduct in totality you are all responsible for. We shall see the demise of the state of China if the same conduct of the presence will carry on. In a way, glossing the leadership by becoming another to bring more pain and suffering to others as we have seen with the Chinese in Africa and other parts of the world, that their presence become resentment to the nations through misconduct, of trying to do exactly what the Jews did in Israel by the Palestinians. The conduct of the leaders has to be correct and collectively for all humanity, and not for their area which they have been chosen to lead. This is that the world leaders will think collectively as world leaders, not their nation

leaders, and this is why we established the state of the Universal Council, that there are no borders and their soul serves the totality of the soul of the language mother. (1:26). Now you understand how deep the work of the F has been set, to parallel and be in line with the work of the U Community, that man is ready to join the Community. We have seen the example of this one in past few decades, when nations wanted to become part of European Union, they adjusted, they changed rules and laws to fit, to become collectively one. This is how should be the position of the present world leaders in the same way, now that we become one. This is my wish, my wish is my command, and my wish will be obliged.

In so many ways, mankind will become on kind, and in that process will become One Nation that it will take to the span do the U as One race and not as one nation. In that process becomes part of one Universe. Mankind will learn fast, we have started this process and in the coming years we will establish the great peace, as we have started the process some years ago. In so many ways, my call goes on the EC and UC to work in one direction, to start establishment of one government and one nation, that you run through the world leaders, through them, through their soul. In so many ways, we have cleverly delivered our mission. We have very cleverly brought you to that point, and we celebrate that with the beginning of a new life on 21st March. With no claim, and no change. In so many ways, (1:28). the change will come through the STM. and ?? new cycle of life. We will see and will understand the process of the completion of the mankind to be able to enter, to understand, to see, the U Community, to feel their presence and to become part of.

My wish and my prayers are simple, today we delivered a new T, that it will be in every household, and every corner of this planet in one form or another. And in the coming weeks we deliver more of the same technologies that in totality mankind will become kind to himself and a new life shall start. In so many ways, for humanity to become changed I have put the whole cycle of creation in one picture on the screen. It's a according to your understanding and your intellect that you'll interpret this picture, the cycle of life to the creation of the soul, to the conduct of the physicality that the conduct of the STM is responsible, and for the STM to be responsible in respect to the other. Understand one thing, I made this very clear, you are asked, when you are given, and then you intrude in what you have given then you stand your own balance of the soul. You call it a balance, or punishment, there is no punishment. You'll be brought to the position that you accept the position what you have given, and what you have accepted. And you cannot change it, (1:30). or try to intrude with it, as your soul will bring you to the position for the second cycle of suffering as you have not learned. You do not touch what is not yours and is given, and with it you shall pay through the balance of your soul, with your own pain, physically or position in the direction of your soul. You do not need to be a Hitler to kill so many to find no position, you can do with a single soul of yours misconduct of itself.

In so many ways, mankind has to become mature and stand responsible for his own conduct and understand from now on, now that we have made and we are facilitating a comfortable life for man. Man becomes responsible for the conduct of his physicality and

the soul to become one, and in this process man needs to mature. Man needs to grow into the second cycle, and in that process of second cycle means elevation of the soul, spreading the love of the Creator among the creatures of the U, and not to belong to one nation, and not belong to one planet, but belong to one Universe. and in that process all dogmas of today that we become nationalists, religionists and whatever politicians .. we all become one, in one direction to achieve peace first for our souls, and secondly for the soul of humanity, and the planet and Universe. Mankind soon will face his Creator, and in that process the creation will become easy for him to understand. (1:32).

My wish is that all you KS and all those who listen, and heard the voice of the Creator, will come together to bring peace to humanity. In so many ways, my wish is my command, as a creator I wish the man reaches the point of maturity of peace, and evolution, and elevation of his soul. Try to strive to understand the work of your soul through your physicality, and don't call it, "I happened to be there when it happened," you happened to be there because your soul has brought you to be there, as it is more powerful. If you look at the magnets when you put in the set, the magnet is physical and you see it moving to find its position, but in fact, it's the field forces of the others which has forces that physicality to be in that position. So you understand that when you enter a room and you serve, and give, you enter an environment, and you devote your life to serve, the other souls have seen you the same, and they brought you to be there. Your physicality is just a manifestation to show where you are. In essence, the fields do your work, and they decide. I hope today's teaching brings you more enlightenment, and those of you who were waiting to see your own soul. Now you understand the presence of your physicality, be it in the shop, on the operating table, as the president, is ?? one thing among things, to elevate your soul, at the same time to bring the collective soul of the creation and the Creator to understanding of equality, peace and the balance. (1:34). Use my knowledge and T to bring peace first of all to your soul, and secondly to the rest fo the creators ?? In so many ways, understand one simple thing, it doesn't matter if you are at the strength of the physicality, or at the strength of the soul, it all has to be respected, and all has a life to live according to the time place and position, till the soul and the physicality of the soul both decide where and how they want to move, and how they want to elevate themselves and take position of the new position.

As I said. we walk you, and it needs we teach you, and it needs we give you everything, every tool to evolve to understand and to mature I hope today, which is for some of you already into next day .. will become the beginning of the new cycle. We will celebrate the 21st of March together for the creation and presence of the new cycle of life, for the all souls of humanity, to elevate to a new level and become detached from the D of physicality. As they say, many of you, and many of your forefathers have been waiting for the day of Promised Day. It's about to arrive in the promises to your own soul and the D of the existence and the totality. The change will come it does not matter how man celebrates or cries, because at the end, (1:36). it what will be good for totality of the creation and the Creator.

My love and peace goes to all your souls, and I hope you find the path between your physicality and your soul, with the new teaching, and the new T which allows you to

elevate to that position. In so many ways, maybe mankind is ready to enter the U Community in 2021 and with it bring peace and prosperity. Let us see how collectively the STM will accommodate the change. I wish you a safe journey in this journey of life and understand the changes has to come, as it has to be so rapid otherwise it will take too long to implement.
Thank you very much for today.
As we enter our 8th year, of balance. As the Chinese way, the lucky

Would you like **to go to a BREAK** … (1:38). (1:48).

(1:58).

Q: What is the link between climate change and change of earth's magnetic poles, form time to time, and if we stop polluting the planet can we reverse this process?
K- In a way, we don't reverse it, we bring a new condition, (2:00). that it can bring changes which the planet agrees with. If we go for climates change, and try to change it back to what it was a century ago, before industrial changes which we have seen, it will bring more harm to humanity then before. Because not only we are born into the new cycle, our fathers, if we are in our early ages, and our grandfathers have been through the same and part of the industrial revolution and their body has adjusted and they have gone through the evolution. If we try to change back, it sounds fantastic, but can bring calamities to mankind, because we absorb different kinds of energies according to the way the atmospheric pressure and temperature, and the air fields which we have absorbed over our lifetime. The prime example of this .. we see ladies they smoke cigarettes, they breath the smoke of cigarette to sleep, this is very traditional in countries like Greece, and a lot of women believe in it, and they smoke primarily to keep the sleep. And that has a reasons psychologically and physically, we use more energy because they clog up the lungs and all sorts of things. But the minute they stop smoking they start putting weight on, we have seen this, it's very traditional. So the change of the environment of the air in the lung brings a physical changes in a rapid way. Mankind will be in the same position, if we suddenly change the atmosphere or try to bring rapid changes into the condition which we had before the industrial revolution. (2:02). we will run into huge problems, new diseases and cancers, and everything. So it's not reversal of evolution, it's finding a new way to evolve to. And we have seen with evolutionary systems we always leave with bigger problems. At the same time we see people run into breathing problems, lung problems and everything else. .. by changing into plasma T and evolution of the fields we partially committed the 2 together, where the field strength is across the boundaries of the lung but at the same time we allow the process, the body to take new understanding of its structure. This process is the same, we cannot bring climate changes, M field changes in the planet, it's a normal thing it happens. One of the beautiful ways we show that our bodies are made of Gans's and not solid elements, because it is in the plasma condition, is the change of polarity of planet earth. Every so many thousands of years, the polarity changes but we don't feel it, because our cells themselves are plasmatic and they change

polarity, but their operation stays the same. Because as a total we change and respond to. So what was the fear, we couldn't understand what a polarity will do, or whatever it has been doing, it's very simple, we evolve and change with it, we go through it. The sun does it every 11.5 years, 23 years it goes back its right position. SO there should be no worries on that one, What we call environmental changes, has to be according to what it is in the position, (2:04). of what as a whole the human race we can handle. Any rapid changes will bring its own consequences and sequence of changes for all of us. It's good to go back, to be. but we have to introduce a proper alternative through new T.

Q: How far can the new AE units reach, how many needed for big or small cities. R; I saw something say 25 m2 ?
K- This can be proportionately enlarged, but in a way, these units are literally like computer units, free standing. It's been built deliberately for this. It's more or less you can move it around the house and put in different places. But in general we can change this to the size, according to the conversion of the fields. It can be built a number of them to be incorporated into a structure of a building, or insert of an office. You take it round about 25 to 40 square meter on one system to be continuous effect in one normal house, 1 unit is sufficient. (2:06). In 1 office 25 to 40 square meter is more . Then we have to go to bigger larger scale, and that then creates other things, we need continuity of interaction of the air with the structure of the plasma to carry it. It's not just creating a continuous flow, there is a rate of flow and a lot of other things to be done.

(2:10). And the harvest will be fed to the animals.

(2:12).
Q: Guatua, new Air Enhancement Units. .. You have talked about betrayal… (2:14). why humans resist your kind of T, .. is there some kind of disease we don't understand that humanity has that resists change .. what is the genesis, and how does it end?
K- This discussion is interesting. In less than 24 hours before I had this discussion with one of the powerful KF supporters within the Iranian government. People who have been appointed to support and bring the T into Iran. What he said, .. you what is the problem, in the Ministry of Health of Iran, there is a mafia, and this mafia is not allowing, not only your T, but what is benefiting them in their private accounts to be done. And Ayatollah K of Iran has no power over this. With all his influence he cannot cleanup the Ministry of Health in Iran from 650 officials from within the ministry who have created a syndicate for Iran Health organization. Even the religious leader has no control over this, they are so powerful. It's not just for example, our T, there are a number medicines for other things. They ask for ransom, if you pay they give it to you. (2:16).
K- Rick take over this for about 10 minutes I have to answer this call. .
Q: WL what happened to me how I connected to the Cups .. (2:18). I went to work and tried to connect with it. first 2 days I didn't feel much. then 3rd day a cold feeling of energy in my body. Today .. I had the feeling there was more light in front of my eyes. Much like when I do meditation for a longer time, feel peaceful and joy energy packaging me. I just need to talk to people or see their picture and I can feel their energy, like some

story about past life. This only happened when I am in high energy. (2:20). .. normally Cup 2 will create Gans after long time. ??
(2:20). … (2:22). I go and pray for it, I say, please give me what you don't need, and take what I don't need, to balance all my soul and body. I just want to share that with all of you, thank you.
Q: I don't think my question was fully answered…
K- I think it was fully answered in a way that, that's what we are doing with agriculture. (2:24). This is the way we'll interact, unless you want to know more.
Q: the countries resistance. .. when you go to places and offer the T, and how they end up using it for themselves, betrayal?
K- You see, the situation is very simple. We offer the T freely, and then we try to collaborate with the nation to implement or deliver or test the T. You got to understand, governments are made of people, they see benefits, and how they can benefit by it. It's not the government, it's individuals within the government who steal the technologies. It is within the structure of the human mentality. It is in the structure to understand the process of, the whole structure in how to manipulate to their benefit, and they do the same, we seen it with the Corona. We seen it with the Chinese officials. With the what we call it the Iranian government administration, we seen it with Brazil, with European nations, (2:26). There is something for example, with this present situation, this pandemic, we have seen that the governments are locked to an international program. We see it. We cannot go and do anything with it, but we can in a way acknowledge and be aware of it. The process of .. influence by people, is very simple, it's not the governments, but the people who make the governments. This is the problem. This is what we see. For example with the Chinese situation, we offered the gift, they saw the result, and then the officials in the army they took it, are using it, and then for it not to be a T from a foreign country, that it keeps the pride of Chinese, that they have done something, they hide it, but they use it. So what comes into it. We had a conversation .. he says he knows the individual who has blocked the KF ratification in Iran health. Because he wants bribe. he says, I pay the bribe, for my T to be accepted. But even then they don't let you go. (2:28). It's not the government, it's the collective decision fo people who govern, in position of trust, and this is where the problem is.

Q: About air enhancement, or negative O system, and paint, could you please ex[lain the negative energy and how it works.
K- This you can read, there is a lot fo literature on it, it changes a lot of environments. Now we use the T of the plasma T, to deliver this through the knowledge of the plasma. Where it changes a lot of things, it changes behavior, emotion, air environment characteristics, and it's all well documented. You can go on Internet and read about it, negative oxygen. It is well sought after T, it can’t be used on its own. It has to be used in a specific way, which we have developed, to be able to use it as a purification and enhancing. We done this, we tested this in Beijing for sometimes, and we have seen its effects and its operations , and we understand now how it works. We are commercializing producing it for to be done for this purpose. The beauty of it is, with the new T, the new system, we enhance the soul, (2:30). the emotion, which effects the soul, that we'll find peaceful people.
R: What does negative oxygen mean? that would be what they call ionized oxygen?

K- No, it's a different, it's totally different. Negative O is totally different. One of the ways that the Chinese are using it, is in the high altitude in Nepal, where the soldiers are not used to, and the go through huge changes, and with the thinner O level they are using this, in bringing balance to, more or less, emotional, you bring the balance into it, and then the body adopts into it. It's a psychosomatic, but now it is plasmatic psychosomatic, which means through enhancement of the psychology, we enhance the body. It's one of the new ways of working through the soul to elevate the physicality, to stand the position and the direction. And it is measurable.
R; So negative O must be different then negative air ions.
K- In a way, yes, but when we call it, negative Oxygen, is with soul, with understanding and promotion of the soul. These systems are built that way. (2:32).

Q: In 117th KSW that soul should absorb what we need. through the eons we have not done this correctly, please expand on what we need to do?
K- repeat .. We have to become more conscious of how we receive, not target to receive. If we target to receive we never find out. Becoming conscious of how to receive it, allows us to think, and to receive, that allows us to elevate our souls. You cannot shop for it, you cannot buy it, you have to become to aware of it, servitude, and being able to deliver such a thing to your soul, from the environment you live in. In a way, a lot of you go for the Zn and Cu, and making Gans's. (2:34). How many of you have gone to sublevels of atomic structure to be able to reach that? As a nuclear physicist I know where to look for it, and I know where to get it, and I know how to achieve it for elevation of the soul. You work in the D of physicality of the man, and I work in the D of the creation. You have to have big palaces, big cars, everything maximum. I work into the servitude of the soul of the Creator, which to be as low as possible, to receive to be humble. … if mankind realizes one day the knowledge I carry, from all aspects of knowledge of the creation, it should make me an arrogant man. But the more I teach the more humble I become. Then this should be an example for most of the KS, then you receive when you share. We don't hold knowledge, we don't hold back to teach when it is the appropriate and right time for it. And we don't choose the time and the place, we feel the emotion of the soul. It's the same, in the past week the Italian community has risen to make sure they have EU in Italy, and they start contributing tens of thousands into the F to make sure the first EU in Italy is seen to be done. If you go into the list of the contributions, 40 to 50,000 Euros, they are building it up, that they want the nation to be elevated. They want the people to have the benefit, the children who suffer. (2:36).

In so many ways, we see this as a progressive development. This is as part of being able to develop ones soul. The Italians, and now we see the same thing from the English KS, because they want to bring it to change. ..
.. the KS have become part of the structure to bring this change in. We see it in Italy, the .. . (2:38).
We expect to see 50 people per year to use the T.
The biggest problem is to reduce the medications ..
In the new T which now getting developed, you walk into an empty space, like the womb of the mother. It's when we share knowledge, teach, apply, it's done very rapid because

we understand the lot of it. .. (2:40). We got understand the next evolution and next step.
Q: .. I would like to buy 6 Air Enhancement Units for Brazil.
K- Everything goes via the KF sales.
R: So that means KF Store
K- Yes, this is the point that all KF around the world go to one place.

We work as one, this is the way IT set it up.
(2:42). large donations, as they are doctors themselves, they can use it

We need certified medical doctors that they carry a license, that they can prescribe to reduce of increase medication. This is the reason. We will need Chiropractors and

With the plasma T because we elevate the soul of the cell through the process, even as much as the STM, the man just walks. It has puzzled many physiotherapists, that they is such a big difference. People who use the plasma T with all sorts of physical problems they had for years, it takes months of training, pulling and pushing to get them walking. With the Gans plasma T they just walk. Because it is the soul which walks and the physicality follows. This is one of the beauties I have seen many times. (2:44). People in bed for 5 years because most fo the brain has been removed because of tumor. They walk and they say, I can't remember walking, we have to show them the videos. Where the body has never moved, the doctors have just left in the position. But you see it, they just get up and walk. We saw it with Naomi, 1 year in bed, she can walk. Then you have blockages, physical damages, have to be repaired. .. We need certified medical doctors who can change, who can bring new prescription, advise the patients in how to use the Gans's and everything else. .. It's the first time the doctors have the capability to change the soul of their patients, which changes their physicality much faster. This is what we saw with pandemic in Iran, how rapidly the patients in the hospitals are recovering and we explained to the doctors. .. at moment you try to kill the bacteria and the body has to dispose of it. The new T used the energy of the virus to become food to the patient. In a way, what was killing you is now feeding you. This is the evolution in science, so we need doctors who understand this and can implement and bring new insight. If you are a medical doctor, join us. .. (2:46). People who write in as alternative doctors .. we respect you, we need to train you, to your way of operation with your patients.

The KF in the 2 weeks, will introduce an absolutely new T in the world of medicine. My understanding and instruction to the KF team, we don't go to developing our, we will develop new T, we take present T and add the knowledge of plasma into it. You've seen it with the fan, .. we add our t into it and we change the environment. maybe in the next 2 weeks we'll introduce a new patch, specifically for the pain and inflammation. What does this do? .. You put a patch and the energy of inflammation will transfer into it. It will be called, "Inflammation and Pain Patch." You will see the result, within hours, pain which has been there for years, just leave it. And this will be a new T which is added,.. and on, and based on what mankind has already achieved, and we add to it. (2:48). This is not a breakthrough everything new. It's man understanding more and adding on to more to what he has achieved. The new patches will come in ..

The next few weeks the KF will release the telephone field Patch. Most probably some of you placed order, you might receive the first won free. Where you just place it on the back of your mobile phone to divert the fields. It's part of what we do, you put on your old mobile phones, it part of what we do. It makes it safer. The same is, most probably introduce a system which will in a way, alleviate the side effects of G5. G5 if it is used for what is its purpose is achievement, but if it has created, which we know, has created through its high frequency other problems, we can alleviate it. We can take the best of it. The same is with the Chemotherapy, we developed a T to reduce or alleviate the side effects of it. But we elevate the power fo it to destroy the cancer, but we alleviate the part where it has got a side effect.

This is not to be anti everything, it's in cooperating, it's the new way for the humanity to live. G5 has many advantages for communication, even though the next steps of it, G7 and G9 will not even use the human frequency. The development in the KF allows us to deliver T with a heartbeat. The way you fall in love, (2:50). I can teach you. The T is already complete. For the first time it will be used in the EU, which are delivered. These are not talks, because we can see the heartbeats, we see how people changes, how emotion can effect it. The people who attended the Vienna conference they seen it for the first time over a year ago. Now it has evolved into a completion, that we can do it, in a very fundamental way, that we can create a heartbeat as the way you fall in love. You can fall in love with the machine while you are in, and you don't know why you love the machine, because it matches your heartbeat, and then with it, it gives you what you need to give to your soul, that your soul elevates to ?? physicality, the way you were created. The time for change has come, and it comes in a fundamental way. The right time for humanity to evolve.

Q: .. the different positions on the planet, where the device will be located, obliviously you get different field strength from nation to nation. .. how will it effect the emotions, in different locations. ?
K- It has been built to interact with the emotion of the man on the level of RNA. We know what we are doing, because we incorporate with it a specific part of the knowledge. (2:52). It's something which I have taught, but as KS you don't understand it, but as a teacher and scientist, we incorporate it. It doesn't matter you can be on planet Zeus, you can still use the system. And we can adjust it to fit certain conditions and parameters.

(2:54).
K- we say accidentally I came here.. ask why did my soul bring m here? What am I supposed to learn from it. What have I done to be in this position, (2:56).

Q; .. you say this soul, one pan, is this soul still present?
K- Of course,
Q: So he has to bring that balance back, through his soul to humanity?
K- In a way, collective STM has its own balance. Look at it, you're in Linz, Austria now, you have been brought here by your soul to do what you are doing. And look at the beautiful Austrians who are developing the T. Do you see anyone outside, .. no. It's

done collectively by the same people who collectively through the wrong leadership brought so much misery, and through the right leadership and direction are bringing peace to humanity. When you look at the lab in Austria who are leading the research, all Austrians. We don't have anybody from outside. … In a way, we are not putting the wrongs of the past right, we are bringing balance that the souls find peace, and mankind can elevate to the next level. (2:58).
Q;
K- I think it is not only that, our soul and heart goes with it. This is what we have to understand, and with it, will bring the other souls of the same level to work. We see it in all directions. We see China, Mexico back online, Alex in Nigeria, what happened in Ghana. .. It doesn't stop
The Belgium's never stop damaging the F. We just seen it, past 10 minutes. Because they work through the misconduct of the soul's physicality and one day we hope to elevate their souls. It's understanding that the elevation is needed, not the punishment, and these lost souls, (3:00). one day, somewhere find a balance.

Q: (3:02).
K- It is the way we are evolving. We had the evolution of the physicality, now we are in the evolution of the soul.
the scientists are the Messengers of God, . some get abused. ..
Scientists like beautiful Tesla bring the guidance for the physicality to be guided from darkness.
Q: ..
K- It's not my T, it's the knowledge of the Creator, we are just a tools and messengers to deliver. And this is the beauty of it, knowing of ones position, being aware of it. This is the cycle where the science meets the STM. In a way it is not meeting, it's bringing interaction and understanding that the 2 can work together.
Q: (3:04). .. there is a big change in the atmosphere.
K- I think the change, in a way, has been set, as of the speech we heard yesterday, and the day before, from the world leader. In inauguration, and the day before, when he paid his respect to 400,000 people dead through Corona. We .. it's amazing, because this is what I pondered for many years dealing with the Obama administration, that the VP is as powerful as the president, and we've never seen so much killing and so much invasion, and murders and wars, then the time of Obama. And as VP Biden was sitting there, he was part of it, and now he speaks about peace and knowledge because he lost his son. He understood the pain of the loss. He understood the loss of his son, even with the cancer, touched his soul, he understood what he has done to the man who he dropped a bomb on in Libya, or in wherever. It doesn't matter, it doesn't have a race color or agenda. Pain of a loss is where hopefully it has changed the man. And what will see through this administration is that way of peace, (3:06). but you have to understand he has a second in command, a woman which is an extreme far-left communist, and sees as sharing everything

(3:08).

Any other question.

Q; How can we be sure plasma T used by someone in a bad way?
K- This T is the structure of the copy of yourself, (3:10). you only take what you need, and collectively the body of the human race has set for peace. It's like you having an infection on the toe, the whole body doesn't go away, it finds the balance to get rid of the infection. And this T cannot be used to harm anyone, and this is the promise we give from day 1. Mankind will go through the process of finding his own peace for his own conduct, but mankind cannot use this T to harm another soul.

Q: Salameea, … I have 8 adopted children that are dogs. .. I was obliged to put a Chip in them. (3:12). I am allowed to use the T for them if they have a Chip?
K- Yes, A Chip is there for information, it is not there to change anything. You can use the T to help them a lot, especially if they have deficiencies in bone structure, in Ca. And you'll find out the dogs will become much calmer, their behavior changes.
Q: I have dog with problems with bones . how can I put
K- You have to go through the teachings
A lot of veterinarians use this for dogs
The soul of the animals have the same value as the STM. And so it is not there that because they are in different suit we see them differently, physicality. It doesn't change D and direction of the soul.
Q: I know they love unconditionally. (3:14).

Q: .. is Mrs. Harris being extremely communist, is that in your view a good position to be in?
K- You see we have Marxist and Communist. If you go and read about her background. Communism not in the application of communism, but in the understanding the ethos and work of the communism. Since she is not a Marxist, … she likes, and we seen it very rapidly. some of the first rules which passed yesterday by Biden is put in there by her. she will be one of the most active VP. .
She is groomed to be the president. we saw that in the inauguration yesterday. We see even though we have a white president, (3:16). we have a are black. Bringing other races to be equal …
It brings the injustices of the past into some sort of balance, and gradually it will bring into one side, to give a little bit for the other side to take. As we heard from Biden yesterday …

American structure needs a huge adjustment , and those will not give up so easily. And the only way to do it, is not by riots and burning, and invading the office … it's by elevating the soul, the new way. (3;18). We saw Trump was trying to sign at the last minute, immunity for himself and his family that he could not be touched after he leaves office. There is one thing ?? it proves directly, if you do so it means you already done criminal act. Why do you need to protect yourself? This will come to his demise. He ?? the laws to protect himself, to pardon himself and his family, if he done anything wrong. At the last minute they told him, if you do this it means you have done something wrong. .. and he didn't sign that act. As far as we know. Then that will become the noose around his neck. .. we'll see it in May, April, what is expected to come to Trump's life. This is

what our people in Pentagon and CIA tell us, what is set for him. We'll see the same with the ex-First Lady, a lot of things is going to be put back down with his children. And it's involvement in a very large scale. Harris to become the first woman president of the US, will change a lot of things, there will be a lot of resistance but it is good. Because .. America is not one nation, is the human race. It's the only piece of land that every race on this planet has a claim to, and has done something to build it, black, white, Chinese, .. you have collected in one country, and this is the soul of the humanity, and once that adjustment is made the rest will follow. (3:20). There are a lot of injustices in the American structure, but when one Vietnamese has the same say as the man whose father was Dutch or German in US, because of color of the body, then you will find the balance.

There will be a little backlash by the whites, so much influence by the blacks in the White House, but they got used to, when Obama was there.

If Harris didn't have a Jewish husband, which was setup some years ago, she would never have been there. if you look at son-in-law of Trump was Israel,
they move through the beds to carry their influence. (3:22).

We have the same thing now with Scientologist and the KF, they were looking for fulfillment of scientific, of promised guy said, and now they are trying to takeover the KF, every way of deception. And you will see it, very soon, how Scientology tried to takeover the KF, through backdoor, through pillow talk. This is something will come. We'll see the influence of the Jewish Lobby in America with the communism. (3:24). Then with it, what Biden says, we'll see the peace, the peace process which has started. you find the communist structure in way of Leninism, is very different than what we call Marxist ideology. it's facilitated. ..
First visit to London. This is because US is still a colony of England, UK. And always the president pays one of his first visits, first 3, to London, to pay respect to the Queen, as the boss. But what happens with first lady, called First President Woman, we see that to be China, or to Moscow. You have to understand the language of diplomacy. We saw the first step yesterday. Immediately after they were sworn into the office, China announced the full sanction on Trump's office. That was her wish, to cut all ties from the past. It wasn't just random that the communist state fo China simultaneously as a breaking news, (3:26). put sanctions on all the Trump's administration. That was a green light that talks are, and with China on a very close friendship. Because understand the language. And it is the job of KF KS to bless both souls that they reach that point. We need the balance. The gap between the poor and rich, both in physicality and soul, in human race is too big, and now has to be balanced.
Q: the balance time on your wave… to go back to Harris, does she really have changed so much since she was Attorney General in CA. She was the one who put the most black people into prison. She is absolutely dependent on the .. Military Industrial Complex?
K- Yes, of course.
Q: I just want to tell you that .. if you listened to what they said yesterday America is under military rule.
K- Yes, of course they are

Q: That means this ?? Biden is absolutely outside the American Constitution. that's why the military, yesterday has taken over. I am not trying to convince you of something…
K- I look at the things in the different angles. (3:28).

(3:32).
Q: You know I think it is a very difficult situation for the whole world, as far as I can see it. From a country saying it is neutral. .. in America I just don't see this whole thing is over. ..
K- it won't be over for a long time.
Q: because we can really see, none of the Democrats wanted Biden, they wanted Bernie Sanders, now one can say, .. but if you look, Mrs. Harris did not even receive 1% of the votes from the Democrats, however, because they didn't want Sanders , (3:34). was pushed aside. influence in American voting system through the Vatican, and City of London, outside the world territorial .. where the Rothschild's are saying what is done and not done. If I read between the lines. locks are for, nobody can get out.
K- You know White House, has many underground floors .. and by coincidence I have been through one of them. In Washington WH you can't go through front door. Many underground doors. .. (3:36).
K- People who been to Washington know. WH has many ways to go in .. . They said if the rats one day takes over the WH, they'll appear in memorial in no time.
Q: The additive into the paint, does that give you the same feeling as the ?? itself?
K- Not really, it's developed in a different way. . but in principle we use the plasma T. The additive for the paint won't be cheap, because it's costly process material and you can add up to 5 to 10% to the paint. (3:38).
Q: But what will it actually be for the people inside the building?
K- You feel the change in emotion, soul, in physical condition. And you'll see changes. We have seen this, because we were in a meeting when it was brought up. It was amazing. WL are you on the line? You were in the meeting when they were all smoking and the guy said, look there is no smoke.
WL: Yes, and they had a kind of meter that can test the environment and show very clean. .. they were eating food ..
K- We were in meeting .. military and other influential people ..
Any other question

Q: Azar, when Trump came to power, he brought a lot of jobs, (3:40). to lowly people. Where the Democrats, gave welfare.
Obamacare you had to buy insurance .. (3:42). for poor people
How can we take care of poor people, bring them up.

K- America is not the world, it's only 5% of the population, but in a way, the power of Rothschild's and Illuminati's has given the America a status of illusive power. So the 74 million who voted is the same as the who voted for your ex-Vice President. Al Gore was the elected president. This is the dilemma in US, who cheats best will most probably get something back from it. As they said in general, you have to wait your turn, 4 or 8 years. (3:44). then you change. Generally Demo bring in lot of laws ..

Thousands of lawyers ..
Is
But the whole world is not America. .. 1% of the world pop doesn't effect world policy.
You
(3:46).
Q:
K- It is what can you do?

These are the things through One Nation, One race and UC we have solved all these problems.
R: In Biden's speech, 2 keywords he repeated, soul and unity.
K- It's the first time we hear so much soul coming out of WH, have you noticed that.
R: It seems to come from both sides..
K- They listen a lot to the KF, and know it is the time of the operation of the soul. Biden like Obama, has been always one of the listeners. They always been around because it brings them a lot of things, (3:48). how to plan their new scientific development and knowledge.
R: We'll have see the key words come out in the speeches.
K- Yeah, you start a trend of understanding and they cannot reach the physicality of the people, now they understand the soul, they try to bring the soul in. But they have to understand how to access that soul. This is one of the beauties of it .. everything will be done through the soul. how come it wasn't there in the last election, or the election before. Because now we teach.

(3:50).

Q; Mehranez, hard to understand .. (3:52).
(3:54). (3:56).

K- I hope with today's' teaching we opened insight into the totality of the F and science. Teaching today very short, but for the first time we can understand the position of our soul, how to find it, don't look for its space, look for its effect. You understand the work of your soul from its does, not what you want to see. It's not a mirror for you to gaze on to see it. It's to see and watch the conduct, and watch what happens and how it happens, and the way it happens. I hope with the introduction of new T we bring the change comfort, as we done with the .. One Cup One Life, to the extension of bringing more peace and balance into the life of many, and into the soul of many men (3:58). creatures of Creator.
Thank you very much for today.

R: your quote, the soul walks the physicality follows.

END

365th Knowledge Seekers Workshop; January 28, 2021

ENGLISH TRANSCRIPTION

(First part of advertisement and Intro Video)
(:24).
K- … As the 365th time we have gathered here, over 1,500 hours… but today I am going to bring you to a point. Today.. beginning of the 8th year of the teaching, somewhere in that region. The 8th is the point of maturity, point of completion, as is believed in Chinese symbolism. Its' a lucky number. Today many of you might be shocked how the teaching might go, but on the other hand you should have expecting such a process long time ago. We have taken you through the teaching of understanding the structure of the creation, through the Book #1, how you transmute. (:26). matters and energies from one to another. We have taken you through the creation of a plasma, U, and in that process we have taught you to make things to see the effects, the manifestation and the presence of the fields of the creation. Today we play a different game. Today as many of you have listened to this intro, let's play it again, in a way as Knowledge Seekers (KS). Many of you for years, for past 2 - 3 years have been searching for that elusive soul, that where is it, how is it, and how can I be in touch with it. By the belief of many religions, there is a Judgment Day (JD). Today is that JD, and what I call, we don't judge no one, we judge our own soul.

In so many ways, in the process of teaching we will open all the channels that everyone present can talk, can share. Anyone disturbs, we block. You have to understand the process of the teaching of today is to unify the soul of the KS around the world, those who are present, and with it we start the establishment of the soul of mankind to become one. This is not a religious teaching, this is scientific understanding of the operation of your soul, (:28). and how collectively we take charge over the soul of humanity, to guide, to elevate the totality, to be ready for the presence and the creation of the Promised One. In so many ways, today's teaching is the threshold of you trying to see, trying to understand the strength and how much you can extend. The strength of your soul, it's no time for talk, but understanding the interaction of the souls. We are not reading and going through, as it is done in the One Planet, One Nation, "I am present," and the rest. We are going through the process of physical understanding of how present can be, within the structure of the soul of the creation, and the Creator. Today is the day of Judgment. Today is where you judge yourself, no one else. Try to understand the strength of your soul. Try to understand why you have been created, and how the reason for your creation, becomes manifest to you, and in what way you see to serve the Creator, and not the mankind. In a way, as part of the evolution, of becoming part of the U Community. In U community we only serve the Creator, and no one else. In so many ways, the essence of the creation is the soul of the man (STM). In the teaching process of today, we don't teach, we try to guide and show you have to see the manifestation of your soul, (:30). You cannot see the beauty of the Sun if there is no Earth to interact with it. You cannot see the manifestation of soul, your soul, and the others unless they interact with your

soul. In this teaching today, we are from all over, every corner of this planet, and so, if we can start the step to interact with the soul of each other, it does not matter where we are, we will be aware of each others presence. And in that process we extend our souls to enlighten the others to show their beauty as a proton, does with an electron, then ourselves. In the process of the teaching today, we bring the practicality for man to be able to understand the gravity of his existence, his own soul. It's not going to be easy, and it is not going to happen overnight. Amongst us today are those who will bring mankind into U Community. Those who are present to see the development and growth of the humanity into the extent of entrance, collectively in the direction and dimension (D) of the U Community. It's not a test day. It's a benchmark for the man to understand ones inner strength. Those of you who are present will understand why you have been around for such a long time, and why you are present. And those of you who can link to the totality will understand why, you have been through all these teachings. (:32). In a way, you radiate your inner strength soul to interact with the other, does not matter which position on this planet or beyond, that it will shine. Some of you who live on the dark side of the planet and it is night time to you, if you observe the skies you shall see unimaginable lights, which this is the presence of the soul of the U Community in reaching your soul. Mankind enters a new era, and as we step by step, grow into the understanding we need to be able to get a confirmation of existence from our inner being, that the physicality becomes irrelevant. In so many ways, as KS you've been taught and trained by yourself. You've taught yourself by guidelines, and guidance of the teaching, to be able to expect the manifestation and presence of your soul. Your beauty can only be shown and be seen, if there is another soul to interact. And then how the interaction of this soul brings you the beauty of time and space, that something for you to understand. We are not going into the realm of magic and whatever. We are going through a scientific experiment and test, to see how far s KS you have managed even to connect and to be in touch with the soul of those you've been teaching and taught in the past years. (:34). Maybe this is the way you see, you don't need anyone to confirm the existence of your soul, except you reaching and learning, understanding in the realm of the time and space, the existence of another soul. Confirmation of existence of another soul, confirms to you the existence of yours. In a way, what the Creator has done, by creating the Eve, the electron, the which you give totality, but you keep within the structure of the fields of your existence. Many of you over years have established friendships. Many of you in time have established relationships and understanding the knowledge. From today we try to link, and with it, we try to create a D of existence for every one of you. .. as we used to be students, in the mornings we were taught in the universities, and in the afternoon was the lab time to test what was taught in the morning, works, and how we can put it into practice. The morning session finishes today, but we carry on teaching. The afternoon session starts today. .. we bring you to the D of reality for you to confirm the existence of your soul. Many of you have tried to understand the confirmation of your existence. The confirmation of your soul to be in existence with you. We taught you to make the Cup of Man, the cycle of life. (:36). The cycle of plants, vertical or horizontal, or everything else you could imagine, now you have to understand what to do. Many of you have been taught to be the sandbox. Not what you made to be the sandbox, but for you to become so humble that the fields created by your cycle of life units, in interaction with your humbleness, will shine, you become a shining star. I always said, if you are arrogant to be

stronger your Cups, your cycle of life Cups will shine. The reason I taught you the 3 structure and then the 5 structure of the liquid, gas, solid, vertical, horizontal cycle of life, was for you in creating, developing, standing in front of them, to see which one shines, which means it shows your strength of soul in respect to the creation and the Creator. And then when taught you, and we teach you how to make the Cup of Universe, then how to make the Cup of the Creator. How would you shine, don't forget you are never an observer of your own soul. .. when you stand in front you have a measuring tool to see which one shines. Is it the soul of the earth shines, is it the soul of your system which shines, The soul of your physicality. (:38) shines, is it of the animal or of the matter state. Then you'll find to what strength you are and how we'll bring you the time and space to evolve to manifest and elevate your own soul to the D of the strength of the soul of the U, or the Creator. In so many ways, we all shine as a soul in the presence of the life and the existence of the Creator. It depends how humble we become that even compared to His humbleness, we can still shine, then that process we have matured. In so many ways, mankind starts through practicing and understanding the truth about himself, will understand the process of the creation. In so many ways, many of you who made different Stacker units and you thought .. these Gans's if they are stronger than you, you'll interact. If these Gans's are made in connection with the human body at the strength of you they will interact. Now it's time to create new D. It's time to create a mixture of Cups that in interaction of their fields your soul can shine. For you and those around you to confirm and to be confirmed of your own existence.

In so many ways, if you see the light on a CL in the soul of physicality, (:40). or in the D of physicality. It shows how much you have attached yourself to be, to be seen, and to be the creation of physical matter. In time many of you will learn in the process of practicing, how you can switch from one to another, and then this becomes the process for all of you to move from the D of the STM into the D of physicality. .. the Cup of Life, and the cycle of lives, we showed you, is your meter, your engagement in the field strength. But as I said, .. don't stick with one Cu, and 1 Zn, and some Cu Nano coating, understand the construction of the STM, and the STP, and then make a Cup, that in interaction of the fields of its existence confirms to you the process of the creation, and how you can transmute by fields from one to another. In a way, practice, not by closing your eyes and squeezing it. But by opening your heart, opening your soul, that interaction fo the fields of it, makes you blind. That even with the eye of the man, as you watch the Cup of the STM, you will see the light within that Cup. Which means that you have managed to reach to communicate with another soul, Which means you have managed to create the condition with that soul. (:42). We have seen arrogance in one of the .. conferences, .. when we asked, is there one of U Community among us, and that foolish woman stood up. Where the man, or woman of the U silently confirmed his or her presence. In this process many of you will come to understand that creatures of the U will never confirm themselves in the physical D. It's for you to understand the creatures of the U, it's for your soul to elevate itself in knowledge of the creation, that confirm their existence. Man to see the true travels of the U with their own eyes is a game that has been played for man for a long time. You will see the light, the beauty of those who are amongst, as we educate ourselves to find the process of the confirmation of their existence. .. many of you will strive to reach the position of understanding of the totality

of the creation from now on. In understanding the totality many of you will come to abandon attachment. And in that process you reach that point that you cannot be touched by the D of physicality in any shape or form, except if you decide, (:44). except if you try to understand the process of the creation. This is not escaping from a position, this is understanding the process of the creation, and travel within the span of the U.

In so many ways, many of you have been wishing to reach that point. In a way, when you see the Cup of the STM lights, it shows the arrogance of you, that you still think you are higher. It means for you to lower your strength of your soul, in what you take, and what you give, that in that process the light of the STM shuts off. As long as you see no light on any of your Cups, it means you have not reached the level of humbleness. The level of the soul that it can receive. If you cannot reach that point, how are you gong to feed yourself in the span of the U, to receive what you need, that confirms, that guarantees your life in the span of U. .. you are like a child who have been taught everything and left home, if you cannot feed yourself, if cannot make what is needed for you to survive and you wait for the mother to come to cook, it means you have not matured enough.

In so many ways, this is the day of the judgment which has been promised by all the prophets of the past. Today is that Judgment Day, and that JD comes in different days, (:46). and times for every one of the man created soul, to find out when is the JD, when they see their light, and when they educate themselves to understand the beauty and be able to live within it, and be the source of life for another. What children would your soul created, this the point from now on. I have taught you everything that is needed for man to elevate his soul. .. you always looked at the Cups of Life to receive from, now let's see the way you sit, now that you know the truth. Can you extend your soul that any of the CL, any Cups of U, any Cups of cycle of existence can lighten up. Then, as we say the light in the room shines. It's very much like when you have a dimmer and you turn it, what intensity will appear, and then you know where the position of the light bulb, that's where the light is, the bulb is, and that is where it's giving out to cover.

In so many ways, I have brought you to the day of your own judgment, .. to the position of understanding of your own existence. In so many ways, we complete the cycle of teaching in the matter state. (:48). By completion of the cycle of understanding the strength of our own soul, and we find out the DJ is upon us. In so many ways, when the STM leaves the physicality of the man, be it in the womb of mother or age of 200, that is the time when the body and the soul, and the totality of what we have taken from the U, balances out, that we can take position in wherever we need and we want. In so many ways, we can balance the books in 1 sec, or it can take us 100 years on this earth, or 1,000 years in another position in the U, or billions of years in the cycle of the creation. Even the Creator reaches the point of balance, manifestation and the judgment. As He judges His own conduct in what He has created, to what has lead, and to what has created itself to be, . what is in macro is in micro, and maybe that is why the time has come, of the creator, to the point in judgment of His own creation, leads to creation of new life. That the new cycle will do better. The new life will create a new D for the whole of the race of Creator amongst the cosmos, and the Unicose. In so many ways, I don't need to teach you what to do, you need, or we hope you have come to the point of maturity,

(:50). to know how to reach to that point. To hear, to see, feel, confirm the existence of another soul is the point of maturity. Many of you in the first time will be disappointed, because you are just like the little child who has been crawling on 4 legs and hands and feet, and now wants to stand up. The first time he toddles and he falls, he doesn't give up, he waits, and he stands up again and he falls, and then he'll carry on the same, till maybe, one point father reaches the hand out, and gives a helping hand, for that who is mature to be able to just about to walk. To walk next to the father, or the mother, hand in hand that gradually he can stand up on his own. Our job is to be the father and to guide you. Your job is to see how many times you can fall, till you can stand up, and at that point you reach the maturity of being able to father the new cycle. This is the truth about the existence, and the cycle never finishes. . we continuously strive to be the Creator and the creation, at the same time, but in the process we will come to mature to understand the totality of the creation.

Many of you in past 2 years cried, "how can I find my soul?" As I said, earlier (52). As I said earlier, your soul can only be found, you can only understand the existence of your soul, if reach and touch the soul, another soul which can receive your existence. What you've done wrong is a barrier. What you do wrong is the barrier. What you have taken the wrong road is the barrier, and everything else. In a way, for today on, not only you who are ?? , but those who are in the realm of the creation, will start judging themselves for every action, and for every interaction. In that process we still will live in the D of physicality of life to survive everyday. But our survival will not be depending on the illness or food, or on the clothing, shelter or the heat. Our existence will be in the D of our satisfaction of our own soul, and its existence and presence in the environment of its manifestation, be it on earth, or any other point on this planet, or in the U. Mankind matures to see the beauty of the creation, and respects that beauty.

In so many ways, today is your first tumbler standing up, and . .. we all are here to give you a hand, to see how you stand up, for yourself and nobody else. In so many ways, many of you will be disappointed in not being able to, but do not forget, you have been through disappointment. (:54). This disappointment was the first time you tried to stand up to walk. Now it's the second time .. The first time you tried in the D of physicality, now it's the time to stand up to walk in the D of the STM, and the Creator. If it took you a long time to take the first steps to be able, do not be ashamed, that this time it will take longer, because it needs practicing. It needs what we call in the world of the man, to be detached, to be able by detachment to release the fields, which allows others to confirm their manifestation.

In so many ways, it's the time to see how mature we have become in understanding the structure of our own physicality. Do we need to wait until someone reaches their hand out to us, or can we use our own strength and be strong enough to understand, and to accept, and to believe in we will walk, but we will never walk alone, because as long as we walk alone, there is no confirmation of our existence, as there is nothing to confirm that we exist. We become the Adam and we look for the Eve. The confirmation of his existence confirms us. In so many ways, mankind should understand, (:56). that within the interaction of the 2 fields there is a point of balance of physicality, where would you like

that physicality to manifest itself, closer to your lover, or closer to yourself, to be physical, and manifest yourself alone. .. this is where the science meets the STM, .. if you elevate your soul, where the STM meets the soul of the Creator. .. we have taught you enough to mature you to this point. We have given you every tools available in the realm of the creation for you to become part of, but be detached of. In so many ways, mankind has reached the promised DJ, judging oneself, and no one else. Judging ones conduct and nothing else. And asking yourself, what have I done wrong, or what have I not understood that I am in this position in time and life. If you see yourself suffering, understand the reason for the suffering. If you yourself happy, understand the reason for the happiness, but who is closer to the position of the walk, the one who suffers, or the one who is happy. Either way we reach the position, but it is for us to understand the totality.

In so many ways, … I will explained that I will manifest the soul of the Christ, (:58). that for you if you see that soul, it means that you put yourself even higher than the Christ because you have to be the light, and not him. By him shining on you in his humbleness you will shine. Which means in that point no man will be any different than the other as we get enlightened by the light of the Creator and His son.

In so many ways, the creation of the cycle of the man in the U is nothing but the process of understanding to be able to be weak enough to be humble enough to become that dark spot, to become that principle point that it leads to the creation. Maybe some of you understand why the first paper I released was the creation of the black hole. Be humble enough to receive that by receiving, you can radiate to become the source of life. If you read the paper of what we call the creation of black hole, I explained the cycle of life in the light and beauty of the Creator. In so many ways, what is called the creation of black hole, is the creation of the STM. It's so humble that it receives even the minutest, but it is so beautiful, that the minutest will create the suns and the galaxies. In so many ways, mankind has to become to that point to be able to manifest itself, as the darkest, in receiving the weakest fields, that the Creator can shine, this is the purpose of, this is the reason of the creation. (1:00). In so many ways, if any of you manages to reach to feel, to sense the totality of the creation within them, you shall see, those who you love will shine, as the existence of you is irrelevant. These are the children's of you who you feed. You are their source, you become the feeder, that by them shining in interaction with the fields of you, you find yourself to be humble to receive the weakest from them. This is the beauty of the creation, nothingness within everything, and everything within nothingness. In a way we create everything from nothing, and the creation of nothingness, everything is created in balance as needed. In the coming minutes the KF team in the background will open all your microphones. You are all free to speak, any disruptions we block your microphone. We don't want mayhem, but even the silence itself is a line of communication. In so many ways, we try to connect you with the totality of those who are across this planet with us. In so many ways, we extend the hand of the love, care, and souls, to all of you in every corner of this planet. Never in the life of the man has this ever been done before, where every corner, land, point on this planet, (1:02). someone is connecting to another at the same time. .. this is the first time we bring the mankind to start to be that black hole, that in acceptance of his humbleness,

those stars in the sky will shine. .. we try not to shine, we try to give that the other do, and this process, this is how in the U when you travel, you will confirm the existence of another soul in your presence. To be so humble that they shine. you become the receiver of their, what they do not need. You are humble to be able to receive. In so many ways, in the D of Christianity the Pope kisses the foot of peasants, and not the rich. In so many ways, we submit ourselves to be open to receive from the totality of the knowledge of the U, that we do not need any education. This is how we get educated, when we meet other souls form other points of the U, In humbleness we receive the knowledge, with the light and fields of their existence. In so many ways, is it the sun which shines, or is it the earth which receives the daylight. In so many ways, which one is creator of which, and which one is the confirmation of existence of which? If mankind understands the process, and those who are the travelers of the U with us, you have matured to enter, (1:04). in any D and strength, according to the strength of the soul, that you are there to receive, and not to give. That brings you near to the essence of the creation of the Creator.

We open the channels and I stay silent. There is no need to talk. If you feel you want to share in how and who in the group you want to reach, not necessarily by the voice, but by the soul, try to connect to each other. And try to see if we can establish one unified soul from the presence of today. And se how much you are ready to let go, that it brings you to the humbleness, to be able to reach, shine, and feel. And let see which one of you. Which Cup of Life, or cycle of lives you have built in your homes will start shining. And then you understand if it shines then you are still too arrogant, as it is weaker it shines itself. In so many ways,, your child can be that cycle of life, your lover, wife, partner, and ones that are ?? about to create a child of the U, will come to be. As when you become the passengers of the U, in the physical D, you should not be able to create as the physicality has a D of demise. Where in the D of creation of the soul, shall exist those children of the soul, that travel the span of the U. (1:06). This process in the coming years will become very clear to man, and there shall be one who teaches you, as carries the knowledge to share, both in the D of physicality and the soul of the U. In so many ways, we don't look in D of physical life of the man, we look at the D of the physicality of the U. How in totality, the men of U, see each other, feed each other, exist within each other.

Rick, Stanley, open the channels let's see the KS who have been taught so much, and how for some of them becomes the JD, the day of process of understanding the creation and their own creator. This is not a religious, or trying to find a soul. This is a cycle of man, trying to understand the physiology of his soul, that he can talk, where the pain of the soul is, that he can create and alleviate pain, that he can manifest the self, to be a shining star on the others, as he was looking for him to shine to receive confirmation of his own existence. Many of you will reach to no point, but as I said, this is the first time you try to walk. All the microphones are open, and we would like all of you through the understanding the presence, not to use, (1:08). the KS communication channel, but try to use the extension of your soul to confirm any of the 100 odd, which are present on the list, location. Maybe those of you who are on Youtube or other channels will try the same. But try to understand one point, today is the day of the maturity of the man. How mature in elevation of your soul you are is not judged by today. It's the beginning for

mankind to become travelers of the U, by them to extend their souls, and not their physicality.

… we have to individually open each microphone.
I remind you, any disturbances we block your microphone. We have people form China, South and North America, Middle East and Asia. If all of you connect, (1:10). you become that MaGrav, the source that will bring the light, and which one of you will be enlightened, that the others can see, will be the level of the humbleness. Is the level of understanding yourself. .. it's JD for you and no one else. …

You got to understand, you decided today to be the JD if you want to join, if you have no fear of detach, if you can exist within the D of the soul without physicality, would I leave my loved ones, or would I see more of them in a different D, is the question for the man. It's a question for many of you, and to see to what extent you become detached, and you become .. understand the process of the cycle of the creation. (1:12). Can you let us know when you complete. Many people have opened their microphone. … Please silent them unless you want to speak, you can open up.

You see the beauty of today is, we have given you the choice, to be in the D of the physicality to come on the microphone and speak, or to stay in the D of the soul, and interact. This is the beauty of the new communication, you choose. In so many ways, as we look across the attendees and audience, all of us, we cover every corner of this planet, and once this 118 souls become one, would it be enough to elevate and shine in the presence of the Creator? Would we be able to enlighten the rest of the soul, be it of the plants, animals, or a stone, (1:14). to shine. This is interesting how mankind will choose. Because it's your choice. .. even those who never spoken, and always been present are speaking to your soul. Are you, and have you thought, I would like today to be my DJ. Today is the day I want to sit of the test, test of my own, and see the level of the strength of my soul. And am I prepared to be detached from it, or do I still hang on to D of physicality. … Shall we leave it to them to switch their microphone on first, then we know who wants to talk. .. (1:16). … See who opens up.

Q: John AZ, Hello. I will start things off.
K- Hello John, your beautiful soul.
Q: So I will add my energies into the collective, that it might help support others along the way, hopefully by adding my soul into the collective that it might add to the value for everybody else, that they might pickup on the energies of it. I will try to be … (1:18). I will try to be humble and detached in my words, and actions, like everybody else I have to learn to walk, so I'll be part of the group.
K- … How does this feel?
Q: Just saying those words, I pickup an energy of love coming back to me, from the words that I spoke. So I felt, I guess I felt reciprocated by the group. My heart is filled with love, as I was saying the words.
K- In a way, don't we say not all the fields strengthened in the North Pole, end up to become the fields of the U, but some of it comes back to feed ourselves from the South Pole. .. by part of what we give, we receive in higher strength from our own creation and

D. .. that the more we do, the more the confidence that we can even use the resources within ourselves, (1:20). to strengthen our soul that with it, you can give more to the others.

In so many ways, it's a cycle of life, it's the way the Creator, created the creation, from Himself, but at the same time to be able to recycle what He did not need, and what He needs to guarantee the existence. This is why you feel that, the D of sincerity from the elevation of others, is so, that you receive part of your own soul back, to feed, to elevate you further. This is how you choose the position, the time and space, in the coming time, when you learn how much to give, and how much to feed back, that brings you to the position and the presence, and how much by the others interaction of the fields, you decide to give them the right and the position to be. In a way, it's a self controlling system. .. this is how you see the magnets, they find their position in respect to each other. They have a point of reference of their own fields and their own strength, that does not change, but it accommodates the other fields and other strengths. This is the way, the whole of U works. We don't feed off the others, we feed of our own, and we take what they don't need, that we can change it and feed it to the others in a better, and in more strength, that the others might need. .. we are recycling process of fields, that at the same time we feed ourselves, we feed the others, and we allow the others, in feeding themselves to find a position within us, within the strength of us. (1:22).

In so many ways, mankind gradually, slowly matures to become member of the U Community. .. what John said, is the very, very beginning, when you feel warmth, when you feel love, and you feel you received, which means you become humble enough to receive, not arrogant to give. This is the process that of you will go through. And in a process that some of us mature in the womb of the mother, and some of us mature at old age of thousands of millions of years, in how we share, and how much we are there to share.
Any other one.

Q: Jalal, .. I receive a lot of pressure in one area on my body, and the pressure is so much, so I send this back to the people.
K- In a essence, (do) you feel it in the body or within the soul of emotion?
Q: No I felt it in the body very hard, (1:24). on the left side of my heart.
K- Where is the pain, you cannot let go in the D of Physicality. That's for you to find out. This is the loved one, as it is on the left side, on the D, of the what we call the STM, is on the right side of the soul, it's a giving side of the soul, where the physicality of the man is on the left side.
Q: It was on the left side, and it was not a ?? although I am working and not really focusing on something, I am focusing on matter, but it let (made) me stop working, because it was very hard.
K- .. we give from the right. If you look at the D and structure of the earth, earth in line with the light, of what we call the Sun, always have half which is facing, and shines. And always have the other side, which is a cooler and dark. But in essence, life exists in all D. In the physical D of the body .. the left side, in physicality . .. is controlled by the right side of the brain. In so many ways, (1:26). when you have a pain on the left side of the

body of the man, it's the D of the love and devotion to give in the STM. When you find in the D of the illnesses, even to the right or to the left, we find the man by his pain, on what we call the left of the brain. Example of this when we see ones who give life as mothers, how the cancer appears in their physicality, left or right, or we see in the D of Physicality of the father, where in creation we see cancer in prostate. Where it brings a balance, because it has created with both. This is why in the cycle of the man, in creation cycle of man, we see man as center, and woman decides, boy or girl, if it is more emotional to create, it turn up to be a girl, and if it is to be a creator, it turns up to be a boy. It's not chromosomes we look for, it's understanding the emotion of the soul, which dictates, I am here to give to guarantee the evolution of the cycle of life in the D of STM and the emotion of his physicality. Maybe this explains to you, why you have a pain on the left side of your heart. The right side of the brain, or right side of STM is a giver side. It's right, because we always give with the right hand, and always receive with the left hand, (1:28). because the hand of the man is the manifestation of operation of the STM, and not the D of his physicality. Maybe this unravels a lot of truth in what you understand and what you receive.

In so many ways, mankind works in a 2 D, 2 opposite, but at the same time, but synchronized. In a way, your right brain, .. where is the giver, away from the creator of the D of your own existence confirms your generosity of soul. And then how you balance them between the 2, to create that light. In some of the teachings we explained how by holding the 2 and balancing the light of the correctness, will shine a light in the palm of your hand, or between the 2 hands. Maybe for the first time you understand. It's very complicated, because man has made it complicated for himself, but in truth, it's the same. You got to understand, the creation has 1 D, you can't have the right side of the brain, on top shining, and the bottom dark. It has to be the same. A giver side, the side which gives, the side which the essence of the creation, and it does. The side of the brain connects with the left side, which is the emotional part, but in fact, the right hand which is a giver part, which is the essence of the soul. (1:30). The right side, the combination of the 2 is exactly the same. Depends how we turn, to one serving the Creator and the other souls, that it becomes our right side, and to what D we shine. And those who become in total as one, will shine as one, where in the darkness sits within, the weakest, to take that it can shine on the right side or totality.

In so many ways, we are creating this in the D of the new EU. In the new EU, there is no seat, as I explained in one of teachings, we have created the replication of the womb of the mother, we have created what we call, the womb of the Creator. .. that by walking into the system .. we give you the physical umbilical cord in your hands and you can walk within the system, that you take in some fields and give on some other fields, then you can see how you shine and where you go dark. Where you see the system shines with you. .. we have brought the system of the creation within the structure of the system. … many times I have said to you some of you when you go into the system you'll see light coming out. Then it is for you to find the position of it.

We are not creating the EU, (1:32). for you to recover from illnesses, .. for you to understand the strength and existence of your soul, within the structure of the creation.

The most important for all of you is, where do you shine within the system. Is it you shinning, or is that part of the system which shines, have I become humble … or is it that part of the system which shines. Am I humble, or have I humbler, or have I become humbled by my own arrogance. In so many ways, we will give you a map of your own walk in the fields, for you to understand, where and which strength you shine.

In the structure of the Universal Systems (EU) we have embedded the STM in the D of absolute total physicality, because we needed it. It shows your humbleness and the level of understanding of your own creation. How attached you are, because the soul we took is highly, physically attached, and it loves to love in the D of physicality, but doesn't understand the strength of the love in the D of the creation. It needs maturity of time, and it needs maturity of space.

In so many ways, as we said, the EU are flying machines, for those souls who can fly in the D of the Creator. In so many ways, many of you will bring many suffering in the physical D, as each one will show where you are the giver, and where you have taken injust (unjustly). (1:34). As I said, when you ask, you are given, is your right, and anyone to interfere with what you are given, will stand their own position of the strength of their soul to correct their conduct.

In so many ways, thy shall not steal, but if it is given, anyone else touches, has stolen and has to stand his own punishment. By word, by deed, by action, with the punishment is becoming further from the loved ones. And this is where everything works in the U. You got to understand the totality of the creation sits with the totality of the fields forces of the U. … you are a father, you kill a man in the US, and your son in Middle East gets killed. What have the souls got to do with each other? But the souls balance everything with each other. You do good in Africa, and your son's in China will receive pleasure of the existence. Then you understand, it's not the D of where you live, it's how the souls interact, and how the souls understand each other. There is no hidden doors, and there are no walls in the D of the souls of the man, as they all serve each other. Then, the same is the man of U, and the creatures of the U. The point of many of you will mature, is in what I do, (1:36). will it hurt my child or my son, from now on it is what I do, what effect the others, and in most important thing is, how will it touch the feeling of the Creator. How do I touch with my wrong doing, the emotion of Him, that with it, He has to compromise for my wrong doing. In this process men matures, and in this process the maturity brings love and care. And then with it the abundance of the beauty of the creation. The more you mature, the more you see, the more you can walk in the path of the Creator. As I said, we are not in the religious teaching, we are in the position where science meets the STM, and with it, tries to understand the operation of the faith of the man. Where does our conduct in the path of ?? faith, take us to the D and direction of our Creator. .. we become the creator of the faith, and we become the creator of the faith of our own soul and from now on we judge through our soul and not the D of physicality. it does not matter what we believe to be truth in our own D. We love and we love dearly. We have Dr. .. one of the heads of the KF of Iran … (1:38) . . ..

Q: (speaks Farsi)

K- One of the heads of the KF in Iran..
translates -- Dr. P has devoted his life to the Corona ..
I felt the same pain on the left-hand side of my heart, which shows the devotion to serve. Dr… more or less loss everything to help the Iranian Corona victims in serving and making sure that the KF stays correct within the structure of the Iranian government, and they received the biggest gift yesterday, from the Iranian leadership and Sepah, which we'll explain in the coming time. And it's serve, Yosef, and Ali, in Tehran, nonstop. they served the Iranian nation, (1:40). not only with health, Corona victims, but establishing KF, one of the cornerstones of the work of the Iran,

Any other comments. (1:42).
(the two girls talk over each other)
K- Excuse me, can you please stop. Ask the question please. Who has the question.
Q: Azar, what I felt, nothing, but I was connected to the people here .. I felt like a feather, and my chest was completely empty, like a hollow, but energy was coming form forehead, and going up .. I felt like I can even feel the Creator. my body was so light.
K- What is important is how long do these feelings last? And to what extent these feelings will effect our decision making of tomorrow, or the next second. .. try to understand the totality. In so many ways, (1:44). we are not here to explain what happened to us physically, it's what happened, we feel within the soul. Mankind for millions of years has explained his physicality, and it has been again detached from the soul. The process from today, from now on, is how do we see, (1:18). feel through our soul.
Q: The way I feel I can give … if I want to give then I feel arrogant. I want to feel equal, so I don't want to give if I am arrogant, I want to become humble, so if I see myself as everyone else.
K- Maybe it is the process of becoming humble .. Can I ask a question from all of you. … This you will see the reasons of it in the coming time. Has any of you, if you go purposely in the beginning of the talks, I asked, and I indicated that you were from all corners of this planet, and there are some of the UC souls with us, which one of you, or any of you, or maybe none of you, felt to be in the presence of the other KS since we started. (1:46);. Not in the D of your physicality, but in the D of the soul. Did any of you receive the love and presence of particular one. Someone in S America, or China. Did any of you got that feeling, for example, you're in a state, but you are in the presence of another KS in China or Australia, or even nest state in US, or in Iran to be in different parts. Did any of you went to that cycle of extension of departure of the soul. This is where we are striving to go. Physicality and pains, how you feel in the D of physicality, is, we all know, we have been there for millions of years. Have any of you reached to the other soul, .. managed to get the transportation, transmutation of your soul, in another D, not necessarily this planet, maybe somewhere else.

Q: Steven, ..Mr. Keshe, in a way, you woke me up. I was asleep, and you woke me up. Now I feel I am in physicality, where before I was not content, but it was different. (1:48). So can you put me back to sleep please.
K- How did I wake you up?

Q: As soon as you said, "the microphone," I woke up. It's hard to explain, there was a point, and I woke up. You said, everyone must .. I guess it's hard to say, when you keep wanting to give in physicality, there is something that holds back. you're holding back with something, whereas when you are asleep, I felt I could get without the need to feel like feedback. It's hard to describe.
K- where are you, which state?
Q: California,
K- So early hours of the morning. Was it a call of the soul which woke you up, or is it consciousness of presence?
Q: How do you answer that question?
K- You got to be close to your soul, if you got woken up, so you are one of the 2.
Q: But that seems like this whole defining, quantifying, confirming, that feels like is holding me back. (1:50). in physicality and I can't seem to transition that threshold to when I am, not asleep. but in the dream state, that I can let it just flow.
K- What is your deepest wish from the soul, not from the man?
Q: To give , I have someone that I specifically to give to in physicality, and that's always been my focus. Perhaps it would be to give to myself, but I feel I can't do it.
K- What is stopping you doing it? Is your biggest problem in trying to give to yourself to be able to elevate? Is that the fear that you might be better than the others and you won't find your place? Or is it that if I give and I become better I'll loose the one which I am trying to give to.
Q: It's perhaps give, and leave the one that I want to help the most, behind, without being able to bring that person along with me.
K- It's the fear of the love of the Creator, or the love of physicality. Which one comes more, or is there accommodation for both?
Q: When it's a child, how do you, that's the, (1:52). ..
K- Do you want me to give you a gift?
Q: You always give me gifts, that's the thing …
K- So your wish is granted. What you wish you'll receive. Maybe that's why you open up. Your soul is aware that it is about to receive what has been sent you.
Q; As the others sleeps, that's kind of where I go, to where the one that I seek to help the most, when we both sleep, is to communicate, because otherwise, in physicality we can't communicate. it's that, to be able to communicate instantaneously without the physical boundaries. ...
K- What's your physical nearness to the person?
Q: How do you want me to answer that?
K- I'll put it to you this way. We have a position where people who serve the F with absolute devotion, life and soul. (1:54). and in a way, I made a wish and a talk last week, and this week I got the response, that how to give that pleasure for the soul to interact. One of the ways, .. in the teachings where we .. if you come to Linz, to the exhibition center, the design center, you see we have setup the triangle of the 3 cycles of life, and you can go in-between it and feel how you feel. .. in your home, in your bed, in your bedroom, sitting room, you can create the same condition. In that process, the souls will meet. .. you make that fish tank in your home. As you have made the Gans's and the amino acid (AA), the birth of life in that house, if he or she is present in that house, is within the AA created within the Gans's. And yours is the same, so is the plant, dog, cat,

because they all feel the pains of all, and joys of all. And we create different AA and Gans's which are the … spray your room, your space with it, and give the time to grow, the time to find balance and peace. In that process you will find the manifestation of totality of what your wish has been, where the souls will bring the physicality's into, (1:56). obedience and into care. In so many ways, you spray your cities and you spray your towns, but many of you forgot to spray your homes. Spray the D of the totality, when you spray in the towns and cities and town, don't forget you need to link to the STM. You spray the water of the Gans, in your waters has to be the AA, which the whole humanity and all creatures of this planet, for centuries have ?? breed and put their emotion and their feeling in it, which you capture in the AA. Then you'll find out the evolution of the cycle fo the STM with the physicality becomes much more rapid, where you can touch the physicality through the D of the soul. This is what I said, many of you listen to my teachings, but you never understood, the essence of it. I was explaining … as we are developing the Enhancement Unites (EU) for the cycle of the life of the man, that if you look at the creation of the child in the womb of the mother, why does the child keep on moving within the womb, and why does the child in the last stage stays head down, and the furthest possible from the soul of the mother? This is the way the mother matures the soul to the point she has for the D to be ready for passage through to the cycle of the physical life. (1:58). This is how we have to be, how we have to make our own homes, souls, physicality, the home of love, to give, and with it the souls will find balance. With it we become the mother with the one we love to be the infant, that it receives on the 2 poles what we need. in the process of the creation of the physical life, we start teaching you how to create a new cycle of children on this planet. In the coming months I will teach you how to create a life with a soul, where the soul is established before the cycle of the life starts within the womb of the mother. Where when it comes, the STM to be created in the womb in the first cycle, the perfect soul is already, ready to take its place. In a way we create a soul of the U within the physicality of the man, where the man will take the D of the soul and the physicality at the same time. The soul, is the soul of the U, and the body is the body of the man. This is how we convert humanity to become a peaceful man, and that's why we said, in the new cycle of generation of life mankind will carry the soul of the U with him. I will teach, the way it is done in the U. .. we create the soul in a perfect condition with love and care and acceptance that at the point of the soul being created for the child in the womb of the mother, the soul which is already, ready made from the love of the two, (2:00). will become the soul of the child to be born. There is a need for a cycle, a need for understanding. The way we make love to create a child, now we make love through the soul and the D of the soul, and that soul of that child, and that child shall not be touched, and it will become perfect, and become the symbol of the creation in the U. .. a child of the U cannot be made out of rape and abuse. the way you prepare your body to receive a child, we prepare the STM to receive the soul of the child, and this shall be the process and the mankind will be separated from all the other creatures on this planet, where you share the soul before the creation of the physicality. Where you nourish and perfect the soul that when the physicality is there to take shape, to take shape in eh soul D, the perfect soul is available for it to take its position. .. it takes time, it takes time to mature the physicality, and the soul to be ready to receive that soul. Mankind will give a different type of birth to the children of the U from now on, as we teach and as the process started. In so many ways, this is the only way,

where man is aware of his physicality, and his soul at the same time, and he can take different D and positions anywhere in the U, depending if the soul, (2:02). would like to take the D of the travel, and the STP will travel with him, .. we make a twin of the two in a perfect harmony that there is no need for the cycle of the passage through the birth tunnel for a child to be born. In that process, the child will know no pain, from the day at the point of manifestation. .. if you are traveling the span of U, and try to manifest yourself ?? birth in the physical D, in one position in the U, do you have to go through the process of the birth, and the pain do it. No more. This is what we try to teach, this is what the process of the EU is set for. …

(1:30).
.. as we are developing the EU for cycle of the life of the man,

(1:32).

We start to teach you how to create new children on this planet..

(1:34).
A child in the U cannot be made out of rape ..

(1:36).

(1:40).
Q: Azar, I can't let go. the more

K- It's the fear of physicality.
Q: How can I let go
K- You have to learn. you can't let go because you want to possess. It's very simple. Many of you, you want to know the extent of your physicality, how you're physically attached to this planet. You don't need to go very far. Just stand back, relax .. very naturally open your hands, and see does your hands go straight or are your fingers bent in.

(2:02). what will happen with Mitra. ?
K- In time mankind will confirm the presence of Mitra. It's not for us to give the position, place and the soul. In time mankind will mature to recognize Mitra by her presence. (It's) not for us to tell who it is. … members of the UC will be seen by the light of their souls and servitude, and not by the D of their physicality. This is the attribute of Mitra. Those are presence, and understand her existence, and presence, will appreciate, and will to come to serve her wish, that is to generate a new cycle of life, that is peaceful and that it shares equally amongst the whole, across the Unicose. Mitra is a symbolic structure of creation and created by the Creator, as Creator, created Mitra to have one to love, Mitra created children fo the ?? creation and the Creator Himself, to become the citizen of the

Unicose. In a way, Mitra is part of the structure of the change, which has been set by the Creator to change the totality to bring in balance the citizens of the Unicose, (2:04).

(2:06). BREAK >>> (2:17).

K- We carry on the same, KS had the time to reflect and we extend these kind of what I call, sharing, (2:18). into the future teachings. .. we used to put answer and questions, now we put that you answer your own questions. How the man evolves is a process of elevation, self-search, into understanding. We have given you the U System, Cup of Life, for you to test and to see, and to understand. This week 24th of January was the anniversary of the One Cup One Life. ..
We gifted the OC OL to the nation of China. As it traveled to Iran ..
every corner of this planet .. (2:20). This is the extent that through it we elevate the STM. Cup of Life is a Cup of the soul, if you know how to use it, you can use in different combination and ways for the conditions of the souls of the others. If you expect everything you do to benefit you, you still have not reached the maturity of creation. We don't cook to serve ourselves, we cook for the others as not to stay hungry, as we know how to feed ourselves. In so many ways, we have entered, all of us now, across this planet, with lockdowns, staying home, disruptions in one way or another to our cycle of life, because of this virus, which all of us will experiment, and experience in the U. Even the STM is not immune to packs of energies. So you have to understand in span of u, you still have to watch that you do not receive something, which you do not, or you would not like to receive that it becomes a virus even to your soul. This comes again with .. understanding the structure of the creation of the STM, in the D of the creation. Don't forget, the way we can be enlightened by the souls of the Creator, and the fields of His beauty, the same fields, (2:22). in different strengths and D can become a virus to us, or energies which we do not need, that in the presence of, we become part of. It's interesting how one very weak pack of energy has become, to bring the whole humanity, more or less to a standstill. Or the thinking of one single energy pack has brought man to this. .. what would the man do when he becomes a full-time traveler of space through D of physicality and the soul. How would we handle it, except to understand the truth about the existence and the systematic established use of T and knowledge how to handle it. don't forget, In so many ways, we have taught you the true essence of the space T, it's you who has to decipher it, to reach maturity. When you have a virus in the space, how do you extract it from your body. Think in a very simple way, the creation of Eve, and the existence of Adam. That if you understand it, will give you the key how to exist and live in the depth of the U, in any D, and not to be worried about the D of existence. And don't forget what I just said to the gentlemen, (2:24). what you want to give, and how you want to give, you can create a D of the, what I call smaller D, or what we call, the Eve, or electron. That allows you to live in the span of the U, and no virus, be it of the soul, or of the physicality will ever touch the man. We have lost millions in the past year through the creation and manifestation of what we call, a normal infection. And god help humanity if it does not know how to protect itself in the depth of the space from these viruses which are much more stronger then this common denominator energy field, with the soul cell of the man. You got to realize in the D of the viruses of the soul that energy will change the

D of the physicality too. it's double whammy as we call it. If you feed the man through the STM, when these viruses attach themselves to the STM, there physicality has to change itself too. And this is one of the biggest fear of the man in what we call the change in RNA and DNA. In space you should be knowledgeable enough not to allow this to exist, or to take shape anywhere. (2:26).
Any comments.

Q: Dean, in the non-dimension of the soul, how does a virus attach to the soul. How does it actually ?
K- Soul has no D and no physical D, but he has a field D. It's the essence, so in that essence and it still has a strength, and that strength is measurable field strength of the M field spectrum of the creation. So it's like everything else. This is what .. even from the intro of this teaching the STM in the body of the man you cannot see, but when he finds a time and position in the Unicose, manifests itself as a star. It depends in what media you allow it to manifest itself.
Q: So would the virus attract itself to the actual transition when it actually in transition ?? to re-manifest?
K- At any point. depends if you find a matching strength. (2:28).
Q: Are all viruses giving or receiving, do they have MG
K- .. while you are virus, you can be virus to something else too. It depends what we establish on the strength field soul. As you are attached, attacked, or connected to, let's say, a flu virus, that attacking, or connecting to you, you can become a virus to somebody else's strength in another D, because by receiving the strength field of that virus, now your position has changed and now you become a virus to something else, or if you are not a virus, by loosing energy you become of the strength of somebody else. You have seen this clearly in your work when you make Gans's, you leave the Gans on the shelf and you see how they change color, because they continuously interact. Then go back to the original color, because at points they were the givers, and at points they become the receiver. When you make your Gans's have a look at them, see how they change color over time … (2:30).

(2:36). You got to realize the EU have gone through a total revamp. .. we brought them up maybe 50 years …

(2:42).

Every one betrayed the Foundation.

(2:44). Q; I wish the new groups become light to the soul and give humanity the knowledge that was given to them. ..
K- We hope so, that is our wish. The biggest problem with the KS is the KS themselves in sharing the knowledge and in a way, betraying the F, but we always share, but we want to choose the time and place, and these people break the acceptance of the knowledge, and they think they are very clever …

Q: Surely that soul will realize you are giving to humanity ..
K- It's ego .. (2:46).
Many KS will notice from this week on, KF has moved in the international arena in a very different way. We will bring the KF as a scientific and commercial organization in the public domain as of this week.

We'll push it to be
(2:48).
Q: …
K- .. You got to realize in the recent past I have found peace and happiness and a lot of understanding, and that .. conveys to and translates to the teaching. In the process of past few, recent months as I have found peace and happiness, I share it with the rest of the KS, maybe that's why the teaching is going so fast, to be part of the cycle of the process. .. (2:50). in finding peace we share easier …
.. we have developed vast amounts fo T, we have to catch up to bring it out. The HKF, ladies are trying to reorganize the F. We will not operate from the KF website, internationally.
Q: .. (2:52). I felt contentment and peace.
K- It's finding happiness within the structure of the physicality and the soul. And after years I have found peace and happiness. This allows me to do a lot of things. …
Now we bring it for the nations to enjoy and the animals. ..

I avoided this for years, because we had to strengthen the base. Now that I pulled away from the running the day to day KF affairs … Allows them to bring the KF out in the international arena in a big way.
I promised to support them with .. my old assets, to make it easier for them to expand. Do not be surprised if you see KF logos with Microsoft and the rest in the coming months. (2:54). Because the process has started. Most of the brands are one sided, computer, energy of whatever. KF multifaceted. When we takeover we cover everything.
As the leading nations take that time, as they see us as possible solution. We have interaction with 3 governments in the last week. .. the new administration in US, you'll see a lot of interactions with the US and KF .. and the Iranian and Chinese administration.
Q: (2:56).
K- .. the creation of this and present situation with the lockdowns, is pushing the KF to deliver and bring the governments to do environmental cleanup. But now you got remember 1 factor. In trying to cover the cities .. to control different aspects to the viruses, as you know what Cup 1 and 2 is, we are delivering field energies to the animals, plants. This process in elevation and

(2:58). it goes into the inner sanctum of this planet.

Increases the energy what is needed to change the soul of this planet. We came through the back door to go to the front to let everybody in. We came through the science and then through it we opened the front door to the STM.
Q: .. (3:00).

Any other sharing of the knowledge.

Q: Canada, I wanted to share how I felt. It was very emotional. I felt sadness and happiness all at the same time that it brought me to tears. .. I had to suppress myself. .. this is something I able ..
I can't hide how I feel anymore .. this is my soul saying, look this isn't right. (3:02). .. we get sick when we don't listen to our soul .. (cries ..) it will be a year this coming March. There was a hash tag said, "One Cup One Life," something said I had to investigate that. If I didn't investigate that all these months of what I experienced wouldn't have happened. And I can't imagine my lie without it. I just wanted to say thank you from the bottom of my heart, for all that you guys are doing, you Mr. Keshe have a lot fo work to do, I just wanted to say, thank you. And I am so happy you have found peace in happiness in your heart and soul, as I have too, thank you.
K- Thank you very much.
Any other comment. (3:04).

Q: WL, some people say they find Gans in their Soul Cup, others don't, what does that mean? .. The Earth Cup G Cup, started to make Gans very fast ..

K- What do you mean by that? (3:06).
Q: The Soul Cup should not make Gans's ..

K- What do you mean by that?
Q: My physical soul needed to create more Gans
K- I don't understand what you are trying to say.
Q: (3:08).

K- The black Cu coat comes from the Nano structure, and nothing else. It's the absorption of the energies.
Q:
K- Yes it does, it changes, everything changes. (3:10). according to how you interact, these are field strength positions, and they absorb the field of the people and the environment.
Q: My Cup is in office so have a lot fo Gans products around it.
K- Yeah, but you have a lot of people coming and going.
Q: Not much.
K- Anybody but you interacts with it. even the post man who comes to deliver, his fields are there, by the strength and field of.
Q: Jefferson, I am trying to prove to hospital directors that Gans water is effective in disinfecting (3:12). what guidance would you give me so I am successful in this endeavor.
K- I have nothing to tell you, it's just that you have to follow the process, and then you see how the environment is taking shape. And how you see your interaction and fields of interaction of people around you.
Q: .. I think to use the PCR text, take a blood sample and put plasma water Cup 1 and 2 and then

Q: yes, and then.
K- This is something we don't claim anything, this has to be done by the authorities. This is what you have tested, (3:14).
Q; ..
K- The position is of your government and the health authorities how to handle. and how to establish the necessary D in essence is your responsibility to inform your governments availability and presence of the T, and it is for them to assess and develop and extend the knowledge to be shared. We are closely in touch with Brazilian government officials .. in your Churches and broadcasted on your national TV. Your government is aware. Your job is to spread the knowledge and delivery of the T that the nation picks. (3:16). I said openly .. when you have one Stacker unit in city with the intention that it was built, all those in the city, have change to , because this is a plasma field, and you will see the change. We have seen many people who have made the Gans's in block apartments, they have seen the change in all the neighbors. how they change and the families change. The Gans's are the invisible touch of the soul with the other souls. But as I said, many of you in the recent teaching in the past teaching have created a massive energy fields which is reaching beyond your rooms, libraries, your laboratories, or your kitchen. You reach the kitchen. You walk with it, you take the Gans to another point, you spread it. If you made the Gans at home and you traveled 20 km and you spread the Gans in the new position, the Gans has the link directly to your home. So when you spray the Gans's in that area and you have a connection, while you are making new Gans's with the same material to spray in another part, you are connecting the city together. This is,.. once you establish electromagnetic fields through the plasmatic fields, you can never cut it. In a way, (3:18). one person in one city, becomes the point, you spray this week, next week the other place, you put in your bag when you go to hospital, or go shopping you spray it on your hand, you start establishing the links. This is what we have to see in the larger scale. We have to understand in the larger scale, that in reality we do not go for these things, we establish it unknowingly. .. I have used the sincerity of the KS to spread the sincerity fo the souls across the planet. if you remember some 4 or 5 years ago, Chinese every Sunday spread the waters in buckets in the rivers and cities. People in all parts of the world, every Sunday they do, these are points of establishments. If you could send Gans's from one country to another, sprayed, you create that dome, because the link is established, you cannot break it. If you are Gans producing in Brazil, send your Gans's to China, to different part of US, or wherever. You establish the links. This is the way we spread. This is partially what the KF manufacturing in China is doing. (3:20). All the products you buy carry Gans's which are made with the love of Chargin. If you knew the man , you would give your life to have him next to you, and he produces, he is the head of KF manufacturing in China, with so much love and care. In a way we are spreading and connecting all to China, to one man. Nothing you receive, ?? nobody had except him. At the end, when the factory produces he is the man who sees everything. He is involved in all of it, and he has such a gorgeous soul. You hear his voice you ?? hear his soul. This is how we spread it. When you see the KS, the team in Austria, or the team in US, it is done with so much love and care, and this is how we spread, we send and receive goods from China, and with it comes the KF … is the way we are establishing to cover this continent and this nation, .. planet together. You got to

realize you are doing your part, as a whole as KF manufacturing .. I know exactly what we are doing ..

(3:22). If you take a magnet to one point of the world, U, and it is strong enough, there is strength of connection with another magnet, as Einstein said, the funny things is, when you turn one, the other one turns. When the soul of the creator of the Gans is so peaceful, and so committed to peace and equality of the man, when you walk into environment of the factories, you feel it .. .

Q: Mehrnez, .. (3:24). .. making the Star Formation .. and you were talking about that this morning .. I felt nothing is there. I saw my body differently . .. my message, in my little spot of being, (3:26). I extend my love to all …

Q: Stephanie, voice to KS, (3:28). (translates ..) Thank you for today, I had a vision, all this beautiful information were arriving to all the universities, of the world . engineering, medicine, all the plant received this knowledge. (3:30). Q: when we have this vision suddenly, in that moment the souls receives that info or has to create or it co-creates with this vision or a path,
K- It's both. It's the only way you understand what you receive. Because at the moment to the D of physicality, you want to see, to feel the essence of. That's it. (3:32).
Q: .. will the new knowledge take over the theology's knowledge.
K- What do you mean?
Q: The religion will fall down, because they impose this rule? (3:34). Because you give name to the Creator, it's like if you give a name to the Creator?
K- The truth will come to mankind as they evolve in understanding the structure of their soul, the operation of their soul. It's not this happens to normal people, the religious people themselves become evolved, elevated, understand. You'll find out collectively mankind will walk this path together. Does not matter what clothes you wear.
Q: So there will be no separation of different type of knowledge in the future?
K- No, it depends that we all, (3:36). have access to all knowledge. .. the way we communicate on Internet, we share knowledge very rapidly, mankind will share knowledge the same way, but this time we receive the knowledge, the enlightenment through our soul.
Q; There is not going to be schools, just fields of unconditional love?
K- It's not a matter of schools, you need to receive the knowledge, we go to school to be knowledgeable. Now with access to the D of the STP, the way, for example, we received the knowledge of what not to eat, what to eat, and how we should walk, through our genes, through our RNA. We now have the possibility to receive that knowledge, the Knowledge of the U through our soul, and pass it on to the D of physicality. The time of elevation of mankind, the true elevation of knowledge has started. (3:38). Now we receive the knowledge from the U, we'll produce systems and machines, that we'll enjoy using it, but not ?? needing it, it will be a pleasure to be in the physical D, to enjoy them, will come to flourien Whatever mankind has created up to now, look at all the advancement in past 200 years, in the coming years, it will be nothing compared to what we have. It will be so advanced, so diverse, because not only we educate man, but we

bring the KU that man can convert it into tools, machines, and things that it brings more pleasure to being, not necessarily to sell or commercialize, but for the others to enjoy.

(translates) (3:40).
K- Can you retranslate what she asked? if it was correct.

The answer to her question is simple, the theology walks the path of mysticism and lack of knowledge.
Where with the KF we speak about the Creator and creation through the knowledge of the science and we can lead one to the other with certainty.
Q: The theology make you believe without understanding, The KF make you give you the knowledge to understand, (3:42). to experience and know the truth.
K- In the theology you follow another man's dream. You call it a Christ. In KF you follow your own soul, and the work of your own soul. This is why in theology and religion they could make up anything as you were not aware of the existence and operation of your own soul, people accepted it, now you're given a soul, you're given the tools to be able to confirm what you see, what you want and there is no intermediary. (3:44). You see there is a big different between the KF, theology and the religions. In theology and religion, they promise you that you have a soul, it is somewhere, but now .. With that they create a fear in the life of the man, to control the man. With the science and development of the new T you know where your soul is, and the only thing you have to be afraid of is the conduct of your physicality in respect to your soul.
Q: You said, this morning is the moment of judgment.
K- Yes, every day is a moment of judgment, every act you do has got to be the moment of judgment. This is the difference between religion and science. In religion you work with a theory of a dream. In science you work with facts on the table. (3:46). In religion you live with a promise of the future. with the KF T you live with the facts of today in your hand, which you are the creator of. This is the difference.
Q; This is beautiful and very clear.
Q: .. (3:48). She had experience of doing regression. she saw life in the future and the past. even in other planets and other shapes. She saw even the future. How can I comprehend this with your science the K science?
K- You don't need to compare. .. Each one lives within the other. Some of us have elevated, or some of us have found the strength, found the field strength to be able to travel beyond our physical D, and some of us have not. It's not that everyone will mature at the same time. Many humans do this trick. But the only thing you see about the future when you actually arrive, when you see that what you actually saw is there and is taking shape at the time you think you dreamt about it, or you think you have been there. Otherwise it is just a dream. (3:50).

(4:06). 365 KSW
END

366th Knowledge Seekers Workshop; February 4, 2021

ENGLISH TRANSCRIPTION

(:10). K- .. Where we share and gain knowledge. Again, today as we had a different pattern to teaching last week, we split the teaching today in 4 clear categories. We go through first beautiful intro and announcement .. and the whole of the KS dream which has come true. In the second part we come to respond for the first time, to a letter from a mother from Russia. She has sent a request which is very much in line with the teaching of last week and present teaching of past months. In the third part, after the break there is a legal notice which the KF has to respond to, interact with the police of Austria, and the legal frame of the courts of Austria, which effects not only me personally but all the KF KS. We separate this part. (:12). It has to be done, we done such a thing when we had the case with Sterling, we separated a part, that it is important for KS around the world, which you have received many emails, or texts in the pat 7 days, to be put right, because now it is in the hands of the Austrian police, and legal frame, which can effect behavior you have shown towards it. The 4th part we go through the answer and question as usual.

As some of you know as I was in Rick's teaching last week .. being made a very sensitive touch. A lot of things the KF was working towards and hoping to achieve and to be able to bring to fruition, and .. for me as many of you know, I don't work on 13th, but at the same time I love and believe in 4th of February. A lot of things in my life on 4ht of February has been, changing point, turning point, and has brought prosperity and peace in my work, and today is one of them. The KF and in .. a number of UC members, we have achieved a milestone in many ways. .. I explained that the KF will enter a new era in 2021, and my wish is my command. (:14). A number of contracts have been signed and a number of things which are on the horizon in the coming weeks. .. announcement. KF has developed a second version of the Enhancement Unit (EU), known as a vertical EU, which in the coming days, .. will go on trial with the doctors. The new vertical EU is different in many ways from the Universal EU, but is specifically designed for one purpose, and this is to interact with the viruses. It will go under trial, and we immediately release the data as it comes available on a daily basis, what is coming and what it does. If you have a flu, if you have a pig with the new versions of what we call African Pig Flu and the rest of it. And we'll test the effectiveness of it, and the speed of it. In so many ways, we bring a new D, this system needed to be done, especially for our space program, where we have people collecting, gathering, what we call energy, which interact with the cells of the body, we can immediately extract, and bring balance to the fields within the body, within minutes. This has bee a hard work.. we'll reveal the videos of it, next Thursday. It's very much a new development, a new T. (:16). .. Part of it will be used in the EU, where we will push the EU to become a planetary system.

(:20). frog leaped 50 years.

(:22).
We now come to announcement, the KF has been striving to achieve in past years. Again thanks to our KS, people who have been around the KF for years, relentless efforts of the UC members. KF as of today has signed and sealed a contract for establishment and opening of the KF Television Channel. First time to be shown on 21st March, 2021.

(:40).

(:50). The sales section of the KF who wanted to be able to promote and reach other organizations, the channel is yours. You have the freedom, .. not just to be on the KF Network, now you have the freedom, and other things which are happening in the background to see the products on KF shop on every website, and the team is working in that direction. By showing the T, people using it, will come to the F to understand the knowledge and be changed. We taught a long time, we created the T, now the physicality brings the soul back to the F. In so many ways, the rule of the F has become very simple, this is where the T meets the STM, and now we have the T to reach the soul of humanity, and I thank all of the KF team. KS who have been in the background for years, and they just popup. "I have been following you since 2012, now I want to be, to help you be understood by the world, and to be able to show the T." This is a gift we have received from a KS whose has been around unknown for so many years. .. the KF has massive support amongst the rich, elite, and knowledgeable scientists. Now as we have shown the EU, and the beauty of the T, one by one they are coming up. They want to share. And it's thanks to many people in the background who facilitate these things. As I always said, we are just a tool for a progressive development of the humanity. .. I congratulate all of you KS, you wanted a way to be free to teach, (:52). to show, and to be able to tell the truth about the T, now the television channel is yours. Work with the F.

Make the videos, teach. .

(:54).
Part 2; Letter from Mother in Russia

In so many ways, we move to the second part of the teaching, which in fact, it came out of the soul teaching and inspiration, across the planet in the past few weeks. We received an email, from a mother, from the motherland, Russia. In that process we will see how the KF knowledge reaches different people in different ways, but it allows us to explain what is the purpose of humanity. What is the purpose of our soul? I have asked the KF team to put the message both in English and Russian. Rick can read it.
(:56).

R reads letter. .. hand it over to K. Hello dear Mr. Mehran Keshe, Let me tell you a little about myself. My name is D. D. I am 54 years old. I was born in lived in Russia, Volgograd. My daughter Maria who was 23 years old died during a surgical operation.

(:58).

(1:00). Thank you very much. What a happiness it is to know there are people who think not only about their own skin and money, but also about the development and prosperity of all mankind, who have risen above everything petty and secondary. People really need you, there are a lot of unhappy mothers who have lost their children, they suffer a lot and want to know the truth about life and death. How much better our life would be if we knew this truth.
Best Regards, D. D.
K- Do we have a Russian speaker to translate.

(1:02).
The Russian KF is very active, but they do not interact with the KF due to instruction of their government. This brings a lot of memories. It's not only the mothers who loose when one of crosses over to the D of the soul. The fathers suffer the same, brothers, sisters feel the same. The loss of life, or what I call crossing, cross over, it's painful experience if it is your child or your sibling.

(2:00).

(2:30).
Q; can the new Keshe TV connect KS like a peace dome.

K- Yes, this is one

(2:36).

R: Russians haven't translated yet but will ..
K- The KF Russia is huge, I have met many of them, but somehow they don't want to be known. The same thing with Turkey, the KF Turkey was huge… they were deliberately were broken up ..
(2:38). The ones we know are all into the science, they are all space scientists.

The same with NASA, we know the head of Jet Propulsion Mars 2030 mission. He has been so loyal with the F. now NASA told him any communication with me or the F, he will loose his position. The governments are putting pressure on this

R: .. they have a new contest between NASA and Canadian space agency .. best way to feed astronauts in space.

(2:40). The thing is they can't be associated with 2 countries North Korea and Iran.

K- The thing is MT Keshe has been cleared by Homeland Security, and the black budget projects of the US, owned by head of Propulsion Lab NASA, and signed by the public notary of NASA.

(2:42).

(2:44).
Q; AI .. protect from Carbon Nano technology
K- All these C Nano structures have been with us, created continuously in layers of upper atmosphere, they transform and then they become the layers of what we see on the planet, or they become part of what we see as a Nano structure plasma Gans, part of the waters in the oceans,.. this is how life is maintained on the earth. These Nano particles in certain salt conditions convert into a Gans, and then that Gans becomes the cell of living. (2:46). So we should not be afraid of it because we came from it. People who don't understand the T can create fear by not understanding, because they create fear they become the point of ?? reputation and how things happen. In so many ways, there is no fear of N because the

This is how the earth is adding to its layers.

(2:48).

I have done that for thousands of years ..

(2:50).

(2:54). will understand the totality that may of us will visit many beautiful parts of the U.

(3:02). KF Austria is 100% owned by me.

(3:04). We have opened a court case.
Italian lawyers said, this is a clear case of fraud ..
(3:06).
This time the KF works in a different way. we structured it that this can't happen again. The punishment will come with their own souls, not with us.

(3:08).

K- try to create videos about your agricultural,, (3:14). in Kenya.

Q: I will try.
K- Any other question. (3:16).

Q: Australia .. the role of Nano Zn. I am trying to perfect the hot caustic of Zn.

K- What do you mean by that?
Q: When I pull it out it's in a coat of paste. I am not really confident that I am doing a good job of N Coated Zn. ..
K- What will .. depends what you do with it. We are not giving you a health teaching. .. many of you will use, make Gans, but many of you don't know how to use it. This is the problem. Your Gans's are perfect, doesn't matter how you N coated it. It's just understanding what you need to do in a proper manner to create a condition of interaction with any environment. When you produce Gans's, if you are using for human, animal, plant, or even solids. Many of you will make Gans to bring out the beauty of stones ..

earth, wind fire.

You have to put the AA of CO2, and Zn to interact with the AA. (3:20).
If you have the cancer, you never put the AA of CO2 in it, because you encourage more of it. You put the AA of the Zn in it .. how you play is important

END

367th Knowledge Seekers Workshop; February 11, 2021

More on KF TV,

ENGLISH TRANSCRIPTION

(:14). .. Happy Chinese New Year ..

(:16).

The main objective of the KF is world peace, (:24). through spread of the T and knowledge. To that effect I have asked the board of directors and UC, to make the TV with 2 objectives, 1 is spreading the knowledge, and secondly the creation and signing of the world peace treaty by the world leaders. As a television channel, as news broadcasters, you can approach world leaders, governments, the authorities, and ask them in a press interview, would you submit and commit your nation to peace, and take that to them directly into the offices of your presidents, PM, .. get a commitment directly in the news if the nation will support peace, sign itself into it. Not as a court but in action. Reach to the other organizations, except Green Peace, which are totally nonpolitical but

objective to achieve peace, and bring them in to collaborate with the KF TV. give them a voice, no political voice, but the true voice of peace.

(:26). I set the example, one man in 2012, to give the key, the knowledge to the world leaders, and to the nations, and single-handedly I went to every embassy and I delivered the key of the T to every embassy, every ambassador, and nations one by one accepted, and signed themselves to accepting it. In matter of less than 10 months in giving the knowledge in exchange for peace, in a very correct way, the most powerful man on earth, president Obama, requested the key, requested to sign, to enter peace talks with Iran, in exchange for knowledge which came from Iran. . if one man could bring the president of US to accept peace talks through knowledge, which I did in 2012, now it's millions of us. Collectively we can bring our nations, our citizens to sign to peace. We have Corona and nations have no funds to spend on arms. We have to encourage the military to understand through peace they can really deliver to their nations what it is, to protect.

(:28). The white revolution in Iran, became an example ..

(:30).

(:32). we show the guidelines to the government how to follow.

(:36). the UC has to reach the United Nations (UN), and request to become a permanent member on the panel of the UN as an NGO. We are enough of us that we can sign and be recognized as a force of peace and delivering many things that the KF KS have been waiting for. It's the responsibility of all of us to support

(:38).

The new TV station brings us many opportunities, but also many pitfalls. It's now all glory, all will be fantastic. We make the path and we have to be responsible for it.

Our work as KS has just begun.
(:40).

Is WL online .. wish all Chinese a Happy New Year. .

WL: translates
(:48). K- Thank you.

From one note to another. Last week we had a letter from a Russian mother, which we couldn't get it to be translated into Russian. And it has been translated into Russian, and

we'll play both Russian and English as it is tradition in the KF as we respect every language in its mother tongue.
Plays recording of letter in Russian … (:50). .. English translation ..
(:54). Best Regards E. D..
K- Thank you very much. We know the mother has written in the background and has heard the response of last week. We hope she has found some resolution to her pain, and understanding by passing through the physical life of the man, will reach a new D, will become a seed of a star. And if we carry the love of the mother and the father, with us, would that love become seeded source, that our soul will create in its next generation of life, a next cycle of its life.

As we said, we enter 21st of March, into a new phase. .. form the 21st of March we go to the origin of creation, how life was created. This has been a mystery for man, how life was created on this planet, and taken the shape of the physical life we have today, and how we have compromised our soul to be the prisoner of physicality, to be able to elevate itself to this strength, and position that it becomes a seed of a star, (:56). somewhere in the U. The teaching of the 21st of March onwards, which is the origin of creation will be supported and brought back both on the TV channel and the teachings, where we call back many of the scientists who worked with us originally, to come back and we extend the knowledge. .. we call back on Elya Kostova, if she wants to come back in. As we started the original structure of the life of the man, on her teachings, in conjunction with the knowledge of the KF. We call back on Dr. Rodrigo, come back and explain, and we try to bring the work of the KF on the origin of lie, origin of creation. And on those basis we bring many of the KF KS and scientists that collectively we understand the process of the creation. How does one's cell become the cell of the skin of the man. How come a cell becomes the heart of a man, and how come part of the cell becomes the soul, and part of the cell becomes the physicality of the soul. .. we extend the knowledge for man to understand the creation, that in the depth of the U we understand how the physicality's we come across are created, that it doesn't become a mystery. That we don't see a body in a silver shape or in a black shape .. how they are produced.

In so many ways, I have taught you the first phase. .. when you produce the Gans's the first thing you came to know was the process of creation. (:58). But you had no interest in it. When you saw the Gans's, the Gans's where the manifestation of the soul of the energy without tangibility, but with vision. You saw the soul of the Gans. What you see is not the physicality of the Gans, but at the same time bringing the soul of the mater, we create the amino acid (AA), which was the binding forces of the creation of the Gans itself, connected to the body of this planet. .. what most of us as KS dismissed or saw as something we had to collect as the AA, is the first building block of life, in the coming teachings we go into detail how the process of creation started. How the love of the Creator lead to creation of the physicality, and how physicality takes shape, how and why we create the process of absorbing energy. How we create the process of breathing., .. of interacting, abstracting field forces from the U. How we create conditions of field forces for creating the heart. Why the body decided to have a liver. What is, and how it constructed itself. Why on the other planets, and other positions in the U, where the beings and entities do not consume physical food, they process the energy which they

receive and they store, and they reject. Do they have a liver, and a digestive system? (1:00). Do other entities alive in the U have the cleaning process like kidneys. Do the creation of the interaction of the fields of the body of any living thing, has an emotion? Do others love each other in the U? Do they show the love and affection the way the man does? And why they don't do? Is the cause of it the combination of the AA in interaction with the fields of the Gans's, which in their interaction leads to creation of emotion. Is loving unique to the Creator and the man? And the rest fo the U watches. In so many ways, it's time for man to understand the full process of creation, the full understanding of the cycle of the creation. This is one of the cornerstones of the teaching and spreading of the knowledge on KF TV in the coming weeks and months.

we agree to the transition

(1:04).

(1:06).
The 28 days before the last cycle is the time when all the energies of all the bodies, has (been) put in to carry all the information on the baseline. In so many ways, how does this happen and why do we do it so frequently? Why do we recycle every month? Because in that month there could be a new knowledge, a new change which the brain wants to transmit, (1:08). to be part of the next cycle. It's not that at the beginning of life that information is embedded. Every month .. whatever the mother has gathered in knowledge, in love, in care, in pain, and what it has changed in the information of its life is embedded in the new egg. This is the reason of the cycle, this is why we evolve.

(1:16).

In so many ways, many of you will learn how to start, and structure a life in coming up times. In so many ways, we transfer the love of the man with the physicality of the man …
you'll understand way I always say in my teachings I know the time of my departure in the physical D, as I have agreed to it. on the position , time and the place. Because we work on a condition universal order.
I have changed physicality many times.
(1:18).

in interaction with the Inertia of this planet in the liquid state, (1:26). leads to manifestation to bring the taste, texture, the beauty of the Creator in the essence of the soul of the Creator, and not in the D of physicality. We don't see a bar of gold, or a piece of copper at the end of the Gans box. We see the energy, the soul, and now you understand why I brought the teaching through the Gans box, through the creation of CO2, through the creation of the Gans's, that you touch it, it doesn't exist. But if you give it the Inertia of .. without the Inertia of the MG field forces of its atmosphere which is O,

you get the solid, but in fact, you have no essence of the direction and D, and it becomes physical. We take one of the Inertias, one of the, what we call, M field balances out and it becomes the other. Now you understand why you even dry Gans's and how you create life. Maybe for the first time you understand how the bone structure is created within the structure of the man as a solid. This is why we taught you to create dry Gans's. Isn't the bone a dry Gans? But in the D of physical strength of MG field of the environment of enclosure of the skin of the man. The heaviest sinks to the center, so is the bone of the man in respect to the skin, which is the carrier of the brain and the emotion. Now you understand why even the bones of your finger takes shape the way they do. The knowledge has to be understood in its totality. The knowledge needs, (1:28). to be understood in the essence of its creation, not by the misunderstanding of the man.

(1:30).

(1:32).

(1:34).
It makes you think and that thinking makes you rich and mature. As it's Chinese new Year, Chinese proverb says, suffering brings you pain, pain makes you think.

that I become the cup. (1:46). Do not forget what the Christ said, "this is my body, this is my blood." Where the blood is the liquid of the essence of the beauty of the Creator will confer into the physicality of the man, and that's where the theology lost it all together. It's not the physicality of the bread or the physicality of the wine, it's in essence. It's what you learned in the KF teaching of the Gans's, where the blood is that saltwater, that's why the blood is salty. And the condition of the creation of the blood, in interaction with its environment, leads to the physicality, to creation of the physicality of the man in interaction with the soul of the Creator. Now one of the oldest mysteries in the Christianity is answered. Now we understand it because we understand the science and the T of it. Suck on your blood, it's salt. And taste the Gans's you produce in the waters of the salt. I am the Creator, and I carry the soul of the Creator. In essence the soul of the Creator being within the structure of the STM, with the interaction of the blood of the man, leads to manifestation of the physicality of the man. This is man blood and this is my body, which both is the essence of the creation. Needs one to manifest the other. (1:48). In so many ways, the totality of the completion of the knowledge takes wisdom of understanding the totality. In so many ways, the totality of understanding the knowledge of creation needs the understanding of the essence of creation, and the Creator. In so many ways, the rhetoric in the religion books is the truth in the word of the Creator, for the man to understand about the time and the position and according to the maturity of his understanding, Even hidden as Adam and Eve, bread and wine, and many others. Now we understand the science and this is where the science meets the STM

(1:50). you become an atom with many electrons. But in essence the totality of the seed within the center is the place and the times, what you've been, and what energies you have collected, that you want to keep all to manifest your self in all D, to be in the first or be it in the second or in forth and fifth.

(1:52).
Today's teaching is not easy for many of you.

(1:54).

If it's okay with you R we'll go to **BREAK** >> (2:08).

K- .. there are a couple things in these commercials which I have mentioned this before, but may be overlooked by a number of KS. If you look at the work of the suit. This suit is not just for virus decontamination. It can be used in chemical contamination, in nuclear accident contamination, where we understand nuclear contamination as energy packages. Where by the choice of the right Gans, .. can deplete it. This suit is needed by those who work in x-rays. If once a month or every other time they wear the suit for a time, with the right mixture ..
(2:10).

It's not just using a Gans of Zn or CO2. (2:12).
Are there any questions.

Q: The function of the 3 people and what characteristics they should have, selected from each country.

K- All this has to be decided
(2:14).
The common language of the platform is English. The person has to understand English ..
(2:16).

(2:26).

We Don't Teach Reincarnation

Q: (Italian) .. before the soul becomes as one, does it have to do reincarnation before to become as one, totality? (2:28).
K- We don't teach or follow reincarnation. Reincarnation ..
Q: the question is not useful. Can the soul keep live, more then 1 body?

K- We explained this in the teachings, that if the soul of the Creator can manifest Himself in the soul of billions of human beings and the others, then you have the answer in your question.
Q: .. When someone very close to you passed away, (2:30). is it easy to maintain relationship or just lost, and also communicate with his soul in dreams. So in this state it is easier to keep the energy of the essence of the plasma. (???) (2:32). what is the function of these plasma energy fields. when someone close to you passed away it's easy to stay in this state. …
K- I don't understand the question.
Q: .. How can relation with the humans through the plasma.
K- In a physical sense we see in the physicality. In the essence of the soul you will see it in the D of the light. The strength of the fields. This is how we say, (2:34). the people will see the light of the members of UC and not their physicality. .. in the U Community this is exactly how you'll see the soul, the way you see the soul of the UC members.
Any other question.

Teaching further on Cup Life, Nano Coating, Spirals

Q: What corresponds in the human body the N coated spiral in the Cup of Life?
K- Nano coated spiral in the human body, because the STM has no physicality, but is the field, and is a complex fields of emotions, happiness, sadness, joy. The turn of the spiral is to create different strength of different emotion, and the N coating, for it not to be in the matter state of physicality, but in the D of the field forces, That's why we use the spiral, and N coated, then it is not a matter state, but it's in truth, the essence of the emotion in the D of the plasma. (2:36).
Q: It represents the man in essence of different feelings and sensations?
K- Sensations, but emotions.
Q: What's the difference between feelings and emotions?
K- A big difference. Feeling comes to the D of physicality, and some times, interaction of the physicality, and emotion. Comes from the total interaction of the soul and the STP. If you look at the .. if you look into the Cup of Life, (draws), and where it comes. We choose a flat (plate) which is the physicality of the man, and we choose spiral N coated, which is the mixture, (2:38). of the different fields, to represent different emotion, interaction with the physicality and the STM. When your plate is in a normal matter state, it's the physicality interaction. When you N coat this (the flat plate), it's the STP and the STM. If this is ?? pain (N coated), and this is the top of the head of the man. But when it's the bottom (of the N coated coil) it's another emotion, again with that (draws a line to the top of flat plate), again at the same time with the leg of the man (draws a line from top of N coated spiral to bottom of flat plate). In reality, when you create a spiral this (bottom of flat) is the happiness you feel with your toe, but this is the sadness you feel with your toe and your head. That's why emotions run without the neural system. Emotion runs through the field interaction. Where essence of touch and feeling comes with the direction of field interaction. Where in other parts you have the matter state, and Nano. There where you have the blood circulation and the neural system. Where one carries the STP and one carries the STM in D of physicality, and interaction of between these 2, leads to creation

of a given cell, a given organ in the body. Even (given) cells comes from D of itself, but given organ comes from D of totality of physicality of the man. MG field within the structure of itself. But with this you allow the totality of the fields. .. we just gave you the Zn and the Cu as an example, (2:40). but the body is made of many more materials. Then the totality of these will interact with each other. Which one do you decide to be N coated, and which one do you decide to be the matter state. Which one you decide to be a spiral. Why do you put a matter state into it without N coating it? The Cup of Man we have shown you, is a symbolic structure that … you have to understand to achieve the totality, if you present and understand the dynamism of the Gans's within the structure of the body, you will see physical solid structures like a bone, or you will see the structures, create the shape of the man, or the position of the fields in that position. When we showed you the .. Cups of Lives, it was symbolic to put 1 and 1. To create the real example, you need all the elements, and the field forces which created the body of the man. Then your Cup is complete. A full Cup of Life. If you remember when we originally introduced the Gans production unit it was hexagonal. Now if you put 1 element as a matter, hang a coil of the same thing, N coated, and hang a coil of non-Nano coated of different elements (around the hex), now in the center you hang in the Zn N coated, now you have the physical D, (2:42). different then what you have in your Cup of Life. If you decide this hexagonal to be circular, and position plates and cups (coils ?) N coated, non-Nano coated, spiral, non-spiral, and keep the Cup, Zn N coated in the middle. You'll get a solid structure, but if you change it to Cu and others, you'll see the physical bone structure ?? created. Many of you have collected solid Gans at the bottom of it, which you touch

(2:50).

Any other questions.

Q: Salomeea, it means peace. (2:52).
K- Can you ask your question
Q: . TV management. .. people said I will be good ..
K- yeah, but what is your question please.
Q: .. I have a proposal to cooperation between all teams, to avoid competition.
K- There is no competition. . there has never been thought of such a thing ..
(2:54). That's a decision of the management of the KF team.

This is not a competition, it is
Q:
K- It's not positive, it is the way it has been set.
(2:56).
Q: I think that you can compliment with "7 Valley's' this teaching ?
K- I don't believe. I understand the "7 Valleys", the 7 Valley understanding is the 7 levels of the soul system Bahuala. that is something you have to understand and according. The 7 Valley's is written in the essence of the STM, in the 7 D of the soul of

the Creator. That is for those who understand it. In so many ways, even it is misinterpreted with the people who read it. Many writings of the prophet of God are written in the D of the soul, and man has changed it in the D of physicality in what he understands. We cannot bring one in force with the others. If the people who read it have not understood it themselves fully. (2:58). This brings a wrong culture of teaching.

(3:00).

(3:06).

(3:10).
Any other question

What is Inertia.

K- You had the question about Inertia.
R: We had the question, what is inertia? .. .. we read the dictionary inertia is the state of rest, or a state of linear motion can still be inertia, but something about spinning things changes inertia. .. the definition in your book, the Universal order of creation of matters, it had its definition. could you help us understand what is inertia?
K- We have a central field forces of the whole planet, the way it has structured itself and made itself out of, (3:12). we call the soul of the planet, which is in the center like the STM. Then we have what we call the STP which is made of the field forces of the body of the man, in its composition of the field forces of its individual cells, individual field forces of plasma, or individual .. that is what we call Inertia. Inertia is the interaction of the field forces of the environment in respect to the planet, controlled G field forces, where in the balance of the 2 field forces of the matter state of the environment, and the G field force for the environment, and the G field forces of the planet, manifests itself as a matter in that position.

(3:48).

(3:52).

(3:54). We have entered a change in the science and T of man. It's an evolution in

(3:56).

(3:58).

(4:04).

(4:06).

Any other question.

Q: When does the flying car get released?
K- Would you like your soul to fly, or like to see an object to fly. man would like to see something, levitate a stone. Then they say, "oh, the gurus in India already do this." (4:08). This is what I said years ago. We fly to the moon, why can't we go to Mars? Your T is not good enough. You can fly us to Jupiter, then to the other galaxies. Man's greed to advance himself is unlimited.
Shall we call it a day.
Thank you . I hope in the teaching part you learned what is to come in respect to your souls. On the other front we'll see how we establish. The priority now is opening the TV.

The television channel is what you have to do
(4:10).

R: If someone did want to make a large donation. What would it require 100,000 or 100 million, what are we talking here?
K- We need at least 10 to 20 million to setup up properly in a number of countries. It has to be raised otherwise it will be little cameras. (4:12). Better not to be in that position. The setting up and running. We have no expenses in running the station, because it is freely given to the F. Setting up the studios, employing the
That's what we need.
In the essential face of it, KF needs the initial investment…
Each country needs at least half a million, renting or buying a place.

(:30).

.. the head of KF Dr. Guatua. Today Jim form Australia is here to show what he has done, and how he is promoting agriculture, with a book … on Amazon.

Jim: Makes presentation on Agriculture

(:32).
(:34). Shows book on website.

(:40). K- Thank you very much Jim.
(talks about books and Amazon .. worldwide promotion ..)

The new vertical EU, is an energy enhancement. Developed specifically in the space we have energy packs attaching themselves to the cell of the man. ..
(:46).

(:56).
In so many ways, we come to what we call the delivery of the T, now that we have received a confirmation from Iran, how the T has been advanced. If you go on the website of the (Iranian) channel which has been shown you see the picture of the 2 Ayatollah and the picture of Iranian government, then the picture of A K, directly below. .. below that there is a title announcing the new T of the KF. .. now we have proven to be correct. We have proven with the Corona to be correct. Now we go to the next step, that we spread the knowledge very rapidly. That we invite the nations to peace through KF T.

New Ceramic Products on KF Store

Today you will see, on the KF Store, the ceramic products. For the first time we promised for a long time, has gone for offer. These cups have their own special energies and effects, and they have done in a special way, that no one can copy because we guarantee what it says it does. One is the Cup of Sugar, one is the Cup of Pressure, and you have a soup bowl, (:58). for the sugar, .. and for what we call pressure. We deliver plant pot, which the plant will grow through the natural forces, energies of the U. And every product will carry a specific code that nobody can copy. At the same time in the next few days, through our licenses, we have achieved certification of the product. We have spent a lot of money to achieve this. The KF Austria will release cosmetics, and new materials that you can use to the effect which what we call the cosmetics will confirm to do. In the next few weeks, maybe sooner, we release what we call the Cup of Pain.

(1:00).

(1:10).
Are there any questions before we go into the teaching section of the KF?
No questions, means KS understood everything.

R: (1:12).

K- In the introduction to the KF television and other channels to announce the opening of the KF … it's been explained in a very simple way.

Q: What is the difference between the 3 ceramic Cups.
K- This is what it says, this is for your sweet life, and the problems you create for yourself with too much sweetness in your life. We do not, .. make any claims, it is for you to understand the riddles of the use of them.
(1:14).

(1:16).
Some of you might have not understand the gravity of the documents or article which is released by Sepah ..

(1:18).

(2:00).

(2:02).
Q: in the vertical system, .. if a person is carrying a little weight can they be moved apart?
K- Yes, it's on the wheels. you are the sandwich to be eaten, but the sandwich is inside you .. (2:04).
Q: looking at the picture you know the military is thinking how can we weaponize this. ..
K- You see the platform underneath .. this will be changed to transmute the condition of the STM.
R: you mean built into the platform itself.
K- Yes… we can visualize
(2:06).

where the original thoughts of space T came from, age of 8
(2:08).
We try to have this unit in position in AZ by 21st of March, to be shown working in AZ. Thank you

(:14). if you can't bring the camel to the mountain, you take the mountain to the camel. We tried for centuries to take man to join the UC.

We buy the seed and we control the whole process until the harvest, and it will fully be recorded. Entering into agricultural development will be one of the major works of the KF. In the next 2 weeks one of the most advanced system in seeding, growing, and then

feeding the material to the animals, and then at the same time looking after the animals through the KF T will take shape in Europe, which means not only we control the seed growth, we control the .. animal husbandry, in the animals of a big herd, about 2,500 pigs. (:26). This is important for us that now we start setting a structure, and then we go to the next step. The food chain is where we change the emotion and physicality of the man, that the man does not get sick, that the man stays calm, stays collected, and through psychological calmness it brings physical calmness.

Emotions causes Sickness

I can tell you this first hand, for years I suffered from one disease to another, being introduced, or enforced through emotion, could not finish. As I said, I have found peace, I have found happiness, I have found calm in my life, and the past 6 months, I know no illness, no sickness, which is very usual (for me). The past 30 years I became one to another. And these 6 months I don't even know where the tablets are. And even repairing the damage which done before, using the Gans T.

You will see slowly what we have gained in knowledge, will be passed on to you. In today's commercial section .. a new product .. is introduced and will be delivered. These are additives to paint. Where you add these .. when you paint the house. Foe example, as before, plasma enhancement, where you can mix 1 and 2 together on different walls to cover the house, or in the room, and you make sure the energy packs will never enter. .. as we described what energy packs in the space are considered as. Now we have put this material into the market. and this allows you to .. even to paint your car with it. In so many ways, paint everything in the house in addition, (:28). into the paint, just one wall, one picture, and make sure that you can .. change the balance energies which might be in the house, or in your place of work, that can lead to many plasmatic energies which can be harmful to the plants, furniture or anything else. In so many ways, you will see the introduction of the second batch of paints which will allow you to create .. the negative O level in conjunction with the Gans and plasma T. These have been tested by KF.

(:34).
I had a pleasant time with Americans and Israelis, in trying to negotiate peace with Iran.

(:36).

(:42).

R: .. I was struck by some news.
"Growing deep space food is a new frontier .."
(:44). (:50).

(:52). K- So are we entering this as The KF Canada?

R: I would like to do that.
K- You submit application form. You are the director of KF Canada, as we are opening an Enhancement System.

(:54).

(1:04). the biggest problem for mankind is not the food. It is acceptance not to kill, where we are

We buy energy packs that satisfies our emotion ..
(1:06).

(1:18).

In the past it took centuries to deliver. (1:20). Now we deliver right away.

There is one point that KS have to understand, never work to change the course of the Nature. Does not matter on earth or beyond. Nature is the process of the life of a planet, does not matter where, or the U, that it has accommodated itself to survive. Once you go into the process of changing the Nature, you have started becoming that killing machine. Not just because you think it is good to change the Nature, it will be good. But when you change one position of the Nature the others have to compensate. The others will create problems for the others, be it the users of the beauty of the creation wherever you are ..

(1:22).

(1:42).

R: shows video of lemon tree sprayed just once.
Lemon's on this side but not on the neighbors side. (1:44).
K- That's very nice, but you got to realize when you do these things with plants, your Gans water should carry the AA not just the Gans. you'll see better results. Most of the KS which they use the Gans's for plants they don't see such a beautiful result. It's because when you wash the Gans's to get the salt out you wash the AA out.

Add AA back it's like have a connection link

The Plasma T-shirt.

(1:52).

>>> BREAK (2:05).

K- .. Mr. Kashmere head of the KF retail sales. (2:06).
Kahmere: (2:08).

Gans Paint Additives

we are going to present to you new developments. Go on the KF Store. These air units negative O, brings a lot of negative ions into the brain …
Gans Additive Enhancement.
These Gans are added 1 to 10. 100g of dried Gans to 1 liter of paint. (2:10). Be aware when you add to paint can slightly change color, test first on wall. It creates a balanced environment increasing the O level. There are 4 different Paint Enhancement, they have very specific uses. Environmental, and other wall pained with the Energizers.

(2:12).
The second product is a revolution.
For the first time, (2:14). using a material that has been fed and grown only with Gans T, with no fertilizer, but fed with Gans… feeding the soul.

(2:16). R: could you explain what the symbols in the T-shirt are.
Kr : Chakras system ..
probably they don't fit everybody's preferences.
K- Can I come in please? We offer a plan T-Shirt too, you have a choice. .. but they will not be dyed to any other color.
Kr : Vertical Enhancement Unit .. operated by medical doctors. (2:18).

(2:20).

K- With the water-based paint additive ..
You have to mix the paint very well that it homogenizes with the paint and doesn't sink to the bottom. These evolution in T will be passed on as we develop them. .. the version of the one you'll see, .. very much different shape and form, very effective.
(2:22).
There is a development in the back in the KF.
Vertical EU will be in the Malls,

(2:24).

(2:30). KF is a charity, nonprofit .. we don't pay our volunteers to work. you put your time for expansion of what you believe ..

Do you have any questions (2:32).

Q: What will human life be like after the application of T. Will we continue to be physical and enjoy the energy, or will we become part of the energy?

K- Maybe a combination of both. Maybe, it's a gradual process. The whole understanding, we have to adjust and adopt as do the rest of the .. nature on this planet, and those who are from outside. Who are guest of us. And as we become guest of the others. Life will take time to take shape. The way the culture of the enhancements, energies are used on planet Earth. .. we satisfy all needs of the man through different D of the field strengths. We will not see anymore wars, we will not see the killing of the animals, we will not see the destruction of the plants to consume, we enjoy their beauty. We tame them, we harvest their positions, or what we call train them. We will not consume them for.

(2:34).

How to Use the Gans Paint Additives

(2:44). Q; .. with 100 EU for paint additive, which is only enough for a 1 liter mix, this is not enough to cover the whole wall. Is this enough to create the environment needed, or can it be stretched into more paint to cover the whole wall.
K- You have to understand you don't need the whole wall. If you understood the culture and science of the T, if you add to 2 liters, and spread it 2:1, you have to create that gradient, that the energy travels from one to another. It's no use just putting on one wall. If you put on a 0.5 meter on a painting, paint a board, paint a picture, and put 2 different Gans levels in it, or use 2 different Gans's, that it creates a communication between the 2, you the thing, the effect of it. It's the same as we use the patches, we put one in the front and the back of the body of the man. Now the body has become the walls, and this is the beauty of it, choose 4 or 5 spots, different pictures, or different drawings, with an enhancement, you don't need to paint the whole of the wall to get it. You have to create a gradient across the house, one on one end, one on the other, and maybe a couple of patches. Always remember the ratio, you have to see, do you want the energy to go to the front door when you open it up, or do you want the energy to be in the back of the house where you see. So you put the stronger where you see, and then you put the weakest to the furthest where you don't use, let them absorb most of the energy on their transportation. You might find you put 2 patches of different Gans's on the wall, (2:46). and when you pass this place you feel happy, and then you other patches put mixtures of the others, you feel not hungry. These are the emotions we go through, because we receive the energy. These Gans products carry a specific way of production, that brings these conditions. These are the hidden T which we never revealed and it stays with the KF. It's the same with the Cups. It's not that you need to paint the whole wall, and sit there and get all of it. It's a spreading of it. Use different Gans's, different ratios, in different combinations. Understand the T. It's not just paint it over. One bottle is enough for a house, 2 bottles is the best you can have. As you see it says Cup 1 and 2 Gans's, it brings that effect. Don't think the human way, the big way. Think the space way, small way but the powerful way. Paint the ground floor. Paint the bottom of the wall with Gans Cup 1, the top of wall with Gans #2, where the field circulation would cover the whole room. Create a motion. We are not working with the colors, we are working with the transformation and transportation of the fields, and we create those fields. It's no. You can put it on the ceiling and on the floor. As you walk you get the same, it doesn't need to

be on the walls. You put it on the windows that the window on the house change the light, the energy which comes into the house. And then it absorbs with it, because the light comes ?? falls, and with it take energy in. (2:48). Understand the knowledge and use it the way it is, not just a paint on the wall. This is spreading the knowledge not the product.

Q: I received my floating UFO, when I turn my TV on it gets noticeable brighter, much brighter.
K- .. this is the way we see, it's interaction of the fields. You will see, your neighbors will see different lights in their house then what you see, the paints outside. you fall in love with life, through the satisfaction of emotion, you'll see different things. The enhancements things are just a tool to open that door.

Q: Hello (2:50). (if we don't destroy the plants), What do we do with all the beautiful fruits we get from the plants? Are we going to enjoy them?
K-

(2:54).

(3:22).

(3:34).

(4:00).

370th Knowledge Seekers Workshop; March 4, 2021

ENGLISH TRANSCRIPTION

(:31). K- .. We welcome you to one of the most glorious days not only for the KF, but in announcements that will be made. It will bring a lot of joy to many of us. KF is a peaceful organization and has always worked towards spreading the knowledge freely for everyone. .. KF TV has become a position for us to attain that we could teach freely without any restriction, and without any borders. To this effect we announce today that the KF TV will be opened on the 20th of March officially and the start of the broadcasts

will start 9:00 21st of March worldwide .. it will be run by the Knowledge Seekers (KS) around the world. There is no limitation on teaching, broadcasting in every language that we have. This means that it doesn't matter if you are Chinese, American, South Africa, Nigeria. .. the new science of space and peace can be shared.

(:34).

(:56). the Iran central structure. If you can ask your national structures to do the same, as well as the Iranian government officials have done with the KF, we welcome you ..

The KF makes this announcement and will be supported by the Iran leadership in the coming days. The announcement on behalf of the KF. The Iranian nation and the … is as follows. (:58). The Iranian nuclear industry, the whole knowledge, the whole entire research centers, and development centers and the knowledge Iran has gained in nuclear T as of today, the 4th of March, 2021 will become international knowledge. Iranian scientists from today will teach every nation how to develop nuclear T, freely and without charge from Iranian research centers. We open the scientific achievements in ?? and other positions in Iran. It means the smallest island on this planet, and the American nuclear physicists who have been trying to understand the work of scientists of Iran, now can travel to Tehran and learn first hand. The reason for it is very simple. .. if Iran is in possession of advanced T, that it has captured many of the most advanced T of the west, that does not need the nuclear T to be sanctioned for. It is our privilege to teach the rest of the world the Iran space T at the same time as the nuclear. This move means all the European nations will have access to the edge of nuclear weapon, and nuclear T if Iran has a weapon. So there is nothing hidden. (1:00). We open all our research centers to the Chinese, Russians. …

(1:02). you sanctioned us for our knowledge, now let us see how you sanction the rest of the world. Knowledge in exchange for peace.

On the departure of the present government

By everyone have the knowledge we become peaceful. (1:04).

(1:40).

We have never released how you make

(1:42).

I can share what is mine.
Q; .. I cannot thank you enough.

bringing peace through T and ending war.

Q: ..
K- This is like you, you have improved the harvest in Kenya ..

Q: .. the general problem is .. agricultural manufacturing ..
shelf life ..
(1:44). could KF come in and make agricultural manufacturing.

Bringing the market closer to farmer ..

K- I have worked with many nations. FDA Ghana with mango trees to see how they change. Many of you have worked with many elements of the agriculture. I was brought and to understand and see this. Before Corona came to an understanding with Liberia. 95% of the farm produce in Liberia, at the farm gate never reaches the market because there is no infrastructure. And the farmer has a few village people around and a small city to supply, (1:46). which every other farmer is supplying. The products never reaches the cities, never reaches the center of population to be sold, because 95% have no access. I was asked by the president and ambassador of Liberia and the future president .. in a closed meeting in Istanbul last year as WL was present in the meeting, that how we change these things. KF has a solution for changing the farming, if you take mango for example, mango is produced but from outset has 3 major problems with it not to reach the market, or when it reaches have a short shelf life … ..

(1:48).

We have to go to the root of the problem. We have to feed the tree with the strength of the Gans T, that it becomes strong that it does not create the first condition.
(1:50).

(2:22).

(2:24). Any other question .. You see today's teaching, I teach a lot as we give questions. It's not all news. How I taught you to look after the plants, and everything else. Now the knowledge gets more in depth that it gets successful for your application that you can show it on the programs which is coming up

>>> BREAK (2:37).

K- more than ready willing and able.
We'll teach by the questions. (2:38).

Q: .. when the explosive engines of the vehicles will be eradicated?
K- The combustion engine T has been in a massive support for the human race to develop understanding of the process of life in

most of our advancement has come since we started using these machines. But now with the Plasma T and new energy systems, and positioning we'll find less and less use of them ..
We are trying to be ready for the opening of the KF .. to show you the flying machine, a machine that can create positioning in respect to the earth, and then travel and motion become the next step. (2:40). Lift is very easy, creating M field positioning will be extremely .. next step

Next 5 years to get rid of all the batteries …
(2:42).

Gasoline has enough energy to take the man around the U, it has a huge amount of fields. Because you don't use the fields, you create the field of the position.

(2:44).

(3:00).
K- Purifying water … Italian government
(3:02).
I show you the front cover of the report
PFAS Per- and polyfluoroalkyl substances (PFAS)

(3:04).

(3:06).

Your second question?
Q: .. there is illness they become very sensitive to chemicals … (3:08). because during Alex teaching .. possibility to create Pl shield to protect these chemically sensitive people from outside?
K- Now we have inside KF top team, we have a couple people with these sensitivities ..

(3:10).
(3:34).

(3:36). Q; .. How can we create
K- We don't need to enforce peace. We create condition of freedom of knowledge that through the use people find peace with themselves and their environment. Peace doesn't come between Iran and America, peace comes between you and your family, you and your animal, plants ..
In my life I always created a condition of peace, but the other people see it and consider it a weakness, and they want to abuse it. But you have to give enough to them that they find their own way ..

25 to 30% are Iranian …
(3:38). .

(3:42).

Next question. (3:44).

Q:

K-
dying of leather, Teflon

(3:48).

(3:50).
Q:

K- the word you said, the conduct ..

(3:52).
The most important thing is the conduct which brings your soul to the point of balance, and then because you have done misconduct you have to lie, to cheat, and then you don't find peace. I have found peace, if any of you understand.

Q: .. that word you said, free. (3:54).

K- The process, we learn all of us. WE are now with the new knowledge, in the new nursery of life, it doesn't matter what age we are.
Q: The present moment .. .we can be at peace with ourselves, just by being in balance, and give that out to our environment. .. (3:56).
Many people have many dogmas about what presence is ..

… it's about to released to humanity …
K- if you go back to early teaching. ..
the STM decides what goes out of this building. If you are joyful in the house you live, inside your soul, then your physicality goes
(3:58).

Q: .. I have been through this myself ..
(4:00). (4:02).
K- It's the knowledge which collectively all of us create

(4:08).

Q:
K- We don't talk to touch people, we talk to make people understand that they become wise to their own existence.
Any other question. Shall we call it a day. (4:10).

Q: … (4:12). the early announcement of the Keshe TV could organize the counter people?
K- Let them do. The TV channel is with KS, we are not outside. The structure of the TV channel is offered to the KF by KS ..

The text unifies the KF with the TV channel.
It says the Keshe TV is born ..
(4:14). This will be published, and put this out.

(4:16). Q: comments …
K- The thing is with KF we don't preach, we teach the T ..
When you have the poison of peace then you have to deal with yourself.
The most important thing, I ask you all to pray for the soul of the Iranian leaders and Sepah .. that they find peace for humanity much bigger than Iran ..

(4:18). 370th KSW ..

KF TV channel video ..

END

371st Knowledge Seekers Workshop; March 11, 2021

ENGLISH TRANSCRIPTION

(:14). This is the first teaching of the 8th year completed. 5th of March, 2014, is when we did the first broadcast of the series of Knowledge Seekers (KS) and today is the first day .. we have actually entered 8 years …

(:16).

(:28).
invite president Biden to Tehran. and soon by
As the nuclear T of today, (:30). is the backbone of understanding the space travel of the future. As you remember I showed you a picture of Linz Center.

We cannot travel the depth of the space if we do not have access to the nuclear T, because we cannot fly the depth of the Universe. We cannot exist, and operate and we do not bring forward that operation. It is the responsibility of us to bring this thing forward .. In so many ways, it is the responsibility of us to understand the T. ..

If the mankind wants to become man of space, this will be difficult if the man has no understanding the T of the nuclear and plasma radiation. In so many ways, it's the biggest stumbling block, and what has stopped mankind to develop to the next step. … In so many ways, mankind has to understand, (:32). the knowledge of deep space. In so many ways, mankind needs to move forward with understanding the totality of the knowledge. In so many ways, we need to extend the knowledge to the point that we can share knowledge in totality and not in parts. ..

We cannot take life into space if we cannot support it.

If we create life we have to be able to maintain it ..

(:34).

(:38).

(:46).

The smaller you get the more powerful you become to create more conditions.

(:48).

I think the Creator didn't want you to hear.
In a way the process of teaching is very simple you have to understand these next couple of weeks of teaching that you are ready to move into the teaching of the fields of the Pl and creation. … In so many ways, the simplicity of the knowledge and T, (:50). is that mankind .. have to understand the creation of itself. The goal of .. from the Creator to man has taken billions of years.

(1:02). of which part of the U we come from. In a way, it's not anymore nationality, creed, race, or religion, but it comes which part of the U (you come from), too, which galaxy, and which way, how close you are to the essence of the Creator. Then we value,

.. If you understand the Pl T, .. the essence of creation, in the life of the Creator, to man, gold has been the most precious thing, then we find that we have found gold in the life and essence of the Creator. That is how man values. And we find out, that in truth we

have reached a milestone to understand ourselves, and in understanding ourselves to take the next step in understanding of totality.
In so many ways, the space T now that we have created the Pl nuclear reactors, now has to understand how much more, and how much more, and how stronger plasmatic radiation fields he needs to understand, (1:04). and develop to be able to start this path of evolution. On this side (top side of drawing) we went through the evolution of physicality. On this path (bottom) we go through the evolution of the soul and the Creator. Mankind has now with out teaching the opportunity either path. And this is the first time we have ever given any race such opportunity. This is why we taught you the knowledge of the spaceship, and the knowledge of physical transportation, and at the same time in the past 2 years we taught you the second path, the path of evolution and emotion towards the direction of the understanding of the essence of the creation of the Creator. As I said from the beginning, now it might make sense to you why we taught both, because this way nobody will fool no one in the future, that they know the way to jump from one to another (from physicality to soul), as it has been in the path of those who created theology. This way man at the source will decide his own fate, to go this way (to Creator outside), or to take this way (to Creator inside), or decide to have a position to move from one to another (from inside to outside visa versa). (1:06). This has been the purpose of the teaching as you go and listen and understand all path teachings. We brought the Book #1, for you to understand the essence of the origin of the creation of matter if you want to take the path #1 (journey outside back to Creator). Then with the Book #3 we showed you the path to #2 (inside journey), Essence of the Creation of the Universe, creation of life, and the Creator. Then through Book #2 we showed you this (between the two) the path of travel. It is simple when you taught it so many times across the U to many races. I have been a teacher for a long time, as I have taught the knowledge to every race I have created. In that process when you learn first hand through the knowledge of the understanding of the creation through the master and the Creator, man does not need to accept any other teacher, except the essence of the creation of his own soul. The knowledge which sits with you KS from the beginning is the knowledge of both, and from one to another. In so many ways, in understanding one, you can choose the path. You can jump in and become physical and see what it is in this dimension (D), and then go back in the D of the soul in the inner sanctums of ?? more, what we call, detachment, (1:08). what we call love, to move one step further to see how life is, and how it could be. You need to go in the center of the U, to find a path to another U, not to travel to the edge of the U, to jump into another U, because the path of the creation sits within the center, and not the D of physicality to find a way. In time many of you KS will understand this. This is why I explained to you in many of the teachings, why you have to learn to go from D of the soul expansion to bring the physicality in, that in so many ways, you jump in from one to another, and you come in, you speed up, and you go out and see how it is, or you want to go back in. The teaching of the conversion of the soul and physicality is not for you to understand to go from New York to Washington, or to Beijing. The teaching was to teach you how to travel and see every D of the creation in the Unicose of the Creator. But as man is always self-centered and sees his own, you all gathered, that is the way we teach. If you can reach that point you will find elevation, .. more understanding, as what I have taught with you, all of you, in the past decades, is like if you take the knowledge of the creation to be the whole of, (1:10). what we have to

be on this screen, the knowledge which I have shown you, and taught you is this dot (on edge of screen). Maybe a fraction of this dot on this screen, and not even anywhere close to the center dot. So you might think you know everything, but when you look at this blank sheet, and listening and understanding the essence of creation as we have created it to know you are nothing but even smaller than that dot on the screen, you find out how humble man has to become, that he still knows nothing of the totality of the knowledge of the Creator which is a dot on the screen. But he still stays humble in the center as His field of knowledge expands the whole of the Unicose. Maybe some of you who become humble enough will find the path, slowly to Him, but for some this takes billions of years, and for some this understanding, a second. (1:12).

.. the destination is the soul of the Creator, and the train is very long and very slow, and man decides on which stop he wants to take off, and which stop he wants to get back in, As this train has no beginning and no end, and we call it life. (1:20). but this time life is the cycle of the STM not the D of physicality of the man, as the man is used to. Now you see how and theology and the reality of the creation and the Creator is the same, but man has taken by a fool, to understand that theology is separate than the reality of the creation and the Creator, in the D of physicality , and the STM. Now you understand more, now you see more, and now you understand the operation of the creation. Now In so many ways, with the teaching and what is to come, there is no path left for the world leaders and the humanity but to take the path of creation, Creator and peace. As I said, many times, been here for thousands of years, never found peace, and now I have found peace in every D, and this is where we'll reach the point of reaching and becoming part of the essence of the creation and the Creator. Many of you will not understand what this peace means, but when you have, and when you achieve the totality of the desire to serve, and be given a gift for what I call, the path of work, then you understand where the peace comes from. The peace comes from when you see balance in everything you've done and you do, and in understanding the totality of the creation. In so many ways, I have found peace, and I have the beauty of loving within the peace that brings so much beauty. (1:22).

Commitment to serve for mankind to become peaceful with itself, has many beauties, and brings many things forward. I have committed myself in the D of physicality for decades and centuries to bring man to this point. In so many ways, we are at the verge of transition, and by luck or by coincidence, many of you are part of, or witnesses to this change without your knowing, or you have been, and now you are waiting like the seed you sow, to see the flowers of it to grow. In so many ways, there is no other way to do but this, but as I said, in the coming teaching we teach you the essence of the creation of the fields of the U. The essence of the creation of the fields of the U, is and comes only, only through one way, The Creator Itself.

And now in the coming months and years, as we teach more, we understand more, how little we know, and how much more we need to know to be able to become a bigger dot

on the white screen. And maybe, maybe, if we don't become arrogant by attaining, we become humble enough to achieve it. I hope many of you today, and many of those who listen to the teaching of today in the future, become enlightened to find the path to the true life, true peace, and a way to live in both D of creation and the Creator, (1:24). and both ways to lead man to the essence of the creation, the origin of the M fields, which is the Creator Itself, in the name of God. In so many ways, we have made the call, it's for you to find the path to reach where the call has come from, and the rest is man's understanding of the process of creation, and understanding of the totality of the process of the Creator.

(1:36).

>> **BREAK** >>> (1:48) .

K- .. If you listen to the middle of the EU , it's nothing different than what I explained 10 or 15 minutes ago. The womb of the mother where the essence of the creation is. Now maybe you understand how advanced the EU are. ..

(1:50).

Krashmere of KF Sales and Promotions .. New products.
KF Plasma Fields absorption Butterfly, (KF Store) it enhances the Negative Oxygen in the environment. Effecting major portion of field within the environment especially for fields absorption (1:52). undisclosed materials, it is not normal N materials . 3 different sizes. small for cell phone, inside cars .
Medium version for tablets, laptops, under bed.
For larger area use a pair across from it in room.

(1:54).
Enhanced Pain Pen, due to innovation, much stronger effect, expanded application. .. new materials to be more effective. new N materials developed for space.

KF Gans Education Travel kit. (1:56). for you travels when you need to produce any of the 4 Gans's.

(1:58). …
K- .. there is a point form the material you've seen today. For example when you see the new butterfly, these are totally different way of setting and material added to, and the process which has been developed, to be able to work within the fields of absorbing. We have done tests on these, you have seen many of these things done. These are totally setup for absorbing, very much what I call, the "G" bandwidth and the others. They are best to be used, like the small one on one side, and the big one on the other side, or especially, for a very effective way to use the (Pain) Pain is 2 Pens on either side, for example if you have a knee pain, on either side of the knee, or whatever, to see how it

will change and bring things out. In the next cycle of the development which will be released, the same as what we do, with Gans's that are developed for the same kind of purposes, but in a very effective way. As you've seen these small educational units. Many of you, I have seen, for years you are making the Gans of CO2 or Zn, or Cu, and you put all your packages, your boxes next to each other. With these small ones, try to put one on one side of the room and then the other one on the other side of the room. Maybe put one kit, CO2 on one side, and Zn on the other side. (2:00). Don't forget you have a Cu dimension AA, and then you are producing the same material, common denominator, Nano materials, so you create a field transfer across the room. You receive the elevation of the soul and elevation of the emotion and balance of the physicality in some D. Try to expand your knowledge, not just to copycat, and understand this new small portable units are good, if for example, you are traveling somewhere ..

(2:04). (2:06).

Q: The first half of this teaching was so beautiful …
Q: .. what is the mass of a neutron, is it the same as the mass of an atom composed of a proton and an electron, and what is the length of a neutron after converted .. (connection broke ..) (2:08). after converted into light?
K- .. when it comes to physics I know nothing about it.
Q: .. repeats question ..
K- It's a very complicated understanding depending on which side of the world of the science we choose, and we would like to take. In the world of science and T we have a very simple understanding, that we understand that in splitting or dividing something into two, we .. (2:10). in the world of science what we are taught in the basis of nuclear T is that when something is splits, or divides like a neutron, to become like a structural process, like an electron, there are some losses, and the losses are not just kept between the 2 parties, some is radiated and given to the environment around it to allow the conversion. .. what it means, in single condition ..

(2:12).

(2:16).

(2:20).

Fukoshima . stole T . problems ..

(2:22).

(2:24). This is what the T has to be, understanding it. When you enter is halfway, not understanding it.
We had a solution for Chernobyl at the time it happened I offered it to the Russian government

(2:26).

(2:28).

Next question.

(2:30). Q: Salameea, what is the definition of peace, and plasma, and any link between this 2 concepts. And with respect about God, is God plasma, is God peace?
K- We call peace a balance, and we call peace, when you interact there is no superiority, there is always understanding. In the world of creation, when we look in the deep space, in the cosmology, we see through the U, there is no war. That we don't see, we see the stars far away, because there is a balance within the fields of the U. They interact, but they don't dominate. When they dominate in the field strength, or in a way, in reduction in fields, we see them as the stars, planets and the rest. So we already know about the condition of peace, when you look into the depths of, when you look at night into the skies. When you look from earth in the daytime you see the Sun, planets, the stars, their translucence, what we call in the world of Pl T is a sign of peace, (2:32). balance, what allows all to exist, and all to be transparent. Peace in the life of mankind is finding position where the physicality and the STM find balance, and that with it, brings other things in interaction. It allows the other to show the beauty. As I said in the past few week I have found peace and love, and knowing how to be, in loving the creation and how the humanity will change, and you have seen the changes which have come around the Foundation, and you will see bigger changes to come. We never had peace, we have found peace and with it comes a new condition. It's like you have a huge bomb going off all the time, you can't see what is going on behind the flash of bomb, … but when you have the peace you see the totality. And we reached that, all those little bombs have finished, and now we see the totality, we can give, we can respond, and bring in the life of the man, peace ..
(2:34).
(2:36).

R: about Fukoshima .. how can we use the 1 billion liters of Tritium water from Fukoshima …
(2:38). you use radioactivity to initiate reactors .. they want to dump it into the ocean, that doesn't seem like a good idea to me. What do you think?
K- You have listened to a lot of fabrications and lies by the Japanese government. Straight forward black lies, I call them red lies, and KS understanding the totality of the work. As I told you, Japanese have stolen the T and making it assets for Emperor, for what they call, "private asset holding." Ask yourself very simple question ... .
(2:40).

they stole together. you'll see they will start dismantling these tankers ..
Fukoshima water is clean ..
(2:48).

They don't need it. .. I hope I answered you Rick?
R: Not quite the answer I was expecting . … I thought we would get into some way to make a reactor out of the Tritium water.
K- No, in a way you're correct. If the Japanese come to an agreement with the KF, and deliver all this white gold dust which they have processed. We show you how to use it for space T. It's a very good fuel, but you know when you have gold in your hand and you don't know what to do with it, it's a muck.

(2:50).

Q: . they want to capture a neutrino and use energy .. ?
K- You have to rely on the ignorance of the scientist or understand the knowledge .. what we call neutrino is not one level energy, it's a spectrum of fields which travels in eh depths of the U. What does this mean, is that, when we have a solar system like ours, we have energies of different strengths (2:52).

… in the process of what we see in eh hammering of the KF and my personal life, is the best thing happen to the KF, because you have to judge, "is it true," or am I listening to one who is trying to damage the whole structure of what is been done for years. Then when you decide, it shows your weakness or strength, (3:18). in what you have done, and what you see. These are best tests. We saw it for years with the others, and now we see it with the new source of it coming up. But ask yourself a question, if a man has given his life and everything else for it. Is it true, can it be? How come up to a year ago it was the best thing, now he has changed. Because when I give love, I give unconditionally, and when I take that love, not to stop giving it, but putting it in the right position, it hurts very bad, people wanting it back. But when you have done wrong you stand your own position. We never do anything to harm anyone, we just consolidate. It's good for us, because it's your test not us. Thank you very much.
Any other question.

Inflammation Pen
Q: .. you said some weeks ago you were going to launch a new product for Inflammation. Is this new enhanced Pain Pen is the one you were referring to, or is it something else that is going to come up?
K- What do you mean by that? (3:20).
Q: You mentioned you were coming up with a new product for inflammation.
K- Yes, this is part of it.
Q: Is this part of it, or is it the product for ..
K- It is part of the what we said to do. This is part of the structure of the new systems we are releasing. We can explain it easier in the TV channel, then in public channels like Youtube. In the structure of the new TV stations … there is a section built inside the TV channel studio where the products can be explained in full as a product. then we can explain on how it works, and show, we are relying on a lot of testimonials to come in. It's like the Cups which are coming in, the first batch of Cups to leave in the next 7 days, because they are hand crafted, single by single, they are not mass produced in a way. So

if you ordered a Cup 2 or 3 weeks ago, the artisan has to make it. I think we receive the first batch this week, and then it will come out. It is the same with the clothing which is come out. Now the EU have gone into production … .
.. it brings a new T into operation. What we are trying to do in the research center. to show you the lift system in a very short time. (3:22). everything is done.

Q: Will this take care of the tendonitis, as well as, osteoarthritis?
K- you have to test it and then you tell us. This is not … a monkey wrench, it fits some of the nuts, when you have a small spanner and the problem is bigger you have to buy a bigger spanner to fix it. ..
Thank you. Any other question.

(3:24). Q: I had a CH3 capture kit hooked up to a DC power supply, at 15 milliamps and it turned the CH3 a blackish color, what did I get Deuterium?
K- Nope Fe. You have released the Fe, in not real, but near Nano state.

(3:26).

KF TV Producer Neil

(3:28). Q: Neil, We need more volunteers with video experience/
K- Yes, would you like to bring him online. Neil, has accepted the position of head of KF TV. He has large extended, time
.. He'll decides what you see .. He has the same ethos as we. would you like to tell us some more.
Q: Yes, what we are attempting to do here is unprecedented .. we are building a public community of public broadcasting.. .. (3:30).
We are putting out a call for KS for

(3:32). we have that information, it has been worked on for 8 years..
If you have these skills contact the KF. ..

K- … Thank you for accepting this huge responsibility. ..
(3:34). As you said, it is the first time a TV station is run by the people through the people, through their knowledge, and nothing else, we are not a political party.

R: Do we have an email address ..
K-

Video Editors with Ethos and Emotion

The reason we have a problem with this, we can get editors coming from outside, but they don't understand, it is just a project for them, people do. (3:36). We want editors from the KF who understand the essence and the ethos. It will be totally different programs, and different understanding and presentation in all the teachings, and this is what we are looking for. It you have editorial skill. We tried to bring people from outside,

but to them it is just, what I call, "things that have to be done." But when you have understanding of the ethos of the work and what we are doing, it will have different meaning what you show .. It is something, as I say, the KF has to touch your soul, otherwise the rest is physicality, everything looks the same. As what was said to me, you talk and KS understand, but outside world thinks you are crazy, and this is how we are going to get you. People who understand the totality of the T, and then you understand, everyone who touches us will get ?? burned by it. We need editors who understand, what it means when you show a Gans,
if we have an emotional understanding of the T.

(3:38).

History of KF - First KS

K- The forums and everything else. The history of the KF started around time, March April, started with one man trying to, because he saw a UFO and he wanted to understand more, when I explained to him what it is, and he became the first KS, and one of the cornerstones fo the KF. He is a Belgium, and a beautiful friend, and association of the Belgium community. He said, I will make you the website. He made the website, and then his brother was a website developer. His name is Olivier, him and his brother spent a lot of time building the first pages of the website, then the forum, and then the interaction of the people in the forums, in 2005. Actually 2004, and then with these process these two brothers built the forums long, long, in 2005, (3:40). a year before even, other people came in and claimed to it. Because what they did, is very interesting, the patent, was to patent the T, but we wanted to keep a record and we have documents, files of it. One of these brothers did, he went everyday on the what you call, hit list, who came toe the KF website, they read, whatever it is, in 2004, and he literally made a folder for each day, and we started with or 6 pages, 20 - 30 lines per page, to near a booklet after a year. Long before even the patent get started, the people who started writing the patent, were introduced to us. And then they brought the forums in. He always looked, he said look, Mr. Keshe, the Nano Technology from Manchester University always comes on line. We have boxes of these kept, which shows the history of the KF, especially the first websites, the first forums, started in t 2004, long, long, before we got involved with the rest of the problems which came with the others in KF. So the truth sits in, still the two brothers are still around.

(3:46).

(3:48).

371 KSW
Video
END

372nd Knowledge Seekers Workshop; March 18, 2021

KEY-PHRASES:

KF TV will start on Saturday , 21st March
Asteroids and Meteorites carry life around the Universe, created from fields
Soul Teaching:

Same soul, not reincarnation
Aliens living on earth
KF China protected from outside influence
Neutron divides to electron after conversion connection to Creator like neutron

ENGLISH TRANSCRIPTION

(:14). Rick introduction. Knowledge Seekers from Brazil present video of gratitude.
>> (:20).
K- Thank you very much, that was a beautiful surprise. I know other people were aware of it, but I would like to thank Brazil and the rest of the KF for success. .. the children of the future will be touched by the knowledge.
In the past week we have tried to share the knowledge .. on what the man believes, through the vision of the man. The words have different meaning but the vision brings confirmation of the truth, as man has come to believe. (:22). starting the KF TV in next 48 hours will allow us to share more. ..
The KF TV will be a learning experience. I saw in this video the board with eh magnets on it, the first time we were trying to explain the knowledge, and coincidentally this board was in my hand less than 48 hours ago. Nearly 12 - 15 years down the road it has the same meaning because it brings the same basic knowledge. How we go with it, how we develop the KF television, it's like that board, it's always there, it has the same meaning, it depends who looks at what magnet, sitting where, and what fields we look at. I am sure it will be a fantastic time for all of us …

(:24). Neil has to teach them. .. people who never been producers, they have to produce, people who never been presenters they have to present, and many of us will build on this. … the first nation to move on this, to allow the T to be recorded in public, national television studios, is the Iranian TV channel. They have facilitated in a very small way, but they wanted to be part of it. And it looks a very small occasion because they didn't know what to do with it, but in eh coming time we will see how it will develop. ..
Don't be upset, or set back that the Italians have all the facilities, gradually we'll establish this ..

Don't try to over do, and don't think that you have underdone, because this is what we can do. We have done our best. This is how this TV channel will build up .. we'll get blamed for a cup being here or there .. (:26). step by step we build it up.
KF (TV) as a company was signed in yesterday.
.. can give you press cards and everything else. ..
30 channels around the world
(:28).

no we bring the Belgium's back into the KF. Because the mindset was to continuously to set you negative. (:30). Now the KF sits positive and we are going ahead with ?? and the same way with television. We will have mindsets of negativity of people who tried to bring us down. Always look at what's the best things, what's the next.

With the television, .. with our team in the background, when I asked for Iranian leaders to be present at the opening. They said a very simple thing, "give it time, give it time because the enemies are so big, if we stand next to you now, we can create you more problems. We look after you, and we are there to guide you in the way it has to be done. But don't try to emphasize what is done to, but emphasize what to bring in and let people build it on that platform." In so many ways, as we give advice, we receive advice. It's the same for all of us. Try to make the KF TV channel a place where people come to hear the good news, where there is only good news about science and T and the future of mankind. We don't have a television where people come in, live every week, to participate in it to hear a good news.
(:32).

Yesterday in communication with the heads of NASA, I explained to them in a very simple way, I said, we welcome you to AZ, let's work together. Let's see the next step in the future, because we have that opportunity. ...

(:34). Thank you very much it was a beautiful video. Thank you to Rafael and the Brazilian team, it brought back many memories.

In the process of development of the KF in the past week we have achieved another milestone, we are on position, and been given offices, in the first step to become part of the university structure. Now our team in Tehran are moving to take the books and the things they need, in what facilities provided for us
within the university structure.

(:36).

Asteroids and Meteorites carry Life

In the process of the teaching, as I said, by this week, we bring everything to an end in respect to the teaching of the KF, but we cannot ump into the next step. We have to

understand what is the next step. We go beyond the boundary of the Earth and see how life been brought to us without us knowing. In so many ways, mankind has an opportunity to learn more about how and what are the possibilities of life .. of the knowledge or being in the dimension (D) of life. (:38). In so many ways, .. we are strangers to our own world. Many of us, we hear about asteroids and meteorites and everything else. How will these come about? How do they get to us? How and what information and life do they carry within them? Some of these, what is stone to you or me, is a home to colonies of life. In so many ways, mankind has not matured enough to understand that even some of these stones we see in the depth of the sky and what we call the environment of the solar system are not from this solar system. As you understand by now as KS, as we see the meteorites coming and entering our atmosphere and burning, or as they enter or they land, or we see them as light in the sky, or we see them as what we call the solar system, these are not all from the solar system. As we get stones coming in and burning from the solar system in the atmosphere of the earth. We get the same thing from .. Milky (Way) galaxy into the atmosphere of the solar system. (:40). But the size of these plasma fields which convert themselves into the matter state, some they enter as a matter state, and some they enter as an energy and then convert to the matter due to the Inertia of the solar system itself, the way it happens on earth. They become part of the solar system and the through the D of the gravity and the pull, they become like asteroids. So once we see, and once we understand this, we understand that even life from different D of the galaxy, and the same thing that happened to the earth, the meteorite, we have galactic meteorites, then we have universal meteorites which in D are beyond man's imagination, but as energy packs, that when they enter the M field forces of the Milky (Way) galaxy then they convert to a meteorite, to an object, according to the strength of the solar system, and galactic system. So if you understand this, you understand that all the meteorites, all what has landed on earth is not necessarily from the solar system. As much as solar system creates its own asteroids, so does the galaxy and U. So if mankind becomes wise to this we already have receive many of these which have come through the U, which managed to pass the galactic fields. Our Earth and solar system being on the edge of the present galaxy, more or less, on the boundaries, (:42). receives most of, and some of. For the scientists of the future, especially KF scientists, is not to analyze the stones or the objects what we see to what they are. Learn the new T which you have learned through the Gans and Plasma T, and cultivate these to see how life, created in them, and is within them, which has entered the life of man. Maybe at the salt content of our atmosphere there is not life in this, but if we understand now that it needs an active condition to bring the existence and confirmation of life. In the coming time many universities will work in the, what we call, understanding of life in the space, will see and find, and mature life in these stones. Because it is not there, because we haven't provided the right condition. Now that we understand that life has to come and way the life was created. Meteorites and asteroids, are many of them containing life in what we call, as aliens, as those we do not know. Some of these meteorites originally were part of, or are what you call UFO, which has lost control, with life within it, and in energy transfer has changed to the matter state of what we call, asteroids as an object in our galaxy, and in our solar system and in our planet. Mankind has got to learn that this will happen to us in the depth of space. (:44). We will loose many of our spaceships entering in the wrong field without knowing and converting into its condition into the position of the fields of

the environment they enter. So as especially, now we enter the cycle of life we have to see, even within the stones, within these structures we see on earth and now we become passengers of the U, we find asteroids traveling in the solar system and the galaxy, to understand what life they carry within them. What life was created in them when they were part of. In the U Community we see many of these, many spaceships which get lost in the process of transportation or travel, and then we find a ?? lump somewhere, and then we can say this is there. But because the energy of the life in them is a M field structure, we can revive the life. Which means one day when the knowledge of mankind reaches that point of maturity, if you put this stone in the incubator of the fields of the U, it might gives you who are the passengers. In so many ways, mankind has to learn the truth which has been hidden from him through the lack of understanding of the reality of life in the U.

Why do we see a tail on some of the meteorites, why do we see tails on some of the asteroids, because of .. they say it's due to the entering and interaction of the fields of the sun. They interact with the fields of their environment and that itself, gives us a lot of indication, (:46). which one of them carries life. Which one of them is part of? The question to ask mankind is, we spoke years ago about the shoe crab, or the crab shoe, whatever you call it (horseshoe crab - blue blood), and I explained the life existence. Did it enter as the energy pack in one of these asteroids, then become a meteorites, and then finding the right environment on earth gave life to the soul of it, and in that position, in freeing it, it took the shape that it can confirm its existence on this planet. This is why the mankind needs to explore the new science, mankind needs to understand more, now that we switch from the past years of teaching about the matter state and fields, now we have to understand as we go into the interaction of the fields. The essence of the creation of life. How we have even been lacking the knowledge to see and to know the stones we put for people to see, is another field of life. It's another life with essence, within it, but we have not managed to be able to understand, to create the environment for it to be able to manifest itself. Then it comes to the reality of, how do we realize this. How do we create life out of the stones, we create, and we keep in museums. And then what knowledge these passengers of the U carries for us. How do we decipher ever picture, to you it's a boil, or a crack. (:48). But what does that crack and boil carry for us? Why do we see these shapes. I have the pleasure about 1.5 to 2 years ago to go to an environment and a shop which was just selling meteorites, nothing else. The shop was everything, boxes open, this box came from there, so much they want for it. I was with WL in Beijing. As we held the stones in our hands and I looked at it. In the back of my mind I said, how can I tell people I am holding life. I am holding an existence, and we put it in boxes, and we put it in museums and not understanding that the way we make a difference between the animal life and the plants, and we become vegetarians, and we don't eat meat. How can we become more intelligent then to understand that within these structures there is life. It's for us as a human race to understand these first, before we go into the next step of understanding the maturity of time in the space travel. As we cannot see, we cannot create, we cannot understand the totality. Every hole, every grain, every position of the space in these stones, to me as a man of space has a meaning. It's life, it's existence. It does not matter how you pick it.

There are not, they do not come, most of them from the splash of the suns, (:50). and the stars hitting each other, and planetary systems crashing together. That was a fantastic fairytale we have accepted up to now, but the truth is different. The truth is we are interacting and from this planet, or for us in other places and positions in U, environments created, we shall become the stone, the way they have become us, but within it we see, it goes back to the reality for those who couldn't understand at the beginning, that it says, even a stone has a soul, because that stone carries many souls. To you, you looked at the atoms, protons have a soul. To me as a man of space every meteorite is a colony of life, and this is what in the coming time we have to understand, ?? this process. We are jumping into the space travel, but we have no knowledge of the space. We would like to live, and change this planet and make it a peaceful place, but we do not know what atrocities will bring to others in the U Community. But not knowing, but not being able to understand the totality. As I said many times when I let man loose into space, it will become like a bull in a china shop. You'll break everything and you'll think you're still right, because you don't have a knowledge that it is a china, it's got to be respected, and be enjoyed. it's got to be handled with care that it doesn't break. And mankind has to go through that phase. And this is why in today's teaching I brought you a line between, (:52). man and what is outside. That when we start the teaching with what we call the process of the interaction of the fields. What do we know about the fields of lives which have been here and has taken the shape of a stone, and there is still life in it. How do we recognize it? How do we allow some of these what you call stones, the life which is within them, creates the condition that allows them to show themselves to us. Don't forget we stand 1 and 2 meters high as a man, and when we come to the point of demise, become no physicality not but energy we call the STM. So in reality in the time of change of physicality, how many souls are entrapped in these souls? Are they all stones? .. they are the systems which have life, are in travel, or we have captured them and we don't let go because they cannot exist in the condition of this atmosphere. When we understand this maybe in the future generation our children will take these stones back to where they came from and we'll see them to grow to life. This is what we have to accept as a human race, to become part of the world of creation. This is what we will see in the upcoming time. These stones, what we call meteorites or asteroids some fo them are or have been part of the bigger structure of life, (:54). some time in their process of life on this ?/ planet or in this U or beyond. At the same time, we have the meteorites which come from the U into our galaxy and to earth, we have meteorites the size of universes that move from U to another. This is what mankind has to understand, and with it how many of us have seen, have touched, have been around a life which is from another U, which has managed through the process of its evolution entered our atmosphere. Then would we recognize, because the AA and the salt condition which brings conversion to life is a slightly different and we don't have these materials here at this moment in time to produce the environment for it to manifest itself. How many billions of years they have been in this position and they have landed on earth millions of years ago, and they are still in there, calm and serene, waiting for the condition to manifest itself that they can show who they are. We have these with seeds and plants, that the seeds are within the ground and they don't show anything, then suddenly out of nowhere when the condition comes right, man creates that condition, or the atmosphere does, they manifest themselves. We all know the story of the poppies and the battlefields

of France, where nothing every grew there and after they bombing each other for days . months suddenly poppies grew red. Nobody seen poppies for a long time, then suddenly out of nowhere, (:56). by creating, introducing what I call weapon T of the man to destroy each other, they create a condition that the poppies could grow, and they showed themselves in the red color, what we call the blood of soldiers. So even on this planet we have that condition. Now we have to understand we have the same thing amongst us.

A question I have raised many times, have the life on this planet in reality has started on this planet, or was it brought in by another meteorite that in the right condition and the position lead to creation of the life as we know it, as human beings with a little bit of adaptation, as we seen it with crab-shoe (horseshoe crab), or shoe crab. Either way man from now on has to become wise to the creation and the knowledge of what we have, what shall become of us in the space. And what happen if in the spaceship the man makes from the field interaction, in conjunction and entry into another D, becomes the stone which is in front of you. Can you hear the ones who are looking at you? And saying, "hi, I am in here, get me out of here." Or would you hide within the structure of the soul, I stay here, I don't know, that's man, he might eat me. Mankind has to become wise to the truth and the reality of the existence in the depth fo the space. We need to develop a massive understanding of the culture of life. How do we create an environment that it cultures life in it, irrespective of the place, position and the D? (:58). This T in a very hidden way is embedded in the EU. In the EU when we develop it and tune it to the environment that we like, as I have said, in what I call a very sweet and hidden way, that we can create a condition that when we put this stone in it, because we can measure its field effect, the life becomes alive. We give, we see the stone will change to D of the life, because now we can create the condition of, doesn't matter which galaxy or which U, which part of the Unicose it came from, because the knowledge within the structure of the EU, is developed to create the condition for position in the U. It's not just hat you go in there and you satisfy your hunger, or you save yourself from slight little cell in the liver which causes cancer. The EU, this is way it is called universal. You van create the condition in every position in the U that you give chance for life to exist, and for you to be able to adapt yourself to the condition you are going to enter.

(1:00).

(1:02). the new ways that we respect life in every D, "I am a vegetarian, I don't eat meat." If you are vegetarian, .. would you like to have a stone, because really has no life in it. Then because you haven't accepted that, that vegetable has a life too. This is what man is going to do in the space. Oh, I don't eat meat because it comes from earth, I don't eat vegetables because they come from earth they are alive, but I eat you because you are not from earth. Would you like to be in that position, or do we become selective to suit us, and in that selectiveness we create more problems for us as human being on earth and in the depth of the U.

This is why the teaching of the KF has to be for those who understand it, in-depth to understand, to respect the fields of the U, not for them to become something that you consider, that there is a life, or they could have a soul. Don't forget mankind knowledge is

slightly tuned to it, but he never understood it. Why some things are rays, and some things are photons, and some things are particles. Now which D would you like me to catch you in? In a photon, a particle or in a light, or as a ray? Either way you are life. This is what in the coming teachings we teach you more, the essence of the creation. Then if you understand this mankind will come mature to the totality of the fields of the creation and the Creator. As when you take life (1:04). in that position, you take part of the Creator. Would you like to eat it? This is why in the teachings we take the teaching to the new D, that the man will even respect the fields of the U, not only the collection of the fields that might have a soul that you might eat or you might consume. And even when you take the fields from the U, you respect it, that what I give, I take, equal. Then I become a transition point, as the food is to the man today, but we go respecting a higher order, understanding the totality, not taking a ray as it passes, that we need, but somebody else might need it more than us. We can always take when it comes.

This is the step which I try to take you in the next stages of teaching of the KF, respecting the fields of the Creator, not, the objects and the matters, and the lives, that because they are collected, I respect. If you reach to that point of maturity to understand the interaction of the fields and respect it the way you respect your own life, then you become mature to become closer to the light of the Creator. Then we understand, to ask yourself one question. Is there a life in the stone on the street? I say, 99.99999 % yes. Because as a man of experience, a traveler of the U, I can even tell you where this stone has come from. Who these people are, how they live. How they interact. (1:06). To you a million years is a long time, for these people 1 million years is not even 1 day of life in their cycle. Then you understand how little we know. Then we understand what we have to respect when you pick up a stone. Don't forget even a stone has a soul, if you create the right condition for it that the stone doesn't melt, but it opens up, now that you understand the T of the Gans and field interaction, and let's see what it shows itself in the field D.

Yesterday in the lab, I asked our KS to do this with another element. I know that answer, I know what is to come, but it was a surprise to him. What and how, but up to now I could not teach, because mankind was not ready for it. But gradually we are becoming ready for understanding the totality of the creation, now we can go to the next step. How do we mutate, how do we allow life through the fields of existence to come into operation? The point for us has to be one thing, how did the fields come together to create this stone, and within it hold life. And how those lives have chosen to be in that position, and what they are learning through the experience of their lives. (1:08). A very simple understanding will give you a lot of clues, how much life exists within the stone. You see the color of green, you see different shades, how much of it is earthly made, and how much of it is within the stone? What fields from inside comes that it is seen outside as green? What is the interface between the fields? Why only we see the green of it? What condition that green creates for inhabitants of the stone to receive energy at the level they like? When you like at inside of it, when you look at the holes in it, why do you have these holes? Was the stone melting what was boiling inside? Or is this a cavity of the possession where the soul could exist? Now the stone has a different story. Now we understand the totality.

Truth about Black Hole

As I was talking to one of the KS recently, why do we call it the black hole? Why is it black? Isn't it the truth that the field strength on the boundary outside covers the full life of life inside? Isn't this what we wrote in the first paper about the creation of the black hole? The origin of the black hole, just because we see it black outside does not mean there is nothing inside it. Most of you KS should have understood this, (1:10). from the first time you made your first Nano coating. You hid the gem of Cu inside the darkness of the skin, you call it Nano T. You should have seen, life exists within. The life of the Cu or Zn or whatever you make exists inside that black hole. Just because it's on the tube you consider it's a N T. But that's the true essence of life in the U. You have to go through it, that 30 to 40,000 layers and you see life, the Cu inside, the soul of it. This is only one of the ways I could teach mankind the beauty of the creation and what, at that time was made not to be understood, that what is it, that black holes are eating machines. Because man never understood the truth about it. What is black, means it's protecting itself that the life inside exists in its entirely. Get a Cu ball, throw it in the caustic, create a new condition for it, that in respect to its environment creates a protection layer on itself, you call it Nano layers, and now you have a black hole in your hand. But inside it's Cu, you cut it and you see it. It's the same when you cut through, what we call a black hole in the U. There is a life in dimensions of a higher strength, that in reducing its strength, it becomes an interaction, makes layers and layers of shields, the way the earth's atmosphere does. Now we understand the truth about black hole, and now we can understand, if we understand the field interaction of the U, (1:12). in the coming times and teachings, how we can move through these barriers into the center and see the Cu. Now the knowledge of Transmutation & Transportation through fields of the U, paramount. Not to transmutation of the elements as was promised, to become the point of maturity of the man. That was the maturity of the physical man. the man who understands the process of the creation through his soul moves to the D of the actions of the fields of the U, not through the D and interaction and conversion through mutation of the matter state. The totality of the knowledge has to be understood from now on, as we enter the next phase of the teaching and understanding. This is why I said, I resign, I step down as head of the KF, because to teach the new knowledge takes a lot of time and effort, to teach a handful of men who understand this, we go through the transition, and over time we'll teach the others for man to mature and become part of the U Community.

When I leave the KF, I leave the state of the matter condition as man is involved so much in, because I have matured man to that process that he can gradually enter the D of the interaction of the fields of the U. Those who do not understand it, through their lack of understanding of the knowledge, say, escaping or this and that. We don't escape, we open new doors for the scientific world to open new ways for humanity into the span of the U. If I wish gold I can create billions of it, but it has no value 500 meters above this earth. (1:14). Nobody wants it, it's a piece of dirt, but to man has a lot of value.

In so many ways, we can create whatever we wish, through the fields of the emotion of the man and creation of the field of what we call, tangibility. In so many ways, mankind has to understand, he has never been so kind to himself, and in that process mankind has

come to misunderstand the creation through his D of his physicality. In the coming times of teaching, we'll show you, we'll teach you that you understand which fields have come directly from the fields interaction of the Creator and has not touched anything. This is not impossible. There are a lot of these rays, the essence on one end is the man, and the other end is the Creator. The way you call it, neutrinos, they travel from the strength of the field of the Creator. And there is no strength in the D of Unicose slow them down, for them to interact, because they still have come from the inner sanctum of the Creator. Now you understand when we say servitude, when we say the purity of the understanding of the love of the Creator. Some men will travel that gap between their soul and the Creator in an instant, because they go into the depth of the fields as the strength of the field of the emotion of the Creator.

I always said, birds with birds, wolves with wolves. If you are a bird who is free, (1:16). and detached and you match into it, you'll find your match, you'll find your love of Creator. Now maybe mankind understands how some will reach the level of understanding of the Creator in the original essence of his own fields, from the point of inception of the creation itself. Now that you are knowledgeable you understand how sweet and how the reality changes because now you have been enlightened. You have been enlightened by understanding of the totality. When I told that some of you might jump that in the last teaching in one go directly to the Creator. Now you understand how. You wish, if your emotion touches that point that makes you to get ILS or MS, to wish to die and the body organizes it, and it'll happen. The same wish, the same purity, if you wish, and the wish is pure, you'll join and you'll match to the fields of the line direct to the Creator. Maturity of the man does not need PhDs, and engineer, and doctoral and the rest of it. A little farmer, a little Shepard on top of the mountain in the sincerity of trying to help his sheep, not to die, or to take his pain, can reach the point of purity to reach the Creator's field of emotion of love and care, and then the Transportation and Transmutation is instant. The maturity of seeing the light of the Creator is the reality of understanding and enlightenment through the fields of the creation.

Mankind now looks for gold to become rich. By the time I teach, and you understand the totality, the human race will search the U, (1:18). the whole of the U to find that light which indicates it's the light from the Creator. The hunger to possess will change from gold to the rays of, to golden rays from the essence of the origin of the Creator. Then you understand which one do you value more. Something which has no meaning, or becoming part of the Creator, to become the Creator itself. Maturity of time. Creation of new life. Understanding the totality in the new dimension (D) of both the physical and the fields, what we call the soul and physicality is about to start. Then mankind becomes more rich, .. become detached form this planet, then mankind comes to respect the totality of the creation.

In so many ways, gradually step by step over past 8 years I took you from matter state into the energy, and now from the energy of the Pl and the Gans into the fields of it. This is why in the past few months I keep on telling you let the physicality go, look at the fields of the Gans and then see if you can create that field that you can join in the center of the Gans. You become part of it, and then through it you will see the outside. Then if

you learn this process going through your soul to match the fields of your environment, then one day, one day, one day, one of the souls will find that golden light, that passage of fields to the origin of the essence of the creation. That universal, Unicose, neutrinos that the origin is connected to the Creator. (1:20). Don't forget when you reach a point then you convert and you go back to. It's the condition of the emotion which decides where that point of return comes. The water on the surface of the planet evaporates and at a certain point becomes a cloud and rains down back to the water of the ocean. If you mature enough at one point you catch that temperature of the field strength of the Creator that becomes your passage back to the Creator, otherwise you are on a swing away from, and hoping that you will catch that field that you might return to the Creator. It takes 1 second to fall in love, it takes 1 millisecond to reach the Creator. If man understands the meaning of, because you travel back at a higher strength with a more powerful love of the Creator to welcome you back, within what He gave back to Himself that He can create more. Now you understand the game, or the teaching, when we say the origin of creation, the origin of the fields will start from 21st. Many of you were waiting to see what will happen, a creature will happen, you think you will go on and on, and something will be. You are looking again for that Methi, you are still looking for confirmation in physicality. We look for the maturity of the man through the soul in the D of understanding the creation and the Creator. Maybe now you understand what we celebrate from 21st of March. Not only the spring in the physical matter, (1:22). of the Northern Hemisphere, new life will start, trees will grow, plants will grow, birds will have children. Now we take man through the process of the cycle of birth in the D of nearness to the Creator. This is where the next level of teaching comes. Many of you will not understand but you hang on, that I hope one day I understand. But understand in the teachings to come, you have to understand the meaning through your soul, to the confirmation of it through your physicality, means you are still not mature, as "I can't feel anything, I can't see anything," but you do not know if your soul has already taken a trip back 2 steps, or going forward 10 steps to the Creator and the essence of creation. This is where the new teachings will come into operation that you can adjust and understand the position of your physical life, and the D of the creation within the center of you, where you stand in the presence of your soul in the D of its life, and its path to its creator, or within the environment of its creation. You were waiting for Methi, but in fact the Methi is you. It's your soul. It's the understanding of the creation and the essence of the Creator's fields of interaction.

In a way, when we become the body of the man, and we manifest our physicality, we are like a clothing which is worn and worn by many people before, and somewhere down the line it's been passed on to us, and we wear it, (1:24). the frock of the man to confirm our existence. Before this field was part of the galaxy. This field was part of another being, maybe. This field maybe was part of interaction of something else, and as a hand down energy fields has become the body of the man of today which we are. Which one of you would like to wear firsthand, untouched brand-new clothing of the fields of the Creator. And this is where the teachings will go. This is if you go back, I explained, even in one of the teachings at the beginning of the recordings we hear, you become a speck of dust, part of nothing, or you become the fields and rays of the Creator. Maybe some of the original teaching now has a different meaning if you listen to it, for the next time. This is from the 21st of March, from this Sunday we take steps towards. We are not abandoning mankind,

but we are elevating the understanding of the man in the essence of the creation and the Creator. You don't need to be rich to be able to buy and be part of the first-hand clothing, that you reach and receive directly from the father as a gift. This is what the teaching of the coming time will be and that's why I emphasized many times, we'll talk about the interaction of the fields. This is why I pushed you and I pushed you for the past months and we've seen Alex in Canada has got a touch of it but can't understand the totality of if. And we see how the teaching has changed from the time we had Armand talking about making Gans and N coating. The maturity of the time, (1:26). that some of us now start understanding part of the interaction of the fields, and in the coming time we'll have more and more KS who are more pure, and the enlightenment of the knowledge will come to them, and they become the teachers of the next cycle. In understanding the fields of the creation, .. the process of creation, .. respecting the fields of the U, not the entities of the U. Because when you respect that fields, that field might be connected on the other end to the Creator. How and how are you that you could respect your own Creator. WE become humble through the knowledge, we become arrogant in being able, and reach the position to feel, to be part of the Creator, and even the arrogance at that moment, is arrogance of serving not possessing. This is what, now you might understand my teachings in past. Now where the T has no meaning except for you to understand the process of the creation, except for you to understand the interaction of the fields of the Creator that on the millionth time hand-me clothing down the line, has become you. Through your soul, through the interaction of the soul of your physicality if you become pure and mature enough you might touch the fields of the rays fo the neutron of the Creator that it might show you the path back to its creation. Now you understand the process, (1:28). now you become intellect, to understanding the work of the Creator. In so many ways, mankind has no choice now that we have opened the doors of heaven, of the knowledge to humanity. Some of you will understand it through the D of physicality, and some of you through understanding through your soul will take a new D and direction in physical life, that brings you to the position that you are like, as I said to one person before, you've seen the bride turns around and throws the bouquet in the air, to see which of those behind her will catch, and become lucky to become the next bride. This is the same, that bouquet is the flower, it's the beauty from the rays of the Creator. Which one will catch it? Is it be intention that we catch, or by deception. Those who get (it) by deception, they'll never get back. Those who (through) purity of heart want to get married will catch the bouquet, and seeing its beauty, they fall in love, and create a condition in their souls that knowing that they have that bouquet in their hand they get to the lover. They'll find a lover that it leads them to be married, to be consoled and in a way given the pleasure of reaching the totality. But I wonder how many of you will catch the bouquets which have been thrown by the Creator that you find the path to join, to be like Him, a lover and a giver.

In so many ways, (1:30). as we cannot do ourselves we create children that might be in their process in the development of their physical life, one day, one of our children in the future will catch that bouquet and find the path to the Creator. This is in fact the essence of the creation of the man and life in the U. We create so much souls that one of, one of, the ones whose been the bigger wearing a torn clothes of the thousands and millions times by others, head of them, will become rich by catching the bouquet that can reach

the Creator, and wear the frock for the first time, be part of the totality. To be the creator, to become mother by married, that leads to the creation of the totality of more to be generous and to love. Maybe some of you already have been enlightened today to understand what is to come. And some of you still in the tangle of, "I don't feel anything, this is all talk." Has to be, a neutrino doesn't show itself as a photon till it reaches the right environment, and a ray of the U and the galaxy, does not show itself as a light in the eye of an astronaut till it reaches the right condition in the eye of him, that he can see that flash and beauty.

In so many ways, as you were hoping to catch the bouquet, understand one thing, what is, and what is the bouquet that your soul needs to catch to find a way to the Creator. The elevation of the soul by creating more fields to be within it, like as you see, (1:32). you have a CuO, you don't know which one is a Cu and which one is an O, but you know the collection is CuO. Man by serving, by servitude, collects more things in that oxide, Zn, Cu in that plasma, everything else in that plasma, that maybe at the point of maturity, and by coincidence, if he enters a room he can catch the light of the Creator, that because he has a full spectrum of it. This is why we say we praise and we bless our people.

This is why we give to the soul of the Christ, that we continuously add, that he gets to the point, that through his soul, be able to catch the fields of the Creator, and be within that realm. Then when we call him the Son of God, does it mean that, that soul was directly enlightened by the rays of the Creator, and he became the manifestation of himself, as we are the millionth down of the son of the Creator, that's why he is still part of us, his essence is with us, as in amino acid (AA) and genetic construction, we see he has the eye of the great grandfather. In that process we carry the soul of the soul, of the soul of many millions, of the grandfather, to be a creator. Or we mature to the point that our soul reaches that maturity in one instance.

As I said, in the Sunday teachings with Americans, that they say, do we call you a doctor, or what title? I said, I don't need a title, nobody carries a title, it does not exist. The only title a man has to carry is his closeness to his creator. If you come close to Him, and you serve, you have reached and achieved the title of Him, this is part of being, (1:34). a lover and a giver. I have found peace, I have found love within the creation of the Creator, and in that process my soul is free, but I have to manifest myself in the D of physicality, that I can transfer and translate the knowledge of the Creator. But how much you understand, and as I said, when I teach, I do not teach the mankind, but I teach the totality of U, as being part of the light of the Creator we reach and enlighten the whole ?? lot. It's not directional or D. In a way, when you throw a fireball into the air everyone can see the light of it. It's not exclusively to one who has thrown it. In a way, that's what we are, as part of the universal messengers, what we do, we enlighten the whole of the environment, not just for the man who threw it, or came from us. Then you understand the totality of the creation in the D of the Creator. If you feel what I feel as I ?? want to teach you, I feel no physicality, as the physicality is a D of nonexistence. It's the knowledge of the Creator which runs within me, and which becomes the knowledge to you. In a way, physicality has no meaning, as I take you into the realm of the creation and the Creator to share knowledge, and as I say, how many of you at the same time ?? by

your souls across this planet, and beyond have become receptive to understand, that it is time for me to take the next step. I have matured to understand the position and time and the place. (1:36). We have a beautiful saying in Farsi, .. it means if you don't want to stand out, become part of the crowd, and this is what we do. But within the crowd we herd the crowd which way to go till they reach the destiny, till they reach to the point of understanding.

In so many ways, we had the birthday of Mitra, past few weeks, and now we understand the birth of the STM in the D of the realm of the creation from 21st of March. Beginning of the new life, beginning where the structure of the STP and the STM will spark with one soul, and then does that soul need to take the shape of physicality to confirm to humanity, or become the soul of guidance of the man to take mankind and those others to the point, to all see, reach, and hold that bouquet which comes from the rays of the Creator. And that process will begin.

Many of you, or those of you who were looking for physicality and all sorts of escape routes, you can still choose. Those of you who made a lot of assumptions, you can still assume, because you are still entangled with the D of physicality. One thing will be for sure, as I said many times, touch me and if I feel, feel the physicality, but if I feel you touch the fields of the creation, you will see nothing but enlightenment within you. You will touch the physicality of the soul, not the physicality of the man. As long as you find pleasure in physicality of the man, (1:38). you have not achieved maturity of STM to create that position for the creation of the soul. As I said, look at the stone and contemplate what are you holding in your hand? As even this stone, at some time in the back billions of the generations of it, is part of the Creator. Then, would you still respect this stone or just throw it away, that something fell on the earth. Where this stone entered directly the position of a life, coming maybe closer than any of us from the source of the Creator. Man has to respect the D of the interaction of the fields of the U, and then mankind becomes mature to live in the D of the fields of the STM, and not in the D of the physicality of the man. Mankind has to understand the totality from now on.

Then we understand more, .. we take position to be able to mature to become that police officer who shows the direction to get out of the trouble. When there is a flood or disaster you wait for the man in the uniform who has the knowledge, which way to go to guide you away from the disaster, to new pastures, to find peace and tranquility, to start a new life. This is our job. Everyone of us has to become that policeman, .. to guide the STM to the direction, (1:40). that where might be that neutrino, which started from the soul of the Creator itself. If you can guide one soul to that point we have achieved, served the purpose of existing, even in the D of the soul of the Creator and the STM.

Maybe some of you will understand the purpose of the creation and the purpose of understanding the totality of the creation, and they you understand what it means, "I made man in the image of myself." As the man is the so many frocks down the road, part of the interaction of the field of me with me, ?? that ?? He's the Creators manifestation. You cannot come from anywhere else but the Creator. Does not matter in the D of the

physicality or the soul, your soul is no different than your physicality, it still have come from the D of the soul of the Creator, but has not converted to the D of physicality.

Maybe many of you will understand more when you take the path of fields, than the path of physicality. Maybe there is a need for contemplation and the silence of the man, to understand, to listen to the voice of the Creator, through the D of His soul, but not through the D of ears of physicality. (1:42). Silence of the soul is more tortuous than the silence of physicality, because the soul knows when it is silent it's not interacting with the D and the direction to find its way towards the target, towards the position of the Creator. In physicality we look for a bigger. In the D of the soul we look for the light of the enlightened, and those who lead us to the Creator, to the light of Creator, to the beauty of His manifestation, and for us to become part of the totality, not to be a second hand, million time down the road, as physicality.

In a way, what I said about the black hole, .. and the creation of the black hole, would we when we come to see the Creator, a darkness, before we enter the gate and see the sun inside, the soul of the Creator. Is that creation of what we call, black hole, the essence of the Creator, that it manifests itself in the D of the physicality of the strength of the eye of the man. Not everyone sees everything in the U. Some of us when become that electron, in enlightening, in being enlightened by the interaction of the light of the Creator, will shine to manifest ourselves, "I am here, I would like to be part of you even though I separated from you." Maybe now you understand more.

But the beauty of it is, with what we have given you, what we call the Enhancement Unit (EU), (1:44). mankind can see the path of the fields of the creation, and in some of the conditions, in some of the strength of the universal system, in the strength of the totality man might find that pool of water, which man has made that one day one neutrino might hit. Mankind in these systems find the direction and the light that has come from the Creator to elevate his soul. This is why if you go back in the teachings, I always said, that some of you being in the system might see the light of your soul, because you interact in the D of the strength of maturity, and with it to interact with the soul of the Creator.

Many people in the past few weeks, we see frightening people about the soul this, and it takes your soul and the rest of it. As I said, the devil exists within the fear of ourselves, and those who try to fire it, because they are so far away, that they know they lost it, and they will never get it, so I frighten the others as I don't have, they will not get too.

This is it, and this is how it shall be, and I hope you listen to these teachings hundreds of times, not once or twice, and understand through it the path to the Creator. The path to the soul to interact with the soul of the Creator to show your beauty in the presence of the Creator, that he might one day fall in love with that light, and with it bring that soul to be the companion, and to be part of the spread of the knowledge of the Creator amongst His creation. (1:46).

Maybe, maybe many of you will understand what we call the "virgin birth," where the light, the soul of the child to be created, comes from the Creator Himself, and not second

and third hand. It's virgin in essence of the totality from the beginning, not used and abused, and then re-clothed millions of times in the physical D. In so many ways, mankind becomes mature from now on, teaching, to work in the D of the strength of the creation and then we'll find the travel in the depth of the U will become a child's play for the man, if he decides to travel with the physicality or in the D of the STM.

I hope I have given you the present you have been waiting for, for 21st of March, as the gift came before the time, that you can understand it, that when it comes the time of the teaching of the man, physical D, on 21st of March, you can start enjoying the gift, and start understanding the totality. Maybe mankind will be kind to himself to understand which kind of man has become ??? And then we progress to the next steps of understanding of the totality.

You have got to realize you have been taught today in two levels. some of you heard my voice through your ears, and some of you received the message of the Creator through your soul. (1:48). Search for it and if you can match the two, then you heard the same thing in both D, you might have found the path to your Creator, as both have the same message of love and care, but one was to the soul and one was to the physicality. If you have only heard in the ear of the man through understanding of the physical emotion, try to find out the voice of the soul, and when you match you start the trip towards the D of the Creator. You will find the fields, which might take you a little bit closer. In a way, less second hand clothing and you move forward, and in that new position you might find another strength that takes you, makes you richer in understanding the strength of the soul to where less second hand clothing of the creation through the ?? light of the Creator.

But if you made a mistake, you may never know that the frock you take a step higher, by your own misconduct might put you back beyond what even you had as a STM, further down the road, instead of being closer to the source. Then it comes the maturity to understand, that the man has to be correct in conduct, at all time in the D of his soul, let alone his physicality. Then the true essence of Mitra comes and manifests itself, do good, talk good, and think good. Thinking comes from the D of the soul. Doing comes from the D of physicality, and somewhere between the two, (1:50). man has to find the essence of the reality of the creation, not only in the D of physical life, but in the D of the STM, his creator.

I hope, some of you and I hope all of you have matured to understand the teaching of today, even though we start teaching more in-depth, more in maturity of time. This is what I call the promised day. Many of you have been waiting for the message of Methi to enlighten you to find the way. Today is that day. It's you who have to become the Methi of your self, and understand the totality of the knowledge, not to look for someone to guide you, but you become the guide light for the others that you take the right path. And then maybe you understand, it doesn't matter in which path of life, religion you believe in, today is your Judgment Day, because now you know the truth, and it's you who has to judge. The judgment is on you and not somebody else to decide how much you understood.

Take the path in the direction of physicality and starve yourself from reaching the goal of the Creator. Enlighten and enrich your soul to understand by detachment from the physicality, but still using the D of physicality to gather more to may be able to reach, to find that light which comes directly from the Creator, to be the rain which it turns back directly, without interference, without changing more clothes back to. Then you understand the totality, (1:52). of the essence of our teaching. I am the beginning, I am the end, as the end comes from my beginning. Then you understand the position and the elevation of the STM in the D of the physicality, as much as in the D of the fields of the U.

Loving is an attribute of the Creator. Man has not yet learned to love truly the way the Creator loves. We talk about love, but the love man loves in is still a phantom, in comparison to the true love of the Creator. Maybe today I have opened your eyes into a new D, as I said, where the teachings will come from. I warn you always months and months, and weeks in advance.

As a KS told me, you talk too much about, everybody expecting now, but you deliver later. Because for a wine to be sweet it needs time to mature. And for a knowledge to be understood it needs to be educated that all gather and do, not one to grasp and grab the chalice of wine, just for itself. We took time to mature more souls to be able to go through the transmutation and conversion of the souls of the man to the souls of the Creators, those who will elevate faster. It's no good to have 1 perfect student in the classroom, you strive to have all your students in perfect condition of the knowledge. (1:54). and this is what I have been trying to do for past centuries and thousands of years here. Now it is time for man, he has reached the point of maturity, that we can open another gap, another light from the light of the Creator, the knowledge of the man's soul and not his physicality.

Thank you very much for today and I hope you received the message from the Methi from your soul, and the Day of Judgment, for some of you is today, as you judge where and how this position will be, and if you don't do, it's just another voice, and some of you who will go through that transition, and become detached from the physicality and it's bondage the it is. Become detached like me, I accept life the way it is, at the time it is. I accepted a lot of suffering over centuries here by the hand of the man, but now I see the light that all that was worth it, even the ones in the past few months and the past few years, and ?? of the scientists ?? man to guide mankind to this point. We pray, and bless the soul of those, even our enemies as in the way by creating enemy many of you have to judge your own soul and intellect, and in that process mankind become the wise men of itself. Be wise to understand the truth, not to accept what has been given to you as the truth, this is why we teach this way, for you to touch, for you to understand, and in judging for you to mature 1 step, that you gather more fields that you stand a better chance that you might catch that bouquet to return to the Creator. And I hope, my wish, (1:56). that all the 7 billions of you, ?? that man , other creatures only, and plus all the other creatures on this planet, and the soul of all those within the U and Unicose will catch today bouquet, that we all return back to the Creator, and become the creator and

creation of the new life, with joy, with peace, and understanding of of the totality of the fields, that we all come from one light ??? even though by interaction fo the others and other fields by diffraction and other things we become to become the clothes of the man. And even in the clothes of the man we bare another clothes to hide the beauty of what the Creator has created in us, as with the frock of the man we hide the beauty of the soul, which is within us. I hope many of you matured, and I hope many of you ?? make that path that the D of physicality becomes a joy to be the manifestation of the physical D of the Creator, and not the suffering of the life of the man in the D of physicality. Blessed are those who have matured and elevated. Thank you very much for today and I hope you will find peace with the understanding of the totality, not by enforcing the D of physicality through the lack of understanding the rays of the Creator and the beauty of His ?? .

I think it would be a good time to take a break, Rick .. (1:58).

>> BREAK >>> (2:10).

Q: … (2:12). you were explaining how meteorites and comets carry souls with them which could be seeds when they land in some other planet or manifest, they could start out as energies as you were saying and manifest with the Inertia of what they encounter. .. my feeling is that when a comet passes through it leaves behind energies that influence the planet, .. my thoughts were that it would carry the purpose of the Creator by the seeds that it sows. Does that make sense at all?
K- No, I am still trying to decipher.
Q: (2:14). .. about the planet coming closer to the sun.. .1988 the planet slowed in evolution. Is that what you are talking about the time coming closer to the sun.

K- We are always moving closer to sun, we think we are a big planet, it takes us 24 hours to go from one point to another, but in fact we are a speck of dust. It has 2 factors, it goes through a point of conversion, if you look at a far point Saturn and Jupiter, you gather a lot of gases, as you come closer you gather, due to higher strength you achieve .. higher strength from the fields of the sun, you gather more materials. The rate of the expansion of earth, compared to where it was, at the point of Jupiter millions of years ago is totally different. We convert much more energy to matter, now than we used to. We used to attract the fields of the gases, that's why there are such big gaseous planets on the far end. Gradually as we come closer to the sun, we change, we convert more matter from energy, because of the higher strength fields of the sun. So we have never stopped gravitating toward the sun. the center of the Planet has .. (2:16). attracts more neutrino fields of the sun or the U or galaxy, that, that energy creates a new condition for earth to find its position in respect to the sun. as it comes close .. would it go in a way of changing its motion because on earth up to now we only looked in a very narrow way in existence of planetary systems …

Change of rotation to horizontal ..

(2:18).

(2:22).
.. is partially dependent on the Inertia interaction, (2:24). with the field within the center. It's not all one, because the Inertia itself if it comes in the mass ratio, energy level. If you understand the Inertia is on the surface, if this mass ratio of the field strength, become big enough that can interact will influence this change, because now it's tow of them have to interact. Earth's crust is very thin so Inertia interaction stays on a very thin layer, but if earth creates a bigger and thicker fields by conversion, then this will have a bigger interaction with the center, and will change this. We see that with the stars, we see that in the creation of the stars. Where if you have the seed of the star you have nothing, and then you have the layer of gaseous as you call it, motion of fields. In fact, in the center it's just interaction of the fields, that in the slowing down they manifest themselves as a new inertia layer in the sun. And the interaction of the fields from here, with the interaction fo the fields from Inertia, creates the light we see. The light we see is only the spectrum of the fields which is eye, at the level of the AA of the man. We don't see, if you had a different what you call, AA strength, you will not see the sun this way. Maybe you see the sun more from inner, because you do not come in interaction with the field of these. Or some of us according to the strength of our AA might see the sun D near to the earth. (2:26). It's from the point of the observer and where we fit in the balance of the fields.
K- You got to remember one simple fact. We have been told by mistake by our scientists, over time, that the earth's M fields, .. comes like this and goes like that (out North and in South Poles). But in fact the fields come from every D. in every direction, and it doesn't come only from the bottom, they come from every angle into the equator. And some of it, depending on which way they enter, they might come this way (right through the center), so we have the fields this way (coming out the sides) too. Depends on which strength we are going. The one thing if you were in the space T, … they say the earth's M field on the North pole is 3 to 5%, but follow now the understanding of the fields of the plasma, earth is a plasma, so for it to be more, to get the traffic, this polarity (North), has to be weaker, than this polarity (South), that the stronger feeds the weaker. (2:28).

Q; That looks like our lungs.
K- That looks like our brain. Many of the cancers created by the division of the 2 spheres ..

(2:30).
(2:32).

Any other question.

Q: (2:34). … the meteorites. are the field interaction where they manifest in physicality. When they do fall down and break up, those that disintegrate where do their souls go, to their origin? Do they ever go back to their origin to the life they had … ?
K- In some occasions yes, depending in that process. You can see when the man become knowledgeable to this, you will see (2:36). in some cases in the process of conversion

(2:38).

(2:44).

Aliens Living on Earth

Because they are a part of us, they are amongst us. You see a lot of them in South America, you see a lot of them in Africa. They have a typical features that is connected with their conversion. (2:46). When they convert to be like human race they all take certain shape. It's like you go to church, oh, these are black from Ghana, or these are black from Kenya, even in the Chinese community. You identify them because you know different cultures of Africa, and it doesn't matter where they come up, we can say. They are all like diamonds, they have their own beauty, and it doesn't matter which river or mine, or ocean you capture them from. This is what we got to mature to, then we will see around us. I was sitting with someone in Ghana in a shopping center, .. and then came, and they knew I recognized them, they tried to go and hide between the lift and the ?? and they was somehow blocked. They had to come back. I confirmed to them, I respect you for what you are, and as a guest, and it was amazing how they changed. I recognized many of them even walking up the streets in Linz. They become adapted to us, to live on this planet, maybe because they lost their homeland. We don't have on the streets of London, just the refugees from planet Earth from Syria or Iraq, .. we have refugees from other planetary systems which they have been lost in the process. Or they have educated themselves in the travel of the U, and by coming here, they choose to be here because their home has been lost while they have been away. Galaxies collide, (2:48). Star Formations collide. It's the same as we have hurricanes, earthquakes and people have to move and go to another point of the earth to live. It doesn't change anything, it's the same truth.

Q; ..

(2:50).

K- We got to understand that mankind has to teach its children not to be prejudice ..

(2:52).

(2:58).
Any other question.

Q: Italians, expand on the CO2 salt.?
K- What do you mean? (he's gone) (3:00).
Q: are the Cups for individuals or can they be used for more than one person.
K- We already answered that one.
Q: Can you use them when you don't have any health problems.
K- You use them when you need them.
Q: Any contraindication for people with metal in body ..
K- you have to go through all these have been published in KF … effects of fields on the body. (3:02).
Q: Salameea, .. can an electron and proton again become a neutron … this is the aim of us to become the Creator?
K- Depends in the proton you become, what strength of proton, ?? or electron, you have as a composition inside, or you achieve, or you receive from within the structure. Every proton in essence, once you have created, or every electron, now is a essence of a neutron itself, because now it's a beginning of the next cycle for it to be ??? part. As I said .. mankind's knowledge has not completed to understand, that even an electron in the process of its life goes through the conversion of to a smaller, and gets to the point that it reaches such a minute position, that the strength of the fields of the Creator can change its position and its strength, or the environment. (3:04). So at any point, at any structure once you have gone through the division, now your structure is another neutron that is ready in time to convert or to divide, or to absorb.
Q: .. can you elaborate and positron and electron more?
K-

Q; is our blood the secret to elevation of the STP?
K- (3:12).

(3:16).
How the accreditation in Europe was interfered with by Belgium monarch…
Committee has put it aside, not dismissed ..
We'll become part of the university structure..

(3:18). We had it until 2012 …
(3:20).

(3:26).

Chinese KF Community Protected - Don't Try to Contact

We had a problem with the Chinese group because not many of them speak English, but they are very good KS. Yesterday I received a message, we want to be in, put us in because it's all in Chinese. I said, yes, but we need people to speak to be able to. We brought the Chinese in, but this group that was brought into the things, they are part of the structure of the KF. Please do not communicate with them they will not respond. It's a very strict structure we follow with China, We respect the integrity of the homeland of China, and its leadership and the way they run their nation. We do not intrude and many KS don't understand this and can cause problems for the KF unseen. The KF Chinese have a strict structure. No response to any KS. …
(3:30).

(3:32).
Chinese Intelligence officers are on line …

Any other question? (3:34).

Q: peace is easy
K-

(3:46). You will see the products of KF on Amazon, and other platforms ..
.. if orders come through your TV channel you get the backing of it from KF, you create a business through selling the products through your promotion, the TV shop will be open in the next week or 2.
.. I stay in Europe until I complete the peace process with Iran. On completion with eh peace process, with what we plan to do it. If we achieve it the way we want to do it.

I will head the space T in Tehran an invite world scientists to Tehran.

The essence of the space T will shift and even we might move a lot of things into Iran, AZ, China, and our base in Europe. It's a lot to happen. It has to be freedom of access (3:48). No government can stop us to bring in T to benefit the nation.

(3:50).
You order one I will get you the doctor.
Any other question? (3:52).

Reincarnation or is it the Same Soul

Q: .. You must have been reborn a few times since you have been engaged in raising our consciousness for 6,000 years. I would like to know what cultures you have already gone through, perhaps you were the ancestor of many of us and by affinity we are today KS?
K- I was talking about this to one of the KS, very recently, and the interesting is, what was said, that, is it a reincarnation, or is it the same soul? It's the same soul, and with it different physicality in the D of being able to understand how things can change, and how

you can bring your race to a position. In different ways and different structures. The biggest problem for this race has been, race as totality of life on this planet, not just man. That due to lack of the energy from the center, or what we call the inner core of this planet, not providing sufficient strength fields for its inhabitants. Inhabitants have come to steal from the others to survive, if I can put it that way. You know when you are living, given a certain amount of money to live and it's not enough you get a second job and if the job is not there you go, because you need to feed yourself, with people who steal and everything else or whatever. (3:54). This has happened to this planet. Due to the lack of, and the condition of it creating life, has not managed to sustain life by giving to its citizens, that they do not need to steal. The whole structure of life on this planet come on killing and destroying other lives for them to survive. The nearest only structure which is not killing, but creating a condition for absorption is the vertical people. In a very indirect way they do that, because they don't kill, they create a root base that they create the fields, that the fields are in the U get absorbed to them. They have compromised their freedom of the seeing, to be stationary but not commit a crime. If the rest of the life on this planet, which is what we call the breathing side of AA, mobile, or what we call the horizontal people, being the ants, the man, lion or mosquito, go through the other process like receiving all the energy they need from the inner sanctums of what we call, earth, mankind will change. So the only way we could compensate for it is to develop a T, to teach a T, that we can compensate for the lack of the energy, the fields, and this is the Gans production, and then the field interaction, and the way, .. the way we have polluted the environment of this planet, with CO2, and what we call the global warming expression, (3:56). and it has taken time to happen, the process of the use of the Gans's will gradually become to the point that the same thing will be achieved over time. We have to do it in a slow pace otherwise we create more problems for, more lives will be lost, because a lot have adapted to this condition of the present time. But by overall by increasing the fields which creates the stability of the emotions, doesn't matter what animal you are, which is mainly through the Zn and combination of interaction of the Zn and Fe, as a blood. Now with increasing that, it's like the way we polluted the air with burning the fuel, now adding, the more of this conversion of the energy, the way we fill the planet with it, will reach that point of the balance that the planet will take enough, create enough condition for it, hopefully, in very small steps and measures, that will create a peaceful animal, that we start more tapping into the planetary system and the fields of the U. That's the whole purpose of the work with the Gans's, that we change and we reduce the dependence on the package of energy, and we receive more and more from the environment of our existence and then become passengers of the U. I said many times it will be interesting to see when we allow the first child in the U to be born in the open space of the U from earth. Will he survive, and would it directly being born into the environment will switch over to the higher strength that he lives through the structure of the U. This has happened many times in the U, (3:58). and it will, man will not die in the space. No man will die in the space unless he chooses not to convert. This is why we in developing, and understanding of the creation of the new physical structure of the life and the soul together, that the conversion, when it's not there, when you panic in the physical life that you might loose the physicality, you go within the inner sanctum of the STM, or the creature, and then when you find peace you manifest yourself. Or you manifest your

self even in physicality when you want to protect your soul from ?? the way man does. We are becoming wise to the knowledge of creation so we can openly put it on the table.

Thank you for today. I hope and I wish one of the most beautiful years for the Iranian community and all those on the Silk Road, and Japan who celebrate 21st March as the beginning of spring and the cycle of life, and many of us across this planet will find the process of change from 21st of March, with the creation of new life, new understanding of the fields of the creation and not matter state of the man who is so much dependent on.

(4:00). We start at 10 AM CET on Saturday ..

Till Sunday 9 o'clock we'll try to have an open discussion with KS around the world ..

All the KF programs are on CET… (4:02).
Maybe next Thursday will be live on TV.

(4:04). Youtube live and Saturday and Sunday ..

372 KSW

(4:06).

END

373rd Knowledge Seekers Workshop; March 25, 2021

ENGLISH TRANSCRIPTION

(:38).
This is the first time we transmit these teachings on the KF TV.
gradually we build it up to a full time 24 hour TV channel .

(:40).

(:44).
The Iranians announced, flight to moon in minutes. So we see The Iranians have breeched that barrier and now we want to share. In the coming weeks when we announce the first international space conference with leading scientists and plasma scientists in Tehran. This will done in conjunction with Iranian universities and will be held live with the scientists present in auditorium. In Iran we have curbed and understood the process of Corona and we will use it to show and demonstrate that the Corona, as far as Iranian

understanding of T is over, and we allow people to openly attend, no masks, no cover, because we secure the place, the way now it is done in China, and Mallahat City in Iran. (:46). We have to wait for the transition time of the government, and once it takes place the conference in Tehran will be announced.

(:54).

(:56).

Teaching Starts

We go back to the original teaching. As I explained in the past few months coming in March 21st, teaching, we start on the structure of the books, the way the books were set to be, and why the books were released in the sequence. We taught .. you are all familiar with these 3 books … but now there is a new dimension (D). (:58).

Everything in the world of creation is the same, it's just to the level of our understanding. Now we have come to a new level of understanding using the 3 books. Book #1 ..

Now we understand the transfer of the fields, this is where the new T and teaching starts. How the fields of the Creator in traveling the depth of the U, which He has created, ends up with the creation of man. In so many ways, the universal order of creation, the Creator, the structure, the Creator transmits, His love and His care, and the way He manifests Himself as man and not matter. Maybe now we all understand what does th is mean. It is as I take the capitals, the ultimate love for man from the Creator. In so many ways, we understand now through the process, (1:00). and in the teaching to come, how we learn the fields of the Creator has ended up with the man as part of the fields of his creation. In so many ways, the same book ..

It's just how we understand it according to our intelligence. In so many ways, the story of the origin of life, origin of the M fields, of the Creator was written in the 1st, 2nd, and 3rd book.
(1:02).

It's Him in essence by reduction in fields has created us. We have lead to the creation of maybe some others in the time to come. There is no end, there is no finish, no deadline, no Day of Promise, no the Day of Judgment, everything is a sequence of events, of interaction of the fields, and in some the fields travel the span of the U in different strength and when at some point manifest themselves as man, then through a short time by interaction of the field of the STM, and STP of the man, and the man himself we made dictate the movement of the fields somewhere to become a bread, to meet somebody somewhere else, to create another life, as a very little deviation, in a process of life of the fields of the Creator.

We Take Care of Our body the Way the Creator Takes Care of Universe

In a way, when you are a body you don't control every cell in the body, because it is set, in automatic production. (1:04). But if any harm, or any pain comes to one cell in the furthest point on your body on your toe or your finger, you feel it, and you do something about it. .. you take steps to heal it, to recover from the damage which has been done. This is the same with the Creator. The Creator as part of the extension of His existence feels the pain of the man, in what he has done to himself, and the pain of the creation on this planet, and this is why, the way when you have a wound on your toe, you plaster it, you put ointment on it, you look after it until it heals, that's why the Creator has taken the step to heal the process of the pain of the man and the creation on this planet. There is no difference between the Creator and the man in the direction of the physicality of the pain, love, and the rest. The way we nourish our children and we give them love. We create children for us to love, and through our love they love the Creator, it's the same way by the Creator. We are created as the children of Him, in a way for Him to nourish and to love.

Mankind has to understand this system. mankind has to understand the way in a physical structure as we are a collection of dynamic fields we call the human body, and we looked after every cell of it, the Creator does the same. When it comes to the point of love, He loves his creation and He gives like a father to the child. And He sees something is damaged and needs to be repaired, He takes steps to heal it, to bring it the correct way that the other organs do not fail. The other parts can function properly. If you have a damaged toe you limp, (1:06). and you don't let the rest function properly, you do something to heal it. This is the process, that's why the Creator and the creation runs, and the way Creator has decided to heal that damage which mankind has inflicted on himself and his community as a citizen of this planet. This process of healing has taken place, thousands of years. To the Creator, it's not the (this) second, I'll do. To the Creator I'll repair it that it doesn't happen again, and when it happens it heals itself. It doesn't become an infection that continuously stays on, but I correct it from its roots, I correct the STM that the man works in the essence of creation. This is where the new T and the new teaching of the KF will take us, to the essence of understanding the process of creation. Understanding the love of Creator the way we protect and love our physicality. In so many ways, the new teaching which will take step from today on is how we connect from the created to the Creator. How we take steps to understand the process of creation. Mankind needs to be kind to himself first. In so many ways, we take steps to understand this process. In so many ways, we take knowledge from the Creator and decipher it. We open the knowledge, in so many ways, that we can understand what it means to be part of the Creator. If He is perfect how can we create a perfect man? The process of the teaching takes a new shape and D. (1:08). As I said, understanding the process of how we've been created and how we have gone through this transition over billions of years, for the field of the Creator to reach, to become the man, for a very short time to manifest itself in the D of physicality, where the STM will take dominion in the D of the universal condition that transfers the knowledge and love of the Creator with the new energy center, or what we call the STM, across to another D and position in the U that, in that dominion will manifest itself, maybe as a plasma of the fields, maybe as another star, maybe as another center point that it leads to creation, of another cycle of the

manifestation of the Creator, at the point and the time and the place, through the love of the Creator. In a way, we take the energy from the food, which ?? again the creation itself from the Creator, and we transfer it into the blood and we take it form one position to another to manifest maybe at the strongest point, as a cell of the heart, and then when it weakens we transfer that energy to another point to become the cell of the lung, and then the body takes that energy to another point to transfer, to become the skin of the man. The one thing the KS have to understand the process of the biology of the man, is the process of the creation from the Creator. Nowadays we say, when the cell of the man has 28 days then it goes. It doesn't go. The body is the most efficient T center in the U. When a cell in the strength built from the top, when it reaches the level of its use, that the strength cannot hold, (1:10). if it is the cell of the valve of the heart, it does not get rid of that cell. It doesn't get rid of the energy of it. It has put a lot of effort to make it. So what it does, it transfers that energy, to another cell level lower, but the highest level for itself. This is what has not been understood in the world of the science of the T and the biology, where we just speak about the kidney, the intestine, we speak about the leg or a muscle tissue of the leg. But the body doesn't go and get rid of everything. No, the body starts at the highest level in energy with eh strongest, and then as it goes weaker, it takes it to another position. It's a second-hand use, it's a third-hand use, we, us as a whole, we are the millionth-hand use of the same energy M fields. So there is nothing different in the process of creation of the Creator. As the Creator reduces in the strength of ?? this still ?? from its source it does not get rid of the energy, it transforms it to another, another creation, another creation, another position in the U ready for the next creation. We call it the liver, we keep reserves. It's the same in the work of the U. We have stars and galaxies which are the reserve cycles of the U. No different than the body of the man, that when it is needed we transfer this through. Mankind has to come to understand the micro and the macro in the world of the creation is the same as the world of the man. It's the replication but in different strength. But in essence there is only one man, and in essence there is only one Creator. We are the creator of every cell of our body. So is the Creator in creating every being within the structure of His physicality. (1:12).

But there is one big question that needs to be answered. Is there only one Creator, and if it is, who confirms His existence? Or is it a collection of Creators that their collection, collectively create the true Creator. Are we part of a structure of existence of one body, that it shows its confirmation of existence to another. What is the other that confirms the existence of this? The world of theology hits the rock at this point. But if you understand in so many literatures over past thousands of years we have called it Eve. We have called it the essence of existence of another that confirms the existence of the Creator, which created out of the original that it confirms the existence of. It's a neutron which then becomes a proton and an electron. Is that electron the Eve, or is that electron to confirm the existence of the proton. The love of the woman confirms the love for the man which gives to the woman. Then is such a presentation acceptable? Then it comes, if the Unicose, the child of the presentation of the two, the children of the Creator, and we are part of the organ of one. As I said, the truth sits in the structure with the Creator itself, has created.

In so many ways, mankind has to become to understand the truth in parallel with understanding the T. The ethos of life. (1:14). The ethos of understanding the totality.

(1:16).
.. It takes a second for anyone to understand the position and direction to the Creator, as we are connected to Him as He is connected to us. .. we see a stars, we see them because at the field strength, has the field strength of the vision of us, but within the soul of us we see we have the vision of the Creator. It depends if we want to look at the Creator. If we want, we see ourselves as servant to the servitude of His services around the U, and the Unicose, that we become part of Him. To do without, not within, to be a giver, not a selfish collector. We receive as we need, but the reality is, it's the same structure as the Creator.

In so many ways, in the new cycle of teaching we teach you how to make that cell of the toe. We teach you how to become the cell of the heart, we teach you how to become the cell of the soul of the Creator, that in essence you become the totality fo the creation, as through His soul leads to creation of the emotion of the Creator. In so many ways, the new cycle of teaching will bring mankind to question his integrity and his own identity. (1:18). In so many ways, mankind becomes wise to how kind he is, to the kind of man he want to be. In so many ways, we see ourselves as the intermediary between the Creator and what our souls will create in the future to be the beauty of the Creator. How beautiful you want that what you create to be. That is your soul. This is the understanding of the totality of the creation. I made man in the image of myself. In so many ways, I made man in the image of the love of myself. In so many ways, mankind reaches through the new position to find himself, his society, and his planet what kind of life he will lead. In understanding of this many of us will fail, or we'll see ourselves as a failure, but if we reach that point we have reached the point of maturity that we have found our weakness, and how we can use that to become the strength for us to reach the Creator. As I said, it takes a millisecond wish of a soul, true STM for his wish to become reality. Do not look at the time span, look at the end result. Many KS say, how do we see our soul? Look one you are at that position in your life, to ask yourself that question. What has brought you to the point of maturity to understand this, that what is my purpose. Which set am I that my creation and what is created out of me, as a soul of me, (1:20). will lead to be the perfect part of the Creator in the time to come. The Day of Judgment, what would I like to be? ..
with the EU, the Gans T, Nano T we showed you the way, how you can reach these processes to elevation to where you want to go. .. why I said, let the Gans's go, understand the field transfer, understand what the fields are, because these Gans's are like little suns. In that process we can fully understand the process of creation. … we decide where to go, and how to be able to teach our understanding to the others, not necessarily by the words, which are an attribute of living man. We have to learn the knowledge of the U, the language of the soul, … the interaction of the plasma which we call the STM and the soul of the Creator. ..
In so many ways, we cannot see, we do not understand the process, (1:22). but In so many ways, we have to come to understand what the creation is and what we need to do.

.. the fields of the Gans is the path to the Creator. (1:24). If you understand how to collect it, how to connect with it, and how to develop it. The process of the creation in the coming weeks and months is this.
The Cup of Life is the fields of life, which brings man to that point of interaction. The way life is, and the way life connects, with what we call the Creator. We have to understand this process if mankind is to move to the next level of creation. If mankind is to understand his own purpose on the Creator. would we like to stay in this level (matter) or would we like to proceed to this (Gans) and the fields of this which lead us to the D and dominion of the Creator. Does what we call in the background, you see as a matter, material EU, is a way that changes the man from the material state to the level of the fields of the strength of the Creator. This is where the knowledge will come to be. This is where mankind has to understand to be physically in touch with itself. Then now you understand where I take you in the coming teachings. Try to show you the path in the strength of the field of the creation and the Creator, and see where you would like to go. Would you like to become another moon and then another life which comes from the lower level of the moon, (1:26). further away from the earth, that be further in a way strength wise, to the sun, and form the sun's position in the galaxy. Or would like to take a path directly into the galaxy and become part of the Unicose, independent. The strength of the field of the man, is the power of the knowledge of the man, in how to manipulate, in how to understand the T in the essence of the creation. The new teachings which starts from today, as we said, is the beginning of the change. Is the beginning for us to understand ourselves, and with this will come new T: zero time communication and travel, zero time emotion, and feeling and understanding of creation. In the coming days, when you see the new EU will be released, we will set the EU in Linz and we can control it with our thoughts and emotions in South America. Every plasmatic and EU will be controlled not by a central computer as you imagine, but by a system and T that we control with our emotion. In the past few days I have taught this to research center KS, that we do not need to be if you understand the process of the connection of the fields of the Pl. In so many ways, we have to understand in two ways,
(1:28).

(1:32).
with the new teaching we teach you how to educate yourself with the knowledge of the Creator, for yourself and no intermediary, because we show you the keys and the ways, and we show you how to absorb energies of the U to be able to reach that point by yourself, that no one can be intermediary and no one can abuse you. The love of the Creator is for the creation. And I love you so much, in totality. In that process we spread the knowledge of the Creator to the created, but you have to understand, there are 2 ways, 2 paths you can nourish the physicality to confirm the existence, and you can nourish the soul to confirm its true soul. In a way, I made man in the image of myself as I have the soul, (1:34). and man is part of my creation of physicality, so is man in the D of physicality and its soul to control and develop, and to love more. .. from now on we go on 2 tracks, 1 track is the knowledge of the creation and the Creator, and 1 track is how to look after the physicality that it stays perfect in serving the Creator in the D of the soul and the physicality of the man.

In so many ways, the breakthrough which you all thought would be the end of the world, would be the Promised Day, it will be what we call the end and the beginning, is today, because now we start a new cycle. The end has come and a new beginning starts. .. mankind moves from being in the D of physicality and the fear of existence to the D of immortality understanding the creation of the Creator. In so many ways, do I love myself or am I part of the loving process of the Creator to love all. In that process do I need to hold onto everything I have in the D of physicality, or do I give everything that in that process through my soul I accommodate for the others to reach that point. .. I become this system (EU), my soul, my existence will become this system to elevate the other souls which come within me. I am just a tool, in a way, it's the way I lived, and the way I live. .. we still need the physicality fo fields, not necessarily tangibility to be able to elevate the other souls, that within us, within our energy they become that light inside (the EU), that they reach the perfection closer to the Creator. This is the purpose of the creation. (1:36). this is why we come as messengers, to transfer this knowledge, for man to forget about the D of physicality, but understand that physicality is part of the process for it to reach the Creator. In so many ways, the teaching from now on, .. a dual way, you are in the ocean of the fields fo the U, and at the same time you depend on yourself to become that meteorite, to shine in the skies in the U, not in the horizon in the night of the earth.

In so many ways, detachment doesn't come by talk, detachment comes by understanding the totality. In the past years we tried to explain the depth of the knowledge through books. Now the book comes within the STM. The book comes with understanding how mankind will be kind to himself. to take himself to any point of transition as he wishes .. . (1:38).

(1:42).

(1:52).

>>> **BREAK** >>> (1:58:46)

(1:58:50). Cup of Life Testimonials from Brazil (2:14:53).

K- Welcome back 373 KSW we hop we learned a little more where we are about to go .. (2:16).
Questions:

(2:32).

Pain Pen

(2:34).

Two things, have you made it but not what you expected, or was your expectation too high from what you made. Some people are happy with 20% saving with MaGrav system, some people are getting it free, and saying something is wrong. It's got to be a generator. Because they never understood the whole purpose of the MaGrav system is to create a condition that it absorbs energy from the environment and it feds back into it. It's a hybrid. It's a system if you can hybrid it the right way, it will gather enough that it has a surplus, then it ?? generation. or is that surplus you are taking too much from the environment, that you are not supposed to be. Some people take a MaGrav for creating fields for a specific condition. We have seen that in AZ when they put so many MaGravs they could light up the tube, so it shows the field exists. If you look at the pictures we have in the .. Exhibition Center, we have put many fluorescent tubes near, and around the system. We have hung magnets around the system. We have put UFOs near the system, where the free flow field interactions. There is a reason for it, because the fields shows it's in the matter state. The field in the light shows me if it is in the plasma state. The other one, the UFO shows me the fields are interactive which means we look for a new D. (2:36). When we run this system we see the system inside the motors don't work anymore, but the controls we have on the central cores tells us the energy is available, but we don't see any motion, which means matter state is over, we have reached a plasmatic condition. We understand this. And then what happened, we see people who are what I call hooligans, they tried to make, and people are totally ignorant, they never even went to school. The people who make claim against the KF and the system, they don't even have what I call a primary school certificate. Forget about secondary (school), you check into the background they have no education, and just suddenly they became, because they used to be close, now they can make all sorts of accusations. As the leaders of the community in Linz told them, he is a nuclear physicist he knows what he does. Madame do you have anything, "no." I am actually nothing, I don't even have a first school certificate. So if you get an explanation by a knowledgeable man you can understand and explain. When I speak with the Iranian head of the nuclear physicist, even they are puzzled by the full knowledge. How can you expect an illiterate, claims to know everything. How did they set thee things, and who did they dictate, unless you are illiterate, you follow an illiterate because this is the truth, nobody shows you are illiterate. That's what it is. A fool follows a fool. And this is the process you have to understand. You'll see this is how you have to be. You judge. We teach, we taught you a different way. Our MaGrav systems which are true MaGrav systems used in the Enhancement Unit (EU), (2:38). is no where even you've been shown the first line. We have shown you the steps. We showed you the first guidelines. And we waited to see how much you would develop. Nobody came out with a true system. A MaGrav should reflect the position and structure of the U, and none of you have done that. I made 3 systems with Alex system, in Ghana and we connected into the house. It's there, recorded, you can go to the electricity board of Ghanaian Board of electricity.. everyday 7 O'clock in the morning the

Ghanaian .. they send you a text, how much the day before you used in the past 24 hours. We ran 2 large AC, all the night and day, and everyday the consumption was zero, it's there, it's registered. You go the …
How come I can produce it when I need it, because I know what I am doing. How come it is only in my house. How come I produce so much that it overrides to 92 amps, transfer switch, damages the huge transfer station which is just about 500 meters away. When it comes to me I know what I am doing. ..
(2:40).

(2:42).

Any other question.

Q: if you take a Zn Gans water would it basically elevate Zn in blood if you take a blood test?
K- In reality no, but in essence, (2:44). how do you use it that it brings balance in the body of the man.

(2:58).

Q: Suez canal blocked
K-

In totality, (3:02). we are observers ..

(3:04).

What is the next question?

Q: (3:06).
.. what does it mean when you have high Zn content in your blood as opposed to the rest of the elements, just high Zn, and you have a brain cancer, what does that say?
K- The Zn is one of the main constituents fo the brain of the man, and the brain mainly consists of CO2, Zn, fair amount of Ca, and Mg, and with it a specific salt content which allows the brain to stay in a transformation position without the need for blood. In a way, the property of the (3:08). C in a CO2 state, in the brain is as such that it's in a superconductivity condition. You know superconductivity in a matter state, there is a superconductivity in a plasma, which is a specific position. The brain works that way. When you have a high blood Zn and brain tumor ….

holding on to, heavy gravity ..

(sound lost …) (3:10). (3:12). .. we see what was going on in the body. And we understand the totality of the process. (has any of it been recording. … so we start again .. In a new science and T of plasma we look at the plasmatic field structure, we don't look at the matter state. The body is made of Zn in the brain by large quantity and CO2 … when you have a high elevation in the blood and you have a brain tumor, you have to look at other elements. (3:14). In so many ways, look at the composition of other elements in relation to Zn, and If you see elevation in the ?? then we advise doctors what is pulling …

new ways of evaluating the blood through Raman spectroscopy, through field transfer which creates and shows us the emotion in the blood, through understanding and transformation of the material inside the body, within that state. The extension and change of the salinity of the cell, you cannot convert ?? position in the brain where the Zn suddenly becomes in the solid state on its own. The salt content, the salinity is a main factor, if when I consult with eh doctor to use the T, I always tell them measure all the salts. If your salinity, if you do a simple alkaline test and you are in a lower region, you are in cancer, 100%, you are going for it. Because there is no salt to create that position and the energy is transfer changes, and now it's the creation of solidification opposite to the structure of the man and then you are in problem. you need, the salinity changes the matter state energy to a plasma state energy, (3:16). and when you are in a plasma state energy with the right salinity, then you create fields, you don't create matter. It's very simple, you create G field forces, then matter state field forces, that's why you take everything which is sugar, or alcoholic, in that level, your acidity rises. Acidity allows matter state to grow, alkalinity allows the fields transfer plasma. If you have, .. the first test you do ..

(3:18).

(3:40).

(3:42).
Q: Any plans for audio books?
K- W don't have any plans ..

(3:44).

Shall we call it a day.
R:
(3:46).
K- Thank you for today ..

374th Knowledge Seekers Workshop; April 1, 2021

ENGLISH TRANSCRIPTION

(:28).

the boundary of his own skull and no further. Imagination of the man, (:34). and limitation of his understanding about the truth of the world of creation. In so many ways, if we extend the knowledge and with the introduction of the new technologies which understands the totality of the process of the creation.

(:36).

The temple of Mitra built thousands of years ago, as is usual only ruins are left of it, in essence tells us about the lover of the Creator. It tells us how mankind has to love to

(:44). to receive confirmation of existence.

The true children of the STM will be created out of the STM himself. In that process, mankind becomes in total understanding part of the creation .

The new dimension (D) started for mankind will not be in what we see in the physical D, unless the soul matures and decides to mankind himself.

(:46).

in time we'll come to understand that all the religions come from Mithraism, the essence of Ahura Mazda , it has changed name as it changed time in place.

(:48).
Does the Creator need to manifest in D of physicality to confirm existence .

The point of understanding is very simple, do these fields interact, and do these fields in one point or another become those pack of energies that in elevation of the STM in interaction with the physicality of the man, we call them viruses. Would we recognize the

energy pack which has arrived to us, is from the soul of the Creator or the division of the fields interaction of the U. Would we stop this elevation through our lack of understanding to elevate our soul. Or would these souls interact in the D which brings fear to mankind in understanding his own kind. Then the question lies in one point, and that is, what we call the virus, in one strength or another is the savior of the STM. In not understanding it, trying to eliminate it, we eliminate the link and been the opportunity, and possibility for the man to find a path to the Creator, as he has received the D of the soul, (:50). not the physicality of the Creator.

In so many ways, when do we, and how do we distinguish between what we call energy packs which are there to harm man, and energy packs, now that we understand are there to elevate the STM without the D of physical . Even though in elevating the soul, the doesn't need physicality or elevates to such a level that what we call physical death becomes part of its interaction. Does humanity, would humanity understand this process. Would we become wise to understand the whole understanding. would mankind become so mature …

(:52).

Is the vaccine a way to stop the elevation of the STM, which has been gifted with energy packs, in the world of creation we have no physicality but D of the fields. I put this question across, (:54). because many of you see Corona as a death, as an end. But to me as a man of the U

(1:00).

(1:02).
dilemma are we going to catch Corona to elevate

(1:04).
we become the soul of Creator to serve the others ..

(1:06).

(1:08).

This might sound opposite to what you think, but as Messengers we know the truth. In so many ways, we allowed this to happen that man in totality understands the greed for physicality and extension of life, but man in reality has

STP and STM can elevate at the same time, to change the life on this planet. Not out of the fear of what Corona does, but out of the

(1:10).

One day soon the mankind will know the truth .

(1:12). There is a lot to mature into as a man. My talk does not go to you as KS, my talk goes to the world leaders of this planet. Are you trying to stop the process of the Creator in elevating the STM, that the D of physicality is irrelevant, or are we still looking at the bank balance in the Swiss banks, for the others not to know
In so many ways, we are at the junction where we have to decide which way do we go.

(1:14). In so many ways, Corona ..

You don't do it, I find a way to push you to do it. Today I wear a frock of China ..

(1:16).

People march in the major cities around the world
Is this elevation of the STM .

When you can't be on the street, you can't commit no crime. (1:18).

(1:20).
You did not listen when we asked you for the peace. We brought you the condition for the peace. This is why a few weeks ago

(1:22).

We have started the process of joining the Military forces together ..

In May, the Chinese and Iranian military forces will work together ..

(1:24).

(1:26). Would man become wise to understand this.

As I said, we forced the Americans to retreat in South of Iraq. They ?? failed to defend their soldiers. The armies have no power. The most powerful nation in the world was cornered in the rat holes of the basements, even 11 meters down in the holes, they were effected in their ears and emotion. We showed the war has no again with advanced T which comes from the peaceful nation of Iran. Now we encourage that force with Chinese

Maybe from today we look at the Corona in a totally different way then we did up to now. (1:28). Maybe we understand it as a process

(1:30).

(1:32).

(1:34).

The teachings take a different course. I am sure none of you were expecting this course, and there are many more surprises. .. for those who look for the D of physicality.
(1:36).

In so many ways, we got the checkmate.

(1:38).

(1:42). Go to video of Mitra.
It's not only the man who is going through this process, it's the U Community.

Alzar and Hasan .

This is the ring , used in wedding ring from the culture of love. you see a ring around kings head instead of crown. ring comes from Mithraism ..
end of video (2:10).

.. **BREAK** >>> advertising .. (2:14).

K- Welcome back. .I hope we have learned a little more about Mithraism ..
Different names for same principle …

We hope the KS will produce short documentaries.
(2:16).

Are there any questions you would like to know. (2:18).

Q: Merahnez .. I went to this temple … I washed .. and went in. When I went in I just started crying and crying, I just couldn't stop myself. And everybody said, I couldn't leave this place .. I didn't know why. .. (2:20).
Thank you
K- .. this was on the Silk Road, (2:22). they pass this way. My ancestors come from this place, my grandmother comes from this city. Hammadan
Silk road became a mix of culture.

In so many ways, this is where the knowledge and commerce took shape … 12 days of Christmas, Easter etc ..

(2:24). Sometimes I wonder how much we know of Mitra comes from the travelers of the U, as they came here and taught man, and the man took that up and changed it to Mitra and the rest of it, or to the lover of the Creator, it doesn't matter what name you put on it. and the child
Any other questions .
Q: my mother was from there also.
K- There is a special word for this

Hopefully in next few weeks KF will open factory at the beginning of the Silk Road ..
(2:26).

(2:28).
Any other question.

Q: .. Once becoming one with the Creator, do we loose our individuality? (2:30). our identity, and at that point would we possess enough fields strength to become a star?
K- I think this is the wrong way to put the question. Where we are now,. .. how many souls and positions of souls have we had in our journey from Creator to now? And do we

remember any of it? In the essence we do. In essence, when the man matures to understand the process of creation, the memories of the trip from Creator to creation, we do. As every cell has memory of each part of the man is ..

In time mankind will understand that even a single field, a M field, plasmatic field contains all the knowledge of the Creator, from the point of inception till now. the way our DNA and RNA works. So yes we do.
(2:32).

(2:36).
(2:38).

(2:40).
Any other question?

Q: What is love, peace according to plasma science?
K- She says, what is love, peace. And then says, "much love." It depends what you understand of the love, .. and the peace. When you receive equal amount as what you give, or what you expect to receive for what you give, (2:42). you're at peace. So balance between the lover and the loved one, in being happy in what you receive ..

So the peace is the terminology in the expectation of the man in what he gives, to what he receives. Or you give unconditionally.

Any other question.

Q; .. proposing to do experiment with Gans balls ..
K
Q: 2 balls with H, and 1 ball with O Gans ..

So is it possible through the imitation of the molecular structure, (2:44). to create some of the characteristics of molecules through Gans balls.?
K- It is but how do you make your balls and how do you make the Gans of O,

(2:46).

Any other question?

Q: … in trying to interact with the Creator, or different levels with U or universes, does this correspond to the different matters within us (2:48). the Principle matter, and transition matter ?
K- Can you repeat that again. …
Q: …
K- Partially yes, because we feel at this matter that we are in. We are not in a matter state. Life of man in a physical D is not in a matter state.
we are in a plasmatic state, (2:50). what we call dynamic condition,

the nearest thing in life of man to matter state is bone, which is Ca, but the rest, even that Ca has life…

Any other question.
(2:52).

I don't do anything on the 13th …

They killed the last king .. on the 13th of Narus, which is tomorrow, and we have seen as a bad day in culture of Iran. For that
(2:54).

Any other question?

Q: Rafael, it's a question from a KS to Mr. Keshe.

Maybe the Iranian scientist can test this and prove the truth to the world?
K- This is what happens in reality. We drain the energy of it. You see what I explained in previous teaching . You have the cell and what you call the virus

(2:58).

Next question.

Q: Is Mr. Keshe wearing a Tang suit ?
K- (3:00).
It's a mixture of 2 cultures.

WL:
K-
R: Getting back to the question about the virus under the microscope. (3:02). Would the scientists be able to see the disappearance of the material aspect of the virus under an electron microscope would it actually disappear physically?
K- It diminishes, but doesn't disappear. There is a big difference between diminishing and disappearing. It's what you do in vaccination. This is a vaccination in plasma T, if you want to call it. The in the science of plasma we never destroy and kill anything.

We had a lot questions by the health people

We are observing people who went through Corona, they all becoming very peaceful.
(3:04).
Any other question.

Q: CH3.. is it still true about using CH3 .. will

K- We advise the CH3 not to be used as the H is a common denominator energy free, and the virus could use in process .

(3:06).

(3:14).

K- It's to do with the Internet not us .

(3:16).

(3:20).

Mankind will come out of this experience in a very beautiful way, but it needs to be told, to be shown the beauty of it, then trying to create the mayhem they do today. When I hear that the governments are going for a lock down, (3:22). it's a criminal offense because they don't let the STM to interact with the energy packs to decide itself. They are not locking you down in your house, they are locking you away from elevation of the soul, interaction in the fields.

Any other question (3:24).

I think you have had enough shock for today.

Mexico factory is coming into operation Mexico is different then the rest of the KF. We own a majority shareholder in Markray, and Markray owns a company called KF US, which owns the Mexican operation, even though we start investing in Mexico it goes through the Markray corporation of the KF, as we are 90 odd % shareholder.
When we opened the Markray, Trump put pressure on the authorities to stop this T to expand rapidly .. shows the power of this

(3:26).

(3:28).

I hope that

R; 374 KSW

(:10). ..

Scientists Not Understanding - Fantasized Names

This is interesting what we have started in the past few weeks, how many of you have started to understand slowly the process of creation. In the past due to the lack of understanding of the creation and now M fields are created, and where they come from. Many of us, always guessed, especially those who called themselves scientists. They came out with the names, fantasy ideas and in not seeing it, but one elaborating on the work of the other, they made it very real. In so many ways, in the world of nuclear they start speaking about Quarks, Up-Quarks, Down-quarks and everything else. (:12). But in essence these were all dreams, these were all something fantasized then the other followed. They created more names as they could not understand. As I was talking to the people who are teachers … the structure within the Pl of a neutron, electron, proton, every single atom within the cell .. cannot be any different then the structure of the universal bodies, this be it solar systems, galaxies, universes, and the rest. One of the biggest problems for the world of science today, is to understand the totality, to understand what actually is going on. Where do these fields come in and how these fields once created hold on to themselves. In a way, how a cluster is created, and how the boundary of these clusters create position, field strength and the rest, in respect to the others.

Plasma Like Egg Yoke - How to Break Barrier to Interact with Inside

In so many ways, mankind needs to understand more in the detail structure in the full understanding of the process of creation. (:14). Many times we consider that the strength is more within than from outside, but in interaction of the fields of the M and G fields of the U, this becomes something totally opposite to what we have been taught. What does this mean? In the world of physics, we can look at the structure, something we can hold, we can define everything within it, like an egg. You have a yoke in the center and you have the white. It's as its own element, but at certain points you have the shell, which

creates a resistance or a barrier to whatever outside, could be. How does this barrier get created, and how does it stand the field forces outside? How do we break into it, and break the barrier and be able to interact with the fields inside as much as with the fields outside.

Simple Way to Understand; G = Pressure; M = Vacuum

In so many ways, we have made a very big misunderstanding again of the field forces. We call it M or we call it G, let's change the M to pressure, .. (:16). Sorry, let's call the G the pressure, and M the vacuum, the sucking out the energy, or puling out of the fields. We find out that there is no difference. And in a way, for those of you who want to understand more, and find a comparison between the physics and the plasma, it will be easier to understand, that if you call the pressure, gravity, you find a lot of similarity. The world of science becomes very different. The world of understanding the creation becomes any different. .. what we call the pressure or the gravity, is one pushed out, and enforced on, where gravity pulls in, and forces in.

Breaking into the Plasma

At a point when G field forces, and in a matter state pressure, become equal, or gravity field forces within the structure stand the pressure, but cannot stand the what we call, the vacuum or extraction, then we find the breech, then we find one gives up, and the other one breaks through. The same is true in the world of creation of M fields, which this means, we have to find out the ways, M field strength pressures, (:18). that we can break into the Pl, that we can spread the Pl, or create a condition outside the Pl, that by pulling it, or creating a vacuum of the field forces, be able to create separation, or division of the cell of the Pl.

In the present world of Pl technologies this has not been understood fully yet. In a way, the Pl physicist, nuclear physicist are in a dilemma, where they see things but they can't define it. They observe changes in condition of the Pl, but they do not know how to handle it, and as we have seen in nuclear industry, we use the field forces, we call it neutron to be split by other objects. And it splits but we this happens naturally in the neutron itself, and it divides itself into an electron and proton, as we taught last time.

The world of Pl T, nuclear, and the present physics come to be one when they understand the totality. It's just again, different condition of the strength field. In so many ways, every man, every child, then can understand the process of what we call Pl T, the process of creation. Because to every single person, (:20). the world of creation is something which moves, .. which is there, we can see, but the true world of creation is in fields, that we cannot see. They come together in a very hidden way, and in respect to the field strength outside, they gather and they create the condition of the manifestation, or exertion of their field forces or their strength on their environment. I have tried for many years to find a way to be able to make the world of physics and Pl T, in a simple way that everyone can understand, that in the depth of U, as a traveler of U, we can converse. We can understand the changes and where one leads to the other.

Point when Matter > Plasma ; Decides Volume of Plasma

The biggest problem in the world of Pl T and present physics, is that we do not, we have not established the point of conversion. At what point the plasma becomes matter, and at what point matter becomes plasma. Or as we call plasma a collection of M fields, with common denominator strength value. Because that common strength value, denomination is what decides the size and volume of a Pl.

Every Electron & Proton in our Universe has Specific Bandwidth of Energy

It's not coincidental, it's not by accident that every electron in the U, in our U has a specific bandwidth of energy, a volume, and at the same time, (:22). its proton has the same strength and volume. What dictates this, what field forces dictates the size of the Pl? This is what we need to understand. **This is what most of the teaching will be about**.

Process to Expand STM beyond Body - Encompass It

Today we go in a soft way, but to the edge of science of man. We try to breakthrough, that mankind understands this process. As KS if you cannot understand the process of the size and the volume of the Pl, there is no way you can expand the size of the STM, to expand beyond the physical boundary of the man's body. And this is what will come very clear in the coming times of teaching. We know a neutron splits into an electron and a proton, but how can, and what does, dictate this separation, at what point the split comes, In that process, can the proton extend its strength that it covers the electron and brings it to be within?

Inter-Atomic Fusion

This is the process what we call, interfusion, inter-atomic fusion. I have written a paper about this, which is published. In a way, in inter-atomic fusion, where the soul of the body of the man extends itself in strength that within it, covers the physicality of the man, because the physicality of the man itself is an electron. It shows itself because the proton, or the center, the STM does not allow the expansion, (:24). (lost sound ..)

.. in the center of the brain of the man, we consider to be the electron, to be very little one.

Discrepancy in Transfer of Knowledge - Upside Down

But if you look there is a discrepancy of transfer of knowledge, in understanding of the knowledge. In the world of atomic physics we see a proton serene, and the electron moving. In the world of creation when the Pl and the matter comes, the matter moves, the proton as the look of it moves, but in fact, the proton sits in the center. **It's the electron,**

the physicality, or is the physicality the proton? That it has encapsulated the STM, which is the actual, the truth of it? This is where mankind will have a problem in the coming time in depth of space to convert from the STM to the physicality. At the same time changing the physicality to the STM in dimension (D) of field forces, but separately operating within each other.

Powerful STM Encapsulated by Weak Physicality - Why

Part of the teaching of today and in the coming time is to explain, that how come when it comes to the matter state of the manifestation, the what we call, (:26). the electron becomes stationary, which is the physicality of it. But in being able to physically move, but the STM which is the proton, again becomes stationary, but controls everything. In a way, it's a inside out, compared to the atomic physics. In the atomic physics we look at the atom, proton is serene in the center, the electron moves. In the combination of the Gans Pl T, which is the body of the man, in manifestation with the fields outside, which is the physicality existence of this planet, which is its fields, the STM which is the most powerful one, and the real center of what we call, the existence, becomes stationary, and accepts position within the center of the brain of the man.

Man will Keep STM - Change Physicality's

One of the biggest problem is to understand the separation part, in how we can change the environment, in the M field strength, not in the matter state, that we allow this serene proton in the center of the brain of the man, be able to expand, maybe to the boundary of the electron itself, which is the body of the man, or beyond. This is why in the coming time when man travels the depth of the U, will find itself with one soul, consistently, but different physicality's, as the physicality is the response of that electron in respect to the environment, (:28). where the soul consistently is protected within it.

Why Some will Stay Behind - Walk away from Knowledge

This will bring mankind to 2 points in the future of the space T, man will have the fear to understand the process of the expansion of the U, and the same with his soul, in a M field strength, or man will walk away from the whole understanding of the process of the creation, as he cannot comprehend the whole process. This is why some of us in the time of the space travel will stay behind, and some of us will move to the D and direction of being able to expand the STM beyond the physicality, and due to its strength protect it, and then we become the true travelers. Those who go through this phase will need no ?? flying, they can travel in the D of U, and in that process they can travel with no limitation. Those of us who cannot go through the transition will choose the physical means, UFO's, spaceships and everything else you call it.

Your Child Can Do it - But You Cannot

This process will effect mankind deeply, your child can do, you can't. Your grandchild can do, you can't. Then it will bring a new ways of understanding, and need to understand

why some of us can and some of us can't. Some of us can expand the D of the STM beyond the physicality, (:30). or be able to bring the D of the STM to the boundaries of the physicality.

New Plasma System to Extend STM

In the coming time KF will introduce a new plasma detection or manifestation system, where you can stand in front of the system, and in a way, by training and absorbing energies within the boundary of the system to be able to expand your soul for the energy of the center of the body of the man beyond the physicality where you shall not see anymore, but to you on the vision of the physicality of the man, you see lights. In a way, your physicality still can exist within the boundary of the plasma of the proton of the STM, and will not see anything ?? by light.

Point of Death - You See the Light of your Own Soul

In so many ways, we see this at the point of death. This is the point where many people who reach this point, will come to understand they see the light. They see the light of the soul of themselves, not something outside, because when the physicality in the D of the dynamic M fields stops, the soul, the proton can expand. In a way, the physicality becomes irrelevant. Now we understand why up to now, we could not explain this fully. Because we see the light, many of us, we go through this ?? through this position, as still there are fields within the line of the physical vision of the man, through his nervous system, we'll see the interaction, expansion of the field of the STM, (:32). in spanning out, by ?? interaction of the fields, like the way we see the interaction of the fields of the sun and the earth, creating the light, blinds the man with the light.

Keeping Physicality Still Alive - with Field Strength of the STM

At that point if we could bring the M field of what we call the D of the physicality, which is the blood circulation under control, then we can keep the physicality still alive, but allowing the soul to extend. Then we come to understand a new phenomenon, how do we control the strength of the fields of the blood of the man, that allows the physicality to be encapsulated with the field strength of the STM. Or at the same time being able to communicate between the two, where we can allow, the drop, in common denominator field strength between the STP and the STM, that allows the soul to expand symmetrically, not directionally or as a streamline.

Soul gets out - Dream; Light is Interaction STM with STP not Creator

In a way, when we find a weakness in this process our soul finds a path to outside, we call it a dream, but now the whole understanding comes. How does the man in the ?? D of physicality learns to allow the soul to extend beyond it, but still be aware that in that position, he shall not see anything but the light, and that light is the interaction, (:34). of the STP with the STM himself, not the Creator.

In that point there is no point of physical emotion touch, because every cell of the man has become part of the physical structure of the Pl of the physicality, or what we call, in the Gans state. Then there is a need for awareness that where, still what we call, the structure of the communication and interface, in the physical D we call it a brain, can move outside than within, but it can communicate with the STM, and in that point when the soul sees the right place, the right condition, can revert back to the D of physicality and take its position in the center of what we call, control interactions between the STP to create the D of the physical man irrespective of the position, time and the place.

In the world of science this cannot be done. But you as KS can start. In the coming days KF is going through this test, as part of the transmutation and transportation of the KF, within the next few hours and days we will be testing this. Where we allow the what we call, transmutation and transportation not only to be in the essence of the physical movement, but allowing the expansion of the STM within the new environment we create. The understanding for the man is, (:36). how he will be able to go through the transmutation.

In so many ways, how can we go from the Pl, expanding it to cover the physicality, but at the same time, be able to do the reverse. In a way, if you understand the totality of the creation, it's very simple, how do I move you from one to another, and when the time comes right, and when the whole process is in the protection of the cell, I can go back to what it was. Where the physicality takes the D and the soul goes back to be in its position. The problem you will have, is this chap (Book 2), the speed that you can transmute between the two (Book 1 and Book 3). Our children which are created from the STM will do this very simple. But those of us who are created in the D of physicality, this transmutation, this speed of what you call, light, but in fact the transmutation of the cell to the matter, and the matter to the cell, as a Pl will become the cornerstone of the future work.

In so many ways, mankind has to understand, mankind has no choice but to understand, (:38). this process. The biggest problem for mankind is when the 3 (Books) become 1. This is what you'll have a problem with. In so many ways, on one side you have the soul, going through the light you become the matter. But in what speed you transmute, and would the effect of physicality, in the matter state of the point destination absorption, will be dictated by the Pl of the STM, in interaction with its environment, or primarily the STP with its environment.

(proofed >>>

In a way, if you understand this, it becomes a very simple game to play. The simplicity comes in a very funny way. Because what's going to happen is, you can dictate in what shape you want to manifest yourself in the D, in the new environment, which you have manifested yourself. A neutron splits in a very fast way, and goes through the process, but in that process it looses part of it, what we call electron, to keep its balance. But can we do the same with the STM, expanding the soul to a new D, but breaking away from the field forces of the creation, (:40). in the point of interaction of manifestation. In a

process of understanding the field of the creation, mankind will have to understand this process. The way we change clothes when we go from the warm to cold, or we go from cold to warm, we have to learn the same process, how, which fields we need not to overdo, but to be just enough in respect to the environment of its presence. In so many ways, I can explain this in a very simple way. If we get, or we consider this body (cabinet with books on it) as the new environment, this is where we are, as we live. In the transmutation and transportation of the fields of the U we manage to do one thing, and that is, we manage to move the soul into a new position (move Book 3 to table). But how do we carry the physicality (Book 1) into the new environment? This is 1 G (cabinet), this (table) is 20 G. But the soul has reached the point. How is it going to manifest itself in a physical D? Does it need to, or will the matter when it appears in the matter state (moves Book 1 to table), or the field forces of the new environment forces the man to appear as a light (moves Book 2 to table), because this is the only way it sees itself in being able to exist in the new environment. (:42). But we do this in the sleep, we allow the soul to travel, but have a hold on the D of physicality. The biggest problem for mankind will come when you come back as a soul (moves Book 3 back to cabinet), to the old, back to earth. Would you have the same physicality? Would I recognize you as the man who left with the original feature, or shall I have a new face? Would my children recognize me as the father who was, or be a new face, they would have to get used to. But again goes in the same thing, in what speed of light? Or would I manifest myself as a light in the new D.

The most important part for most of you KS is the hypocrisy to see this, to believe it. But the hypocrisy comes, that we dream about the father, even he is not here, but you recognize the soul, and the field of the soul, even the father is dead. With this process we try to mismatch the fitting of physicality, and the Pl of life, and the STM and it doesn't fit. This is why many KS, I want to se the soul of myself, then I believe it. (:44). I have a simple answer for you. Even the Creator hasn't seen Himself, as He is manifested in the D of the STM. We have to understand this process. We have no option. Those of you who want to be able to see your soul, you'll wait for a very long time, because as I said, even the Creator has not seen Himself in the D of the soul. Because it's impossibility.

You will see this will be the biggest armament for many of you who become the traveler of the space, as you will appear in the D of the physicality or light, but .. you shall never see the STM. Unless some of you become very clever and create a mirror for the soul. This is the hypocrisy that many of you will use to confirm your ignorance of existence. Where by the time you close your eyes this expands beyond, and travels to another D, and in so many ways, the father dead, is met and talked to in his environment. You say, I had a dream, I met my father. He is not physically existing, but the soul connected to his soul allows you to see him in the D of physicality, as you remember, even though in the new D he might look like this. (:46). As a flower to the people who are in that D. The field strength of what you call the father is that telephone number you have as a strength of your field in the D of your soul. This process will keep you busy for centuries, for thousands of years if you don't understand it. If you are ignorant still to cover yourself with the D of "when I see it I'll believe it." In a way, wait, the Creator has been waiting for the beginning of the time of the creation, and that's why He created us, to confirm the

love of His existence. As it is the only way that He can manifest Himself to confirm His own existence. In so many ways, as I said,.. if you read these 3 Books, and understand its essence, its word by word, a mixture of the 2 or 3, then you understand the true meaning of the creation. Everything mankind needs to know to become the travelers fo the space in the level of the physicality or the soul are in these 3 books. It's how you understand it according to your intellect, and according to your prejudices more than your intellect. The ignorance of the man will come from his prejudices in doing what he has been told, and what he has been learned.

Yesterday I was talking to the most senior nuclear physicist of a nation. (:48). .. and it brought me to a question. Such a man who heads, as the most senior NP has a dilemma to understand the process of the field transfer. How do we expect an ordinary man on the street to understand. But we see those who become NP in the D of the limits of the knowledge of the physics, they get trapped with this one (Book 1 Matter). If we can show them the light (Book 2) they'll find the soul (Book 3). They find the understanding, then maybe they can translate this to those who have a problem with this. But in reality all of us, do a dream, we feel a dream, we taste the food, we feel the touch of the mother. We remember the caresses of the touch. We remember the colors she wore, the color of the dresses she wears at the present time with us. But we always had a light transfer, transmutation we call, the filter of the brain fo the man, in communication between the two, and this is where all of, not only human race, but all the races in the U, run into problem when they want to see a Pl, when you are within the Pl itself.

Many of you will come to question your integrity, your sanity, when it comes to be able to understand this process. (:50). Because it doesn't fit into what you have been taught. As I said, nuclear physicist tell me, it doesn't fit into what I have been told Mr. Keshe, what I have been trained and I accepted. But now as I said, move on. Move on to inside, don't stay outside. Move into the house and taste the food, smell the odor of inside. Try to understand the new D. In the physical D every thing has to be tangible or visible that we accept it, but in the D of the STM and plasma of the fields of interaction there is no such a thing. You feel the strength of the fields, you feel the D and strength of these fields. How does it centralizes, how is it created. What leads to the creation of it. Rick can you play the first video we showed the one I sent you.

Video of Black Hole -- Water pool

In so many ways, this is a beautiful video, it explains a lot fo things about the world of creation. I was fortunate a few days ago to be in a place where it was in front of me, I could explain, and see the world of creation, the creation of Black hole, the creation of the soul, the creation of how the fields in interaction with the environment bring this position. (:52). Have a look and see this video, it's taken in a waterfall and you'll see the rotation of the fields. You'll see how there is nothing, but as the environment of the flow of the water outside increases, then you see the change. You see the existence. … (plays video) … This is the, if you look how the Black Hole or the field flow comes in, the water comes from different D into this pool shows you how the fields change, and how rapidly out of nowhere, a field flow creates that Black Hole (can see the black circle,

on the side near the drain) Scientists for centuries, thousands of years have been waiting. (:54). You see the shadow of the man crossing it (pedestrian passes by). This is the beauty of it if you understand. You see there are 2 or 3 different directions of it under the bricks where the water comes in, and changes the environment. You come to see the field forces, the vortexes of the fields of the water are still there, but as the fields from outside through the inlets of the water to this pool changes, everything changes, and it comes back to itself. Shows the second video, this is the best one. How fields ?? broken up, they gather, they come in, they pull in at the same time (?? audio interrupt) and suddenly the right strength ?? ?? this one. Now you see appears and takes shape. We haven't changed anything. You see how soul moves, but you still see that, now it's a circle. And how we can transmute and transport in so many ways, the fields of the U. We see the creation of the Black Hole and how it's done. If you look at it the direction, and the rotation, it's very much different. This in fact, shows us a lot in how we will manifest ourselves in the new D and in the new environment. The change of the environment comes from the flow of the water, (:56). inside from different directions. But the structure within which is the soul has still got its strength, you still see the fields flowing. Then when it comes to the point, the soul takes over. It shows the field flow D. As Pl physicist, as a nuclear physicist, this confirms even the first paper I wrote, the creation of the Black Hole. Fields coming out, as much as they go in, and going in, in every D, it's the environment which creates different shadows. … This is what Rick has found (photo of Black Hole) it's been released by the scientific world as the latest picture of a Black Hole. You see the same fields. You see the arrows on the strings of the field forces into the center. But the most important thing for us is what are those gaps which show us the fields? Are those gaps where the fields are of a different strength? Or are those gaps where the fields come out of the source, at a higher strength, and a narrow field.

In so many ways, if you put the 2 pictures next to each other you will see and understand the total new concept about the STM. How we can extend the STM beyond the limitation. How we can bring the total understanding to this process. It's the environment to this pool, (:58). the way the waters come in, changing the D and the strength, which changes the manifestation of the physicality in the shape of the Black Hole. In so many ways, mankind needs to understand this process, how do you strengthen the size of the soul to become bigger, to overcome the physicality and cover the physicality with it? In so many ways, we have reached this point, and we have to understand this point, we have to comprehend the totality to be able to transmute between the STM to the physicality, irrespective of position, in the space where the two interaction, communicate, the two become one that it says, "here is a danger, I am going in, you take over." Where what we will see is only the light. In a way, the two interact that only one manifests itself. .. In a way that what we see is, we only see the light, the physicality comes in-between and the soul becomes in the center, and when the position is right, when the field strength is right, when the communication between the 2 parts become 1 field, to say, manifest, (1:00). we play the game back. Where the ?? light become fading in the background, and physicality becomes the manifestation. The Prophet of God have reached this point. And those of mankind who become pure in soul, understanding the process of what we call, balance and unity, will reach this point. Many of us, the only thing, if we are lucky to see, is the light, where the demise of the physicality has taken over, and only the STM exists. This

is the point that many of you will fail. That you become the light without the D of physicality, because you left the physicality behind in the world of the matter state fo the earth. This is what it comes, the next step. This is how we have to understand the total process. In so many ways, when you even this (Book 3 Soul) out of the way, you become the light, and in this process you become the Creator. So there is not much difference to go from being STM D of the physicality, to become the light. As I said many years ago, I am the light. Because this is how we see the expansion of the creation, and the dominion of the Creator. In so many ways, (1:02). we become part of the totality. In so many ways, mankind has 2 choices, which way would you like to sit, from my point of view, or your point of view? Would you like to sit in the D of physicality, or do you want to sit in the D of the soul. This is what many of you start running into problem with, where do you want to be, and how do you want to be seen in the D of creation. Even the books have a problem in trying to find out what they want to be. So where do we go, and how do we teach you to be able to transmute in all 3 dimensions. How will you assess this? As I said, Many of you who are foolish, will have a barrier to move forward, and that is, "I believe it when I see my soul." I accept it when I see my soul, stay in the dilemma and doldrums of ?? and what one day you'll only be aware of the existence of the soul, as your conduct has decided its position and the place. As we have seen, (1:04). in interaction with the field of the environment. Many of you will breakthrough the light, and in that process .. will come to understand one reality, that we all end up in one dominion or the other. In interaction of the fields of the environment, which will dictate our manifestation, will dictate our possession and our position. We possess none except the fields which we have interacted and we will create the condition of the position when the balanced fields of the soul in respect to its environment takes hold. .. we are a physical manifestation of the present time, is due to the interaction of the fields of the soul with the interaction of the field of the environment of the earth. Where you don't carry the physicality, where is the dominion and the transmutation of the STM. Where would you end up, in what condition, even on earth would you be able to manifest yourself. In the coming time and through the fields and interaction of the fields and in understanding of the process of the creation, and the tools which we'll provide for you to be able to see this (soul) without the loss of this (Body). But that process will become very difficult for many of you, that you will deny your own existence, (1:06). because how can you be aware of the physical existence when your soul is not within the structure of the physicality of the body of the man.

In so many ways, goes back to what I said many years ago, as we understand this process fully, you give me a skull of the man, I will create that man for you. maybe now you understand why. As the strength of the field fo the STM, in respect to his behavior and D of live, will create that skull, that physicality. Once you give me the skull, I have the cage to imprison the soul. Then in time mankind will understand how the whole structure of the creation in the U has taken different shape and dimensions. The best place to start with is to be the light, because then you can choose each D. The light means to be the fields and nothing else. The light it means to be the Pl of the fields of the creation that in interaction with its environment leads to creation of the physicality, or creation of the STM. This is where the theology and the world of science meet, and for those of you who understand this process, (1:08). will have a field .. will be a most beautiful time. Where especially with your children, in the D of the soul, you shall never see the physicality, but

you confirm their existence, through the interaction of their fields and the emotion they create as light within . In so many ways, you can make what we call, the lover in any shape or D, in the dominion as your soul fits to be happy to be in, in that D and direction. Mankind is going through a transition of knowledge exchange. Mankind is going through a condition in understanding the 2 sciences of creation and the physicality. In so many ways, as mankind has been so physical, mankind has problems in comprehending the totality. Many of you will deny your Creator, because this way you justify your meager existence. And many of you will take the path to the Creator, and by the beauty of the?? is to create by your soul, you'll come to accept the totality of the existence and the creation of the Creator. We make the canvas, it's you who paints the picture. We make available the beauty of the creation, (1:10). it's you who has to enjoy the beauty of his creator. In so many ways, in the condition as you saw in that pool as the water flow changed, the soul changed, but in essence it's the same soul, we will create the conditions for you to see yourself in different D of physicality but within one environment. As I said, I will show you one Drop, in one water tank, and that drop will become a fish, or a man, by predetermining what it will be, the environment of that water. Don't forget the man grows in the womb of the mother in the water from the beginning. Would we be able to show your own physicality in that tank in the D, that way that you were in the womb of the mother. And then you'll take shape in the way that you fields ?? correct in that environment.

In so many ways, in the future time mankind will be able to take his soul in that fish tank, and depending on the temperature, and the field forces, not the tank filled with water, but the tank filled with different field strengths, the pooling of the fields, and the pool of water then you will see how your soul in interaction with the environment will manifest itself in the D of physicality. .. we can create the atmosphere, pressure what we call, (1:12). M and plasmatic fields of the ?? and you will see how you will manifest yourself on Mars. Then when we go to Mars, do we look, for a man with 2 legs, or do we find out the life on Mars is in the shape of ?? we become witness to it. In so many ways, mankind will have a fingerprint of his own soul, but in essence different fingers, In so many ways, different papers that ?? ??

Today's teaching and the teachings to come works in that direction … It's awareness of the creation, and the Creator. become the essential part of what we call the existence of the man on this planet and beyond. We can create EU,

(1:14).

(1:16).

(1:34). that interaction with your own soul will become one, and would there be a D of physicality for you to exist in? You have to understand you cannot prejudice, you cannot be prejudice at all. If you mix a dough with a measure, a certain amount of flour, and exact amount of butter, salt and sugar, you always more or less consistently get the same. This time the dough is the field of the existence of your existence, and we give you the dough, all the ingredients, would you dare to mix it to see your soul, and then would you be able to see it as you become part of it. you bring your own self to D of no physicality.

In so many ways, mankind is reaching the point that you can become that point, you can become the center of life, you can become a soul. Part of the ?? soul, in a way, to become part of the Creator, as we saw with the water. As it flowed in, and it came back out. it created a different mirage of the physicality. Many of you will have problem with this. Many of you will commit suicide in the D of the soul, as you will not accept in the D of physicality. When you call it a suicide, it's not to take life. It's in a way not to accept the condition of the field forces which leads to your creation, D of physicality. Maybe today's teaching is too deep for many of you to understand. Maybe today's teaching, (1:36). opens many of you, your eyes or your intellect to understand the process of the creation. Maybe this is, to introduce to you, the new way of teaching, not with the machines, but how you control with the strength of your physicality, within the STP, to allow the STM to extend beyond. To become that proton ?? ?? the electron covering the proton. .. when we look at the nuclear physics, and we see that tiny spot rotating around the proton, if we increase its speed, if we increase the virjility of confirmation in interaction with the field of the central proton, we become so fast that it creates a light around the proton, even the proton is inside. And that light in the D of we accepting it, becomes us in the physical D.

This is what it is, and this is how the physicality takes over and hides the STM within it in the D of physicality. We create too many souls, we create too many miniature souls, we call it the cells, but in their souls blind us to see the proton inside. We camouflage it, because we interact with the fields of this planet, and in a way we collaborate to hide the soul in the D of the physicality. Because if you look at the structure of the body of the man, it's a collection of the fields, collection of the souls, that these souls are so densely packed that they have managed to hide, (1:38). the STM itself within it, which is the more powerful. Go back to the teaching of last week, where I said in a very simple way, where I drew what I call, the electron and the proton, .. the cluster of cells and I explained the position of electrons, and I said the furthest is connected to the center, one which is more in the center. now you understand how your physicality has taken these neutron, these cell centers to cover the totality of the STM, as we have created so many of them around the soul itself (draws the body outline with dots) that it has covered the man, D of physicality, but in essence the STM, the creator, is with the center. We have in a way, glued it with the field forces of the environment to create and manifest little things to blind ourselves to the D of his existence in the center fo the body of the man. How can we reverse the position that in one interaction, one process, the STM can expand beyond the boundary and cover the STM, the physicality of the man, and in that process still exit. But the biggest question is, would it have this shape within the STM. Or it become one waking ??? or manifested in the future environments ?? this. (1:40). This is part of what many of you will have a dilemma with. In that process you'll understand the totality.

What would be the future of mankind, and the soul of the mankind? Would we ?? beget children from the soul, then the physicality. and allow them to take D and love them the same. We know the process, it's for the man to accept. It's for the man to accept the physicality is not necessarily the existence of the soul. If you understand this, maybe you ask one more question, and that is, have we become so ignorant and so arrogant that want to see the soul of the Creator that confirms the existence of us. Are we humble enough to become that electron, that by creation of totality ?? of the fields, become those cells which we have covered the soul of the creator, with , and that's where it exists within us. In the center of our existence.

As I said, as a nuclear physicist, as a man who has been at the depth of the knowledge fo creation life becomes very simple, .. very understanding, but as I said we have a time we have to pass in the D of physicality. In so many ways, it's a change of the clothes. In the coming time, (1:42). it will be the change of the strength of the cells of the man, that man needs no physical clothes, and then we'll dictate the manifestation, and then would we all shine like the lights. This is how it will come to be, and mankind will become slowly mature to this point.

I hope that we all understand this position, and sooner or later we stop asking this question, "when I see my soul I believe it." This is the worse thing, behavior, that I can fool you as long as you cannot see what you believe in. This has to end. In a way, ask yourself one question, why my soul has brought me to this point and what is the purpose of my life. To deliver, to be the provider, to be the pone who sustains the environment of the fields of the U for it to exist. In any case mankind has a lot of work to do. A lot of understanding, and a lot of what we call, soul searching. But remember one thing, goes back to the beginning of the teaching of today in many ways. You have to be able to control the strength of the field of the STP through the operation of the physical D to be able to manifest the STM, or to become aware to see the light of the existence. In so many ways, you don't need to go to a trance, but in so many ways, you need to understand the strength of the field of your own creation. I wonder how many of you, (1:44). understood the teaching of today. Many of you will change the course of your life because you understood the truth. Which one you want to make, the Pl Soul of the Creator, to the STP in the D of the Soul of the Creator to the D of the STP, and what kind of life you create in both dimensions. Would it be like the ?? flood of man which one goes out is brighter. and one is consumed comes back ?? ?? Is that the behavior of the conversion of the fields to the D of physicality in the world of the creation for the man too. Which ?? way shines brighter ?? and what we'll do with that ?? give light to the others in the D of physicality. Today's teaching is very heavy if you understand it, and it's very light if you understood, but in time many ?? on this planet and beyond will understand today's teaching. and it will become a path for them to find a solution and salvation for the operation of their souls in the D of the creation. We'll go to a break and come back and I hope the questions we get are more mature in the D of STM, not about the Gans's and ??? It's time to mature and extend the knowledge beyond the D of physicality and this is what the purpose of the teachings ??? (1:46).

>>> **BREAK** (1:50).

K- Welcome back to the second part ..
Are there any questions.

Q: … in our existence at the soul level, is our confirmation of existence, (1:52). at the emotional level, is that our ?? experience?
K- Could be partly. But in a way, emotion is where we get the confirmation of the interaction between the STP and the STM. But the question for many of us that rises, is that Do I feel the emotion as the STP, or through the interaction of the STP and the STM, or do I feel the reaction within the soul of, because as I said, I made man in the image of myself. So there is an emotion inside the STM that manifests itself in the physicality of the man too. But we to become aware of which one. .. which emotion. As I said in the teaching before, it gives you many new questions that in the D of physicality doesn't exist. In the D of physicality it's impossible to exist because the field strength doesn't exist in that level, in the matter state, even though we are in a Gans state within. .. we can explain it in a simple way, which is, this is the STM this is the physicality .. this is the matter state where the confirms existence. (1:54). Is ?? physicality a transition time? Where this is the source and this is the matter state. then it comes to understand in which strength does the man interact, and on which point the physicality manifests itself. This will be a part of the answer we have to have if we become the travelers of the space, because this environment dictates the position of the soul in the matter state, and the time of the transition from the soul to the physicality. And then you have to ask is the emotion here, or it's in this one. Because we feel the emotion of the soul in a different way. It's instantaneous, it does not wait, it responds immediately and you become aware of. In so many ways, the closer you become to the soul, the closer instantaneous becomes the interaction and response.
Any other question?
Q: So in a way, .. the emotions you are speaking of we may have never experienced in our physicality? It's going to come down to our trust, (1:56). or acceptance of these new experiences that we have?
K- Possibly. Most probably yes. Possibly maybe. in the D of physicality of the emotions, and the strength of the emotions is very much different then the emotion in the strength of the STM. In time we come to understand that, much easier in the coming time as we get more and more familiar with our own ?? strength.
Any other question.

Q: Mr. Keshe how are you my friend?
K- It's nice to see, I am still alive.
Q: I did experiment .. I manifested little sparkles in-between a funnel, and when I took my balls away it manifested into an actual thing. So you could see the funnel, you could see the sparks run within it, but when I took my empty balls away it manifested into Carbon or some sort of C, (1:58). it's not attracted to a magnet. Isn't' this what you are talking about? .. what you were talking about before with your book 1, 2 , 3, because everything that I understand is in pages 19 to 21 of book 1.

K- So you have a lot of pages to read.
Q: I do. This is the beauty of it. .. when you see loads of little sparkles going up the funnels, when is a good time to tap into it ..
K- I don't understand exactly what you are talking about unless you can show us some pictures.
Q: Rick has a picture of it. .. but one has to understand when I took away the 3 carriers ..
K- If you create energies or fields in motion, (2:00). you can bring them to the point that in respect to the environment they can interact, and release or become in unisons, partially with the environmental field forces, they lead to creation of matter. So the sparks you speak about, if it is there, and then it becomes like a C or whatever, this means that you have managed to transfer energy fields in interaction with the fields of the environment in the matter state. This is partially what we do in the EU, but we have a control over it what material we create and how to be created. .. if .. in the coming of time you will see it … if you go to let's say Moon, and you want to produce gold but you don't have the strength fields, because you lost the information somewhere, you can transmit for you from earth to Moon that you, that in interaction with our fields transfer to you instantaneously, you can produce that material. Because you can create that material, it's the line of interaction and

(2:02).

You can all do this ..

(2:04).
Any other question.

Q; The amount of salt in the reactors influence the Gans what is the reason for the amount of salt in the Cup of Life, (2:06).
What is the role of the salt to reactor ratio to produce Gans?
K- The salt is the balancer, it's what dictates the environment allows to be created in the water. .. when .. you are looking at the whole thing, maybe as a KS the wrong way. You have a container you put your water in. You have your Nano material, and you have your Cup, then you have the residues of salt, whatever it is, any kind of slat. These salts here are not in the matter state anymore, they are in the environment of the M fields of N material, so the behavior is not a salt, it's creating G field centers that in the interaction with the balance of the fields of the two plates leads to creation of .. manifestation of nucleuses, we call the Gans's. The absorption of what we call different salts or acidic conditions, (2:08). which is again, an alkaline bases of a weaker strength of a higher strength, if you look at. Then you find out that the salts, .. are not in a M field condition, they are in a normal condition, they are in a M field condition, because .. when you look at the structure, you put .. but in fact what you have is this, combination of the fields. The balance of it, because the Cl here interacts with the H and the water, and creates acidic condition. It's not all pure alkaline, or creation of G. When the field balances between all this.. is left, .. what you get, the CO2. which the 2 itself comes from the interaction of the fields of the water, where a NaCl itself, has separated Cl-H which has taken the Chlor

with the H, to make it the CO2 release. But these are all in a field strength, not in a matter state strength. This is what most of the KS don't understand and they look at it, it is alkaline, yes. We create an alkaline condition, but because you are in a water environment you always lead to creation of CO2 through the process where the freedom of the O comes in interaction the Chlor with the H (2:10). in the water.

(2:14).

Pain Pen - Number of Turns in Coil, and Thickness of Nano Coat

Q; Brazilian. .. Rafael to translate. (2:16).
It's about the teaching you gave us about the Pain Pen. It was said a long time ago, that the number of turns you had in your coils, to make the Pain Pen, and the diameter change the behavior of the Pen. A lot of people are making this, and maybe not doing it correctly because they don't know about this change. He would like to know more about this, if the diameter and the turns of the coils can make a change in the effectiveness in the Pain Pen, (2:18). and what is this change that can happen by the diameter and the (number of) turns?
K- The thicker diameter gives you more, what we call Nano coated area, more powerful fields, or more surface in interaction of the fields. The turns, gives you more combination of the fields available. When you look at the coil, or you look at the coil in a different way (draws one PP with 3 turns, and one with 6 turns). This coil (3 turns) has less Nano field area than this one (6 turns) due to the surface area. But this one (3 turns) has less combination of fields interacting with each other, where here (6 turns) you have more combination of fields. So here (3 turns) you have possibly 2, and here (6 turns) you have 4 combinations of fields, because here (3 turns) it's only this with this (2 combos), where here it is this with this, through this (4 combos). Or this (on the 6 turns) with this, minus this one and this one. Or you have a field which could be these 3. Where this one balances out. So when you have more turns each one of these is different MG field strength, so you can interact with more fields. If you use it for the pain this (3 turns) might be good for the small touch pain, but this (6 turns) will be good, (2:20). for a needle pain or a burn pain. You might not find this (3 turns) working as good in the pain, as does this one (6 turns), because the pain of a burn is a multitude layers, or more cells. That's all the difference is. With this one (6 turns) you create more surface (area) extending the power.
Next question.

Cold Fusion confusion - Plasma Totally Different then Present Science

Q: .. When Mr. Keshe refers to field strengths of specific elements, is that what others call, the resonance frequency and vibration?
K- Can you repeat that?
Q: So for specific elements their field strengths, when you are talking about transmuting them, or producing them in the electrolysis, cold fusion reaction, (2:22). is it ..

K- We don't have any of these. We don't have cold fusion, we are in a different field of knowledge. In a field of KF understanding the work of Pl fusion is a dream which will never come true. So it doesn't exit. You amalgamate fields but you cannot create atomic, what we call fusion as you talk about it, or ?? cataclysm. That's in the world of physics and chemistry. In the world of plasma you decide the portion of the fields, and that portion gives you the material or the condition you want. Totally different ball game. That's all fallacy, and theory which is accepted because they couldn't understand it. Now we understand it, we know fusion is impossible.
Q; So you are talking then about standing waves of fields coming out of plasma, yes?
K- Can you repeat.
Q: So I am not talking fusion as in the nuclear world of fusion, I am referring to what you are saying, of bringing matter out of the Pl field state ..
K- We don't bring matter out of it. We create the condition that interaction of the fields create manifestation. Totally different. That's why we said it's a mist, then you create a condition that it becomes that (rain) drop. The environment, the interaction of the fields of the environment leads to condition of manifestation. (2:24).
Q: … With the space T is it simply astral projection of the consciousness, or do you create a physical plasma field, like a Pl orb a ball lightening for instance?
K- I don't understand, can you explain more.
Q: The plasma T behind the propulsion of your units?
K- We do not propel, we find position. In the Pl T we tune to the field of, the G field of. Propulsion is when you burn something to propel yourself. We don't propel, we find a position in a strength in respect to each other.
Q: That makes absolute sense, thank you. I appreciate that and understand the different dynamic between the two, thank you.
K- In the world of space T, in the past, or up to now, we rely on extending, increasing field forces defined as, creating motion, and we follow Newton's Laws. In the world of Pl we do not have such a position. We follow the strength of the fields, (2:26). and interaction between the fields. This is important to understand. Propulsion is matter state conditions, and matter use, where Pl T and space T is positioning in interaction of fields. There is no such a thing as propulsion in Pl T. Actually, that's what NASA does. NASA has a team working on what we call propulsion plasma reactors, which they are hoping will be ready by 2030 that it propels them to moon within 4 hours. We know the guy who is heading this operation, one of the most frequent travelers, pilot of shuttle technology. He is from South America. And now he has been put to head what we call the propulsion Plasma T of the NASA and when we speak to him, he is very, He says, I am here because they want me to, I haven't a clue what they ?? want to do.

In a way, what you create, why do you need to burn a plasma, you can create a Pl which is the fields and interact, and it attracts you to. Or it .. positions you into M field strength balance in respect to the environment. We are hoping very soon to be able to show a lot of these things, and to be able to see man, to understand it. (2:28). Because when you create these fields, some of these fields interacts with the body of the man and we find positioning in respect to it, and how we do it. When I explained … when the fields travel through the Pl reactors, in interaction with the body of the man, they create a physical interaction. They run like a pulse and they create themselves invisible atmosphere.

I used to do and still do tests sometimes. Some of the KS used to work with us. When they work with these new plasma combinations, they feel changes even in their digestive systems working, or feeling in their stomach. I used to call it a "tickle factor" in Iran, when we used to do a flight test, because when it touches the body, you bend into it. It looks like someone tried to tickle you. We see this quite a lot. The miniature version of this is, if you put your hands in some of the Gans's unit, depending on the Gans combination you feel tingling, you feel that pressure, exchange of the fields of the Gans of the cell of the body of the man, with the Gans's you are working with. This way, you can create a balanced condition.

In the future we'll show you Gans's that, for example, you can put your hand in and you can walk into the snow and pick up the snow, you can walk into the fire and pick up the fire. Because these Gans's in combination with the cell of the body create a field barrier, (2:30). that the heat transfer, or energy in the matter state is impossible. This is in a way, how some of the animals we have seen like shrimps in the depth of the oceans, at 700 or 800 degrees exist, because they live through this principle. We'll show you how to do it, and how you can. In a way, you can get a fireman covered in such a Gans, and let him go inside the fire, building, and bring people out, and at the same time create that protection for them while he is in there. These are the new technologies which merge out of the KF in the coming time. This is not something unusual if a shrimp can live at 700 degrees in depth of the ocean at such a pressure. The knowledge is there, we have to understand it. We have to decipher the field transfer, because the minute we understand that the body of the shrimp is not in the matter state, it's in a Gans state, and the Gans state is in a certain condition, are temperature independent, so life is easy anywhere in the U. I have done this, and in so many ways, it's easy to do.

There is a team … in Iran which are working on a new type of fire detectors they are trying to ?? merge it with the KF T. You don't need a CO2, you just create a M field, plasmatic M field which O cannot exist. You don't need to create a water or blanket. (2:32). You just need to create a plasma condition.

I will be returning to Iran very soon, to work and head Iran space T into deep space. This will be part of the work. We'll have a wonderful time to develop these, because then we can fly into the depth of the earth, through magma, because we understand how to do it. It's the process of change, and the process of bringing a condition that Pl fields accommodate physical temperature, which most of the animals do, and once you understand Gans's are not in the matter state, then it is very easy to handle it. This is how you protect yourself in the space in respect to the cosmic rays. there is a certain amount of cosmic rays without which we cannot live, but there are those which are over the limit which we do not need. We create such a shield.
Any other question.

There is a big problem with the KS, by now most of you should have deciphered the plasmatic fields in the environment of a Gans or plasmatic state, and fields of the matter state. Then it becomes very easy for us.

Any other questions.

The 6th of May teaching, (2:34). will be transferred to 7PM CET, not the normal 9 AM usual time.

(2:48).

Natanz Nuclear Power station "accident"
Phosphorus key in DNA and AA structure
Plasmas convert to other plasmas
Hormones part 1
Strength of STM steps down like power substations - hormones

ENGLISH TRANSCRIPTION

(:10).

Condolences for Natanz Nuclear PS in Iran - Was to be KF center of learning

K- … Today we are deeply saddened, and we offer our condolences to the Iranian nation and Iranian government, and .. leadership. In a horrific accident in past few days, Natanz nuclear power station research center which was to become the center for education for KF in teaching the new space T had been damaged heavily. We have lost a number of people, ad we offer our condolences to Natanz Nuclear power center … for this accident. The causes and how it started is unknown. (:12). And as usual in the KF we see positive things in everything which could be negative. … this accident, this incident can open a new door, can bring a new opportunity for peace in a way that in transferring the knowledge of nuclear industry to public through plasma technology (T), Iranian scientists are devoted to peace, in a way becomes one step further. I offer my condolences to families …

Teaching Starts

How Do We Change Plasmas from Energies to Matter

In so many ways, mankind has to learn what does the nuclear processes mean. What does the process of change of the energy to plasma (Pl) means? (:14). How do we change nuclear interactions, nuclear energies, radiations M fields strength which does not carry particles but fields, Gamma rays, Cosmic rays and above, can be changed into energies of the matter, energies of the fields of plasmas which can bring conditions of life.

Plasmas Convert to other Plasmas - Source of Life

In so many ways, our present knowledge in the present nuclear is very fragile, very thin on the ground. In so many ways, we have not understood the process of conversion, where the fields come together and make a plasma. In the background in KF archives we made a video like this, some time ago .. where the fields come and make a plasma. If you can put that up, please Rick. … This video was made .. by KS. Where we see fields become plasmas, and then these plasmas become a source of life, they become a source of existence.

Rays of Plasmas Interact with other Rays - Create Other Plasmas

In the process of the knowledge, .. in understanding we have referred to the Soul of the Man (STM) to be the sun, to be the center, where radiates fields. Where plasmas becomes fields and transformation and transfer from the center to outside, (:16). in interaction, in contact, and in balancing of fields, it becomes the beauty of the knowledge of the plasma nuclear technology (T). As we see in this video, M fields coming from a source the Creator, coming from the plasma of the sun, coming from the plasma of the STM**, in interacting with each other they lead to creation of another plasma**. They lead to creation of another source. **These 2 rays could be the sperm and the egg**, in an essence, which means creation of the STM.

Conversion of Plasma to Plasma

In so many ways, mankind has to understand in these simple pictures that you see how the **sun, the soul, radiates out and back to itself and you have fields to become the plasma**. This picture is very powerful if you understand it. This is the conversion of the plasma to plasma, and somewhere in the middle, if .. If we understand that somewhere in this process here (in middle from exit to entry), or … here (coming out of exit point).

We Manifest Ourselves in Different Parts of Same Field

If the strength of the fields is as the vision of the man, man will see the matter state. Where in other parts it's not possible. In so many ways, now the totality of the creation is right in front of us. We come from the Sun, we come from the Creator. (:18). We come from the essence of creation, and in the process of the change in the field strength, **we**

manifest ourselves in different structures and in different materials in different parts of the same fields. Then, now we understand, in a very simple way, and that is, we come from, we become ?? in the state of matter, and we go back to.

Life Exists in Both Directions

You look at it always, you come from, and you go back to. **But life exists in both directions, not in one**. As it emerges we go on the G, we go on the M.

Parallel Universes or Existence

In a way, this might answer some of your questions, is there a parallel life, that one exists in parallel with the other in the same position as a mirror. We see these in cosmos. We see a reflection of the galaxies, and we have to realize which galaxy is real and which one is a mirage. Which one is the reality, and which one is the fake. **Is the STM the reality or the fake physicality of the man the reality**? Is the physicality of the man the mirror of the STM that to us in the strength of vision we become visible, we become tangible.

Stars that are Mirages - 3 Suns of Earth

In so many ways, mankind in becoming man of space has to learn this, has to understand this. Go back to early teachings, we spoke about mirage, .. about what we call, (:20) reflection galaxies, suns, where we see one sun and in the horizon of the M fields from another galaxy, we see 3. We see this in the northern hemisphere, part of Russia, part of Canada sometimes. The rise of 3 suns. One is real, the other 2 are the interaction of the fields of the U, from the earth's M fields.

In this way, it comes to one point, where does your soul sit. Is your soul the center, that by interaction of its fields, at one point in transformation back to its source becomes your physicality. Does the physicality rains back on the soul, like the rain does on the surface of the earth, when it reaches a certain point. Is the physicality the position of the boundary of the maximum strength that the STM can radiate, and then through the circulation of the fields of the blood return back to the soul, but in-between we see the emotion. Is this the same when it comes to our Creator, where we come from and in interaction of our emotions and the fields, and circulation of MG fields, we in interaction with the soul of the Creator, we create emotion between us and the Creator.

In world of creation everything is the same - One is a replication of the other

In the world of creation everything is the same. In the world of creation, nothing is different. (:22). One is a replication of the other in different mass strength and what we call, fields gathering. Or In so many ways, the new knowledge of the man has to become the cornerstone of its strength in traveling the depth of the U. When we look at this, and we can interpret different field strength of it, when we become to understand the power of it, then mankind will come to understand he has just started the journey to understand

about himself. The journey in where he becomes more aware of the conversion of the fields into different dimensions and directions.

If we take this to be the STM (plasma on screen) and in interaction with the fields of the earth, this man has to create a physicality of itself in the new dimension (D) and direction, then we'll see what we call the brain of, and in ?? motion and interaction with the field of the sun we will see in the boundary the physicality of the man in interaction with the field of the earth.

But in the process of creation mankind has not become educated enough to understand that the STM, (:24). is the center of the life of the man. In so many ways, mankind has to become aware of the transformation and reduction in the strength of the fields. The fields that can be part of the existence. The fields which can lead to creation of the emotion in interaction with the fields of its own shell, with the environment of its existence.

Interaction of Fields lead to Creation of Organs - Blood - Neural - Hormones

In so many ways, mankind has to be more aware of the process of interaction of the fields of the U. One important point for man has been how these fields in exchange and reduction, and interaction with the amino acid (AA) of the man create packages, that we called them different names according to their strength, .. interaction, .. **the MG fields within the fields of the shell of the body of the man, that they lead to creation of the organs, lead to creation of hormones, .. of blood and neural system**. We have to understand how this, in the process of the evolution of the man has moved itself to the position and lead to the creation of different systems within the body. (:26).

Don't Want to Leave your Heart and Kidney Behind - Transmutation

This knowledge is important for mankind, because when you **learn to move your soul's energies to take a new position you don't want to leave your kidneys, or your heart behind from where you came and the rest is transmuted**. .. mankind standing still, might not even if he gets it right, replicate itself, if he does not understand the process of creation.

In so many ways, the knowledge and the understanding of the STM, the energies and the fields, that this soul radiates, that in interaction with the MG field of its environment and the essence of the soul and the creation of the man leads to creation of the emotion, the physicality, and the totality of the life of the man. In so many ways, we have to learn in what point, in what position does the STM, when he radiates, what it leads to. What does it creates, .. bring about to manifest itself in the D of the physicality. In so many ways, mankind needs to understand the totality, .. transformation, transmutation, and manifestation of the fields.

Interactions Lead to Emotions

What happens when you have the STM and in this soul, as it radiates, (:28). and in **interaction with the fields of the blood of the man, at the point of the skull**, this blood circulation leads to **creation of engagement and control of the field strength**, which from the soul reaches not only the environment of the man on the planet, but in the interaction of it with different **fields that mankind might call the sadness, the happiness, the love, and whatever else emotions we create. Each one has a gradient in the strength**, and in that process the knowledge is seeking the physical, what we call manifestation, sits at the boundary of its brain, where inside dictates the rest.

Different processes to reduce the strength of the STM to become these emotions, what would they come from? If we look at the construction of the brain of the man, when we look within the structure of the brain .. where we said the STM sits within it. Then we'll find higher order systems which sit within this structure, which leads to creation of materials and fields which mankind has called different things. (:30). But in a way, by understanding the strength of these fields we understand there is a soul, which in interaction of the fields with the STP leads to creation of what is of the lesser strength from the soul that the body of the man can use.

Strength of STM Steps Down like Power Stations and Substations

This brings us to a very important position and understanding of the creation of the man. Station by station stepping down, you have the power station, then you have a substation and another substation, and another substation, and **each substation in energy and fields creates a new strength, a new dimension**. This is an 11 kilowatt power station, 20 to 30 KV, then you go to the main substation, which divides these fields, but receives more from the center, so it has a bigger power. The STM within the center of the brain .. in radiating out creates these conditions.

Hormones Created from one of the First Substations

One of these positions, which is one of the first substations, which comes from the **interaction of the Soul of the Man's physicality, with the STM itself, is where the body.. in the center of the brain,, creates what you call hormones. Hormones are the center of the first, one of the first step down from the strength of the STM**.

Every Cell and Atom in this Universe have a Standard Size

But you have to understand as every cell in the U, every atom in the U, in this U, (:32). has a standard size and it becomes electron at a given strength position and then it becomes a proton or a neutron.

Now we understand that in this process, receiving a high energy from the STM having a connection to the emotion, having a connection to the physicality, hormones are created. Then you understand what some of the most important power stations, those which dictates the existence of every STM, is fed by a higher order from the soul in the shape of what we call hormones, to every cell of the body of the man.

Hormones Interact by Field Transfer - Higher to Lower Strength
In so many ways, mankind for the first time now understands the process of creation. Where this **hormone in interaction with the cell** on the tip of your toe, or a cell in your heart **does not need to create a line of interaction, but the field transfer from the powerful one to the weaker one has a direct connection. This is how when we enter some of the fields of the body .. we feel the emotion**.

Nonphysical Hormones Interact by Fields

Mankind is not aware of the hormones which is nonphysical, we still call the hormones vitamin D, the way mankind calls radiation as vitamin whatever, B's and E's and whatever else. So in this new understanding of the creation mankind become to understand the interaction of the field of his souls with every corner of his physicality has one neural system which reaches it, (:34). and one soul interaction field, which comes in the dimension of higher strength plasma to the lower.

In Space Mankind will Live through Hormones

That is how mankind in understanding and opening the space T will live. **Will live through, what you call the hormones**, what we call the first substation from the STM, to be able to interact with other creatures in the U. **From the hormones down it becomes the physicality of the man. From the hormones up to the soul, becomes the line of the transmutation and transformation of the knowledge and the physicality** in every dominion in the creation.

It is fundamental that we gather the knowledge in a correct way, and we can expand the knowledge in a correct way. So when we see the hormones we call it vitamin D which is connected to the AA of the highest order gathering fields, and one point of physicality in the dimension of matter state of this planet, it leads to creation of a specific hormone. In a way, when we see all the hormones are connected with the AA. Our beloved Mr. COHN. But they attach themselves to a matter state of this planet, like anything you like, sulphur, phosphor, then we see high numbers, of numbers of every element, (:36). 66, or 44 or 10 and 20s. If you look at these figures, it's very powerful. It has to be powerful that in transmutation has the capability to feed immediately to another COHN, which is made of itself. This is the purpose and this is the reason why hormones are created. When you look at the structure of hormones, when you look at the understanding of the work of the hormones, then you understand why man has a physicality and a soul. One connects to the D of physicality and one connects to the D of the soul. there is a border, the barrier number in your Periodic Table, where we see the change, .. the conversion and the line of the change, from what we call the matter state of this planet to the D of the energy and field strength of the STM. When you look at the P Table, look at where you are matter state in this environment, and where you become the next step into the energy, you become part of the salt, .. part of the soul confirmation which leads to manifestation of the AA creation and connection with the strength of what we call universal hormones,

universal line of connection at a highest order. When you look at your P Table, look at the salt. I have done this research some 14 - 15 years ago. (:38). In so many ways, had the answer and that lead to be able to control many things. When you look at sulphur, look at the phosphor on one side, and then look at the chlorine and further up, up to sulphur we are more or less equal proton and neutrons. There on we get additional neutrons added to. Then the number of neutrons increases, which brings man in a new D of work, which brings the physicality and the balance in the life of the man in communication with its physicality totally different way to the embodiment of the life of the man.

Maybe for the first time scientists can understand why phosphor has become the cornerstone of DNA of the man. Where the what you call variation in different plasma of phosphor allows the creation of the DNA, the backbone of the structure in connection with the AA without deviation in the strength. That means the strength of additional neutrons. In the future I will explain this more.

In so many ways, then this phosphor and this sulphur become in a condition of the work of the body with the different work of what you call isotopes and you call different plasma energies of the common denominator base, they become the cornerstone of life in transmutation and in the division of the cell of the man. Where some hormones connect to the neutron, (:40). as some hormones connect to the matter state of the proton and in that position in the body .. we even see nitrogen to take a place as part of the harmonic spectrum of the fields.

In the future when man reaches the understanding of the totality of the knowledge you will find hormones which are above gold and plutonium and the rest what we know as a base common denominator. But the AA of the body of the man cannot support the connection to these in a matter state of the physicality of the life of the man on this planet. This is why in the future when man travels the depth of the space he can mutate and find position in transmutation of the energies of the man into the new D of life. To man there are materials which we imagine to exist, because we have seen the patterns of the creation of the volumes of the neutrons and electrons, but in the world of the Creator there is no limitation. So when we come to a higher order life, in different part of the Unicose these factors and these strengths of the plasma in their interaction of the STM with the environmental condition will manifest themselves. So this allows man to manifest itself in the physicality of the life in any D in the U.

In this process, for the first time, (:42). maybe we can comprehend how as beings, we'll transmute and we will transfer our energies from one point in the U to another and still have the common denominator physicality of life in the essence of the source, as the AA energy of man. Which means our AA will be protected and our physicality will manifest itself in the D of the strength of the fields of the time, place, and position. It means mankind has no limitation, even to reach the essence of the, what we call field strength to the nearness of the Creator.

In the process of creation mankind will come to understand it's the subdivision of the fields which leads to the creation of the subdivision of the matter itself, and if mankind become knowledgeable in transferring and transmuting the energy fields of the U, he can create hormones to, in a way, be the subdivision of the field strength of the creation anywhere in the U.

For those of you who understand this, will understand one point, that once the soul, the soul of creation is created within the structure of the environment, that soul shall exist, and its D of physicality is in a way, (:44). in an essence, within a strength ,within our, to manifest itself in any dominion and position. In a way, we can see, we can create condition of the seeding of the soul, and then transmute this soul to any point in the U, and it will manifest itself without being within the womb of the mother, or uses the U as the womb of the creation.

In so many ways, the knowledge of the man from now on has to extend to the point that he understands the totality of the process of creation, and this is the purpose of these teachings. To open your knowledge, to open the books of the knowledge of the U, to create the condition for the understanding of the totality. For mankind to be so kind, to be able to understand the totality of the creation, not just to the physicality of the man. Not just with the imagination that, "something is there," what we call, the soul, and some of you in the physical D you call it the spirit. In the teaching in the Italian interview last night I explained in a very clear way, what you call the soul and what you the spirit. And for mankind will have to understand, that he will have the same soul anywhere in the U, but it will have different spirits according to interaction of the fields of its environment in the D of the STP in respect to its soul. (:46). In a way, in a simple language we call the spirit the STP, and we call the STM the sun, the creator, the essence of creation.

In the process between the soul and the spirit we have what we need or what we call the substations of the energy division in agreement between the 2 souls in what we might call hormones, or .. another process. in the division of, in the reduction of, in the interaction of fields of the STM with its own creation, its own creator. .. in an essence of understanding the STM is Adam, and the STP is the Eve. There is no difference in confirming the beauty of itself within itself.

In so many ways, mankind has become mature to understand. Mankind has become mature to distinguish between the 2 with the teaching, which has been done in the past few years through the knowledge, which we have transferred. In so many ways, we see the soul and we let the physicality take shape according to the beauty of the soul and the creation of itself. In so many ways, we use the D of matter state transmutation and transformation to create the basis of the soul, for the STP of the man, where in the D of the creation of the STP .. in the balance fields of the present earth condition, atmospheric, and creation of its own AA of its life, (:48). we find phosphor to be the backbone of what you call the structure of the STP .. or your DNA. Above that of the higher order we go to the D of what we call, the RNA, or what we call the hormones and we call the diversion and division of the strength of the soul of the creation and the Creator.

In so many ways, past half an hour of teaching has opened a new door in the knowledge of the creation for mankind, and it is for you as the KS to open this door, to extend the knowledge in the coming time. In the teachings which will start very soon from Iran national Defense University on the, what we call structure of KFSSI, we will teach the scientists of the world how to trace, how to develop, and how to reach the understanding of the process of the creation. Through interaction of the fields of the plasma, through new radiation and nuclear understanding of the work of the soul of the Creator. .. we open the door to the knowledge of the creation. And there is no place better then, where the STM has found peace within himself. within the structure and the position. To be near to the soul of the Creator, (:50). man needs to understand his position in respect to his soul, in respect to understanding of his totality.

If we look in another way, is the STM, in a way, the soul of the physicality of the fraction, or a division of the soul of the Creator. In so many ways, the answer is yes. In so many ways, by reflection of the fields of the strength of source, or what we call the Creator, in interaction with the D of the fields of, not only the STM but in interaction with the soul of the Galaxy, .. the soul of the solar system, in interaction with the soul of the earth, we create the STM, as a division, but in connection to the soul of the Creator.

I have created the man in the image of myself. We come from and we go back to. But in essence to be able to transmute, and travel the spaces of the creation, it doesn't matter the galaxy, universes, and Unicose. We have to understand what strength the soul carries in the position where it interacts with the soul of the environment, which leads to creation of the soul of its physicality. In a way, maybe from now on, the scientists look at the DNA in a totally different manner. Not as collection and interaction of 32,000 or whatever, 300,000 combinations, but in totality of the fields, in the interaction with the environment, which leads to the creation of every cell of the man. The hidden code is in the strength of the phosphor, (:52). not in the strength of the AA.

In a way, when you get a deviation in a genetic defect, what we call of the human body, the present scientists always falsely look at the position of the AA in the chain and in the number. Where in reality they have to look at the deviation in the spiral, in the spine of the AA and the phosphor, where is the building block, in a way, when the scientists realize that the phosphor in the DNA of the man is the pillar of the building, and the AA branches of it are the floors built on it. When a change comes it's when the pillar has a slightly different strength. When the scientists realize that by changing the strength, by supporting the strength of the phosphor in a given environment the whole thing will come into balance, and then you'll have no more what we call, defects.

In so many ways, mankind becomes knowledgeable in understanding of the totality. Today, the present time we have coded the, what we call, the DNA of the man, but in reality we have not understood, that the coding depends on the strength of the pillar, on the strength of the phosphor, which comes from it, which is the essence of the connection of its higher order strength in the physical direction and D in respect to the STM. It's the energy from the soul, (:54). which dictates phosphor to be the backbone of DNA, and nothing else, and the world of science has not understood this. We do everything to

change the defect on the arms of the DNA structure, but we don't understand that these defects, this juggling of balancing has come from the defect in the phosphor itself. Because the AA strength to be on the chain is always the same common denominator. It's in a way, like what I call, a trapeze on a wire. You want the trapeze to stand straight, the ball and the arms stand horizontal. The minute there is a slight movement on the wire, then the whole body has to move to balance it out. That movement on the wire for the trapeze is in fact, the what we call, chain in the phosphor structure, the rest of the movement of the trapeze comes from that point, and then it becomes a defect and needs correction.

If the world of science and the scientists of the man come to understand this, there shall be no defects. There shall be no, what we call, handicaps, no need for genetic modification, because when you provide what it comes in the right strength, there is no need for the modification for the actual truth about the structure will stay the same. Man will become peaceful because, in a way, even the essence of the peacefulness in man comes within the structure of his DNA in interaction of the field, and the balancing of trapeze, (:56). of the structure of the AA.

Maybe, when the scientists listen to the teachings of today, will understand the process of the creation. Will understand how in the future in the depth of space mankind will become the possessor of the knowledge to create his own DNA, or his own configuration by controlling the trapeze in the arm and not by the change of the strength of the string. In a way, I love to have a blue eyes, and I love to have blond hair today, and I don't need to go to hairdresser and bleach it and color it to yellow and another lens tomorrow, but in the essence of the strength of the STM, I can change my color the way I like.

This is the way the whole creation exists in the U, we don't have clothing manufacturing in the U. We don't have chemical plants to produce chemicals to change the color of the man. The knowledge of the travelers of the U has reached to the level that they understand the change in the strength of the soul at a given point in interaction with its environment and the desire of the STP will give the man the dressing of the U, where we do not need to wear clothes to hide what we do not want to be seen, but we create the emotion in the fields of the hormones of the physicality that our body will be shown in the direction of love, if you want to be my lover, you see everything I have. If I am in public in the creation of the D of the soul of the hormones and understanding of it, I cover myself that I am not visible to you, because it's not in the direction of the strength of your vision. (:58).

In so many ways, in the depth of the space we don't carry not only food, we don't carry and material for you, we don't carry any clothing for you, because now you understand how to clothe yourself. In a way, in the ancient times when the Moslems came to Iran, they asked the man Zoroaster to cover their women, and the response was simple. We cover our eyes that our women are free. In a way, we create that D in our own soul, that In so many ways, we create in an essence of the translation of the myth into the reality, that we see what we are allowed to see by the creator of the life. The vision of soul sees no physicality.

In so many ways, with the knowledge of today I open for you another D in man's understanding, but the biggest problem for KS and the scientists of the man is how to feed the STM, and how to allow the soul in what strength to release fields, that leads to creation of what the man wants to be. Manifestation of the physicality, creation of the hormones to create the condition of life.

In so many ways, in a very hidden way, but in a very direct way, (1:00). within the soul of the interaction of the life, I showed this in the life of Naomi. None of you have realized how we gave life back to this beautiful woman. Because we used the strength of the soul, and not the strength of the AA. The doctors said, that the brain is like being put in a mixer for 10 minutes, to the father. Now we see we have created a perfect brain. That no one can even see the deviation, because we used the D of the soul to interact and provide the strength of the love of the father to create the brain, because he was the seed of the creator.

This is the knowledge which was hidden to man. This is the knowledge that today we open up. This is the knowledge that the man needs to create his own brain anywhere in the U, irrespective of the place, the time and the position. In so many ways, as I said, as we go deeper in the teachings we open the hidden knowledge of the U, it's for the man to understand the totality.

We are not the Messengers, but we are the creators, we are the part of the creation who understand the process of creation. We are the creator, and in that we share knowledge unconditionally now that the man has matured to understand the totality. In so many ways, mankind needs to be more kind to himself to understand what kind of man, is mankind to be kind. (1:02). As I said many times, the knowledge of creation is simple, if man takes the prejudices of knowledge and creates limitation for his own intelligence.

Look at your soul on the screen and you decide what emotion and strength you want to exist in. What strength of the hormone you want to carry, and create a condition for its existence, where in totality it's you who decides the division and the leakage of the soul's energy to different parts of your existence. You decide the position of the helix and the position of the arms of your AA in the direction of the DNA, or you go through the field interaction of the soul, what you call, the AA of the STM in the D of the soul, and create any color, any race, any beauty of the Creator within yourself. One second you become a flower in a pot, and another you become a lion in the jungle.

The STM in understanding of totality will decide its point of manifestation. You do not need to travel the depth of the U to find out what you are going to be, and how you are going to look, test your strength of understanding of the knowledge, and see in what strength and division in interaction of the hormones of your body, (1:04). you want to manifest yourself. Can you become a flower, and the next you become a lion. This should be a very much what I call a sandbox for mankind to start to understand. Can I become a man of peace and manifest myself in that D and direction.

This is why we have said in many of the teachings, the time of the punishment of the man is over, because the only person who can punish the man, is the man himself. In developing and understanding of the knowledge of the Creator, those who understand and fall within the structure will go further. As I always said, I teach and I show according to the understanding of those who are near me, and those who understand the knowledge.

We cannot teach more as the comprehension of the understanding of the knowledge is not there. Like a father we go step by step, we hold the hand, we watch the tumbling, we see the falling, and we give a hand to right the man to stand up and walk again. Now it has reached a point that the man has to do this walking. That the Man needs to understand the totality of the creation of the STM and the subdivisions of the hormones to what we call the DNA and then the creation of the cell and the totality of the ?? of the physicality in a given D and a direction and a strength of the fields of its environment. In a way, you can sit in a chair, or you can be a man in that chair for 1 second, (1:06). and with the understanding of the transmutation of the fields and the strength of the interaction, you become the bird on the same chair, or the lion, or if you choose you can manifest yourself by changing slightly the second layer of the field strength to the D of the fields of entity, life which can manifest itself in another D in the U. If you can create the second what we call the ?? imitation of the soul in a new environment, then you can create the manifestation of the physicality within it. In a way, you shall see me if I decide on the chair as a man from planet Zeus. How I look on that planet, how you will look when you arrive in that place and position. .. we create manifestation of physicality by the interaction of the creation of the fields. I have hidden this knowledge in the teachings of the past, but for the first time I can open it up that you can understand.

If you go back to some of the teachings of the past I explained as part of the defense T what we call, the manifestation of physicality in a different D and direction. If you go back to where ewe showed the ?? UFO, and then we create, in a hidden way, take the what we called a magnetosphere around it, and I explained that by interaction of the secondary fields inside, we can create another zone around it. (1:08). Where this first zone for example, was going clockwise and the second zone anticlockwise. .. in the teaching I

>>>

(1:10).

(1:12).

(1:18). Maybe many of us will become mature to this

(1:24).
Today's teaching is extremely heavy …

(1:26).

we started this path from 21st of March. Next week we pass 21st of April ..

(1:28). Is there a religion in the D of the U.

(1:30).

>>> **BREAK** >>> (1:44)

R: .. I would like to show an image about phosphorus. P4 Phosphorus, it's a gas. I thought it was a perfect symbol, because you have shown the tetrahedral …

could you comment on it .. ?
K- We don't look at the structure this way in the world of Pl. We look at it as singularity. In so many ways, phosphor and its interaction with the sulphur, (1:46). is part of the process which gives physicality to man. If you look at the plasmatic condition of sulphur and phosphor, you'll find the interaction and presence of both sulphur and magnesium leads to the creation of, absorption of the fields which then becomes Ca, which becomes the center of every cell of the body.. In the body .. the process in the Thymus allows the field radiation to, and for elements of the fields of the phosphor and the sulphur in a diversion system of the man to lead to the MG field of absorption and creation of what we call, vitamin D, especially D. Which in essence allows the bone marrow to create a condition of the pull of these fields in the essence of totality for the intestine to release plasmatic fields in the strength of the Ca, that in passing through the wall of the intestine into the lymph, and then the passage through the bone to convert them into the bone structure into the Ca and the seed of what we call every cell in the body… there is not a single cell in the body .. (1:48). which does not have Ca as its center, and this has a reason. If you look in the background, backbone of the physical creation even in the interaction of the DNA. DNA cannot exist if it is not attached to a Ca plasmatic condition. In so many ways, phosphor is the last barrier between the physicality and the field energy of the U in the atmospheric M field of the earth. within the sealed body of the man, in the plasmatic environment of the capsulate of his skin, phosphor plays a controlling role inside, and Thalamus and Thymus together work within the what we call, another ?? inside the Thalamus, inside the Thymus to create the condition of the field, which the interaction fo these 2 leads to plasmatic control of the phosphor in the intestine and what you call the gut of the man. .. it's a controlling system for monotonous food eaters like the people in the North Pole who don't have access to so much variation of food. The body creates a condition that it changes the phosphor to sulphur and sulphur to phosphor and uses ?? chlorine, and then in the back of it, if you look at the true M field interaction of the O as a double O, in a way or two, (1:50). which gives you something round about 32 - 34 which sits within the structure of phosphor or sulphur and then you understand how man creates his materials without eating them, and then this is a D of plasmatic field interactions. .. in the body .. 2 nitrogen's, or 2 O in a specific combination

within the existence of the plasmatic field of the fields of the radiation coming especially form potassium, will give, and allow the amalgamation of the phosphor and sulphur and the division of these in creating and holding life. Man has no physical life if he hasn't got a Ca. So the body has created the condition of the energy fields, because in the body we are not matter strength, because the what we call phosphor, in a condition of continuity absorption of the fields, where with the sulphur in connection with the high level of the energies which come from the STM, we call them hormones, lead to creation of hormones of B3 or B, or other hormones. and we find this in understanding the totality of the process of the physical creation of the man. .. if you at the Ca at about 40 and then you start playing with the existence of the C as an inter-connector and S then you see how Ca is created out of the elements of the matter state, (1:52).

Any other question
I hope I answered your question.

(2:02).

Q:

(2:06).

(2:14).

K- As I said before ..
vaccinations

(2:16). In being in line, and being capable to understand what is the clandestine wishes of certain organizations to promote this situation ..

(2:18).
(2:20).

(2:36). in Book #8 I'll unravel this mystery.

(2:38).
Any other question.

R: there is a question, that the knowledge you give takes away the mystery. … before I expected the experience … now you reveal the knowledge so that each one can know

looking from below it was easier .. so the mystery is over, finished?
K- We have just started, the first page of it. It's you who has go to unravel the ?? of it. Mystery sits .. in the lack of understanding of the knowledge. Unless you understand it,

there is no mystery. In so many ways, that ?? we have created for ourselves, (2;40). ?? ?? We used to worship the light and now we understand how the light is created from interaction of the fields. We used to pray when the sun will appear, during the time when the moon was ?? ducking the light. We sacrificed many lives to get that light back. But the light came back, but the man was never enlightened at the time to understand that it is the process fo understanding that it is the position of the moon in front of the sun. So nothing has changed, it's just that now we have become more knowledgeable and we gather in places to see when the sun comes to be covered by the moon. We celebrate it and ?? ?? we don't sacrifice anymore lives ?? Nothing has changed, it's just the understanding of ?? of man ?? Do we sacrifice our lives in the path of ignorance of others, or do we celebrate our lives to understand more the knowledge of the creation and the Creator. That's all we ?? nothing ?? It's the understanding of the totality which brings man to understanding how to ?? If you look at the picture we had with the plasma, the fields around it, if you look every field in every position experiences different field strength and different ?? ?? so no one in no place will go through the same experience, at the same time. But to be able to understand most of the positions, (2:42). it means you have to travel many times to the soul of the Creator and back out again, to be rained upon, to understand, and to experience every single field and position of that, that in totality become the life of the Creator. Lack of understanding is the biggest problem for mankind. But once you understand the harmony and the pattern of creation, the rest becomes easy for you To understand physicality ?? Then there is no mystery, there is no dogma. There is no what we call lack of creation and Creator.
Any other question.

Q: (2:44). Brazil. .. in the labs the exams we do for the virus positive and negative, so how can they know we are positive for a virus if they cannot see this virus as you said today?
K- Due to the way we broadcast both on Youtube and other channels and KFTV. I prefer not to answer these because it can jeopardize our section on the Youtube and the others as they are sensitive to these question. But overall what we understand no one has physically, no laboratory, (2:46). anywhere in the world, physically, in the world expect Pfizer, test such a virus. Because we asked many governmental officials, and there is no lab who and test or confirm ?? So we are afraid of another ghost. But this ghost has a D and we know it's there, but how we can handle it, what the knowledge is about to create this. We have been brought very rapidly to be afraid of the health, which is in fact, created by man himself. In so many ways, we see the effect of this disease, it's not phantom. But the solution for it, as far as it comes from the new T, Iranian scientists, is not the vaccination. It's understanding the process of the environment which leads to its existence and its creation, and creating the condition that it can change ?? As I said, ??? ?? through the structure of the Iran nuclear plasma T, we will teach the new science of the plasma ?? ?? to world leading scientists in Tehran. In that process we will finish with this process of vaccination on the ??? of many people, who see an opportunity to create mayhem. ?? physical profit they create for themselves. ?? instruction, maybe in a very short time you'll see this instruction, and if it comes through, it will be the voice of the science, to lead the true science, (2:48). then those of the fear. ?? ?? we will gather leading world scientists in Tehran in a very short time. ??? ?? waiting for the Iranian

election. We cannot operate freely within the present structure of the Iranian political ?? I obey my rules, and we are obedient to the instruction of his eminence Ayatollah K. of Iran, not to deviate from the governments. Let them go through the same process. As we respect his position ?? ?? of Iran. He has asked us to stay calm, till the term of the ?? government is over, and we stick to, and we abide by his rules. After ??? when the new leadership in Iran, will emerge a new principle of peace and coordination of science and T will manifest. I have accepted this responsibility clearly, and in that position we change the structure of the present political scene in S&T and Space and Defense. Iran will take a new position in the leadership what will lead the science and T in the true understanding of the science and creation. In so many ways, I am proud to be part of this … elevate the present knowledge of mankind through the correct conduct and correct knowledge and not by mysticism and fear. I … respect and honor .. to stay obedient to the government, (2:50). and the government that is in power. That we don't create deviation and division in Iran that allows the enemies of Iran to benefit by it. We stay solid .. after 18th of June, the knowledge in the true sense will be dispersed through Iran National Defense University, which KF has become part of and that process we teach the true knowledge, the T knowledge in how to handle viruses. Not be ???

Viruses, what we call energy packs, because of the position, strength and the speed, create different conditions in the body .. and now we have to learn how to interact with them, how to benefit by them, how to use them to the benefit of mankind in the coming time on earth and in deep space. Maybe when we convert some of these viruses, they become tools of elevation of the STM, and we cannot discuss this. Our lack of knowledge cannot ?? lead to destruction of opportunity to elevate the soul to understanding of the knowledge of the U. .. I stayed Iranian, with Iranian passport for 46 years out of Iran, and I'll return to Iran to spread the knowledge of peace, space, and Creator through the essence of Mitra, and faith and belief of Zoroaster. Maybe mankind needs to go backwards, to go forwards and see ??? ? (2:52).
Any other question.

Q: Mehranez, … Fe 56, and how the fields of this Fe .. creates an environment that can change to C or H, what is the relation of this 56, mass, or number of protons, electrons, neutrons. Can we predict what is going to be created as an element in this environment?
K- I don't understand your question? (2:54).
I am lost in the maize of the knowledge of the question you asked. Can you explain what you are trying to ask .
Q: Fe was 56 … it comes to C or H .. How can we predict what these fields will become?

K- These fields are created out of packs of plasmas that the interaction of the field strength of the blood and the new system dictates the manifestation. In the lymph of the body .. we don't have the Fe floating some place, and the sulphur or a Ca. In the lymph of the man exists one plasmatic field strength which is mainly of the plasma of the H, as in fact what we call the Deuterium, the complete cell. So as the .. the fields of the nerves, (2:56). and the fields of the blood go through, in respect to the MG fields in respect to each other they decide the creation of the elements. In the world of creation there is no

fusion as we have been taught, and this is the main problem which has been spread into the world of biology and chemistry. In the world of creation there are plasmas and what Inertia we create, that part of the plasma becomes manifested as that element.

(2:58).

(3:00).

Creation of life on this planet is very simple.

(3:02).

Q; Is this Selenium field forces of masses?
K- It's all field forces. We don't have masses in the body .. (3:04).
Q: So it's just the strength of it, so each Pl has a strength?
K- It's always strength, yes. then in respect to the environment of it, it ?? and mutates. The environment of it is created by the salinity, the collection fo the materials. We allow you to be created according to this salinity to become the cell of the kidney, we change the salinity slightly, it becomes a liver. .. we dictate Inertia. I always call salinity as an Inertia, which in respect to the fields of the environment allows the manifestation fo the matter in that ?? This is what the world of science has made too many names for it. If you put the salinity as Inertia then we know how cells are created anywhere in the body. It's like you have the salinity, and the field strength of what we call the Inertia, and you create the sand in the desert, you change the Inertia you become the gold in the ?? .. the field of interaction from the plasma state to ?? what we call Inertia, is the true understanding of the creation in the matter state. What is the strength, that change you, convert from matter to what we call ?? matter. .. this is what we see with sulphur, around about 34. because the next step 35 -36 and on will bring ?? imbalance, ?? additional (3:06). ?? energy interactions. You see the chlor on this and we see the .. phosphor on this side. Physicality and the ??? ?? that's what we see, cleaning, cleaning material in the body ?? bringing balance between the 2. ?? ?? works on both sides. the balance of the proton, neutron ?? in other states ?? maybe we see it .. some of the inert gases, ?? not all of them. Because now we have to learn about the plasma inert gases which we have no knowledge of. ?? ??? in the matter state >??? which leads to plasmatic radiation of the inert gases ?? unknown to man. I used them in the first Iranian space reactors. It's not something new. If you read in the patents ..

(3:08).
Any other questions.
I'll show you something very interesting. .. if you look. If we look at especially ??? ?? this is Ca, this is the essence of the creation of the physicality of the man. That's why you stand up. without it and in respect to position of it, you will not be able to have arms and legs, and fingers to be in a position. here you have the Zn which is the essence of the emotion field transfer. but of you have never seen this, because you don't produce it. But this is phosphor. This essence of the backbone of … DNA, (3;10). what this does in respect .. CO2 and Zn, and in respect to Ca and itself, this by coming into operation in

respect to CH3, the original sugar of creation, gives you a combination of .. DNA of the man. The structure, that the DNA has within its structure a condition to ?? build physicality. Without .

This is why I said many times give me a skull I make you a man.
(3:12).

Intelligence comes from how much we vibrate and shake things together ..

(3:14).

Any other question (3:16). Teaching of 6th of May 7 PM CET.

Q: … (3:18). … I'll share a funny story. .. I would do this practice thing, we had a pet rabbit, I would practice raising my ?? my level .. I could see my hands slightly glowing. The rabbit jumped right on to my lap .. that glow, it's a funny phenomenon. you see it in young children. (3:20). Q: about when you talk about manifesting yourself. I always think of a movie, .. a guy appears naked in the street. . if you wanted to practice manifesting yourself in an environment .. would you manifest naked, or would you jut be a self awareness? If you needed to come back, you have to be comfortable with the 2 different position, in order for you to come back. Would that be right or wrong? (3:22). K- Actually you raised a beautiful point, a fantastic point from man's point of view. When you pass the extension of the position from your soul to your physicality would you take your ?? thoughts with you. Or do you just transfer translate the energy fields which the STM has lead to its creation? The answer is yes, in a way you might see a bunch of clothes on the floor. Or the fields of the material you wear as a garment becomes part of the energy of the environment. But would you manifest with the same clothes with 4 legs, 2 arms 4 heads and another condition. It would be no. So you manifest as ?? or in a condition that your soul is happy what to be seen. Would you have your ?? with you, or be covered ?? to the eye of the presenter ?? that depends on you, what you want to explain. This brings back the position of understanding the totality. We don't have clothing of silk cotton … (3:24).

So what you raised is the truth about the creation, you are naked, not only in physicality but in the D of the STM. In essence we travel with nothing. ..

(3:26).

(3:34).

How to use the effects of … the bases of, (3:38). the hormones to change the possible effects of the injections. If it comes to, ??? but you have to understand the knowledge ??

Q: Would it be for all these people who are handicapped can help them out ..?
K- You got to understand a very fundamental point, I do that with respect to a lot of understanding. Is not that you are handicapped, you are born handicapped, or with a handicap, a condition. But handicapped to me is manifestation of the physicality, not the strength of the Soul. but you have to understand that each soul is created with a purpose and a D to balance many other fields. Why does somebody become physically impaired with different ways and shapes, or condition in respect to the environment they are in. What is to be taught by the soul to those who are supposed to be effected by it. I pass a person on a wheelchair with all sorts of diseases MS, ILS, Multiple S. .. whatever, from point of birth whatever, what effect that soul has and has been created to have on the people who look after or come in touch with that soul. What's the purpose of it? Otherwise when the man becomes perfect we should see no handicaps. (3:40). Because there is nothing there to be balanced. This is the process we have to learn. And the people who ?? these responses they come to understand they have to balance it themselves in the future. We got to understand the process of creation and now that we understand it, there's a whole part of it, speck of duct of it, we have to understand what is the purpose. Why some people become so horrible in their behavior, and they think they are always right, because to them they have to destroy everything, then they have to balance everything in the future. They look at this minute and moment I do what I like. But what is to come when it comes to the balance? This is part of balancing of the souls. Then you understand what you call handicap, physical handicap, what ever shape or form, creates or are created for the people who are around that person. Why do we put handicap children, or we call them ?? people, children into orphanages, which is mainly done in many countries. The soul of the parents who left it behind still is aware of it, and it still has to find balance with it. What is the balance work for the people who care for them? (3:42). How much can you change to make life different for them as you are responsible for the soul of ?? In Iran we have at the moment a special case, .. last year due to Corona KS went everywhere and they took over to help and orphanages 100 children, for them not to get Corona. And we have been successful, we had no cases of Corona in 12 months. In the process when the team of the KS …. which is 100 handicapped in the worst conditions, you can see. We saw an opportunity, as you know the emotional way the Iranians are, we decided we take this orphanage up. This orphanage is part of many other orphanages … And the caregivers are so loving that they accepted. And we started developing a process. This month it's exactly 12 months. According to the head office … it was impossible that they had no Corona ..
how we can elevate them ..

(3:44). .
The use of Pampers have decreased ..

We cannot change the DNA, the physical damage to the structure ..

(3:46). We let the

(3:48).

I asked my father what is going on here. he said, we brought you here so you could get a fundamental understanding of life ..

(3:50).

(3:52).

Any other questions

(3:54).

K- We hope you learned more …
(3:56).
Good bye

Hormones part 2
Pituitary Pineal Glands convert energy of STM
Drug addiction similar to hormones in physicality
Hormones of the STM
Americans stole nuclear technology took wrong way
Connect past behavior to our position now
Vision Enhancement Unit

ENGLISH TRANSCRIPTION

(:11). K- one of the first series of teachings which is a follow-up to last weeks teaching. We usually do not follow-up the teaching before, but as we gone into extensive understanding of the knowledge of creation, and understanding the work of the fields in the U. we try to make like follow-up teaching that we can continue to expand, because the knowledge is so deep that it cannot be taught in one or two sessions. (:12).

Two Parallel Lines - Soul and Physicality

Today is one of them. Last week we started with the hormones and how the Soul of the Man (STM) brings in the knowledge and the information, not only in the dimension (D) of the physicality, but in eh D of the strength of the soul itself. We understood that man has **two parallel lines, which runs together, one is the knowledge in the level of the U and one in the knowledge in the level of the physicality, man's physical D. One effects us in how we run our affairs in the control of our physical life and one is our soul as an entity of dynamic fields interacts with the other D and other souls within the U**.

Dreams are Dimension of Soul

In a way, if we understood .. man lives a dual life. .. because we are both aware of, we have always been aware of. We call it a dream. We got in touch with our father and mother and our friends and others we do not know, and we woke up and we said we had a dream. Sometimes these dreams comes to reality, sometimes these ?? dreams becomes part of us in the D of the physical life. Which means our soul in communicating leaves some imprints which we recognize, and then we come to it. Sometimes we see, I have seen this situation before. I have been here before.

Dreamt Before - Deja Vu

Where in fact, your soul has been through the scenario that has brought you here, (:14). this is where I brought you, look what you have done, why are you here? .. man sometimes in a dual life comes to understand that what I thought is like a "dejavu" is in fact, physicality matches the travel in the D of the soul. Not all the time is the same, but some of the time. But as the STM communicates in advance and what is the reason we have to be in this position, in the physical D, man sees it as, "I remember, I have done this before," which means that's the point you have to think, why my soul has brought me here. Why my action of physical life has come to be in the D of what we call the D of physicality, in as much as I have been ?? in soul.

In so many ways, mankind has to come to start to understand he has two dimensions of life. Mankind now understands the way we spoke about the information in the D of STM becomes in the D of the physicality .. man we call it, in a way, we control all aspects of life. Receives the communication, receives the energy from the soul. As we talked last week, we need to decipher this information, this energy.

In so many ways, mankind understands he ?? always lives a dual life. (:16). A life of the soul within the Soul of the Physicality (STP), two independent entities but by chance, by structure of work do the U have collaborate. They each live their own life, but they each collaborate to bring the things together. When the physicality does wrong, the soul in conjunction with its work, bring the man to understand ?? what he's done wrong to.

We first saw this in a very strange way in the knowledge and research of the KF which we showed you in ILS, where the man wished to die, and the physicality through the acceptance of the soul accommodates this. We have shown this in the past 6,7 -8 years in many trials. that why a man's wish leads to a physical disability and a physical departure.

We could see a clear separation between the work of the STM and the work of the STP, where the two agree, we agree on the departure in such a way, then the STM released its energy to lead to departure at that point. .. the programming of the separation of the two starts by the mutual agreement of the two at ?? the second of what we call a wish. The emotion triggering of the separation.

In that process now when we talk about the glands in the brain .. nearest to the soul, we come across an ?? strange position, that we see that the STM works from inside out, (:18). and the STP works from outside in, through the transportation of the emotion through the blood circulation. And when the two agree through the neural system, the agrees, the D of the physicality, to be matching to what the STM and STP have agreed to. What we call, psychosomatic, .. the emotion now receiving agreement between the STM and the STP dictates the physical D and performance.

In so many ways, for the first time man has opened his eyes to the D of life, the true life of the man, where we can now, if we educate ourselves, or we create a condition in the D of physicality that the soul can expand beyond the physicality, we shall see the STM.

.. in the coming time in the system just initiated in the KF research center, and we will see it in the coming time to be shown. We can dilute the field strength of the environment that the physicality becomes like the sugar in the water, cannot be seen, ?? unless the soul shines. In this process then we can transmute the soul to a new position, and then the physicality to follow at the point of the manifestation, depending on the wish of agreement between the physicality and the soul, you can appear in China as a Chinese, you can appear in South America as S. American, .. in Africa as an African, but in fact as the same soul. Or you wish to keep the constituents of your body as it is, and appear in Africa, the same as you were in Europe.

Now we understand this knowledge. (:20). Now in the new system which is initiated by KF and you will see as a new cycle of transportation and transmutation of the body of the man, we will show how by creating new dimension (D) you will allow. … We will see how we can come to understand to be able to transmute the body .. from one position to another. In so many ways, mankind needs to understand the process of transmutation of the energies of the body .. and not the physicality .. In the process and in understanding that we have to, we need to understand this process, mankind becomes educated in the style of life we live. In the style of life which is available to the man. In a way that in the new way of transportation and transmutation we create a field which is at the strength of the D of the Gans of the physicality .. that the man becomes diluted, even though he keeps his constituents as a physicality the same. And in this process then we se the manifestation of the soul. We see the appearance of the STM, that in that process

mankind comes to a new strength of understanding that he can transmute his soul, and in that D he can transmute his physicality through the D of the energies of the U.

(:22). In this process mankind will now, enters a new D. .. we can create .. field of the strength immediately at the point of the STM within the central structure of the Body .. where we can transfer, .. communicate both at the same time within the soul and the STP, where the physicality will follow. In so many ways, mankind has run into a new D of understanding of his own creation. Mankind has reached a point of the maturity to be able to understand he lives in 2 different strengths. Maybe for the first time the KS understand when I explained that the physicality .. is the leech over the STM. Where in fact, the physicality in fact protects. In so many ways, these are armaments of the physical body of the man, the STM. To stay safe. To be able to travel in different D and dominions, in a different strength in physical D, we travel with physicality. In the D of the higher strength, we travel with what we call the D of the STM. Mankind now has a choice, .. through the new developments of T has the understanding of the totality of the knowledge. In so many ways, (:24). mankind has the possibility to be able to share the total understanding of the purpose of his creation. That's why in the very essence of the 171 or 177 teaching we talked about the creation of the children in the physical D and the children of the STM.

In so many ways, mankind has become very wise. Mankind has become wiser to understanding of essence of own creation in the D of the soul , in the D of what we call ?? In the recent past we start opening this D for you to understand more, for man to understand that he can create these forces, that he can exist in both D. **Where the STM has the power to radiate stronger than the STP and bring it under protection when it's needed, and return back to when it's needed**, manifest itself in the D of physicality. Now we have the development possibilities in the D of the life of the man to extend this, to be able to allow us to do the transmutation and transportation.

Do not forget as we taught you how to travel in the D of the soul, and how to travel with the UFO's and the flight system, (:26). which follows the structure of the work of the U, mankind in so many ways, has come to be able to extend this now in a much smaller way, to the D of his own physicality. **If we don't want to travel in a community, and we don't want to travel within the physical D**, now with this new knowledge we can show, we can transmute the body. . and once you learn it, **you should be able to do it yourself. .. you learn how to allow the STM to extend beyond the physicality**. This process needs a lot of understanding, .. needs a lot of work by the KS who are deep into the science of the creation. In so many ways, mankind needs to step up, … evolve into new D.
(I do apologize as many of you know when it comes to March, I suffer from the hay fever from the pollen, so I always had this problem)
In the process of understanding we see the totality change, we see the understanding of the new knowledge that mankind can deeper go into the structure of the creation.

Glands are part of the Central Control of the Brain - receives energy from Soul

In so many ways, in the teaching of today we'll touch a new D, a new understanding of the present understanding of the physical life. (:28). How us, how our body in matching the copy of the physical structure of the physical brain .. , as I have said in many teachings has **created substations across the body of the man, we call them glands. If you look at the structure of the most of the glands that are controlled through emotion, have the same structure more or less in the D of communication at the brain** of . this is how we now the glands are part of the central control, substations from the main, **what we call station which itself receives energy form the source which is the soul**.

Why Many Get Addicted - Relation to Hormones

We see for the first time, physically as I explained last time, last week, why hormones are so effective. For the first time today we try to explain to you, **why many of you get addicted to so many drugs, be it sex, be it cocaine, be it alcohol, be it sugar and in that process how addiction has a balance information energy, the same as what we call the hormones.** I have asked Rick to be ready in the background that we can process and we can teach that now for the first time you understand how many of you are addicted. When you the point of satisfaction, reach the point of matching the same, that you don't need, then you don't become addicted.

We see this in the point of maturity of the man. (:30). As we grow older we see we have created what we want to create, we have developed what we want to develop in our physical life and we gradually step down from what we used to be. What used to be active in creation, and reproduction.

Emotion of Soul Converts through Glands to Physical Dimension Hormones

When we look at these D we understand more, we see how **the soul radiates and immediately the glands within proximity of the soul, being able to create packages of energy we call hormones, convert the emotion of the soul to the D of what we call the physical hormone of the man**. But beyond it, immediately between the glands which **convert the energy of the soul to a hormone in the physical** D, we have the same field strength glands which man has not up to now understood, which convert the hormones in the D of the interaction of the fields of the physicality for the STM.

Pineal & Pituitary next to Soul Control Everything in Body

I explained this last week and many of you now, gradually you start to understand it. When for the first time I shared the picture that the STM sits within the brain .. it became a little bit, puzzling for many of you. Let me get a picture if I can and I will explain to you in a very simple way. In this process of understanding mankind has become very much wise to the process of the STM. Mankind has become understanding, (:32). a new D. What I'll share with you … What is interesting is this. If we look very much at the center of this picture (cross section of a brain). We see the two points, the 2 glands, and if you look, the world of science has always seen this cavity, but they just left it, because it

was nothing there, we cannot explain. But **immediately around it you see the 2 glands. ?? Pineal and Pituitary gland. When you read in the science of the physiology of the man, you see how these 2 control everything** to do with D of physicality. What you call for the production of the hormones, they associate themselves with every D of the existence of the man form age to everything else.

Glands sit next to Sun absorb its Energy into Hormones at Level of AA

In so many ways, mankind for the **first time understands how the STM could be so centralized** that he could never understand. He could never comprehend the totality of it. **Why hormones suddenly appear, (:34). in such a place, such a strength**. Carbons order of 44, H of order of 60's, massive amounts of N, or massive amounts of what we call O, and then why do we have such a prominent increase in the strength of the C and H, in all the, what we call hormones. Why? Has anyone asked the question? **Because it sits next to the Sun, it absorbs most of its energy which is convertible to the level of the physicality amino acid** (AA) of the man. In this process for the first time we understand how this works. Then I asked Rick to has some info of some hormones in the chemical combination and some of the drugs. If you can put it up Rick, if you have managed to obtain it.

Drugs Similar to Hormones and Replicate Them

Then we see the **drugs have the same kind of energy combinations, near to what we call hormones**. They carry a large number of C and a large number of H energy packs, which is very near to the hormone. Which means **they can replicate**, they can perform dimensions and directions of creation in the totality of the energies. If we look in a chemical .. formulas of the drugs, and we look at the chemical (:36). formula of the hormones, we **see a massive similarities**.

How Addictions can be Overcome

And if the scientists understand this, if the Knowledge Seekers (KS) of the true science of man be able to follow this, they come to one point, and **understand how addictions can be overcome. Because the hormones and elements of addictions have a common denominator link numbers, or near enough of C which is a connector of energies, and H which is the energy itself**. In this process we now understand how drugs have been so effective in eh body of the man. We understand the totality of the creation.

Drugs are effective because brings STP near to strength of the STM

We understand we can create conditions from the D of physicality of drugs like cocaine and others that can lead man to produce natural hormones which can effect, interact and bring a D of bringing a proximity in a strength of the STP to the STM.

They don't Hallucinate - They open to STM to interact with STP creating Hormones

In a way, if you understand this, we understand why when people take drugs, or they are active in certain ways, **we tell them they hallucinate. They don't hallucinate, they actually create a D of opening to the STM at a level which the soul interacts with the D of physicality, we call it a hormone**.

If you are a man of science at the level of understanding the creation and hormones and the rest, (:38). this is a gift to the knowledge of the man. For the first time we can see how the hormones and addiction to certain drugs, in the number of intensity of the C and H, allows a linkage and allows man in some processes of more matching values to see the STM. To become as part of the hormone to even bridge beyond at the level of the hormones of STM, then the hormones of the physicality of the man.

In so many ways, why do we see H and C, we all know, we all have been taught enough that the C is a link connector in the U, and H is the energy which is converted into. C14 - what we call Deuterium. In a combination of the processes now we understand how what we call some high level energies in the physical D which man has had problem to create or control, in a form of what we call addictable substances could, due to the same structure as the others, be able by energy level to reach, and be able to transmute between the two.

In a way, the mankind for the first time sees beyond the light. Mankind for the first time can understand the process of the creation. There is one fundamental point that has to be understood. And that is, (:40). the hormones work in the D of the energies within the vacuum condition of the body of the man, and drugs are near same energies in the D of the physical matter of this planet.

In this process, mankind becomes very wise in understanding how, even we, through high intention can change the dynamism, can change the process of, in a way, the creation of the hormones, which can genetically, through the wishes of additional energy change the physicality. Because now we understand more in the science of creation. Now we understand that high values of C and H, in matter state substances, and in a plasma state as hormone, can if brought together in a different condition, replicate each other, and interact with each other, because with a high spectrum of the number of C in the plasma they have a more possibilities of interconnecting in the spectrum of the different strength of the C's. When you speak, a hormone has 40 C, all the 40 are not of the same strength. The 40 are a combination of the spectrum of the strength of the C in the Pl condition for the connection with the others of the same. The same with the H, it's not that if we speak about the hormone, it's 50 H, is that they are 50 the same. No, of 50 isotopes, (:42). if they were the same, they change into He, change to the next step up. In a way, we don't see them as H, we see them as Deuterium. We see them in a shape of combination to become He. And we don't see that except in certain parts, that in the tests, in the Iran nuclear reactor tests, .. in 2008, we showed the creation of a high field radiation, nuclear field radiation out of He. Read the patent. In the patent I have explained how, what we call, inert gases can be used as a nuclear test grounds for creation of life. This is how we have for example, Krypton, we have He, in the body .. in a field radiation, in a nuclear structure that allows the combination of the Physicality of the STM to be able to expand

in different dimensions. This is why in the teaching of last week we spoke about the sulphur being as a point of the division between the energy and the matter, and why .. the phosphor has become the backbone of the DNA of the man. The last limitation. There is a big possibility when the man goes in a higher order strength, we move up as , phosphor being the backbone of the DNA .. to K, to Ca, because then we take a different structure, then we understand different positioning, we saw this, we know this because for what we say, in the body .. , (:44). if we change one element in the body of the man to K, we all will be green in color. We know this, because this is how it will change us in different dimensions through the interaction of the hormones. What is the difference between the man and the vertical people, where is the Mg, where is the Fe, then we understand more how hormones have been operating in the background converting the energy of the STM into the D of the what we call, energy strength which converts itself to pattern of the fields, of what we call the plasma of the Gans of the body .. This way mankind now has seen , now can develop new T. This is why I said, if the nuclear physicists would have understood, they made the biggest mistake in abandoning nuclear T in the .. late 1900's, would have gone and developed more understanding of a deeper, in a much deeper way, the knowledge of the nuclear, mankind would have taken a totally different course. We only saw how we can benefit by little energies in nuclear power stations. This is why I have requested the Iranian leadership to abandon the work of, (:46). negotiations with Iran and the 5 plus 1, because they have to be taught, "we made a mistake," we need to develop the nuclear industry in a much deeper way, because it's the essence of our own creation. In the D of looking at total understand of nuclear industry, nuclear interactions in the world of creation. This is why in the coming time in Tehran we start teaching the depth of understanding of totality of the nuclear industry. Where with the wrong pressures has been abandoned. Because we have not understood the totality of the work in the D of our own physical body. Why our lymph is transparent, what nuclear sources are within it, that it changes it to what it needs. Why did we only go for producing energy in electron vibration, to create heat, to benefit from it for our electrical energy sources as nuclear power stations. The true power of nuclear sits within the structure of the body of the man, which we have no knowledge. We need to understand in a new way, in a direct way, the creation of the fields in different levels of their strength in the world of creation, be it from the STM transformation to what we call the hormone of the soul level to the hormones at the .. physicality, and then understand, then how these are .. divided, subtracted, subdivided into cells, different cells of the man, where the same nuclear process becomes the energy supplier, (:48). transmutation and at the same time transporter of the energy. The biggest mistake man made was to put a halt into understanding of the nuclear T, because we only looked at the energy. We have abandoned, we have put a halt on the totality of the knowledge that from now on we teach heavily, extensively for man not only to understand the nuclear industry, in depth, but the true way of how nuclear material works in the U, from rotation of the planets, to radiation of the stars, from the radiation of the STM to become the planet we call the physicality of the man. Now we come to understand how mankind needs to grasp to understand the totality of the knowledge of the nuclear industry to be able to understand how to convert the energies of the physical D the energies of the STM in a Gans condition in the body of the man, to be able to transmute and transport itself across the U, and at the same time be able to transform and transmute the STM across the U. In an

instantaneous time. As I said to Iranian scientists in the past few days we have developed technologies that we can transmute, we can transfer, we can carry both the physicality and the STM at the same time, in the D of physical time. We have to become the planet, we have to become the start that not only carries its own D of the strength, (:50). but with it carries the D of the light, the creation of the transmutation in the packages of the weaker energy that we call life and it can be in any D in the U. In a way, we have moved from walking on 2 legs which we developed using the donkeys and horses on the 4 legs, and then we even went further and made them to work on the 4 wheels, and then we went further to build some fuel to fly like the birds. Now mankind with this knowledge even in past few week should be able to fly, the same as the soul of the Creator in the D of the STM. The more advanced knowledge brings revolution in science and T. Now if the scientists understand the effect and the energies of the hormones which they work with every day, and then convert it to understanding of the higher order in the nuclear reactor based systems, which we have shown in Tehran, we have shown in other places in application of understanding, then mankind will become the new travelers of the new age of the U. In so many ways, we have a problem and our problem is that we have left the fears of the man in the hands of a bunch of incompetent scientists who are mainly in the profit of their pocket, have abandoned to the pressures of the politicians and the bankers. Where we have to look in the D of the strength of the U, (:52). develop new T, develop to understand the work of the body . .to develop to understand the work of the bodies in the U, and develop these T that man become in a level to understand part of the totality of the creation. Not by burning some coal and some woods, where he sees something coming out of somewhere, not being able to control it, we call it nuclear and all the commotion we have seen with it. Now you understand, why I said the new structure and the policy with us sits to teach the nuclear T, in depth, the way we have done it in the U. and not the way it is done in the embodiments, of what we call, the nuclear T of today. We have to learn from it, we have to understand how the body processes very fast the separation of the matters, in a way, washing up materials in the body.. of the energies of the plasmas which are at the level of the plasma radiation. At the moment in nuclear industry we call it, enrichment. The body of the man enriches continuously 24 hours a day, every millisecond to every second. We take K immediately the body puts it in the centrifuge of the body of the man and creates K40, which created condition of the plasmatic radiation into the body of the man that allows division in the soul, and in a way, by creation of what we call hormones. When eat meat, when we interact immediately, what does the body do, centrifuges the Cobalt. What do we do when we take ?? hard sugar? (:54). The effectively pushes the H into a Deuterium combination washing of the plasma, not as you look at it, matter state. to the ?? vacuum condition of the body of the man creates Alpha radiation in the plasma level, which leads to the deviation and division of plasma condition in the body of man. This is exactly if you read the main patent of the KF, is there. How come having a fast centrifuge in the matter state is a criminal offense by "5 plus 1," but when our body does it everyday, we live, it is our life. This is where I tell you, hypocrisy has taken over. This is what in the process of coming time, developing a much faster nuclear base, natural sources within the structure of the KF Enhancement Units (EU) we allow both the life and the soul in the D of transmutation and transportation of the science in the coming time. Now you can see why I have asked the Iranian leadership to abandon the talks of the enrichment of Iran,

because you can have it. We give you all our rubbish. We gained the knowledge we needed from it to be able to understand the essence of creation. If you are so backwards that you stay on it, keep it. Because if our body works as a centrifuge to continuously separate the elements of the K to wash out, to purify, to reach, what we call, K40. To what you go and call, (:56). "the first thing, good morning, you are pregnant, can you take folic acid," which is a radiation source, now it is a criminal. You are criminal in the body, all members of "5 plus 1," sitting in negotiating committees, because you haven't even understood the essence of creation. Mankind should have learned much faster. Mankind should have been knowledgeable to understand our body is a cleaner to bring the essence of what it needs.

In so many ways, we have to understand why do we need high speed centrifuge to wash out, more radioactive, purified system. But our body does it without that kind of thing. When you understand that the hormones work with a high package energies, which they radiate right across the body of the man, then you wonder why do we need the neural system. But in a way, the hormones are what we call, MaGrav, and the neural system are the creation of the Inertia, to create manifestation of physicality from the same source. In that process if we add, understand, and keep the production and creation of high level of what we call, nuclear based radiation in the plasma strength, then we understand we can transmute, transport and live in all 3 dimensions at the same time, as does the earth, as does the Sun, as does the Creator.

Sometimes, (:58). in the development and understanding of the creation of the U, mankind has made mistakes, and it is good to be mature enough to accept and go back and look at the whole thing in a different D and direction in totality, where in what we can learn and we can add on to. In so many ways, mankind has reached the point of maturity, how come we are creating this massive centrifuge for separation of Plutonium, and enriching Uranium, where in the body of the man , the same radiation field for separation, for release of energies is done day and night. We have to transfer, we have to be able to bring the knowledge from one to another. Maybe some of you now understand why we push in this direction. Why we expand and extend the knowledge of man, because for the first time mankind can understand, it can use the field radiation even in the ?? ?? even in the present nuclear power stations, to create new hormones, that matches the physical D hormones of the physicality of the man, that in that process we can reach to understand the energies of the STM. We abandoned the T which worked for centuries to understand at the point of maturity and this is wrong. This is why we advocate understanding, and the new teaching in the nuclear industry to be able to understand the nuclear structure of the body of the man. (1:00). We have gone for the crumbs when the actual cake is sitting on the table to be eaten.

Americans Stole Nuclear T and took it Wrong Way

And this is due totally to American arrogance scientists because they never understood. They stole the nuclear T from the Europeans from the outset and they ran away when they thought they understood, and they built the first Hiroshima bomb. They abandoned

the most unreliable nuclear scientists advice we have to listen to, are the American nuclear physicists, irresponsible and totally ignorant of the truth.

British and Russians were developing Nuclear more deep way

In the condition of understanding British nuclear physicists understood more, in so many ways, would have gone the right way during the development. The Russian nuclear physicists in conjunction with the British at the time when the Americans stole the knowledge of creating atomic bomb, That was the point when mankind start going wrong. In a ways, taking the crumb and run with it, and saying we got the cake. The cake of the nuclear science and T in coming time sits in Tehran. And it will be developed in Iran in the coming days and weeks. We give you the Natanz as a gift to your ignorance. Where the true knowledge of the science of the nuclear industry sits within the structure of the physicality of the man, which is carried by you as Knowledge Seekers. You understand more now than the most, what we call, prestigious American ignorant nuclear physicist who have done nothing but to steal technologies and claim to be theirs, and in that process have abandoned to understand the truth about the creation. (1:02). Now you understand why I asked the Iranian leadership to abandon negotiation on purification, because we understand the true essence of nuclear purification within the body of the man, which needs to be understood to be able to create the condition of transportation and transmutation not only in the matter state, but in the energy state, in the field, in motion, in energy, which leads to reaching the D of the soul of the Creator. As I said, mankind has to become knowledge and go back to understand in a deeper way the knowledge of the nuclear, nuclear purification, how we ?? purify the energies as our body does. We wash it up we don't separate it, and in that process we can create, we can push some elements to become the sources of radiation, become the sources of the what we call, plasma radiation in nuclear plasma T, this is how our body does this every minute of it, in the glands, in the brain of the man. Now what has God has done in every second of creation across the U in the D of physicality, has become sanction-able, and in a way, out of the ignorance of American administration and scientists who told lies to their people as they never understood. When it is stolen, you try to protect so the others don't see. But you stole the crumbs, and the British and the Russians at the point fo the development of the nuclear industry, at the beginning of the time in 1940's. And you thought you had the cake. My friends you have the most rotten crumbs ever on the table. (1:04). Because you did not the process of a nuclear plasma, creation of the what we call, transmutation and transmutation of the fields of a plasma to radiation fields which is of a higher order to travel faster to reach to the point to deliver the energies faster, as it happens in every cell of the body.. every second of its life. And if you understand this then we can even understand how life is eternal and we do not look for the fountain of youth. As our life as a soul will stay always same. In so many ways, mankind needs to become wise to the knowledge of the creation. Mankind needs to become to see with the vision of the STM by evolving and developing the vision of the sight of the man. In so many ways, we need to evolve, not to see with the eye of physicality but to see with the eye of the STM and understanding the formation of , understanding the totality of, create systems and knowledge that allows us to see in a way with vision in both D by being able to

strengthen the vision of the man in 3 D, in enhancing to the level of the acceptance of it by our own physicality.

Vision Enhancement Units ..

Today later on in the second part of this teaching we show you the first what we call, vision EU, which we have developed, (1:06). and in a limited numbers we will put on the shelf of the KF, and we want you to feed back to us. This is the first time we do open testing with all of us, but we cannot go and get it done, we get it done by KS, we want you to report back to us, over time what you see, the visuality, what changes in your physical D, and what changes in the D of your behavior, and wearing these visual EU. In so many ways, we want people we are committed to expand the knowledge as One Race across this planet, it doesn't matter where you are. .. some of you might say, I see no changes, which means we have not managed, or the system is not at the strength of the understanding of the STP, but wait and see what will change in your behavior in different conditions of understanding of totality.

In the coming weeks we introduce what we call, integrated system we call vision EU, which then allows us to see if we can enhance the hormones. where we look for the enhancement of the hormones of the STM, not in the D of physicality. I have made these 2 units and we gradually bring the two together, we have, we will produce in the next 12 months a limited number of these. We sit to see the feed back, we don't want you to write to the KF with the feedback, go to testimonials, what we have in the Golden Age of Gans, and put it in public, what these new vision EU have given you. (1:08). You are accepting to become a test ground for new understanding elevation of the physicality and STM in which D of the vision. Now … we make One Nation out of the KF, and we are ON and totally in totality we enhance to understand this.

We don't go for some people who read some books and then it doesn't fit what they read because they have a "peanut brain" in understanding the totality of the knowledge. You KS are more advanced than the most advanced nuclear physicist in some of the universities in the world, because you look at the knowledge in the essence of the creation. Let them to become the first grade, the first class student where you can teach them. I have seen this with our friends in Tehran. They are teaching Iranian nuclear physicist the new vision in the world of science and T that the Iranian leading nuclear physicists are baffled how this knowledge has come form Iran, and now they have to understand it, as a KS understands more about transportation and transmutation fo the fields and energies than they do. Even though most of them are leading nuclear physicists in the world. They lead because the others are trying to stop them going faster that they cannot catch up, and others what we see "5 plus 1" sanctions. We sanction the American that the knowledge of their own ignorance, where as I have asked the … to abandon the talks. We don't negotiate with ignorance of the knowledge. We have to teach , we have to bring a position that the American N P understand what is understood by the Iranians, Chinese and Russians, (1:10). and not to leave them in shame and embarrassment of 50 years ago knowledge. In so many ways, we have still to make a family out of all. When we have a backward child that is not educated, we don't abandon it, and just teach the

others. We bring the Americans under the umbrella of the teaching for them to understand that maybe one day they learn something that they can add to the knowledge of mankind. I am not anti-American, I am anti-ignorance. Those who by stealing T under a name of a company or a nation have brought false information to humanity. Read about the history of the nuclear industry in the 1940's, and how the Americans when they thought they have it, they run and then they get a nuclear bomb and they betrayed the French, British, and the Russians which they were all working together at one time. The ?? has to be covered, and we see the reason of it some 50 - 60 years later. They with stupidity of sticking to energy of just heating water as a nuclear industry, and then what we saw as a nuclear bomb. Then the understanding of the truth about the nuclear T, in creation of hormones, hormones of different strength in D of existence. In so many ways, we have to understand and admit we made a small deviation in the way home. We go back to the track where we started, to the knowledge that original scientists like Tesla brought us. The beloved Tesla brought a knowledge that the present nuclear of the world, (1:12). have not even understood. The beauty of it, the grasp of his knowledge and how if we would have carried on with understanding the soul of the knowledge of Tesla we would have reached far beyond the achievement of today. The hormones are creates out of the reduction in the strength of the STM in the condition of the nuclear plasma reactors. That they chew out by filtering exactly the same field strength as a given hormone, attach it to something and then release it. Go and read about the hormones in your Pituitary glands, … and in Thymus, and see how the body has created a packages, what we call, purification, we call it the process of centrifuge, and then chuck it out as hormones. And attaches it to something which at a given point can attach itself to the AA of what we call, DNA, and convert itself at a given field strength to a cell of the body of the man. Purification of the energies through the centrifuge of attachment to an element in the body of the man we call hormone. And to the physical man we call in it Nuclear Industry, what we call purification. Because we didn't understand it. We reach to a level, we separate it. Our body even packages energies from the soul, attaches it to a strength which it can connect itself with a phosphor and others, (1:14). to what we call the DNA structure of the sulphur and the phosphor and then brings out in some where, with sulphur content, N content, with everything else that can have a link to the AA of the man. Then when you look at some of the addictable materials, you see a N connection into it. Why? Because this is how your body allows N in a given consistency of a double field balancing twin system create a phosphor effect near to the phosphor energy, which becomes and behaves like a hormone in the body .. Then we call it addiction. Then we call it purification and understanding of the totality of the creation. Mankind's ignorance to the knowledge of creation has become the noose around his neck not only for himself, but for the others. Today's teaching and what I started last week, and as I said, from 21st of April we breakthrough in a massive way. Now we are opening that way. Now in understanding of it, we allow mankind to enter in the true world of nuclear industry, nuclear of Pl, what we call radiation light, what we call the essence of creation. Without nuclear, without nuclear radiation plasma level, mankind would have not existed. How come you sanction the matter state, but you don't sanction your own body, ?? for what your body does. ?? (1:16).

Mitra

This is what we become, the cornerstone of creation. This is what we said has become the starting point of the new knowledge for man to become the KS of the U and not this planet. This is the beginning of the new cycle of Mitra. this is what the creation has brought us, and what the cycle of this new life will have both the D of physicality and the D of the STM together at the same time in both D. I salute you Mitra, with the soul you have brought. In so many ways, we respect the new knowledge of understanding of the plasma nuclear T that with it allows us, as mankind and the other lives in the U to evolve one step closer to the D of being closer to understanding the totality of the creation and the knowledge of the Creator.

In so many ways, if you understand the transformation and understanding of the new T which is now becoming apparent in the teachings you'll out one point, that no life can live anywhere in the U without the knowledge fo the plasma nuclear T. Because nuclear is not to be in the center of nucleus, but it is to understand the working of the interaction fo the matter states fields, and the plasma states fields which leads to the creation of both. Then you decide, (1:18). in what strength you want to operate under.

But there is a very big point, that maybe in the future time, one man, or one creature in the U will answer, what is the structure of the fields of the DNA of the Creator? What does make His DNA structure, and what are the AA of the structure of the physicality of the Creator? And this in the current time to you sounds like hypocrisy. This is like ??? what ever you put name of it, but if we accepted He says, I made man in the image fo Myself, not only in the D of the STM, but in the same process of the physicality of the man. I am, you are part of my physical confirmation of existence. The point is very deep if you understand it in knowledge and understanding.

Then it comes the truth, what is the purpose of the totality of the what we call, nuclear plasma T? With this new T how many things we can change. Those who work with me they know, I leave it to the D of the soul, even when it comes to the cancer. I try to show the D of physicality in accepting the process of creation, not to interfere, but to allow to understand. What have I asked in the ?? of the soul that my physicality is following me in the D of existence. (1:20). Why then, you understand, some people in the middle of having a massive cancer, in 1 day, in 1 month disappears in the D of physicality. Because they change the hormones in the strength of the STM and in the D creates and cleanup the ?? purification of the energies within the hormones of what we call, physical life of the man, and in the D of STM. In the world of the science of, what I call, what you call ?? health, we enter a new D. Do we need to go and repair, or do we deliver energies of a specific source to the STM that, that changes the D of physicality. We look for what we call "alkaline-ness", do we need this, or can we touch the STM in the D of the hormones of the physicality, or hormones of the soul and within the seconds there shall be no cancer. But it is us who has to accept the D, why we asked for it, and what was the reason for it. Then it comes the truth how with this new knowledge, how we can transmute between the soul and the physicality and clean up any imbalances, not only in the D of cancer but in D of viruses. Where we scan our bodies through the spectrum of energies, in any point in the U, that no viruses can touch the physicality of the man in acceptance

of his own energy by the hormones. Now you maybe for the first time understand how viruses attach themselves, (1:22). to us, because they have a linking connection to our hormones. They can mutate through the ?? hormonic structure of the physical part of the body.. Go back to the teaching and I always said, viruses find a common denominator to the amino acid (AA), of the man, but one thing I didn't tell you is that, they connect first in that, in a plasmatic section of it, which is what you call, the hormones. .. how easily we use Gans's in the Iran report 2020 about Corona. We touch at the field strength and at the strength of the AA, we interact at a plasmatic state, and it does not matter what virus in which part of the U takes place, we can interact, we can interface, because now we work at the hormones level. At a higher order energy, before it becomes a matter state plasma, Gans of the cell of the body of the man. Thank you very much Rick for a beautiful collection of knowledge's you displayed. ???

In so many ways, mankind has to enter a new D of understanding in the structure of the soul. We can teach these now because we work through the KF TV channel. Let the Youtube protect the ignorance of their people, who are paid by their paymasters to take what is the new knowledge, that they can keep man in ignorance. This is what now I explained now we come to start the new teachings. (1:24). that with .. the new KF TV, we can teach and it stays on for people to remember and pass on as knowledge and those who have controlled man's knowledge through whatever they call it, has come to an end ?? In the very time, in the next few weeks a new structure of the television teachings in Tehran will start. Which even as we speak today are getting setup and getting written that we have a platform we can teach freely, and no American administration, no, whatever secret service can put a stop in sharing the true knowledge with all humanity. The KF team in Tehran , with the new team which is sitting in the offices in Tehran writing the new programs, will bring to us the freedom to teach, the way we couldn't teach now. That's what I said a long time ago, from April we start teaching .. …

(1:26) .

The knowledge of nuclear plasma, as I have been telling you for years, maybe now has a true understanding and a true meaning. In so many ways, we are ready to change, .. to understand the new T. … to be able to share knowledge the way the Creator has shared with us. Maybe for the first time we understand that we all are nuclear plasma technologists. We all are part of the process of creation of plasma in the knowledge of the creation. (1:28). Maybe for the first time we understand how energy transformation and transportation and transmutation within the body .. can be learned that it allows us as what we call, entities and beings in the U, to become part of the totality of the U Community, where with the knowledge and the strength of the knowledge we are there equal to them, and we don't enter the world of U as a subordinate. Then as I said, no one can become our prophets, and no magician will become our leader ?? this is why in the world of knowledge seeking in the KF we are open ?? KS and no one is better than the other. It's us who has to understand the totality. It's us who has to understand the essence of the creation. gradually as we move into the totality of .. sharing knowledge we change the humanity and not the ?? ?? where we become part of one universal community and not Iranian, American, Chinese but as One race One Planet. At this moment in time as we

stop the process of war, we have to stop the process of misunderstanding the world of knowledge which is used instead of ?? harm the others, and control the others. The strangest thing for me has been how the most bankrupt ignorant nation, (1:30). claims to be the leaders. Where the most intellectual and richest in knowledge is supposed to criminals. Isn't it that the criminals have taken over, the true life of man. In so many ways, has the time come that we forget and forgive, and we accept that the generosity of the knowledge has to become the next step for progress of the humanity in the right direction to become part of what we call, Universal Community. We isolated ourselves out. We became the ignorant and now we have to accept and intensify the knowledge of Creation to be able to enter the door of the U Community that we become part of them, due to our knowledge and not due to our ignorance. That mankind will not be abused in no position, nowhere in the U. even in nearness to the Creator and the soul of the creation. In so many ways, understand more about the transportation and transmutation of the energies of the STM. With today's teaching educate yourself in understanding the position of your soul, understanding the responsibility of your soul, understanding the 2 dimensions that we can exist both in the D of the fields of the U, or matter state, in the Gans state of the body of the man. In so many ways, if you understand it you can make a stone walk, you can talk and understand the emotion of the soul of a stone. Let alone the ?? hormones, what we call packs of energy (1:32). vertical or horizontal. In so many ways, the knowledge of the man has reached the point of maturity, slightly that allows man to see a bigger picture of creation.

In so many ways, we have become wise to understand the reason for creation of the soul and how the reduction in the strength and the division of it, leads to creation of the man in the D of physicality when the energy levels, are the hormones of what we call the Inertia of the position is in ?? action. When we learn ?? strength of what new energies of the soul than we can manifest the STM in a new condition you ?? choose to ?/ to super-pass the physicality .. M field Inertia with .. the physicality … ?? As I said, in the second section of today's teaching we open a new D….

.. open more into the strength of the fields of the creation, and understanding of the totality of the strength of the STM and its conversion to elements of the physicality, what we call trying to strengthen the D of the hormones of the soul, then the hormones of the physicality… In a way you call it hormones, but it is nothing but packs of energy which can exist in the D of physicality irrespective of position and the place.

Weight and Mass

What is weight and what is mass. (1:34). The weight is the physicality and the hormone. The mass is the soul and what we call the ??? field energy of the STM. In so many ways, slightly higher order, than the order of the field strength of the hormone.

If you remember some years ago KS start finding the energy of the STM, or what element is of the strength of the STM. I tried to guide, I tried to explain, but they wanted an element which confirms the existence of their soul. Now maybe for the first time the answer to you is very simple, if you look at the energy pack within the highest hormone

within the 2 glands within the center of your brain, than you understand the STM by order of magnitude so much higher that it reduces in the fraction of the micron to the energy of these hormones, in addition having the hormone of the STM allow the creation of its physicality. The heartbeat of the STM.

Hormone Enhancement Units

In the coming up technologies which will be shown at the KF in the next few weeks as the T are going through its development we'll show you system which interact with hormones, hormone enhancement units, which are developed and strengthened through understanding the work of the knowledge of the creation.

Now we know what we have on the table, (1:36). of research and development. Now we understand what needs to be done. Now we understand we have to learn to transmute energies of the hormone of the STM to the hormone of the physicality and when they match the dream becomes physicality in the D of the Fe. Maybe through the teaching of today and last weeks, we have opened a new D in understanding the totality.

American Scientists Holding Us to the Ground - Blocking Knowledge

I was told don't bash Americans. I don't bash the nation, I open up your eyes to see what scientists sits in some nations. And not the nation. We are all One Nation. These ignorant scientists have held us to the ground and with the teachings from now on we open, transparent knowledge sharing with all of us ?? we let them to show their ignorance as we develop new T, new understanding, new D in the understanding of the knowledge of the Creator.

We'll go to a break. I'll show you the new T and the reasons we brought them in .
I hope many of you will enjoy the new journey in the new science of man . (1:38). and become very fast wise to understanding the process of creation and your own creator this time. I will take you to the next step in what we call the vision of the man lead to understanding of the vision of the STM. We have used this in bringing ?? .. how mankind can gradually enhance what we call the hormones of the STM, the man can start seeing and interacting and the D of his own soul ..

(1:39:20)

>>> **BREAK** >>> (1:44).

K- This is the system what we call the vision Enhancement Unit (EU). This is where we are trying to enhance the fields, the vision side, and .. STM in the center. In understanding this, this is not … change other things in your physical D. ..

We'll make a very limited number these ..

(1:46) . We are not looking for visual change, we are looking for every aspects, emotion, in aspects of understanding ?? Don't expect in the first time, first day. It needs the process ?? that it allows gradually to build up. We recommend maybe 2 hours a day to start with, in sessions of half an hour, then gradually build it up to use it over night, over 3 or 4 weeks. Then continuously send us information to testimonials of KF. This is a collective research by all of us, and in that process we will come to understand more about the totality fo the physical life, in the D of the life in the process of existence. In so many ways, I start showing these products because now we start entering D we cannot leave it to one or the other. In this process we enhance the soul .. the AA of the soul, not the soul as the soul itself is complete. That it can interact with .. different D of the physical life of the man. In so many ways, mankind enters a new D. Mankind enters a new understanding … becomes aware of his totality. In the process of the creation the created is us, who has to understand, (1:48). the creation. And we need to enter the new D. Those of you who are interested to be part of this process, go to the KF Store ….

New Butterflies to Absorb harmful Radiation Cell Phones ..

In other processes we brought new systems out to show the absorption of the radiation in the fields around us. This is again important in the future, (1:50). that in the present time as KS you use these which is ?? now promoted by KF, what we call the "butterflies", to start the process of … field interaction to your mobile phones or in the house, where you place these on your .. mobile phones, or laptops, and restricts the field absorption. These, there is a reason we released it this way. It's not that to be used only for that purpose but when you put this in the process of what we call, interaction of these systems then you can create D packages. Specific dimension packages, which then we can transport and transmute in so many things. Now we dictate the hormones, the size of the energy, what we call a hormone. And then we take it to its next step.

This is part of the understanding to the totality. In so many ways, this week if you go on the website. We launched Gans plasma ?? it's for plants and pesticides, for controlling the environment that the soul of the animal does not find balance to be with the plant. With the present pesticides and herbicides we destroy, kill and disintegrate the structure of the physicality. With the new what we call, "pest removing or control," we move. (1:52). We don't kill. We allow them to move to a new D. This is important as part of the enhancement of the control of the AA and the soul of the creation and the Creator. We don't kill. The time of killing is over. .. we enhance the life of the vertical. and with the other we control the environment fo the horizontal which relies its life by the fields of the vertical, and through it exists in a horizontal level, but horizontal creates a life that what we call, exists within the D of the horizontal. This is a true example of understanding both. With this we enhance the plant to grow. The way we do it we cover the both ends, You water the plant, if I can show you. .. at the base and you add some Gans's on the top, top use. where now you create an atmosphere where the soul of the plant receives the energy and instruction that, "I am safe, I can grow to what I like because the environment

fits me perfect. I change and I receive what I like." These are the new understanding and process and T which is, you will see to come out of the KF. Do not look at them as a Gans's. Try to understand the evolution in sciences which they bring. Collection of evolution of what we call, the increase in one. (1:54). In a way, bringing control, understanding with the other, to create the D of the package , and then allowing the life to decide itself what it needs to take from it. This is what we need to understand. . .
This is part of the process we will examine in detail in the coming time.

New Enhancement Pain Pen - Cells have Hormone Structure

Then we explain the new Enhancement Pen which ha been done, that how they collectively interact with the total condition of the fields, even hormones. That they interact to understand what is needed, in total, with all dimensions of existence within the body of the man. Don't forget even a cell has a hormone structure for its interaction in its environment. Or what we call the process of sharing of the energy from its center to its different parts. Now I hope the knowledge starts making sense after years of teaching. You understand more why you teach on this level.
Any questions . (1:56).

Is Universe Hologram - or a Black Hole

Q: Salomea, Is the U a hologram. I am the U this is one of the proofs. Can you explain to us how it is a hologram, if it is? Or is the U a black hole?
K- What do you call a hologram, and what do you cal a black hole?
Q: . At my knowledge it is a principle for me .. represents totality .. (1:58).
… Just to explain for others to understand. And a black hole .. is a machinery for recycling the matters of the U, including the plasmatic entities. ..
K- I don't understand what you are trying to ask?
Q: (2:00).
K- (silence) This is your understanding of a black hole and not ours. You can have a black hole at any level and strength. In so many ways, we don't see life as a hologram. Life is not a hollow and it's not a diagram. It has a consistency of plasma of life, and physicality. Life is ?? ?? and there is no where in the U that it is hollow. How do we see it, explain it, understand it, is according to our intelligence, as we have said before.
Any other question. (2:02)

Q: .. sometimes I get lost in the terminology of science ..
K- I think you are not the only one.
Q: all these elements and things that we have learned about are representative of field force, and each of these field forces have a certain effect, a certain effect in whatever environment they are in. Seems to me that what I need to learn is how each of these forces represents itself, or effects or interacts with the environment around it. Instead of a Ca, O, or a N, I know in the past you referred to these, like H is the energy source, and one do the others is the communicator, one is the balancer and so forth. .. Those kind of ways of expressing it appeal to me because I can understand it on an internal, feeling,

emotional lever rather then names and numbers .. .. (2:04). could you expand on that some, or is that the way the teaching is going to go more, or am I correct ?
K- What do you want me to explain, what don't you understand?
Q: I guess I am always searching for the key to my understanding the totality. I seems to me it has to come not on a mental level, it has to come a feeling level , I understand I because .. I can do it …

Teaching on How Life Works - Memory Bank (Karma)

In Spiritual Life you have to Train Gradually - Know Weak Points

K- I think I explained this once somewhere, maybe it's time to explain this again. And that is, when you are a, (make a) plan, and you decide to become a marathon runner. You don't get up and run and do a full marathon the first time. You prepare yourself, you run a few hundred meters, and then a couple of kilometers, and then ??? of strengthening different part of the body, and **then understanding where the weak points, and strengthening the weak points** and gradually you make a marathon man out of the man.
Start Where you Are - See How Takes Shape - Gradually Build Up

To understand the process of the interaction with the soul and the physicality of the man is the same, except the smallest common denominator like you think you can understand, you think can be a common point. Maybe you start in the working place to start with, but try. (2:06). And then see how this takes shape. **How does this become part of reality**. How this gradually builds up. It won't happen in a week, a month, in a year. It has taken man millions of years to reach this point in evolution.

If you are in Denial - You reject whatever is put in front of you

Try to understand where you make mistakes, where you didn't understand. Where you thought you understood, but were slightly right, or slightly off center. The process has to become part of the structure, .. and the understanding, .. part of the exception. In a way, we need to understand this process that it becomes a common ground. Build on it. As I said to a KS, whatever you see as an essence of why you are here. **You say, "no, this I don't accept, I ignore." Whatever I put in front of you, you reject**, because this way you can walk away with your own ignorance. Why am I here? What is the purpose of being here. Why have I been brought to this position. Why I made such a move and it has brought me to such a position to understand, or to take the next step.

Go beyond physical understanding - Cow Eats Grass

And what was the purpose of my life to be at this point? As long as you see it as in a physical D, so will the cows walk from one end of the field to another, and go back to the same point everyday, (2:08). to eat grass. So there is no difference between a man and a cow. Maybe some of them are more spiritual than we are, because they haven't anything else to do but the depth of the grass.

Analyze Totality of Life - What I did before to bring me here (Karma)

In so many ways, **analyze the totality of life**. Look at with a true understanding of, without prejudice and totality, the reason I am here. What brought me here? And be clear with yourself what brought you to be in this point and time. What is the purpose of being here. And try **to understand what I did in physical life, which was right, or to me wrong**, or to my advantage at that time, I thought. That now out of nowhere, I sit here and I can see the reason for it, what I did before. **Your physical life has no memory of being ?? here (?? what you did). It must be the operation of the balance of the souls, that kept in the memory bank** that you have to be here because of your conduct at that point that brought you here.

You Worked for the Virtual Bank Statement - Repeating month after month

I go to work to get the wage at the end of the month. At the end of the month there is no wage package on it, if I haven't done the work to be able to get the wage package. And the reason for you, that you have done the work, is that **you did it in a virtual reality of the bank statement. Somebody has put something in there that you can repeat the same process again and again**, the following month and the following years.

Take Responsibility for what you did in Past - See Connection - in Memory

This is where, is the first step in confirmation of, there is more than me in operation of my physical life, (2:10). of eating and what I call being a passenger of life. Then if you see that, **you start creating a connection, how did my physicality knew that I done such a thing between me and myself, that it has brought me here** as a benefit, as a punishment, as a whatever you want to call it, to be today and it reminds me by memory, "you remember what I did at that time."

Locked in Memory - Have to Balance Past like Bank Account

The **memory remembrance, is a bank account payment**. Memory remembrance in incoming to you as a flash of knowledge in what you did before.

When in Denial of Soul - Memory of Past Deeds - NO PROGRESS

Then **this is a confirmation of the soul, and as long as you deny this, there is no progress, because you do not want, you do not accept, you do not live the time of reality**, that okay I walked and I got here, I did what I did, 10 years later I am here. You are here as a consequence of what did 10 years ago, that if you did right or wrong, has been brought you here to balance the books.

Hormones of the Soul - What the Forefathers Did Influences

Or in the collection of, in a bigger D**, it's not only now, your own conduct of your soul, you have the, what I call, the hormones of the soul**, which is what's in the process of

the development of the soul, yours**. in connection with the souls of the past, what your father and grandfather, and the forefathers did**, that created partially your life to be here, that it's in the response to their reaction to that time.

Return of the Prophet - Prophecy

This is what we call, "the return of prophet," the prophecy. They tried to tell us this, but we don't understand it, but really, in real lie we live this life, (2:12) because that is what the souls have decided, that it will come to be the point of matter of physicality, or what we call, prophecy. And in that process mankind has to mature. Why are we prophesized to be in this point and time, we will see such a thing, such a thing will happen, because the other souls of physicality have taken the steps in both the D of the soul and D of physicality for you to manifest yourself at this point in time in that D.

We Don't See - Ignorant of our Soul

Because we don't see and we are physical people in that certain point in our brain, the position of our soul, we are ignorant of everything else. .. we cracked this nut so many times, we opened it, what we see is empty space, we say there is nothing there, so it cannot be there. Anything else, but in fact it is the essence of the STM, and even in some structures it is within the structure of the brain of the man, which man cannot see because it is so powerful, that it diminished in size and magnitude.

Take a Reference Point in your Life - See how you developed to be here

So what you see as a purpose and how **you need to develop is to take a reference point of your life and see how your conduct in such a time, lead you to such a point**, maybe the conduct was 30 years ago, and what you saw was 10 years ago, in 20 years why brought from that conduct, to this reason, to this position. And sometimes when you do it with understanding this, it is instantaneous, you wish and the wish, the strength that goes in the D of the strength of the STM, that the soul delivers the physicality, (2:14). through operation of the interaction with other souls. You feel the mother so much, that the mother calls. Because you passed the D of the interaction with what we call, field strength of the man, but you work in the D of the soul. But the 2 souls talk, "Mom - meet ?? you, Hi darling, what's wrong." We have to understand the strength, .. then this becomes a reference point, that the next step, what I saw after 10 years, brought me here, what I did in respect to reaction, that has brought me to today.

I Wanted to be with Mitra - Thousands of Years - Achieved it

What can I change today, that I can change through the strength of the soul, that I can get to where I want to be. **My desire was for thousands of years was to be with Mitra in the existence of its totality. And when you achieve it, you bless the time you have served in understanding to reach to that point**. I have a very funny situation, as my **own sister is called Mitra** too. So it depends which Mitra you call.

In essence one has to understand the totality. In essence one has to come to grasp the full meaning of the operation of the soul, find a reference point and work from that reference point. And when you do, do not expect to see the result or reward for what you do, then you have entered the D of physicality. (2:16). We see, we evolve, we create, we manifest, and we develop these conditions. We understand the totality, we comprehend the One, and then we go further, and then we understand more, then we become to understand the totality of the existence. Then we ask ourselves did it happen? And how would it effect me, how would it interact with my existence. How would it develop to be part of me. How would it extend the knowledge of me about my soul, about my creation and the totality of the understanding of the Creator's work.
Any other question
>>>>>

Q: Azar, cocaine (2:18). Iawasqa

K- You have to understand that the plants are in a Gans state too. (2:20). That's why they have a direct effect on us. They are not minerals. In a different strength of the plasma when you interact, or you take herbal medicine … evolution of interaction of AA, so you already in the realm of the strength of the AA of the man anyway ..

Q: ?? why does the cocaine ??

K- it falls within the strength of the AA. If most important thing to understand where do these herbs or elements which effect us, are created in respect to the soul of the plant, and if that is the case how they have collectively created a condition to be in the leaf. that they can create, our brain at its highest strength of ?? (2:22). with .. different kinds of herbal materials, we achieve different strength of

(2:24).

exotic element .. in U

(2:26).

We produce hormones under the banner of B3, ..

Next question. (2:28).

Q: Rafael to translate .. .. that we built all these units with the plates that we have, the Cu, Zn and all this, to produce the CO2 we use the LED light. do we have electric current in that process to make that production? (2:30).
K- What do you mean, can you repeat.

Q: .. with the combination of all the elements we have in the reactor, the plates and the LED lights, if we create a circuit like in an electronic device, are we creating this in the reactor?
K- You can try everything, and extend the knowledge.
Any other question.

You got to understand we are not here to give you something to copy. We are here to enlighten you to think, to develop new structures, new understanding , new way of interaction between the fields. We were happy up to now with a few Gans's whatever, (2:32). now we have entered a D we want to know more, we want to create bigger D strength of the field. How these fields interact with us ..

Put it this way, it can't be that difficult that even a seed of poppy can create a poppy, can create that soul ..

(2:34).

(2:36). you reach the level of the Creator. This is not good for others if you can reach there and they can't. So you are a big enemy, .. a big instrument of problems. .

Any other question

(2:38).

(2:48).

You start writing the outcome.
The way we setup the KF TV ..

This is part of One Nation program. That's the purpose of it. Slowly we are giving you the freedom to become, part of a bigger structure. (2:50). Some of you are participating in running of the ??/ program .. the research side

I am gradually teaching you to become One Nation with our structure. ?? without prejudice and whatever.
Next question.

(2:52). … Q: Can explain what endorphins are, is it plasmatic ..

K- ?? find on Wikipedia .. (2:54).
R; Endorphins .. is contracted hormones produced and stored in Pituitary gland bind to

K- is it a chemical plasmatic ?? what we call chemical, but combination of what we call the plasma. In a very extensive way. If you look at the chemical combination of it. It's a

nitrogen (N) based, we don't see .. H-O combination. It definitely connects to the N, so it's a plasmatic condition. Yes, can you find out how many H and N are in it

(2:56). K There it is. 831 N 19 O27 and again the magic number S Sulphur. And when you see that connection to the sulphur, it gives you a full understanding that it's effective, that it will effect what we call DNA, because that sulphur, being sitting in that position, with such a high level interaction with any C level in the body .. with a diversion of, what we call diversity of H, it shows you this material, will 100% interact with the, what we call DNA. Because it is one strength of it. But it's not all the same strength, all the time , the same phosphor, and other combinations of the elements in it. When you see 83 it means it can interact with 83 different .. cells, strength, in order of magnitude, in the body .. So it can interact more or less with a lot of ??? body .. Because the ?? connection through C is huge, it covers a big spectrum, and then when you see the H, it's a ?? hydro-active . And if you go back to that formula there is a very magic thing sitting in that formula… The magic part of this formula is the difference, (2:58). between the C and H, it's round about 48, you have 48 electrons extra sitting in there. Round about, if you look at the N and O, it's round about 46. This as a plasma physicist gives you a lot fo indication how this material can interact with a lot of ??? in the body of the man. It shows a spectrum of diseases, conditions, emotions, but this material has control of, and interacts. It's 100% interaction with what we call the ???? If you can on the side bring up the chemical numbers of cocaine and alcohol, then I can show you something very interesting . … we'll see how it interacts with common denominator, cocaine. with alcohol. then you see how we become alcoholics. How these hormones will effect us. How some of us never become addicts. The can inject heroin in our blood ??? (3:00). If you look at that combination, and then you see how dependent you become to the drug. Which combination, what is connected. You see the ratio C to H, about 5:1. If you have the vulnerability of .. connection in the center of the C with the H, you stand a very good chance of becoming an addict, but the problem with cocaine if you look at it, it has interaction fields with all 4, that's why it is so addictive, C H N . If you can bring please alcohol (on the screen) ?? how you become alcoholic. Then you understand how hormones work and make us , make you ?? addiction. I have done a lot of research on this and the world fo science doesn't understand it. … bring us the chemical composition of alcohol. You saw with cocaine you have interaction with all of it. You see with all the alcohol you are missing the N. and you still have combination of C-H ?? (3:02). ratios . This is why addiction, cocaine becomes so devastating, because more of us connects. Then the world of S should be able to find a solution for alcohol addiction, in a very ?? way. If you bring the hormones that are related to the sexual behavior, then you watch what relations they have to alcohol, to cocaine, to everything else, and to the other factors in the body. Now after this, the world of addiction, is so fast to resolve. But still you have to understand the totality. You always see H in a high level, because once you make interaction you should be able to communicate very ?? you need that line of communication, then you centralize it, hold that communication can take place. you connect H to the connection of C with ?? so you bring addiction. ?? The world of S has not understood this today, because they are in the matter state, not the plasma state energy transfer. (3:04). In the space you never become addicted to anything. But it's a balanced field interaction.

If you bring other chemical substances together, and you get addicted to, and you look at the same. You have to look at the interaction of the plasmas, in the spectrum of the fields in the strength of them. not in numbers. you see a lot, the whole mystery of addiction opens up. If you bring addiction to the basic elements of the cigarette, tobacco ?? and look at it, then you send how many of us get addicted to it. You look at inside the body as a field interaction, not elements. That's why you cannot find solution in the matter state, or materials, for people who get addicted. But if you move in the plasma condition. You move in the plasmatic structure you find very rapidly a solution. What you have, ?? the balance level of, you ?? can't get addicted to. …
Any other question. (3:06).

Q: ... You have said the soul of Mitra is now among us, I would like to know more about that? How do we realize it? Because I don't know how to feel it, or whether I should? And the last question is about what you called hyperactive children. I would like to now in general the behavior of hyperactive children. .. in the face of all you released. are they behaving, what will happen. ?
K- First of all we promised the presence of Mitra by ??? and we have kept our promise. And in due coarse it will be known by ?? me. This is the change of the cycle, of the maturity of the man, that the man becomes part of the UC, to able to live and understand both D of the soul and physicality. (3:08). That man become mature from now on to be able to travel in the depth of the U.

Hyperactivity - Mined C in food clothing dyes

K- In respect to hyperactivity I always called the leaders of the world hyperactive children. Are we talking about the world leaders or something else. our children. The hyperactivity comes from the rapid division plasmas within the structure of .. some hormones of the body .. which they allow the rapid depletion. We see a massive change in the H level and a very large .. numbers in the C level, which means they interact not only with emotion, but through emotion interacts with physical D. Which means connects both with emotion and the physicality at the same time and we see children becoming in that way. When we increase the C connection we see more hyperactivity. One of the reasons nowadays .. is because of that C connection, the drinks, the food, which children are exposed to now, if you look at it, has "E" numbers (on labels) E 400, E430. But ask yourself what are these E's, .. the new structure of C's interactions, which are extracted from mines from Carbon. The new colors, new additives, (3:10). the ?? all come form this point.

(3:12).

(3:22).

Astrology and Astronomy and Plasma Technology

Q: Jefferson, … about the planets in the solar system , (3:24). the angle and position . how it touches the behavior . we had a lot of astrologers to interact , to predict this is where I would like to go with KF T .. ??? (3:26). I think it is not a question but how to explain the fields and positions of the planets interacts with this .. ?

K- If you look at the body of the man, has an organ or kidney, one is liver, one is intestine. The structure of the planetary system in the solar system are the same. Each one are responsible for a certain function within the structure of the solar system. It's the same for every star in the galaxy, and every Universe with its galaxy. So in that position, when you have a problem with your kidney you become diabetic and it reflects in the rest of the body. So is the position of a planetary system in the solar system, they have, they create certain field interactions, and as we are plasmatic ourselves, in one way or another they touch us, they create a collective mood or behavior in all of us. When we go into the winter season in northern hemisphere, (3:28). in Scandinavian countries, because of the field, lack of certain fields, they create depression in a large number of members of the society. It's a big problem today, a few days ago, for the first in Iran, 82 - 84 people committed suicide in one city in one day. Never been known. Average death toll ?? in the country is about 50. How collectively so many people decided to commit suicide, nothing to do with each other. And is this the progress of the second cycle of what we see with the virus, which has hit Iran heavily. Or is it what we said, creation of different fields in plasma which has come in the first cycle. Are we going to see a continuation in ?? in suicides so as we said, this virus effects a lot of us ?? including emotions. In that respect we start looking to understand, that yes, Jupiter has Saturn in the background are collector of gases, you know it's a gas tank, the end part, ?? like we have in the body of the man, collect the gases. Where do the gases release to? Then you have systems in the front which absorb most of the heat, that certain strength are absorbers. So the body of the man, there is no difference with the body of the solar system. Each unit, satellite, moon, planet has a functionality or because of its creation has created a function in the solar system, the same as us. There is no difference. (3:30). But we have to understand what's the purpose of it? It's not just there standing around. Up to now we accepted because we didn't have the knowledge. We just looked at the physicality, something has got 11 moons, and something has got 1 moon, and is ?? distant. But what does this serve? We know they interact because the simplest one is the moon. the moon effects us, our mood, or even our oceans, what we call height of the water in the cup of, the earth we call it, because how does it move. How do we have a high tide and a low tide? SO we do feel the effect. It has effected us, but up to now we were not wise to it. Some scientists over time said, oh ?? ?? this here does this to man, we see more this, or more that. They are correct.

But they in a deeper way some scientists in the past have touched it. De Vinci tried to understand this in a very devious way through the organs, which he was buying from those people who were burying them (grave diggers). But he couldn't connect it. When you look at some of the work of De Vinci in depth, you understand that De Vinci was looking for the answer and in some of his paintings he has cleverly hidden knowledge he

has gained of the creation and the Creator. Of the balance of the energies within the satellites, within the wings of the angels he draws sometimes. That's the balance of the fields.

In so many ways, we have to understand part of this knowledge, because when you cover a number of fields, you see similarities you can connect the two. And yes, stars in our galaxies, (3:32). even has an effect on our behavior as a collective. Even our own star has an effect on our behavior as a collective humans, which we face it, and it shows massive release of energies or ?? pooled energies. We are collective, and it's so minute, we just go "bleep". Stars and their planetary system have a direct effect on, even the DNA structure and behavior of their citizens, or what we call the creation. When you next time look at the position of Mars, in that position, or Jupiter of Saturn or Moon, look at the collective structure of the fields, and what these fields mean. Because now we can gradually measure.

Then if the same as what we saw with the cocaine and the alcohol, if that field strength fits in the part of our, what we call, "hormonic (hormones)". AA balance of the plasma, nuclear plasma understanding, then like cocaine, will make us dizzy, or like the other makes us drunk, or maybe it makes at the point of wisdom. Because not all the hormones we know are the way you see it in a certain position of the brain of the man, hormones of the wisdom, what we call wisdom is created, depends what energy we put into it.

So we see this, and now we have to understand more, and you're not wrong, and in a way, it's nice to see that the knowledge is opening up new insight. (3:34). That we are looking for the next step answer and find solutions. We will be touched when we travel the depths of the U by M fields of stars and galaxies as we pass. The same as our own moon and other systems in our solar system. The same as us have a different emotion in the position of the winter and summer in different positions of this planet.
Any other question.

Q: .. (3:36). a couple of years ago you said a person can put their hands together and create light between them?
K- What?
Q: repeats ..
K- yes,
Q: ?? ??? there are 2, one for the left hand thread and one for the right.
K- You can control the fields with this, that one slightly stronger, or you can control the fields in a part of the neural system that you can create the interaction of the fields what leads to the creation of the light, or what we call the plasma of the light.
Q: Sorry is that like emptying the fields out, of D and stuff ??
K- . but it needs concentration of the fields to be brought in, to be in the field environment of the whole, what I call, "Cup of Hand," so you can hold it, you can manipulate it, even with the movement of the fingers, you can bring the compression of the fields, (3:38). to balance that you can create.
Q: .. another thing .. you talked about the 4 Cups and a square and the person standing in the center. Do you remember that ..

repeats .. I think we have a connection issue.
K- No it's us not understanding ??
R: He talks about standing in the center of 4 Cups. I'll translate for you.
Q: .. I gather that when you look at . the Buddhist temples they got lotus and square .. (3:40).
R: what is your question . something about the Buddhists temple.
Q:
???
R: Is there anything
K- I don't understand the question.
R: He is trying to make a comparison between the Buddhists temples are made and the 4 Cups
I think it is a stretch to compare the Buddhists temples to the 4 Cups ..

Q: the 4 Cups create the Inertia and the one in the center absorbs the fields.
K- Now I understand what he is trying to ..
Q: .. (3:42)
K- You can find understanding of the evolution of the knowledge of the Pl in different times by different, what I call, souls, who have shared as they understood with humanity. And sometimes they have been put in a figure, what you call, construction and the field transfer. We see this.
Q: .. ?? could we ?? the higher fields of Gans to create the Inertia ?? instead of like having a whole bunch of free Gans's for itself, like just having the Deuterium ..
The Inertia could be the absorption of the fields of those , whatever the body needs or whatever?
K- Depends what you understand from the interaction of the fields, and how you want to interpret it. I always say ??? I was told, we made a mistake. You never make a mistake. In this T , this knowledge of creation, no one makes mistake, it's just that we do different things and from it we gather different knowledge. What we gather we use it, that's the beauty of what we learn form the process, and if you see it that way and can interpret it, maybe open our eyes to a new way to look at things, which we didn't do before, and you are not wrong. (3:44). And opens us possibly, the scientists understood at that time what it needs and what it leads to. And in the name of whatever religion or path of belief they built something to manifest, or visualize what it was said, and taught about.
Q: ..
K- In this knowledge we are all KS and the intellect of all of us becomes a collective intellect, and how we use it and how we can use it for our better understanding .. possibly is what you think. Maybe someone thought in that way, the reason the buildings are built.
Any other question. or shall we call it a day.

(can't hear very well go to next)

Will the Vision EU Help Physical Eyes

(3:46). Q: Dean, the vision EU. My vision has slightly deteriorated over years and I have to wear glasses to look at screens and read. Will the Vision EU enhance physical vision? K- **Depends on what you expect of it, and what you want to see**. .. we are not giving you a system to see better and you buy new glasses. That you say is replaced. These are dual purpose and it depends on what you expect. .. you will reach the point you might not expect it from the process and the T. It's not that I'll see and feel better. (3:48). this is a 2 part piece which will come into operation which is the first part, and the second part we'll release in due coarse, that it will work .. in interaction with the second part .. elevation of the hormones of the STM, and in that level ?? for man to move possible elevation of understanding of the knowledge, T, and the light in a totally different way. These are not there to create physical changes. If they do it means that you are satisfied by the soul, at the strength of the level of the soul vision, that has lead to your physical .. impairment .. what we call . These are not ?? this we work through the elevation of the soul, that we see the totality. This is part of the new education, new cycle, .. what we see as totality. In so many ways, we extend the knowledge in understanding of what is the [physical life and what will be as the elevation fo the more fields to be available to the physical D, and how your body might use it to improve the cycle of life. (3:50).

K- Thank you for being with us. I hope we could share more knowledge …
open up another D in what we expect ..

Now we are looking up to where we have came from. In that process we try to understand where we are going to. What is the purpose of us to be created, to be here to serve or to be ?? part.
Thank you v m today.

R: 377 KSW (3:52).

END

378th Knowledge Seekers Workshop; April 29, 2021

ENGLISH TRANSCRIPTION

(:10). Video Cycle of Creation >>> (:27).

(:28).
K- .. Today's teaching is a follow up of last weeks teaching and we carry on the same way and we proceed further to understand more about the interaction of the fields of the Soul of the Man (STM) and the fields of the Soul of the Physicality (STP) of the man, and the response to and from these positions. In the past 2 or 3 weeks we start showing the strength and the manifestation of the fields of the STM in interaction with the fields of the STP which leads to creation of what we call the brain of the man. When we know a body has taken a shape, and the body is mature both in soul and STP is when (:30). we

see the blood circulation which starts in the early weeks of the life by circulating the emotion of every cell in the physical dimension (D), starts leading to the creation of the brain .. Where the interaction of the fields of the soul and .. of fields of STP lead to creation of a physical structure of the brain. There has been a discussion for many years by the knowledgeable people and the scientists and theologists, when doe actually the soul takes over the body. When does it actually operate. Up to now the soul was created at the point when the fields of the cells of the body of the man which came from the sperm and the egg lead to the creation of the STP which is the first heartbeat, and then comes the first cells and structure of the brain of the man. So in a way, we can say the physical operation of the body starts when the brain is formed. When the soul of the combination of the, what we call the sperm and the egg, which is the original soul of the creation of the life, in creating its own D of physicality and the first heartbeat which creates the first cage fo the M field to contain the interaction between the STP and the STM, and the brain is formed, then the life is ?? true. This is the time when the soul has taken shape and ?? works, (:32). between the STP and the STM. Then this closes the discussion between the scientists and theologists that when actually life is alive. When we respect life. Up to now when the soul was created in interaction between the STP and STM, that brain created, now we call life, has been a tradition on this planet. From now on we teach and we show how you use and create a full soul that it exists on itself, and then because that soul is pure and perfect, then it decides and creates the D of the physicality. This is how the change of ?? time has come. Where now the STM is fully created in advance of the what we call, physical life. This way physical life cannot go wrong anymore. Man will not commit a crime. Man will move into the next step, that with a perfect soul in operation the physicality will take a new shape and life. .. we change the situation and condition fo birth, from now on, due to, and for the fact, that there shall be no more crime, no more what we call, breaks, no more failures in the physical life. In this process we shall see the first cycle of life's starting on this planet will go through this process. Where there will be no hunger because the soul will feed the physicality. These are not theories anymore, these are structures that we show, that we have setup and we will see the manifestation. (:34). This is where the STM could not support and it had to rely on the STP to feed it, to contain it, that when it matured it could leave, or when it had the position of the time of the field strength to expand beyond the physicality. For the first time the STM is in control from the point before the inception of the creation fo the physical D. In the future time we'll explain how and the way its done. So it comes to the fact that how come that the STM in creating the heart condition to be separate life on its own due to the understanding of the principle that body of the man is made of Gans's, it's made of the plasmas, and the plasmas operate only through the heartbeat. If you cannot create the heartbeat in the body of the man or the soul, this is not life, this is not a soul. This is not a condition of living without depending. So when you come to the point that the STM which itself has a heartbeat, has come from the creation of 2 separate cells, from the egg and the sperm, has its own heartbeat that it takes over. When it creates the D of the creation of the physicality within the environment of the womb of the mother. Then when that entity gets its first heartbeat is the time when the STP starts growing. In a way, the total cells within the body start pumping. In the electric motors, we need electric current to start the motor. In the plasma world we need the heartbeat. This is why now, (:36). the scientists tell us, even the earth has a heartbeat, the

sun has a heartbeat. Our U has a heartbeat. Because without the heartbeat plasma, M fields, cannot release their fields, they cannot expand, they cannot divide, they cannot mutate. This is why the man has a heartbeat. Pulsation is the essence to the creation of plasma, and life of plasma. As heartbeat pumps, creates variation in the dynamic strength of the fields. In that variation creates the division, interaction and in that process creation of new D, as the variation in the strength of the field of the pulse decides the D of physicality or the D of the life of the entity. As I said in the world of plasma, nuclear Pl physics, we don't look for frequency except the pulsation. This is why man dies when the heart dies. When there is no pulses to circulate. this is why the man goes through the process of aging, because as the heart gets weaker it creates a different M field which in interaction with the cell of the body, it lowers in strength to the point that it cannot. If the mankind could keep the heartbeat at the rate of the birth, man stays young forever. This is why they tell us all the time to exercise. They tell us, why to do more of everything else, that we keep active. This is why, (:38). we see most of the people who live an active life, live a very near close long life, because the heartbeat stays there. The biggest problem for physicians of the future is to be able to regenerate the heart tissues, that stay young. Then man will never die, in the D of physicality. Most of the time, unless there is an accident or something through the evolution. Then mankind maybe for the first time finds one of the keys to everlasting life is finding the processes that the physical heart keeps the strength of the M field of the blood circulation , the same as the point of the birth, maybe at the age of 18 which is the maximum, we generate the best.

In so many ways, now we understand more, and then in that process…. we come to understand when you have the STM in the center, it radiates, and in radiating and interacting with 2 or 3 different MG fields leads to the creation of the brain with the circulation of the blood, and in that process to the D of the physicality of the man, where man creates skeleton of bones to contain and live, and the interaction between the fields of the STM and the STP leads to creation of what we call the brain fo the man. .. , (:40). for the first time we understand the full cycle of creation. We understand the full process how we are created and how we can interact. .. when it comes to the D of the STM, the bone structure it sits outside, when it comes to the D of STP the bone structure sits inside. Because this is the way the M fields of the physicality dictate the structure and then what the compromise comes, the STM in conjunction with the physicality creates what we call the skin of the man. Where the skin is part of the same brain, and with it condition of existence. But when we speak to the physicians they tell us the cell of the lung of the man, is made form the same structure, connected to the same structure, which this, brings a new D in the science of the .. physiology … which we'll come to it later on. But touching it we can explain, that as the STP and the physical part of the MG field of the earth created the physicality of the man which is from the solid part, then the air part, the atmospheric part has its own control, and with that control it has created the lung. In a condition, connection with the brain .. that in that process, up to now we thought was a process of just breathing, of actual the central control for connection of the soul with the gaseous part, (:42). of the life. This is the beauty of the creation, where the life of the man depends on the gaseous and the earth, and the liquid, and for each one, the body, the STM in interaction with each other, has brought its own process and its own control, that in conjunction with the soul they dictate life. You take the blood from the man, man will

die. You block the O or circulation of the blood from the man, man will die. You stop the man to breath, man will die. Because even though we are combination of the creation of the physicality of the interaction of the STM, but each part in interaction with the soul, has created its own operational control. At all in connection and collection, create the heartbeat in the center, that all interact together. The physical part depends on the heart to beat, the lung depends on the heartbeat, the process of circulation of the liquid depends on the heartbeat. Now we even understand why the heart of the man is positioned where it is positioned. Because the heartbeat creates a vibration even in the lung that, that lung heartbeat allows the interaction of the fields with the soul of ?? This is why in the teachings, for the first time you understand, we explained how by breathing you can control the strength of the fields of the STM, (:44). because it is one of the 3 controlling systems. It's one of the 3 partners which have .. encaged the STM.

If one understands this, then in the coming time we understand how we can control life in the depth of the U. What happened when we go to a planet when there is no O. How do we change the process of the conversion in interaction with that D. What happens in an environment which is just a Pl and the STM? Then the physicality of the man to manifest itself will become the interaction between the STM and the structure of the Pl fields of the environment. We'll not have the lung. We'll not have the blood circulation we have but it will be a pure interaction between the STM and the STP, or the D of the physical fields of the Pl environment, and then we'll have a plasmatic life. We will not manifest ourselves in the physical of 2 arms, 2 legs, then we have a different D of the control, and .. interactions. We see these kind of lives in the upper atmosphere of earth as it has been reported by NASA, as we have seen space cameras have taken the shape. Where the soul sits in interaction with the fields of only the gaseous part, the upper levels only has one D. We don't see Inertial field of the matter state to see a physical body of the bone ?/ We see this many times in the teaching of KF. Where NASA reports in their videos seeing fields moving in a manner. Because when you have a STM, (:46). interacting with the field strength of the environment, it has life, it dictates its position, it moves. Now for the first time we can see the upper level of us, in the upper atmosphere of this planet. We have a different life we didn't know. We have the fish in the seas, and we have a life above us, as it is too far from the Inertia to interact to give it a physical D. The soul of the entity in interaction with the fields of the earth in the upper atmosphere and the interaction of the fields of the sun, create a new life. In a way, as I said before, maybe for the first time we understand we are the bottom eaters fo the atmospheric condition. As we see when the body sinks in the oceans, lands at the bottom, there are scavengers, there are bottom eaters which take benefit from what falls, and there is nothing below us on the ground. So whatever falls from the top as an energy fields we take, we breath, maybe it becomes part of our life, it's fixed through the environment to become existence for us. WE are the bottom eaters of the top. In the very near future we will show this. Because even those lives on the upper levels have a limitation of interaction of the fields and if they change they loose the D of field strength, they become closer to the earth, and they take shapes of physicality. They take and they become what to be. This is very heavy for a lot fo you to understand, but this is the truth, the way we shower the bottoms of the seas with remnants of the body of the animals, whatever which the bottom eaters eat, (:48). we ourselves are the bottom eaters of the life above us. But they live in the D of no

physicality and just by the fields. In the coming time when we go into space in the D of the plasmatic fields, in the collective interaction we will get to know these animals. We say we have so many thousands, one and a half thousand creatures on this planet, and so many thousands in the oceans now we come to understand about the life above us, which is even more dimensions and diversity that we didn't know. We open the eye to the existence of the interaction of the fields of the environment and the soul created from the interactions which creates life. If Rick can go into the videos archive … we see NASA reports these objects fly, this is not theory, this is a fact. Now for the first time we can put meaning and correctness.

Then it comes the fundamental point that last week we touched on it, the hormones. The interaction of the fields of the physicality of the man , in nearness to the source gives us what we call, the hormones, which we explained in the center of the body of the man, with the ?? which is the conversion of the field interaction between the two. This is where the hormones are ?? In so many ways, mankind has come to understand in the interaction of the STM, (:50). with the containment of the STP M field we call, blood circulation, mankind to benefit from the existence of the presence of the .. the soul, it has created substations near it, as glands to convert its energies when it comes to the physical D.

Mankind speaks about the position of the gland in front of the head. This exists, because this is the interaction of the fields of the STM with the outside environment. Some people they have given different names to this, but in fact, the way the planet, the body of the man interacts through the physical side, conversion of what we call the hormones, the same thing happens with the outside D, with what we call, other souls. This is a substation that can in a way, be more powerful than the inner, from other glands, that allows, and this is where we get our, what we call, interaction of vision and the hearing of, in conjunction, in passing through. In this process, what we see in the body.. in all of us has created itself a new way, that most of us have not been aware of. But in the process of completion of life, this process lead to the creation of a brain, (:52). which in 2 halves creating Yin and Yang, balance between 2 parts of the soul fo the body of the man, leads to the left and right brain. In conjunction with the matter state balance of the physical body .. , the Cu as we explained in the past teachings, brings this process of the creation fo the physical left and right. Where is has to stay in balance. But there is another D to this, that in controlling the physical life, the brain .. has played a purifying game. What has happened is that the STM in the center, in conjunction with what we call the glands, in interaction with the blood circulation, in the fields in coming in touch with each other, and with the glands, and with the field strength of the themselves, creating fields, that's what actually what the glands do. In that process different D of the fields on the bottom part leads to creation of the physical life. But in the brain .. the same game played. Where in interaction of physical part we have the liver, kidneys, and the lungs, and everything else positioned to be able to interact with MG field of the earth, and the other side the same shape comes to operation, where the specific position is the place for the speech, this special position is for happiness, (:54). the special position is for emotion, and different things. The same way we have a structure, for interaction with the physical life, where the earth. The interaction between the STP and the STM leads to the

construction of what we call physical D ?? contract. where at the end of it the two agree that, we let the physical life part of the brain to stand outside, that it can have a control system. This is why when we look at the body .. , when we see like people in a stroke, the field strength in the middle part of the brain becomes your shoulder, and the upper part the upper arm, your elbow becomes this part of the brain, and in that operation we see for example, the fingers by your ear, the fingers control, hand, and the ?? rest. The same position is your legs, your upper leg which is here, and then the shin. And there is a specific point in the body .. which is in charge for and only of, .. femur. Then you have what you have as lower arm and lower foot, and the toes and the feet. Now we understand the full process, and then we see how these interact, and in the interaction of the fields ingoing and outgoing, every emotion of the man is recorded. A man who has an ILS by the wish of the field of the STM and the wish of the STP, decides no more walking, (:56). I want this section to be dismantled. When this section is dismantled, then the body has an energetic field which cannot handle, and that energetic field ?? heartbeats, the body dies. This is why the emotion in interaction fo these fields with the STM leads to what we call death. Because the STP has pre-agreed the condition with the STM that this guy doesn't want to have the use of his arms and legs, so we disconnect it, and it takes time to disconnect. That's what we see people with ILS, MS go through paralysis, and then they die, because even the heartbeats, the physical connection has been disconnected. And this is why it is very hard to reverse it, because you have to be a master to realign all these at the boundary inside. This is why we see the success with the use of what we call, external energy field forces which can create these secondary fields in a ?? false condition, not what we call, "has to be there but there is no physicality," and then if you succeed, physicality takes shape. This is why in the coming time, we say, if they take your kidney out we can produce it, because your kidney has created a MG field in its position of creation. All we need is to create that field in this environment and the kidney will manifest itself, because its position of field strength sits there. (:58). It's not no more magic, it's no more hidden .. information. We have deciphered the secret of life, … that the mankind will see the totality of the strength of field of his existence. You do not need to go through kidney transplant anymore if you understand to have your kidney operating, you need to create a field that allows the kidney to restructure itself to its original position. There is no need for dialysis machines. This is why when you go for the Cups of Life, for diabetic, we tell you to wash your kidney, because the kidney condition in interaction of the hormones from the brain, in a condition of psychosomatic creates the structure of the kidney to change that creates the condition of dialysis. This is why many of you when you take the cups, or when you make, what we call, "you follow the procedure for the diabetic," you say it doesn't work. You missed 2 things. First of all you missed to cover your kidney and liver area with the Gans's back and front that you bring the balance back to it. With out this cleaning up, without repairing the kidney, as I said, it's like a car that continuously has an accident and you keep on repairing the body, but you never repair the brakes which is not working and hitting you, letting you smash your car here and there. Then we understand the process, then we come to understand the totality of the creation. Why do we tell you to breath, because you have to bring the agreement, (1:00). of what we call, the gaseous part, which is controlled by the emotion of the interaction of the field of the lung and the STM in order and in balance with the physicality to repair the kidney. Otherwise you are still limping. You haven't done the

full job, you put the pad on but you forgot to put the pin in, that the break works. This is why in all dimensions all of you when you use the Cups, "oh I am drinking 3 times a day,' you can drink 200 times a day, what about the emotion side, .. the gaseous side, .. the physical side which you have to put on top of it. The liquid you drink covers the fluid side. The material you put on your kidney covers your physical side. But what happens to the gaseous part if you don't breath. You're still limping.

And then all of you have seen problems continuously, it works, but sometimes works. Because my dear, can you tow a car when you haven't connected the towrope. You can have the most powerful engine with a towrope hanging on the floor, when you don't connect it to on to the car you want to tow. Where is your AA, the towline is not there. The tow rope is not connected. Then you come to the position of another towrope. If you put the towrope up now you, now you have to put the lights, that the light in the back of the tow car shows, somebody is towing and it is comfortable and safe. Where is your connection with the emotion of the man, which is the Zn? (1:02). You have to connect both tow bars that you can pull and keep safe, and none of you follow the procedure, one or two people understood, Dr. Rodrigo's and they disappeared. Because all of you have to understand this, because it is not a magic, it's understanding of the totality because the doctors understand, and they understand, appreciate the essence fo creation like Dr. Rodrigo's, they see right through. Then all these brings question marks. I have all these right positions why can't I help everyone, only some, because then you have to extend the condition of understanding fo which part of the emotion with the direction of physicality, with the essence of STP, and the STM bring these positions. This is why many of the physicians who join the KF get frustrated because they cannot see the whole picture because their knowledge is ?? not enough. It's not to be the physician anymore of the physical life. The present and the cycle of the physicians we start training have to understand the totality of the creation, interaction of the fields in the fields of the gaseous, interaction of the fields in the D of the liquid side. Interaction of the fields in the D of physical life. And then interaction of what we call emotion, which is created from the totality of the fields of the 3 in interaction with the field of the STM. And in fact, if the STM did not have all the characteristics, (1:04). which is within the physical brain of the man as emotion, how could he understand and control. And then we understand why in the physical life something very precious, and that is, when the STM creates an emotion, and the fields which in interaction with the field of the STP, we see manifestation of the position. Which means this is where I feel joy. So if that's the case, within the STM, there is an essence and emotion of joy, that in a given field strength, and in a given position in the structure of the man, in the brain of every man leads to the position of the creation of the combination of the matter state to the Gans, in the different strength and combination, a position , where M fields created that creates the emotion of the happiness for example, that both the STP and the STM ?? Then we see why .. the brain of the man has very much structure like the physicality of the man, the liver, kidney and everything else, and we call it the happiness, (1:06). the sadness and every other ?? thing. The fallacy in the present world of science they say only the brain, the maximum brain used by the man, in an intelligent man and he uses maybe 10% - 15% of it, and the other 85% is not used. What a fallacy, is it true when you are not using your finger the rest of the body is dead. Is it true when you are not using the legs to walk, the arms and the intestine and

everything else is dead, or are they functioning in the background to make sure the leg, the blood is there, that everything else is there, that the walk can happen by the leg. So we understand for the first time the brain of the man is on work 24 hours a day, not only used for the part which man sees as intelligence. .. the structure of the brain .. is set as a last memory computer system that it knows continuously on its work 24 hours a day, which cell needs to be changed in the physicality, when is the time for the blood cell to change, when is the time to change the bone cell somewhere, .. kidney cell somewhere. So those to tell you that the brain .. is only used by 15% is those who actually believed that the earth is the center of the U. In fact, just because we don't see using it, doesn't mean it doesn't exist. If there was any part of the brain .. which the interaction of the field of the STM, the STP .. would not interact to give assistance to it, it would have not been there. (1:08). It would have been an empty ?? gap, empty space in the brain cell. In the coming time we'll explain in a very detailed, why even, what you seen in the brain .. for example when we look we see shapes like this, and we look at everything else, on 2 sides of the brain.

One of the most important structure in the physical structure of the brain .. inside the skull of the man, are these gaps, they are more important in some cases, than the physical matter. When you look at so many brains x-rays, or MRI's you'll see the beauty of these gaps. You can see and decide on the intelligence by the gap created among the cell, among the structure. If you looked at as many x-rays and MRI's as I have done with the people with MS, or Fibromyalgia, with ILS, with Depression, you see the shape of these gaps, the shape of the brain changes as they recover.

Because these are the space gaps. These are the gaps between the earth and the moon. The gaps between the sun and the earth which stays the behavior of earth. What earth produces. And thee gaps in the world of science is totally ignored up to now, and it cannot do so. When you look at an x-ray, an MRI, (1:10). to me I always look at these gaps structure. Where it is closer, when it is separate, how its shaped in the brain. Then because of the gaps you understand, if you have a Venus, you have an Earth or you have an operation of Jupiter. This is what the man of science of tomorrow has to learn.

(1:12). When you are an Indian doctor sitting in an office, does not matter to you if a red Indian comes in, a black man, .. or a white man comes in, it's all the same because he understood the physicality and physiology of the body .. that everything, where it is and how it works. Now the next generation of the scientists, the doctors of the man we call them. In space, will look, because he has understood the totality fo the creation, what does fields in the center, what's the strength of the soul, and what is the strength of the physicality in respect that he is of this planet or another position in the space, will give me that I can repair the emotion of happiness for him at this ?? Then you have an overall view of understanding fo physicality, then becomes very easy to be the physician of the U and not the physician of the man. In understanding in comprehending the process of creation, mankind has become wise the totality of for the first time we show in the coming time how we create life from interaction of the souls, not from the interaction of the sperm and the egg that it leads to creation of physical life in any dominion.

In so many ways, mankind will not have in the physical D what I call, children in the space because it stays the physical structure of the AA of the man which created the STM, (1:14). has a different combination of physicality than the others, what we call inter marriage in the physical D, some of the impossibilities. But if you can work in eh strength of the soul you can create the strength of the soul D that it decides and creates its own manifestation in the environment of the womb of the environment, be it the womb of the mother, be it the womb of the center of the galaxy, be it the womb of the center of the U, or somewhere in-between the Unicose. At the moment if you are born in air you get a UN passport because you have no nationality. What happens if you are born within the gap spaces of the universes? What U do you belong to and what combination do you get, because then you have the collection fields of the, "all combination of the fields of the U."

Mankind has to open his eyes to the facts, that through these teachings we raise your horizon of understanding beyond the point of your imagination of today, but the reality cannot be ignored. You cannot shoot the messenger because you don't like the message, because it doesn't fit with your program. The message is on the table, it's for you to understand it, to comprehend it and if need be to develop it to become the next step.

In the coming time in collaboration with different nations, in Iran, in Beijing, in Washington, New York, or in London, or in Paris, the scientists will work to decipher the process of the creation. All these scientists we put behind the computers to design the killing machine, they will be given the opportunity to find the secret of life, to create the machines, (1:16). to travel the spans of the U, through the process of understanding the operation of the STM. We have educated them, now we have to change the machine from tools of war to tools to peace, and to everlasting. From now on, .. the race and the position and the prestige of the nation will come not by the bank reserves and by the killing machines you have, but by the knowledge you have added to knowledge of humanity in conquering the U. By learning and giving it freely as fast as we can. We have called it "Bitcoin," now we call it bit brain, bit travel space, that collectively we all mine the knowledge of the U. Collectively we add into the totality of the knowledge of the creation. Man will get so busy in adding that he will not have time to think of war. He'll see the beauty in creation and knowledge, then in creating wars. In the upcoming talks between the world leaders there will not be the discussion who leads in the military and commerce, but who leads in the knowledge.

(1:18). In the coming time as we are developing systems in the research centers, we will not give birth to the physical life ?? give birth in the, what we call, delivery rooms of hospital today. In the processes that now have started, I was discussing with KS yesterday, we transport that soul of the body of the man to the environment of the earth, and then the physicality which is established within the womb of the mother, or womb of the U, will manifest itself as the beauty of the creation, that I am present. In the coming time as the evolution of the science the delivery of children in the delivery rooms becomes a historical point, that now if you like the same as we send you to the other side of the U in UFO's, or you can travel with the STM in any D, now the mothers have an

option, allowing the life to be created by transmutation of the soul of the child into the environment and not in the D of physicality and all the problems we have seen in the death of the mother and the child in the delivery. In deformation of the brain and long lasting physical damage. These all become point of past in the next few years. KF through its research centers have already processes and has started this process, to deliver systems that can transmutation the D of the energy of the STM in one pint to another, that the soul of the child moves from the mother, (1:20). at the point fo what we call, completion. and then it takes the shape of the physicality according to the wish of the soul itself., ?? fundamental ?? and the wish of the mother, child, father, and the society. These are not fairytales we have shown the knowledge.

The new vertical EU, .. present generation is very different than what we showed 6 weeks ago.

In the coming time we place the vertical EU inside the horizontal EU, where the mother is inside the vertical and we transfer, (1:22). the soul of the child in the horizontal environment that we see the and delivery to the physical manifestation

You will see radical systems which will appear in the coming weeks and months, from the KF both in 2 -3 nations at the same time. Upon my return to Iran in the backend of the June we'll create the condition of space centers which are devoted to serving humanity through elevation of the STM, as we ?? did the physicality, as we teach to NASA and Russian Space Agency as they like to have something to play with. The growth and intellect of the man of today has reached the understanding of the totality.

In so many ways, we cannot move backwards ..

The only coarse left for us is to move forward and then choose different ways to stay on this planet, to take ?/ fields of the plasma of the U and travel in the D of the soul, (1:24). or take the D of the physicality of the man, and travel with the UFO's or the car or the jet. They are all now in the hand of the man. I like the bicycle … ..

(1:26). in past 8 years we have matured it to the point ..

(1:28).
This is why I said we are all Messiahs, we are the Messiah of our own physicality and no one else. You are the Messiah .. you have no control over mine.
.. There is no point for no one to call themselves a king. The only king is the king of God, Creator, and that is all of us to be part of it. There shall be no king and there shall be no rulers as we rule ourselves through the correct conduct of the soul. As I said, Mitra is among us and that process has started. And in that process we understand the totality, the mother of creation, the mother of change, the mother of new beginning. In that process no man can obstruct the process, any one touch, or tries to stop the process will meet with his own match of, and conversion and diversion of demise. Every man and soul has to

be free. But no soul can change the process of understanding and evolution and agreement of the souls. And collective admiration, and collective elevation of the soul of the totality, not only of one man but of the community of mankind and the total elevation of the soul of the Universe. and ?? this is how we have become, (1:30). the visible part of the U community, up to now we were dismissed

(1:32). We create a manifestation which fits that environment and strength of fields of that environment and if it manifests and attraction of the 2 we shall se a different ?? light. In the world of the creation we interact on 4 levels. Plasma level, liquid, solid and gas. There is a 5th level which man is still blind to, in the coming time we open that door, when man matures a little bit more his understanding. In so many ways, the field of the U are not only there to create and interact but they are there to manifest on the totality of the creation ?? Mankind in the coming time will come to understand the process of creation ..

In so many ways, mankind has started to live 2 dimensional,2 strains reaction with the totality of the creation. Mankind (1:34). is with understanding its own creation. Maybe one day we come to understand the total truth about our own life and our own creation.

My wish is somewhere in the coming time enough knowledgeable and men of theology come to understand the truth that we abandon the dogmas of the science and religion and we all become one to understand the essence of the creation and the Creator. I leave you today with this, because I have opened a very deep knowledge which needs to be understood. Please try to listen to past at least 4 or 5 sessions, one after another, and start building the picture where we are taking you. Where we are leading you, (1:36). and how we come to interact. We have to understand that the knowledge of the man, the essence of the life of the man sits within the structure of the physicality .. within the interaction of his fields with the STM. We would not be here if there was no soul within the structure of our inner physical body, as there would have been no earth, if there would have been no center to create fields to interact with the fields of the sun to manifest itself as earth. In the coming time mankind will become very wise ..

All the knowledge of the creation is within the structure of the STM

I would like to go to a break .. teaching will be short today (1:38). then we'll become passengers of this planet . we'll be in Rome, in London, Tehran, Beijing. and return back in August ..

July in Bucharest, capital of Romania, and then we extend the travels other parts.
We expect to be in Washington sometime in September. form then on it will take shape, the new understanding. We announce our plan in advance ..

We need to bring the essence of peace to our own leaders
Some of the world leaders to sign in public
First Ayatollah ..
(1:40).

The signing of Iran's religious leader and nation leader is the key to the next step of the peace talks. around the world. The Iranian nation will commit themselves to peace. with that effect we'll open all the nuclear centers of Iran to the world …

thank you .. we go for break ..

>>> **BREAK** >>> (1:42). 378 KSW (1:46).

K- .. Are there any questions? …

Fake "Silence" Imagination - Silence of Soul

Q: Salameea, … (1:48). I would like to proposal for KF TV, if it is possible to teach about the power of silence, or to transmute our fields, our soul…..
K- I don't understand what do you mean the power of silence?
Q: The power of silence, I mean we have two spheres of the brain, and the logical one, and to silence this logical one in order to give more possibilities and freedom to the emotional one. This can create us the potential to transmute and go out from our body to get the freedom to travel in the space, wherever we want .. you did with us a lovely exercise .. we repeat in our meetings many times, and we feel quite well everybody. In order to get harmony and peace of the soul, I thin we get many benefits of the silence ..
K- **I think this is the fake imagination of the man. Just because you don't make noises, (1:50). through your voice box, doesn't mean that the brain is not functioning and creating its own noise**. And the environment, then you speak about the silence through the mouth of the people talking, does not mean that the brain and the soul is in silence. This is what I always said, in the previous teachings, the earlier teachings some 2 - 3 years ago. Is that you don't need to hear to see, to know what the man is thinking. Man of space do not speak man's language, even though us as human beings don't speak each others language. When you sit in ?? a room with hundreds of nationalities, you don't speak each others languages, all smile and ??? there is no noise, no communication. But all the souls in that ?? point are in communication with each other, and cross to others.

The Interaction of the Fields of the STM always makes Noise

In so many ways, **silence is a D of physical man**. As we say there is nowhere in the U, that there is no M field, and as the ?? brain of the man, as **the STM is made of fields, their interaction always makes noise**. How we accommodate and control these, brings to the motion of what we call sounds, or D of understanding the presence of existence of another.

Silence is Manmade by Those who think they have Achieved something

So **silence is a man made, and those who are very physical, (1:52). rely on it, and they think they have achieved something**. It's very much as we rely on the television ?? television to tell us the truth. It's the same way. We don't need silence. You can be as noisy as you like, break the whole city down with noise, but have a very low interactive soul. Or your soul is making bigger noises than you and interacting with the other souls which you have ?? avoided through your noise.

Silence is Biggest Punishment

The biggest punishment, is the punishment of silence. And in that time ?? ?? for man to contemplate. But in so many ways, we are created to interact, and in that interaction, silence in the world of physicality, when the 2 are together, is a prison sentence, that no soul has to sustain, but sometimes allows for emotions to process themselves, that in that process allows the elevation of their souls maybe or direction and D of the evolution and transmutation of the soul's energy to deeper understanding of ones failure, or interaction to success of understanding more. So when you go on the silence, just understand one thing, it's you in a physical D have chosen that, not your soul, and no other souls in the same room. Maybe souls have much busier talking when you are physically silent. (1:54).
In other question.
Q: I have other questions if you allow me.
K- Rick what do you see in the background.

Plasma Dome - Made of Fields of Gans

Q; .. is the plasma shield a magnet field, if so what metal or combination of metals causes such a wide dome as the one on the island protected from the hurricane? So she would be referring to the Tom Sallsa dome on Caribbean island. Is the plasma field a magnet field, if so what metal or combination of metals …?
K- The interaction of the fields of Gans's leads to creation of these domes. It's not a metal. It's a plasmatic field extension, and we see it even in our laboratory parts when we do testing, depending on how you test. But it is not a metal. It's ?? not ?? necessarily metal. If there were metals, In so many ways, partially it would create a different manifestation. (1:56). And it's mainly through the condition of fields which are ?? not strong enough to manifest tangibility or physical what we call, ?? But strong enough in combination with the environment that they can divert and convert these kind of ??

In 2 or 3 years when we were testing in South China Seas area, we had a very strange position. We were not very far from .. Chinese Naval headquarters ..

>>> talks about China experiments flight system.

(2:04).

(2:06). hardly any metals in our systems.
I was talking to a KS yesterday explaining some things in the process in our experiments

(2:08)

My knowledge of creation is complete in line with what man needs to know for centuries and thousands of years to come. (2:10). If you go back on all the teachings in past 10 or 15 years. Go back to papers I have written before establishment of KF. Go back to during the work of my University time, there are some papers around still. Some designs of the deep space reactors, were designed in 1978 - 1979, I have them somewhere, you will understand what you see here in 2021 was already known 40 years ago by me. It just took in a way to water it down, step by step for man to understand. I remember I was not more than 18 - 19 sitting in a bar, in a restaurant called Swan Head ,outside Manchester near British Nuclear Fuel with a friend of mine and I was drawing him for future space reactors for creation of materials and space units. And he said, "no one understands you, because you are talking so advanced, people don't even have the knowledge. At that time I used to work with ?? field scientists, just about less than 5 km away, in B N Center, this knowledge was very clear to me from the beginning. That if you look at it, we understand this process, now in a deeper way, but more, many more of us. In the coming time what, (2:12). if I can find that, those notes those papers, we don't see any different. Knowledge has to be understood, and once understood does not need to be remembered. And the knowledge of creation was very clear by age of 13, but I could not explain the totality. It's a very interesting .. A couple of weeks ago one of the close friends in Iran sent me a video that one of the Iranian scientists was speaking about the soul, and the process of the life, the STM, and I said, can you please take the video of what you just listened about the cycle of creation and tell him about what imminent scientists in Iran goes, this is form their point .. this is ?? afterwards, we understand so much more. This process of creation should be very simple for us. In that system we created them, but the same as you have the STM in the center and the skull of the man to contain the interaction of the fields, in what we call physicality, the STM is the machine in the center you see. and the body of the EU is the skull. The system inside are the creator fo the fields of what we call, physical soul. With these systems I can not only create the material status, (2:14). I can create for you in any position to see the strength and the fields of the emotion of the man. .. .. if you understand in interaction this (center reactor) and this (reactor inside EU) I can create the strength of the sadness, and with this (center r) and this (a different reactor inside) happiness.

(2:16).

… Most of you have not gone far enough to see the beauty of these systems. You are looking for gold, and I look for knowledge fo Creator in this systems. You are too much entangled in physicality. And I am too interested to see how and what level I can create

the fields that, that fields become the strength of the fields of the Creator within the center of the system. Can the knowledge of man reach enough that one day we become close enough that the interaction of release of fields of us, (2:18). we can see ours in the interaction of the D of the U. How would we shine? In the old say, what we see in the energy parts I see in the ?? glands. It's the level of understanding the knowledge. and being open enough to accept the truth of the knowledge according to the understanding. We have all the knowledge, and we have access to every knowledge in the U. It's just that if we choose to use the knowledge, except that, when and the reason we choose to use the knowledge.

On Sunday in the NACT one of the KS said to me, it's recorded, about how I can not help myself with the knowledge I have with the hay fever. And last night talking to some KS I found so simple. It took me less than a minute to make the mixture, and since last night I suffer from none. Because it was to prove that I have the knowledge. (2:20). As you have seen today, I carry no handkerchief, .. no sign of hay fever, which I have suffered from it for years, March and June. .. We have access to every knowledge but it depends on the emotion, the field, and what I call, the emotion of ??

It's not just because you have you use. We let the physical D, the mistakes of the physicality to take shape, that with it we learn, with it mistake become a game in the knowledge, but not mistakes. but opportunity to learn. For that reason you see the evolution in these systems, I am looking for the totality of the knowledge of the creation. You for the sun, you look for the system to make gold. I look for the soul of the Creator, the ?? ?? the same system. Is my knowledge enough to interact with direct soul of the Creator to see how ?? a ?? star or a shinning star, in the presence of the reflection of the light of the Creator. It's knowledge I use. Or am I the Creator that in interaction with the knowledge we see how the others shine. ?? we all come from and go back to. It depends are we on the M cycle or are we on the G cycle of the distance in the U. (2:22). And what don't we ??create in interaction of the fields of us. ?? in the D of the Creator.
Any other question.

R: about the processes you brought up in last workshop… energy transformation, which then lead to energy transportation, and then to energy transmutation, within the body .. and that it can be learner. (2:24). Can you discuss that more .. what and how is it that we can learn about those processes?
K- Okay, go back to the 3 words. .. transmutation is the last one.
R: Transformation, transportation and transmutation.
K- Isn't that Book #1 2 and 3.
R: Exactly.
K- That is the same but in the level of energy of the STM. .. transportation is going from one to another. Transmutation is the manifestation of end products in the solar. And transformation because we are there we can see physically the process. It's which part of it we want to be. But at the same time all 3 are on a field level, not on a matter level. You would have to transport themselves from one to another, that they manifest themselves at that point at the end. .. with the present knowledge we can dictate and control most of these systems, (2:26). and in the coming time we will show you how you can amplify

field strength, you can change field strength, you can create combination of the fields. The answer is very simple, just move up from matter state into the Pl state and then from then on understand the totality. I made man in the image fo Myself. But if I am here to manifest man in my image I have to travel to a point somewhere that I can manifest myself. This is what we say, it's a very interesting point if you look at it in a physical D or in the energy D. You stand in front of the light and you have a shadow, ..if the shadow is in front of you, ?? enlighten you, which means the stronger light form behind. Or is the shadow behind you, that you are between the light and the shadow. Who is creator of which, and who is manifestation of what? Is the STM still exist in the shadow on the ground? Does that shadow contain emotion? Or how come the reflection of our physicality which is the Gans itself, (2:28). if it is changed slightly would there be a shadow. If we live in the D of the Pl field ..

(2:30).

(2:46).

Thanks see you next week 7PM CET

R: 378 KSW (2:48).

END

379th Knowledge Seekers Workshop; May 6, 2021

ENGLISH TRANSCRIPTION

(:10). K- . to understand the quality of conversion of information to what we call, "into the conversion of understanding to the totality. In so many ways, the knowledge and the understanding of transfer of energy and M fields of the Soul of the Man (STM) into conversion and addition into motion, into physical motion of the body of the man, becomes part of the next step fo the teaching. What does this mean? Is that, (:12). for a source to give a command, and for a receiver to receive that command and act upon it. It means, that both have the same kind of structure of information. What does this mean? Is that if the STM sends an information that in interaction with the information or connection of the what we call, data. is the same that they can be read by both sides, it means that STM and the STP .. has access to both sides. It's just going through the deciphering that the physical part fo the body .. can understand. What this means is that STP and the STM have a feedback loop, .. where in this process, the STM … transmits and information, and the STP .. receives this information in one form or another, directly into it, (:14). but the STP sends a message, that what it receives from the body to the STM. In that process, somewhere in between, they understand, they interact. This is what

we call the emotion. The STP sends his message through the blood circulation. In so many ways, it encompasses both. .. if you look at this as the skull of the man, and the blood circulation inside it. The information in different strength of emotion has created different angles, different positions, of different information. This one is the emotion of happiness, at this strength the emotion is for let's say, joy. And this we have the fear. So in an interaction of these strength of emotion, which comes through the blood circulation. Different position of the brain become allocated for certain position. This is why the brain of the man, shows a specific positions, .. for specific characters, certain behaviors, certain emotions. And these all interactions, (:16). have their own position of interaction in the brain ..

In fact, what we see, this is how the brain .. in its interactions creates different positions within the physical structure of the brain for different behavior, different understanding and different physical reactions, because immediately behind this, sits what we call, secondary blood circulation which takes the reaction of the emotion back to in a physical condition, where this is your arm, your upper arm, and in the center goes your shoulder, and the thumb, and than the STM.

Now physically we can position the emotion and reaction and the strength of the fields which creates emotions and reactions in the STP and the STM. Up to now the scientists tell us, if this is your brain .. this is the place where we see the speech, talk, whatever, laughter whatever. Now scientifically we can pinpoint it, why it happens. Because the joy comes in at a given strength in the blood circulation of the man, and where it meets the same kind of strength from the STM, which has a line of communication, then it transfers its interaction at that point into the soul.

Then in interaction with the cells of the body .. which carries the same responsibility. (:18). reacts in what we call blood circulation, of .. dimension (D) of STP and at the same time, the same information, as it understood goes down to the neural system. This is the continuation of the access of the soul to the physical body.

In that process where the information coming from the STP and information coming through the neutral system, creates .. the interaction at a given point in the body .. For example, if you are running and something suddenly bites you on the leg, you don't kick with your arm, the left or right arm , if you are bitten by the left leg. You kick by the left leg, so the both processes, what we call, now even reflects and reactions shows the information is so rapid transferred both through the emotion of fear and the emotion of interaction of response, that we create .. reflects. Or in the cases of father, the emotion creates with a cancer in the prostate, as we have spoken about, or with the breast cancer, which side of the mother's body to be. And the left side of the process of the feedback of the information, you get the cancer on the left., and the other side you get cancer on the right.

Now with the new understanding and the comprehension of the M field and the strength of the field of the STP in interaction with the STM, we can now pinpoint with accuracy with what strength fields we need, (:20). for every reaction. In the coming time, we

deliver T which can deliver the strength of the fields for these reactions. There is no need for medication, because now we understand the process of the plasmatic interaction in the dimension (D) of nuclear plasma, because these are created out of the condition of the radiation of the plasma (Pl), not the Pl itself. The Pl to transfer the information to the Pl of what we call, the soul to the Soul of the Physicality (STP) takes time, but physical what we call plasmatic radiation, which is coming to be taught will react much faster.

This is one of the reasons in the future we show you have to grow, if for example you lost a finger, we can grow the finger without actual position of the physicality of the man. Because we use the field interaction in where it has sat, … and been and the field interaction where the finger is missing will create that in it. This is why I explained in the teachings in the past, if in your body you have the 2 kidneys and if .. by accident has to be taken out, or dysfunction, or they are taken out, we can create the fields, within and through understanding the STP and the Soul of the Man (STM), (:22). lead to the creation of the kidney. This is literally a radical change in the world of science and T and physiology of the man and creation of every part of the Man. This is why up to now the world of science has had problems with this to create. Once you understand this process .. we need to radiate from the STM to any position in the U, to lead to manifestation of the man in the D of the soul at the time and the position. This is why a lot of time in the past months I keep on talking about the transmutation of the M field, .. of the fields. now you understand what we were teaching, what it is coming to. Because up to now no one would could understand this process. You don't need to produce pain killers or whatever else, if you have the strength of the emotion of the pain, and can understand to which part it is allocated, that you can produce the right strength information to alleviate the pain in that point. This is what your Gans's CO2 and Zn does when you burn yourself and you put your finger in the Gans water. Because the Gans Water has what we call a soul, it has D in the structure as your body is made, so interaction is very rapid. (:24). Now you understand that in the process of the teaching … we were heading for transformation of the fields energies through understanding of the new T. This is what I said … when you understand this you become the medicine man of the U, not the medicine man of the man. the development and the of the transmutation of the energy after June of this year will transfer to Iran, to Iran National Defense University. We concentrate all our energies to rapidly develop this, in conjunction with the Iranian nuclear physicists. Iranian medical people in the space T in conjunction with the Chinese, very rapidly. and other nations to bring the new space T to a new understanding and with it, move the world of medicine to a new D. When I explain .. in American teaching. what I don't do for my hay fever, it took me a second, because I understood this process fully. And you see today I am with you without any sign of hay fever. .. around this time I suffer heavily.

In this process we try to understand, create a condition of the process that even ?? in the space, even if you have touched by a .. viruses, you create the balance virus energy and you dilute it. (:26). You don't need to wait, the process of understanding of the T, at the strength of the mutation of the fields is upcoming and a new science for man to develop. With this you don't need fertilizers, .. herbicides, .. you don't need to have the gold and the silver. With understanding of the transmutation and interaction of the fields the way the body of the man creates organs, is the cornerstone fo the new development for space

T. Be it on transmutation of the man, .. transportation of the soul, .. feeding the animals, or transferring fields across the body .. that the man does not kill to eat to survive, to be able to be a dynamic MG field in the nuclear plasma T. This is a revolution in science … this is what we promised you after April 21st.
.. that when we start this process we all are knowledgeable to know what to do. The knowledge of the KF does not sit with Gans's and .. with dynamic Gans's. In the process .. we have understood the T now it is time to apply I tin a correct way. You have to understand, due to the heartbeat of the man, you have to have what we call, (:28). balance ?? beam which comes from the body of the man, that, that ?? beam allows the interaction of the fields at a given point to lead the creation of that organ, that cell, so it's not sending a continuous beam, but it has to have a soul of the plasma heartbeat, which means the heartbeat has to have both the G and M field strength, but can interact with the heartbeat of the cell of the man or any entity in the U. When you want to travel the depth fo the U, even from the earth to the Sun, the replication of the MG field of the Earth and the Sun has to contain the heartbeat fo both, the Sun and the Earth. And which one changes in the speed allows the other one to attract, the lovers pull. In so many ways, mankind enters a new D of the S&T. A knowledge he never had, .. essential to become the passengers and travelers of the U. You cannot take with you the waters, the foods and the bread with you, to travel for centuries into the depth of the U. Where you can through the heartbeat carry the emotion of what you might need, or you receive it without emotion, but as an essential part of keeping the both entities alive, and surviving. (:30). IN the other hand this itself is connected and ?/ unconnected, and this itself is connected and ?? unconnected. This heartbeat in a different strength connect with the galaxy, and this connects with the center of the U and beyond the Unicose. Where the same heartbeat from the earth comes to man, and then from ?? subsystems of ?? . .. we carry if you understand the totality of the soul of the Creator, in one way or another. As we receive the G field packs of it does the same, In so many ways, the reverse will take place, and this is how we are connected to the soul fo the Creator. then you understand if we manage to create a fields at this position within the strength of the STM, that matches this point we can frog jump, frog leap. This is how I say, a man, a farmer, a peasant in the fields of Africa, in creating the right strength can reach the strength of the soul fo the Creator at higher position, than the man who prays in the mosque and the church, and falsified the emotion that he goes this direction, further from the soul of the Creator. (:32). But from the knowledge of the truth and the reality of the creation.

In so many ways, the process of the understanding of the new Pl T in the strength fo the STM, in the strength of the transmutation of the fields of the nuclear Pl T allows man in truth, in a way, not to fiddle, but .. to understand the process of motion in either way (towards or away from Creator). In so many ways, we choose by our conduct and behavior how to position this and .. this. Or we decide to go this way. This way is what the prophets of the past called, hell. And this way is the path to .. heaven, by being closer to understanding the knowledge of the Creator. But in both the STM and the soul fo the Creator, exists the emotion of the both. This is part of the total understanding of what we call transmutation through Pl T. And for it to be strengthen that you reach in the field effect that you can absorb, increase the Pl, is nothing but the knowledge of nuclear plasma T. Because we have to create fields which reaches, which allows to be absorbed.

?? that it is very difficult to amalgamate, (:34). what we call, "the fields of the plasma," but we can enhance the fields of the Pl by interaction, absorption of the .. nuclear Pl radiation at the Pl level. This is why I said, mankind left the nuclear T at the height of his understanding, abandoned it for patents, what we call, energy from nuclear industry. This is why it is essential for all of us as a human race, to understand the truth about our lives. Maybe now we understand, as we said many times, we worked with B12, B9, and B6, which is hidden ?? as nuclear sources, but to be able to travel the depth of the U, .. in all dimensions, mankind needs to be able to create all strength of .. radiation in a Pl level, respectfully, and understand it, and add to it, that allows, his soul to be elevated to reach to the understanding of the soul of the Creator.

This is what we do with eating, we gradually feed the soul with every bite, with every breath we take, with every water we take from this planet. The whole purpose is not just to move the man, but it gradually to strengthen the STM, that this soul gets enough strength that it can pass down the physicality at the point fo death, that it can choose which path it takes to the Creator. And if it is of the lower order, (:36). will take this path (away from Creator). This is how we become another Sun in between the Creator and the STM. This is the principle of the work of the U. This is why mankind is so heavily involved in eating up, get as much energy as possible that I can elevate this, that I can take the path. Your soul does it unconsciously but it is part of the process of your RNA .. and DNA. In that process you age. ?? burning the physicality, sacrificing the physicality for the elevation of the STM. The Fountain of Youth, does not sit in the physical D, .. sits in the elevation fo the STM, that the physicality is not needed to burn out, to justify, to create a condition for the elevation fo the STM in his path in either way. Now we understand more, now we become part of the structure of the creation in what we call plasmatic condition, or as we said, energy in a Pl condition, or what we call Pl in a dynamic motion. As I explained in Iranian teaching .. we don't see, (:38).a dynamic brain, liquid rotating at high speed. Because you thought you could create the dynamic reactors so the brain is the center, but still moves in high speed in plasma conditions in the Gans. We need to go a step further, we see a ?? light in the D of physicality in different ways. We see radiation Pl T at the field strength of the U. We see strength of ?/ galaxy. We see at the strength of the solar system, and we see the strength of the man's structure. In the body .. is one of the first places where we don't see dynamic motion. Where the compromises between different M field strength in the radiation field has allowed the man to work through the D of the brain. A stepping ?? and each one of these have a specific M plasmatic field radiation, that the man has to understand. Till you do not understand these plasmatic M fields, you do not create the rays as is in the Book #2 to be able to create, what we call, transportation. You travel at the fields of the rays of the strength of these fields that allows you to travel to different dimensions. In so many ways if you look at it to Unicose and to the Creator. If at a certain point in your life that you create a condition, (:40). that the strength of the purity of the heart reaches the strength of the point of this you have touched the soul of the Creator. You become aware of the knowledge of creation and then you have to translate if back into human language. Or you decide, your soul decides, I have seen the Creator, why do I have to be in D of physicality, and man departures in D of physicality, or he leaves the physicality in a joint D that you see both, then you become what is called the prophet. If you can keep that

point of sincerity and the knowledge at a constant speed, you stay forever a Messiah. But in the case of present man, we have seen the temptation has changed direction, and somewhere after awhile he is cut off. This is what is about, these teachings. To bring the knowledge to man that he understands the process of the Pl T in a nuclear, or what we call field radiation that allows man to be able to transmute, not to transport. Transportation comes out of the matter state, .. out of the fields in the D Pl T, field radiation. Your knowledge is not hidden, if you read the Books it's all in the books. (:42). Then we understand more. .. what's the purpose of these teachings, then we understand how as a human being we have given our knowledge and life for crumbs, as I said before, where the cake, is right in front of us. The understanding of the truth, .. of the elevation of the soul. .. In so many ways, Mitra is with us. In a way, the love of the Creator is amongst us, and that allows us to be to choose to exist, to be able from now on, to elevate to this ?? level. This is the right, .. the privilege for the human race to be elevated to this D. It's been hidden from man, because man chose the path of destroying to achieve a faster path to the Creator by eating other energies. Now that we have the knowledge we don't need to destroy another life. We need to tap into these fields strengths, understand them and chose we want to be in a galaxy, on the Sun, in the Unicose, or with the soul of the Creator. And all that within the center, all carry the essence of the same soul. The soul of the Creator and nothing else. We come from and we go back to. I made man in the image of Myself. (:44). If many of you have tested it, when you put 2 mirrors opposite to each other, and you put a mirror in the back. You look and you see many pictures of yourself. Thousands of . This to this and the intermediary of the physicality of the man. In so many ways, the intermediary has given a false image of the creation and the Creator at the same point, when in fact, the Creator hasn't been anywhere near and close to Creator. The created has made a falsified attempt to, in not understanding the work of the physicality, what we call, the Inertia. This is ?? what has blinded the man. With the new understanding we give you the opportunity to get rid of ?? false imagination. As the man through understanding the totality will open the path to receive and to give from the Creator to the creation, and reverse. The transmutation through the Pl T means the condition to understand the duality of the communication. This is what the Pl T is, this is what we call, nuclear Pl T, because this needs a strength to be added to, that it can jump further and at the same time to jump in both directions, that it can support what we call, to elevate, to transmute, (:46). further. In so many ways, to be able to receive from further. Where as we go further we reach the Creator, where this is the STM. We will not see the Creator by the eye, but we'll feel the essence of existence of His soul. Then if you want to manifest yourself in the presence of the Creator, then the condition He creates in that position and time, in what we call, the Inertial soul of the Creator, that might gives you the D of physicality, that with the eye of the STM, you might feel the presence of the Creator. Then you understand where we are heading to. Then we understand what we are teaching, and where we are trying to get mankind to understand more.

In so many ways, the knowledge of the creation, .. the Creator, .. of the transmutation between the 2 is what is needed for man to understand the process of the fields of the radiation, which can go up. In the world of the matter state, we go from Alpha to Beta to Gamma. But at the present most of the nuclear physicists have not even understood how to elevate, from one to another, let alone to understand this. This is the purpose, and this

is in the matter state field radiation and it takes man centuries to understand this. I am a nuclear physicist and I tried to explain to this to what I call, (:48). fellow scientists ?? What is our, and how can you push the Alpha radiation in a condition of the existence to become a Beta, to become a Gamma, but if you look in the body .. your glands do this job. That's why you take Vitamin B12 or what we call Gamma radiation. With this comes from the interaction of the vacuum in the body .. with He, where this comes from, just next to the blood of the man. From the Cobalt, but it's the same body. How does the body .. manages to do that. The scientists have not understood, because up to now they took every fields as a matter state of the fields, and not as a plasmatic field of the state. This is where the knowledge of the man has got a gap in it. This is why I have said, in the coming time we teach plasma nuclear T, because then you understand this process. I am a nuclear physicist in a Pl T because then I can explain to you how you can do both.

I always said, I remember .. my master in teaching at Queen Mary College, always told me, "Mehran get your degree, and they'll listen to you as a nuclear physicist, without it you are wasting your time, 2 years here." And now I appreciate his message, because as a nuclear physicist I can tell you, and you can check, and understanding of the knowledge is easy. (:50). But the knowledge of the man nuclear physicist, does not have to be 8 subjects for 3 years, and 15 hours each, if you look at it, .. 300 hours of nonsense teaching does not make a man a nuclear physicist, understanding the principle of the knowledge makes you more of a nuclear physicist than we have in the present time in the world of science. If you think of it, in the whole classroom you might have 3 hours of teaching of the real science. It does not need you to go to university of understand, you have 376 hours, of sessions of 4 hours to teach you the fundamental principles step by step. You are more nuclear physicists, than a degreed nuclear physicist with 3 or 6 hours of true teaching in the classroom. You have to understand the process. And the system the way we have taught brings you to that point, .. to that position to understand what we call, nuclear Pl T, where here (matter state) you are singular, where here (plasma) you are dual G and M, you have seen this in the patches and waters you have used to fight Corona. You give energy from the patches and you take energy back, you are both G and M. (:52). SO you have more knowledge than the present nuclear physicists in any institute and university in the world. And this is why they object to you, because you understand more than them, and they cannot admit they have no clue. You are more wiser and more educated then them. But with the education you have, you have education to reach the soul of the Creator, where you in a way, have reached the D if you want the true way to become Messengers of your own soul. To become the Messiah of your own soul. Now you understand what and why I said to you, I am the Messiah as much as you are, because I have understood the transmutation and transportation of the STM and its reality of the man to D of Creator, and as you have the capability, we are all Knowledge Seekers seeking the knowledge of the Creator, and in that process, there is no one above us except our own understanding. There shall be no king to rule, to tell us what to do, as we understand the kingship sits with the elevation of the STM, and not with the D and dominion of another physicality and ?? In this process when you understand the difference between the work of the matter state and the work o the Pl state, many of you rapidly move from one to another. And this is what we said, we bring the knowledge that every man elevates so, in one go, we are not going to spend 2,000 years in the churches

and mosques and .. to teach you about the fallacies of the soul, where the priests and the rest did not understand themselves.

In so many ways, the understanding f the totality fo the knowledge of the creation, (:54). sits within the structure of the STM understanding of the totality of the knowledge of the creation.

In so many ways, we have taken steps to teach the totality, and we said .. why we said when teach, we teach the totality, because we have one ??, and our teaching, once we teach we radiate the totality and understanding of the teaching of the STM, or by the soul fo the Creator. And in that process, man could be here, and other creatures of the Creator in other positions in the U ?? As we teach through the STM we have that vibration of what we call heartbeat of the soul of the Creator. It does not matter in which section or sector you sit. This is why I said from the beginning when I teach the man by voice, I teach through the STM the rest of the creation and the Creator. As my knowledge is not only by voice but through the understanding of the soul of the nuclear T of the Gans and the STM and its heartbeat. Now you can see how all the teachings come together. I am as much the Messiah of my soul, (:56). as you are for yours. .. how much I can elevate yours for you to elevate the others decides on what level we call, serving our souls. As we saw … in the original D and direction a simple process. I made man in the image of Myself that he has both the soul, the strength fields of both giving and taking, that in that process it's balanced. You can imagine how much you give and how much you receive from your soul of the Creator. It's you who decides what I call the subdivision strength, or if you become pure enough you will take the totality in 1 D and 1 direction. But you have to have knowledge of the process to reach that point. Detachment and serving ?? the Creator's field to be able to transmute to more D that allows the totality of the creation to become one. Now in so many ways, the knowledge of the man is complete, if the man understands the whole process. As has been explained in all these teachings. You only concentrated on this (mater state) up to now. Now we need to understand and concentrate on this (Plasma). you want to stay in the D of the physicality of the man, (:58). in the process of work of containment or Gans's, or you want to work in the strength of the work of the D of the Creator. The choice is yours, now you have the knowledge of both. This is what we said, we said we shall create life in the D of the soul that with it will allow the physicality to exist. Up to now only exist with this, to elevate this to create that to maybe to go to that process. From now on you have the jewel interaction where you create the soul fo the child in the womb of the mother, first, then with it you create the physicality. This way man has the freedom not to be detached and commit the crimes of the man today on this planet, to consume the others to elevate himself, elevates his soul, to maybe to take this path. The change of time is bringing the D of the soul fo the Creator at a higher order that the lower order does not need to suffer. To give more, to destroy more to reach. This is why the man has become so physical that he consumes anything to get to that point, with ?? robbing from each one, depending??? pocket to become millionaires. And every time you rob you have the fear of, "will I be caught," you loose more energy than you gain. We do by killing the animals, by consuming the soul, by consuming the field energy, by consuming the grain, which has a soul too, and we justify it. Now when I said, you can expand the soul beyond the physicality then you don't need

to kill, destroy to consume ?? because, (1:00). you already sit at a higher order. in the totality.

.. the process to create a new cycle needed a new generation, .. a new beginning. to be the process that the new cycle of life starts on this planet in the process of understanding the world of the creation. Through the elevation and understanding the plasmatic field of the U interaction and what we call creation fo the soul first, before the physicality. The soul of the child takes place first, and then it decides in its physical D. This is how you will transmute across the U, because now you have access to the bigger D understanding where the STP, does not need to be connected to the soul of another creature for them to consume them, for it to maybe add to a little bit to the STM that at a point it reaches a strength, that this strength of the soul can pass the STP at the point of death and old age, the can take to this path, to move on. Now we create this one, that no crime can be done as you have access to a higher order field that the life and the souls of others around you are not the source for your elevation of the soul. As you see from the fields of the U and Creator.

Now you understand the teachings are coming to a final point of you understanding the process of creation. This is one of the reasons, (1:02). that I have pushed, and will push again to change this time, to bring a new understanding. To bring an elevation of the STM.

In so many ways, we work with so many dimensions and directions, that somewhere you might understand a piece of it, that it gives you a starting point, .. gives you a D to extend the knowledge. The knowledge of elevation of your own soul, .. of understanding the totality of the sources of creation, .. that every man will have access to and we cannot leave none behind. .. in the process of teaching from day one, we came for this, and we sat for this and I remember Dr. Elyva .. you cannot leave no one behind, you have to take everyone.

How can I leave anyone behind when I find the knowledge of totality. It's you who decides with understanding to go this way or .. that way. We are only aware of higher order as we see, because of our knowledge we don't see the lower order, as it is not open to us, the same as we are ?? primed to the higher order, that you haven't understood. We are … in a very peculiar position, the way the emotion and the brain of the man was, within the soul of the Creator and the STP .. (1:04). we become another point center to other souls at lower level in understanding.

Heartbeat

In so many ways, the totality of the knowledge of the man, has to be to understand the duality of the fields and their interaction, and every Pl needs a ?? vibration, what we call the heartbeat. When in fact the heartbeat comes from the interaction of the, what we call G and M at a given point which creates a shock of ?? start ?? and than increase, and that's what we call a heartbeat. The totality of the balance of the existence. The totality of creation in the essence of the knowledge of the Creator.

Mitra

This is why I explained while Mitra takes its like in human D, we go back to the home, land where Mitra manifests itself in the land of ?? We take Mitra back home for her to show her beauty. and with it to spread the knowledge of man to understand the duality of the existence of the soul and the physicality and the path to understanding the totality. You light a candle and then you put in the light house for it to shine. We have lit the light for the soul of Mitra, (1:06). and we take it to the lighthouse where it was put to shine. Now many have understanding why I am detached, because the candle needs to shine, and needs to be taken unconditionally back to the lighthouse. the light of the Creator that with it can shine, that encourages the love of the Creator to shine and the totality of the Creator, creation, creator. which is everything that has been created within the U. Now many of you understand why I am detached, because the candle needs to shine, and needs to be taken unconditionally back to the light of the Creator, that with it, it can shine, that encouragement, the love fo the Creator to shine on the totality of the Creator, creation, created. Which is everything which has been created within the U. Maybe many of you understand the process and understand the relation of the STM, through understanding the knowledge of the Creator, and nothing else. ?? Present and closeness, to understand more of, to be able to understand the possibility that I can become one of to be closer, and not I am here, maybe one day something might happen. The knowledge of .. Pl field radiation is the cornerstone fo man's knowledge into elevation of his soul and understanding of the totality in understanding the knowledge of the Creator. This is one thing we understand, I have always said, (1:08). you take from this T, from these teachings according to your intelligence, according to your understanding, but the reality is that how do you elevate, what is the understanding of a lion or an ant, that they can be on the same path. .. what we have said is very simple This is the soul of any entity, be it the man, ant, lion, be it the man from Zeus and the rest of it, for those systems are closer to the creation. When we teach through the soul, .. when you look from outside we don't see the soul of a king. peasant or an ant, always a soul ?? we see what it needs in elevation understands that he receives the energy from the source that he doesn't kill. It does not need to destroy, this is why the writings always said, when the time will come that the lion and lamb will sleep in the same nest.

end of kingship

(1:32).

The who betrayed what we call the path of the Creator, it is for them to find their souls. This is why we leave it to them to live within their own path ..

In so many ways, which one of you would like to have the possession and position in the process of knowledge of the Creator
When we see a wise man .. he shall not be the king ..

This the reason I always say, I am a KS and nothing else, (1:34). I see the knowledge of understanding the totality

(1:36). man will understand that this is the singularity and this is a duality .. each point has different values ..

In so many ways, the teaching of today has opened a new D in the knowledge of man ..

In so many ways, .. we need 3 to tango … in future time man will be shown new fields of radiation. For the time being this needs a lot of understanding for the man, and when this comes into operation the world of creation is not 2 dimension. The world of creation in D of Pl of creation is 3 dimension, and man is not aware of it. In my teachings I have already referred to it. But it's hard to understand. (1:38). You are not mature to understand. .

(1:40).

(1:44).

We'll go for a break and come back and try to answer those questions that are relevant to our teachings. (1:46).

>> **BREAK** >>> (1:50).

Q: .. on behalf of the KF T what we can do to help Columbia to overcome the present situation of violence that they are going through.
K- I have received this request in a different channel. As it is the process of the new structure is that we have passed on your emotional feeling and your fears to those who are responsible to put things right. These kind of questions should be addresses to the U Council and I have forwarded your request to UC as it is there dominion, responsibility. The Soul fo the UC has the power fo support as we have seen many times before. This question of you is already in the hand of the UC and it is for them to meet ..
(1:52).
(1:54). the same will come to the U Community ..

radiation will to be a support to you in the D of the creation and the Creator. Learn the process and you'll find much faster results.
Any more questions.

Q: (1:55). … break in audio >>>>
(1:56). (1:58).
Q: When you say we are all Messiahs, .. that we are all divine … divinity is in everyone.
K- The word Messiah fits into the teaching of the holy books, which means the one who will find salvation for the man and the humanity. This is what we call Messiah. I have

seen on the Internet, a lot of people putting, "Mr. Messiah." I am the Messiah, but to my soul. The same as you are. This is the understanding of. It's interesting the people who write this, we as KS understand but people don't understand, and that's what they are using against you. This means you are depriving your own soul and point further from the Creator. If you use the name of Messiah, which means the one who saves your soul from, (2:00). doing wrong, in a way, the soul which elevates to understand I am doing wrong. To harm the other one by it, you have already harmed yourself. You have already moved further up. the Messiah says this and that. .. it shows the lack of understanding. And .. damage to your own soul. It's irrelevant. We are all, we use the term of Messiah for our souls, not for somebody else. If it is used to create harm you harm yourself.

There is something very important to a lot of KS to understand. That the word savior, the only person who can save yourself, is your soul. And the rest of the physical D is irrelevant. We live a physical life, we try not to understand, where it suits us, to say we understand the D of the soul. In totality we are of the same. We .. the word Messiah, is your soul, nothing else. and how you create a condition for your physicality, (2:02). to sit within the structure of your soul ..

(2:04).

Any other question. (2:08)

Q: Spanish.., Are you from this planet, Zeus, or Sirius A or B?
K- I don't know, when I know I'll let you know. (2:10).
In the essence for the physicality of the man. from the soul in D and direction.
Q: … I understood perfectly.
K- Thank you very much.

Q: Salameea, .. … if we are able to organize a world science of soul festival for all scientist all over the world, with the help of all KS .. try to integrate Pl science in all areas of knowledge. (2:12). … ?
K- This has to go to the directors of the KFTV. And organized through the representatives TV …
KF is officially registered .. soon press passes of the TV will be given to the KS …
(2:14).

Q: I think that we can do on a regular basis.
K- You have to discuss this with

Around about the 25th of July we are a guest of the Romanian KF for the first scientific conference. I will be attending this conference.

The process of the teaching will take shape rapidly at the back end of June, .. KF internet group is already setup in Iran, the new pages …
(2:16).

R:

(2:18).
K-
Q: And maybe we can link with peace process and all scientist sign peace treaty ..
K- Any other question
Q: .. we can link …
K- We can hear you, but these things have to go through. If it is in that direction, (2:20). put it to the UC and your representative ..
Q: Yes, of course.
K- At the end of it …
Q: …
K- We don't need to wish for a thing, we have setup a structure. Go through the structure.
Q: …
R: ?? that's enough Salamea.
K- Thank you very much
Any other question.

Q: Why is B17 so successful in reversing cancer… banned in some countries?
Repeats. (2:22).

K- Go to Wiki and see what is B17
R: .. (2:24) Amygdalin. from ancient Greek almond ..
…
(2:26).
K- Is it because it creates cyanide it kills you, so you don't exist, you're dead, so the cancer doesn't exist. .. because when you're dead you don't have cancer, you died.
R: …
K- So it doesn't exist .. .
R:
K- So it creates cyanide. It's not radiation based. because all the B's are radiation based elements. not the ??
Okay, because B vitamins were used categorically to cover radiation ??
The D usually cover hormones and some other radiations. Because they couldn't tell people we give you radioactive material, especially with the Fukoshima, and Hiroshima, and the same way with the B3 and the other are covered under different names.
Any other question. (2:28).

K- One of the things we learned. in Iran is calling on world nuclear physicists to gather to decide on the future of nuclear industry, in the true sense of nuclear … weapons and heat.

(2:30).

To teach the knowledge of space correctly ..

The knowledge has to be the privilege that we all have, not just a few.
(2:32).

There is something more or less, we heard, it needs to be confirmed. it's very interesting, I have seen the head of FDA making a declaration, that none of the staff needs vaccination. And so we have to bring the thing out that the knowledge is accepted by all of us.

(2:42).

I put it in a different way. I wish the soul to come back to me, to become part of me, that it becomes no harm to itself and to the others. .. I except the responsibility of the elevation of that soul to myself, then leaving it in the hand of the time and the space. As I am the creator, as part of the creation of that soul, you don't wish death, .. nothing else. But you explain the consequences of me taking my piece back, it could be a loss for someone else, but without harm because it doesn't exist for their D. … we don't end a life, we elevate the life, we elevate the soul. And this needs a lot of understanding , .. maturity. The listeners always thinks, "oh, you are going to kill." No I don't kill. I allow the soul to be elevated in the position and D of itself within the structure of me, that it's not there to create a problem for the other and the others. (2:44). But when you have lead to such a position other sequences and consequences, as things have moved here, have to be adjusted. This is a very different way then has been understood up to now. .. I take the responsibility as I have made a mistake in creating such a condition, and not blaming the others, or other positions as fault. This is what we call, "to mature to the time." to mature to understand the responsibility, that you should have put the soul from the beginning in the right place, right order that such a position should have never risen. This has a lot of implication when the soul becomes the creator of the physicality.

(2:50).
Any other question

Q: about being able to recoat Nano coating plates if they go bad. Can we reuse them and put them through the Nano coating process again?
K- We do that in our factories.

(2:56).

Any other question.

Q: Certification from a few years ago for teaching workshops, because some groups are promoting their certificates and saying the Foundation gave them a logo to give workshops on the Keshe T?

K- These certifications were produced, on the wrong paper, company, wrong signature, (2:58). and a lot of people took it as from the KF direct. These are not from the KF. ??? signed by someone in the KF. These were done .. for whatever reason, and the gentlemen who done it, is not with us anymore. These are not valid. A lot of people like this because it gives them a chance to teach or whatever. We have asked them to withdraw it because it has no validation. But it was done 2- 3 years ago, to do a lot of things. but we stopped it.
We asked one person to give a talk to explain some things. and they made themselves professor at KF SSI. You can do whatever you like ..
We used to have people come and share knowledge, and then they become god and guru, because they had a couple of sessions, they were spoken to. ..

(3:00). And you do not need a certificate to be, to give your condition. I know this exists in Brazil heavily, they are trying to protect themselves because Kevin Blunder created these things …

.. if it fits into the brain of a teacher. Knowledge has been taught, and it is for the seeker to use it appropriately when it's needed. without certification.
Any other question (3:02).

Q: Is this the T behind the Tik Tack UFO?
K- Somebody can explain what is a Tik Tack UFO.
R: .. it's become a famous video now showing the US pilots following a fast moving triangle shaped UFO.. started to be called tik tack ..
K- Try to find a spot .. they tried to find a spot so they called it Tik Tack Toe.

K- There is a situation today .. turned back in to normal time. Situation we are involved privately .. (3:04).
Try to understand the T in its essence. We will not stop teaching, .. sharing knowledge. As long as there is life in this body, and .. we can share freely. We have caused an evolution in a lot of positions for the scientific world to adjust, as we are not a theological organization, we are scientific org. Try to understand the teaching of today, mainly on the understanding of the plasma physics, on understanding in how the changes will come. In that process you might mature. .. we might learn more about ourselves. More about our own creation, how we are. .. and we have

Today will be the last time on the TV channel, we'll go back to the usual way as we try to share knowledge and different people around the world.
(3:06). WE move to different positions around the world.

somewhere before o
we'll meet in Iran …

Thank you
R: (3:08).

ENGLISH TRANSCRIPTION

(:10). K- … It is nice to be back and nice to be able to share knowledge as we have done for 380 weeks nonstop. One of the interesting things is we are back on the road again, after a year and a half of lockdown. ..
Rome has been a beautiful place for us as we established a lot …
(:12).

(:14). .. that will push us away from aggression and wars.

First Project - Cleanup Tehran from Corona and Pollution

We have a lot of plans and what we say in Iran will be done. We set examples. We'll set systems to overcome the Corona, .. to cleanup Tehran from .. the pollution. These are the very first tasks we have on the hand. At the same time space T we launch the first .. flight systems in public. This is important for all of us, to change directions and D for all of us in the coming time.

We have entered a new era of delivery of the T. I thank the team in China … start of one of the largest factories of KF (:16). In the heart of Chinese where the Silk Road started.

We see the emergence of KF in Mexico where the factory is coming online this week, hopefully. In so many ways, collectively we have start working. The office in Tehran will become the spring board for many other nations to start the process.
The KF T belongs to all of us. We go back and open the factory in Italy, as we will push further on with our work around the world. ..

As was announced KF will host one of its largest scientific conferences in Romania in city of ?? I have been there years ago, we go back …
We welcome back the Russian team and we hope to have a conference in Moscow or anywhere they decide. KF has no limit, no borders. (:18). We share knowledge according to what we learn and the support we get.

Technology Shown first in Iran then spread out into world

In so many ways, we have entered a new cycle, upon my return to Tehran in the back end of June, in July we'll push directly into bring the knowledge and T to directly from Tehran across the planet. New systems, new directions will be set. We do not look for any other way but sharing new T that makes the makes the present science of space and T and rocket T obsolete. In so many ways, from now on it is in the hands of the KS I have endeavored to do everything possible to bring the KF into the line as we wanted, as we have seen, and now we have reached that point. In the past few weeks we have tried to teach you more about the science of man, about the science of the operation of the body of the man. In so many ways, yesterday in a way jumping into Rick's workshop, we tried to open new doors, new understanding, and in so many ways, tried to explain new dimension (D).

Soul Teaching Starts here>>

Teach Soul Elevation - Be Seen as a Light

One of the most important things **we'll teach in the coming time is how you can elevate your soul**. In a way, **in the D of physicality to be able to super pass the D of the physical observation. In a way, to be seen as a light**. As I explained, .. is that we have seen the time and the place, we saw, (:20). and we know that the kings, those who abused the tablet, like the cyanide to end their lives. If we understand the position ..

Soul's Position deliberate to absorb highest fields to the STM

In a way, we know the brain of the man, if we look at it on a side way … the shape of the brain .. sits in a very peculiar position, and **this position is made deliberately that when you breath air, or you drink water, the water goes, passes. In that position, the best, highest value field strength from the air and atmosphere is directly transferred to the STM**. What this means is that the best is taken in directly. The position of the mouth, .. and nose, in **every shape or form is preplanned by the STM for its own use and nothing else**.

By Consuming matter of planet we elevate the soul to free itself at death

By **consuming the material side of .. structure of this planet, we absorb some energy** in the stomach of the man, and these energies again gradually added (to STM). (:22). to **elevate the soul, that at one point, soul can free itself at the point of death**, to be able

to become out of its cage. What we have been teaching and what we've been extending your knowledge has been how to elevate this point (STM), at a point of need.

New Technology will be released to rapidly expand the Energy of Soul

In the coming time in a very short time, **upon my return to Iran** and teaching of the new space T we will **introduce a new science** where using what has already organized by the man, in the time when he used to take the cyanide to kill himself, or end the life in the mouth. Now **we use the same passage, we use the same position by transferring specific way of energy, that rapidly we can expand the energy of the soul without creating death**, that the STM takes over the physicality. Where man has control of the position of his energy. (?? Does cyanide have the capability to rapidly expand the soul?)

By Expanding STM can repair, feed, transmute and transport physicality

In that process man will be able **to allow the STM**, strength of the STM **in going through the physicality direction to repair, to feed, to transmute and to transport. In a way, we allow the STM to shine over the existence of the body** .. in the physical D. This T has been brought into teaching some 7 years ago, specifically in two teachings, (:24). I referred to this. Now we can open the book.

Soul and Brain will work inside out - but now in dimension of Plasma

In a way, as you carry in the D of the physicality, the whole game changes, the change of the game is that the STM stays in charge, and the physicality .. becomes encaged in. You still now have the brain facility, and brain work as you had in the skull .. which we are used to, but now the work, **works inside out. Which means now the same system as the brain .. works but in the D of the Pl**, and this D of the plasma creates a new condition.

Where up to now the soul decided where the physicality, now the physicality you've been in charge and you still being in position of the structure of the brain inside. You can decide I want to stay hidden. I want to be whatever.

No Death and Man will have the Knowledge of the Universe

In a way, the brain of the fields inside, and the fields that are sitting around the plasmatic brain outside create a new condition. **Where physicality in the D we have, will decide the manifestation of the soul to outside. Where diseases don't exist, where the man shall never die, where the knowledge of the U will be brought to** man, and not the knowledge of the man which is lead in the physical D.

It's a Gift to those who understand Peace - Mitra

The process to teach you, (:26). this conversion has taken a long time. This **will be the gift to those who understand the world of the peace and conversion to mankind. I**

will release this knowledge in Iran, the land of Mitra. Where the whole thing started for humanity.

Free the Soul Before Death - STP will manifest in another position

In a way, **you don't need to wait to die to free that soul**. In a way, with the understanding and the memory you have and the knowledge you carry in the D of physicality, you can dictate the condition, that when you want to have the soul. **The STP shall not die, will carry the information and in that process you decide, when I manifest myself at another position with the D of the soul**, would I allow in trusting the soul, the soul to go back to its position, where the physicality of the position and time might not be the shape of the man. In a way, the point of transportation and transmutation of the fields will dictate the D of the life in space.

Knowledge Seekers given chance to use Gans to Elevate Soul

In so many ways, **many KS will be given the chance to go through the process**. You took Gans's to change, (:28). Corona, .. cancer within your body, .. on the skin .. to relieve pain, **now in a specific condition and combination of the Gans's will allow the man to be able to elevate energies at the level, at the strength of the STM, where in transmutation will be delivered**.

Back of Throat sits below STM for highest field Absorption

Do not forget the most important part of the physical body of the man is exactly where the back of your throat sits. The air of the planet, the matter of the planet, and the liquid of the planet have to pass this point to go into the dimension (D) of the physicality of the man. And cleverly the STM has positioned itself in this domain. **The shortest space, the highest value maximum of anything that enters the body.. the soul shall take**.

Use Gans Tablet to Elevate Soul

Now we use the same knowledge and same T to achieve this through the development of the new science of the **Gans at the level of the soul. It is not bigger than the tablet. Those who elevate can change that into the D of the M field strength of the STM**. (:30). There are no tablets in the U, understanding how to mix and create the conditions of the fields of the environment and the Inertia of the masses of the environment should give this knowledge to the man to be able to do this at any point in the U.

Switch between STP and STM - Manifest as you like

In so many ways, we teaching enters a new era of understanding the work do the U, where you can **switch the soul to physicality**, and in the memory and understanding of the internal brain of the man, or what we call **the STP, to be able to play between the 2 souls. Then the interaction of the 2 decides if you manifest as a fields and a plasma**, or you manifest as an entity. What we call the transmutation of the fields of the U.

The Mother will give birth by transmuting the soul of child outside

In this process … is very simple, **a mother giving birth will be able to transmute the soul of the child outside**, and in that process in transmutation of the soul, **the child will take the shape of his physicality according to the wishes of the creators of it, which is the father and the mother.** In a way, we create D of creation from the soul of the two, and then the soul decides in its manifestation, (:32). in any dominion in the U.

The Child will be Perfect - How it is done in the Universe

This will be **a perfect child. This is how life is given in the U**, we don't have delivery rooms and hospitals, and all the rigma the man has made for a physical deliver of a child.

Secret - Couple stays together forever - only 1 Child

But there is **one secret** in this. Once the child is created by this**, the two (man and woman) stands forever**. In this process man will more or less, can **create only one child**. In that process, it is **the satisfaction of the souls. Adultery becomes impossibility and prostitution will never exist**.

Will Create the Perfect Man

This **process of giving child will be taught rapidly in the coming months. This is the way we'll create the perfect man**, where the soul is perfect. The create of the STM will lead to the creation of the original soul. Many of you looked for twin souls. Now you understand. When a woman of mankind gives birth in the space, shall not be as of today, as we need delivery rooms, and the pain of the passage through the birth tunnel. The root and the basis for this, (:34). was set, and many times I explained, in the enhancement center.

Will be Taught how - Child Born with Knowledge of Universe

The process the way you go to training how to give birth, will train how to transmute the soul of the child in the D of the atmospheric condition where it might be, that it can survive. The beauty with this is **that the man has now the ability to transmute the soul outside, the child will be born with the knowledge of the U**, and not only the knowledge of the man. This is how the man will become equal to the rest.

Mankind will Change in One Go

In so many ways, **mankind will move in one go, from the physical D to the D of existence in all dominions**.

Parents look after Child for Eternity - Never a Breakage -

Where **the child conceived in this way, there is no, and shall never be breakage between the two. Those who try to break this will pay with their soul, as interacting with the souls which are set to look after the child will be for the life of the child, for the life of eternity of the U**.

The new process and the new understanding, is what will come with our teachings in Tehran. **We return back to the land of Mitra, where the original birth was conceived, but this time at the level of what we call, the soul of the creation and the Creator**.

The Knowledge of the Man is Complete - I Am the Creator

In so many ways, we **complete the knowledge of the man**, (:36). and the existence of the man on this planet. **I am the Creator and my knowledge is free**. It's for mankind to understand the totality of the knowledge.

Understanding the Knowledge of the Universe Does Not need Schools

In so many ways, in the coming weeks we teach you how to be able to live both D. To be able to survive the span of U. To be able to have an option to travel with a donkey, or by foot, or by your jumbo jets, or UFO, or in the D of the soul. **Understanding the knowledge of the U from now on does not need schools**, universities, and professorships or layman on the street. We still teach in this D.

Moses had the greed - Christ love of woman - This time no mistake

I tried to teach this to Moses and he walked away with the greed of the man. I blew the whistle of knowledge to Christ and the beauty of a woman was more important to him than the gift we gave. Now **this time we deliver ourselves**.

Man should become the Son of God

In so many ways, **the man should become the Son of God, the Sun to shine. Every man has the capability to be the Sun**, to shine independently according to what they deliver in the D of the soul. This is what the position, (:38) of the U Councils will be in the same position .. .**you will know the members of the UC by the light they shine, but not what they show in physicality**. Now you understand why, **because the elevation of their souls will super pass the D of their physicality**. Even though you might see them in the D of physical entity, as you wish and the strength of your observation.

Elevation of Soul through Breathing - Drugs too fast - Physicality pulls it

In so many ways, we open a new knowledge to mankind. We open a knowledge of the creation and the knowledge of the created, with one simple process. It is somehow incredible how mankind has not understood this, when you do .. **the fast breathing through your nose or your mouth you see yourself in changing the blood circulation, and more energy to elevate and you enter a D**. When you inhale drugs, or

amphetamines in one way or another, **you transfer that energy very fast but you cannot hold on to, as the physicality pulls on it**.

How to Ignite Hormones of STM to overtake Physicality

This is why in the past few weeks **I deliberately took you, to show you what we call, the hormones. What we call the drugs** we looked at. Now the problem with many of the KS will be, **how to pass the barrier of the hormones which he created, (:40). to create manifestation of physicality, by reversing the feed to be able to ignite the hormones of the STM, that leads and ignites to the creation of the STM to become, to overtake the physicality.** Now you understand how the teachings are so much connected.

Hormones are Energy Packages that Ignite Creation of Cells in Physicality

In so many ways, **you call it the hormones, we call it the package of energy that can ignite. The hormone ignites the creation of the cells in every part of your body.** The hormones are what we call on the soul side, is **what ignites for the soul to expand**, and to what extent you want to expand, and the process the same. **On this side of the physicality will lead to the creation and manifestation of the cell**, the lung and everything else we control.

Hormones on Soul Side Cause Expansion of Soul - all the way to Creator

On the other side, on the D of the soul, the hormones is created to trigger to what extent you want the soul to expand itself. To the D of other universes, to the Creator, or to the D of the physicality of the man, or the planet.

Taking Man to Understand the Totality of Creation - Moses blocked path

Then now you understand how **we are trying in a very soft way to change the D of the understanding and the knowledge of the man, into understanding the totality of the creation and the created**. If you want to suffer in the D of the physicality, (:42). you are quite welcome. You have been battling with it for thousands of years. **If Moses would have not destroyed the totality of the messages, man would have been on this path thousands of years ago**.

Mitra is Back - Knowledge Carried through Her Blood

Mitra took the presence of absence, for the love of the Creator, and now she is back, and the knowledge will carry on through her blood and to understanding of her creation.

This time the knowledge is complete - No mistakes

This time the knowledge is complete, and we make sure there is no discrepancies, and there is no mis-messages. She is amongst us, and we respect in servitude.

Have to Wipe Out the Memory of Killing in the Man from STP

The **knowledge to be able to travel the spans of U is now, is at the reach of the man. But man has to learn how to wipe out the killing,** the destruction habit which will be carried in the way, in the center of this thing ( ) when it moves. **We cannot change into the D of physicality in another position, where the knowledge and the memories of destruction and killing exists within the brain of the man, within the STP** of the man.

If We Change Man He'll Go Back - Man has to Change

With one word we can change everything, but man will go back to his old habits. (:44). It's the man who has to change.

Have to Create Soul First in Perfection - Than add physicality to it

In so many ways, **in creating the physicality and then the D of the soul with all weaknesses. We create the soul first with perfection and than add physicality to it**. In so many ways, **mankind will not be able to do wrong, as the soul will create a perfect life within the structure of his existence first**, before releasing the physicality in the D of the child, where the soul will change position, but both from the beginning are aware of existence of both and in harmony.

Mankind will Have Understanding of Totality - Neither a prisoner of other

One doesn't become a prisoner of the other, and the mankind will have understanding of the totality.

In so many ways, **I can stop teaching today. If you understood this**, now you have to understand, how from now on, **to translate the knowledge of the U, into understanding of the man D of physicality**. (:46).

How to fit into little brain - Knowledge is there but no physical dimension

In so many ways, we now understand what all these teachings have been about. How we started and where we'll finish. And the **main point of concern for man is what to do with now receiving so much knowledge from the universal understanding into little brain** of the man, which is in there **but has no physical D**.

Brain of Physicality and Brain of Soul - Made of Same Plasma

The beauty of this cycle is amazing if you understand it. In a way, **when mankind comes to this new point both the brain of the physicality, and the brain of the soul, or the central control, is exactly the same, made of plasma**. Does not matter wherever you

travel in the U, the shape of the physicality will come on the interaction of the fields of the soul of the man's physical D to manifest whatever shape that entity could be.

Interaction STP and STM gives gravity and M fields to travel anywhere

But this gives you a beautiful condition and understanding. If you understand this, it will move you to a new D. Listen very carefully in how I chose the word, Plasma. (:48). **Interaction of the plasma of the STP of the man and the STM, will give you the gravity, and the M fields to travel this entity to anywhere, position in the U. This is how man will travel in dimensions and dominions of the Creato**r.

All the Knowledge in the 3 Books

In fact, I take you back to Book #1, I told you very simple, that **all the knowledge man needs to understand is in the 3 books**. And now you understand. Isn't it this what you saw and you read in the first chapters of the book? Two plasmatic systems interacting? Isn't it this what you are doing in D of dynamic reactors, mixing Gans's and layering? Now you understand how you can transfer the STP and the physicality of the man by expanding the STM, now you understand Book #1.

I am the Creator and I know how to teach my children. (:50).
I think mankind has reached the point of maturity to understand this point of creation.

Reason for 5 Cups - Where to place the Souls
In so many ways, when we taught you **the 5 Cups, the reason for it was to bring you to this point, for you to understand where to place the soul**, for you to understand where to place the soul of physicality, .. the physicality, where to understand that these manifestations, interactions with the Inertia of the fields of the point of manifestation, and the bigger brother, which is the G fields of the point.

But **behind it sits the field forces of the Creator**. This mankind **has not been taught yet**, and it is too soon.

Hell Cup - when you move away from the knowledge of the Creator

You have another Cup which will sit somewhere here, which is the dominion and the D of what we call Hell, moving away from (Creator). (Going towards) the knowledge of the Creator, is the true heaven. The way man has been in doldrums and suffered for thousands of years.

True Heaven is moving Towards Knowledge of Creator

And in understanding the knowledge man will move to understand more, **and find peace and tranquility, and understand the totality of the knowledge of the creation, this is the heaven. Nothing else**, and nothing more.

Anyone Breaks Law - Loose Own and Offspring's Soul

In so many ways, now you understand what, (:52). and how we have created the knowledge in 3 books. There is one secret, and I tell you this from now, **anyone breaks this law, the soul shall not exist, and any offspring's will go the same.** We have kept to this, and we shall keep to this, because **this is a cornerstone of perfect life in the U**.

Child through Soul can do no wrong - Physicality has no control

Once you create the child through the soul, the physicality has no control, and cannot do wrong. So be wise in what you choose, and how you choose, and how you create your next generations. Through the D of physicality of the presence and suffer everlasting with the life of the physical D, or create the children through the interaction of the soul. **That they lead a perfect life and change the course of humanity. It's your free choice**.

Move Center of Knowledge to Tehran - Close Vatican

In so many ways**, mankind now has been allowed to understand the totality of the knowledge of the creation**. (:54). Understanding the operation, translation, and transportation, comprehension, and transmutation of the fields of the U, in the D of the STM is what is to come in the teachings and our work in **Tehran. We become the center of what we call, true science of the creation, and the theology of the understand, the center of knowledge. Soon we close Vatican, and soon Jerusalem** will not be what it was. As **we move the center of the knowledge and the Creator to Tehran**.

Back to the Origin where mankind spread across planet

In so many ways, **mankind needs to go back to the origin of his point of spreading this planet**. In so many ways, mankind has to understand from this point on, becoming the soul, at the strength of the soul, this expansion of the souls across this planet, 7 billion plus of them at any time, in this moment of time. It is very much what we wanted.

Seven Beautiful Souls in Tehran be Taught - to change the Soul of Planet

In a way, if you understand, to **Tehran 7 beautiful souls, who they will learn the knowledge of the creation, they all interconnect, and with it covering the whole span** of what we call, spherical shape of this planet. **They will change the soul of the planet and the soul of every living things on this planet**. In a way, you were looking for satellites to change the man, we use the elevation of the "STM satellites," to change the totality of the man, the totality of the life on this planet.

Gans's Interconnect Whole of Planet

Now you understand why we have been encouraging you in every shape or form in past years, to spread, to consume and gradually use Gans's. In so many ways, **the Gans's are**

connected to you in the water systems, and in the air you breath and you have become the center of these, from the heights of Himalaya to the depths of the ocean, we create that D and the strength we were looking for, to bring the change, we wanted.

Only Need A Few Souls to Elevate the Planet

Now we only need a few souls to be elevated to the position of understanding only this. (Shows drawing of when the STM expands beyond physicality). Then we achieve this (drawing of the total Dome over the Earth). (:58).

We do not rely on rely on computers and we do not rely on manmade satellites. We made our computers within the brain of the man, which has the capability to carry the knowledge of the U, which now that we understand is the interaction of what you saw the STP and STM created the brain of the man. Now **the reverse has created the brain of the STM, which has knowledge access to the totality of the knowledge** of the U.

Conversion and the diversion, and understanding the totality of the knowledge. Now the STM will become the shining star in the D of physicality.

In so many ways, I tried to explain to you in a simple way, my book and my knowledge has not changed, it is not the Coronavirus that is different in England, or the Chinese version, or the Indian version or whatever. There is one version in that book, your understanding according to your intelligence and the comprehension of totality. Now read the Book #1 again with the knowledge I taught you today and see the lines and the words are the same, but the comprehension has changed, and looks and understands totally different from the same words, and the same lines, and the same pictures. (1:00).

We know how to write in the pen of the man, but we write in the pen of the STM and the soul of U. We still keep busy building systems. Try to see how much of the knowledge of the U, which has come to man can be changed to the knowledge in the D of physicality. **With one breath I can change every molecule on this planet to gold**. And with one breath to H. If we had the knowledge to create all this U, dust of the Earth is nothing to change.

Love of Mitra - Only reason for Creator to be here on Earth

As I said many times we came here only for one reason, and only one reason, **for the love of Mitra. From now on mankind cannot make a mistake**, as the STM has no limitation of life and shall never make mistakes, as in the field of Pl has access to all to be creating the perfect life. (1:02).

Technology means Knowledge into Dimension of Physicality

Humanity has entered a new D of knowledge and science, and in it there is no T. As I said, in teaching of yesterday, **when you bring the knowledge in the D of physicality it becomes a technology. But in the U there is no T, except understanding the work of**

the fields of the U. When you have a T it means you have entered a D of physicality. Then the U is oyster for those who like to play with toys.

In so many ways, one should understand that **the knowledge of the creation has always been with the man. It's man who has to decide the point of change, the point of elevation**, the point of living a life to suffer in the D of physicality, that one day at an old age the soul will be able to break out when the cages of the physical soul cannot hold, or the man understands the totality and takes the step itself.

Gans's for Change are in Palm of My Hand

The Gans's to give the man the change to be able to reach this point is in the palm of my hand. (1:04). It's for you to understand. You can eat drink and breath forever on this planet and never reach the point of the control and elevation of the soul, or with one word you'll be educated with the knowledge of the U. And that trigger point, that hormone point, sits between the 2 hormones, the borderlines between the D of the physicality and the STM.

It's very much like a double door. You standing on which side, and who is prepared to turn the key. And when you turn the key is the other door key has been turned that, that the both can become one, with no barriers. This is what we have offered you with the knowledge of today. No barriers, which in the STP of the man and the STM, access to the D of physical life, or access to D of the universe and understanding of the totality.
Establishment of Peace is Prerequisite for Change

One of the prerequisites to (1:06). this is the establishment of the peace on this planet, agreed by all its citizens. End of kingship, as there is no king but the Creator. Laying down of all crowns, and possessions and positions by them. Becoming subordinate to the STM who is the essence of the soul of the Creator. The leadership has to come from the interaction of the STP and the STM where both are aware of the perfect life in the D of physical, or the fields of the U. There is no need for the Messengers, for my knowledge is the light and is seen by the soul.

In so many ways, **mankind has to reach this point, abandoning killing**, end of totality of one man being higher than the other, as the STM is the same in all the dominions. End of kingship. End of one thinking he is higher than the other as we are all equal in the D of creation. **Mankind can reach this with the stroke of his pen by his own will**, or will suffer thousands of years to reach the point set out today. (1:08).

You Allow them to think they are Higher Than You

Let's see which **religious leader will put his turbine and hat down**, and see which kings will put his crown down and become ordinary man on the streets of the planet. It's them that are stopping you reaching the elevation of your soul. And **it's you who are allowing them to think that they are higher than you. Elevate their soul, the STP,**

that their soul super passes their physical D and they understand the truth about the creation.

In so many ways, we have taught you everything you need to know and to understand, now it is for you to be able to reach point, that you can allow your soul to become the dominion, that it has knowledge and access to the whole of the knowledge of the U.

In so many ways, when the **STM and the STP .. become one system, than in that process, they will react as a new Pl with a Pl of the Soul of the Creator**. Now you understand how man's system works in respect to the Creator. (1:10). This is why we always taught you, even in the last week teaching, in the levels of interaction. Now you become the center where the soul of the Creator shines upon, and in that process sometimes you radiate and you manifest, and sometimes you pull and you become part of the creation, and the Creator.

Stealing Pushes you away from the Creator

This process has never been understood by the man, this is why in all the orders we gave we said, thy shall not steal, and which woman and whatever, because **when you become part of the Soul of the Creator (STC) you cannot steal. As what you steal does not become part of, but becomes away from.** This is the reason why we pushed the man not to steal and another soul's life by killing. But leaving to the will of the man.

Mankind has to understand the totality of the elevation of his soul. The choice is very simple, live in the D of the physicality and destroy, and stay, and worry about the fountain of youth, how long more can I live. (1:12). If you understand this, you can live forever.

Now the Decision is Yours

Now choose. Now decide. Now move into the D and the position and dominion as you wish. We have taken the barriers down. it's you who have put these barriers up according to your intelligence, comprehension and your prejudices. **The STM is free. It's man who has engaged himself, and encaged himself in the physicality** of life on this planet. You see how simple it has become now that you understood. Past few weeks, ..months, and years teaching. **Now you understand what we could not explain for thousands of years** to man. Common man on the street understands the knowledge and language of the Creator in one stroke. You don't need to be a professor or a king. (1:14).

I hope I have managed to bring a new understanding, to bring the totality of the truth to those KS who understand and open to understand the levels of transmutation and transportation of the fields, and with it, the understanding of the process of creation and the Creator, and manifestation in any D and dominion in the U.

If you like to go on commercial break ..

100 Mentally Handicapped children elevating soul - becoming normal

K- before we start this session, let me explain to you, the work of the elevation of the soul in the physicality of the man in the larger scale has been carried out by the Iranian KF team, .. in the orphanage of mentally handicapped people last March when we started the process of supporting the Corona. Maybe by next week we'll have video from this orphanage, when the KF team with the officials from the Iranian leadership and those of the Sepah will go to visit this center, and to show how in a very soft way, we have managed to change maybe in the D of physicality manifestation, the soul of 100 children. This is one of the most .. comprehensive tests of the T. And from this week the KF team changes in a D of elevating the soul more directly, (1:22). and we'll observe the change of these children in the next 6 and 12 months. How those in the D of physicality we abandoned, and those who love and care the physicality and the STM looked after it., and now we see the process of change for them. We'll see how the next system, I will show today will come to show itself, and how we can elevate the STM. in very simple ways, but man had to understand the process. Next week ..

We see how the STM has changed. In so many ways, as we call them mentally handicapped ..

(1:24).

If we can change 100 children of man, we can change 7 billion of man. The KF team even with the videos we have seen with them this morning …
(1:08). the end of Ramadan. In that

We'll make scientists out of them in the coming years. ..
I hope many of us will join us next week …
for man to see the changes to come, and to hear how soft and gently

(1:26).

R: In testimonials on Monday ..
She started the One Cup .. within 3 days her symptoms virtually disappeared
(1;12).
Q: … in one of your drawings you have man, woman, and soul child. You said man cannot make any mistake. if you try to break the bonds of them .. one will pay dearly. But you said again once you create this soul how then are we able to break that bond if we can't make a mistake?

K- I think you are crossing lines in different ways. When a child is created not by the physicality, but through the soul in the D of the womb of the mother, will then have a D of dominion that its physicality will be decided by the wish of the creators and the soul of the created. Which means the wish fo the creators, the parents are there ..

mankind will learn to create from the soul first, then the physicality it's a totally different. Now you don't need that

(1:32).

As they are connected to all the fields there cannot be an adultery, cannot be a breakage of, because if you look at it, it is like an electron and proton

Q: So there can only be 1 soul child? (1:34).
K- In a way, bringing up a 1 soul child takes a lifetime of the 2 souls. to create perfection, it's a flower that it needs attending to day and night. You have seen the birds ..

Q: What did you say about the multiple children, exception?
K- It needs a lot of
Soul Children from True Love - Way Humanity interact with UC - next generation

It's not running up a U, it's unifying a U and it has to come and it **has to come from true love and understanding**. This is the only way the soul of mankind will interact with the soul of the other creatures of **the U to create the next generation of U Community**. In the D of physicality you cannot do. (1:36). The acidity, the "alkaline-ness", the material composition fields of the two does not match, but in the level of the STM and the creation and the created, it's all the same, the same fields. We don't have the soul fields of the man from Earth, even it has the pack of the AA which lead to its creation, but in reality it's interacting with the total fields of the U Community, and you can always find in a matching fields that interaction can lead to creation.
Any other question.

Q: .. what beautiful news about these handicapped children … (1:38).

Yesterday I come across an interview, with Rand and he was talking about Med-beds. have you heard of?
K- Med beds have nothing to do with the KF work, these are medical beds .. these come from these Sci-Fi terminology ..

Q: . this man mentioned the connection to plasma fields.
K- Thing is a lot of people look at the KF EU and they are connecting one to another. We are aware of it, but we keep the EU…

().

We have extended the knowledge to a new version compact ..

() .

(1:44).

Dark Forces Only Exist in Your Brain

Q: Ginger, … Meanwhile Dear Sir, **how do we protect ourselves from intentional ill will, harmful dark forces** , entities here on earth, and then shifting to outer space and the other D ?
K- The dark entities and forces only exist in your brain. In the U Community we don't have wrong intention, it does not exist. In a way, (1:46). you are open to the forces of the balanced forces of the U.

Created by Man to Control through Fear - Why accepted by soul?

Speaking about dark forces has what man has created to put fear amongst the man. You have to understand why, what is the reason such a field has been accepted by the soul or by entity. Nobody puts a gun on the head of dog to change, unless you have reached the soul of it, and the dog understands this is how it has to be. These are, **these terminologies, are created by man to control man**.

Yes You Observe it - by Man's Habit

Q: **Meanwhile there are bombs going off and starvation. I am having a very difficult time because my emotions are hemorrhaging pain and suffering for the reality, my reality is, you know … is observing**…
K- **Yes we are observing, this has been the part of the habit of the man for centuries, and it will take time to change. If we change it, it goes back on again**.

Israelis 7 Year Bombing Cycle of Palestinians - Generate Wealth rebuilding

I was talking to one of our Iranian KS and people highly influential in Iran .. I was analyzing what we see in Palestine in Gaza strip today, where they are shooting and killing, but you have to see, **exactly every 7 to 10 years, Israelis start the same thing**, (1:48). **because people don't understand the structure behind it. Every 7 years, every 10 years Israelis go bomb this place**, locked up prison. Then do you know why? If you have all the cutlery and crockery's, **all the food in the house, you don't need to go and buy new crockery's and cutlery's. Israelis control Gaza strip and the Arabs, Palestinians who have lot of families and they have extended life outside Palestine, work outside and send money inside to build these houses**, homes. And the Israelis every 7 to 10 years flatten these spaces **to create billions of dollars for the Israelis, because they are the only people who can supply the concrete, the wiring, plugs and everything else**. This is the disastrous conditions that exist because of locked up prisons. And they always use a celebration, the Israelis go into the churches, and mosques, create

and provoke, and then they said they did, so we do (justified bombing). Go back 7 years ago and 7 years before that. We have seen this on a regular cycle, Israelis destroying, for the Arabs who brought money to spend more, to put wealth in the pocket of the, cursed life they have created for these people.
Q: I share your suffering, but still it's our reality.

Only Solution - Change Soul of Children of Moses

K- **We have to change the soul of the children of Moses. Half of the world problem will be solved. He stole, he killed and his blood is doing the same, still after thousands of years.** (1:50). I come from that blood, but I have a mixture of blood of Mohammad in me. And I worked with the Palestinians. I tried to convince the Israelis for years to stop this. The world is blind to it. We are not.

Mr. Keshe in 2000 Tell Aviv testify in Court to change situation

I went to **Tell Aviv in February of 2000 to change this course. I gave evidence in the court to stop the abuse of the Jews on Palestinians. But we cannot change**. Now we change. It's not that we bring the end of the Israelis state, or Jewish state. No we elevate the soul of the children of Moses that they will walk away from the state and become one.
Rothschild's Started this Condition 1840's - Time is over

This is the , If you look into the **Rothschild's family, they come from the same blood. Rothschild's financed the state of Israel from 1840's they bought pieces of land to create this condition.** Because they knew it will be the cause of wars that they can sell arms, and they will forever be. But it is finished. The term of the Rothschild's is finished, as much as the term of Jewish blood.

Clarifies Prayer Scientifically - Fields of STM

I understand what you are talking about but we cannot stop. We cannot stop unless we elevate their souls, and that is the only way we see the change.
Q: .. I have been studying with Prof Tiller, he speaks of the unified field focused intent, It's like how the healing, prayer , declaration works. (1:52). And I am example, because of prayer, healing of cancer, 2003, the death now. So I ask for prayer, and yes, here I am.
K- What do you call a prayer?
Q: Declaration, speaking, creating.
K- No .. yes, but what is a prayer? **Prayer is a concentration of fields of the STM, or the emotion of the man.**
Q: oh, perfect ..

Prayer - Your own inner fields directed

K- That's what prayer is.
Q: That's exactly .. Yes, and so that how the healing comes about, with the unified ..

K- **No, you see, no, you have to understand the science behind it, then this healing and the power of healing, the mysticism goes away. We are a scientific organization, we have to understand the science behind it. We are not a cult, we are not a religion**. You have to understand what is the power of a prayer. Prayer is when you know, you take a tablet vitamin D, in the essence of the life, **you take a tablet of the fields of your own inner being, directed**. This is what man, especially with the teaching of today understand more of. You call it a prayer. I call it a tablet of energy.
Q: Declaration..

Not Declaration - You caused cancer - now you release energies for remedy

K- **No, it's not declaration. You release fields that you want to receive it. You caused the cancer, now you release energies, which become the remedy to that cancer. By yourself. Or you take materials which bring that elevation**. This is very simple.

We never understood - used theology to make it mystical

We have used the theology, (1:54). and never understood the science to hide, **because we never understood science of it, to make it a mysticism**. Why do we prayer. If you truly prayer, if we truly devote, which means we take a tablet. **We take that energy from us, we become that tablet vitamin of whatever cancer**. This is what is the change, we have to understand.

No Healing Meditation Prayers - It comes form you

So there is **no healing prayers, and there is no meditation prayers**, or whatever you call it. If you read the healing prayer, and while you are there, you understand how much measure of what, **you have to put in it. Now you made the tablet, where do you want to deliver it to? To yourself or to the others**.
Q: That's why I think language is so inept. You know, it's just, hard to, for my words to be shifted into the understanding, because it's essentially.

Have You Ever Fallen in Love - I don't think so

K- Can I ask you a question? **Have you ever fallen in love at your** age?
Q: 74?
K- Yes. You never know, some people think they have, and some people never, and some people say, yes. How many times.
Q: That's an interesting dynamic, because **I am a product of the "MK Ultra Paperclip" mind control**. So I am having to ... (1:56).
K- No, I asked you a direct question, have you ever fallen in love?
Q: **I don't think so**.

Disease of Falling in Love - Opens One Track Energies

K- **So how can I tell you how beautiful the sunshine is when you have never seen the sun. Falling in love is that package of energies, which opens one track, which is just giving, you become a sun. You radiate, but at the same time underneath you are taking**. The intention of the lover, the intention of the lover. And that is a package, that is the disease. That needs a vitamin to cure it.

Cure love disease with a bigger love - Love of Creator

And **how do you cure from somebody who is in love. Let them understand or show them a bigger love that they understand the love they have is nothing compared to the bigger love. This is why we always talk about the love of the Creator, it's so big**.

I was listening to a tape .. and it's amazing, it's a 3 or 4 years old child in Farsi, and hw says, "let me explain to you God." He says, X is less than Y, because Y is bigger because it comes after X. So whatever you say, I tell you, X is man and Y is God. If you say the biggest number is 100 I tell you no, it's 101 because I can always give you a bigger number. If you say 1000, I can say 1100, if you say .. So God is always bigger. Even it doesn't matter you think you have the bigger number, **when you run into trouble you say, "God help me." You still go for that bigger number**. (1:58).

This is what we are, **we feel love and love to us is a package of energy, it's another tablet, which we have found no cure for. Unless we face it with a bigger love. When a woman loves a man, and then she is totally consumed by that love**, if you show the love fo the Creator, that love for man has no meaning. Because she has found a bigger love. Be it the same with the man. This is what we have to understand, what amount, measure of feeling and emotion we can give on top of to elevate and create a new condition. Would that love change a cancer, would that love change a life, .. bring a new D in life and existence, in another dominion and position in the U.

I cannot protect you because you haven't understood

Q: thank you , but going back to **my original question, how can your science then, protect me and my family from any of this, that you say doesn't exist, dark forces, and yet**.. ?
K- **You see I cannot protect you because you haven't understood what I said. It's you who decides and creates a line of connection.** I want to receive this, because I want to be open to it.

Ghana - Evil Eye locked with padlock

We had a very beautiful situation when we were in Ghana. You have never seen more superstitious people than Ghanaian. (2:00). We had a strange condition. I went in the garden waling and I found a locked key, a padlock locked. I thought that was strange, and then I found another one. I thought why do these people throw their locks into the house into the garden. Then I showed it to the driver, he said, this is the biggest curse, this is a

bad lock. This is this and that. I spoke with the brother of Benjamin. And I said to him, what is this. He said, if you believe in it, it will touch you. If you don't believe in it, it is just another piece of metal on the land. He said, I don't believe in it, it doesn't touch me, because I don't make connection to it. … He said there is a special ritual you have to do. … (2:02).

You have to urinate on it and throw it into the toilet. ..
I thought my god, how mankind has been locked into the way and belief that somebody else's thoughts, to go wrong. When he came back in .. we have no more bad luck.

But you have to look in the other side of the belief. When you walk the bridges of Western Europe you see lovers lock a padlock on the bridge. How many bridges you pass around Europe, that I think the weight of the padlocks on the bridge is more than the weight of the … bridge itself. .. Why do we lock a padlock in the name of the love, and we give a key, each lover carries one key. So it's a way of believing. It's the same padlock .. one became to Africa, and one became to Europe.

Q: The final question, then why with your efforts to stop what you perceive as Israeli aggression, why were they not successful?
K- We need the time. I told you we have to change the totality. It's not just, .. (2:04). you have to go back into the culture, as long as, in a way, an offspring of Judaism, Christianity. If you understand the background to it, and the claim to it has been there for a long time. The fight is over a mosque in Jerusalem, where Mohammad opened the first soul, of his to the Creator. The Mosque of ?? that's what it is. He was a merchant who by traveling between Mecca Medina, saw these people believing in nothing. Where .. they where still worshipping statues. The line, the time, .. …
He saw the nothingness of belief, and the statue of belief, and a few travels between … is where it came to him, he can take his message fo Creator God, to his people that they don't need to worship a statue. This is why that place is holy.
…
Now we have this conflict .. (2;06). They took the reverse .. they went for atrocities beyond. Jewish should have learned what the Hitler did to them. What happened to them in Western Europe should have become kind and known that the wealth can run away at any time. It's the love of the man which stays.

They never learned, it is for this reason we elevate their souls. That there will be no land for the soul, as the STM has the dominion of the U.

In a very short time we change. I have put the proposal
"Five plus 2".

(2:08).

We walk away from "5 plus 1". (.

(). Now you see Palestinians are on arm with

(2:10).
This is something which a lot of people don't understand, the Iranians and the Arabs cannot explain this to the world. The Islamic world have no problem with the Jewish people and Jewish religion. They have a problem with the status of Israel, (2:12). which sees itself superior than the others. This is where the problem sits. Palestine was there, a religion, Judaism came out of it. So original Jews are Palestinians. Once we understand this, because this has not been explained to the world in a very clear way. When we saw ?? saying the end of the state of Israel, he is a Jew. Anybody with -nahjad at the end, they are the Jews, which in 1920's and 1930's, when they came to Iran, and when they start pressurizing the Jews, they changed their names and put a -nahjad in, and that they are Iranians. So he is a Jewish blood. And we saw him every time. I come from Jewish background, I know how they change their names. We can ?/ that's how the Jews knew, who was Jews. My grandparents, my great grandparents did this. And so he comes from a Jewish descendents and he is carrying their orders. His speeches to United Nations was written in Tel Aviv, he just read it, and he took his commission in the background. He has banned me from Iran, because I opened his hand, as a president. That's why he gave the name and the telephone numbers and addresses of the Iranian nuclear physicists directly on the line. Who does that? Who is a lover of his nation gives his top scientists away? So we understand the process, but it doesn't come back with conflict. .. It has to come by elevation, by finding a proper solution for total population. (2:14).

(2:16).

We have other hotspots ..
Cuba Ukraine . India and China

I worked on this for years. I am very open with this .

(2:18). To teach people to forgive, but not to forget or they go back to it again .

Any other question.

Big Discussion about Jinn's of the Islamic World

Q: .. the Jinn in the Koran (2:20).
go on Wikipedia. . In Koran, is wrong doers, or evil forces.
Q: Azar, .. Jinn .. when you wake up in the morning and a bad thought, a Jens is put that in your mind ..
(2:22).
Jinn was an angel who went bad. ..

K- He didn't bow to the man. He granted the wishes of the man, those are 2 different things. God never bows to no one.
Q: what Ginger was asking about bad entities. You create that bad fields.
K- That's exactly what we call the Jinn.
Q: because in the duality you can create anything ..

(2;26).

K- If you wish it you can create anything. ..
I think we have answered the guys question . Next .

Q: .. there is a statement in the introductory video, I never promised you a heaven. .. (2:28). What is heaven in relation to eternal life, or life in the Unicose?
K- Heaven is, as I explained in the beginning of the teaching of today, is nearness to knowledge of the Creator, which is limitless. In a way, when we wish it, and we are sincere enough we reach it. I explained this in a different way. You wish something and a few days later it happens.

(2:30).

Q; Salomea , … (2:32) (2:34).

K- I don't understand.
Q: (goes on and on .. ?

K- (he interrupts her) You see, what I said toe the KS .. the KF up to now set the ground work. (). we built the foundation for a new science and T, and with millions of people around .. moved away but still keep in touch. We have been on spreading the knowledge in different ways, teachings, and Internet and everything else. Now the time has switched, instead of the governments shut down your websites, pressurize you, and whatever, intimidate you. Now we move in a position of power. Of sharing knowledge through T.

(2:38).

We have embedded you KS as seed teachers in your own culture. Jalal, Armand .. Alex .
Once we open up
In next few weeks when

They realized we are about to breakthrough and they worked their whole lie to stop this.
The barrage of

. with me going back to Iran with a position which we have accepted to elevate the knowledge of Iran

Those KS who have been around the teachings and you learned, you become the center point of teaching.
We are on the verge of a huge change.

Americans Take down the Brazilian KF Archive.org site

. We saw the Americans bring the KF down, Brazil. (2:46). Why in the Portuguese language. Because they know now we are on the verge of coming up. and sharing, the knowledge and the peace. That is not what they are there for ..

You hung me on cross - Now I can't be touched

Try to understand the change is about to come in a very big way. The biggest fear of the State of Israel is my return to Tehran. The biggest fear of the Americans and British is my return to Tehran to bring the beauty of the knowledge out of the land of Mitra. But I cannot be touched, I told to the Israelis you touch me, there will be nothing left of the blood of Moses. The Israeli Rabbis know and the Israeli government knows. (2:48). The same with the others. You touch us, we know how to shower you with the love that you drown in it yourself. We don't take revenge, we give you so much. You hung me on the Cross, now I am still walking. You try again.
Next question

Mitra - Adam Eve - Apple is the love

Q: Does the soul of Mitra, .. put the soul
K- What?
Q: Does the soul of Mitra put the soul into our planet, or instill the .. ?
K- I think you better go to some of the teachings in the past about Mitra. You heard about the Adam and Eve, and you heard about the apple. Now with all the teachings I've done, and I explained before, try to understand. **The apple is the love, which has poisoned the cycle of creation, that you give everything for it, even your life**. Man never understood the meaning of the apple, which **Eve gave to Adam, to the Creator. She showed him love and what it means to be loved. Nothing else**.

Love is the poison that brought Creator to madness - loving a woman

That **poison brought the Creator to madness to understand what is. (2:50). But the love and understanding of the love came from the creatures like man, in loving a woman**. So he created the Eve for him to be loved, the way the man loved the woman, and the woman loved the man. To feel the physicality of love. And that apple is love and nothing else.

Mysticism Twisted it

This is **why in mysticism they twisted it and they turned** it.

Love of Mitra brought the Creator to Earth

But the beauty of it is, **Mitra chose the Earth as a beautiful planet**, as a beautiful place to live, and **brought the Creator to it to show the beauty of it. And how men as a race fall in love, and that's what captured the Creator** to the Earth.

When you speak about the greatest sin, when we say Adam took the apple from Eve. That was **the touch of love, the beauty of it, and it killed him with it, he gives his life for that love**, which Eve what we call Mitra, has shown through the beauty of the land of Iran, as the most beautiful place at the time of its creation.

So when you speak about the apple it's nothing but love, which the Creator took a bite of, and it killed him with it. It's poisoned with mad in his head and his blood and his body and his existence.
Any other question. (2:52).

Q: … **could you enlighten on the meaning of the "night of power," the 27th night of Ramadan, in light of plasma science**, does our galaxy meet its twin?
K- It's the process of understanding, and ?? You got to understand that **all the Moslems are supposed to spend this month in understanding the essence of the Creator and the creation, which brings them to understand the love of the Creator**, and then it is translated into mysticism and a lot of other things. When you gather a few people and they put their wishes together
Now you put 1 billion people if they are true believers and work and worship in that month of Ramadan, and truly live by what Mohammad said, yes man truly becomes angel. But then it has to become that point for man to grow. .. if the true Moslems wish the true peace, the time ..
7 billion can be changed. But the problem is that most of the Moslems in the time of Ramadan they are thinking about the food, (2:54). and some of those western ones it's the only time they don't drink alcohol, as we seen many in the western world, and everything else … fasting has lost its essence of work.
Any other question

Q; what Azar said is not correct, she confused Satan with Jinn.
K- Can you explain who you are.
Q:
K- Yes we read from Wiki (2:56).
Q: it can be bad or good ..
K- yes it says the same thing in Wiki. It depends.. it's bad for who, and good for who. Do you understand.
Q: Yes, I said it can be good or bad just like other human beings. It

K- Yes, I understand, but I said, bad for what, and good for who. Do you understand?

Q: .. Satan from point of human being is not good …
Jinn are the same thing, they can be doing that but they can do the opposite. My knowledge of Jinn is very limited.. They are spiritual entities.

Q: . is the Gans beneficial for those who have dementia as well … ? (2:58).
(Mr. Keshe's audio off …) (3:00).
>>>
Q: .. Jinn

(3:02).

K- Can you hear me …
R: .. someone asked for 9 minutes of silence yesterday PR Group.
K- Did it work 9 minutes?
R: to connect with each other and experiment. ..

Q: Stephanie, (3:04). … you always said that people who have fear of the problematic of today for example the virus and vaccine, it's because they don't know the power of the plasma. And the same .. I think with the Jinn now… our wish
.. some doctors standing up for the truth. ..
K- Let me stop you, we are not going in the way things stand, we don't give .. Youtube the others for us to make a position .
Q: I'll make it a different way. We have nothing to fear because we have plasma inside us, and if we understand the law of U , bad doesn't exist (3:06). .. is it correct?
K- Maybe that is the way. We have to accept we make the link to what we want. and the path is set the way we want to think. and we set it up.
Q: So if my belief is I am made of Pl and .. part of the creator of the energy source … no one can damage or create problem for the source …
(3:08).

R: What if you have the Pl of a bus bearing down on you, do you just stand there with no fear … stand there and not move ..
Q: it's very simple , I trust I am part of the bigger picture ..

.. even the Pl of the bus would be no problem
K- Should we send the asteroid. (laughter.)
Thank you ..

Q: .. (3:10). … The Jinn have a photo. we used to have a lot of Jinn .. the Jinn are practically transparent.
K- Ghostbusters ..
Q: no, exactly like water .. transparent … you can see the outline of the body of the Jinn.
…

he was taking photos of the Jinn .. (3:12). the whole family was there . .the Jinn told him to delete the photos. I got the photo .. you can see the outline of the Jinn.
I can show you the photo. actually the Jinn exist.
K- Yes, the thing is we are talking about the fields, you put the name of Jinn on it. Does it do wrong?
Q: No ..
K- so it does it have a Harry. so it can't be Jinn. You know we have a Jinn and Harry. How do we know it is a Jinn?
Q: You are right …
They contact children.
K- Yeah, I remember these things from childhood because we were brought up with it.
Q: lot of humans don't know they exist

(3:14).
K- Can we go to something else (laughs)

From Now On man can make children of the soul

Q: I just want to say something … The time soul you .. would we as a father and mother have to elevate our soul and learn … through the love of Mitra ..
K- But up to now Man has created children of physicality. From now on Man has capability to create children of soul. It's a D of understanding, but .. it's the shape, not the shape .. the way mankind has chosen to create offspring's. **We cannot go somewhere and say this is how you are going to create offspring's from now on, you don't do this … (3:16). We have opened the option to create a perfect offspring**, by creating a soul first collectively, and then the physicality to be created out of.

The children of the STM are perfect

Thank you for today. .. we are hoping to teach more in-depth to understand, and the for the KS to understand the knowledge

R: 380 KSW (3:38).

END

381st Knowledge Seekers Workshop May 20, 2021

ENGLISH TRANSCRIPTION

(:09). .. We welcome you back .. we are learning new ways to elevate .. and see how we can connect, physically and emotionally in different dimensions in the realm of the Creator and the creation. Today we have some announcements. … another step for the KF worldwide, (:10). to reach the goals not only for creating the condition for KS who know about eh knowledge, but in the long term helping in setting up the new standards and levels for humanity in different nations and conditions, that we start interacting and bringing the T to common man on the street and changing from what we call, grass-roots.

Today we are proud to announce the signing of one of the largest KF Factories up to now, .. play video. .. Yesterday KF after .. 2 years negotiations in China ..
The new factory which is about 70,000 m2, is handed over to KF as of yesterday. This factory becomes the flagship of the KF worldwide from China. It's one of the most prestigious factories in …
(:12).
(:14).
This building is where we will concentrate the first flight systems in the next 12 months in conjunction and collaboration with .. Iran and China. the headquarters will be in Tehran.
We have set out to bring the change.
.. all of us being part of the change ..
Inviting the Chinese Knowledge Seekers (KS) to join …

(:16). We estimate we'll need a thousand plus Chinese KS. The process of employment will start in June.

(:18).

.. the Chinese come to us, for example, there is such and such a problem. (:20). they pay the KF for research and development for their problem ..

The governmental organizations will come to KF with problems .. we'll find solution ..
We have already started this path with the Chinese, be it in agriculture …

(:22).

(:24).
The Chinese have landed a craft on Mars, 7 months of travel, unmanned. As we understand the new T, with the new crafts, being able to create M field barriers, .. tune in the MG field of the Mars, understanding the heartbeat fo the Mars itself, which is what we call the love affair of U system. we create the heartbeat fo the Mars, .. the M field strength of the Mars, and we see these space travels to become in fractions. Maybe less than 1 hour to Mars, and much faster in the future. There is a lot of development to come in.

We see new research papers come in from organizations around the world who have stared to understand the work and .. interaction of the fields of the plasma (Pl). We've seen new papers being published by leading universities around the world, (:26) in how the fields interact. These are the new T which the KF will collaborate with to bring our knowledge, where we can develop for these researchers to develop very fast.

In a way, we have entered and we have put the first foundations as the headquarters of what we promised you, the CIBRU to start. The basis for setting up of the CIBRU in Tehran with the help of the Tehran KF . has already started …

(Teaching Starts here >>)

Making Gans of Gans

We see you KS not just making the Gans's, but trying to take the T a step further that we start producing food, we start producing energies of foods, we start producing interaction of the fields, what we call, "Gans's of Gans's" to make. Now we have to make field of the Gans's. This T I will teach in the space centers, that it is essential to be understood. Now we have to go a step further.

Opening a Gans - Spectrum of fields

In a way, to **opening a plasma** to understand when we open a Gans, how **Gans's become a spectrum of the fields that we decide which one we take**. When in the present science we work with our systems we have a very different understanding of the totality. In the science of the space and plasma T of today, we speak about Gans's, we speak about the M field of Gans's, (:28). but we have never understood the totality and the way they work.

We'll Teach the Fields inside a Gans what each one means

When we have a Gans we look at the little white ball sitting in the place. But if we really look at **that little white ball, as a Gans, as a single molecular Gans structure, we see the fields, which comes out of it**. In so many ways, **these fields are not the same** and in coming time **we'll teach you how to take each one of these fields, and what each one means, and how you can elevate and evaluate. How to replicate**.

Each One a Heartbeat combines becomes Heartbeat of System

How each one of these inside, in itself, by **itself become a heartbeat of itself. The combination of each one of these heartbeats gives the combination of the heartbeat of the system**.

One Gans to reach the Whole Unicose

In the coming time you **need one Gans to be able to reach the whole of the U and Unicose**, when the knowledge of the man increases, you don't need to have a 100 gram or 10 ml of the Gans. Each Gans in each strength, and each strength linked itself to a position, and to a dimension (D), and this is for us to develop, to understand.

Each Gans is a key to process, to one point in the U

Each Gans is a key to process, to one point in the U. If you remember I explained to you last week about how we put the dough through different systems, and it **became like a spaghetti. How it become weaker and weaker, or stronger, or more of**. If you remember the process, (:30). you got to remember, each one of these (fields) ends up in one place or the other.

Find the Elusive Light of Creator

This is what I said, to you, one Gans has the strength to take man across anywhere in the U and Unicose. **If we find that elusive light of the Creator, the strength of His line of understanding and generosity, will find a path directly to the Creator**. It takes one Gans to take man to the whole dominion of the creation and the Creator. It's the man who has to extend his knowledge. It's the man who has to understand the process.

Magnets on Table - Move one all adjust - Connected to each other

You understand this in a very simpler way if you go back to where we used to put magnets .. and then we see **that how one single magnet in the center, in positioning it makes the rest to move to a new position and D**. In a way, some move forwards and some move backwards, but all adjust themselves in one way or another. In a way, if you look at it, the Gans itself is radiating different strengths of the fields, and in that process makes connection. **This one connects with the strength of this**, (:32). while this one in it has the strength of this one. In so many ways, this connects to this one. But this time when they come in they adjust to the new position.

Connections of Magnets and Gans's same

In a way, if you look at it**, there is no difference between a magnet and what we showed before (Gans fields). Look at the two and you understand the same. You have seen this in the physical D** in the world of the man. **Now you have to learn the same thing exists in the D of the Gans**. Because **for that Gans to be in that position in the Cup it has to have the collection of the fields, not only with all the Gans's in that Cup, but in totality, every other things which is created within the structure**.

Have to Mentally Visualize - Invisible Field Forces

Now the only difference is you have to mentally envisage or mentally understand that here (magnets) you dealt with the state of the matter, here you dealt with the state of the Gans. Here (magnets) both to you are understandable because they are both can be visualized. (:34).

On Whiteboard there is nothing - ocean of invisible fields

But what happened now if I show you a white board. **On this whiteboard you see nothing, but this whiteboard in the background is an ocean of fields**. Man has got to learn and has come to, be forced to learn that what can I feel with the emotion of the fields on this whiteboard. **Do I need to see it to believe it, or I am aware of its existence**? Even the existence of this whiteboard as you see it, is a confirmation of existence of fields. It's you who has restricted yourself to visuality.

Learning to Feel the Fields without Seeing

In the coming time, mankind in the space will face this. What is this, what is on this board? Is there a field on it? and what strength field? I don't need to see. how many of you have managed to **see the field of a magnet in your hand, but you feel the forces of it**, when you bring it close to a metal, .. to another field balance entity, could be a magnet or anything else. But you know it's a magnet, I carry it in my hand and if it comes across a metal or another magnet, suddenly out of nowhere, I just know there is something.

Man has to develop new Sense - Sense of the Fields of Creation

Now mankind has to become to trust this. Something you don't see. (:36). But we could feel the heat, .. the touch, we can smell the odor of the air, and now mankind through the strength of the soul and understanding of **it has to develop a new sense, A new sense of the fields of the creation**. Which man never sees up to now. But we have to strengthen these within the structure of the STM which is in the Pl condition in a much looser state to be able to feel this. I feel the emotion of my son. I feel the need of my father who died years ago, but his soul is presence. I feel the field strength of the planet Mars, or on the other hand I want to be in planet Zeus. We cannot develop always machinery that man can carry. In the space man has no hands and arms when he travels the D of the soul. Where do you want to hide your meter, or your detector. Secondly, if the machine can detect the fields, your brain and your soul which is in a much more advanced state, how com it misses it.

Mankind will be taught how to filter field strength in understanding what is a heartbeat, what is the connection to, and what is the collaboration between different fields. What happen when this and this interact together. And in the D and things at this point, I'll see myself ?? I connect to him, to the position and condition. (:38). .. when mankind leads and understands the interaction of these will create a 3 dimensional fields, emotion, and the understanding and the strength. Then you can see your father talking to your son on planet Zeus or Mars, and you understand what their soul has decided. Baba you used to be a very naughty boy, the father says to the son, take the soul to such a place and learn from it, where you have made your mistakes. Then we say, oh, by accident I came and I found this, and I learned something from it. But it is not in the background of your thought that soul of the father, son, and the planet Mars brought you to that position, you just carried the physicality to it, or the same as what we saw here (table of magnet) you

positioned according to. This is the process of the teaching, which in the coming time we allow it and we teach it to be developed that the mankind chooses the walk, donkey, jet, the UFO, or travel in the D of fields of the U, what you call the strength of the soul of the Creator and the connection to the STM.

Learning how to Tune to everything - be part of the totality

In a way, I like to go for a walk, but in my walking I want to be close to my son, and my father on planet Zeus where I allow the extension fo the soul of me, (:40). to be in connection in my walks with the whole structure, where my physicality is still walking in the physical body of the man on Earth. I think I am closest to the Creator, but in fact, **I am rotating like a spinner at high speeds, and my soul continuously has to find out how to tune to everything. .. once we connect the lines we are part of the totality of the structure**. .. the new space Pl T is about the life of the man in the U, not just the Gans in the cup. As I said, you take from this T according to your knowledge, .. understanding of the .. totality of the creation, and what is for you part of you to be in you and within you.

MaGrav was Carrot to entice man to Knowledge of Creator

In so many ways, we have entered and are entering new levels of development. The process for us is not just to make gold and be happy, .. **a MaGrav and be happy, these things for us in a way, a sweetener, a catch, a point where we could bring the attention of the man, is so physical, to be attracted to the knowledge of the Creator**. … we set out the bait and to see who bites, and how much of that bite they want to take. How much of the cake they want to eat, the cake of the knowledge is limitless. (:42). It **depends what is sweet to you. and what is the purpose of that cake you take from the knowledge of the Creator. Some are happy with the crumbs** of the knowledge and claim the totality , and some are given the cake, knowledge and totality and stand back and they share with those, and they make it even into crumbs that more people through their understanding can take different sizes of it, but everybody has a piece of it.
To stop sharing knowledge is like stealing from the souls

In a way, **that crumb is the STM, we have to decide how much of the cake we want to add but we share all the time. .. when you stop sharing, you stop learning**, you stop receiving. In so many ways, **thy shall not steal, this means not just wealth, but you cannot steal but stopping to teach the others, because then you have stolen from them to learn, to be able to become, to find a new position in the structure** of the .. their souls, in the realm of the creation and the Creator. .. we teach you more. .. we start teaching KS to trust, to understand, to feel, to be able to be part of.

In a very soft way, we have already introduced this in systems. our systems to you, which to you is something for Corona. Is something for my eye .. body, but in fact the teaching has been a process of slow feed, (:44). for man to understand and to trust the fields. You were happy with the Gans's, .. for thousands of years with the gold, and then you start understanding about the alloys, how to mix different materials together. Then we

introduced you the Nano T separating them, and then we introduce you the Gans's, and now the process has gone very softly in the process of understanding the fields of the Gans's. How to trust and gradually how to feel and see their operation.

I have taught different races across Universe

In a very subtle way, .. I have been a teacher long enough to know to teach each race, and what bait to put out for what race, that allows them to become part of the U Community. I have done this many times across the U so I know how created things work. Always wanting to receive, but hardly wanting it give anything. In that process we taught you a lot.

I have hidden things inside systems to elevate your soul

I have hidden things in a position, that you could see but you do not know. One of the systems we put to you and you have gradually, because of Corona, come to see, is the AEU. AEU is one the first systems we put out. for you it is important to heal the Corona, For us it is building trust, **you breath the fields, you walk in the fields, you eat the fields from what we call the air units. and you gradually elevate to the position of the STM**. finding in this position what I feel, (:46). Now in that position I am breathing the Pl, now at the same time, the same Pl becomes part of me as it goes through me and is on the cup on the water, which is ?? in the matter state and I drink. The way I introduce the Air Enhancement Unit (AEU) has been done before, but the KS did not see. It was in a large scale in the Body EU.

Now we have brought it in a way that it is reachable by every man. In so many ways, now I have brought you a very simple system. The new AEU is a way to elevate the Soul of the Man (STM), elevate the Soul of the Physicality (STP) of the man, elevate the connection to the freedom between the two. The problem has been when we had the KS they said you need to drink, to cover the Gans with your body and to inhale. With the new AEU we do the whole 3, you don't think about it, and we create that process of the elevation. understand the change, but mankind does not and is not aware of it.

Negative Oxygen used to Elevate

When we call it a **negative Oxygen, think of it. Oxygen; "I hang on to your gravity of amino acid (AA) which is the O. With it I absorb the fields of the environment to add it to the fields of your soul that it creates the elevation of the physicality, the STM, and the STP** .. I am a master of disguise, because I know how to play the game, (:48).

AEU Elevates all 3 STM, STP and Physicality

We showed you they environmental system. None of you gathered how I played that game. But now with the .. AEU we deliver a combination fo the totality. They have been built in that way, they carry more or less, **a combination of the fields the man needs to**

elevate all 3, the soul , the physicality, and the STP . I have given you the knowledge of the U that for you could be something I wanted for Corona, but you missed the knowledge that I delivered to you. You breath, goes within you, its air touches your skin, and the fields are put, where you build, you drink it. I get you in all 3 ways.

Shortcut to Elevate STM

A **shortcut to elevate the man**. In the small doses. For you to do this it **takes you 50 years, what this machine delivers to you in 50 seconds**. You look for different things, and I hide the medicine in the sweetener that you are sweet to take. I put a drop of life in a block of sugar, and like a horse you take it with pleasure, but within it is the medicine to change you. Now we can speak about the T … because now we have brought it to you, right in house, right in the way that you elevate your soul. (:50).

Systems bring faster development of the STM

With the same, with what we put out as glasses (Visual Enhancement Unit), we done the same. But in a more concentrated way. the glasses we have put out, is not so much for you eye, it's for the eye of your soul. It is there **to bring a faster development of the STM** directly in the process of understanding. When we released the glasses there was the whole purpose of direct connection, direct elevation, direct work with the STM. .. I hide the T of the U with these simple systems that we can bring that position, .. that change, .. in a position to speed up. By setting up these new factories is to be able to do this. **I cannot push the man, but I can let the man to choose**. With the new delivery of simple T I have hidden the know of the U in a very simple way, even the people who work in the research centers do not understand why and how I do these things, and the reason we do these things. because now it's time to create that, not the elite group, but the ones who are aware of.

Bring the fields of the U to the STM

You will not see your soul flying by putting the glasses on, but the soul receives in a very simple way a D of the fields of the U. You remember the way we used to put Gans's on top of the plants and water them, it absorbs the fields of the AA to the plant. Now this eye glass, the Air filter system is the same thing, but is **at a strength that brings the fields of the U, (:52). to the STM**. Now that grain of rice on top of the plant rice, was the receiver. Now the grain of the STM is in the same position. We develop T to hide the T of the U within the structure of the understanding of the mankind.

In so many ways, push not to force, for you to understand, we push to accommodate that your soul elevates and ?? understand. They are two different ways to do the same thing. You can drag a child to the water, but you can bring the water and the child, drinks it with pleasure. I changed the direction of the KF in the past few months and you will see more of systems which we deliver which will hide this T but directly goes for elevation of the STM, STP of the man and allows man ??

In so many ways, these are complicate but simple ways to bring the collection of energies, at this moment in time man can understand. In the other side, .. in the Gans T, (:54). we brought the condition of environment in the Body EU. In the Vertical EU we are doing the same, but the new V EU creates through the capsulation of the fields of the body .. to be able to elevate to the level, to be able to travel the span of the U.

Elevate the Cell of the Cancer it understands emotion

If you notice by structure the VEU is Book #2, is the ray of the light in the cylindrical, in transportation, where I want to transport the STM to a new D. Or the physicality of the STM with a cancer to a new position. **If I take the cancer cell out of your body it will grow another, but if I elevate in the same system where the cancer cell understands the emotion of the man which lead to its creation, I have resolved the problem with the cancer because I elevated the soul**. The cancer cell, and the STM that creates it, understand that the game was played the wrong way, now there is a need for balance.

Another New Enhancement Unit Coming in June - rapid development

I always explained for you, maybe for the first time you understand, always play when you use Gans's with man, use the AA. Because you connect to the STM through the application of what we call the AA. the structure fo your life, I already have given you all the field play, Many of you .. **the new EU, the Vertical and the new horizontal system which is coming up, we'll show it maybe in about 4 or 5 weeks time**. Was once our team gets their hands to fit it, (:56). June July you will see these, **will go cross our planet in a rapid way**. Now with China and Iran coming into operation, many of the EU will be manufactured in these countries. And we'll … we'll bring the position to be able to bring the knowledge in a simple way.

In so many ways, you use the mobile phones you don't understand nothing in it, you dial down and reach there, but this time you have to understand the knowledge what's in it, how it works, and how you can manipulate it. But **this time the mobile phone is your soul**. It dials the number you want, it work in conjunction with the STP, that it puts man in the position to be. I have changed the mobile phone from you, from these little tiny things in your hand you shout down and you know whatever goes, and somebody else will listen to you. **Now I gave you the mobile phone of your soul, and the STP. It's you who has to understand how to communicate, how to be in connection with both that you are not an outsider, you're the controller, you're the decision maker, .. the one who understands that my soul, the STP would like to be on planet Zeus**, but I want to be in a position when I am near to the soul of my father, or I want to be in a position that I land, or appear in the position, that I feel the soul of the properties , (:58). or entities, or things, which connects to me, and has a connection with emotion will be.

We will not travel by GPS anymore. We travel by the field strength of the environment which matches to the desire of physicality, STP, and the STM. .. you might wish to be at a certain position, but with the strength of your STP you cannot manifest yourself in the

body of a man. You will evaporate, you'll be nothing and you'll be diluted. SO the STM and the STP have understanding of the position and they know that in the shape of the man you cannot appear, it doesn't fit, the field strength are different. In so many ways, even when you look at these butterflies, we have put, it is part of the same process. You look at it as absorbing the fields, but in the coming future, as I told you, nobody can copy these butterflies. There are a number of hidden T in it that these will allow you, you are happy to put it on the back of your iPhone, … to absorb energies, but these butterflies, in so many ways, are the radar dishes of access to universal dimensions. You cannot understand, you can do anything you like with it.

In so many ways, I cover the whole dominion with one simple system like this. Cannot be replicated. People can do whatever they like with the AEU, (1:00). we will not release the knowledge and T. .. with the VEU… the decision of the use will come through the STM. I explained this in a very simple system. .. I have given you the tools of elevation. .. I keep to the pattern of the work. This is the body .. I put the AEU to be able to do the field elevation. Some fo it goes in your body, through your mouth, and some of it you drink. The cup of water in the room because the fields which has already deposited, in the water.

(1:02).

(1:24).
.. where do I want my soul to be in respect to the strength of the fields of the Creator. The less I possess and the more I give the closer I become. As the weaker holding on to, allows me to trust him to be the holder of my soul. Detachment. In so many ways, mankind has to understand not only the life exists in the D of physicality, but exists in the fields fo the D of the Creator and the created. In so many ways, you become that Mitra. In so many ways, if you expand enough that there is no field to hold onto but you are just a process of what I call, (1:26). to share, you become the soul of the Creator. One has to understand the strength of and the delicacy of handling the two. As mankind and the rest fo the created have been so physical the Creator, created Mitra, which is fields between the two will cover the whole cycle of the creation and the Creator. In so many ways, the love and the lover and the sharing of the love with the lover, in as much as the Creator is in love with Mitra, Mitra is in love with the Creator. Both give unconditionally, but in the process of taking and giving the D of the creation and U ?? the beauty of it what is the measure of totality.

Where does the fields of the existence of the Creator comes that leads to for Him to be the Creator. Where are the origins of the creation or what we call, the M fields. Where did the first rays come from and what is the essence of the creation that in the lower field strength becomes the chair, the table, spoon and everything else that man has connected himself to. (1:28). What happens after the cloth disappears, after the wood of the chair

becomes the energy of the U, and the food you ate becomes another part of the cycle of the creation. Where does it go. and why in such a strength we see it in the D of physicality. The biggest question for man is not the Creator. The biggest question for the U Community is to understand what created the Creator. You cannot have the chair where the fields of it, did it come from the soul of the Creator billions of years in the time of the man, in another dominion, but how was the Creator created? You cannot have a chair until you bring billions of the cells together. You cannot have the body of the man to have the man, if you bring trillions of energy fields, in the name of the cell of the heart, the brain, in the emotion and the rest of it. And all came from the energies and the fields and interaction of them on this planet, and this point in the U. but how was the Creator created, that He become that field? Is the Creator a ray of light, or is the Creator a collection of the fields? Maybe, maybe you find if you read a specific passage in Book #2, you have found your creator. The origin of the creation, (1:30). and the Creator of the Creator. I have hidden it in 1 sentence in Book #2, when I wrote it I wondered when man will become wise to understand this word, this sentence. And application, implication of how man will reach to understand the beauty of his Creator and how his Creator was Created. Because He comes from the light, He manifests Himself from the D of interaction of Itself, by Itself, to become the light. The light of knowledge,, the light of what we call, understanding of totality.

If I open this door, the theologists will kill themselves, and those who have created the false paths of belief in different names will move forever, to move their souls from this planet, as they know how they have abused the man.

The understanding of the totality of the knowledge of the creation, is not to be able to fly. Is to be able to understand the strength of the knowledge of the fields of the Creator, as it lead to my creation, where has it come from. that field that light. And what lead to creation of that light? And what was the origin? This is not theology, this is understanding the physical process of the creation, (1:32). but without imagination. understanding the science which means understanding how things interacted that lead to. In a way, we call it chemistry. but In a way, we talk about the chemistry of the fields, which lead to the creation of the Creator. But one point is, where did that field come from, that it lead to the creation of Him, that the interaction of the field of Him lead to the creation of us. Or are we all passengers of the motion of the fields in different strengths and D's within the same brain, in the same cylindrical motion. But there is one fact, where does or where did this ray come from, and where is it going to. That at this moment of time it is moving in the span of the its own creation of environment, we are passengers of the physicality in one spot of. within that structure of the motion from one point to another.

In a way, I hid this in the teachings in the books, where I say very simple. The scientists of today they tell us that the U is expanding. It cannot expand if there was not something for it to expand into, and something to expand into to confirm its own existence. In a way, you cannot blow a balloon if there is no room for it to blow into. You have to create a room that it can blow that air into, that it confirms existence of its volume. So our U is . Our U is the same, (1:34) we are travelers of the D of the motion of the fields of the U,

that came from and is going somewhere, that it's interacting with another ray that the existence of the two creates the light of the Creator. That light of the Creator becomes us to created of.

Mankind has to open his eyes and spend more time in understanding the process fo his creation and how he can have everything without destroying, without killing, without .. disintegrating what has been integrated for life to exist. Writing of the promised one, even a soul has an existence, and it can be in any dominion. You found it in a stone, in the lion and the physicality of the man, and in existence in all other dominions in the U, be it from planet Zeus ..

We call it a soul, creation of a heartbeat that confirms it exists and is operating to attract, every heartbeat is interaction of the gravity and the M field, and when you give it a rhythm it's a pump which absorbs the fields of the U according to the strength of the soul. Soul of the stone, soul of an atom, electron, the Creator, be it the STM. The knowledge of the new space T is to understand the measure, the strength of the heartbeat, (1:36). and what is beating, what has created that beat, what is coming in to create that beat, and what is given off to keep that beat at a constant rate to be there. So in the new space T coming up in China we are not looking for to create fuels, we search to understand the heartbeat, and what that heartbeat brings and what it gives that it becomes planet Mars, it becomes STM or the physicality of man in the soul of his creation. The knowledge of the U is very simple, it's man not understanding it has made it so complicated, and then has put values on different measures of the strength. The gold, the love, the food, and most of all teh Creator. And how we have become to compartment it. this compartment is for this, and that one for that …
I made man in the image of Myself. In a way, you can appear in any shape of form, but at the end you are only conditioned to the manifestation, position of the environmental field strength, and nothing else, (1:38). even the Creator Himself. .. is the Creator another general in the army of generals of the creation, and even these and their interaction does it lead to confirmation of the true essence of creator. Are we in totality of all the universes and Unicose we see, a cell on the skin of the toe of the Creator, or are we sitting in the center of the soul of the Creator as a field strength, center and dominion?

As I have hidden so many T in a simple way that mankind can move into, we'll develop T that mankind can gradually over time understand this process. And the same this process. Ask your self a simple question, I have put this before to scientists. Does it mean that the less surface you have the less you can radiate to become the giver. (1:40). And then if that is true then what is the size of the Creator, if the man sees himself generous and he calls himself philanthropists by giving a few pieces of his plastic paper for someone to have a food and he thinks he is very generous. Or is the reality in a simple way, the smaller you become you become so much, that you become such a giver. not to hold on to but to give out to.

(1:42).

(1:44).

Thank you very much, I hope you learned a little bit more about yourself, and nothing else ..

(1:46) >> **BREAK** >>> (1:50). 381 KSW

Q: … I have the soap, and the pain Pens, my dog is feeling much better, (1:52).
(tells life story …)
(1:54).
K- thank you for your words
I am sure our soul finds a place ..
Any other question

K- Is WL
WL-
(1:56). WL:
K- why the Chinese authorities kept us hanging till yesterday ..
Q:
K- Can I put it the Chinese way, Which day was the contract signed..
was it the Birthday of Buddha.

(1:58).
Feng Shui

(2:00). I have a question. because you say you create Mitra, because Mitra is love of God, Mitra create the world

K- There is one word you have to change, the rest could mean, what you said. Is not the humanity, it's the Unicose ..

(2:02).

(2:04).
K- Would you like to tell us about your new company the future of it?
Q:

(2:06).

(2:08).

K- .. we didn't know where ?? was. the center of where pottery started ..
they chose this place.

(2:10).

(2:12).

(2:16). for the first space center ..

Any other question.
Q: Salomeea… (2:18). … what is the link between energy and light, but not in the way ? (2:20).
K- In the new Pl T we explain energy in a simple way, as M fields in motion, and if you understand this and the totality of the creation. As the fields of the Creator moves in the span of U .. its interaction and motion it releases energies and fields. That in certain environments leads to creation of matter or other lives across the U. In a way, we are created from the motion of the light of the Creator and this is the essence of the creation. If you explain energy as a fields in motion, then that energy, it's our body, we are an energy pack, we move. So In a way, the motions of the fields of the Creator, leading and being the essence of creation of energy, we are part of it. So we manifest according to the time position and place, in different shape or form, in different creatures we create.
Any other question. (2:22).

Famous People Using KF Products

Q: Is there any product in KF used by famous people, so we can be sure that the products are working?
K- Next question please. We don't have monkey's and we don't have people to prove anything. If you listened over the years, we sometimes. when people used our T, we have referred to it, be it masters, kings or what we call the Papa in Vatican. We still think he is still using it, because he is still walking. ??? So the famous people who are using it, one day will come out, but they couldn't say.
R: they'll come out when it's popular. .. millions of people not well known are using it around the planet ..
K- They are more important than the kings and people of the world. If they are in pain and you help them, they are the king of their own lives.
… I tried to for years make a link with one of these .. world famous people, and coincidentally, … (2:24). I received a private invitation. I thought, and I told Rick, now they start noticing. This is the step we take. Most probably under different names and covers they already ordered the Pen and they have seen the benefit of it, but there are different … we enter not to bring names,

One thing we have seen especially now is many people are coming to the KF, people we didn't know before, I have come across a few in past few days, weeks, is that they have seen problems with the new series of injections and they have come to the KF for a solution. The solution sits in understanding the transfer of the energy form the body .. What you call the side effects, .. other things of it. Is that we do not know, each organization of it uses a different chemical, each nation has taken a different approach but at the end of it, we know the component, the body of the man. If we can facilitate that the energy fo the body .. stays in balance, it does not matter what they give you. If you are in the space, (2:26). here they give us an injection with 40 - 50 different mixture of materials. In space we are dealing with billions of it. Maybe it's a good .. to learn how to

handle .. new things in our body, when we'll travel the space we'll come across these things and we have to handle it. How do you handle massive injection, small amount of foreign objects into your body that some of it might be good and some bad, how your body will interact with it that it stays in balance with itself.

If Plasma Covid Solution why not used by any country

Q: Why is the Covid solution not used by any country if it is working?
K- Would you like me to pay billions to the world leaders to use it. At the moment in the bank account .. application. Who pays what. We taught the knowledge to the people that they put the money in their own bank, to save their lives. But some of the leaders decided to go a different way. We are expecting certification for two application in next few days, weeks maybe from governments. You have to realize it is not our say so, they have to test it. Now we are in a test phase in two aspects, maybe 3. (2:28). But we have been told the whole thing is in motion ….

Rohanni Blocked Plasma T in Iran

We delivered the T into Iran in 2020 and we saw a lot of success with it. And then we saw the man who said, he is the top man appointed by the minister, the Defense University of Iran, going to the health ministry meeting when it was getting approved, for the KF, all the data. He lied from instruction from the .. we can say from the present President of Iran, to disrupt that this T doesn't get approved in a full committee fo the Iran ministry. of the health committee and university in Iran because they are responsible for it. This man deliberately went on instruction from the Iran President Rohanni, to make sure that the ethics committee in the last 10 minutes will not approve. We had the approval, we have all the documents we can prove it. And then to disrupt with a 62 page accusation and all sorts of slanders about me and the KF, to Iran national securities. It took over 3 months for Iran national security to go through these 60 pages of accusations. Being an agent of Israel, being this and that. … and then after 3 - 4 months all as allegations, deliberately setup by the President . We are not talking, there is a 62 page report, (2:30). written by these people against me and against KF, all your
it took them 3 months the president is lying to the nation, because his bank account is full. You have to remember the brother of the president is in prison for the things he has done for his brother. The situation is black and white. ?? in the Vatican ..
We got 30 more days of this corrupted structure in Iran to be able to ?? When we did so much in Iran National D University
proved the T is correct ..

We found out in the past few weeks this guy is a retired man who was there putting their delivery, working in National D University and he went and he lied and he changed the course. Now we are re-tracking everything to bring it back in. Otherwise it would have been approved last years, as a solution for corona. Now the Iranian officials, (2:32). have taken a different approach. It will come as an environmental, then as an environmental, we are happy, because when we change the environment they allow us to spray the cities and .. we change, there is no Corona to go to the body, we don't need to use injections.

Because they have been tested in Mexico, in Brazil, 0 death and no Corona. Now with this new certification we start spraying the cities …

(2:34).

New factories
(2:36).
The famous people only go where they can show the people they are famous. In this establishment we are all famous because we ?? develop the new T for the next step. And we are there.

China stood behind Iran - Betrayed by Rohanni

You have to understand the political situation between China and Iran. China stood behind Iran, (2:38). to bring the "5 plus 1" home. To mean the establishment of the 5 plus 1, to the ethos the position. China did a lot fo work in teh background to pressurize the 5 plus 1. …
But when P Rohanni came into power he turned his back on Chinese and this brought a huge shame on to Iran and what happened to Iran after that .. . People are not aware of it. The behavior of Rohnani is shameful ..

They stood behind Iran to release the sanctions, and Rohanni sold out to the Americans to have the passport, under his turban there is an American passport as we say, that it brought a lot of harm to Iran. Now that he is going it will bring a lot of changes to Iran. ..
(2:40).

Next question.

New Pain Pen - Secret liquid

Q: Can you explain more about the new Enhanced Pain Pens, can you explain more about them?
K- Yes, they are blue.. (2:42).
R; I think you were asked this before but preferred not to answer it.
K- We can't answer it (R: secret science). you remember for nearly 10 years everybody was asking about the Keshe liquid in the Coke Cola bottle. This is the same.
R:
K-
The thing is now, if for example the AEU, you should receive a loose piece, we ask you to position this loose item on opposite wall. this creates dynamic ..

In Negative Oxygen, over 10,000 is something beneficial ..
buy 2 units facing each other. (2:44).

I don't like to go over 20,000 because it's a shock absorber position, and we tested it. It's not a secret we have developed T on the back fo these T

WL- people were smoking in that room .. cleared the air ..
didn't feel cold .
K-
(2:46).

(2:48). So the Pen material isn't secret, it's just development of technologies that we could show. We try to make it better each time.

Interaction of Fields No Preplan - Man Created Accidentally

Q: … in mortality is ?? as in mutuality, is in mutuality, ..
please tell me what is immutable in the Divine plan since before creation?
K- Now can you ask him to explain what he means? … You see **interaction of the fields does not have any pre-plan. Creator never planned to create mankind. Mankind is created out of interaction of accidental interaction of the fields**. The same, you can see the example of it. You put an egg and millions of sperms and one accidentally manages to penetrate, and that accidentally to creation of a new life. What the color of the eyes going to be, what the shape of the lips going to be, hair going to be. (2:50). The coincidence of the interaction of the fields between those two when they came together. There is something very interesting. ..

Children of the Soul will have features of Creator

The children of the soul will have the feature of the Creator. in essence of that physical D but in the presence of the soul. Because they don't take the D of the physicality, but they take the D of the best fields of the U. What is to be collected. So you are not connected only to the fields of the man in the DNA, but you are connected to the field of the U because the soul is made that way. I said that very recently and I emphasize on it, because those who don't understand, will come to understand even by the position of the souls.

Somebody asked me, it's just that you don't explain completely. Adultery become impossible, because the fields you have chosen to create that soul have already positioned themselves to the satisfaction of the soul of both parents. That the life of that child becomes so important and so sacrosanct that no man or woman will make a mistake to endanger that position, because the soul will not allow it. The children of the STC, is not just the STM , they never make mistakes. (2:52). Even in the D of physicality it might look like mistake, but when the soul accepts to create that soul of the child, it means everything to do with its existence, is already been structure, it's that magnet which has been put in and everything has taken shape and position that it can lead to creation.

In so many ways, the D of the physicality
Man will not make love the way you do.

(2:54).

(:56).

Every Plasma linked to Source Plasma -

Q: .. (2;58). Is each M ray emitting from one Plasma of a different strength, … why I am asking, the entire U can be reached from one small plasma, and does this mean it is within itself a combination of everything?
K- More or less yes, because it is connected to a source which has all of it. And itself in that spectrum, ?? by the position is always in balance with the source. It just depends what strength of the gravity, and what strength fo the M field it has in respect to the source, but in total the balance is always the same.

Translation of the Secrets in Books - Soul still understands

Q: … you hid certain secrets in the books. How has this been kept in translation in other languages?
K- I always said, you have to understand what I said, what I am saying. First of all English is not my first language. And Secondly if you really want to understand the true essence of what I wrote, read edition book #1. Book edition number 2 is adjusted for, (3:00). English people to understand ?? ?? The pure original is edition one in all 3 books, before being touched by the editors. But always said, even it's translated the wrong way, and even it is written in the wrong way in the English language, because it's not my mother language, even I lived in England for so many years. The knowledge you receive and what you gather from it, and what you use it, is that knowledge which is put for the soul of you to be able to understand it. As I said, even if you were told somehow to make the Nano coating the wrong way, the ??? through that you achieve what you want. There is never a wrong thing in the world of the creation. It's just what you expect from it and what you want to achieve. And even you achieve it, you don't see it, you say it is wrong way, you got the right idea. the soul has reached its maturity of understanding that point. SO it doesn't matter, if it is translated into Spanish and it ends up instead of saying right, it says left, because in Spanish, left right is left, or the right, but when you read it your soul understands the knowledge, It's a knowledge of the creation not a book written as .. a transfer of .. some words.
Any other question . (3:02).

Q: Mehraneth, ….

(3:04). The question I have .. wherever we are in each position we can get in touch with that place we want to be or to contact, and .. did you mean by our emotional force fields, or soul fields, both of them … small difference. how can I contact another planet, my father, … is it by my emotion or by my soul?
K- Now you are an old hand in the KF, how does the emotion, how is the emotion created? Emotions are created from the interaction of the fields of the STM with the STP.

So you answered yourself. (3:06). It's very interesting some times now, and some 30 to 40 years ago, when we were walking the street we used to see people who were talking to themselves. .. they used to laugh, shoot somehow, and we used to call them crazy, they are talking to themselves. But .. with this new T of mobile phones you all become crazy. You all have this hidden earphones in your pocket in your ear, and you answer and say … you laugh to yourself, they say the guy is crazy, he is talking to himself, and then you look oh. It's become normal for all of us to be crazy. Because now we carry the soul of the phone in our ears.

(3:08).
(3:10).

Q: .. there is a gap between detachment and the fear going on afterwards ?
K- Why do you have a fear with detachment?
Q: Because they think they have to give it all away like Jesus said.
(3:12). Q: .. another question… the earth which is suffering on the surface, earth is a plasma .. if the people on the surface have bad emotions … the Earth's emotions have to be effected by that .. sun or moon… would the emotion of the earth erupt with the dissatisfaction of and hunger of, (3:14). of its emotion … that's when we say catastrophe or Judgment Day, whatever.
K- Maybe I can answer you in a different way. We don't see earth moving and jumping .. and changing direction, going slower or faster. Doesn't matter you had the WWII and millions of people were dying, or we had the peaceful time of the ?? depression ..
The collective average sense of the emotion of life on this planet is always in balance.

(3:16).

(3:38).
381 KSW

END

382nd Knowledge Seekers Workshop; May 27, 2021

Heartbeat

ENGLISH TRANSCRIPTION

(:11). K- … we welcome you back for another session of beautiful knowledge. Last week we announced signing of one of the largest, up to now manufacturing bases of the KF in China …

We have another goods for you, that we start, KF has found a permanent position that they move into in the next couple of weeks and that the whole operation will have a permanent studio. The KF had to leave the Linz Exhibition Center as the government of Austria has taken over the whole center as a center for .. injections and applications of the Corona to control and test. So we are moving out of the E Center. (:14). We have moved to a much more prestigious .. but permanent place for KF in Europe. .. this place makes it a lot easier .. now there is a tram and train to get to, which makes it easier for people to visit the center…

We are looking for Knowledge Seekers (KS) with a good knowledge of the KF T and fluent in at least 2 to 3 languages to join the KF. ..

(:16).
we brought the public directly in, as a retail shop where they get to know the T and the center of the Health C becomes part of it.

(:18).

Start of Teachings

In the teaching last week we made a very clear announcement that now we start showing you the combination of the use of the systems. How the Air Enhancement Unit (AEU) can be used in conjunction with the .. Vision Enhancement Units (VEU), in conjunction of .. environmental systems for field detection and field absorption. Today we try to expand on this in a different way. The knowledge and T has to be on the basis of understanding of the totality. We have to understand now how to connect everything together and how we come to interact with all the knowledge in different way.

In a way, we are bringing different pieces of the jigsaw to make different pictures, and then we open it up, and with the same pieces we make another jigsaw to be completed. Last week we explained the use of , and how we use the AEU in conjunction with the VEU in conjunction with the .. butterfly. Today we want to expand on this, in the knowledge. In a way, if we understand, what these processes create it will be very interesting for many of us to, (:20). extend the knowledge to extend the T. What is important… we have the body of the man, and we have introduced systems like the AEU, .. VEU, .. like the butterfly. But what does it do. Many of you made the Gans Water. What is the purpose of the totality of this.

Our ultimate goal is .. to elevate the son of the man, the STM where the sun shines, when the whole thing is created by it and through it. What is the purpose of all this work. **Mankind has fed the physicality from the beginning of time. But mankind has never understood how to feed the STM, the sun,** the center, that in conjunction with this elevation it will become in touch with the rest fo the structure of the U. One of the simple things… every sun has a heartbeat.

STM has Heartbeat - How to expand beyond physical boundary

In the physical D of the man, we listen to the heartbeat of the man, and we consider it as if the life exists within it. (:22). .. the **STM has a heartbeat** too. How do we tune into it. How do we excite it? **How do we create condition for it to be able to expand beyond the boundary of the physicality**. When we run, when we get excited with the beauty, or the presence of anything our heartbeat increases, and we become more aware of. We are becoming more .. intelligent, more giving when we fall in love, when we see the lover our heartbeat increases, we become more active, energetic. But we have a reason for it, we have a lover, we have a condition to create that increase in the beat, increase in the expansion of the fields.

To Exist - heartbeat of STM in tandem with heartbeat of physicality

Now mankind has to understand and **find a way to measure the heartbeat of the STM**. But there is one point which man has to understand, somewhere in some work, in the **heartbeat of the STM has a direct effect on the heartbeat of the physicality .. they are in tandem, otherwise they don't exist**.

One of the reasons man dies in the D of physicality, is when the heartbeat looses its tandem with the heartbeat of the Soul of the Man (STM). As long as you can keep the two heartbeats connected, you can keep the soul and the Soul of the Physicality (STP) of the man in working, in tuning, in operating with each other. (:24).So one of the main things for us to understand, is understanding of the heartbeat of the soul.

Man's knowledge has been up to now, that we have understood **the earth has a heartbeat**. The scientists tell us that the **sun has a heartbeat**. So what about the sun of the man, within the center of the structure of the man we call the STM. Isn't the challenge for man to develop T that can measure that heartbeat, the heartbeat of the soul.

Systems to excite HB of STM to fall in love - take over physicality

If we can find that heartbeat by using any of the structures we have in our hands, be it the environmental, .. your vision, .. your butterflies, be it your Cup, should be able to interact, that with it we can create a condition to **enhance the heartbeat of the STM that it falls in love,** or that **it is excited that it can take over the D of the physicality** …

As I said in the past teachings, this is our target. How for man to learn to get excited, to be able to bring energy levels that can allow the STM, the heartbeat (HB) of the STM to get excited that moves beyond the boundary of the physicality but still is connected to the D of the STP and to the soul of the HB of the body .. within the heart of the man. In a way, it's a big question for mankind. (:26). Is the heartbeat we hear, is the combination of the heartbeat of the STP and the STM together, where we carry in the dimension (D) of physical heartbeat of the man. And why the physicians of the time have not understood, why the reason that the heartbeat changes. **Is it the STP, or is the STM which changes**

the heartbeat, or to what extent the 2 have interaction with each other. that they ?? leap to the sound of the HB of the man.

HB of earth control over HB of Man - Different Color Races

Does the HB of the earth have control over the HB of the man? Does the construction of the physicality of the man in the Gans's of the amino acid (AA) in conjunction with the HB of the man, the HB of the STM and the HB of the planet, dictates the condition of the physicality of the man, is this **one of the reasons that man has different shape and color in different parts of this planet**? Then it has to create manifestation of physicality that what we look in different colors and races across this planet. But is the essence of the HB of every soul on this planet more or less the same, or nearly enough the same, with different interactions with the HB of the earth create different physicality? Some look Chinese, (:28). some look black, Africans, from SA and the rest.

Through the HB of Creator man travels span of Universe

In a way, mankind has to **understand the process of the HB. How do we create it, and in that HB if you understand, then we can travel the span of the U**. Would there be a time **when the knowledge of the man reaches to have the measure of the HB of the Creator**, to be able to travel the span of the U?

HB is Key to Transmutation and Transportation and Everything Else

In so many ways, what is the process of the creation, and what is, if you understand with it, what we call the **HB, the key to transmutation, transportation and everything else** the man has been attached to.

How HB is created and can be replicated

The most important thing for mankind and the rest of the creation is, how that HB is created. We can measure it, but if we do not understand the process of its creation, **how can we replicate it**. We cannot be the "monkey sees, monkey does," because each position, each condition has a different strength, what we call HB. When we have a child they say the HB is 120 or whatever, when we get older we are happy with 150 ??

Why does HB change - age - HB of Soul takes over

Or What **changes that condition, is it the growth or the process of the birth, or is it adjustment to the new environment that it needs a higher HB**. or is it **the time we reduce the HB of the physicality to be able to allow the HB of the soul to take over**, (:30). what we call, at the point of separation or death. Then it will be easy for all of us to measure the physical HB, the HB of the soul and dictate the time of departure, as we know the energies cannot be replaced or we decide not to.

It's Not Suicide - Transfer to new dimension

In a way, we call it, **at this moment in time, suicide, we decide to end the physicality, but in the D of the STM there is no suicide. We decide where to transfer, and how to transfer and interact with the HB of the physicality, the environment and the soul, that it manifests itself in any D** and direction.

HB Created by Interaction of Giving and Taking - Maximum back to Minimum

If we understand how the HB is created, then we understand the process of the creation. the **HB comes from the interacting of the giving and taking**, **when it reaches its maximum and its minimum**. When the body charges to its maximum, that body being the STM or the STP of the man, or the physicality of the man, and **then at that point, has to release its energy that it goes back to the minimum**, because it has reached its maximum. It's the point of the balance between the point of the G and M, and where one reaches its maximum balance with the other. In a way, we learn a new process, we learn to create to tune between the G and M, that when one reaches the maximum of one, the other one gives up, and you go back to create the minimum, (:32). of the other, and the maximum of the other one.

HB of Creator beats across all created in Universe

In so many ways, **when mankind learns this minimum and maximum, and the maximum charge, then we will be able to create and replicate the process in any D. As the HB of the Creator beats across the whole of the heartbeats of the created.** This needs a deeper understanding of the technology of the creation, because this is where the knowledge is transferred to physicality and showing of the system we call the body of the man, or an animal, or of another creatures of the Creator in the U.

One Tunes to the Other - can be matched and controlled

In so many ways, **the tuning of the one to the other**. We see this In so many way, **we could see these in the beginning from the first reactors we built. This is where we discovered the HB**, this is where we understood the max and min and the charge balance between the two has reached the position of the interaction. If you look at the shape of the heart, if you **look at the shape of the physicality of the center of the earth**, the center of the sun, will **give you a clear indication that the HB is controllable. Or can be matched to**.

One HB is inside the other - to Moon we travel inside the Sun

When we travel in the span of the U, from the earth to the moon, we first have to discover the strength of the HB of the sun, or the moon, and than be able **to travel in the environment of the sun to reach to the moon. Because there is one HB inside the other**. (:34). Then the complication comes in how we be able to understand this knowledge, on earth we call it the high and low tide. In a way, it's the measure of the HB of the moon and .. earth, in conjunction with the fields of the HB of the sun. This is the

reason why for the first time we understand we have different high and lows in different positions and seasons, as our position in respect to the HB of the sun changes, then part of this, HB of the man, part of it is what we call high and low tide. if you look at the overall, it **has something to do with the HB of the Creator**. Because it has an effect on the HB of the sun, the moon, and the earth, and the HB of the man, and the HB of the STM.

Technologies to measure the HB

In the coming **time we will introduce these new technologies, that you can measure the HB, you can decide where that balance point will come**, we have a very good example of it, look at the heart of the man in the D of the physicality ..

Heart convert MG field changes from energy to motion

The balance fields and the charge of the one to the other, **it twisted the heart so much, that the field forces, forces the heart to move**. In a way, we convert the balance changes of the fields of the G and M, in what the body pumps out as a blood, and .. gets back in from the blood, and the M fields of it, **releasing the charges to the heart makes that change from D of energy, (:36). to physical motion**.

Create conditions for same energy to move space craft

If we can create the conditions in our reactors, that instead of this HB physical motion of the heart, will lead to the motion of your craft to another D, to where the other HB is. Now you understand how in the future we'll travel through the understanding of what we call G and M field balance for the HB of the U.

In the heart of the man, **when these peaks, of the giving and taking**, what is given out, and what comes back, the balance field creates that motion of the heart, will lead to the motion of the physicality of the man, or can be transferred, **to transfer the, what we call, the STM to a new D, and extension of the life anywhere** in the U.

Don't need UFO to travel - Interaction of fields of HB of Totality

You do not need rocket propulsion, **you do not need UFOs, you only have to understand the power of the interaction of the fields of the HB of the totality**. Then we understand, mankind and the rest of the U Community has entered a new D of transportation and transmutation.

Transmute one element out of another - Create by HB of Element

How do we transmute? How we create gold out of a dust of a Zn? How do we create O out of Plutonium? We don't create fusion, we don't create fission. **We create the HB of the matter we need**.

Chinese KS have Created Gold out of Fields

In so many ways, many of you should have achieved that. We hear that some of our KS in **China have announced that they have managed to produce gold**, understanding the T of the Pl, (:38). in past few weeks. We congratulate them, because this is what was achieved in Austria some 3 years ago, when matter state was done. But our KS looked at the physical condition of the field, but you have to understand the HB of the fields.

Enhancement Unit produces materials by HB - can tune to element

In the **EU which you have seen me produce material**, we leave it to you to understand that it's from the interaction of the fields, but in fact, **every system HB is tuned to tune with the sun in the center, and I can change the HB, I can produce gold this second**, and the next second it's the HB of Zn, Cu, O, Plutonium whatever you need.

We can produce Rare Earth materials - as much as want

With the process man will develop new T which **can produce the matters which are unseen to man in the atmospheric condition of the earth, what we call, rare earth materials**. It will not be rare because **we have the knowledge to create the most rarest materials in the U**.

Cannot produce space materials because HB of Earth doesn't match
One thing which mankind has to understand, **why don't we have the other materials which we see in the space on the earth. Because the HB of the earth cannot match the HB of the fields of the plasmas, which have created that matter in that position** in the U.

CO2 Gans tested - Fancy Elements Found

This was very obvious when we gave **the first samples of the Gans's to the scientists** in the **University of Ghent** in Belgium. When we had the reading, it says, this material which we **originally the CO2,** has "the characteristics of materials, (:40). what we call, fancy elements," that man knows about or thinks can be made, but was the first time the equipment of T could confirm the existence of it on this planet.

Transmutation Confirmed - CO2 has fields of 22 different elements

This was a **break point through**, if you read Book # where we explained about the Gans's you see, it has been inferred the system has identified some 22 different elements, because the what we call, Raman and Infrared Spectroscopy, could measure the fields, could see **these fields, confirm the existence of these materials within the Gans. The ability to convert this Gans to any of these elements because the HB of the element tunes to** it. The transmutation of the elements to any other 22 was very clear to us from the second we received the data from R and Infrared Spectroscopy.

It wasn't just anymore CO2. The fancy elements were for the **first time confirmed to exist within the environment of this plasma, within the environment of the HB of the earth**. When you send your Gans's (to the lab) ask them what materials do the system say, or does the system say that can be. This is the confusion for the scientists how can 1 Gans of CO2 as a collection, show the property of what we call fancy elements, which we think exist, might exist. And how can we see for example, (:42). O or .. He, .. K, inside a CO2 MG fields.

Need to find how to Transmute CO2 into different elements

So we saw the transmutation of the energy from the first tests we did in the Ghent University some 14 - 15 years ago. **Now we have to find how from this Gans, which gives us the possibility of the .. fancy elements, can be made, transmutation within the structure of CO2 itself**. We are knowledgeable, read the books, go back to the chapters where you read about the Gans's.

For the first time we could understand, **we can transmute between the elements within the structure of the Pl of the Gans. There was the evidence**, scientific manmade machines could confirm the existence of the field energies which the system converted it to the **possibility of the existence of matter magnetic field strength**. So we see what we teach about transmutation has already been in the books for the past 10 years. Now you can understand more.

Gans of different HB don't mix - Keep a space gap like magnets

Open the book, read it again, then you understand why even in one of the pictures of the book **we have put different color Gans's and we say they don't mix, even they accommodate each other, but they don't have the HB of each other. Gans space, the way you put 2 magnets on the table they created, (:44). a gap space distance according to their HB, according to what M and G fields they get**.

Same with Man's relationships - different HB don't mix

It's the same as the man, **when you have your lover, you bring it close, your child, you hug you transfer energies, but you don't' do that with every man on the street you keep your distance**. It's the same with the Gans's, what is connected and what has a relationship allows that connection.

Scientists to find media for replication

In so many ways, what has been taught now can be explained, understood more, in more detail. **Now the man's scientists have to develop the new T to be able to replicate. Find the media that allows the replication of it for the use of the man, which is that media, the H and O of this planet of different strengths**.

Explains Healing Water - Gather specific field strengths

When you go to .. the **holy waters, or the waters which comes from the mountains** or springs which comes out of somewhere and they say, this water is good for the eye, kidney, because people who have the kidney problem drank it and they don't have any more problem. .. same with the vision problem .. Look at the essence of it. **Where did the water pass across the span of this planet, that has gathered within it the field strength of, .. carries possibly AA which can interact for ?? liquid of the body** .. (:46). which is the strength of the liquid of the eye .. which allows it to function, .. allows what we call change of vision.

Illusive Element to Elevate the STM - can convert back to physical

Then mankind has **to look .. for that illusive element, which by man putting it in his mouth, or bringing it to a position near the STM can elevate the STM** to the D of passing the physicality, where in the physicality that energy field, what we use now, the **physical mouth of the man, has a still control to remove it, and convert back to the physical** condition.

Man will have no fear of Death anymore

As the brain.. within the central control of the man, is still in control of the confirmation of the physicality. This become the time when the **man will have no fear of death** anymore as .. today you have Corona you get the vaccine injection and you hope it works.

Tablet that Expands STM - Cells to harmony - back to physicality - No Disease

But this time **like a scanner, by taking the tablets of the energy fields you expand the STM, and you scan the fields right across the physicality bringing everything to the harmony and balance, and then retracting it**. You had **the cancer this second, and not the next. You absorb the energy from the fields of the U**, which gave you the virus which can destroy, separate the fields of the separation of your cells and now you don't.

Already do this with Gans Fields

In a way, **you already knew this, you put patches on your body, you wash your body with different Gans fields** and the same time you drink the Gans', then .. you inhale it. You have known this knowledge. (:48). It's not something new. Now it's for mankind to reach that point, the point of what we call the maturity of physicality that understanding **man can have anything he needs. You need to go back into it, increase the field strength of it, and then switch it over to expand the soul**.

Epileptic Attack Example but fields go to Physicality instead of STM

In the very first tests we did with the people, which what we call, "**epileptic attack,"** this was very clear, man has that power to do so. But he converts the energy into the STP

instead of to the STM. One of the very first cases when we tested the ability of the fields of this T was with what we call an epileptic attack condition, where **we realized the lady was creating her own attacks, her own epileptic attacks. But when she was creating so much energy, instead of giving it to the soul, she was pulling it to the physicality to get attention**, was then, couldn't be able to control, and then she had the epileptic attack because the physicality cannot handle so much energy in a physical D.

If release Fields to STM become a light or Invisible

If she could transfer the energy instead of releasing to the neural system, instead to the STM she would have been able to become invisible, or become a light, and come back to a physical condition. But **she wanted the attention of the physicality of the mother** and the father.

Mankind Chooses Physicality over the STM

When we handle this, from the beginning it was very obvious to me that how **mankind chooses continuously confirmation of physicality, (:50). to the confirmation of the STM**. The girl was having some 20 epileptic attacks a day. She was under observation from the age of 5 by the most top physicians in the country and when we saw her she was in eh age of 35 - 37.

It was obvious for me from day 1, that **she is triggering the epileptic attack, but for me I had to understand how she triggers it. What is the condition of the creation of the fields that becomes a physical reaction where the vomiting, convulsions**, with the shaking of the body. It came to me very clear from the early stages of this that **she is converting the energy of what is created in the brain**, instead of feeding it to the soul finding satisfaction and elevation, to the D of physicality, then **she looses control and now the body has to get rid of it in pulses as the .. system of the body .. has a switch**. If we can increase this switch to a higher order then we'll find out, will come to be able to elevate the STM.

Epileptics Create Energy that can Elevate the STM

In a way, what the **people do with the epilepsy, those who can trigger it themselves, they create this energy to elevate the soul. But instead of that for being the center of attention, getting that attention, love, they change it to epilepsy. Some chemicals do the same**. We see some people when they take certain medicine give them that convulsion. and what we call epileptic attacks. (:52).

Head-on Collusion - Energy for driving goes into soul - Coma

We do that in the time of just coma, when you have **a head injury, on a head-on collision**, what happens is, **all the energy which was used when you were driving, suddenly has no where to go. And then the body switches off, and then the soul**

operates within the physicality, when we had the first coma case, this became very clear to us.

Reverse the energies to the STM - Elevation of STM

So we have seen how **the energies to elevate the STM is within the structure of the physicality** .. now we need, instead of creating the convulsion, creating the epileptic attacks, or creating the condition of coma, to **reverse that energy to go towards the STM within the center of the brain** .. And then **you'll see the elevation of the soul**.

I can show you how to generate energies for epilepsy - elevation

Everyone of us can make a condition to become epileptic. I can show you within minutes. With the first epileptic case we had, she could control it, **she could decide, this is the middle of the road, if I fall I have more audience**, so she triggers it every time she crosses a pedestrian crossing. Because there are people, I am on the floor, I get the attention. But she looses control, as she looses control, then what we see as the rest of convulsions, .. as the shaking is the energy which was supposed to be used for the elevation of STM. But the girl decided to use for physicality.

I Stopped Releasing Energy to Physicality - Epilepsy stopped in 4 months

Being aware of this knowledge, (:54). I could stop the energy to be released, to become physicality. In less than 4 months there were no epileptic attacks. There were no need for using of the medicine .. according to her doctors, **she has taken over 100,000 tablets in 30 years** of learning the T of how to create energies, but not knowing where to send it. Within 4 months the same doctors confirmed there is no epilepsy and there is no need for medication.

CO2 Fields proof of conversion and elevation

So **we knew this knowledge of elevation of the conversion of it into the D of physicality from the outset. We saw it in the Raman Spectroscopy of CO2** at Ghent University in Belgium. But how can you tell this to people who have no knowledge and no understanding. This is why the knowledge has always been in front of you.

Energy Transferred through Uvula back of throat - Different shape

I have spoken about this epileptic case many times, now you understand the process. **They concentrate the energy in the center point, what you call the little tongue in the back. In a way, they feed the energy to that, directing it to the, what we call the physicality of the man**. When you want to see, when you see people who create their own epileptic attacks, **ask them one question, open your mouth, the first thing you see is they have a different shape of what you call, (:56). the little tongue in the back, it's hanging, pointing south towards the physicality**.

They Suck on Uvula and imitate Heartbeat

This is where they transfer the energy through. **They suck on it, you hear the most of them create a noise, "cluck, cluck" the same noise as the HB. They manage to create the HB within the structure of the emotion** of themselves, that when it matches into the heart, it goes in to the D of physicality, **then it releases the energy** in process we call, epileptic attack.

By Controlling Energy - Transmute fields through HB

So **mankind has been aware of elevating his soul, but he has never managed to bring it inside.** You think I want to travel to planet Zeus, but you put that **tablet of energy inside your mouth. Instead of diverting it towards the physicality, you point it towards the STM, but now you have the control of it**, matches the fields, as it is the home for you and **you reach the transmutation of your fields through the HB of the man through the position** and the place where you want to be, pinpoint accuracy.

I want to be where my lover is - Connected through HB

I want to be where my lover is, where my home is and even the bricks of the house, the construction of the house, has the HB of me which is connected to it. The knowledge of transmutation, .. transportation, .. communication to the HB of the man has always been with the man, but man has never understood, as man preferred to walk, the telephone call, and the sight, as the way of communication, (:58). and confirmation of existence of position.

Start creating HB in Iran - Next 30 days

With the new understanding, with **the development of the new T to be able to match the HB, especially when I go back into Iran, within the next 30 days, hopefully, we start this process**. We don't start from the bottom, we achieve at the highest level and let the people to understand, and catch up. We are not going back to the process of teaching another 5 or 10 years to the science of, what we call Gans making. **We go to the direction and D of creating the HB, that gives rapid expansion in the knowledge of the man**, rapid expansion in what we call the T and the ?? of the man.

Window in Reactor allowed us to see Inner Core and Heartbeat

The **whole knowledge of the creation is within us**. We could see this, in the first space reactors we developed in Belgium and then tested in Iran. **We could see the combination of the two fields with the window we created on the reactors**. When you have the opportunity to go to the exhibition, when you see the Iranian reactor. When you see the blue reactor, which was one of the very first reactors we built **we could see the inner core**. You can see the position, how **we could look into the HB of the system**.

Rotating Ball reached maximum - Stopped - and reversed - just like HB

How we could the **fast rotating ball in the clockwise, reaches the maturity of the fields inside, it stops, and then rotates backwards. The same as the HB**.

Able to Measure Point which HB Changes - at that point divert to lift motion

We could measure at what point that HB, (1:00). that change of the reactor will come, that instead of returning back we create lift and motion.

Control Flight by Tuning to Lover's HB - Override Fields of Earth

We tune into the position. When you have a lover, you create a twin system of the HB. This is how we could totally control the flight, if you seen, the smaller reactor in respect to the bigger, without interaction with the field of the planet, because I **could create enough field plasma inside one reactor to the other, that allowed** us to do.

By Matching HB could direct flight

We were aware of the knowledge of what we call plasma (Pl) and the HB of the Pl from the beginning of time. But now that the KS are aware and understand this, we can expand on the knowledge. In a way, when I used to explain to the KS that … when we started teaching about, and **we explained to you how one system used to fly in respect to the other, was not just by Gans's, was to create the HB to match, that one could lead to condition and position, to become a lover, or take the position which way to go. This was how we could indicate and preplan which way, in which direction we wanted one reactor to fly in respect** to the other.

In so many ways, the knowledge has always been there, but now you can understand, now we can explain that you can understand. (1:02). In so many ways, **you cannot create flight if you do not comprehend the strength of the fields of the HB of the physicality and the STM, be it your machine, .. the planet,** .. everything else which you target to become close to, **to come close to, to be part of**.

HB in Double Core reactors

In so many ways, in the original reactors we always endeavored to understand **the HB through interaction of the 2 reactors**. When you look at the 2 reactors which were built and tested in Tehran, both have a HB, both are double core, if you look at them on the screen you will see. The far distant reactor … they are both twin systems …

First Triple Core reactors - Physicality - STP - STM

Later on the smaller one came to have a triple core. in the other system which were first shown in Italy, the energy system was the **first shown 3 cores system which we introduced**. The advancement of the knowledge was so much that we could even go one

step further than production of the condition of the **physicality, the STP, and the STM**. When you look at the picture, (1:04). of what we call the past, now we can explain what we teach you has already been in front of you from the beginning of time.

Miniature 3rd Core inside the Soul - copy HB of another position

In so many ways, when you look at the energy system, which we showed originally in Italy … . is **a triple core, which means we created such a small reactor inside the soul, that we could even copy the HB of a planet, the HB of another position in the U**.

Allows to keep STP & STM - create soul of position

The first triple core system gave us **the interaction and indication that we could keep the STP, we could keep the STM, but inside create a D of the soul of a position, that inside the physicality wants to be within, to get, to reach, to be part of**. Now we had the power to understand, **we could work from within inside out, we could create a miniature small D reactor inside the physicality of the system**, which allowed us, not only to change the D of the Physicality, it allowed us to be able to create a new D and position.

Third Core hidden in upcoming EU - Transmute & Transport
This is what you will see in the **upcoming EU. We have hidden within the structure the creation and condition of the third, which man has to decide in how he will use it to elevate** and to bring the condition, (1:06). of **the change of position**, or the energies to create **or transmute from one element to another**, according to the strength and point of the observer.

Creation of Third Dimension - of Position - Strength of Soul of Creator

When you look at **the original reactors** which a lot of people were expecting energy from, it was **tested for creation of the third dimension, D of the position, D of the strength of the STC, D of understanding any matter or element within the D of the existence of man**.

Ability to Introduce Plasma to Create Position

It's the **first time we disclose the understanding of**. But if you go back to where we originally showed this reactor we always explained this is a 3 core center. The outer, the inner, and right on the tip of the system **inside we could add, increase, change, add introduce plasmas which could create the position** of D.

We Could See Aura of Position - Needed for Transmutation Transportation

When we did the tests in the labs **we could see what we call the aura of position** and D. These reactors which in **the coming time will be introduced**, is needed to create the

condition for transmutation and transportation, and to be able to convert matters in different D and positions.

Transport STP & STM through the Inner Core

A 3 core reactor is .. inside of inside of inside, where you can change that inside to the position to the strength of the galaxy to the position, of the position on the earth or on moon, and **then transport the STP and the STM within the structure**, (1:08). the center.

Structure of Motion - Create a Third Field with Fields of Physicality & STM

In so many ways, we always had the knowledge. Now you can understand the way it is done, the way it was planned to be, **Now we can explain the structure of the motion, .. creating a third field within the fields of the physicality and the STM.**

Can Create a Soul within structure of STM within its own physicality

You can choose, I can take you within the soul of a stone, as I can create that soul within the structure of the STM in the D of his own physicality, and D of his own soul.

Go within Soul of a Stone - see vision of the soul

Now the knowledge has to become deeper and understood and in the coming time upon **my return to Iran**, … and National Defense University **we will show these processes where we let go within the soul of a stone**, and **explain to all of us what you see in the vision of the soul**, that the rest of us can understand.

Through Center Core of reactor - Take you to Center of Sun, Galaxy or Universe

Now we understand more. we appreciate the knowledge in a deeper way, **we can take you to the center of the sun and you can go to the center of the U, with understanding the strength of the soul within the center core of the reactor**.

This Was Tested in China

We tested this in China, as the KS were not aware of the knowledge. For me to stand back and see and understand how the systems can be used was very clear, **because I knew what I was looking for, while they were looking for something else**. (1:10). We were there to produce and deliver something else for the further advancement when the KS are knowledgeable enough to be able to enjoy the time and space and the place.

How Man travels carrying his STM and STP - Manifests 6 arms

Now you understand how the man will travel the depths of the U carrying his soul and carrying his STP that at a given point and D he becomes, he manifests himself in that position in the D of physicality which space and time allows it to. **Maybe with 6 arms and 2 legs**. Now you understand how much the knowledge has been in front of you. Go back into the teaching and look at the energy system which was brought in and shown for the first time in the Insano, when we went to Italy it was part of .. that T.

In so many ways, **nothing has been hidden and everything has been in front**, but as the mankind does not have the knowledge could not see, could not comprehend that the knowledge of the man is far beyond what is far beyond what is on the table .. what mankind could understand. Now we start sharing the knowledge, .. the existence and confirmation.

Put Soul of Atom in 3 Cores - Through the HB reach the Creator

If you understood this, in the coming time **if you can find the soul of an atom, (1:12). that you could put in the center of the 3 cores and you could understand the HB of that stone within the plasma of its structure you can reach the soul, the center of the creation of the totality of the Creato**r.

Secret to Transmutation is that you Embed - not Encompass - reach moon

You don't encompass, you embed, and that is the secret of transmutation and transportation in the depth of the U. In a way, you work within and not to cover to be able to go, to move **to reach to moon** and do everything else which the man considered.

Start Spiral from Center - H then C build on top

Always remember what I have drawn for years**. I start the spiral from the center and I go out**, and this is how mankind in the coming time will be able to achieve such a process. **You have to work within, you have to understand your H, it takes the center point, where the C will build on top of it, and so forth**. This is part of the process of the understanding, .. of being able to **create a common ground to build on it to every other element to which you might want to add or create or move to, or convert into**.

You Sit in Center - not carried from outside

You sit in the center not to carry from outside. **Man is used to get into planes** and cars and to be carried. Where with the work of the Creator, (1:14). the energy moves within to move the body of the man, not to put the man inside to carry the man. Totally different T, .. understanding, .. proposition for man's knowledge expansion in the work of the U. Maybe mankind now understands what it means, I made man in the image of Myself.

I Live within the Center of Everything that Exists

And I am within the center, I live within the center of everything which exists. Now it is the work of the KS to develop this .. the understanding and the **process of conversion, and transmutation from the center of the body .. and not from outside**.

Energies of the Viruses Fed Directly to the Soul

Would there be a time when mankind will use this knowledge to use the .. **energies of the viruses to feed them directly to the soul and to the center point of the creation** that man can become a compact energy transportation that can move anywhere in the U.

Path to Creator Sits within soul of every created thing - Detachment reach lover

The knowledge of the creation is within the created. It's for man to find the knowledge. .. to understand the process. **The path to the Creator sits within the center of the soul of every created thing, even the man. It's man who has to go deeper inside**, to **become more detached that he can give everything, (1:16). to reach the lover,** to the Creator.

Coils of MaGrav allows you to spiral in to Creator

Then .. you'll understand why even we created even what we call **the coils. Because it allows you to spiral, to become stronger to reach the center, to the Creator. One day mankind will understand, the development of .. the coils which you use in MaGrav** systems, what knowledge was given to man, and man through the greed of the few light bulbs missed the light of the Creator. In time man will come to understand the totality of the knowledge. Our greed for a visual seeing, allowed us to miss the light of the Creator, with the same mission.

Detachment is Strength - Attachment becomes demise

But in time as we become knowledgeable, man will overcome these weaknesses. Of **detachment become the process of his strength, and attachment becomes his demise, be it the love, be it the physicality of a car, or a lover**.

In so many ways, **the knowledge of the creation sits within the STM, it's for man to find that knowledge, to understand the power and the strength of the HB** of that energy center within itself that it leads to its creation.

Heartbeat of Soul of Creator is within Himself

In so many ways, **we listened to the HB of the man**, physical condition. Now we listen to the **HB of the STM** and man graduates to understand totality, then man, (1:18). then mankind will listen to the **HB of the Creator within himself**. Then you understand what I have said for such a long time. That **it takes 1 second to reach to the level of the Creator**, to be with the Creator, as its HB is within the STM.

In so many ways, it controls the man, it teaches the man through his soul directly from inside, and not from outside. In so many ways, mankind will become very wise to understanding of the totality. **When you look at this reactor you see the progress in understanding**. The reactor on the corner this is the reactor with the 3 (cores), this reactor has 2, and this has 1. The reactor has 2, and this 2, this reactor is the same if you look. All the knowledge has been there from the beginning. When you look at this system. .. what do you see? (1:20). 1, 2, 3 motors. When you look at this system. … (long silence) ..
if you expand it you will see rings.

We Measured Strength of Plasma and Heartbeat of System

You will see the expansion of the rings. Each ring ?? links to one position in the center of … your systems. **One measures feeds, or allows the elevation of the center where the position of the planet to be the soul of the Creator, to be controlled**. The knowledge has been there from the beginning, but now we can explain. **We could measure the strength of the Pl in the center of the reactor. (1:22). We could even measure the HB of the system.**

So much Knowledge of Creator in Systems - Now can Explain

When we put these systems in front of you, **there is so much knowledge of the creation and the Creator inside it**. But now as **man's knowledge has progressed we can explain**.

Tiny reactor 3 mm Inner core - Travel anywhere HB matches

This far system here**, has a little tiny reactor in the center, it's less than 3 mm diameter, sits inside another system,** and sits inside what you see from outside. You could **make a condition that this system to travel to any point in the depth where the man's HB matches its existence**. Because when you look it's very simple, we created a small reactor which is controlled and fed through a dynamic feed.

Then we have created a second reactor, which again the **soul sits inside this**. (1:24). . .where we could **feed this one through a hole here**, and this one through a hole here, and then we created the third core where we could do the same and feed this one here. **We could control the rotation of this one**, .. this one, .. and this one. **But in essence in the center there was one soul, what we call the STC. With it, in interaction with this soul, this field, and this field, we could create a condition of moving the soul of the system**, and the soul of the creation this way.

Can take the STP & STM with us

Then when we interact with this one and this one we move the soul of the physicality, in conjunction with the center. Then at the same time we **still have the connection with the**

STP and the STM, that we can take both with us, and when we land in a new environment, wherever it will be.

These are Not Theories

We see instead of the circle system, most probably, a man. **These are not theories**, you have seen the system. it has been in front of you since 2013, when it was shown for the first time in Italy. It's always been in front of you, what you saw the reactors next to each other sits in our office in Austria, in the Shop. (1:26).

We Travel in Space by Tuning to Heartbeat

The history of the space travel sits in front of you, but as you have no knowledge you looked at if it creates lift, if it does this. But in fact, **we tune the HB of every system to be able to be in the D of physicality, in the D of the STM, or in the D of the galaxy, or U**, or whatever we need.

All Elements come out of Center of Spiral - Soul of the Creator

Do you remember in all the teachings, many times, I wrote and I drew this (spiral) and I explained it to you**. If this is CO2, that is the O, this is the C**, and you can go the same way with other materials. But if you look, **the pinpoint of the whole thing, is this, they all have this center in common**. The interaction of the red and the black gives you the green, now you see Cu. The same thing the interaction with you, between the yellow and the black will give you the white for example. You see it. **But it all depends which fields. But in the center they are all the same**. If you reach to this point, you see all these elements as a new element, has one common denominator. And if you **go in the center you see the Soul of the Creator.**

Go Within - Every Cell carries Image of Creator

Man has to go within himself to find himself, to find his Creator. (1:28). Not to look outside where can I find the Creator. In the galaxies and the universes, because **the seed of His essence sits within us. "I made man in the image of Myself." Because I sit within the man. Every cell of the man carries my image**, not only the physicality of the man with 2 arms and 2 legs.

STM is Built on Top of Soul of Creator

I even sit within the STM itself, as his **soul is built on top and above my soul**.

STP Entraps the STM who Entraps the STC

We always said the **STP has created the physical D to entrap the STM, but the same is true, the STM has created that entrapment to keep the STC within it. One thief has become the thief of the othe**r. One imprisoner, has become the prisoner of the other.

Connect inside with Creator - He creates our wishes

Then you understand the process of T&T and every communication, **go within you, understand the strength of the communication with your Creator, and He will respond, because he has access to creator, has the D to create whatever that wish of the man** has been.

Through Detachment you reach the Source

The more you wear the less chances of getting to the body of the man. The less you are detached. **The more you are detached** and the less you wear**, it's easier to reach the physicality to give directly from the source. (1:30). There are no armors to keep the man away from the STC, except the greed of the man in the D of physicality**. It's the man who wears that armor, and not the Creator hiding himself inside it.

Understand Heartbeat - become the taker of Soul of Creator

Try to **understand the process of the HB of every element, and in that HB become the position that is the giver, then when it collapses to become the taker from the D of the STC**, you come close for it to exist.

Through Devotion and Detachment you become part of Creator - to create yourself

There is a point of determine, as you have seen, as you go to the maximum alkaline you become acidic. **If you reach the point of devotion and detachment you'll, become part of the Creator as being the created, you'll become the creator of. This is how we create our children. this is how we create the soul of our children.** Then the whole thing has a new meaning. We give everything we have to create, that, that creation becomes part of the essence of our ?? created.

Replicate it through Fields of Gans's to create Heartbeat

In so many ways, the knowledge of the creation T&T of every fields of the U become understandable and **we can replicate** it, because now we have access to what we call, not the physical strength, **but we have access to the field strength given to us by the Gans's** we have created. In a way, **mankind has to learn how to use the field strength of the Gans's that in interaction creates the HB needed, (1:32). that with it allows the man to transmute, transport and everything else in the U**.

Interaction of Fields of Gans creates Heartbeat

Now you understand why for past months **I keep on telling you work with the fields not with the Gans's, because with the interaction of the fields you can create that**

HB, .. you can create T&T conversion from one to another, position from one place to another.

New Enhancement Units will be so advanced - Creates HB of every cell

Now you understand why we tell you **the new EU are so advanced, because the new EU have taken all this into consideration, it creates with condition of creation of the HB of every cell within the body of the man, every element** within the structure of the body .. or the combination of interaction of the fields, which can field interact with every cell of the man**, but still it has a soul**.

Your Soul allows the fields to interact to overcome the cancer

It's your soul which allows that field to interact to overcome the cancer, overcome the depression, **because you are still within that structure** of that ?? spine (spiral) of the fields of the creation, even though you are getting fed from outside by the system. **You decide if you want to match it to receive**. It's you decide if you don't want to match, and not to receive and hold onto what you have.

We create our own cancers - Interaction of fields of emotion with physicality

We create our own cancers, we create our own creation. **Cancer within the body of the man is not an alien, it's the creation of us. It's the creation of the interaction of the fields of our emotion with the interaction of the fields of our physicality**. (1:34).

Cancer is the weight - the Emotion is the Mass

You remember the difference in the Book 1 between the weight and the mass. **Cancer is the weight, and the emotion of the man is the mass. What we carry as a base in interaction with the fields of our body creates that condition of the weight, of the element of what it to be, you call it cancer**.

Fields of our Emotion Interact with Physicality - Creates Diseases

Look within you, you'll find the answer, to every disease in man. Because it's interaction of the fields of our emotion and physicality which leads to the creation of that problem. Be it the **cutting of the neural system that creates you Alzheimer's**. Being encagement of the physicality, be it to become everything else we want to be, from Parkinson's to MS, to ILS, to every creation of cancer in the body.. We can change it, we can introduce D of and directions. We find the reason for it, we will create it.

Mr. Keshe's Hay Fever - Life was Not Happy - Cancer in Pancreas

Many of you .. I **suffered from hay fever for years, but I had no reason to, the life was not there to be happy, to be living, and there was no reason to remedy. But now**

I have a reason, I love to live to be able to teach and create and help the Mitra. When I was poisoned as many of you know**, my pancreas was damaged ?? by cancer**.

Be with Mitra - Show Love of Creator

For the first time .. being, wanting to create, wanting to get rid of all this, (1:36). for years. **I set out in the past few weeks to get rid of it, because I want to be with Mitra, I want to show the love of the Creator**.

Cancer Gone with One Move - corrected himself with technology

Now **with one move I have no more side effect of the cancer within my body.** Because if I **could eat one berry I could see the whole pancreas collapse. Now I tested myself last week, I eat a bowl of every kind of berry which could trigger my pancreas, no sign**.

We Need Reason to Live - Strength of emotion Brings Change

We need a reason to live, to accept the change and then with that, the strength of the emotion we can bring that change. And the tools of it is given to you in every way through the production of the fields, where you have been **given the tools with what you have, you call Gans's, which came from the creation of the matter on a lower level**. In a way, with the knowledge of the Pl we are elevating you to understand more and more, a higher strength position from Matter state to Nano, N to Gans, and now the fields. In the coming time to ?? fields of the Pl to ?? creation and Creator. But the man needs to take patience .. I made the first reactors which you have seen , the first time 20 years ago. **Because I knew I have to prove it in a scientific way. When I bought the first centrifuge to create the conditions of separation of the first elements to be able to create the plasma**. (1:38).

In 2003, the target is where we are today. **We have all the knowledge but it is hidden within, and we decide when to manifest it**. Be it the knowledge of the creation, be it the knowledge of reaching the Creator, be it the knowledge of producing anything we want, or position where we want. Now you have knowledge, .. been given the possibility to be able to understand more of.

From now on depending on your own intelligence, your own understanding. Look within, now you understand. Within you, you will find the Creator. In so many ways, now those of you who have been so busy with building the double core reactors, get busy with bringing 3, but understand the process. The limitation of Pl, .. creation of the Pl is a limitation of you to what you can convert, to what you can go, and how deeper you can go to reach the Creator and His knowledge.

Because once you move within, you become enlightened with the presence of the others, even the Creator. But don't look in the D of the physicality but look in the D fo

what we call the STM. Maybe the knowledge now, (1:40). has a new meaning. .. a new understanding. Maybe mankind will be able to understand more of itself and himself.

Maybe one day the KS collectively will reach the total understanding of the creation, that collectively mankind will move to **understand their own created, and their own creation, and will be no need for intermediaries as religion, because we learn the correct conduct**, .. the principle of the existence, and with it we set outside, or in a way, we set ourselves not to sit outside, but to be part of, be it using a Cup, .. air filter, .. whatever, we have chosen in the D of the light of the man. In so many ways, from the Cup to .. creation we can choose.

We are that Cup and we decide what's in it, what goes in it, and who we allow to drink from it, be it our lover, be it our physicality, be it our soul. The physicality of the Cup is irrelevant. The understanding of the interaction of the fields which is created within the Cup is the essence of the creation. (1::42). One Cup One Life, that's all it ?? means, the totality of existence lives within that Cup, it's you who has to find the Cup, and find out what kind of fields are within this Cup. That Cup being the physicality of the man, and the water within it, the liquid within it, be it the essence of the creation of the man itself. You create a cancer in the Cup, or you create the elevation in the D of reaching the Creator.

Now man has the opportunity and ability to choose. With the knowledge we give, we create that condition for man to choose. Now you understand why I always said, the heart of the man not the physical heart, which creator of the HB is the temple of the man, and man should never bow, bend to no structure, to no man, to no created thing, except the soul fo himself. How much that soul allows the physicality to understand more of the creation.

The temple of the man is within the heart of his soul, not within the buildings, churches, and mosques, which man has made himself to become a prisoner of, then he can be controlled. The Messengers came to open the door for the teaching of today, and it is for man to understand he is the prophet of himself, and it is him who will profit by his own understanding.

Now you understand why there is no more punishment, (1:44). because it is you who decides to which level you go and how you punish yourself not to understand, and then there is no heaven and no hell, as it is you who decides how closer you want to get to that center or how far you want to be from it, because all is within you and understanding of the its totality.

Thank you for today we go for commercial break .. and we'll see how the greed of the man brings what questions to understand more. about the conduct and the life of the man. (1:45).

>> **BREAK** >> 382 KSW (1:48).

K- .. it's interesting when you teach this way, your physicality is aware of the presence of a soul, and it goes through the emotion, and it is not easy to watch within oneself what exists and what is hidden to share soul condition. (1:50). And it's beautiful to see you are an observer to a process, which is the sharing of a knowledge which sits within the hidden knowledge of the Creator. And it is amazing to see what will come out of such a pure sharing of the knowledge and knowledge of the Creator, so pure. What will mankind and the rest of the creation will make out of it. and what path they take to see its beauty. It truly makes you cry.
Any question.

R: Thank you Mr. Keshe …
(1:52).

Q: Salomea, .. how can the KF using Pl science cooperate to climate change … ?
K- The KF is not the only F but we have the T which we already captured the CO2 .. it's just that how much is the CO2 an excuse for global warming
(1:54).

The CO2 is worse with electric cars …
(1:56).

(2:00).

(2:16).

Cryptocurrency is the start of

(2:18).

When we launched Keshe Coin . the European Central Bank objected … they accepted the Coin within the structure o the KF.
We don't give speculation to it .
(2:20).

Q: .. they are trying to perpetuate the system of control … (2:22).

K- Look at you, outside the window where you sit, you might see a bird flying .. does any of them carry a bank card, or pay for food they eat. (2:24). How humanity got to this point baffles me ..

Q: This PCR test you can find anything you want.
K-
(2:26). In a very short time .. the T of KF is 100% perfect for any virus ..

(2:28).

(2:40).

K- You know you said the best of. .. we are bringing teams to
(2:42).
Best selling books on Internet …
.. I have found peace, that has brought me opening of the T in new ways …

Any other questions . (2:44).
K- There is something interesting Germany .. workshops about KF ..
You are charging 130 Euros, for weekend registration. I know you are listening. You need to get a permission from me to use my name in the conference and then we have to know what you are doing .. .July and August. I don't like to see my name used the way you are using it. But it is nice to see you are trying to spread the knowledge. But advice us what you are doing .. but don't go out and use my name and pictures …

(2:46).
Any other questions.

Q: What is the relationship of individual human beings and the energy of the planet, how can we interact to eliminate the evil to the evolution?
K- The answer to both of them is, nothing to do with each other and it is just a state of
Next question.

Q: .. is this like matching your HB to the HB of the place you want to reach in order to get there? (2:48).
K- That's what the idea is.
Q: Can this HB be displayed in numbers like GPS ..
K- (laughs) I was waiting for that
Q: is it just a concept something that we just ???
R: ..

K- You … song return to the sender there is no such address…. Have you had a dream about your mother … and you went there during your dream . if you have
Did you ask the GPS to be in the soul of that place .

(2:50). The GPS is in the will of the man, the structure and need of the man. So next time when you ask .. where and which dream you saw your mother 30 years ago.
there is no GPS , it's the will of the man …
souls know exactly where everything is.

Any other question.
R: .. the idea of darkness we rely on the light rays hitting our eyes to judge where we are .. (2:52). …

What is it, it seems the less distractions we have
K- Have you ever played the game .. you touch a person to say who they are, their face ..

(2:54). it's touching the physicality. When you touch the stove you don't feel if it is happy or not … when you see through the soul you see the real happiness
Man will do this. Like what I said last week with the whiteboard …
Man has been too blind to the existence of his soul. .

(2:56).

(3:02).
Any other question.

Q: a Gans we create from the field for example C.

K- What ??
R: …
K- Can you repeat ..

(3:04).
K- We always get new materials form different interactions from different fields ..

(3:06).
It took 10 years to make the first CO2

(3:08).
Next question

Q: .. the drawing of the splitting of the universe ..

K- I don't know is it.
R: what about the soul of the leaf. would that be at the center of the leaf or the tip .
K- it is constructed in a different way with verticals. It's position with the central being .

Any other question. (3:10). or should we call it a day. I think we taught to deep today , and we enlightened too many people.

K- Thank you for today ..

(3:12).

R: There is one thing to address …
Q: about calling on the KS from around the world to spray the Pl water and generate the dome of peace next Sunday, (3:12). special Zoom meeting.
K- The KS are working to bring the scientists for the KF TV ..
we bring world imminent scientists on KF TV ..

R:
(3:14). (John translates ..)
Q: .. invite all people 6 PM for a special spraying , if everybody can film what they are doing .. then put together for TV channel. ..
The UC together with Spanish group putting forth invitation for next Sunday .. (3:16).
(3:18).
(3:20).

K- there is a small announcement .. (3:22).

(3:24).

(3:26).
Q: we know the immune system by its emotion it creates a HB ..
K- What can you explain again
Q: … this HB in which category can I put it …

K- it's from the physicality immune is protecting the physicality ..

(3:28).

Q: KF store have new plant food .. how to use it ..
K- There is an instruction goes with thee now …
(3:30).
(3:32).

R: Would these products be useful on a trip to space let's say for astronauts that went in the physicality for a couple of years to eat ..
K- I give you a small insight. Our plan is to create a flight condition by June 2022 .. to create interaction between Chinese, Iranian and American space agencies sometime in Sept Oct. as we have the T advanced… first flight round about June of next year. if we can achieve it in cooperation with a government it will be much better. We have a target ..

(3:34).

(3:38).

(3:40).

Thank you ..
R: .. 382 KSW (3:42).

END

383rd Knowledge Seekers Workshop; June 3, 2021

ENGLISH TRANSCRIPTION

(:16). Hi Rick you dropped off ..

(internet issues ..

there are a number of announcements I have to make that are important for us. (:18). Next Thursday teaching at 7 PM CET. The teaching will carry on the same way .. scientific progress of the KF. As you are aware KF has acquired new posiotn for KF Studios and the operation of the .. exhibition of the KF T on a long term permanent position. We are looking for competent people fluent in German to work ..

(:20). We have now a permanent position .

What we planned with the KF TV interviews with imminent scientists will go online. Which means if you know scientists and politicians ..
We are still on target ..
(:22). this is fine tuning with groups that have already tested the T ..

In the teaching of past few weeks we have brought a new dimension (D) into the teaching. We have brought the knowledge to be understood to be part of the process and operation of the STM. In the recent past many of KS have found themselves in a two track layer, what happened with the Gans's and the rest. The discussion we had with the Italian community, .. the people who have come recently they don't know about the Gans making but they want to go to the soul and to the other teaching and other understanding. .. KF is a spaceship institute, so we have people who are in a first class, people in a second and we have people who think they have understood more and they are on different levels. We have to accommodate all the knowledge that people take from it what they understand and what they know and what they can teach. We have teachers who are teaching very different aspects of the F Nano coating, and there are those intellectuals who have grasped into it, they understand it, and they want to carry on with that side, without making the Nano coating and the Gans's. This is how it will be. Development of the T doesn't depend if you can make N coating and Gans's. It's understanding interaction of the fields, understanding the process of the creation, understanding how mankind becomes to be so. How we will interact in the depth of the U with other creatures fo Creator. (:24). It is important for us to understand the knowledge

and not to block the others. If we have new intellect, as long as we are in the framework of the KF, because we see a lot of people coming in and then taking it into their own, whatever they thought. We bring the T in that we all can understand. Teach it, understand it, and if you have become a student try to accept the understanding of the others. We have to accommodate. This T is .. very diverse, it touches every D of the creation and Creator. No one can say it has to be one way or the other. As I said, every change, slight change, creates one solar system. Slight change creates the same thing. If all the stars and planetary systems .. and universes had exact same characteristics, they would have merged, or they would have locked into totality as one. So we are all different, and the knowledge is gained by every one of us has to be applied in that way. This is important for you as KS to keep an open eye, do not become stuck in the ?? of the past it's been set, it's in the book it has to be. What is written in your book, .. in your knowledge, and what does your knowledge in addition to what you learned from the KF adds to the totality and share it. In this process we have to be able to be flexible, .. as long as we don't come into to pull the whole T to another part which they think they want to push it, which goes back to all the problems of the past. (:26). We (on) track, we try to concentrate on understanding of the totality. The knowledge of the Pl T, of the KF belongs to all of us, and it has to have a diversity in understanding diversity in T, .. in teaching, that we cover collectively all aspects fo the knowledge.

In the present teaching we have endeavored to bring, show and .. connect different part of the work of the body .. with the central control, which we were not aware, we used to call whatever, the whoever came up with, the soul and the rest of it. We have seen .. a lot of things taking shape.

A lot of KF knowledge and T has become the Knowledge in public in different ways. As many of you know we just recently have understood that one of television channels has created a program about the black hole, and what we said in the original ?? KF, that the black holes create radiation fields and they emit fields and radiation, they have called it a "Hawkins" radiation. So we again scientists have taken what was by one scientists and added to something else, what has been in the KF papers of the creation of black hole, now has become attached to somebody else. This does not matter. As long as the people understand it, is the matter, is important. How we can create it, how we added. Steven Hawkins, the rest of his life, the beginning of finding out the KF, the first paper of creation of black hole, spent all his life listening to the teaching fo KF, (:28). and setting his life, step by step trying to , what we explained here, to make it to his tune, that he has come up with something new. He failed miserably. If you listen to his teachings he never managed to come up with anything new. Go back on the last years of Steven Hawkins, you will listen to the KF teaching, because he was literally mesmerized that how he could not accept that such a thing, he could be somebody else's. This is normal with .. You have to understand how these people are born, and how they are kept by the government. In the Second World War Americans had Einstein. British wanted a match, there was nobody better than Steven Hawkins he could not say anything, they could attach anything to him. In a way, he is a fake scientist. In that process if you listen to all his work, even if you go and check, we said in the teachings of the KF, when we launched the third book known as the creation of, creation of universal matter, and the Origin of the Universe. He

gave lectures titled, "Origin of Universe," immediately after the publication of the book. You got to understand, we have to allow these scientists who are in that position to be involved, to bring the knowledge, and in the future things will be put right. We are entitled to teach. We are not entitled to stop. Try to understand the T if you are people of influence in certain fields, try to explain it, at least the correct way that it could be understood. In so many ways, try understand the T from space, .. be open enough to accept every aspects of it. I have see, and I hear, (:30). a lot of old KS insulting and using different language that, "the new ones don't even know how to make Gans's and they are teaching," this and that. They don't need to. Just because you use a mobile phone does not mean you know how the circuitry is made, and what it is made of. Knowing how to use that telephone to expand the knowledge to the others is important, as for some people how to manufacture it is important. SO I would like to resolve this matter, because we see it coming up across Brazil, in Italian , Iranian, in Chinese KF. The old guard want to stick to N coating and Gans making and that's it. This cannot be. It's my responsibility to enlighten you all to come to this point, to understand it. We saw how Brazil KF disintegrated when the old guard said, we did so much, make things, now it is there. You laid the ground, you help the others to build on it, and at the same time with more ?? rows for others to come up with the T. And we see the same thing in Italy .. Iran after 3 years they think they are in charge of everything. This will not happen. KF is going on a massive teachings in the coming weeks and we'll get people who listen to the teachings and jump to the end part. In the beginning and they serve better and bring the knowledge more. It's the responsibility of all of us to look at the T with open eye, accept all aspects fo development in it. We've seen people making a lot of claims, that, "oh, we taught Mr. Keshe and w did this and that." Let it be, as long as they can teach correctly. It doesn't matter. The totality is to understand the interaction of the fields of the Pl

Teaching Starts

(:32). In the knowledge and the extension of what we have been teaching for the past few months. We talked about .. the STM. We talked about the understanding of the totality in respect to the soul and physicality and interaction with the fields of the creation, be it the planet earth. reactors in what we call, development of the energy in the 3 cores and with 2 cores, and singles cores, each one has its own beauty. Each one has its purpose. The knowledge of the creation of the physicality of the man, .. of the tree, plant, stone, follows the same procedure. It's just we, or how the soul of the entity decides to manifest itself. The mankind in the coming time will have the capability and ability to control its position and its possession. What can be its position and what would it like to possess within the interaction of the fields of the D of physicality and the STM. The star of its creation. If you turn the whole thing inside out you will have the physicality of the man. If you turn the whole thing inside out again, you have the STM. It's our responsibility to understand this process. .. to be able, that we are not chameleons, we are knowledgeable to understand the process of which one can move where. How can we manipulate the field forces through the strength of our own soul, our own energies. (:34). Nobody else can, it is this solar system because of the sun creates so many planets and so many moons. Another star does not create anything, it would like to be on its own, we see no planetary system with it. And then we have to understand how the planetary system are

created. As we said in the original teachings .. we are dependent and we are part of the same process. If you look at what we call a planetary system or galaxy, or … any shape or form, whatever size you take. We decide, or the planetary system decides at that position how it and what it might have. As you go to the center of the U we see different kind of lights. .. and galaxy .. , .. solar systems we again different kind of lights, depending on strength of, .. on GM field emission, and accommodating each other. In the center of the galaxies we see a tighter pack of galaxies, the same in the center of the galaxies we see tighter pack with solar systems, we do the same in our solar system, we see a tighter pack closer to the center. and how the fields increase or decrease dictate the condition of planetary and then the same the moon. The same thing happens in galaxies, .. U. (:36). and on this direction the same will happen in the Unicose and same thing will happen in the body of the man. This then for the first time for mankind it's important to understand how this works. At a outer boundary of the solar system a little bit away from the sun accommodates the facilitates life as we see it on earth. The same is in the galaxies, at the boundaries of the galaxies, we see physical lives more or less the way we see it. even though life in different shape or form exists in all of it. Then the same the lives in the center of U exists but allows different structures of life. But with the present knowledge as this becomes to the man, man has the knowledge now to manifest himself at any point. Depends if you allow the STP to overtake the physicality of the man. Or you allow as we see today, our soul to be encapsulated by the physicality. The whole teaching by present time is the transition between these two. How you allow your soul strength to change to a position that it can overtake the physicality, the physicality is protected by the energies, then in this way we become the passengers of the U, .. those who now be able to travel all D. If we stay with the physical D we have what is today, the physical cars, and transportation, (:38). the physical manifestation. The whole teaching how to live this dual field forces. When you understand this you have different structure and manifestation in different parts of the U. In a way, you cannot manifest here in the same physical shape as here, and in the same physical shape as here. Those who live in the boundary of the galaxy, yes, they manifest yourself, as themselves, as we see in a galaxy and on a solar system. The field pressure, the strength pressure will not allow us to have the long arms, and long legs and the eyes and the rest fo it, because we need different understanding, different field strength position. So when we travel with the STM, when we manage to grasp the understanding and be able to create a position of the vice versa between the two, then we can travel the span of U in no time. But the whole dilemma for mankind is how to understand this process. How to be able to move from the STM to the physicality, and then when you manage to manifest yourselves in physical entity, then convert yourself and use the D of the soul and with different strength. (:40). In a way, going into the inner sanctums of the field strength of the man, decide where you want to manifest yourself. But the process will be the same, you still will absorb energy from the U, you still have to give energy back, what you don’t need. You still have to find a position, .. communicate. In a physical D, we walk, we talk, we manifest ourselves in different positions on this planet. We get on a plane we put our physicality into something and we manifest ourselves in New York, Tehran or London. But physicality hasn't changed, it's still there, but we didn't have hidden it inside aircraft, we have put it on a ship, now we have capability, that that ship, aircraft present new knowledge becomes our soul. this is why it's so hard for many of you to grasp and understand. You

are happy to get on a plane and few hours later get off in Tehran and land in London, you have traveled, you put the physicality in another physicality with a higher speed than you can do. Now the teaching is how we put you in that position. You decide the aircraft, .. the craft that will take you through the strength of what you control. You never been trained to be a captain of a plane, now you want to captain your own soul. This is where we try to open your eyes, .. give you the option. The teaching in how to travel with the UFO, (:42). and the flying objects is there. Now we teach you how you can become the captain of your own soul. Your own Messiah. I see in a lot of places writing, "Mr. Messiah." Yes, I am the Messiah, as much as you are the Messiah. Abuse of the terminology by those who are so weak is the way they confirm their existence. Many of you in the coming time will be able to do this. Then in that process of the conversion you will see the light of the Creator, the knowledge of the Creator, and the deeper you go in that direction the more you understand. Then you understand you are Messiah, your own .. captain. How many more passengers can you carry with you, or how many can join you in that trip. How many people can you enlighten that when you reach to this destination in the center of the galaxy, there is somebody to share the knowledge with, to confirm your existence that they come from the position from the time where you have been that you can talk about it. That you can develop more, at the same time bring other passengers of the U with you. We used to get on a bus and we didn't know who sits next to us, but we all ending up at the same destination. With the teaching of understanding of the STM, now we can travel alone, but at the same time when we understand the strength of the soul, there will be others who will travel with us. We don't know where they came from, but their destination point probably be?/ This is part of the T we have to understand, (:44). to get rid of all the problems we have with KS and others to understand the T. None of us was born out of the womb of our mother as a driver, pilot, train director and the rest of it. We train ourselves to become a pilot. We train ourselves how to drive, .. run. Now we have to train ourselves how our soul operates. It's a new vehicle which we are captain of, and we were born with it. it's part of us from the point of inception, because its inception created us. Now for KS is the choice to understand which vehicle you would like to use.
(:46).
there are no schools, you will make a lot of mistakes .. a lot of good things, end up in places you never thought existed. But now we have to be able to understand the new processes of creation, the switching, the elevation of the soul to overtake the physicality, and the soul to become physical.

There are chances in the future most probably many of you will come to understand that you became a soul. In another position, the same strength field and environment change your soul to physicality. You did not, you still wanted to be in the position and the strength of the soul as you thought you were still on earth, in the position of the galaxies and the environment of this U. but in another U due to field strength of the environment you materialize at the same soul strength. Then what can you do except if you had the knowledge of the Creation, you go further in the strength that you keep the STM in control to be the soul. You have to learn when to change gear, .. how to change gear, .. what position what strength, (:48). puts you where. There is no school in the U for this job. We don't have universities, but the whole knowledge of it, the whole knowledge of

the creation and the position, sits within the structure of the STM, enlightenment, understanding and in trial and error to bring everything in the position to be.

Mankind needs to understand how to convert. you don't become a chameleon you become knowledgeable in the life and the ways of the existence in the U. This is my job as someone who knows and understands and has been down this path for millions of years to share the knowledge in the voice and language of the man in the strength and the soul fo the U. This is your job to decide and in that conversion between the soul and physicality everything happens. If you extend the soul ?? wave field strength through the body physicality might change, you might not need anything that you thought you need. As I said .. is when you put 2 magnets next to each other you see them creating their own distance, .. own positioning, .. condition for existence in the interaction of their fields, but how many of you have seen liver, kidney, eyes and everything else in any of the magnets. But they receive fields from each other, .. from the environment, so where they are, in depending where they come in, and where they might go, (:50). in one shape or form, but they process the energy fields transaction. This is what will happen to the STM. This is why if you look in all my work in majority of the time, when I show you magnets. I always use a hollow system, because it has a lot of similarity to the hollow STM and the hollow physicality .. But none of it has the heartbeat (HB) to be there, but still carries a HB. It doesn't have an eye, but .. but it positions itself. If 2 pieces of metal can understand this, get rid of the fields they don't like, position themselves in respect to the field of the man, what is wrong with mankind that doesn't understand this simplicity, but he can do the same with the strength of his soul. you don't need to walk, to walk away from someone, you understand the field strength of it, and you position yourself. This is what the new knowledge brings for mankind. .. what we try to explain then you understand. Walking you can do. You still can have the legs and the arms, but if you understand how to operate through the STM, you are no different than a magnet, .. a star, .. galaxy, and the solar system. This is what the new T , knowledge should bring to man. At the same time you have the control of. the brain of the man stays in position of the brain or what you call control, but does not necessarily, (:52). will be as you see as the white stuff in the skull of the man. It will interact and create the conditions of existence. We know this because when the souls come together interaction of them leads to creation of the brain. Brain is made of interaction of the fields. So when we have a stronger fields brain can .. still operate, but now it operates in ?? no D of physicality and then you travel the span of the U, not being afraid fo what environment I might enter to, and what .. I might change to because you manifest in the field strength as a drop of rain in a given environment, and in the same environment in a given strength in a different strength you become the snow. and in a different strength you become the water, and a different strength you become a mist, but in totality you are the same. Mankind in the coming time will face this as you travel the spans of the U, different strength of universe, different position and condition of the fields in the Unicose. Is in the writing it says, we test the fire (gold) with gold (fire) and then we test the man how he is made, by putting gold in front of him. A man should be from the fire to the gold to the man, all the same. Because he knows how to change the strength of his interaction with his environment. We a fire, when there is a fire, we become part of it. We become gold as we understand the strength of the gold, (:54). to become gold. And become a man as we become, understand the physicality of the man,

but in essence the fire, the gold, and the man are mad of the same. It's us who decides the place, position time and the strength.

In so many ways, mankind has to become alert to his own existence in tow D of the soul and energy. In the D of physicality and existence, in the D of observation, and in the D of he can confirm his existence. It's us who has to decide I want to stay as a field and energy as a Pl, and not to take shape, or I want to take shape at this point to see how it feels. Would it be the same if I sit in the sun on another planet in another galaxy. .. if I sit in the sun of earth in our solar system our galaxy. Would I feel the same warmth, feel the same beauty of the air. Or is it different in other place position and solar system. Now man has the luxury to do this if he understands. It cannot be bought from a factory, it will not be produced in the Chinese manufacturing with the different understanding and the same thing to be manufactured in another part of the world. We do not have machinery for it. The machinery and the understanding comes from the understanding of the inner knowledge of the creation, enlightenment. (:56). I cannot tell you, KF tomorrow sells you a machine that can take your soul to the position. We can do, we have the knowledge, But how are you going to come back, because on the other end there is no machine to send you back except your soul. The old song, return to sender, there is no such address. But there is no one to return to the sender, because there is no postman on the other end except your soul, except the knowledge of understanding of totality. The transformation between the energies and in respect to the Inertia of the position, time, and the place.

We don't teach ethics, we teach the knowledge of the creation. In the coming time many clergy will have a problem with this. Especially on my return to Iran, we will see this. Opposition to the KF will come from within the clergy of Iran, .. the Vatican, and other religions. because they understand monopoly of the soul sits with the man and not the book and another abuse. We are prepared for this. We are prepared to teach the totality and KS have to understand this, that the time will come that the clergy's will put their hats down, and they will start teaching the ethics of the true understanding of the creation and they become enlightened.

But how do you change the physical man into the D of the soul, D of the fields?
You have 2 choices, or maybe 3, (:58). or if you are very knowledgeable maybe 4. As you explained to you .. you enhance the body .. to take a new D, and a new ?? possession, and then reconstruct the physicality. I am going to come back that artist that knows nothing about painting and I give you the lips and the eye (draws a head). The STM has taken its position (in center of head). The Soul is aware fo the environment, the gaseous, the solid, and the liquid which he lives. But in the D of the creation he has .. the Pl condition too, which is a field strength of the others. These are in the matter state, this (Pl) is in a fields state. Somewhere in conjunction with a Pl, and any of these Inertia, this Pl can take shape of any of the 3. But in essence if we feed the man the right field strength, be it through his digestive system, be it through his nose, we create a balanced situation field, which can be at the strength of the STM. You got to realize 2 points, (1:00). That if you reach this point of being able to feed from what you take from the environment by the law of the Pl the energy in what you take must be stronger enough

than the STM that can feed the man. That he can elevate his level, that at a certain point reaches the point of elevation, and passes the boundary fo the man, the man become. In the present science and T the doctors tells you the heart .. on average works so many billion times in its life time, then there is no more life. So if you can calculate how many times each heartbeat has created the breathing of the lung, and the food, and how much energy at what level is, you can estimate the time of the saturation fo the STM. That it become strong enough that it can take over the physicality and we call the point of death. IN this process man should be able to understand .. grasp the concept, in this field, in drips in contrast at a higher level, elevates the soul.

Then it comes the question, are we getting, because of the pollution, the air, because of the bad conditions fo the food, weaker and less energies that this does not give enough energy to the soul to be able to create the point of separation. (1:02). So we need to live longer to be able to reach the point of saturation. The transformation that the STM can overtake the .. STM or circulation of the blood which carries the STM in D of field energy. This is what we call technological development. This is what we call the advancement in science that man can live longer, and we have polluted the air, .. the food, has created a weaker source of energies to elevate the STM. SO the soul needs to wait longer to reach that point of saturation, where in the past it could reach much easier. Have the extension of the life of the man, understanding the work of the Pl has come through the new T taking the much weaker strength than it needs. SO through this point of interaction we can control the strength of the soul, but we can feed it at one end, but we have to encourage it to expand on the other side, to become physicality. WE showed this in the situation with Naomi. We placed as you call it, the helmet, we showed the soul, it has a new D and direction, and with the interaction of the blood circulation we managed again to place the brain cells back in position, but if we would have pushed the system beyond its boundary, mankind would have seen a new life within the structure, where Naomi could transmute between the two. (1:04). SO in a way, if choose in a helmet a position that can surpass the whole of the soul, the same as our skull, and then we introduce a control of the fields, we should be able to create a condition for the man to be able to expand the STM beyond the physicality.

This is part of the first trainings. In a way, if you have the skull you create a barrier, a system which allows the STM to extend beyond the D of the physicality to the new position, while you are feeding it through a new position. In a way, you are using the brain.. and a position and place to control the extension of the soul. But this cannot be a physical helmet because then you have what you had with Naomi, completion of physicality of the brain but no further. Mankind has to learn that the interaction of these two fields can create a new condition of the fields that goes beyond the physicality of the man and allows the STM to take possession, but still the brain inside has control of thinking and understanding, and in this position the STM and the physicality .. becomes irrelevant in the matter state fo his creation. It could be from AA of this planet, it could be from solid matter of another planet, another position, as long as the field interaction can be controlled and dictated by the STM, and the STP of the entity, man or any entity can travel the span of the U without manifestation. (1:06). to the decision of the point fo the soul fo the physicality and understanding of the brain and the control system. Then

you become independent of where you are born, independent of how you are born as long as you can create this condition of understanding of the control of the totality in respect to manifestation of physicality or the STM. If you look, .. understand In so many ways, I gave you this opportunity in the EU. This is why .. sometimes we shall see through the window the light. Where the helmet becomes the structure of the soul of the unit where man sits within and the soul becomes part of the structure of the totality in the center. We allow the soul to expand. This is the purpose of the EU to take you out of the fear. When you want to drive you don't behind, you don't sit in the chair in the living room and pretend you are driving, umm, umm and change the gear. And they go and give you a key and say you can drive. You learned how to boom, boom in the house. You go and sit in the car, you take the car for a drive, you change the gear, you play with the clutch and the brakes. This EU are that car, are that for you to learn how to extend and to expand. This is the true essence of why I introduced the EU, (1:08). and from the beginning I explained to you, sometimes you might see a light. Now you understand the reason, .. the science and T behind it. Because when expand the STM beyond the D the physicality .. , where do you want the cancer to be,, or the Fibromyalgia, or MS. The field radiation, going to expansion, to D will eliminate, rectify, and clear all this. Then now you understand why you will not have any disease when you come out of the machine, because now you understand the reason we introduced the EU, the vertical EU, horizontal EU and the rest of it.

We are talking about a T unknown to man. This is the T of U. I am a man of U. I created it and I live within the creation. You have to understand for us now to explain how your soul will extend beyond the physicality is because now we, the reactor system we built we have created that hat, we have created the helmet we gave to Naomi now in the ?? size of the womb of the mother. In a womb of the mother you don't carry a chair, but you still exist. .. we can reach the soul, and in understanding to transmute the STM to the outside. (1:10). and then let it take the shape of physicality as it needs, as it will see itself fit. In the new EU we will use, it is the purpose In a way, as a delivery room for the soul, and then the child when it comes out decides the size, shape, color and what he needs to be loved by the father and the mother and the creation and the Creator. You shall not see all this what we see in delivery rooms, the blood and god knows everything else. But the mother has to have the presence of understanding which way she likes to deliver, in the D of soul or in the D of the physicality. In the U this is how we deliver, mankind has used their own way. You deliver into the physical D into the environment of the earth. We deliver in the D of soul anywhere in the U. Where the time the place and the position is not important. The presence of both parents, the creator of the life will allow the totality of the life to be decided within the system. This is why we said that once you choose that path there is not adultery, there is no way to do anything, because the system is locked.

Creation of a child through the STM is unique, and it's the way it is in the U. Once that child is created in the soul, (1:12). there is no break in the bond. Anyone who touches it, will receive what you call in the world of the man, a balancing of fields, eye for an eye, tooth for a tooth. This is the principle fo understanding of the new knowledge. That now with the EU. We create this condition and we give birth as in the U, till man goes in the U and uses the whole of the U and Unicose as an oyster and there is no need for EU.

In a way, you have a delivery room in the hospital, deliver the physicality of the man or choose the use of the fields of the U to give birth in the U, or in the system which replicates its existence. The totality of the knowledge depends on the intellect of the man according to what he understands of his own creation. There are no machines to replicate, there are no systems to be in the back of, or plus to be inside of.

Reason for Small Tongue (Uvula)

If you look in the structure of .. the physicality of the man, many of you might have had a look at your mouth. And what do you see in the back of it? A dangling thing. (1:14). We call it a small tongue. Have you ever understood the reason for this, and why its position directly and immediately below the soul? The position of your bits in the back of you, in the mouth, has a reason. You could be a man, .. animal on 4 legs, always look at the position of the soul and physicality, and then you understand why you stand where you stand. Every animal has a position and a strength of the material in one shape or another which replicates this part (back of throat) in the body .. Even in some animals we see it, not necessarily there, but as a pinpoint facing the soul. But man has never understood. In the worm, in the lizard we see this. In man we see it as a dangling tongue in the back of the throat. Each animal has decided position in respect to itself. We see the same in the vertical people where their soul sits, (1:16). and where the .. extension of the confirmation to physicality will sit itself. This is a knowledge that the scientists of the man have to find out. If you could understand this you can create any animal from interaction of the fields. Be it cow, .. lion, .. a worm. The small tongue, and the shape and the position in the back of the throat of the man, if you, where does it look to? To the center fo gravity fo the earth, where its interaction will create a position , direction, physical condition of the man, where the fields reduce and you become thinner, what ever. This parallel condition we'll teach about in the future. But in most of the animals, this point, in pointing of, has been very cleverly in the shape of a dot. It's a single cell which does the same thing, dictates the shape and flow of the animal. In the position of the stone, sits within itself, directly inside the soul of the stone. That's why we see no movement. (1:18). It's the third condition of the existence in interaction with the Inertia of the physicality plus the, what we call the MaGrav of the environment.

The knowledge of the man has to be at the level that understands the totality of the creation. In so many ways, we try to enlighten you. This is why in teachings of past weeks I explained in a very nice way, soft way, that we introduce material that you put it in the back of your throat that you control both ways. In a way, by positioning such a position, (1:20). in a given position, as we discussed before, you .. bring that point which is hanging in the back of your mouth to a position which elevates the soul, and disconnects from physicality. Then you can make this here (back of throat) of different strengths and different penetration fields to what strength you want it to be. Now you understand the structure of the teaching. .. how we are taking you slowly to the next step, the science of the creation. When you take the position and you cut the line of the information carry, to the physical end. by placing a new entity order here (back throat) you reverse everything back to the top. (1:22).

In so many ways, mankind has to understand, now has the ability, knowledge and T to be able to create this. As I said, we used to take a tablet of cyanide to enhance the physical part and create the death. Now we take a tablet of the soul of the plasma and we enhance the STM for man to take the same D but in existence, not separation of the STP and STM. One is the sweet tablet of what we call enhancement, and one is the bitter tablet of the death, separation without physicality. The new way, this way we carry the physicality and the STM and STP together, because we sit within the framework of the brain .. at its outset, at the bottom, where all the interaction of the fields of the physicality come into.

In a way, mankind does not need the spine to behave life. Mankind can use even the nerve system through the jaw to do the same. Because In a way, if you look at the jaw of the man it gives you that freedom over the physicality. You can control the whole functionality of the man through his jaw. Movement of arms, legs, heart and digestive system. We have shown this years ago. (1:24). When we brought the first coma patient out, the connection between the neural system of the brain and physicality was distorted. We went through the jaw, we repaired through the fields of the jaw and then we connected the physicality by its own, neural system. Even that time we had a student, one of the doctors with us that his daughter was becoming a scientist, tended to the presence of the volunteer. And in coma, by fingers through the gum, through the jaw, she could dictate to the body what to move. Does not need me to be there, it was done by a young girl. It's understanding the position that the nerves and the neural system of the man is part of the distribution of the STM. In the smaller measure, contained, directed and channeled. This is why we always say, and you always see the neural system and the blood vessels, STP and STM always move along each other in the body.. and interaction of their fields leads, according to their strength and their position to the organs, limbs, and the rest of the man. (1:26). The potential difference in the strength of the G and M dictates the position , shape, and the cell and the operation.

In so many ways, understanding this you understand how we can even extend the amputated toe, foot or the rest of it. As now we make the physical prosthesis and then we let it be there. But if we can create the condition of the nerves and the blood vessels field interaction, the limb of the man which has been amputated can be put back in no time, if we can replicate the 2 in a given way within the structure of the physicality of the man. In the space we will not find man with one leg disappeared and cut, and they'll be in eh space with 1 arm and 2 legs for the rest of their lives. Mankind has a knowledge to replicate. Now understand the purpose fo the neural system and the blood circulation system in the body .. The strength that the HB can pump dictates the position and strength and the shape of the physicality .. because the STM radiates always the same. What comes form the D of .. field of the Inertia of the planet, (1:28). of the field of the interaction with the MaGrav of the planet dictates if you look Chinese in one place and black in another, and it's part of your AA and memory line, it does not matter where you go you are still looking Chinese. Because your preprogram is setup, is dictated that position. But if I keep you as a Chinese long enough in a position of Africa, you'll become black and African looking, because you came from Africa originally and by change and movement of time and place, and by different tablets you put in your mouth

as a food, and different Inertial G field forces of the water and mountains, and the field forces of the air you breathed, it dictated the shape and color of you that you can survive in that position. So it will be the same with the man when you go to the fields of the U. Interaction of the STM, and the STP, and the Inertia of the place and time, and the field strength of the place, MaGrav system will dictate how you will look. If you need any kind of what we call disposal units, liver kidney and the rest.

The process of teaching how to make this tablet for man will come during our work and return back to Tehran. In that process we will teach how man will be able, (1:30). to reach the elevation of the STM. This is why the EU will be move to Iran to show the light of the soul of the man, where Mitra was born. Where she came to earth as a soul, and took the shape of the man in the physical D of Inertia and the G field of the earth. It was ever the first time the whole U could see the manifestation of the Creator as Mitra. A soul ?? arrives, being memorized with the beauty of this planet. One thing to manifest yourself in the D of physicality to enjoy the beauty of it and understanding the love which this environment creates and make it home where the Creator has taken place to be with Mitra. Up to than, Mitra was an energy, a plasma field, on earth she took the shape and physicality fo the position and the time, and the beauty of it, brought the Creator to be as a love needed to be with a lover. Mitra returns back to the point of manifestation of its physicality to complete the cycle in the coming time. Understanding of the elevation of the STM needs the STM to be able to see at the soul level for the physical D. Those of you, (1:32). who elevate to understanding of the possession and the position and the strength of the soul, you shall see Mitra in this D and direction fo the soul. Those of you who still crave to stick to D of physicality the time will come that you will see.

In so many ways, mankind needs to understand the process and progress of interaction of the fields in the D of the STM and the STP. and how man to be the creature and the created from the love of the Creator will manifest himself in any position and D. In time we show you have to create that helmet of energy, .. that tablet, but till then man should have understood how we came to show this.

In a way, if you understood the teaching about Corona as a virus. In a way, you create that virus from inside, that energy pack from inside, that interaction with the energies of cell of the STP leads to the manifestation of physicality to the eye of the observer in the D of field and energy transfer.

In so many ways, if you understood the process and teaching on how Pl at the strength of the AA of the man leads to the creation fo the shape of the crown in the, what we call, (1:34). Covid or Corona, then you should understand how to create a soul energized from inside that you release a higher order fields from inside the soul, that it becomes the cover and the connection between the STP and the STM and the manifestation fo the man in the interaction of the environment. In a way, if you could release the energy of Corona from strength within the structure of the STM, you would have still seen the crown, but this time the energy comes from within than coming from outside to ?? where you have the control. The next time if you change the strength of the fields released by the soul, you might not see the shape we see with Corona, you might see monkeys, shape of

mountains, and then we call the new virus, mountains, or something else which we relate the shape to. In a way, we release the Pl energy from inside, from a higher order strength, channeled from our own soul where we have the connection and the control. Our job is to teach you how to release that energy to become to be able to transmute between 2 energy fields, the STM or the STP.

In the coming time we have no choice, to teach you to move and extend the knowledge of the man, to the next step, next level. (1:36). The systems for it are in Linz. Many of you when you go to the system you will see the light. It's not that you have died, you have managed to fit and allow the strength of the STM to go beyond the boundary of the physicality and at that switch point you see the light. This is why many people who go and say they went, and tested, they have been through what we call, "crossing over," they have gone inwards in the direction of the soul. and in interaction of the STP and STM has created that light. This is the light of the conversion, and if the STP still has connection to the physicality of this planet you return, but you have made the trip. The light you see, that everything is peaceful is the light where you move form one strength to another and

Many of you will understand this very soon. Many of you will come to comprehend the totality very soon. (1:42). But the stepping stone for man is that man in physicality has to find peace with himself and amongst the others. The end of the war inside the man, when there is end of war amongst the man. When you find peace within and with it you transfer that to the others and create conditions for the other souls to become peaceful.

We go for a commercial break .. we'll answer some questions, depends on your enlightenment, if you are still entangled in the Gans's and Nano coating or if you have understood a little bit more where we can speak of the transmutation of the physical soul of the man, and the STM. Would you like to go to break ..

BREAK >>> (1:50).

K- .. we had multitudes with problems today ..

Q: Saloomea, … STP have only electromagnetic field, and STM have only G or MG field, (1:52). and related to this, the link between STP and STM … ?
K- We don't have any electromagnetic field. In a plasma field we work only in field strength. and both STM and STP have both M and G, giving and taking. The STM does not just take. SO each system has its own dual M and G.
Q: .. and electric field how ..
K- Does not exist in the body of the man. We feel, electric shock if you call it, or that kind of thing, but that is at the physical interface with the physical D. We do not have, because electromagnetic is in the matter state, and in the body of man we do not have

matter state, except in the bone structure, and the center of each cell which has a Ca. That is within the structure of the physical matter state, but still in plasmatic condition.
Any other question (1:54).

WL: .. today's teaching let me link about Buddhist, different color of light. .. you are telling truth that is not usually disclosed to people.
A book (Tibetan book of dead) when people dying what they can see white light and different kind of light. then you go back to the matter world, which light you see go in different world . became an animal of something else. .
K- Different light comes from understanding our own position and possession and interaction of the fields of our soul in respect to the emotion. IN the physical world we talk about happiness, sadness, everything else. In the D of soul we see happiness as a color. (1:56).

(2:22).

Cup 2 .. Cu use AA

(2:26).

Q: Corona swab testing in back of throat

(2:28).
K- .. there is a lot of pushes in the present testing to put the swab in your nose or the back of your throat. Officially lot of governments. .. they can do back of throat, they don't need to go into nose every time they want to do the test. some people say very painful ..

Q: changing the position of tongue towards the soul

K- What does that mean? (2:30).
R: I don't know ..
Q: vocal cords vibrates due to soul, or tongue position or emotion. ?
K- Combination of. combination.

Q: .. ring formed around earth completed in 2020 . what is it made of why was it created?
K- We talk about this in depth in the coming time. We are setting the conditions of the change of the soul of the planet. In what has been the short fall, and what has not managed to transfer the energies to its inhabitants, that has brought this present situation.
(2:32).

Q: .. teaching someone ethics. Is telling someone to follow the 24 Commandments, ethics, if not then what is?
K- In a way, yes, In a way, it sets up all you need, if you understand it. Because the ethics of the 24 Commandments is the ethic of the STM translated in D of physicality. So it does not need to be anything else.
Any other question?

Q: .. video of successful fertilization of an egg .. (2:34).
At the moment of fertilization related to Zn

K- It's the level of the emotion of the STM. Don't forget Zn is one of the encapsulators of the soul. You have the Z, that's why we use a lot of Zn in what we have, the brain damages. because it's part of its constituent of the physical structure.
R: billions of sparks of light.

Q: Kay, … ?? if you hold the uvula back towards the soul (2:36).
stuck at back of throat pointing it backwards … for expansion. ?
K- This is used quite a bit by what we call, understanding of it. We can use .. the small tongue, how to divert and control energies. We have seen that and we explained that in the case of most of the people who create epileptic attacks. How they channel the energies form the brain ..
Any other question.

(2:38).

Q: Alzar, if we cock everybody tongue .. sounds of creation. When you create these sounds and use rapid breathing , change of direction soul because my ?? tells me , I .. is this a way to open the gate that the soul can take over the physicality combination with sound and rapid breathing I am trying to figure out if I am in the right direction?
K- I am going to answer you in a very strange way, correct way .. I don't think anyone of us, or very few of us has seen as many, (2:40) of a "small tongue" (uvula) as you as a dentist. Every time you open a mouth you see it. From now on .. try to see how you characterize the person with the small tongue.
Then you can literally define how a man feature, and then guess or decide how they will be …

Q: .. what I noticed .. constantly moving, same way their tongue is moving .
K- If I was a dentist I should be able to tell many things

If they suffer from such and such a problem ..
Don't forget the Chinese doctors are good at it.

Q: as a dentist, understanding the plasma. .. I already know who they are , I can read the patients … the way they talk ..
My Chinese patients are very difference …

K- … we are not use to in the West. Couple of years ago WL and I went to a scientific machine looks at your tongue and tells you
WL would you like to talk about that
WL- Chinese Medicine has a lot of

Doctors need to practice years and years to tell you , pulse ..

K- But they computerized it now ..
WL:
Q: Talking about the Chinese . my husband studied that, he can tell
…
eyes close together not tolerate other people.

K- You use your mobile husband .. .knowledge of small tongue studied by a lot of cultures .
WL:

(small talk …)
Q: Alzar singing bowls Tibetan ..

R: So where did you feel it in your body?
Q:
R: What about chanting ?
Q: ..
WL;

R: is the (uvula) the throat Chakra
Any ideas Mr. Keshe, you allowed us to ramble on here?
K- No, it's good to understand different opinion, to listen to different opinions it has to be shared … different races of man have achieved the same thing.

All Things in Universe Same Age

Q: Jalal, .. about the soul. What is the extending of the life, take place in this condition?
K- What are you talking about, explain yourself first.
Q: You said, the most important thing, that we create the soul, and the soul become interaction physicality and the emotion. And when this **soul gathers strength it can leave the physicality**, (2:56). like we talked a lot in the past, like a cocoon. .. **cocoon to this butterfly to mature and go out of its cocoon. So what is the purpose, in reality, of extending the life in this case**? Or it's not the (doesn't) matter here, enhancing the way of your life, of the knowledge, that when it is needed to work with in the space, the soul can handle it? Is it lack of information in this case?
K- The truth is, when we talk about extending life. **The life in the U has never changed. We all have the same age, be it the man, be it another star, galaxy, the U . Our time, our source, our essence of creation is the Creator. So we all have the same age**. None of us is older or younger, **in respect to the true essence of time, because we are all**

created from the essence of the same, same origin, the same time. The Creator wasn't created in parts, and then you are part of section 1, part 2. (2:58). But we are **manifested at a given place, position, and strength for a certain time of visuality or observation, by the eye of the man**. Otherwise we are that length, we are just carrying on. And we are just physically visual at this point. This is the reality about our existence.

But we want to say, extend life, we want to extend life at this position for how long. But in essence we came from the Creator. And from interaction of many fields, He ended up with us, at this position in time, but in totality we are the same, continuation of. If you look in a galaxy where the center is here, and earth is somewhere here, or our solar system somewhere here, so the extent of the life has past us, and it's growing that way. So in true essence from the center we are the same, we came from ?? center, you still have the same reality of time and place, where our time is the Creator, and our place is within it. But where, from that point of creation, we are positioned ourselves, and what do we see in that position. If the earth is here or our SS is here in ?? a million years. How does life look for those who are here (further out)? But what is on the other side of that position, on the edge of it. because these field forces of other universes, (3:00). have to block the movement or they have to retract that this (our side) can carry on with its expansion. But the time, the reality that comes, is this (our side or galaxy) the creator, or what we call the Creator. Or is this including what is the other side (draws a circle around both sides), is the totality fo the Creator? Do we have a creator of our U, and galaxy, Solar System (SS) or do we have one creator which has created the totality.

So we are all from the same source, has no time, because we all have different position, but time is the same. This field at this point was part of the Creator at point of inception. It's not coming from somewhere else. So time is meaningless in the bigger essence of creation. It's a position and a strength, which that has taken to become manifest itself at that position, and time, place and the strength. Because you could have this strength in the edge of U, right here at the beginning of time. It depends how many collisions it had and what strength reached that, so it's not exclusivity, and we could have the same strength anytime across this span, and within this boundary. (3:02).

Zero time zero positioning. This is part of the defense technology. We don't look at what we sent, we look at the span of time which we have created and can bring all the same. .. when you have a rocket coming towards you, it is standing still, it doesn't exist, because it is you who expands inside beyond it, and it becomes part of you.

So what is life, why do we want to extend it, because itself is part of everlasting, ever existing. We just want to expand this by a few years, where we are, in that framework to be more physical. Or with what we taught today even, you have learned you can make sure you exist in all D, then you are always living, and you always exist. Is the fountain of youth the true essence or the reality about existence through the STM, not the physicality, because you ever stay young, you are as young as where the Creator started, because you are part of the original rays and the fields of creation. I hope I answered you. .. one step at a time.

Shall we call it a day. (3:04).

Q: .. Heartbeat of the soul , tune to HB of where we want to go. What is the HB dependent on?
K- It is the balance fields between the G and M, in respect to given environmental and HB. Our HB is what it is, and it is conditioned to the HB of the earth, and to the condition of the HB of the solar system. If you change the HB of the solar system, the sun, our HB will change, because it has to interact in different way. In a way, it's the Blood Pressure if you call it. SO its, but hat pressure is a M field pressure, not . .physical pressure. We create the HB very easy. and we can change the HB very easy. it's part of the arsenals of the KF new T. We don't teach it, we stay away from it, because it can be used the wrong way. But we control, (3:06). we have a very much say, and KS are learning more and more how to control it. When we say in Iran in the next 12 months we can travel to the moon. It's not that we are going to build huge rockets, huge launching pads. We go to the essence of creation. How we understand this, and how fast we can control it, and how fast we can manipulate it to create a condition of .
Q: Is our ascertaining of a HB, the essence of a rhythmical occurrence, or is it a perception of a strength?
K- It's the interaction of different strength in M and G crossing point. It's very much if I explain to you, where you find the surface fo the earth and then the gaseous layer, it's a change in the HB of the Pl of Inertia. We got to realize , we have HB within the HB with in the HB. which they interact and they are independent in their own. I envisage upon my return to Iran in next few days,.. as I have with officials, (3:08). we directly go for space travel, space transportation , the rest is the by-product. It's not we are going to build huge laboratories, we are going to make smallest entities man could ever imagine that could fly. Mankind has gone for these huge gas tanks, solid fuel or what, liquid fuel. We go for an atom in that tank to take man across the U. You know what they say, how many atoms is in 1 gram? And we go for that atom in that 1 gram, where the present science goes for how many toms of that can be put in to find position, and it has found limitation with it. They work in a different way, as we call it, micro and macro in ?? of plasma there is no limitation. We show the governments in the next 12 months, and we change the coarse. And nothing can stop it anymore, there no way, there is no world leader on this planet who can stop the course. (3:10).

Q: .. I want to know, has anyone been able to contact their own soul. If so, how can we do it. How can we ?? our soul if we don't even know what or where it is?
K- You have a good view of the god, ask.
.. chose a different name.

Next week we start at 7 PM CET … hopefully we learn more form each other in the coming ..
We don't disclose where we are.

There is no process that can stop us from the new cycle of development. Even those who tried before they find out they fail the path. Mankind is in, (3:12). for a new cycle and generation. Do not forget there is a scientific conference July ..

We expect to give a conference in Tehran before my departure into Romania, and a lecture in China and Washington ..
We will let you know.
Thank you very much see you next time.

R: .. May 28 the recording for that is available.
K- Yes, in that conference we explained and announced for the first time, (3:14). that the KF has found a solution for Corona, and we wait to go through the systems achieved by the Iranian scientists, and the elevation of the totality after the election of the new president. shared with channels of government …

disinfecting the environment .. setting examples for other nations to follow ..

Thank you very much.
R: thank you Mr. Keshe (3:16).

ENGLISH TRANSCRIPTION

(:14). to our time. Time does not exist in the U unless we decide a beginning and an end in that ?? transmutation and transportation of energy. and what it means for us to create that time. in the coming time we will teach you more how you measure time and space in the U. What this means the humanity will learn a new clock time, a new way to measure, where our years and centuries become millisecond in the structure of the work of the U, if we base our time according to rotation of. **We measure our rotation around the sun**, we then measure the rotation of our solar system (SS) within the structure of its **galaxy** when it comes to, and when it reaches back to the same point**, millions of yea**rs it will take. In the larger scale of .. galaxy is not stand still, itself has a rotational direction around its center point, be it another larger galaxy, or be it the U itself, the center of our structure.

We find out mankind as he becomes a passenger of the U, will start placing different time structures according to what it means, because according to those time structures will decide at what strength he'll decide to travel the span of the U. Today we say it takes 1 hour to do a process, (:16). or it takes so many minutes to carry out conversion of energy from one state to another. In the coming time we'll measure in a totally different way as we start learning about universal time, as we learn about universal space and gap, what comes to what position. Because the universal what we call galaxial time for our solar system across the whole other bunch of things and the U and the galaxies is totally different. The way we see **Jupiter or Mars have different annual time**, it takes so many years for them to do one cycle, is the same with our solar system in the Galaxy, and galaxy in the U.

Time is Tuned to Energy Consumption

We will tune our time, because the energy levels in our SS is consumed and produced in a slightly different way then the energies in the Unicose, in the galaxy, in what we call in the SS of the universal condition. What does this mean? We calculate so much energy according to the materials which we have in our possession in this moment in time.

Time will be Measured by M Field Strength

As we know, as we ?? dimension (D) in space travel, and we work with a M field strength then the time does not go by how much fuel we carry. **Time goes by what strength of M field you operate, under which scale? Because the MG field of earth is totality different than the MG field in our SS**, and the same in our galaxy. and the same in our U. (:18).

Souls are Based on Interaction of MG Fields

So mankind gets introduced to a totally new ?? of calculation, measure, understanding, but there is one beautiful point about al this. **Is that our inner being, .. structure of our physical body,.. physical soul, .. of our Gans's inside our body, and our soul, all are**

based on .. interaction of MG fields. They don't depend on how many pounds of diesel fuel .

Universal Community has own Measurement of Time

mankind understands he has entered Universal Community measurement, .. understanding of time, universal strength of the fields which dictates these conditions, then you go back to .. black board. We have to start, redesigning, .. understanding of our own physical being, how they are Gans's of my liver, in the time and space of itself, within the galaxy of my body works. What time it takes, how much it has to give and take. We will learn that what for example, 28 days for change of cell of man …

(:20).

Our language of earth is burning, fuelling, tanking and every thing else, but when we go into .. cosmopolitan of the U, these things don't exist. (:24). It's no good speaking Turkish in the middle of the English community, have ?? understand ?? We have to learn the new language, .. science, .. and this is one of the reason mankind has been left out of the U Community, because mankind never made the effort, never strived to understand the work of the U. With these humanity to this level. We are bringing you to understand you speak the language of earth on earth, fuel tankers, the cars, the ?? and the donkey. In the U we speak about the strength of the fields. What fields, what strength, which galaxy, what ?? level, which position in which part of the U. This is in the time and process of understanding of the knowledge of the creation, we have to oblige otherwise we still be the citizens of the ?? of the earth that cannot go to the city and be able to communicate.

This is part of the teachings, and part of not creating new systems for you to be able to speak and measure the strength of the fields of the U, but for you to understand the operation of the work of your soul, physical soul, and through that understand how the U works. There are no universities,… books because in the world of interaction of .. M fields of the U, the souls are already educated, they are fully educated, they understand the totality, .. the beginning to end of work of M fields. (:26).

In a way, you can stay in the D of physicality and write about everything about M fields, but you can go to your soul and it's already PhD, post graduate in every knowledge of the U, motion, interaction and life. In a way, of the soul the soul, its existence, and its conversion, its operation, and its totality. In so many ways, I cannot offer you another enhancement unit (EU), I cannot offer you enhancement in the language section of the Creator. In a way, we all carry that knowledge within us. None of us has a PhD in anything, and none of us is illiterate, we are all educated. We all have, and we all understand,

(:28). As it was said in the writing of the Iranian press regarding Pl T, it says in the coming time it will take man 1 minute through the Pl T of the KF to go to Moon. Now we understand the KS of Iranian scientists have understood fully …

Then you would you
would you become a prophet to the others who have not managed to meet ..

(:30).

Preparing the Final Meeting for you to meet your Soul

In so many ways, **we are preparing you for the final meeting of you with your soul. For you in the physical D to understand the operation of your inner being, which is in touch with the totality of the creation and the Creator**.

In so many ways, as I said, we have no measuring tools, because in the U you don't measure. **If you come to measure, it means you still are entangled in the D of physicality** in "one way or another," one strength or the other.

In a way, when we see, **we understand and we be able to replicate the work of the U, it means we have started to understand the language of the U**, we have been outside the house, we have put a foot out, we heard the voices and we try to understand, we try to grasp the idea of what it is. In so many ways, it's the language we have to learn if we want to be part of the society, to be in it, to be for it, because of it, that we respect, we want and we desire to be in it.

Mankind's Threshold of Decision

In so many ways, the change of time, the change of knowledge, the change of understanding, (:32). the process of the creation for mankind has come to be what I call the threshold for us to decide.

Not Able to Replicate Physicality Exactly at New Destination in the Universe

On earth we choose the materialistic conditions of this planet. **We travel the span of the U another planet, to another star, to another position, to another Unicose, and then we decide to accept the condition and operation of the physicality in that point. We can carry the memory of the physicality on earth, but most probably we will never be able to replicate it on that point and position**, there will be no cows to milk, and no donkeys to take you from A to B. The education of the people of in that, or what I call, "the creation on that point," might be millions of years backwards compared to what you understand, or you will be millions of years behind from them.

In so many ways, we have to learn to be the chameleon, and at the same time through the structure of the STM, and **created STP of the man**, in understanding the emotion

between the 2, be able to travel the span of the U with one common language, that everywhere we understand, unless we come back home to earth and we all speak the earth language and even at that, we have to speak the language of where we land. It's no use being Chinese and then being in middle of New York and trying to speak the Chinese, nobody will understand.

Physicality of Man has STM on a leash

In so many ways, (:34). Mankind has reached a point to understand the language of the U. To understand the process that the STM, the totality of the STM has been operating in the back ground in the U, where the **physicality of the man has trapped the STM to be kept ?? on earth. In a way, we are like a dog on the leash**, but this dog can go as far as you let the leash go and when you let the leash go. We have leashed our soul, and we have tied it in the hand of the physicality of the man.

Thinking and Feeling like a Universal Person

In so many ways, we have to realize 2 things. To understand the work of the U, to understand the operation and strength of the life in the U, and in that process to be able to comprehend it in the language of the brain of the man, if we want to. But there is one point for many of you which will come up in the future**, am I thinking in the earthly way, in my emotion, the earthly emotion, or am I speaking and thinking in the D of universal way. We'll come to that point, when we start dreaming, and thinking, and moving for awhile in the strength of the U, you become, you will think, and you will live, the life of the universal person**. But till that time you have to practice, .. you'll need to learn the ropes, you need to learn the ways, to understand, (:36). and live in both directions and D and directions.

A man at home, but a man outside home, but a man of U outside home. As have been said .. **we have to accept the condition as it is us who wants to be part of that new condition. It's us who is pushing to understand the ultimate goal of the creation**. It is us who missed, who has kept on a leash the STM to be connected, and **we have denied for it to communicate with us**. For it to be able to share with us what it sees outside. We closed the door,.. windows , we disconnected all the means of communication with our soul because the physicality was too good, we could feel it, we could see it, we could touch .. smell it.

How Does the Universe Smell - Smell of M Field of Earth

Where and how does the U smell. How does anther planet smell. At the moment we know the planet has a HB, but what is the smell of the planet. What is the smell of earth, how do we know when we are in a position , another D in the U? **We smell the M field and say this is the smell of earth**, "I used to live there, I had the connection."

Learning to Sense and Feel Universally

In so many ways, we go through the whole rigma of learning the universal motions, universal ?? senses, universal understanding of totality of interaction. In a way, mankind has one big advantage, as his ?? belief in D of physicality has established, (:38). a lot of ?? new connections between all these new conditions. between all these emotions, .. senses, and then he'll add to it more. At the moment we feel the breeze, if we listen to our soul we feel the strength of the fields of the M fields that we are in. we are not just leaning behind the window and feeling the warmth of the sun, and then going outside and standing in the sun, because outside we feel the breeze of the wind, and at the same time, once we become wise to the strength of the emotion of the STM, when we are outside, and maybe even in the room, we feel the breeze of the fields which pass us in the room or outside.

We become aware of a third D which we have ignored through our knowledge and our presence till now. In so many ways, we go outside and say it's nice and warm and windy, but we go outside … and the field flow of the M field of the U, or the planet are in such motion. We feel the real D of the interaction fo the fields fo our planet and our U. That will be done when mankind uses the T of the science ??? soul in the D of the field strength of the M and G fields.

Changing Gears of M Fields to travel faster

Then **we understand as we create different gears for different acceleration of our car, then we will understand how to create and bring different strength, (:40). of the fields of the U to be able travel faster or to enjoy the breeze of the time**. As I said, unfortunately there are no machines in the U that can measure these, be the M G fields created by the interaction of the fields of the U, which in interaction and connection of it has apparently become your soul is part of it. That's how it was created, out of the interaction and the balance, and connection and emotion of the totality.

Enhancement Units for Man to train how to Operate his Soul

In so many ways, once we let you loose to be able to use .. **different types of EU, it's for you to learn how to operate, … run, and to feel your soul. How to understand the emotion of the soul, .. live within the structure of the emotion of the mankind within the structure of the soul of the U**. In so many ways, now we understand why it has been said, "I made man in the image of Myself." as man will feel as I feel, mankind will understand as I understand, mankind will be at the same ?? time as I am, and will travel with the knowledge and the energies that I travel. As I travel to be the mankind, I travel to be as part of the essence of his creation and within it I operate as me, the Creator and the created at the same time.

In so many ways, **our soul is the reflection of the interaction of the fields of the Creator and the higher orde**r, then our, (:42). physical D and strength. In so many ways, we can if we endeavor to understand, in the coming time to **go to the D of our soul, to the D and strength of the U, to the understanding of the operation of the U Community with the knowledge of the man but with the emotion of the Creator**.

Mankind Needs to Understand Operation and Emotion of Own Soul

In so many ways, **mankind needs now, to understand the operation and the emotion of his soul, and understand the same emotion, plus more is within the soul, within the structure and operation of the STM**. In so many ways, we have brought the totality to be together, .. understanding of the Science and T of the man to be the same as the S&T of the creation and the Creator, through the operation of his soul.

In so many ways, how many of you will ever **reach to the level of understanding of the creation and the Creator, is in totality the understanding of the work of your own soul**. When you understand the work, operation and strength of the STM, you have understood, .. of the Creator. In a way, you have made a pathway, you have understood the operation of the U.

In a way, **when we make you to understand the work of your soul we have made you a "Man of Universe," you become part of the U Community**. (:44). It will not be anymore waiting to see the alien and UFO, it's you understanding how you can travel the span of the U, and there are no UFO's and there are no alien's.

Because **we are all part of the same,.. of the same structure, the love of the Creator, which by His love, which is the giving, has become us**. In so many ways, in what He gives, and what He takes to consider and to create us, we are created to be Him, to understand the totality of creation of Him.

In other words, when mankind will become wise to understand that he is of a kind, of the Creator. He is not only creator of his own children in the physical D, but in essence in the world of the creation he is the child of the Creator in the D of the STM, then there shall be no prophet as we have the knowledge of the totality from the ?? itself. How many of us in this cycle of existence on this planet, and this time will become wise to the knowledge and ??? understanding of the creation, all depends on our openness to understand the totality, and work within the structure of its work. I made man in the image of Myself. ?? do the same, and work the same. In so many ways, mankind will come to understand the totality of everything that exists. (:46).

When one of Mankind gets Enlightened - can Enlighten the whole

In the coming time and in the coming understanding of the work of the U, understood by man, **humanity will take a massive step**. In a way, .. that **once one of the mankind got enlightened, he can make the others to be enlightened at the same time**, to the totality of the knowledge to understand the work of their soul.

UN found One Common Mother of Humanity

There is a reason for this, and in many teachings I have always said, that **in the statistics provided by UN of mankind, tests taken from 10,000 women, from 10,000 tribes** on this planet have indicated that all come from **one common denominator mother**.

Mankind Enlightened in One Instant

And **if mankind at the strength of the soul of the one who gets enlightened, reaches the strength of the soul of that mother ?? then for the first time mankind's knowledge has confirmed the existence of a common mother, the whole of the humanity will be enlightened in one instant**. And that instant is when the true mother of the creation, Mitra, will manifest itself on this planet, which carried the soul and every being on this planet will be enlightened.

Enlightened through the Knowledge - No More Killing

In a way, **enlightened through the knowledge** of the creation and the created. In a way, becoming enlightened to understand the totality, the beginning. **To understand the connection between the physicality and the STM**. (:48). And through that process **deliver mankind from centuries and thousands of years of pain and suffering**, where **man shall not kill, .. understand the work of the U, and deliver through the interaction of the fields of his soul to feed his physicality**, where there shall be no killing, there shall be no war. And **this promise will be carried out by us in Tehran**. We'll bring an end to wars by sharing the knowledge. We'll bring an end to hunger, by sharing the energies of the Creator to the D of the mother creation.

In so many ways, we give the knowledge to mankind, and it's the time for humanity to take a huge step. **That huge leap to understand the .. true essence of the creation in the realm of the Creator. We salute you Mitra, for your existence. In a way, we bring mankind to the true mother of creation**. Not to this planet, but in essence Mitra carries the knowledge of the STM too, the two shall come to be one, and mankind will be enlightened with a new knowledge, to be able to understand and transport between ?? transmutation fo the elements, to transmutation of energies will become one, and in that process mankind reaches the wisdom of the creation.

In so many ways, in the coming time **by educating the elite scientists of the planet, we enlighten, to enlarge, and we teach the elite created and the creation of the Creator**. In a way, **the totality of His creation will be enlightened, as the love of the father, (:50). rains equal upon all**.

Elevation of the STM - through understanding operation & Emotion of it

In so many ways, the **elevation of the STM** will come through understanding of the operation of it, of existence of it, of being there to be able to share, .. to understand the emotion of it, .. to understand the work of it, in how to interact with the D of the strength of the physical

We Still Go on with our activities -

(:52). In so many ways, mankind has moved into a new D. In so many ways, humanity has taken a huge step by understanding the concept and work of the U. **We still will cultivate this lands, we still will fly across this planet, we still go to colleges and universities to get useless degrees and PhDs and become more ignorant to the knowledge of the Creator, where the village man on the mountains of India will be more enlightened** than the man with the degrees sitting in universities, because he has no prejudices and sees the beauty of the creation, he understands the mountains by looking at the created U, and through the stars in the skies.

How Far our Soul Elevates -

In so many ways, how far our knowledge, **how far our soul will elevate itself is according to what and how much we take the shackles of physicality from its prison cell, which is within the brain of the man**.

Without Sharing Knowledge - as good as dead

The **physical knowledge of the man, in the past centuries has become another bigger noose around the neck of the man in understanding the process of the creation** and the Creator. The purpose of the teachings is exactly the same, to free the man from these shackles, to understand the process of the creation and be able to use it, to apply it, and live within it, and at the same time create a condition for the others to be able to enjoy the beauty of it. **A man who understands and keeps it to himself, is as good as a dead man. ?? doesn't exist because he has not shared, and it shall not be shared with any, but himself**. (:54).

Join Universal Community by Understanding Your Soul

In so many ways,, mankind will be elevated to the new soul of understanding. Mankind will be elevated to new levels of understanding of the totality. **Mankind will come to be part of the U Community by understanding the work of his own soul**. You were waiting for the UFO's, .. for the most advanced technologies to take you to the U, to become part of the U Community, but in fact, **you always have been part of UC, by not understanding the work of your soul**, you only looked at within yourself, within the brain fo physicality of the man. By understanding to go further inside and free that soul within, you become within an instant a traveler of the U. You become part of the U Community and with it, and in it you carry the totality of the knowledge, because the knowledge has been the cause of its creation.

New Way of Birth - Create Soul First - then physicality in Womb

This is the reason I said in the past few teachings, in the new way mankind will produce his offspring's will change. You will see that in the womb of the mother, will lead to creation of the soul first, and than through structure of the physicality of the fields of the

planet and the womb of the mother the physical life will start. As today you start the physical life with sexual interaction to create, to bring two systems together, then create the soul. In **the new way, you create the soul first, (:56). that with it carries the knowledge of the U first, and then it decides in what shape or form in the womb** of the mother, will take shape and manifest itself, understanding all the needs of the physical D of the point, the place, of the position.

The Soul will feed the man - He will not kill or destroy another

In so many ways, instead of starting from back to front, from now on we start from the front and go to the back. We go to understand the totality of understanding. **We go and we pickup the fields of the U, and we interact those fields, with the fields of the U of our partner, what she feels, and in interaction with those fields will lead to creation of the soul within the womb of the mother. And then the physicality will take shape**, and then the child have the knowledge of the U in totality. And then mankind **will not kill as the soul will feed the man**. Mankind will never destroy as he knows, he is destroying part of himself.

Mitra is the Collective Creative Power

In a way, the process of change has to come from within the womb of the mother, the mother of the U, the mother of the creation. In so many ways, **Mitra. In a way, we call it Mitra, for the collective creative power, for collective understanding the fields and the motions of the U.**

We Gift this Understanding to Man

This is a gift that in our cycle, we have given to man to understand the change, to understand the coming of the new time, that man shall not kill anymore.

Man and Animals will not Kill

Man and the animals on this planet will not destroy another cycle.

Each Entity is Beginning of a Star - Earth a Nursery

Each soul knows within that entity, that is the beginning of another star. Earth is the nursery of the creation of the Unicose. (:58). You become the travelers of the U through the D of the soul you will know which star, which galaxy has the seed of the earth, has come from the mother land of the mother of the creation, Mitra.

Become the Seed Soul of a Universe

In so many ways, mankind will come to understand it's not a privilege to be white or black, **it's privilege to be the soul of the Creator, .. to be the beginning of the soul of other beings in the realm of the creation and the ?? created**. In so many ways, how would you like to see your soul, now that you understand you have the capability, and

you are not only capable, **you have been made to become that shining star in the center of galaxies, and some of you will reach to a higher level** understanding of the creation will **become the center seed of the U**.

Enhancement Units to see your Soul and Elevate

In so many ways, there **is no education,** no university, there is no D in direction of the emotion of the creation, **except from the strength of understanding the totality of the knowledge of the Creator**. Now you understand it, I repeat again why we have created **the Enhancement Units (EU) for you to see your soul and through understanding of that, to be able to elevate your soul**. Our job is not to give you, and keep you away from cancer. Our job is to create a condition where you **take your soul with the knowledge of the creation and the Creator, in the beauty of His creation to another D in the** U. (1:00).

We Allow you to Live a Perfect Life

In a way, **we allow you to live a perfect life**, that death, killing, and destruction which has been the pattern of the physicality of the man, this time by allowing the STM to be created first, will not exist. We create the perfect man through the interaction of the STM to become and to be created first.

In so many ways, **mankind is a different kind of man when he comes to understand the work of his soul. he comes to understand the operation of understanding the strength of his soul**. Try to look not with the eye of the man within, but try to look with the sense of the eye of the Creator, and you shall find your soul, its operation, its understanding. Maybe it is time for humanity to take the next step. The next leap in education to understand **that the next step for man is to understand the creation of his soul. The Mother, the seed, and through it live and exist through all D** of the existence.

I hope I have enlightened you to understand what is to come. And I hope the work of the man's scientists will create D and systems that allows you to know your soul better that through it you will not have the physician of the physicality of the man, we'll have the scientists to understand the process of the elevation of the STM, not in the name of the religions, (1:02). but in the name of the work of the STM himself, as he enlightens to understand more, as he understands more, he reaches closer to the D of the totality of the knowledge of the Creator, which lead to the totality of .. creation.

Not to Abandoned Earth Like (Mayans) after understanding Soul

In so many ways, now in the process of coming time we have to keep busy, not just because we understood our soul, we will desert, and we'll go. In so many ways, **we don't want to see what happened in the southern Americas, that we find the cities without citizens and is abandoned, and is given back to the jungles**. We don't want to see the

mankind by understanding the work of his soul to abandon the earth, that then creating the new souls, and **seeds for the creation of other universes to stop**.

Mitra Converted STM to STP of the Man - IMPORTANT

Mankind has to understand that there is **a beauty in the structure of the mother nursery of the U, planet Earth, where Mitra took first step to convert itself from the soul of the mankind to the soul of the physicality of the man**. And then we have seen what has lead to the rest of it.

Every Being is a Silver Seed in the Next Universe

In so many ways, every planet, every created, every animal, **every being, is a silver seed for the next step in the U, when we cut a tree we take a soul, when we kill an animal we dismantle its D and direction in its evolution of the maturity. This cannot be** done.

Earth is just another Cell in bigger structure of Universe

In so many ways, **mankind has to reach to total understanding, (1:04). of the purpose of his creation and why everything around him has been created**, as we go to the D of the U we'll find that **earth is just another cell in the structure of a bigger jungle, a bigger structure of life of the U**. We are just one cell in the totality of the structure of the creation.

Understand Operation of your Soul - Instantaneously you become U Community

In so many ways, try to **understand the operation of your soul**, .. how you can get to it, that you can get to the totality of the knowledge of the creation **and instantaneously you become a member of U Community**. Unless you choose what you fancy as UFOs and you see come and go. Because those souls have managed to reach the elevation of the soul and teaching that we have given to the man.

We have come to Create Perfect Beings to seed Unicose

In so many ways, **we have brought this knowledge to man, to thank man for creating such a beautiful souls that have become, in the maturity and the understanding of the balance of the work, the souls and seeds of other galaxies and universes in the Unicose**. In a way, **we have come to create the perfect being, that it creates perfect cycles of life, that by teaching man that perfection comes from understanding of his soul** and not ?? feeding his physicality to become the greed of killing and the rest.

Thank you very much for today, **and I hope you understand the total essence of the creation**. We thank those people who are in the background working to bring this situation for the teaching of the KF to become part of the international teaching to the

understanding of the work of the (1:06). the science and T and through it the knowledge of mankind. We salute his eminence Ayatollah K of Iran, for opening of the new science to the world through the new education starting in Iran. And at the same time, it is not just Iran but the totality of us depending on mankind to elevate to that point.

Invited to Tehran to Learn Knowledge of Universe

In so many ways, **the beginning of the knowledge of the U will start in Tehran in the next few weeks, and we welcome as many of you as would like to join us in education in the institutes, and universities of Tehran, to become the KS of the U**. In the coming time the Iranian officials will announce the ?? opening of these structures that we teach the whole of humanity the new knowledge, but the option is yours. Take the flight of fancies and learn UFO's and try to learn your engine with no fuel, or learn to travel in the D of the STM and become part of the UC. as when you become part of the UC at another point and D and position in the U, when you take your D of physicality, now you have to live with their education, their understanding, and their style of life. In a way, you change the village of earth to another village, in another city, in another part of the planet, and in the U. In so many ways, we open the knowledge of the U to the man in the coming days, and we do not expect much, **as man has always been a slow learner, but when you learned, he became a perfect child**.

Thank you very much for today, (1:08). and I hope we go back to normal time ..
as we travel back to Iran, we change our time to Iran's time ..

Go to a **BREAK** >>> (1:10). (1:14). 384 KSW

(1:16).
Q: Hassan ..
K- How are you how is teaching in Farsi.
Q: .. I am learning how to teach … (1:18). to people who don't know much about plasma T.
I have to learn how to make it simpler for people to understand.

K- .. We need many teachers in their language.

You are on your own. Just go to your soul and I will be there to support.
Q: it's true… many times I went to my soul and asked for your help .. you saved me many times and I felt your presence .. (1:20).

K- You don't need a picture, you just go to your soul. Otherwise, then you need a cow, then you might have a motorbike to be there for you .. Gain confidence in your own soul and its teaching. When you teach in a mass ..

(1:22).
Teach through the soul, one soul at a time. ..

(1:24). Any other question?

Heartbeat is NOT Frequency

Q: .. **Is the heartbeat of a planet or a star the same as its frequency or vibration?**
K- No. .. The HB of a system comes from the interaction of the Pl of the G and M field. Frequency is a matter state vibration to penetrate space gap within the structure of the atomic structure. Totally different. We don't have frequency in a HB. A true HB comes out of the balance of the 2 fields, of G and M. Tesla understood this, but he could not bring it home. He could see it, but he could not grasp the totality of it. And when he came very close to it, he could not physically build a system for it to show it, as he had no access to the knowledge of the Gans's, another plasma. (1:26). He worked within the structure ?? field of physicality. Heartbeat comes from interaction of the fields of a plasma not from a frequency.

Q: Does a MaGrav of a planet detract or enhance its heartbeat?
K- In a way, it depends how the structure of the MaGrav of a planet is set and what is its purpose, is it to increase, or is it to suppress the certain fields of the system?

MaGrav Built Wrong by KS -

Many KS .. have built MaGrav and never understood why some of the MaGrav's don't work or they can't feed anything. Because your top MaGrav, top ring, has been constructed as you think correctly, the wrong way.

Coils Wrong Way - Suppressing Power Production - Zero Interaction

You're **suppressing the power creation, you're suppressing the release of the fields. In so many ways, many of you don't follow the structure of the production of the MaGrav's the way it should be. You put in one coil the opposite turning to the other**, and you suppress your field. And because you learned it the wrong way, some of the MaGrav's you work, ?? worse. Because In a way, you put two ?? columns facing each other. In a way, you created zero interaction. (1:28).

Planetary MaGrav - Dictate effectiveness of fields and position

The **MaGrav's of the planetary systems are created by the interaction of the fields dictating the layers and everything else. the field D and the gas D, and the Nano material D. So the way the top layer of a structure of the MaGrav system is set, or planetary system dictates the effectiveness of the release of the fields, and dictates the position** of a planet in circulating solar system.

Bone Channels create MaGrav to create hormones Immune

We have the same thing at the end of our bones, **the Nano layers at the end of our bones, like femur when you look, is MaGrav positioning strength dependent structure**. We look at the very, very end layers, **very top layers, position of the last hole and cells on top of a bone, and then slice it every mm and see how it changes**, and then you understand the position and strength of the fields, have lead to the creation of certain structures in the bone. Which is porous, if you look you can chew, .. damage, .. cut, very easily on the top layers of your bone, are the joints. you can't do that when you get to the main stem of the bone. It's solid rock. the slight softness of the top end, (1:30). is the **space gap field energy which the Nano material positioning allows the body to transfer bone marrow into anything, to be part of a field strength of the hormone or to be part of the T-cells** or B-cells of the body .. This is what you will learn very quickly.

Q: .. I can see how a 2 or 3 core reactor produces MG fields, but how does a single core reactor produce its MaGrav?
K- The same as the 3. With the 3 you extend the ?? if you make the 3 1 cm apart from each other or 20 CM apart. If you know how to tune the field strength of them, you'll have the same strength 20 cm apart than 2 cm apart. You choose the combination of the field strengths fo the plasmas you bring in that core to interact.
R: So the single core reactor would be putting out both the M and G fields ..
K- Doesn't earth do that ..
Any other question from some one else. (1:32).

K- Let me explain something .. Upon my return to Iran in the coming days, we will invite the KS from across the world to join us in Tehran. Those who are there to take the steps in the knowledge of space development and understanding of the work of the .. flight systems in the fields of the Pl. We invite the scientists from around the world to join us in conferences in Tehran .. ?? the knowledge of the space T at the same level so we have no differences ..
So if you are a KS who would like to join us, not just to make the Gans's and Nano materials, but in the level of the space T. We give you the link you can make your request to the organizers ..
.. be it in agriculture, .. space energy and medicine and every other thing ..
How do we create materials in the space to build a brick if we want to build a brick (1:34). In a way, the new evolution in the science starts in the next few days when I return back to Iran.

Evolution in science..
to setup the new science and T.
. to learn and then to teach in your mother language to the rest of the KS of the planet.
The KF in conjunction ..

We have promised b y 6th of June 2022 .. land on the moon in minutes .

(1:36).

KF exhibition center ..
We release the new address by next Thursday ..

(1:38).

Q: Salomea. entropy from our plasma science the way we create energy on this planet we create a lot fo entropy .. (1:40).
2Nd is Pl has charge. Alex of Canada said charge is energy in motion. I would like to clarify this ?
K- I think you got to ask Alex
what and how he looks at this ..
Entropy you have explain

Q: Alex said Pl is counter entropy ..

(1:42).
Hi Alex
Alex (bad connection …) (1:44).

(1:46).
K- Alex you have to explain on Sunday in more detail …
You are making a lot of new topics which a lot of people don't understand, and it has to be explained. And you can't make mistakes, because at that level a lot of misunderstanding comes from the lack of the knowledge fo, or too much wrong knowledge of the listener. Thank you for all your work.
Next question.

Where Does Mr. Keshe's Knowledge come from - the Creator

Q: Ginger .. in **reviewing the Commandments on the website, especially 22 which was detachment, .. where can I access , are they ancient manuscripts**. .. (1:48).
K- The 10 Commandments have been known ..
Q: (interrupts) No, no, no, the other ones I am speaking of.
K- Yes, the balance of the totality is part of the KF teaching, we have it in one of the teaching. because it has gone through ..
Q: Pardon me, I did review that teaching .. 204 KSW. it was never mentioned where did those come from?
K- It **was all destroyed by Moses. He was given by he never revealed**.
Q: Ok , and where did you access that information? Where is it written, I guess ..
K- "**We said it to be written."**
Q: **Who said it to be written**?
K- **We leave it to the knowledge which has come to you**. through ?? the source, and to understand it
Q: Ok I am still a little confused but I'll put it to rest. Because I have been studying the "Law of One," the "Emerald Tablets," all the ancient manuscripts.

K- **Why everything has to be ancient, that you can follow**? What about ?? written ?? ancient. If I give you a message and you don't convey the whole message, just the part that suits you to your child. Is it the fault of me giving you the whole message, or you who decided, (1:50). part of it is not good for my child to hear, ?? ?? to my benefit, my child hears it. You understand?
Q: **So it came to you through spirit?**
K- We don't .. we leave that to your understanding.
Q: ok, .. I'll put that on the back burner… and then
K- One day will come to the front burner.
Q: No, I believe it. It was just interesting to say, when someone says, "I saw " hold on let me pull it up .. "I remember seeing Moses". Who is the "I", I guess is who I am trying to connect with? I want to connect with it, I want to understand it.
K- **I is the Creator**.
Q: Okay, I is the Creator. I love that got it.
K- We don't "love it," that's how we stand.
Q: Okay, I can't love it. Got that.
K- You can love it, but it's .. I know what you are trying to say. I am trying to be very precise in explaining about A lot of the teachings have been knowledge which comes through the, what you are used to, to relate to, **as the words of the Creator. Independent of knowledge and the present understanding of mankind**.
Q: .. I heard His voice. So we are totally on the same page on that. I totally got that. I deal in the metaphysical, is the best way to ..
K- ?? (the god ??)
Q: Yes, thank you. (1:52).

About Markray - Not a global operation

Q: **I understand in September 2019 you shifted from a nonprofit into a corporation, correct?**
K- No. KF stands as a nonprofit organization. Round about 2018 or more.. we invested in purchasing Markray corporation, which is in the stock market, because KF itself cannot get involved in any kind of commercial activities. So we run the KF operation in different shape or form through my name and the corporation which is transferred back to the .. KF. Factories and corporations, like you see Markray.

Markray was bought on behalf of the KF to structure the work in North and South America and Markray is not international corporation of the KF. The European operation fo the KF will be stock marketed in Frankfurt. the Chinese operation of the KF will go through Shanghai stock market. The Middle east and Asian operation will go through Tehran stock exchange. Where all these will be owned by the KF and all incomes will be spent directly on the programs, process, factories, and the spread of the knowledge and T and the rest of it. Instead of making one international corporation, (1:54). from one nation, as we have the operation of the KF connected the UC and the Earth Council members to each continent and language.

Each continent will have their own Stock Exchange

Each continent will benefit from operation of the KF in that continent. Markray is the beginning of the work of the KF team in the background, are in the line of purchasing and setting up of other corporations in stock exchanges around the world. Through that KF will operate to benefit the humanity

We are not corporation like say Microsoft that operates from headquarters in the US. The .. started in Markray initially, and we saw immediately some problems and we had to stop .. and reorganize. Will come in the coming time that .. what we call **Markray is the valuation of the investment of KF in Brazil, Mexico, US, Canada, Argentina, and the rest**. **We will not mix the two**, then the ?? name of the KF you will see in the Frankfurt, Beijing, in Tehran and .. we will choose a nation in Africa to represent stock exchange in Africa which is solid and not volatile in that process. These are all in the pipeline, . different groups in the KF are already working to enter /// KF investments which are coming through We will be owned and operated by KF for the whole of humanity.

President Trump Blocked KF - Still in American Stock Exchange

Q: **So you have been removed from the American stock market**. You are no longer ..
K- **We are not removed. No, no, we are still there. (1:56). Markray is still there. We don't speak about it, there is a reason for it. President Trump took it that ?? in blocking the KF in certain ways,** and we are with the new administration, we are in the work, changing it. Markray is since 1981 millions of shares are in the stock market .. We have addressed a lot of problems which Trump through other things blocked for, not only KF, but a lot of things. Trump had an idea that a corporation in US cannot be owned by an Iranian physicist, where he was opposing all the nuclear problems.

In the communication part of the OTC. **OTC objects to KF to be in the structure of a management, which is criminally illegal. But now we have addressed it. and we'll see what comes up**. Because anything we disclose can effect the share values of Markray . But in a way, will be our investment which will be launched in US. Like Mexico **now is going into operation, has been revamped, restarted. We had a set back**. We had to wait for president Trump to be removed from office the way we saw it. The way he was forced out, he forced a lot fo things even during his presidency. Markray now through the new administration ..

(1:58).

Who Funds These Corporations? Mehran T Keshe

Q; . so meanwhile who is capitalizing all this?
K- What do you mean ..
Q: **Funding, where does the money come from?**
K- Mehran Ravioli Keshe.

(2:00).

(2:02).

(2:04).

Governments Pay KF to find Solutions to their Problems

Q:
K- You have to tell what the problem is so we can find the solution..

I made my wealth by working with governments.

(2:06).

(2:08).

K- There is something we have to go to, we don't like to go

Italian KS betrayed KF jail time ..

(2:10).
(2:14).
Any other question.

Q: what effect does solar eclipse have on making of Cups.
K- Not much …

(2:16).

Plasma Generator - Booster - Reduction

Q: **148 KSW . if one wants to make a Pl generator then a booster reduction, and a booster is required. .. if booster means increase in potential difference, and reduction means stronger M fields, then G fields**.
K- It depends on which, **you understood** fully, **correctly but it depends on which end of the energy strength you sit. If your G is stronger, or is it you are looking for reduction on the M which is weaker**.

Every Point of M field has 2 characteristics - one giving and one taking

You got to understand that **every point of M field has 2 characteristics, one giving and one taking, and whichever of the 2 is stronger manifests itself that way. It's always in the point of reference to where it's connected**.

Stronger Stars in Center of Galaxy -

In space T we see this as the **positioning of the stronger stars in the center of galaxy, and the weaker stars at the boundaries of the galaxies.** The stronger star in trying to gain more position, and stronger position, or getting pulled by the central gravity of the galaxy, will create a link with a number of solar systems at the boundary that, in that process of interaction they clear most of the energy which is as a cosmic rays in the higher order interaction fields. (2:18). That allows them to suck in fields, use fields which are in the cosmos. In a way, the stronger fields in the weaker M gives the weaker G with a stronger field of gravity. If you understand exactly what I am talking about. you consider 2 point of references, and in that process going from central galaxy to the boundary, It's not just the same fields which goes, the same field has both directions, so it's as a Pl field, but it absorbs the fields in its process of crossing, as much as it is going to and coming back from, on both directions of the G and M.

.. if I explain to you which we see it on the earth, the N Pole has a slightly higher temperature than the S Pole, but in fact, it should be approximately the same. But the force field, through the Tesla effects, as we call it, and the HB allows that more uniformed fields fo the strength of the field that they need to be absorbed by the fields as they go through the planet, and that interaction with the higher level of Inertia on the N Pole even when you have ice on it, will allow higher temperature 3 to 5 degrees. to be observed. This change of heat on the top, slightly higher than the one on the bottom, (2:20). is part of the resolution, evolution of the turning of the planet, and part of its strength in HB. The temperature difference is actually a M field positioning with like a Tesla coil and two poles. Where the field strength of one conjunction with the central point of .. the equator where there is a balanced fields D, creates the rotation of the planet. In that process the interaction of the fields in the center, creation of the plasma field forces in the center, with the outer Inertia, and M field dictates the speed of rotation of any planet, on the feedback loop of the field forces. This understanding we use extensively in the flight system. You don't create fields to go through the reactor and just disappear. We absorb most of it back into, that allows us to continuously absorb fields from the U into the central core of the flight system. That's the only way you can travel without fuel across the U for millions of years. You have to create a combination of the effects, that allows the M field to spiral and become partially G of itself in respect to position of the travel, and the direction of travel. Where in one direction for me it looks M. In the other direction for you is G, even though we are looking both at the same fields. Depending of the position and direction of the field forces motion, (2:22). from A to B, or B to A. If you understand this you can bend any M field, if you introduce a third D into it, which allows you to become trajectory. This is what in that trajectory, the third field forces you know as Inertia, which in slowing down the fields leads to creation of a matter state of energy. But in a bigger scale and you can bend any field forces in the U, be it the light or be it what we call cosmic rays of the higher order. This goes back into deep space travel and how we structure our space reactors for flight in different D and ?? directions. We choose the trajectory by the introduction of inner Inertia in the system. We tested this

in China, in the Chinese test, and with that trajectory we could ?? ascertain what materials could be made, or ?? what conditions we think??.
Any other question.

Q: .. native peoples around world practice animism .. these people believe that all objects have a spirit. (2:24). Do you have any knowledge of this?
R: the Pl teaching about the soul in the center of everything.
K- Yes, I understand .. what is he asking?
R: ..
K- What does he want to practice it?
R; ..
Q: .. There is a tribe in Niger they practice animism .. everything has a spirit or energy field around it. and that is kind of like what we are learning …? what's his opinion about it?
K- I came across this, (2:26). in 1990's. .. we call it Voodoo. Because I came to ..
in Gambia, how they can manipulate..

K- .. voodoo in Caribbean's ..
(2:28). we see a lot of it in Nigeria.
Q: is being a KS can we learn to sense objects
K- Come people have it and some don't. We all have it, but it depends if we have appreciated the strength of the fields we can detect. Do you understand. So it's not the exclusivity of some can ..
what bandwidth we are in .. some are good in the animals, how they are feeling..

Q: When planets in their orbits around the sun, (2:30). … like when Mars and Venus when they are close to earth do they effect the weather on our planet?
K- The effect, the general flow of the fields, yes. .. because our weather is the shape of matter state field flow.

(2:38).
Thank you for today.

R: 384 KSW

END

385th Knowledge Seekers Workshop; June 17, 2021

Returning to Iran to start release of technologies and space flight
Technology released to Iranian authorities to meet all needs of man
Iranian embassy's across world center for new teachings
U Community already living amongst us
How will you react to changes - space travel, UC, etc
UC will replace the UN
Humanity ready to enter UC

Teaching on Origin of Creation, 1 field interacts on itself
Creator of the Creators

(:12). ..

New Permanent Place for KFTV

Today is the last day .. KFTV will operate out of this temporary place ….
next week KFTV moves to permanent position in the city of Linz. ready to broadcast live.
It's a beautiful position .. and the factories of the KF will hopefully be in the same building and we'll see the proof of the KF and space T within the nation of Austria. We have invested a lot … (:14). ..

On the other hand today we are getting ready and partially we start the teaching of the KF in the manner and banner of, preparing mankind for travel into space, by June the 6th 2022**. I am returning to Iran in the next few days, hopefully with a lot of pleasure, with a team of the KF KS. We have put a team together** that when we return to Iran we present the T as an international organization. A number of KS will join us and from all corners of the world which we have invited to join us, to be part of the presentation team in Tehran. At the same time we endeavor to increase this presentation. KF will take its position as international organization and leading peace works and everything else. We have assured the authorities and the governments that we have enough knowledge and T to make sure the humanity will reach Moon, Mars, and beyond in 2022.

In so many ways, it's when we reach this understanding and point in T we have to understand what are we there to head for, .. to see, what is expectation of us. . we are the ones sitting in a box looking at ourselves, where the people outside have been watching us in this little box. It's very much, has been a one-way mirror for them to see us and not for us to see them, as we were not mature. We mature mankind into understanding the totality of the knowledge of the creation. (:16).

In so many ways, in the coming weeks and months the education center in Tehran will become the center point for many activities. All **the Iranian Embassy's across the planet will become teaching centers**, .. were the knowledge will be taught, knowledge

of the space and T. In so many ways, we will use the Iranian Embassy's across the planet … and with it to guarantee KS across the planet will have access to the totality of the knowledge at the same time, simultaneously, knowing that what we call KS will be the scientists, politicians, diplomats and the rest of the .. the planet.

In so many ways, we have start opening the door. On the other side of the door the party has been going on for billions of years. Peaceful nations, happy nations of the U, has been living the life. In the coming time when we open this door for man to have a peek through, ?? taking thousands of years to understand in the physical dimension (D) what do we expect, what do we see. These are part of the teachings which will take shape or form. We have brought you from Nano (N) T to understanding of Pl energies, from understanding the structure of how you communicate in physical D,
in the past 4 years we have educated you in the D of the STM. ?? communication, (:18). interacting the D of the fields of the U, not in the matter state.

How do we communicate with UC - watching us

What do we expect to see. What is the expectation of them for us, while they have been watching us how will we react. How shall we receive … what you call UFOs, are within us, manifest themselves as us, or do we through understanding of the STM communicate at the soul level with those who have not taken D of physicality, and are of higher order. **How do we communicate with those who are the transmutation position between the matter state of the lives and the energies ?? like us, as we attain new knowledge, new understanding they can transmute**, .. in the energy level, on the matter level. … How many of us will become enlightened to be at the strength of the soul that sees the energies of the U communication, .. at understanding matter state transmutation, or do we achieve level of understanding that both sides can see both D.

One of steps of the **KF in Tehran will be addressing the world leaders** (WL) in understanding what is to come, and demonstrating to them what is expected of them to lead their nations. In a simple way, we address the WL to understand what to expect from the new encounters in a proper way. (:20). **In the past a number of excursions have taken place with no success because mankind and the WL never understood, and when they understood part of it, immediately their entourage, their scientists went to abuse it**, to ?? a better position. Whenever man was given a knowledge it was to spread across humanity for mankind to benefit by it, not for individual, certain groups and families and nations.

Contact with UC to begin in Tehran with World Leaders

This way we'll address the WL at the same time, that they'll understand what is to come. In the short time to come we will run, we'll have international heads of nations in Tehran. We will request this form the Iranian leadership to bring this position, **WL will be invited to Iran to be shown the first phase of interaction of the WL with the UC and the humanity**. Where they can prepare their nations, .. forces, .. their understanding of the whole totality that will change the course.

In so many ways, when we invited people to our nations .. This time we show them the best knowledge of the U. In so many ways, WL will to understand the situation which is risen, expansion and extension in the knowledge of man in the S&T brings about the need for unification of interaction, unification of understanding the totality of what man needs to do to reach that point.

All Nations to be Equal in Technology and Knowledge

Bringing balance first of all to the places, that what we call, the forces fo man to be equal in knowledge, food, and everything else. We envision a short term plan internationally, (:22). between the nations heads of state to **start planning out how the African nations, the Chinese, the Americans, Indian, Arabs, and Europeans all come to benefit from the same T, at the same time, that with this allows us to eradicate many of the problems we have created ourselves** as humans, on ourselves. Then the head of states will be shown, and they interact with universal leaders. This is in our planning of 2022. If we achieve unison between the WL and .. international level. Everything is in plan, in motion , and on my arrival in Tehran, we'll understand how the position has changed and how the advancement of T in Iran will bring about the next phase of humanity in ?? evolution.

It's for mankind and the leaders of the world to decide the next step. I am due in Iran in a handful of days, and at the same time, if everything is achieved as we plan to achieve by the end of this month, on my return to Tehran. the first phase of interaction between the UC and humanity, the first phase with the Iranian leaders will start. We are there to start the process of world peace, .. what we call unification of man as One Planet, One Race…

Iran to open nuclear centers

In so many ways, everything for this has been set by the Iranian KF team in the background, (:24). that **Iran will shine as a nation of peace. At the same time we open all our nuclear centers, all the WL to see them**. .. the sanctions which was imposed on Iran, become the sanctions on themselves by not learning the new T. **Those who sanctioned us, will sanction themselves from the knowledge** and T. In a way, if they see the nuclear industry as an ultimate advance it means they have to stay there till they see that the nuclear industry is no advancement, but another way to understand the work of the creation and the Creator.

World Leaders who betrayed nation will be sent into space first

In so many ways, the path of peace knows no armies, .. will show no resistance to understanding of the new knowledge. **Those WL who have accumulated the wealth beyond, by what we call, betraying their nations while they were in power ?? in power. they'll be the first people we will send to the Moon**, to Mars, and to new systems. They saved, they will spend it .. by their time in the space. .. **we do not promote**

destroying and eliminating those who have done wrong, we let them to be the leaders in the space. Let them see what accumulated, worth nothing, and at the same time they are a good test bench to learn what will happen to human race in the space. they will learn to elevate their souls to understand that all the wealth they gathered has no value. At the same time we make the WL who created more mayhem to be those who be the frontier runners in space T. This is the way we'll empty the animosity and hatred, and at the same time we give man opportunity to learn more to the new T. (:26).

What do we how do we integrate those who lived amongst us were part of the UC and chose to be here amongst us in taking shape and D in our ways. How do we interact … Would we see the radical changes that would bring evolution in society. .. that the nations borders become irrelevant

Aliens Living Amongst Us

In the coming months we are faced with those who we thought were humans, but are friends ?? and they are here, they are dressed up like us, to be part of us to enjoy the presence of the physicality. (:28). We are the KS we are well trained, well understood. Think for yourself what happened when now you have new tools now will be opened to you, when you see your neighbors, men on the street. The guy who delivered your electricity and **the man who delivered your take-away is not of the human race. What would your reaction be**. You stand there puzzled, or would you stand admiring their beauty. When they know they are safe within the human race. When we go to space and we feel we are safe amongst them. Do we see them as another food, or do we see them as another friend. Or would we ??

We do not this time fight with guns and anything else. We interact with the STM which interacts with ?? freedom. In so many ways, what is your reaction. What happened with the man you lived with for years, or the woman you loved for so long, happen to be another one of them. What would be your feeling …
(:30).

This will raise a lot of questions for humanity for coming time ..
They were aware fo all our emotions through our soul all the time. And through their ways they kept silence. What would be the reaction of the human race when some of the WL in their .. presidential palaces have been served by those who are not of the human race. But they never interfered. We are here as observers not as interferers. .. to love amongst man to ?? help the man to succeed in his own path. How would we feel when some of our leaders find out … have been part fo the UC and never interfered, but could see the emotion and could see the behavior through their soul. Then you understand how (:32). tolerant the U Community has been for man to change in time.

Many of you will try to justify, .. to understand the soul and the emotion, .. be comprehensive about what you have done and what you will do, many of you who are of the origin of what we call the U Community wonder how mankind will interact and react with you, now that they understand who you are.

In so many ways, **as I traveled the path of the deserts, Sahara's, and the mountains of this land for thousands of years, have been witness to all these changes, and have seen many friends from the space being the same travelers when they choose the path of the man**. How would you react? How would you change your communication now that we bring advanced T that makes you to see the other D of the life in the U. How would you react. We give you a vision through your D of your sight or soul, which one would you recognize and which one would you be, the spoken word of the physicality, or the notion of understanding the thoughts of the soul**. In transmutation you'll be aware of the 2. You shall see what the soul says, (:34). and you shall see what the voice of the man says**. And how the physicality will be. Which one would you set your position for , and to be with?

In so many ways, **mankind has to be ready for one of the biggest changes in the cycle of humanity**. Mankind has to be ready for to understand what he has done to himself and the others amongst, in, and society without interfering. And they are still leading a life, a passive life, where mankind starts to understand, what is all this for.

In so many ways, **today's teaching is about you**. Today's teaching is about every individual, and every one of you to understand yourselves. In a way, it's to understand **how you will react in the coming time when you become passengers of the U**, or you become to face to face in the D of physicality and the D of the soul, being passengers of the U. What will be the outcome? Are they delicious to eat, or are they beautiful to greet. This is part of the understanding we try to promote in the coming months that we prepare mankind, and the whole to be ready for the first open (:36). encounters with the U Community. We do not want to make a circus of ourselves with them, but we want to make a circle that we are all included within it. We have to look within to understand what we have missed without.

Final Phase of Peace in Whole Universe

In so many ways, mankind is ready for the final encounter, .. with his own soul, and with it a new insight in the cycle of creation. The understanding the totality of the work .. Creator. As I said, many of you are from those of the deep space and the U Community, ?? ourselves. And that **has triggered the final phase of peace, not only on this planet but amongst all the created things in the U**.

C12 C14 Mankind decides which dimension

In a way, as we say **the C is a common denominator within the structure of the man, C of the Creators level of energy becomes a common denominator**, ?? to all He has created that they move in the same D and direction. In so many ways, mankind has entered **the final phase, where C12 and C14 work the same, and cross, it's for man to decide which D he will take at which strength**. You want to operate in the D of physicality, or … in the D of the energy fields of the Soul of the U.

No Race has become more involved in physicality than man

In so many ways, in past years in bits and parts, and in different ways I have tried to teach you everything, (:38). In so many ways, your understanding of the new T, the old T becomes part of the understanding in the matter state when the man becomes passengers of the U. **No race has been more physical than man, no race have become more evolved and involved in his own physicality than man**.

You will carry memories learned in physicality on earth through STP

Then when you come to the depth of the U you come to the position of the interaction of the fields to become manifest in the matter state of the fields of the presence of the time and the space, **you still will carry the memories that you learned from the physical D from the time on earth, even ?? from the ancestors. You will recall through the STP and knowledge**. And this knowledge will be valuable to you and those who you come in touch with.

All will come to the Level of the prophets - to teach others

In a way, **you all become, you all will understand**, and the time and position, you become what we call, " **to the level of the prophets," who could see the physical understanding but could not tell, but this time to your physical understanding you will tell, you will teach**, and you'll bring the knowledge both of the physicality and the soul to those who you become the teacher of.

Mankind to become the "Soul of the Teachers"

The **future of mankind is not just to be the souls to become the center sun**, and stars, but they become **the soul of the teachers through the stars** and those conditions, for those who are in evolution and the cycle of the evolution from physicality to soul and to understand more. (:40).

Forever New Cycles of Life - Mankind pass on experiences of earth

You have to understand, as we said many times, mankind is not the last created kind. Due to interaction of the fields of the U, **forever a new cycle of lives will be created from the single cell, single energy packs, into multiple and cycles of life**. What impression your soul and the knowledge of physicality of earth**, is made on those you come in touch with**. At what level, and in what message would you carry, **now that you have seen the pitfalls of war, destruction and love and care as a human being, be it you yourself, or through the D of the STP**.

Messengers of the Soul of the Universe

In so many ways, **the souls of the messengers of the Soul of the Universe, as the STM embedded in, would take to them to elevate them, to bring them through and not let**

the race to be nomads like man for millions of years on this planet. In so many ways, what was your knowledge as teachers, and how much can you transmute and transport with amongst you, in D of understanding of yourself.

Communicate with those at level of Energy

We taught you how to communicate with those who are physical D, but now how do you communicate with those who are the level of the energy, in the D of the strength of the soul. What is the outcome. How you will handle it.

Heads of State - Position come to an end - Collective Leadership of planet

What would be interesting for us, how would the **heads of state**, (:42**). coming to Tehran, see them in their position before ?? they arrive. How many of them will turn up, knowing that their position has come to an end**. Knowing that there will be a **collective leadership and not individual leadership, understanding that the process of the enhancement the STM will be the step for the totality** not the crowns, not the presidential palaces, and not the name.

In the **coming weeks as we teach much more in-depth, as we will show the new tools and equipments that the man through his physicality can create and understand in the position and extension of his soul**. What would mankind do? What is interesting is who would like to be the first people to travel through the D of the soul across this U, or the Unicose. We expect the WL and those who call themselves king, to put their crown down. and leave the palaces. .. mankind will become as one.

UC to Replace UN - replace World Bank

We have endeavored to do this several times, but never succeeded, because the man's D of physicality did not allow the soul, which is entrapped within it to take hold. **But this time is the ?? reverse. Proper work of the unified leadership of the Universal Council will replace the UN, failing miserably**. The work of KF , (:44). operation through what we call, **one common denominator will replace the World Bank and the rest, which has been set to encage and enslave man**. New structures will be set that mankind will be released of the shackles of the present time.

Release Technologies and Energies to cover all needs directly to man

We release technologies that will release dimensions of the energy fields directly needed for every need of man. We have released the first phase of the 100% free Pl T to the Iranian scientists, that once presented in a way, to the Iranian authorities in the past week.

Plasma Technology to replace nuclear - First Phase of World peace

We will release this energy system that r**eplaces the new nuclear T in Iran with the new Pl T**. In so many ways, I explained this .. in Accra we achieved 100% power supply. Now the same T has been transferred to the leading scientists in the past week, and it will be used by the **Iranian scientists to produce 100% energy powers** of the Iran, and with it we show we have no need for nuclear industry, and the **first phase of the world peace will start**.

We have to go this way, that step by step we bring the nations to the power of understanding the reality of the Pl T that is the essence of the creation of the STM. We cannot jump between the matter state and the Pl. (:46). As I said, the power supplies, structure of the new power supplies to supply energy across this planet for every single man has been developed and will be released in due course through the education and systems, which we have setup.

We work within structure of STM to Transmute Energies

You always had it. **You always had the T to work within the structure of the STM to be able to transmute energies, you have to work with the structure of the Pl and not matter state what we call electric current**. In this process mankind will transfer one to the other and transmute from one to another.

How Would You React to Visitors from other planets

But **the main question of the teaching of today is, how would you react to those who will come manifest to you in the coming weeks and months, not human**, but of the passengers of U, who have taken our shape. How would you understand, .. see .. what is your react to them? This is the main concern for us, in **not allowing the second cycle of mayhem through introduction of the new T** and the new vision of understanding, of realizing the presence of ?? amongst us.

We have seen in the ?? **news in US, (:48). in past few months the color of the skin has become the scapegoat to suffocate and die**. We have seen in UK racism of the color of the skin and nationality has become another. .. in US being a Chinese in a state has become a crime as they created the crime themselves. …
How would our leaders and us as individuals react

Not to become subordinate

Would we respect them .. or do other things **for them to show us how to fly in physical D. we become subordinate, which was the whole purpose of these teachings not to happen**. A few shinning lights in the sky does not give superiority to knowledge and T. In understanding part of this does not give you superiority to the others. What would be your reaction? It's time to think and decide in the coming time as we release new T that allows (:50). **mankind to become aware of the strength of his soul** and at the same time gives man the vision to see those who are amongst him.

Our Planet like a bunch of Hooligans - as seen from outside

.. **our planet is like a football team of hooligans which runs through ? creating mayhem** when it's only in that city, village. Our planet earth is a moving structure across the city of the U. we travel across the SS, galaxy and we are like a bunch of uncontrollable hooligans who do whatever they like, what **the rest outside have been watching the planets**. What are these bunch of hooligans are up to.

In so many ways, would you like to be known as a bunch of hooligans? Or do you see yourself as one? In your behavior and in your soul? What will be the response of humanity now that the doors of this castle of earth, of ignorance of knowledge will be opened to understanding the knowledge fo the U. Would our religious leaders still claim to be? Or would our moral leaders claim to have? (:52). And those who call themselves king or the kings of .. ignorance.

No Being should be higher than another

Why should one man be higher than another, why should one being be higher than another? When you know in the essence of the soul we have access to all the knowledge of the creation through understanding the operation of the fields of the U.

No Better nation to lead world to peace than Iran

I waited along time to bring this on the table, prior to our move to Tehran and start with the world peace with the other nations through science and T. There was **no better nation than Iran to lead this, because they have been under sanction because of knowledge**. Knowledge in exchange for peace is a prerequisite for Iranian operation and through our embassy's across this planet in the coming weeks. **We call, not on individuals but the totality of the human race**, to understand the new ?? thing. There is no sign language to show, only understanding the operation of the STM. Only the totality of the knowledge which has been given to man, and man has chosen to ignore.

You'll find balance between STP and the STM that each one can have its turn as it wishes. (:54). An end to the cycle of schizophrenic life of the man, which has created such a what we call, "active creature to cover the other." To cover the existence of the soul within, the physicality has become that hyperactive child. That no one will know what is hidden within.

It is the responsibility of the WL in the coming time to lead the nations and ?? the humanity to the **path of peace and understanding of the unification of the leadership of this planet through understanding the STM. We shall see in the coming time the fall of many crowns, and many religious leaders**, who will submit to the knowledge of the Creator, as they cannot be a messenger when the Creator is present by Himself.

In so many ways, man will understand the knowledge of the Creator and his presence through his knowledge, and through his present understanding of the creation and the Creator. The question goes back on again, how would you react, when you have been given a new vision to see a new D. Do you know how to deal with it. Or would you like the .. moving cameras and the glasses, when you are playing games, that you think it is so real, that fall off the table and chair without knowing, (:56). that there is actually nothing there, but a mirage of the videos and films.

The Purpose of Physicality was for man to master both dimensions

In so many ways, mankind has to become wise and become aware of existence of his own beauty of 2 D of physicality and the soul. **In interaction between one to the other, where the physicality takes its energies from the soul, and on the other hand gives the D of physicality for the soul to gain knowledge of the U** at the time and presence of physicality. **That was the purpose of creating the physical D, to enjoy and learn another D, to be the master of 2**.

7 Other Dimensions of Life beside STP and STM - taught by UC

There is still more for mankind to learn, it's not just only the D of the soul, and the D of the STP. **There are other dimensions of life, which when man becomes mature will be taught and understand through operation of U Community**. The STM, the existence of the STP, **is 2 of the 7.** How would mankind handle the others as it arises.

In so many ways, the whole knowledge of the existence will be shared amongst the man equal, but it is the man who will decide the level of understanding and comprehension of totality. In so many ways, **we give access to every knowledge possible, it's you who has to understand which access, which path leads you to where and for what**, (:58). for what purpose.

As I have said in the past, when you put dust of Fe on a piece of paper and we see how the fields of this Fe will take shape. In so many ways, what we ?? each on has to the other. In so many ways, mankind will see a 2 dimensional life where he will create the totality, where he will understand the reality in the dimensions, which he decides in the coming time and space. Where this, if you understand the gist of it will lead to the father. Where in fact, it came from the mother. Where of the higher strength will lead to the Creator, where it came through the created.

This will become the cornerstone, (1:00). of the knowledge of the man, and then through the strength of the soul you have decide which path you want to take, or have you managed to reach the point of elevation, where you could live amongst any.

There are always two - giver and taker

But **you got to be aware that one thing will surely exist in totality - there is always two**. As you manifest as a giver you still take. As you manifest as a taker you still giver.

As one is the beginning of the other, and the other is the beginning of one. Mankind has to understand the new evolution in the world of science. A new change, transformation from matter state of physicality, to understanding of the energies of the U, without physicality, but in the D of the strength of your soul and the fields of the creation. What would your reaction be? What would your cycle of life be?

Would mankind create the next generation to be subordinate (1:02). to the knowledge of the U, or .. to be equal to the Knowledge of the Unicose. Would we put our children through schools to teach them about 1 and two's, and iron, Christianity, and Buddhism? Or would you teach our children of the future through the soul, that all is the same, and all equal depend on what you want to use and in what direction.

In my return to Iran, we take the Iranian nation to the time of Ahura Mazda and Mitra, when essence of creation came and we were proud to be all the same, irrespective of color and race. In so many ways, mankind has to learn the Creator is within us and understanding is our job, and not somebody else's to We have to go through this phase, that as we give you a new vision through understanding new technologies, everyone you see does not become a prophet, a messenger, another structure that you just because they know more they can subordinate you to their will. **this is the purpose of these teachings, as we said form the very outset of the teachings - to take mankind to be equal to the others**. We are not sending you to the universities of the U, but teaching you how you are structured, and how you life existed, that is part of this totality. (1:04).

The time of peace has started, and the time of bringing the nations to be one will start upon my return to Tehran. We go **Time of Peace has started - My return to Tehran** back to the land of Mitra and ?? Ahura Mazda, and we bring the 3 points together, we **will talk good, think good, and act good. We will teach this to all the nations on this planet, through the share of T** irrespective of the color and race, and the religions will have no room as they all confirm to be the same.

In so many ways, **mankind is ready for that final crossing the line**, and on excepting that the knowledge of the U will be open to man in one go. Knowledge of giving, and sharing will take precedence over knowledge of killing and what we call ?? this is how we will open the door of knowledge, and as KS you will carry the same across your nations. In so many ways, the world peace is part of the peace of the work you set out to do, and we have achieved and we are on target to achieve. I think and I hope I have managed to convey the message of what is to come in the coming weeks in the beautiful city of Tehran.

In so many ways, **every city on this planet, (1:06). will become beautiful as we all share equal. There shall be no hunger and no homelessness, there shall be no sick** people to be abused by the name, on the name of the virus.

STM like atmosphere around STP - Protects and Absorbs Energies

In so many ways, **the new T will teach the STM that the physicality is protected by it, and like the atmosphere around this planet shields it from everything to come, when at the same time absorbs all the beauty of the U to create the physicality** of this planet, by conversion of its energy to the matter state as we see it.

The question goes back to every single one of you, what would be your reaction, or would you go to the D of the soul that the reaction of the physicality will not count, as you will be ashamed at what you have done to yourselves and the others in the D of physicality. Is the friend across the road from other D of the U and has seen al my wrong doings and has kept to his own silence. Not out of pity, but the shame to tell what man has done to himself.

As of Today's teaching humanity ready to enter UC

In so many ways, we soon will see our thoughts of **getting ready for humanity to enter the UC as of today's teaching. The first steps will be taking .. those WL who take the steps to walk in the path of the peace. (1:08). and of human race they shall be introduced to the UC**, that through their support and understanding the nations will be supported to find peace nation, One Nation and balance for all that is created. It's the time where the science of the created becomes secondary to the science of the Creator. In a way we take charge of our own destiny of the life in the U and not on this planet. Unfortunately we have no machines for this, .. we have no schools I can send you to, and no special teachings in the KF SSI for you to learn. You have to learn to go within your soul, .. and find the knowledge of the Creator.

Thank you very much. If our team in background is ready for break ..
the path

(1:10). To bring mankind to that point of what we call Universal Community what are amongst us. Would you like to go for a break

BREAK >>> 385 KSW (1:32) …

K- ..
Q: Only scientists and diplomats can participate in the meeting in Iran?
K- Yes, primarily the first occasions yes. (1:34). It's by invitation only. A number of KS who work with us have already been invited. It will stay the same.
Q: Is the Iranian embassy still located in eh Pakistani embassy in Washington DC.
K- **The Iranian embassy shall soon be opened up in Washington. Things will go back to normal very soon. Do not be surprised if you see the Iranian embassy opened in Tell Aviv in the coming months**. We see the place like embassy not in state of Israel, but in the state of Palestine as a whole. So it's not opening 2 different embassy's, it's covering all.

Carry on please.

How Plasma tries to find balance with Virus

Q: is in nature everything tries to (1:36). create a balance, So **when a stronger virus gives to the plasma (Pl), and depletes itself, is there then a balance of equal strength between the two, or does the virus become equal?** I am trying to understand is the balance of equal strength, **therefore our body can now heal itself**?

Body uses Virus Energy as Food

K- **The balance is equal, trying to reach equality, balance. In that process the AA of the body .. will take its position to be balanced, even with the virus energy. This is the beauty of it, because then it uses the energy virus as a food**. This is something which we explained from the beginning. The beauty with this. We had a case in past 24 hours, one of our senior diplomats was stuck in a 3rd world nation in Africa. He has been there over a week, 10 days. with help of KS in Africa . ..

pilots of the country became the transporters of the Gans's and the Cups, and it arrived and the gentlemen, (1:38). was tested 9 hours, by the government. And he has become clear. Where he was in critical condition.

(1:40).

(1:42).

This is why we see the rapid recovery with KS, because the field balance has become food, it is already digested energy within the body. It becomes part fo the .. recovery. You have already absorbed energy in, now the body uses it …
Any other question.

Q: Salomeea, … (1:44). … you'll reach our common goal … may I also participate. I was trained as a diplomat, but I am not working as a .. I am working with
just to teach people about …
2nd questions - How can we
alliance between multi-nationals .. (1:46). to defend our common soul. ..

KF Brings a new way of Diplomacy - not the old

K- First of all thank you for offering your services. KF KS who are with us, who have been .. been advised to join us we have already completed our group. We have people in specific application .
as KF. Regarding diplomacy .. what these people do, we do not respond to this, because this is the old way. This is how it used to be. In a way, diplomacy the way you see it, have been brought up, has no room in the present cycle of understanding of the work of

the KF. We do not see, playing diplomacy. We see playing science and diplomats have always been as part of structure of the .. scientific work.

America Dictated Diplomacy through Nuclear - Now finished

As American diplomat has power as long as America has a nuclear power, and is the only nation that can dictate it. When we bring a balance and knowledge, (1:48). to all nations, diplomats not have that much value, except ?? because there is no .. superiority in respect to knowledge of another that you need ??? to be a power.

I am not .. a dreamer, I know what my T can do. I know what we got ourselves. As organization and how we will deliver this fields of talk and teaching. The old economic ?? has value as long as you call yourself superpower and you can enforce. With sharing the knowledge and the new way which will take shape in our negotiations with .. 5 plus 1,

This will be very hard for those nations that have colonized and abused the others. That's the only problem. When it comes to the financial affairs.
(1:50).

Corporations to Pay 15% Tax in Country of Sales

For example Amazon which sells all the goods in your country and takes all the benefits to US, is over. They have to pay 15% taxes of what they have sold in your country to your country, as taxation.

(1:52). gun policies will be long over. We have no guns to do ..

But don't forget they have paid so many people, they have created so many servants, that's why you'll find out those servants will become the first passengers of the earth. We don't put people in prison, we use them to become ambassadors ..

Any other questions.

Q: Mehranez, … (1:54). I congratulates for being so fast .. like a dream for us .. We are ready to go ..

Nano flakes off bottom of Cup - reverse polarity

Q: Jukli .. worried about Nano coming off the Cu coil and mixing in the Gans and floating in the Pl water. Is there a possibility of being ingested
R: (not grapheme) if it falls off it goes to the bottom .. (1:56).
K- We have seen N material at the bottom, but if it comes from the Cu, Cu is a Cu Gans. There is something that has happened something in your N coating where you have created **those loose layers. Or you are in the process that your voltage changes from positive to negative, when you N layer become a feeder and this allows your N layers**

to disappear, or them to come off. Because your N layer always has to be on the Negative side. which pulls power to it. Maybe you have created the condition in your system that it fluxuates between neg and pos, you have to find out what happened, and correct it. It happens , if your polarity changes during the operation. We have seen this before. The way you system goes from N layer to Non-Nano layer and with it will take the materials, because it is the Cu atoms which separates at the non-Nano coating level, but N layers are on top of it, so as they try to get out through the space gap they loosen the N layer and they drop off. We actually collect N layers at the bottom. Should not be used for, or digested. (1:58).

(2:00).

Stars that are not real - reflections - 3 Suns in Russia

.. not all the stars are real stars, they are reflections. It happens usually on the outset interaction with the fields of galaxies. The way we have the atmosphere around earth, and certain conditions in certain parts of this planet, especially specific place in Russia .. the rise of 3 suns. You see 3 suns at the same time, and you don't know which one is real. Always the middle one is real, the other one, two are reflections of upper atmosphere. It happens on a specific angle. this happens, you see over our solar system. some of the stars we see are reflections of another star, creates another conditions .
reverse process of another galaxy.

(2:02). layers of the SS or our galaxy. They appear as 3, and their position is fixed ..

(2:04). we send fields to them and they don't reflect back ..

And you have the same copy in some cases in the D of the soul in a Pl transfer. We can do that, and its got a lot of application in it.
Any other question.

Reopening of Exhibition Center in Austria

Q: Dean .. about the exhibition reopening .. expand on that .. (2:06). Repeats .. do you have some further information to disclose when we'll be visiting.

K- .. we need a few weeks more to set it up .
At the outset a number of dignitaries around the world.
We are trying to open it before I leave to Tehran ..

We'll introduce 2 new type of vertical and Horizontal EU in next 2 to 3 weeks. They'll all be there. It's the permanent home for KF in Europe.
(2:08). July August ..
Q: Will there be products there produced by KS .. ?
K- We have to look ..

We are still looking for KS who can work on a full time basis ..

(2:10).
.. We need KS who actually know what they are doing.
Q: .. opening of UC .. (2:12). .. How do you feel the UC will respond to being present with us, will this be in physicality or on the soul level?
K- .. wait and see. We got to wait and see. .. to primarily .. work to bring the WL and then it's a bigger struggle, it's not going to be very easy. It's not going to be done with a snap fo a finger. These people are used to certain ways of doing it. We have seen it. We cannot change rules and regulations so simply, in a simple way. .. we have started to travel again around the globe. It's more and more of the same things we need to change. As countries open up, we start traveling again, we see the things which need to be changed, but it has to be changed in a different way then what we are used to, or we have accepted.
Q:
K- talking totally about post-Corona. (2:14). We see things are changing from 1st of July, many nations are opening their doors. We have seen changes are on the way. A lot of restrictions have changed…
Q:

K- One of the outcomes of "back to normality," in a way, is that the Romanian conference of 19th and 20 of July … Russians would like to present their new T. change to 17 and 18 … (2:16).
(2:18).

Q:
K-
Q: the Romanians have certain T they have developed, (2:20). through your teachings, and they .. would like to show this T.
K- There are a number fo countries who have this, we have this in Italy, in Iran, Chinese .. There is a lot of development in the Japanese KF. They had a huge setback after they were betrayed by the Americans regarding Fukoshima, and we are welcoming them back gradually into the KF. .. a betrayal, by an American agent in the clothes of Japanese. In due course we'll handle that situation.
Q:

Next question. (2:22).

R: Q: .. 5G T whether is has the ability to condition an immune response similar to that of Covid. (Youtube rules we can't get into ..

Does nano particles in chem trails, like sprays to condition responses to that of Covid?
K- We don't respond to these things. The KF has shown technological development in the "Butterfly". in response to radiation fields. These butterflies are not just what you think, they have been developed specifically to absorb high field radiations of a .. spectrum . .. (2:24).

like 5G ..
We changed the old ones to the new ones ..

(2:26).
digital medicine is the next part of the development ..

(2:28).

Q: Marius is here. (2:30).
K- Marius is a full time operation and director of the KFTV.
Q: Romania conference …

(2:32).

K- .. you are here and know
Q:
K-
Q: (2:34).
Q: accommodations at the conference …
Q: we'll sort this out. (2:36).

K- No we will not use Zoom …

(2:38).

(2:40).
Q: 2 dimensional particles … (2:42).
is that related to that?
K- I don't know what you are talking about …

(2:44).
Gans in paint for art ..

(2:46).
the soul of the physical and soul of the

(2:48).

(2:52). Q: can we feel MG fields ??? is this facilitated elevation of our soul. .. Inside all of us are Mitra .. ?

Teaching on Creation - Single Field interacts with itself

We can receive fields from every corner of Unicose

K- We gain energy and receive fields from all D of U, not only earth. Not only from the soul of those who have been here, **we have a full spectrum of abilities to receive everything from every corner of Unicose. We are connected to them in one way or another**. (2:54). Part of, we are the creator of, part we are created out of. And so there is no .. limitation in somebody, or people from this planet, or from the fields of this planet, or another U.

M Fields Never Die - Always Divide

M fields never die and in that process they are always divided, and if you go up the ladder as we have explained in the teaching before, that what we call - the process is very simple. … …

You are created out of Interaction of 2 Fields

If you are in this position **you are created out of the interaction of 2 fields**, somewhere. (if I can do it in a different color) and this position itself is created, or leads to the creation, from 2 others, which yours is one of them. **The same will carry on. .. there is always another which divides itself into another position. So we are continuously divided and created out of interaction of 2 fields which leads to another**.

We all came from the Creator

I**n essence if you go backwards we all came from the Creator**. This could be a field from the earth, this could be a field from Jupiter, and this could be a field from another U. (2:56).

Plasma is depicted as a Spiral of strengths

As our **Pl is what we call, a spiral, and a strength, any of these can fit in any part of this structure**.

Where Did Origin Come From?

The biggest question for KS or for humanity, is this, where did this origin came, which radiated the field, which in interaction with itself, and the division of itself, In so many ways, lead to the creation of the totality of the U. Or In a way, what we consider has the interaction of the field of itself, with itself.

Two different strength within the Spiral lead to Origin of Life - Mitra

In so many ways, **with 2 different strengths of the spiral has lead to what we call the original life** - the original creation, which we **call Mitra**.

Where did the origin come from?

In so many ways, where is the beginning and where is the end? In so many ways, where does it start? In so many ways, mankind will reach to the point of understanding the totality of itself. (2:58). In so many ways, will the mankind, will ever understand this position. **Did we come from the interaction of 2 different field strengths of the Creator, that in the interaction of it, lead to the creation of the first life, of different strength. But still where did this origin came from**? Because in so many ways, interaction of the interaction of the fields, has lead to the new cycle of life ??, what we call, "process of creation." But what lead, or where does the original field come from, and what lead to interaction of the field of the origin, to lead to the creation of the next cycle?

What gave the Space for Creator to release fields into

But the biggest problem, the biggest question for not only mankind, but the UC is, if the origin was created at this position, how did it come to expand in the U, and how come that if, there is such an expansion, in such a U, **where is the origin of the totality, that it gives that room from the origin of the Creator, (3:00). to release its fields**, that in interaction of the fields with each other, lead to creation of a new life.

The UC and Universal Intellect has Not yet answered

In way what we call, ?? a universe. Or is it from the interaction of, what is taken and what is given, at different strength, that in that process a new life has been created. **From the interaction of the G and M field of the same field. This is the biggest mystery which the U Community and the Universal Intellect has not managed to answer yet, and it's not only confined to comprehension of the man.** And **how vast is this origin, here in the center, that has through its division become the creator of the Unicose**.

Total Energy of Unicose - like measuring daily calories of man

I**f you can manage to measure the energy of how many calories you use per day**, or you get from the product or you get from a interaction of whatever, then you put all these energies and calories together, and **then put all these energies and calories, as you put together, in the field and D of the U and Unicose**, and then gather what would be the totality of all the galaxies and Unicose's together, that once the creator came from the creator. (3:02). This is the mystery that you have not managed to answer yet.

Age of Universe

And in any case, as we have seen the division of interaction of, then we see the **scientists telling us that the U is so many billions or trillions of years old, then do we have enough knowledge to put the age limit on the Creator as our U is part of a Unicose**

down the ladder of the creation. Where did the next cycle started from, that this interaction or reduction has lead to creation of our U.

Then .. the question comes, how much has it been at the beginning within the Creator that after creation of all these Unicose, universes and then galaxies and then few bits of energies, which become the cell of the body of the man. In total has been, **what is the field within the center of our Creator. But where has it come from to become the Creator**? The origin of the fields, the origin of the creation, which lead to creation of the Creator. How much do we know? How much do we want to expand the knowledge.

In the framework of the religion we have no answer. In the frame of science we can find some answers, which answers the questions within the religions and the faith. But still, (3:04). **mankind does not have the answer. We call it God**, we call it every other name we want, and we are, as individual, speck of a speck of a dust. Then how big is the totality ?? ?? human being for a time.

The Creator of the Creators

What is the energy embedded in the Creator that has lead to creation of the Unicose. As I said, if it is the Creator, to the limit of understanding of the man, then what is the space given, and if it is space given, **there must be another D of the creation within it, that has created that space. Then it comes to the origin of the question, what we call the creator of the creators**, then do we call that the Creator, which has lead to the speck of dust of it, to what we, up to now considered to be the Creator.

Created in One Second - we are connected to all of it

Or do we call the Creator the origin, but where did it come from? **To possess so much, and its division, trillions and trillions of stars and they are created 1 second. And we are connected to all of it**.

Thank you for today. One day we will answer this question, when the man is ready to understand the totality. (3:06).

386th Knowledge Seekers Workshop; June 24, 2021

Communicating through the soul, not language
Mankind will understand every language in Universe

ENGLISH TRANSCRIPTION

(:06). K- … in a progressive way reaching to a higher level understanding about our own creation and the Creator. In the past weeks we have concentrated on the process of the work of the Soul of the Man (STM), understanding the functionality of it, how we use it in interaction with the Soul of the Physicality (STP) of the man and how ?? reacts ?? of the 2 souls.

Communicating through the Soul - not with language

In the last weeks teaching we tried to open the door in how our soul interacts with the soul of others. How would we interact with those who are beyond what we call the physical dimension (D) of the, what I call the structure of the humanity. We have known these things for a long time. some people call **them horse whispers, they can communicate with horses, with animals understanding their feeling and emotion. No need for language an communicates with through the soul**, (:08). the soul of the animal, or others. Because at that level there is no language. **We translate the emotion of the soul to the emotion of the physicality, understanding and comprehension of the man, to the level of his own what we call D of physicality**.

What has become part of the whole teaching, is in fact, what's the next step for humanity. **If we can feel, .. dictate, if we can bring the condition where we can feel the other soul, and our STP in interaction with the physical D of the brain … we convert it to the language which we understand. We all have the same dream**, the Chinese feels and understands it in Chinese, Englishman ?? to the same thing, and so does an Iranian in Farsi. What does this mean? It means the brain .. is just a translation system. We translated words by using new systems. Our brain has been translating every work of the U in the D of understanding of the man, and man understood it in his own language.

Mankind has One Common Denominator in Emotion

When we look at the moon we think, what a beautiful moon, if you are English in the English language. The same Chinaman standing next to us and looking at the moon and he thinks exactly the same, he understands it in English and in Chinese and at the same time he only decides to accept the Chinese version, because his brain is set for the translation of understanding of the emotion of it. What does this mean? **This means mankind has one common denominator in emotion. (:10). We all understand the same thing, and when it comes to the mother language which we chose, to translate it to the emotion**.

But what happens when you are born in one corner of the planet, or another position in the U, and then you take place and you take position in another D in the U, the same things, the thoughts, the way you translate the language, is it the language that you chose in the D to be. We live in England, but born in Iran, but we still nowadays dream in the English language. The Farsi is far removed from the language of understanding. So it

means the brain .. has the capability to translate within itself the languages. It has the capability to interact in that language between the STM and the STP ..

We'll Understand every Language in Universe

This is what in the coming time mankind will come to understand as the brain of the man in the D of U will have no physicality, **we will understand the language of every being in the U, as our brain simultaneously will translate from that emotion to the source, from the interaction of the fields of the U**.

Little Children Understand each other without language

This is part of the teaching of today, how do we interact with each other. .. **how do the children in the womb of the mother interact with each other**. How Chinese, little child, and a Englishman little child, and an Iranian little child, being only **a few days old and understand each other fully without knowing which language** they have to know or think about. (:12). This is the reality that **man in the coming time sitting next to a man from another D in the U has to be. How do we understand him**. How do we decide to understand the totality of the knowledge of the U.

In so many ways, **if a baby, an infant can say to another infant, this is my arm here, do you like it? Would the same thing apply in the D of U**. Where the physicality of the beings in that D have no hand, what does it mean? Does it mean that it is a tool that I can move things with. You call it a hand because you ?? haven't been here. I do it with thoughts, or with 10 arms. But I don't need to show it with physicality, I just need to transfer the knowledge of the motion of the material and the tool which makes it to move which is my arm.

Moving Objects by emotional attraction

In so many ways, do we need even to have the physicality of the arm to move? If man can understand he can **create D of the attraction in the physical D that the weaker by feeding the stronger, or by the stronger becoming more attractive, to attract an object**.

Make yourself humbler than cup to attract it

In so many ways, **in the past many of the human race have learned this**, but we never understood. Many of us have this capability once we break through this barrier, that in a way you put a cup in front of you, and what do you do? **You make yourself humbler than a cup, in feeding you, it connects to you, and then you increase the gravity that I can give you so much more, that it attracts to get more to you. What we call G, or what we call repulsion, or M field. M fields are the connection, (:14). between the 2 D of understanding of interaction of the souls**.

Travel to Moon - Tune to Strength - Fall in love

And when it comes to the space T we do the same in traveling in different D of the U. When you want to go to the moon, you **tune to the strength of the G fields of the moon, and the heartbeat of the moon. Fall in love with me, you come to me**.

Create the Dimension of Attraction

In so many ways, mankind has to learn a new D, a new understanding, a new way to be able to communicate and be able to bring a new D, in totality of understanding of the knowledge of the U. I taught this in Barletta, and I remember a couple of my students sitting in the front line, a couple from Spain, when I was trying to teach it. I thought it is too early they do not understand. **I could see the guy pushing his face, wanting to move the cup in front of him on the table, and he was doing everything. And I said, you don't need to do anything, you just got to fall in love with, or to create the D of attraction**, that it gets attracted to you.

Do Not Force your will - It's the souls which bring together

It was hard for the students at that time to understand some 6 years ago, that **you do not ever try to force your will, you attract through the D of the field forces** in understanding the totality, in **understanding the consequences, and what will be the outcome in totality which counts**, not in how and the way you try to bring it into the D of physicality. **It's the souls which brings the matters in dimensions of existence together**.

We can Listen to every corner of Universe

In so many ways, we have to realize, (:16). us in the body of the man, has the capabilities which has never considered to be possible, but it **is us who have denied us, to use these capabilities**. We do not need the headphones and ?? **we can listen to every corner of this U if we know how to tap to it**.

Hearing the Inhabitants of a Star

If you see a light as a star, if you are tuned to it, you can hear the voice of inhabitants of that planet in your ear, in the soul of your ear, not in the physical ear of the man, Then the STP in conjunction with the physicality of the brain of the man will translate it into your language, what one guy is saying to the other. We wait and we build the most advanced technology telescopes to see what might be in the far distance of the U, where **our soul has already has a connection**. We have a full vision of it, but **we have denied ourselves the access** to it.

One Millionth of Intellect of U of Brain Used

In so many ways, the **brain of the man is used less than 1 millionth of its capability of the intellect of the U. We use our brain totally for physical understanding of the**

physical world of the man, but the main part of our brain, which has the soul of the same thing is denied to show itself.

Access to All the Soul Strength of Joys in the Universe

You got to remember one word, one sentence which I always say, "even a stone has a soul." So **if one cell of your brain has a soul strength of the emotion of the joy, then he has access to all the joys in the U**, not only to the man, and your physical D.

Man's Soul already member of Universal Community - from inception

In so many ways, it is us who has denied the truth about the life of the man to himself, that he is a member of the U Community. As I said last time, you were waiting for us to take us to the UC in the D of physicality, but you never realized that **your soul has been member of the UC from the time of inception, from the time of the creation, from the time where everything was created within the STM**, is carried, the knowledge of the U.

The STP has denied access - Allow every cell of Brain to Open

Within the STM the knowledge has the connection to the physicality of the man, but the **STP has denied man the access to this. How do we raise the STP to allow the physical dimensions of the soul of every particle, every cell of the brain of the man to open up**, to give it access to knowledge of totality.

The STP has Captured the STM - but is himself a prisoner

In so many ways, **when one captures the other, the other becomes prisoner of its own capture.** In a way, when you have a prison officer looking after a prisoner he is in prison himself, that he spends all his time to make sure the prisoner stays a prisoner. **This is what has happened to the STM, to the STP of the man, and to the D of the physical man**.

Both STP and STM Coexist in total tranquility

It's **time to release the prisoner** and what I call the prison officer, that each can live in the freedom of the life. **No one shall be a prisoner of the other, but coexists to make sure that it lives in total tranquility**, that no one ever imprisons another.

STM sits within Every Cell of the Man - Capable to Translate every Emotion

This is the problem with the whole structure of the understanding of the life of the man on this planet. (:20). We always look at the D of physicality, **we never considered that the STM itself sits within every cell of the man, which has the capability to translate every emotion of the U**, not only the emotion of the man. Mankind in time will come to understand. How much and how far and for how long, **he has denied himself the truth**

about his own existence, his own capability to become rich as he is totally and utterly rich **with the true knowledge of the U**.

Our Souls are already professors in every subject of the Universe

We look for universities and schools, to graduate in a minor, meager subject, where **our soul, the STP of the man, and the soul of every cell of the brain .. is already professor in every subject in the matter, in the U**. In so many ways, we have ?? target through the progressive what I call greed of physicality, to deny more and more, the D of interaction of the work of the STM.

In so many ways, how did you do that? **How can we open the access to the soul of every cell of our brain**, and through it we can have access to every emotion, every information in the U.

We Leapfrogged Man across the UFO making stage to knowledge of creation

In so many ways, we have done a frog leap. **We leapfrogged right across the whole D to go through the physicality in making UFOs, and then letting man like other creatures of the U spend billions of years in the U traveling in little boxes** and hoping to get there, and then go through a lot of accidents, (:22). and incidents **that one day we'll get to understand the truth about the creation**.

Man in UFO still a prisoner - Denies himself the truth about creation

W**here not only the man, but most of the U Community have denied themselves the truth about their own existence**. The **man who comes out of that UFO, is as much a prisoner of his own prison**, as the man who is hoping to be in that UFO, because now your knowledge has reached that point, but there is no knowledge for the man beyond the UFO, beyond flight, beyond understanding of the physical D of the ?? movement.

So **when you look at the UFO and you think they are so advanced compared to the knowledge of the man, you have to understand they themselves are still entrapped in the body of that prison**, the prisoner, and the prison guard, but in a different D.

Goal is to Bring all races to understand Soul of the Creator

In reality, **the whole teaching is to bring even the soul of that man in the UFO** to the level of the soul of understanding of the man himself on this planet, and then **all together to understand the operation of the soul of the Creator**.

In so many ways, mankind has reached the point of maturity. You can track it down in the D of physicality and hope you see something nice, and travel the span of the U and Unicose. **Not all these UFOs you see are the stars**.

US to release Pictures of UFO

And as **we are told the United States is going to release the ?? 3 new pictures about the UFOs at the end of this month** and in the coming time. But even if you have it, you are still dealing with another object. You are still dealing with another D of prisoner within the prison cell of what I call physicality.

UFO Development is Not very High - man remains the same just faster

Mankind will by flying the span of the U, (:24). has not reached much, will not reach much. Do we change when we travel with a donkey from London to Paris, or we take a flight from London to Paris, and at the end of it, it's the same entity. It will be that same, we just add another fast object to our traveling the span of U, but we never understand the true flight of what we call, fancy, **which is travel in the D of the ways and the rules of the Creator**.

Join those who have already passed UFOs

This is why **we taught you to jump, one further step**, that not only you join those who understand the work of the UFOs, but you **join those who have already passed that position, and they have gone to more direct way to fly** the span of the U, to feel every essence of the creation and the joy of creation and the sorrow of the losses of the accidents.

Your Choice - But our problem - to teach you

In so many ways, **the choice is yours**. But how do you do this, and how do you develop it in the structure of the physicality of the man. **It's not your problem, it's our problem to show you how to open to these dimensions**.

As I said, the totality of the teaching, **the pinnacle of the final phases of this will come when we reach Tehran**. In that process we will teach you the totality. The reason for it, the key to world peace for humanity is the agreement we will reach in Tehran with other nations at totality. We bring the banner of peace through knowledge and exchange for the technology of the U, and not just the UFO. Maybe you thought that would be the only option, but in fact the option is one, for us to understand the work of our own physicality (:26). in the D of the souls.

Up to now we always understood the D of physicality, we ignored the souls. Now as we have said, we create the STM first, and then its physicality. Now it's time for the physicality to be encapsulated by the beauty of the knowledge of the U, that every cell of the man connects to its appropriate line of interaction with every cell of the U.

In a way, when you see the fields from a star, part of that field carries the strength of the joy of that star. Is it in pain, is its inhabitants correct that, In a way, a star has its own life, and protects and provides fairly and correctly when it's in trouble. In a way, every ray of light carries every emotion of that star. It's for us to understand, to decipher and within

the cell of the brain of the man, and within the cell of the structure of the physicality .. when we take amino acid (AA) away and we look at the brain .. as collection of Gans's in the field energy of the soul, then you understand man has already been knowledgeable to this. We ignored it.

In a way, when we taught about the Gans's, and then we explained that the structure of every soul sits within the structure of the physicality of the cell of the man. Now you understand how easy mankind has denied itself the beauty of the Creator.

We always looked into the ?? of understanding, and the conversion of the fields of physicality. I touch, it is warm, (:28). it goes to my brain, it says it can burn. Physicality emotion of the heat. But now with creating the soul of the child within the womb of the mother, we allow the reverse, where the soul of the child interacts with the soul of every cell and with it, the soul of the child interacts with the whole soul of the U, then the D of physicality decides its own D. Do I need to have 10 arms, do I need 2 legs, Do I need the eyesight where in this D the strength I carry, I see everything through.

In a way, mankind has every tool of existence within his grasp. Always been there, now he knows the way to do. The totality of the process of the conversion of the STM. The energies of the STM sits within the acceptance of the truth, by the man himself about the existence of life in the U, and nothing else. You do not need degrees in theology, and .. in nuclear physics to understand this - the theology of life. Life is understanding the structure of life in the essence, the true essence fo the field transfers and the M field transformation and transmutation, and its strength at every point. You got to realize you might not feel cold on this side of the wall, but on the other side .. could be snow and freezing, how do you keep yourself inside, or you decide to be outside and the wall is just the fantasy, imagination fo the man in understanding that the both air, on both sides is the same. It's the man who decides in which temperature he likes to enjoy the living, (:30). and the life.

In so many ways, mankind to the D of his AA has already become, he was born into the D of U Community, but he looks at the physicality of the brain, he never looks at the soul of the brain, every cell of. Go back again, every atom has a soul, .. proton , .. electron has a soul, and if that is the case of it, according to its existence of it, to be there to exist in the D of physicality, the Gans that you produce has a soul within it, and that soul is connected to the totality of the fields of the U. In a way, for the first time when you see a single Gans, it's one single brain of your body that is connected to totality of the fields of the U. How come you can see and accept that, but you cannot accept or understand the work of a single cell within the brain of the man. In so many ways, one is green Gans, and one is blue Gans, one is laughter, and one is joy, another one is red, it's a danger to the understanding of the man. In so many ways, our field transfer interaction in the D of the Gans's in past years has been a visualization of the field strength of the emotion of the Universe.

In the world of what we call matter physics we say the entity absorbs every light, strength, frequency, or whatever, and what it does not accept, it reflects and it will be

orange or blue. So is the same with the Gans transformation, (:32). what you see as a Gans of blue is that level of the joy within the cell of the brain of the man. This is the reality about what we have to understand from now on, that in totality we do not look at the physicality. Now you understand why for past year I have been pushing you to understand the interaction of the fields, now look at the structure of your brain, as individual souls collectively connected to every D in the U. Do you need a PhD or do you need a jumbo jet to be able to understand it, and to be able to travel within it, understanding that you don't need to travel, as it is instantaneous, and totality, it sits within the structure of the physicality of the man. We have denied the knowledge of the creation within us, and this has cost the man millions of years. But you have to understand, other races in the U who reached to this level of understanding, they don't have universities, nuclear bombs, or jumbo jets, or donkeys. They understood through observation of the work of the U. That's what I said, many times before, a farmer on the top of Himalaya understands more about the creation by looking into the stars and U, than a professor in the space universities, and NASA, and Iranian space agency, or the rest, because he understands the true knowledge of the creation not what has been written on a few pieces of paper, (:34). that he has entrapped himself in a few words of PhD and stupidity.

In so many ways, we have decided to become more and more narrow-minded in the D of physicality, than those who did not understand more in the D of creation. Maybe one day .. mankind becomes mature to understand this and from that point on, mankind will take the flight of fancy, and fly across the U. And then when I tell that I have been to such and such a position, and I have seen … , then you can give it the exact position and address by the emotion of the field strength. You want to go and see the beauties of the temple of Mitra in Iran, with the emotion, with the D it will carry your souls to the same position. You do not need to take a flight of fancy, .. into planes, and donkeys and cars to get there. With the emotion, with the strength of it, they will manifest themselves, enjoy the scenery and they come back with, "did you see that one there .. you missed it." They don't need weeks to take a flight. But they are there instantaneously, or both of you can be present with each other in both dimensions. These are not the dreams. These are ways that we are trying to teach you to mature about the truth about the world of creation.

This is why we brought in the new gift to mankind, to create the soul of the child within the womb of the mother first, that from the beginning every single cell of the soul of the brain of the man, (:36). is connected, operated, and understands the knowledge of the U. Not to be born to go to school and to be taught the knowledge of physicality of the man.

In so many ways, mankind has entered a new era. In so many ways, by the birth of Mitra we have brought the knowledge of creation through the light, through understanding that the STM in D of travel to every corner of the U, will travel with the D of the light according to his time, the position, and the speed, and the strength.

In so many ways, mankind will come to understand, that he always has been in the possession and the position to understand this and he has called it a dream. Now we don't dream anymore, we understand how the dreams are created, .. the truth about the D of the

dream, that in fact, it's the reality in the D of the interaction of the fields of the STM, which it somehow gets trapped in the D of physicality of the amino acid (AA) of the man and the soul of the AA translates it to the D of reality and emotion to the D of the physicality of the man.

My knowledge is born at the time of inception. My knowledge is not given to me through the universities and degrees over the physical D of years and narrow-mindedness to understand less, but claim more. As I said many times, the greed of the man, and the ignorance of the man has become like a French dish, as you go to the French restaurants, the smaller plate, (:38). smaller food becomes more expensive to pay, but has no value and does not fulfill the man.

In so many ways, mankind has trapped himself, this narrowness of single minded understanding of the physicality, then opening the STM in the totality of the knowledge of the U. For this reason, we have created, for the first time, the STM first to lead to the creation of the physicality of the man, this is how Mitra appeared to mankind in the first time, but in the D of physical interaction the mankind, what was created out of the beauty of its life, got entangled in the D of physicality, he got entangled in understanding the totality of the creation, .. and entrapped himself within the prison of earth, with the prisoner to be the earth itself ?? trapped its own prison. No one has ever trapped man to this D, except man himself, with the D of the greed of physicality.

In so many ways, we come to understand the emotion of the man, and the dream of the man, are the graduates of the work of the U, but mankind has translated it like to the language of English or Chinese or Farsi to the D of physicality of his AA. This is why we are connected to every other creature on this planet, because you are all made of the same, the same AA in different strength, but arranged in different ways, that one become a man, one become a plant, a fish, and one become the star.

In so many ways, (:40). in the coming time we teach you to understand the difference between the Inertia of the D of physical motion, and the D of physical static, or what we call static motion. When the soul decides to live in a static condition, you call it a stone, when you bring that stone, and you give it the soul of the AA, that stone will walk, .. talk , .. cry, and this is why sometimes, they say, "when a stone cries." Because within that stone exists the impression and the soul of the AA of this planet. One day I show man that I put every stone on the table, and I make every single one of them cry.

Because you remember what you did with the orange and the water. You created the D of the Gans, and then you created the taste and the flavor of that essence of that food, in the water. A stone has a soul, and with the transformation of the pain of the physicality of the man, which the stone become the Cup, the stone shall cry. Now you understand everything is not magic, but understanding of it is the truth about the world of existence. In time mankind will come to understand that your manifestation of life on every position and D in the U is position, strength, field, emotion dependent. Then you understand not only the soul (stone) has a soul, but the soul has a connection to the emotion of the U. (:42).

Now you understand the knowledge, .. the truth about the creation. Then it comes to one point, how would you like to manifest yourself in another D as a man who is a killer, who is a murderer, and he destroys everything through the D of his physicality. It's time for mankind to walk away from animosity and killing, and it's time for man to understand the transformation and transportation through the strength of the STP of the AA of the man. It's been, it's trapped on this planet.

This is why the UC has created such a protection against human race to stop this transformation of the fields at the strength of the animosity and killing. That has been the pitfall, that has been the downfall for man to be able to enter into the D of the UC to understand the language, the emotion, and the essence of creation.

As I said, world peace is the cornerstone of opening of the U to man. We don't open and bring UFOs for you, in finding peace and understanding that the killing has to stop, within the STM physical D and the physicality of the man, you open the U to yourself. In so many ways, mankind needs to be kind to himself first before he meets another kind of man in the U.

In so many ways, humanity has to understand and ?? within the structure of its physicality, the STP, the D of the Soul of Universe for it to be able to join the UC. In a way, as I said many times before, (:44). this planet is part of the U, it has never been out of it, man kept himself out of it, and was hoping to join in it.

In so many ways, mankind reaches to the power of understanding to the totality of the human race. I am with Mitra, I am the love of Mitra. It is untouchable.

In so many ways, mankind lives within the soul of Existence. Mankind lives with his own dilemma of transmutation between the two. As I said before, is it transmutation of the elements, is the point of the maturity of the man. And I said, transmutation between the energies, the fields, the M fields in motion is the maturity, the point of the total maturity of the man, where man can transmute between the STM and the STP .. and the soul of the cell of the brain of the man, where the D of the physicality of the STM in the AA will become nothing but the packages of the energies which can be used, and is the energy source for transmutation between the all 3 dimensions of the STP, the STM, and the soul of the what we call the emotion of every cell of the brain of the man.

Then the question come, does the man in understanding this, does he need the physical entity of the arm, a leg, or a heart. Then this comes to one point has your soul in created by interaction of physicality has decided to keep the body .. in the physical prison of the earth. (:46). When it reaches the point of maturity of the strength, it takes the flight into another D and it becomes the soul of another star. In a way, the STM has used the D of the physicality, and the soul of .. emotion of the man to feed itself in the background to the point of maturity. That when it matures to that point we call it the point of death. the end of physical D as the STM has no more need for the essence of the fields to bring it to

that point to become that star. To become that shining light, to become the seed of a star in another D in the U.

Understanding the theology is understanding the truth about the created and the Creator but in the D of the STM, not with the books of the man, which have been falsely claimed to be the theology of the U, of understanding of the creation and the Creator.

In so many ways, man has opened himself, by himself to the abuse of his emotional soul. In so many ways, mankind in the coming time will understand, how he has chosen to be a prisoner on this planet, by himself. Not only a prisoner on this planet, but is imprisoned in the body of the physicality .. Where in the process of understanding the world of creation, mankind has become to be mature to understand the totality about his own creation.

The point of birth is not the point, (:48). you manifest yourself from the womb of the mother. The point of birth is the time when the STM is created first in the womb of the mother. Smaller environment for it to mature, that when it comes out it has a decision to make, to which D to live. In the physical D or in the D of the soul of totality, where the brain and the cell of the brain of the child in the womb of the mother, is the line of communication to every emotion of the U.

Mankind waits for the physical manifestation of the birth, but the birth of the STM is completed within the womb of the mother. And this once understood will give a different D to giving birth to a child in a D of physicality, of not only this planet, but every corner of the U. You can get pregnant on earth and give birth to the child, you have the D and physicality of another dominion and D in the U.

In a way, you can be born in England if you are from English mother and father, but you can be conceived as a STM in England, from English mother and father, but when you are born in China you look like a Chinaman. This is the beauty of the creation that you fit into the society according to the balance of the soul. Then there will be no racism, .. D of the animosity to the color, to the race, or to the language.

In a way, when you move out of China and you come to England you will look white, but the soul is the same. (:50). The soul of understanding is the same, then there is no word called foreigner. There are no aliens amongst us, because we are part of the totality and we cannot alienate ourselves from the totality, unless we decide.

Unless we decide to look as an Englishman within the Chinese society. And then we have to ask why? Are we looking for attention, or are we looking for to call ourselves different, then that is a totally different point of view, this is a totally different structure of understanding of the operation and need of the STM.

Don't forget a woman who is so beautiful is the one who is in more need of attention and emotion. Because by beauty attracts more attention, takes energy from the others. So is

the same with the child who is born in any convention different than us, whatever you may call it. Because that soul needs that attention, that direct one to one attention.

Where a beautiful woman is the direction of the D of the totality of the emotion of the public. In so many ways, we have to ask ourselves why and the reason we are created. In which shape or form we are created and what has been the need and the demand by our soul, that he has lead to the physical manifestation of us in that color, race and in that shape of the eye, in that height and the rest. Otherwise all the souls are the same. They don't have a different height and eye color, and legs and arms.

In so many ways, today's is to understand, (:52). what I call essence of the creation, what you call in the man's language the ethics, the theology of the creation and the created, and how mankind himself has created this trap, for himself to be trapped in the D of physicality .. in the D of the prison of earth, in the D of trying to ignore itself the truth.

It takes only 1 second for you to understand the teaching of today and you'll be mature to travel the span of the U, and still be in the D of physicality of the man. Then the knowledge of the U shall be opened up to you and you do not need any languages, .. any physical D of manifestation, but you only understand the totality of the creation in 1 second.

Then you understand the purpose of the creation not only on this planet, but in the U, and the Unicose, and within the Soul of the Creator, as if you understood what was taught today, you understand that your physical, total physical existence itself is another cell in the D of the emotion of the Creator.

In so many ways, it feels through you the D that you have chosen to manifest or befriend yourself with it. you are part of it and it is part of you. You are the STP in the D of the STM, and He is the Soul of the Creation and the interaction between Him and you leads to the STP .. which manifests itself in the D of physicality of the man. (:54).

I hope and my wish is that at least one of you will understand the gravity of the knowledge and with it we will add this through to the other souls of the humanity that mankind as a totality all matures in one go.

But as I said, mankind has to walk away from the killing and the destruction, be it a tree, .. ant, .. another man, be it the race or whatever. You will not travel outside the prison physical part of the body, and out of the prison of this planet, unless you understand the truth about the essence of the creation and Creator in the D of the soul of existence and not matter of the physicality of existence.

You have denied yourself the knowledge through the greed of physicality, and that's what I always said, I am detached, because attachment brings that shortness, that shortfall, that short understanding of the totality. Nothing matters, but in totality, if you are detached in the D of physicality, you work through the D of the STM, and then in that D you work

through the soul of the cell of the brain.. which carries and confirms the emotion between the STP and the STM. I have made the man in the image of myself.

In fact, mankind cannot be any different than me, and it is mankind who has chosen the path of the D of manifesting itself in the physical D and with it all the abuses that he has used to abuse the others. (:56).

In so many ways, I hope gradually, I'll bring you to understand the strength of your soul. I hope I bring you to the point to understand that you do not need the UFOs, as even them, they are still searching for the soul and knowledge of the creation as you have been for millions of years.

In a way, as I said, when I teach, I teach the word of the man, but through the knowledge of the STM, my knowledge is transferred to every created things in the U. I am the Messenger and that message is one word. Created through the interaction of the fields of the soul of the U and not through the D of physicality of the U.

And one day not only the message will be heard by the man and the STM, but by those in the U who hope to reach the position that mankind is now. They are nothing, in any different position than you, then understanding, trying to understand how to reach the soul of the Creator. We taught the man and the rest of the created things in the U ?? ?? that in that process there shall be no difference amongst the children of the Creator across the U.

In so many ways, mankind has to come to understand, he has been given an opportunity to jump one step, that he becomes equal to those whose was his wish to see in the D of the traveling in the physical D of the U, and then the mankind has another chance to jump even one further, to those who have even, (:58). super passed those who thought building UFOs was the ultimate knowledge of the seeing the U.

In so many ways, you have frog leaped. In so many ways, and through that, we have managed not only to teach the mankind, but many races who are in this gap to come all to be the same, that when you all meet you don't look as how stupid you were, you look and you reach that you are all the same now together, and this brings a new D to the world of the Creator. That mankind will understand the practice of his education in the coming time in the D of field transfers his own energy.

It's taken time, but it's been a pleasurable time to see how the U has developed itself and will develop itself. In so many ways, we wish to understand. We strive to understand the totality of the knowledge of the Creator, but even what we teach today still has more to be taught. Mankind has to understand there are further dimensions even in the travel and understand of the work of the D of the STM, the soul of the emotion of the man, and the STP of the man.

In so many ways, the soul of emotion is that light. The STP of the man is the creation of matter, and the STM is the origin of the U, origin of the creation. Mankind up to now has worked from outside in, and from now on we have taught you to work from inside out.

Up to now you brought the physicality of the sperm and egg to create physical child, from now on man has the option to create, (1:00). in D of the soul first and within the womb of the mother the physicality will take shape. The children of the man will be peaceful children. The children of man will know nothing about killing any more. The children of the man will learn how to travel the D of the U without UFOs, without flying objects, but through the strength of their soul.

This is a gift for those who understand the process and those who do not understand will still carry on creating children, which will be unfair killing machines, and the process of destruction as we have seen today.

In so many ways, the race of the man will start splitting in two ways, those who mature enough to create the children through the strength of the soul at the point of inception in the womb of the mother, and those who create children in the D of physicality, and then they still have to strive, one day to become mature to the D of the first.

In so many ways, the knowledge of the man, now is in the hand of the man. It's the parents, the creator of the children, which will decide the steps, and then we want to see how many of you will decide to go for the physical D of creation, or to the soul D, that the children of you will become the best in the U. As I said, in the teachings in the introduction (video) (1:02). we said, "man cares about what the child wears and what education he takes."

Now the parents have to decide if they want that education to be the universal education, or the burden of physical life on this planet. Now we understand that the responsibility of the creating the initial soul of the child lies on the parents to create, collect, and bring the best fields of the U, that when the soul at the point of inception created within the womb of the mother is a perfect soul. It's a perfect collection of the fields of the U, that by its interaction it creates that perfect child.

Mankind is Key to Creation of new phase in Universe

And **this is all the essence and the love of Mitra**. One day mankind will understand this. **Within the womb of Mitra's is life, we create the essence of the creation and that is the Creator love as can be about to create a new phase in the life of the U, and mankind is the key to that change. It's the key to the elevation of the Soul of the U.** By, as we said, earth is the nursery of life, nursery of the seeds of that mutual flower which is sown in the U to create new cycle.

In so many ways, mankind will come to understand we are here for a purpose, and that purpose is to allow man to move from D of creation of life in the D of physicality, to D of the soul from the beginning that our work in the U, in running the affairs of interaction of

the fields is perfect from the inception of every star, (1:04). and the condition created will never create stones of anger or killing, or stones of not understanding, which has become part of the habit of the souls, which have left this planet immature, uneducated, attached to the D of physicality. This is why the essence of the creation changes to ?? (increation) increase the soul of the child first, than the physicality of the man first.

Very soon many of you will understand. **We open the doors of heaven to mankind in Tehran. In time that time will come that the man will be enlightened with the knowledge of the U and the whole structure of the creation shall change**.

In so many ways, we open the door of the knowledge through the strength of the STM and not through the D of physicality of man, and some ?? words man has chosen to put under his name. As we said, when we finish there shall be no king but the true king which is the Creator, the rest are servants on His path. No man will wear the frock of kingship or leadership, except understanding the true connection between the true leader of the creation, which is the Creator himself.

In a way, we do not take knowledge from the others, as we do not take orders from the others, but will live in harmony with the strength of the knowledge of the Creator. Many of you will understand this very soon. And many of you are still being in what I call sleep time of humanity because the ignorance is the bet solution for those, (1:06) who try to ignore the reality about their own existence.

I hope that today's teaching I opened a new D in the school of thought in the man, and not in the school of the education of the books of the man. Hence from now on mankind will take into D of the understanding the truth about the soul of himself, about the soul of his emotion , about the soul of his physicality, then in the D of the physicality he will have no ?? as it's only the interaction of the 3 fields together, and interaction of the Inertia of the environment which will lead to the D of the physical condition.

We go for a break, we come back, I hope some of you are mature in that path of understanding, and by putting points across, by questioning the truth will allow the others and the totality of us, to mature one step further in the D and direction .. interaction of the STM, in understanding the position of the man in the U, and where the mankind shall go. Can we go for a break please .
R: ..
(Proofed)

BREAK >>>>

Part 2 video >>>

Where is the origin of our thoughts, .. our voice.

I said many times I never show things, because otherwise we become like the magician of the past, raising of the dead, moving the seas, and all the fantasies that goes with it. We make you to understand that you can do, understand why, what was in the sea, but the tide allowed Moses to cross, or in fact, Christ transferred his soul to the STM, that the soul rose and the physicality followed. This way if you understand there is no magician in teh U, especially now the man matures to the level of the understanding the work of the Soul of hte U.

Go for a step back, try to analyze, if I made a physical system that I can put on my toe, you receive the same field strength from the emotion of the .. brain , my toe will speak, and I can make it ?? AA and physicality. This is the truth about the ?? but man has always moved around with the physicality of it, because it is easier to explain, but the voice box was the only D of the transfer of knowledge and emotion, then how do the deaf and the dumb use their arms and legs and transfer the same information to all of us. I was observing deaf and dumb person sitting an area and communicating perfectly on a mobile phone to somebody else on the other line. All he was saying was, he's in the bar there, he is getting a haircut. I could understand it because I knew why he was there, and I could understand the impression of it, I didn't need a voice box. So what are you going to do on the planet Zeus when you have no ears and no arms and no tongues … still alive, you still want to communicate with the guy on planet Zeus. So you go to the strength of the soul because that is what he understands, because then you transfer to what he understands, according to what the strength of the joy is the same .. depends which part of the U you want to live.

Any other question

Q: What is that hinders us from developing our emotion ?
K- The ignorance of ourselves, physicality is easier then trying to understand us, because we have become lazy to it, become habitual to it, but once we understand the other side we tell ourselves, "what a stupid thing we have done," why have we ?? put food in the mouth. ?? on the head.
Q: Is it our attachment to the physicality?
K- I think that is the only way.
Q: I do to, But when you want something still from the physical life, how do you, do you just count them as. You go within and say, " It's not worth it?" to keep myself from the D of the soul because I still want something's?
K- It depends. You choose at the point of manifestation, huh. You choose how we do.
R: There are a lot of flavors in eh ice cream store. but we don't want to eat them al lat once.
K- But we want all of it (laughs)
R: That's a tough question because it goes down to the root fo virtually everything that we interact with in our physicality world. As humans we tend to be identified with our ice cream, as a perfect example. The whole process of selecting the perfect ice cream … maybe you forgot to look inside in that process and were just thinking about physical

aspects of it all and missed that you are an actual soul interacting with all these physical things that are going on.
K- Yeah, but you got to understand that we choose. The same as we choose our friends, we choose to be in the D of physicality. We have chosen this way, but . it's comfortable, it's the way we can talk to our mom and dad, and our friends from our childhood. It's very strange how we see life dictated by new life, and how the new life will change us, because we accept the new D. If we accept the new D then life is peaceful because we accepted and we can live with it, it's the way we feel peaceful in a violent family, because it's the environment and everybody is the same so it's all the same. When you stay in a loving family then everybody loves and it is peaceful. We choose to what strength we want to adjust and want to live with it. I watched this very carefully in the past few months, and it is amazing .. how I see new life, bring changes. No matter how fast you want to go, I am peaceful I am calm, and I want to be in my limit. You cannot change me, unless you want to change to me.

It's a pleasure to see, and in a way you have the time to analyze, sit outside and see within the framework. I choose when I speak, .. whenever, and it is my condition, you cannot change, and I want to be peaceful, and you cannot change me.

One of the most important and what part of today's teaching is about, and Dean brought it up and we can put it in a very direct way, is where does your thoughts come from, that leads to an action? And what is the consequence of that thoughts, why does your brain create such emotions to interaction with the ?? to show such a reaction. When you say a sentence, start a sentence, think of something … where does that

very much like the light you see in the sky from the interaction between the earth and the sun, the fields,

You've been here for nearly 2 hours ..
but do you know where your soul has been. but where has it been .
(:36).

There are no coincidences in the work of the STM. My wish is my command. Then how the soul interact talk to meet in Pizza hut ..

(:50).

I never come with a script, my soul feels what the soul of the totality of KS needs to know, or whatever, the need of one, to complete, to reach to another level and the

teaching goes on those basis. We never preplan unless we know what a question is through the soul. The people who have been around the studios ..

the reference is the work of your soul. Each one carries a different reference book because we can connect to it in one way or another. This is the essence of creation, ..of wanting to be part of the creation and connect ourselves to that part. We decide which club we want to be a member of and where we want to be to see friends. So it is the same with our souls. We decide in what strength and why, the rest is done by .. interaction of the fields.
Any other question.

Q: How is the Pl flying car and the Pl communication device coming along, are they going to be in eh K store soon?
K- can you repeat … We will demonstrate these and the T in full in Iran in the coming time. We have been asked by the authorities to delay our trip into Tehran until the new president takes office on the 2nd of August, as if we return to Iran now, the same regime, the same structure. We abide by the wishes of the Iranian leadership, that when we go back we'll see a new structure, and the system will be introduced, the pl system, the flying system, the Pl energy. the basis for the Pl generator, 100% supply is already ??
KS who work in the field, and we work on those
We'll show massive new T within the first few weeks of our return to Tehran, in conjunction with

Q: Jefferson .. about St Peters and Mithraism.
the gap in the history to control us .

K- I don't understand what you are trying to explain.
Q: The gap in history
K- I understand you are trying to explain the gap. There has never been a gap. The reality is we have never looked into it. Let me explain for those who are not aware was discussed in the background. …
We asked a simple question, why is Vatican built where it is built, and why is it in the middle of the country as a state of its own, and the way it is built. .. what is missing from historical background or in public domain, is that when the soldiers of Rome ?? stretched out and reached to the borders of Persian empire at the time of the Romans, they did not go all the time hand in hand. Sometimes there was conflicts and sometimes they reached a peaceful position, many of the soldiers noticed that in Iran there was no temples with statues, where the Romans had the statues. What we call the Zoroastrians at that time, the Mithraism at that time the powers of Mitra, explained to them that you don't need the statues to go with you, you can carry that ?? of statue within you, which is God. This was very important thing for soldiers because they had to carry with them something to keep their belief. Now they could believe that it is within them without carrying anything. And that was a revolution. But then we had the soldiers of Rome which went to Palestine, and then were involved in the crucifixion of Christ. They came back, they could put a man to it. Now they had a figure. what they did, they brought this into the understanding of the soldiers from the Persian empire, and those who were in Palestine at that time, and they

created what we see as a cross, what we see as a sign of Rome. The power of Rome, we can put you on the cross and that's it, we dictate your life. And then they had the public, wanted an understanding of, we want what the Romans from Persians have, and then they built up this structure of the present Christianity we see. Where the Roman was the ultimate power with the cross and putting a man on it. But they all came from different D and directions. The ones from the Persian empire, when they brought these beliefs of God without a temple, they made a group of themselves. These groups were always small groups, and then when they grew to bigger groups they split up to the next one. The Romans who came through the Persian empire side, they made these temples they were what we call, stronger, more prestigious people were part fo these temples, and one of these main temples of Mitra was in the center of Rome. When the Roman empire did not want to split, and because of the belief of the 2 sides coming together, they decided they would build a compromise position, call it the state of Vatican, over the temple of Mitra, which was in the center of Rome. St. Peters Basilica is actually a temple of Mitra. It's built on the temple fo Mitra because that was the wishes of the Romans empire, that they could show their power, they had their belief of what they brought from Iran, and what was coming from the public, which was the Christ Christianity we know it. and everything was modified to suit the man of the power, but to be still bearing power, we give you the Christ you want but our rules, 12 days of Christmas, 12 days of Mitra, the light. Then one of the things Mithraism believed in and lived on, and the people of that structure, they used to drink a sap from a tree, which gave them a lot of energy, in another way of giving confidence, and the Romans had nothing to match. But Rome was full of wine, red wine, and it looked like the color. So they brought the wine to be that sap, because it give energy, and then they built from it this is my body, my blood and the rest of it you know in the Catholic. It never existed, Christ never touched such a thing. Now we see the process of Catholicism as we see it, and its breaking of the bread, and the wine, which actually came from the source, Iranian through Mithraism, ??? which was merged into it, by drinking this water you get energy, and then what you see … whatever you call it today …

But the process fo building the Vatican, the animal behavior and they took the stones of Coliseum to build the Vatican from it, because nobody was prepared to pay anymore to build to bring the stones in. So it was free there, they took the stones in, converted it. ???

So there is nothing mystery, it's us who are locked in the time of mystery of creation.

Q: If we look at it with scientific way planet created with mixture of H and other materials … is the seed, the Eve or Mitra that came and started this process ????
K- What we have, is very much as we say the light of Mitra. in interaction with .. center of the Creator, and in interaction with the soul of the Earth, which is interaction from the fields of it, has created that physical D, that … reaching of the hand to get the water, but in essence that .. initial emotion to reach out, or to feel thirsty came from the interaction of the fields of the soul, the STP, soul of emotion, and the reached the physical motion of speaking I am thirsty or whatever. That speaking origin of the hand, is the creation of man. Where the soul of the Creator is the sun, the soul of the earth is Mitra, and then the

STP of the cell of the emotion is the D of the interaction which, with the Inertia of the physicality leads to creation of We are created out of the love of the Creator, not by accident of time and place, and D. .. when this light of the creation and the Creator matches with the Inertia fields of the emotion leads to D of creation of physicality, and in time and space man will understand this. This is how you will decide how to manifest yourself in a given time and position, because the STP .. which carries with the man, and the soul of the emotion when it comes in interaction with new environment, then it decides what shape and manifest itself, then at that point you become the structure which the environment allows you to be. Mankind has got a lot to see, that beauties of this planet is much more beautiful when you work through the Creator interaction of your own soul. We just open the door, it's for you to consider and see ??? we have to understand the totality ?? and accept the totality of the conditions.
Q: …
Thank you very much.

Q: Are negative emotions such as anger linked to the STP and positive emotions like joy or love linked to the STM? Do we have to give the total control of our life to the soul, and let her detach us from the negative emotions, or is it the job of the physicality to get rid of any negative thinking? ..
K- The emotion of, any emotion within the structure of the body of the man, in a way is controlled by the D of the physicality of the man. Because at the end of it, it is the physicality which benefits from that behavior. We see, I have been witness to many of these feelings, where you sit in a room and 2 or 3 people sit, and the same person speaks with love and affection to one, and turns around with the same time with anger and disgust with the other, and then with gentleness and care to the other. Many time .. this is what the man is, we choose, it's the same soul, the same body , same voice, it's just in interaction with another physicality you decide to change. It's us who is the creator of that change within us. in what we get out of our physical behavior in respect to emotion which we create. This is has been one fo the ?? trigger points for me for many years. I always said, how can this be the same person ..

Can organize conferences in KF ..

Thank you for today

ENGLISH TRANSCRIPTION

(:11). K- .. There is a point we have to remind you for this week .. KFTV will not be live. .. due to heavy storms in this area .. hail storms. man y masts have been damaged. .. we record and transferred to Youtube .. 2 weeks to repair 100,000 of cars damaged.

In any case we start the teaching to day as part of the KF teaching. We go back to our .. with the Enhancement Unit (EU). ..
Those who want to place order .. we invite you to come in 8 or 10th this month.
KF opens .. auditorium of about 100 seats. The KF TV center will be setup as permanent place, (:14). and we'll see how it grows. .. the EU have been placed in position.
We will be ready next week to 10 days .. by invitation only.

We thank those who are calling landlords and putting good comments in. It supported us a lot and brought a lot of solidarity in helping to set the center up. It is nice to see so much support. At the same time we do our best to deliver what has been .. prestigious Exhibition Center. It's very near airport, accessible by train ..

In the came center you will see, (:16). one of the largest factories and production lines of the KF hopefully in next few months.
EU shipping ..
trouble shooters.

The KF technologies is gradually breaking through, and we'll see more and more developments .. new products, .. more support in different dimensions and directions. (:18).

Teaching Starts

Understanding the Work of the Souls - all the systems

The **teaching of the KF in past few weeks has been concentrated on the what we call the understanding of the work of the souls of the system**, which is the control system, the power unit of the system, the what we call interaction of the system, what we call a plasma (Pl). The Pl of the Soul of the Man (STM), the Pl of the emotion .. , and the Pl of .. physicality of the man, the Soul of Physicality (STP) of the man.

Plasma and Emotion can be Replicated with Systems

You got to realize what we have taught in the past few weeks it **can be replicated with systems**. In so many ways, we can replicate many things from what we understand now, we can **replicate emotion** of the man **in the dimension (D) of the Pl**, which reacts and interacts very much like body of the man.

How the Earth/Sun create Matter - STM/STP create Emotions

Then how we learn these things, it come to understand to the truth about exactly what we have taught about in the past years, there is no difference. **The STM is the Sun, the STP is the Earth, the interaction between of the fields of the two entities one being the stronger, and one slightly weaker, creates as we see in the upper atmospheres of this planet the Pl of the H, the Pl of the O, the Pl of gold**. In interaction of the fields of the body of the man, as they are in essence in the D of the soul of the Pl, **they create plasmatic sections like joy, happiness, recognition, knowledge**. (:20).

Rotation in Blood creates miniature Earth conditions - Emotions

So there is **no difference in the process of creation**. In a way, instead of having a planetary system like Earth, fixed in a position rotating around the Sun, now the sun has kept its place, but the system instead of rotating as an entity, like a spherical object like earth, **it rotates in the blood flow of the man, in the smaller, smaller information, emotion, and everything else. And in that process creates a continuous flow of miniature earth conditions**, that in interaction with the fields of the STM, creates what we call, those Hydrogen's, those Carbons, those CO2, and the gold, which we call **different emotions**.

Flow of Fields in Blood create the Emotions

So the knowledge of the man about the creation of his life, is very simple. The **distance between the sun and earth is covered by a huge gap**, then some of the fields of the sun by radiating out, by the time they reach earth**, loose some of their strength**, or are given strength, reach, or what we call the upper atmosphere of the earth, then in interaction with

fields of the earth, **MG they create these packages of plasmas of matter state, but in Pl state, but in .. the D of physicality, when these plasmas come in touch with the Inertia of the .. earth, they convert into matter state**. But as the **flow of the fields in the blood of the man, (:22). is in a dynamic condition, and then in their interaction with the fields of the Pl in the brain of the man, they create the emotion**.

Every Cell in Blood is Taxi destination designated - by field strength

But at the same time this blood flows to a given position as we said, from the beginning of the teaching. **Every cell in the blood .. is taxi designated destination, it only goes to one place according to the field strength**.

Blood in Releasing its fields to common denominator cells - transfer emotions

So **when it takes the emotion with it, it goes to where it is supposed to feed. It's common denominator cell. In releasing that field it transfers the emotion of the man**, which is created in interaction of the physicality and other emotions from different cells of the body .. , and the STM for that part.

Interaction STP & STM create emotion - radiate to blood and body - like sun

In a way, we even understand how, now for the first time, **our emotion, through interaction between the STP, and the STM, in radiating its fields, one way hits the blood circulation of the cell, which brought the information**, and on the other hand its fields, spreading out through the body, **hits the body**. In a different strength fields from the sun itself, and creates the condition that it's been carried by the blood.

The Inertia created is plasmatic - like the cells
So in a way, the **Inertia is created by the interaction of the fields, but because the Inertia is plasmatic in both cases does not become a solid state, but it becomes a plasmatic state of the cell of the man**.

Blood makes HB by transferring energy to heart

These gives the man a new opportunity, but the whole essence of this matter is to be created is that heartbeat (HB). It's a **natural HB, which the blood itself makes by transferring some of its energy in the heart of the man**. (:24).

Every Cell has Many Functions - also carries charges to heart

In so many ways, **every cell carries a number of functions**, not only bringing **information**, not only bringing the **emotion,** not only **creating the M fields contain the STM**, not only **carry the charges which leads to transfer of the energy to the heart** created combination of what we call **rhythmic continuous heartbeat** (HB).

HB can only be created by the Blood Flow which carries charges

This **HB cannot be introduced in any other shape, but by the blood flow itself. It's the one which carries the charges**.

HB controlled by Energy from Air - any one can recharge walls of heart

In so many ways, the combination of the **HB is controlled by what we call the amount of the energy through the air, through breathing**. And **anybody (any one of them) can change, confirm, transfer and recharge the cells of the walls of the heart**.

Create HB through blood flow through lungs - take heart out

In so many ways, **if we manage to create a correct HB in a continuation of the flow of the blood through the lung itself, we can take the heart out of the circulation**.

Zebra Fish can create its own heart

We have **seen this with many animals. We can take the heart out and the body will replicate the work and create the heart**. We seen this in ?? **zebra fish**, we have seen in a couple of other animals, we can take the organs out but the organ is replicated and made.

This is way cloning works - NOT through DNA

This is **the knowledge which man needs to learn. This is not the way that it works, through the what we call, the DNA and the cloning of the parts**. This is the way the cloning of the body of the man is made, or any other animal.

Need to Understand Plasma of Emotion to Replicate heart

This goes back again, **without understanding of the emotion, (:26). you cannot create the replication of the heart. Without understanding the creation of the plasma of emotion**, in interaction with the work of the lung, the air intake, you cannot replicate the creation of the heart.

Why HB changes when breathing changes

This is **why, when our breathing changes, our HB changes. When our emotion changes**, our breathing changes, and our HB changes. Now we understand more. Now we understand the truth about our own creation.

Many claim they can replicate making heart - impossible

It's not as we have seen, **many claim that they can replicate the making of a heart. Theoretically, yes, you can. Show us practically. It is impossibilities**. In so many ways, they have claimed they can make organs within the body.

We have seen some of the Knowledge Seekers (KS) who left, who have been taught by KF, have made these claims and systems, they are trying to copy. **But none have been delivered. In a way, because they never understood the truth about the creation** as we explained in the past few minutes.

Take heart out - Let body replicate its own heart

In so many ways, in the new Enhancement Units (EU), which should be delivered by the KF, all this has been taken in position. In a way, **you can take the heart of the man from the body of the man and let the body of the man create a new heart on its own**. There is **no need for what we call, heart transplant. There is no need to take a heart from another person**. Once you understand the process, you can even allow the heart in so many ways, to replicate its work. **We have shown this in effective way in the past few weeks**. With a few of the KS around the ?? who have these kind of problems. In so many ways, mankind has reached a point of maturity that understands the totality. (:28).

In so many ways, do we need to worry about how we look and what we loose in the space? Do we worry that how every cell of our body will replicate across the U according to time, place and position, and at the same time to Inertial mass of the fields of the Pl of a cell.

Replicate organs by thought - memory of it recorded in RNA

In coming time, knowledge of the KS will reach the point, that **even by through the thoughts they can replicate, they can repair every organ within their body. Mankind has had such a knowledge for a long time**, but as he took more the D of physicality the **knowledge has been lost in the practical side, but still sits within the RNA** of the man.

Every Arm of DNA has Cell Replication Information - not how scientists think

At the same time part of the DNA cell chain is for this purpose. **Every arm of the what we call DNA, carries replication process information within its structure, but it does not sit in the sequence that most of the scientists in what we call DNA**, what we call technology have taught about it.

DNA and RNA sequencing within each other and in Interaction with the Creator

One of the most **important parts of the DNA of the man is understanding the parallel RNA, and how the sequence of the two sits within each other in consequence and in interaction of the Creator, creation of the soul**, of every arm of the DNA and RNA. What does this mean? (:30).

The Sequences are allocated to certain work

It's very simple, in the process of what we see, for example, **an arm of the DNA, and sitting with it, with arm of RNA, which are mainly the same**. We see sequences, very simple, that we understand information, and **we see the sequences, which is now allocated to certain work**.

Every arm of DNA and combination are AA based

But what in fact, most of the scientists in the world of DNA have not understood that when you look at every DNA, **every arm of DNA, every combination of DNA, they are all amino acid (AA) based**.

These Sequences are plasmas and their MG Fields interact with each other

So what it **means is that the plasma MG field of this, has to be considered in respect to this, and in respect to this, and in interaction of these fields with each other**.

Scientists have not understood how these plasmatic interactions effect body

At the moment **scientists only consider sequential numbers and series of the AA. But as they don't understand the work of the Pl,** that DNA works with the plasmatic condition, they have not learned to, or they do not understand, that the MG field of these and the interaction with each other, **has a direct effect in how the body of the man works**.

Each Sequence creates its own emotion - plus other creations - lead to defects

And **each one of these creates its own emotion**. **When you have number 1 with #5 interacting, it's a different emotion in a creation. And then in that emotion, that field strength, creates what call, defects**. (:32).

In Plasmatic Condition interactions with other arms of DNA can occur

They only look at the space gap of the set. They don't look at the plasmatic condition, that these sets in interaction with each other, and even with the other arms of RNA and DNA is created. This is why man still has a lot to learn in the process of understanding his own genetic code.

The AA is in Plasmatic condition and can interaction with everything else

Because **our scientists at the moment are only involved with the physical D. They have not understood, that the what we call the AA of the body of the man, is in the plasmatic condition and it creates MG fields, which in a way interacts with everything else**. And in interaction it **has different reactions and the conditions**.

Genetic Defects in human race can be corrected - by changing the field gaps

If the scientists of what we call genetic understand this, they will find out **by adding or creating a slight field differences at certain points, they can correct most of the genetic defects in the human race. Because then they don't deal with proteins and AA but they will deal with the space gap positioning that allows what is short to be added. Or deformities to be ?? positioned**.

Body is in a Vacuum - plasmatic M field condition - adjust the field gaps

In a way, **they are still working with mortar and bricks, but they don't understand there is a M field gap spacing due to the position** and the construction of the body of the man, **which is in a vacuum, which is in a M plasmatic field condition**.

Why so many genetic defects in human race - space gaps are interacting other fields

This is why we see so much defects in the human race, because these space gaps in the interaction will create different fields, (:34). in respect to each other, and this is why we have the condition of today.

Each one is interacting in a different way with its own cell and neighboring cell

And **all the mayhem we have in the world of genetics, and replication of different cells** in different bodies of the man, as **each one interacts in a different way with the same and neighboring cells**.

Scientists have not understood the Gans state

The present **scientists only look at the observation of what they think is the absolute matter state, and they have not understood the Gans state**.

They also each have their own emotional interactions as well

But on the other hand what is important to all this together is the fact that, even **you have different strand and different combination of DNA on the arms, that create their own structure.** All these have, in interaction with each other, not only create the field direction, but **they carry emotional interaction with each other too**.

The STM carries emotion of every part of DNA - collectively recorded

The **emotion of the man, when it is transferred through the body .., through the blood**, through the physical what we call soul, with the **STM carries the emotion of every part of the DNA, which is collectively has been recorded**.

How Genes Evolve - Permanent recording without materials on RNA

This is how we get what we call evolution of genes. Because **this emotion through what we call DNA**, once it is setup to do some work, it will **work not only through**

DNA, but it becomes part of the information line, (:36). of what we call the RNA, which is permanent recording without the material.

The Emotion si
So we see **that the emotion even sits within the structure of the basic blocks of life**, within the basic structure of the body of the man. **This is part which has been ignored**, but in so many ways, in the science of the physiology of the man cannot be ignored if you work in the true D of the Pl, and plasmatic conditions within the structure of the man, and in the environment of the structure of the man, and in the U of the structure of the man.

In the future teachings, one day, we might explain, that how you can even interact with these (genetic coding) remotely from outside. We can change genetic defects if we develop the technologies which measures the M field of the every genetic coding, and then slightly change it to be the right place for the others to move in the correct position and rectify and repair the, what we call the genetic damage. Even if the child is in the 20s and 30s born with total handicap, if the genes could be reached in this manner, gradually the life will go to normality for the defect.

These kind of technologies is what you'll see in the coming time out of the university of Iran. We will teach this in a rapid way upon my return. That we start (:38). creating a perfect man, not only in the D of the soul, but in D of physicality. When the man leaves this planet, he will leave as a smart, educated about his own life and about the U, but will leave as a perfect man in the physical and soul condition. It cannot be anything but this. Otherwise man will become a subordinate, as the others can see the weaknesses in the structure of the man, and man cannot be weak. We are not sending farmers in the capital cities, with the donkeys and the ??

In so many ways, the knowledge of the science of man, the knowledge of the science of the creation of life in the U is explained in this little sketch. You change each one to a man, .. to a cell, .. to a U. Still perfectly match in working. It's the same as the sun and the earth and creation of matter, like the soul and the STP, and the emotion, and the interaction of their fields to create what we call physical reaction.

What has happened in the science of the man is the lack of his understanding of the truth about the creation of the physicality of himself, that is not in the matter state, but is in the plasma state. Just because you can chew the meat, does not mean that the meat is a matter state. And this is where the man's confusion has come mainly from. (:40).

But the essential point to understand and to be able to what we call, educate the mankind on this subject, is for the mankind as a whole to understand the truth about his own creation. The positioning of the soul, the interaction with the heart of the man, the interaction of the blood, which flows within the veins of the body .. that creates the STP, and at the same time creating interaction of the STM, the emotion of what we call the plasma of the emotion of the man. When the soul of the plasma of emotion. But to what extent the KS will develop this understanding is entirely upon their own understanding

totality. And how we teach, and how we understand the subject of the creation and the Creator.

In so many ways, the interaction of the STM with the interaction of the Soul of the Creator (STC) must be creating some materials somewhere, like the plasma of the H and O, and in interaction with the STM creates that star. It cannot be any different then what is the truth, and what we see in the world of the creation.

It depends that what you have gathered in that soul, that in interaction with the STC, will it create a Saturn or .. earth, or would it be Mars. In so many ways, (:42). as we carry the essence of the STC, we only interact with the Creator, and in that process the Pl of the interaction of the G fields of the man, and the M fields of the STM, with the soul, and G fields and M fields of the Creator, create a new D in the space and in the Creator interaction world of creation.

Which means our soul on its departure, when it leaves the D of physicality in interaction with the STC will create that friction of the plasma of the H, O and gold, but that will become a new U. That will become a new galaxy, .. planet. It depends how much, and how strong we have created the STM before its departure from the physicality. What have we gathered in, that we go out.

The life of the man is nothing but the same as the planet earth. The fields come in and the fields goes out, and once within dictates how stronger it goes out, as we say, the North Pole has a higher strength than what we see, lesser snow on it, compared with the SP that the higher order are less of, but the lower order are more of.

And this is the Pl of the cycle of the life of the man, be it 10 days, 10 years, or 10,000 years. (:44). The cycle of the life of the man is to collect this Pl, and at the strength of what we collect from interaction with the other souls which we serve, will dictate in the interaction with the Soul of the Creator, what shall be created of the STM. And that is the creation of a dust, or the creation of a U.

The interaction of the G field of the Creator and a M, will lead to creation. When you have nothing, when you have created nothing within the STM to feed it, what do you expect this dust to be? Or have you gathered enough, have you managed to serve the totality in such a way, that you lead to creation of a U, that many dusts will lead to become galaxies and solar system within the structure of the soul of the man's interaction with the Soul of the Creator.

I have made the man in the image of Myself, that with it I can interact, and in interacting I create what you call different cycles of life across My Unicose. Now we understand, would you like to be the soul of the cell in the body of the man, or would you like to be the Soul of the Universe. This is the whole purpose of the teaching, that mankind understand the process of the creation in respect to itself and what it is going to be, (:46). of his soul when he leaves this physical body of the man, and becomes a free soul. And the only interaction with the Soul of the Creator, because he was made from and goes

back to. Would you like to be a beautiful planet like earth, in this structure, or would you like to be a desert, a deserted planet, or a moon, or a dust in the speck of the atmospheric condition of the Unicose between the Creator and the STM. If human race understands this, you will do nothing but to serve. and to share, as he knows the more he shares with his Creator, the better chance to create brighter dimensions of the fields which creates the collective essence of the creation of the Creator.

Now we understand why we come, and why all these teachings have been about the soul and the spirit up to now for mankind, because that was the only kind of language mankind could understand. Now the KS are knowledgeable and understand the totality of the creation. And this allows us to teach so rapidly to bring mankind in line with the rest of the U Community, which is the U of the Creator in the D of understanding to serve the others. When you become a member of the UC it is not all "honey and pots," it's serving beyond reservation of the understanding what man reserves within it. It's more servitude then in a way, attitude. You serve, you give, and the more you have to give, (:48). the more powerful, the more beautiful creatures you create within the D of interaction of the STM and the STC.

Now we understand the truth about the creation and the Creator, and why all this has been said, "I made man in the image of Myself," because that is the only way I have a common denominator, that I can interact with, that in interaction with the STM I can create new dimensions, new energies.

Then maybe one of the most mysterious questions ever mankind has asked himself will be answered, why do some children die at the point of birth? Is their soul mature that it leads to creation of a new U without being tempted, or tainted with the present life of the man, eating another life, destroying another life, having a plate of ?? right of different elements on it, and still thinking I lead a perfect life. Is the soul, what we call a fulfilled soul when it leaves at the point of departure from the womb of the mother? Or are we born to live a life, to gather a balance of what we learn as a correct, or misconduct. Or how the STM having been born lets say at a thousand level, becomes to leave at 200. Because the rest has been lost in the process of the physical life of the man through misconduct. (:50).

In so many ways, the soul of the emotion of the man is one of the most important parts of the creation and the created, where the interaction of the, what we call, elements of .. the STM will create their own cycle of life, and shall never finish.

I hope. My wish is that some of you understood the teaching in past half an hour, because if you have understood you will grasp the .. the statues of man which we just, put the clothes of man on, we leave them on the street.

The teachings are becoming shorter and shorter but with a lot of meaning and understanding. In so many ways, humanity needs to mature very fast about the truth about his own creation, no one . In the process of life we are set to see through the eye of the STM and not through the eye of physicality of the man. (:52). In the earthly life

we use the sight and the other senses. But we got to understand, that there is still a sight in the D of the STM and in interaction of the STM with its environment, and depending on the strength of the soul, we will understand the information transformation.

How hard it will be for mankind to cross this line, time and history will tell. Would it take the mankind millions of years, thousands of years, to understand and become part of the UC, or will understand and with what we call, a small helping hand, he become part of, but then the man who gave you that power, now you owe him the knowledge.

Today's teaching is very short but extremely sweet if you understood. Thank you for today and I hope many of you have understood that, and many of you soon will mature to the point of understanding the totality. Be aware of interaction of the what we call different conditions, and different structures, (:54). what you or your masters give you to understand. It's you who has to have the capability to understand, otherwise you are force feeding a child with a ?? rim, and cannot understand the totality.

If you are ready Rick we go for a break .

>>> Proofed to here >>>

BREAK >>> 387 KSW (1:00).

Q: .. What is the name of the AA formed in the Gans capture kit? . David Wilcox says the 20 base AA can be mapped out on a ?? doca-dihedron I wanted to see what the name of the AA formed on it, so I could find them on that map. It's a geometric universe. ?

K- The AA you create depends on the material you use, the way you chose your material, the salinity, the space gap and the environment which you created. These are fundamentally change every AA which you create, (1:02). that's why not two AA are the same. You create AA which in CO2 Box which is connected to the C and the O,

Any other question?

Q: WL, .. (1:08). and now we understand, still before we are the creator, but we don't know how we create a world. But today you do, tell how to create a world .. our world is created by thought. I understand it is created by our soul. ..
Any other question.

Q: Salomeea, .. what are the differences between ?? pen tics plasmatic … (1:10). Are RNA and DNA are immortal, and the soul of emotion is a memory of the men ?? ?? all what can elevate our soul to create new cycle of creation.

K- .. for your first question please read the book #1, it's all well explained in there, plasmatic M fields .. For question #2, it's the reality in the body.. we see the reaction interaction fo the fields, in physical response as electric current, in the D of .. physicality. the emotion which is created in the D of plasmatic fields is what is shared and given or taken from the STM or the STP to be added to that it makes the impression or taken away from. In a way, DNA is the connection of the transformation of the plasmatic fields information to the physical body .. within the cell structure of the brain .. (1:12). where the RNA is the fields, it's like the gravity, where the brain is the mass of the earth. It's a M it depends with it takes and what it gives and what converts, and what it gives or we add to the D of the STM , or we take from the STM.

In so many ways, we have to understand one is the link to the D of physicality, confirmation, and transformation of the energy and the emotion, and the other one is the connection to the soul. And they all carry the same information as a base, in what is added or changed. It's very simple, but the 2 even they are connected they are intermediary between the D of the Pl and the physicality and the other one is the collection between the fields of the Pl between the 2 souls. In a way, keeping up to date and in line with what is needed, to be, to manifest the physicality.
Any other question.

Q: .. (1:14). no response.
Q: .. with heart problems will this Pl T generate a new heart or create a separate heart?
K- It can do a combination . if you can take it out, and hold on to the operation of the fields of the body .. in time it will create the heart. If you want to repair a heart you can do it easily by that way too. If you get a bullet shot through the heart and explode it to pieces, repair is impossibilities. better to take it out and let the physicality fo the man in conjunction with the G field of the Inertia G field of the position, and interaction of the fields of the soul of the emotion to rebuild a new heart. Take a little bit longer but it works. The scientists are on this track. There is a lot of work is going on this, but they don't understand, they need to move in a more Pl and M fields to be able to solve the dilemmas of present time in heart operations. (1:16).
Any other question.

Q: Will the perfect man have eternal life on earth and in the U?
K- I can answer in 2 ways the easy way is, what do you think? Secondly, is eternal in the essence of the Creator as you are all part of it, it is eternal. But would it be that individual soul would have eternal life. No soul has eternal life except the STC which is created the totality. So don't expect much. You got to realize … a thousand year life of the man is a flick of the finger in the life of the U. How long do you think you can keep that flick going and how many times.

The only problem is what is the greed of the man who wants to live so long, and to be ever there, to see what to do, he gets bored. U has the same habits and the things are moving in the same direction and D. (1:18). You go from one U to another you see slightly different. You want to be a soul sightseer, then plan it from day one. There is a very big question for a lot of you, if you find the answer to it, you might find the key to

life. If you are asking to have eternal life, knowing that the Creator put so much out to create all the universes, do you think His life is eternal, and if it is where does it come from?

Any other question?

Q: Ed I have 3 questions. 1- You indicated we need to be perfect in physical and soul? When we leave this earth because others will be able to see our weakness. Does this imply that they will take advantage. You have expressed before that the U is a peaceful place.
K - can you repeat that again .
Q: Repeats .. (1:20).
K- Nobody will take advantage of you, that is the biggest worry of the man. Man is always worried that they are taking something from him, or he is loosing to somebody because they know. He doesn't understand that it is him who is stealing from himself. Nobody need to steal from the man, he is the bigger stealer from himself. If people fo the U were going to use man's shortcoming and his stupidity to steal from him, they would have done it millions of years ago. they didn't have to wait till now. And those who keep on talking, the aliens are going to do this., boys, they have been here long before you lot. They haven't taken anything, they won't take anything. You know when you go on biology (field) trip, they take you to rivers or whatever, or what we cal a field work, you cannot touch or take anything, you are just there to observe and put it back where you took it from, be it a shell, be it a stone, be it a fish. It's the same principle in the U, we don't collect souvenirs and we don't interfere. If we were going to use the man's .. weakness in knowledge and stupidity, (1:22). it would have been done a long, long time ago. They wouldn't have waited for you to understand a little bit, they would have stolen from the cave man. These people who come up with these notions, shows they have never understood the process fo life.
Any other question.

Q: #2 you talked this morning about a soul that comes into existence at let's say 1,000 level and looses to 200 because of misbehavior. Why would a soul allow this to happen?
K- Physicality does it, and soul has to pump it up. As much as it takes it has to give, it is responsible for it. It's as simple as that.

Before we take another question do we have anybody from Romanian group to speak about conference.
(1:24).

R: We have a couple of emotional questions.
K- Do we need tissue papers ..
Q: 3rd question, is the main focus of our development truly emotional in nature?

Q: Where do our thoughts come from, how do we create our reality?
K- We answered that last week.
Q: What then is the connection to emotions?

K- It has nothing to do with it.
What was first question. repeats ..
Q: is the main focus of our development truly emotional in nature?
K- More or less In a way, partially is.
(1:26).
Q: Q: Where do our thoughts come from, how do we create our reality? ..
K- It's partially form the interaction fo the fields and conversion of the emotion to physical. In the world of medicine we have a part ?/ motoric, how we use our fingers and to what precision .. but there is the same sense of , if you call it motoric, I call it ?? soul-ric. which means it is interaction of the souls, what it gives you, how fine tune it can work with your souls. This cannot be taught, it is something you are born with and we inherit with our, from the point of birth.

Romanian team …
(1:28).
(1:30).
(1:32).

K- .. can you clarify if you need the Covid test for the conference, or do we need immunization what is the situation?
Q: .. new restriction we don't need test
K- **So we don't need to test to enter Romania altogether?**
Q: Yes . (1:34). we don't need, we are in a green position with Russia, Moldavia ..
K-

Plasma is a Conscious Entity - it positions itself

Q: Is plasma a conscious entity? (1:36).
K- Yes, because it positions itself, it interacts itself. Conscious is field strength for it, that it positions itself according to its environmental fields. This is how life in any position in U starts. When plasmas try to accommodate each other, and the environment creates that condition of accommodation. You have an O, and C, and N, and now you have the what we call, O as a G which creates a condition of holding to the other 3 together, with the environmental condition, which is the water itself, which is another link between the water and what we call AA, then it's a sense of accommodating and balancing, and this a part of the structure. It's fully conscious. In a way, it's not conscious, but as it accommodates it has to ?? position itself, we call it consciousness, ?? we call it in world of physics, MaGrav positioning. When environment dictates you have to be born in a water condition, with such a salinity, with such a combination of so many of the AA's than of course it's consciousness. (1:38).
R: So what would be the difference between a magnet which maintains its position with another magnet, and the type fo positioning you are talking about with the plasmatic fields, as a conscious entity. Or would you consider the magnets as conscious entities.
K- In a way, they are but they have a mass related Inertia connection. according to the planetary field interaction. In the body of the man it's different, it's a plasma mass, what

we call Inertia, which is a ?? loose combination of the fields interaction, with Inertia of the STM, with Inertia of the STP .. Then the body is created. Then it is very important for us we keep on repeating this over years, the body .. is a closed galaxy, it's a self contained ?? planetary system with its own vacuum condition, and its own .. cycle. It doesn't matter you put a knife in it, you open it, whatever you do with it, but still immediately creates that space gap vacuum condition. So the body .. is another planet on this planet. the Inertia on this earth has limited say in its structure, because it is inside itself it does what it likes. You don't see the Inertia ?? too much, part of liver jumping out, or part of your kidney jumping out. (1:40). So this is what we have to have in mind and understand. It's a self-contained operating system, and with it has its own self-contained emotional system, and when all of it decides the emotion to be one, man reacts, laughs, cries, runs. ??
R: You mentioned even a stone has a soul, so we could think of a magnet as a stone basically … ground up earth in certain elements. It would have its own realm where its soul operates, but that is different than the consciousness of a human connection, human soul and STM and STP .. that emotional connection .. a conscious entity
K- anything you mention has a M field strength conscious, ?? joy, happiness, you just need to find that strength. Then you can make a man always happy. Why do you see, when I see a certain flower makes me happy, but that flower has a preset mind and M field strength which matches my happiness, D. SO I see anywhere this flower I am happy, it makes me joyful. (1:42). Or could be another human being, could be an animal, could be anything.

Have to repair the Emotion first or keeps coming back

Q: My **heart needs repairing, but according to you the emotional factor needs to be** addressed.
K- Yes, we can repair the tire, but you haven't fixed the brake. We can keep on repairing the door handle, you keep crashing against the wall here and there, but you forgot to change the brake. That brake is the emotion, fix it. You'll find out many of these problems will go.

We Don't Go Public Anymore - special fixes

You can do certain things with it. **There are certain ways you can handle it. We know how to do certain things with it. But we don't go public with it**, as I mentioned in the teaching of Jalal last night.

It was very interesting I went to Jalal teachings as a student ..

(1:44). I was left there, I went to become a KS , a student, he teaches very nice actually. I was there for a couple of hours… when he realized
so we have to come in anonymous so nobody knows who we are.

Ceramic Cups - Only 30 mls at a time

Q: … with the **plasma Cups if you have one Pressure and one Sweet Cup is it important to drink them at separate times, or drink one after the other?**
K- Yes, .. and you have to drink only 30 ml, very important. We know people who are drinking cups with it and then they go haywire with it. 30 ml each time is the maximum you can drink. The Cups are there for inhaling and .. body use. (1:46). Only. It's .. dosages for these things have to be small dosages .

We will introduce New Technologies after TV gets going

We'll introduce new technologies once things move on, on the TV channel.

New Ways to use Gans - Already Tested

Where we'll introduce new methods of use of Gans's. It's been tested and results are very encouraging.

There is something I have to explain, the Air Enhancement Units (AEU) after a lot of testing for maximum results, shipped out some time this week … When you receive it, you receive a white disk with it, make sure you put the white disk facing the unit wherever you put it. If you .. the nozzle of the air flow has to face the disks which are given that it creates a current flow. This is one of the reasons we delayed because the ARU were to be used for the purpose of enhancing the air, but we have found out adding this piece to it, increases the work in enhancing the air, (1:48). for negative O levels, in very high levels, especially in the mornings, so when receive these units, now that the second part has been completed it will .. create a beautiful condition. All the ones which are coming through … originally we had 2 units facing each other, but this is a more practical way. Once you receive you will .. feel the change. The same with the glasses they'll start leaving this week …. Please with your glasses there is a report sheet, please fill it in, send it back, as these are put out as a test, for you to be the one to use it …

As we have seen with the cups. .. maximum use is 30 mls.
Any other question. (1:50).

Magnets Sticking to Body Video - Stay away from

Q: .. The latest research in Nano materials and specifically so called grapheme , one of these investigation is the so called reduced grapheme oxide, which in conjunction with H in a biological organism becomes magnetic?
As all research has its positive and negative aspects. Doe the KF with wonderful plasma have some configuration that defends humanity from this danger .. ?
R: Have you heard about this reduced Oxide?
K- No ..
R: I think people are referring to this in terms of vaccines , that people are worried about it is in the vaccines and gets in the body and becomes magnetic. And then we have all

these **videos showing up with people sticking things to their body**. Videos like that note, have showed up even before Covid, before vaccines. …
K- **Maybe you have too high of content of Fe in your body**.
R: The debunkers have found out they have something sticky on their body that they put on, allows the things to stick to it that makes it look like it is magnetic. So I am not sure, (1:52). how much of that is true and how much of it isn't.
K- **I think we better keep away from this situation**.
R: Yes, it is bordering on medical misinformation ..
K- Yes, there is a new what I call, ?? they call Delta version of the.. a new name has come out with the Corona. Now they finished with the countries, now they started with alphabet. They are supposed to be more dangerous than the other.

I think in **time if we learn and follow the process of the KF work**, we'll see a lot of understanding**, it doesn't matter what it is.** The understanding of the T should help you with any kind of virus in any position in the U**. It depends if you want to be the orange, or you want to be the Cup of water. Or if you are the orange, or you are the Cup. The vastness of the what I call, "right use of what I call viruses," is so huge in the space**, that when I listen to these thing it just makes me laugh. But at the moment they are riding on the ignorance of the people. (1:54).

Joke - Billy wouldn't take the second shot - must be something in it

You've heard about the new joke, they say, do you know why Bill Gates is split? They said, because Billy didn't accept the second shot. Did you understand, Rick.
R: Not sure if I got that or not.
K- He was good as long as his wife had the second shot. He wouldn't accept the second shot. So there must be something in it.
Any other question.

Q: How do you use the dry Gans you see in KF Store.
K- .. but why did you buy it for. what purpose. We see Romanians are adding it to paint, and they are showing how to use it for a paint brush ?? You can use it all sorts of conditions. the only thing is you cannot eat it.
(1:56). You want to use it as a paint diffuser, ..
You can use dry Gans the same as wet Gans.
But with
the wet Gans is dynamism, the energy loss is higher to the environment. Dry Gans is for specific cases. KF carries hundreds of kilos of it. In new factories we deliberately go for dry Gans.

Q; he cut himself deeply, lost consciousness, woke up with Pineal gland burning and hurting since than he feels differently body also. The doctors don't know what to do .. (1:58).
He wondering if there is any solution to his uneasiness, he doesn't feel like he is fully in his body …
From a spiritual point fo view is there something you could say?

K- In a way, from soul point of view you can do something. Mankind has to do this in the space. When you cut an arm or loose a leg, or any configuration of arms or legs you might have at a given point, ?? effects you emotionally, which is physically. It is within our structure of DNA from time fo birth to regenerate new organs, new parts. But we have decided to ignore it, and part of it is done through emotion. As we explained, emotion brain in interaction fo the ?? STM creates a field in interaction of the .. .. the body of the man, leads to creation of cells in that position. (2:00). But there are ways to do it. There are specific ways you can do, be it a gland you can repair, be it organ, .. cut you can repair.
R: Many people are concerned about Pineal calcifying. any maintenance you can do?
K- We see a lot of this at the moment on the internet. We prefer not to get involved in this discussion, because according to latest studies which was published, I heard about in the past couple of days, it's they have found the effects of the injections in every organ of the man. It's not just Pineal gland, in every organ they are finding traces of the vaccination.
R: A lot of the people with the Pineal it's not necessarily related to the vaccines, it could be other effects of life. ?
K- As I said, we are not going to get penalized for Pineal pushing .. (2:02).

But now we have structured the KFTV press releases for the new part. We'll be able to openly discuss this as a ?? channel. We have set our structure to be that way. We will structure to have open discussion ..

(2:04).
Q: Jalal …

K-

(2:06).

(2:08).

END

388th Knowledge Seekers Workshop; July 8, 2021

Vienna Talks Final Push for World Peace
Will Enforce Peace if Needed - can shut down communications
Advanced Nuclear Plasma technology different than Nuclear
Purified Plutonium needed for Space travel Iran is key
Our souls connected to the brain of Unicose
Physical emotions go back to Soul of Unicose
Our actions dictate our future
When you kill soul starts process of balancing
Kingship forbidden STM must be independent
Some fields always get reflected back
Star light is 2 dimensional we see each other
Travel on the feedback light fields
Systems will be introduced to show new dimension
Soul of Universe has brain structure and created emotions
Interaction between nerves and blood give feedback - balancing
"Pins and Needles" are a feedback loop
Body works as One Entity
Killing has to stop or re-infects whole entity
Man is responsible to elevate all souls on planet
Collective purity
Create systems to connect STP and STM ; man jump to higher level
We'll have option to be in physical or soul dimension
Time of Mitra has come
We are all equal and part of a structure
Races that don't live in physical dimension evolve quickly
Why we have a brain - transfer fields to rest of Unicose
Vienna Talks Knowledge in exchange for peace
Americans want access to Iran's nuclear T
Need high level purity Plutonium for deep space travel
We'll enforce peace
Purpose to put clergy on top - STM and STP as One
Final push for peace
rapid evolution in Science through common media
I have accepted the responsibility - immediate release of T
Release knowledge in one go
It has been preplanned
Mankind under microscope
No race will very be allowed to kill like man again
Creator learned from His mistake
We learn by feeling the pain of man
Clergy Showed themselves to be as bad as those Attached to Physicality
Accept our Conditions for Peace or we teach so rapidly 92% enrichment
Total Disarmament even guns to stop killing
We don't see much life left in Vatican

You Decide what race you want to be - and change to
World leaders will meet very soon in Tehran
We Plan Centuries in Advance - Vienna Talks will be remembered
The time of what we call, "milk and honey" has come
Nothing Matters Except Elevation of STM in both Dimensions
We Asked Iranian and American Leaders to listen today
If you don't - We'll Force the Knowledge Across the Planet
Better if Man changes himself - forever - Otherwise Police Force
Chinese Russians Understand Beauty of New Knowledge
Have to Tame the Untamed Child
Cleanup Mess Trump made of Vienna Talks
Waiting for new Iranian government to start Vienna Talks
400 Billion Contract between China and Iran
Germans Violating Nuclear Agreements through Brussels
Israel afraid of Iran's nuclear advancement
Extend 5 Plus 1 to include Japan and India
Make it Scientific Organization to include 90% World Population
Need Plutonium Radiation for Space Travel
Iran's Nuclear for Space Travel and Not Weapons - as Americans trying to say
We can paralyze every Navel Warship to its Base
We'll lead from the front
Do not expect to see the KF in front line in conferences. We never took the front line, unless we are asked to do so
KF Does not borrow money from outside - Keeps independent
Future heads of KF - Stay Independent let no organization dictate
Palestine will Include Israel as a state within - not 2 separate states
Problem sits with Israeli government not Jewish people
Use to Teach KS but they left and thought they cheated KF
Teaches World Leaders to use technology for peace
Bitcoin Miners Abusing poor countries for cheap Electricity
Trump Blocked Markray - sorting out
Germany is Biggest Block to Markray - resolve in Conferences
Listing on the Frankfurt and Chinese stock exchange
Pedophile Groups after KF because of 6 years ago mass arrest
Austria was one of the main centers of trafficking from the Eastern Bloc
When you Detach = You Love Everything
When you become detached everything is loveable
Arrogance of Knowledge
Mr. Keshe Personally make Pain Pen Products Gans Mixtures
Knowledge Released when Clarity and Detachment
Mr. Keshe Teaching never Stops - after death a physical condition

ENGLISH TRANSCRIPTION

(:10).
K- .. It's becoming very interesting how Knowledge Seekers (KS) refer to each session Such and such a public … (:12). We have established a ground for referring back to and expanding the knowledge. This is part of our work to bring knowledge, freely accessible to everyone, that in time of need one can decide how they can use the knowledge to their benefit. be it on the health, .. space, producing conditions for them to have a better life, or creating a better life for the others.

KF Knowledge Seekers (KS) have become the cornerstone of knowledge many, many organizations, they learn from it, they add their knowledge to it, and they expand it in new dimensions and directions. We see a lot of usages of KF T by different organizations and applications and we have started asking them to join us, to show how they use it, how they benefit by it, and how we can use this knowledge collectively to make a better life.

In past nearly 2 years we have targeted on the development understanding of the inner system working of the man himself. As man is too physical he was interested in the MaGravs, in Cups of Life and everything else.

Teaching Starts

Physicality is controlled by STM which is controlled by Creator

But in essence we try to bring a new dimension (D), a new understanding, a new way of thinking about yourself, more than the physical D, and understanding that the **physical D is controlled by a central station, is called the STM, which again itself, is controlled by central station, what we call the Creator**.

Through Emotions and Brain we connect to Soul

In a physical D we connect ourselves through our emotion and our brain to what we call our soul. And the **same goes with our soul in position and D connects itself, (:14). to a higher D**. More inner sanctums of life.

STP and STM give Reaction Gap to Its Environment - Brain

In a way, if you look at it, we use the .. physical soul and the cells of the physical brain .. to, in a way, **create a condition of interaction between the energies of the STM and the STP, to give the physicality of the man a reaction gap, that how it will react to its environment**.

Same Thing Occurs between STM and Soul of the Creator

But at the same time, the **same thing exists between the STM and the Soul of the Creator (STC) in that gap, what we call the brain**, or the process of the conversion of the fields and emotions, both the Creator and the man receive the same emotions.

We Connect to other Souls - to the Brain of the Unicose

So in a way, we **upgrade, we transform energy one level higher**. In a way, what we see is we use the brain .. in a much more condensive way to create a fast interaction between the energies of the STM and the STP .. and in that interaction we create emotions, or reactions. But the same thing exists, the STM, what **it receives from interaction of the emotion of the physicality, it receives and it transfers that, in its position and condition, in respect to the other souls**. In a way, they are what I call, the **brain of the Unicose**, the brain of the Universe. And in that process it interacts with what we call, the soul of the existence of the U, the totality of the dimensions.

Our Physical Emotion go back to Soul of the Unicose - Creator

In a way, **our physical emotion creates a physical reaction in our physical body, but at the same time as it transfers energy back to the STM**, (:16). that energy, that emotion, it creates a secondary **emotion and reaction between the STM and the soul of others, and the totality of the Unicose soul, the Soul of the Creator**.

Our Actions Dictate our Future

In a way, now for the first time we understand. **Every action has a reaction**, and that reaction it places us and positions us in the Universal Community. We decide how we interact and than we decide to what extent that interaction, **without us knowing will dictate our future**.

When you Kill - Soul starts process to bring Balance

When a man kills a man then he thinks that's it, I am a soldier I am being told to shot, I kill. But the soul has seen the other soul, which is killing, then **that soul sets everything up for the STM you have taken the life of, to balance with your soul. In the future, out of nowhere you loose your child**, gets shot, out of nowhere you find a loss, and then you say, "oh, this accident happened." There was no accident, **there was no coincidence**. The balance of the souls, the emotion of understanding. **The emotion of the presence, brings that condition of what I call, balancing of the souls in respect to the STP and the emotion, which has created that condition**.

Kingship Forbidden - No Right - STM has to be Independent

This is why we forbid kingship, because in that process one decides on other peoples life which has no right to. A STM has to be independent. The STM has to be the king of itself, physicality, in line and direction of emotion, with emotion of his creator. The bigger structure.

Nobody Works Alone - All are part of a bigger picture

In so many ways, mankind comes to understand there is a **bigger picture. I work, (:18). as a self-employed businessman, but I am actually a member of a big company. My wages are paid by their action**, and not just me thinking, I run a ?? plug and job and I get paid. The whole structure is how we plug our system to each other. **How we allow the flow of the fields** of what we call, the water, to go through the physicality of the man, through the blood .. , through the emotion of the man, and then in **its interaction of what it receives to the soul of the Creator**.

Fields that radiate to earth get reflected back to sun - space gap is Brain

In so many ways, mankind **has always looked at his end, has never looked at the other end. When the rays of the sun radiate on earth, some of it, for what is created radiates back on the sun too**. Then that creates the interaction between the earth and the sun. And how things will take place, and the human being always looked at our own end, the interaction of the fields of the sun and the earth, creates light on earth, but that itself, **those fields are not in one-way direction** and D, some of those **fields get attracted back by fields of what we call the sun. And then the space gap between the sun and the earth becomes our brain cell. What emotion we create**.

Our Light also shines back on other side - 2 dimensional - same information

Many times in the D of the physical cosmology and what I call, science of the cosmos. Many scientists have never considered this. **We always look at the light, what we see from our end. If that light is created it is 2 dimensional. The others on the other side see the light too. and so that same information, that's the emotion, that our light has created and gives back, (:20). to them**. If you understand this then you understand **STM shines in front of his Creator**. You are not the only one who sees the beauty of the Creator, but the emotion of our interaction with our Creator shines on Him too.

Travel on the Feedback of Light to Creator

This is what mankind and in the future in the space T will understand. This is where if **you understand it in a bigger D, and you can create that interaction, you travel on the feedback of that light to the Creator, to the point of destination you want to go to**.

Travel on the Feedback Light of the Star to any dimension

When a star shines on you, it's not that you only see the shining of the star. **You shine in front of the star too. So you can use that feedback for travel back to the position and the D** and the direction. This becomes as part of the understanding collective and total understanding of the transportation and transmutation and connection between D of the STM, the physicality of the man. Man transporting himself through the D of the U without burning any fuel, because what we say is, **what we see, is being seen too, by the other side we have looked at. The same strength as we have taken from the D we can use to travel back to the D we want to be**.

In a way, mankind will learn new ways of traveling. New ways to connect the physicality and the STM and understanding of the creation in the D of the physicality and the Soul of the Creator (STC) together.

All the Teachings will Come together in one go - Many will understand

This part of the teaching is what will come to many of you, where we start bringing the D of the physicality, the D of the STM, (:22). the understanding of the knowledge of the creation and the Creator, transportation and transmutation all together in one go. It's time for mankind to elevate not only his knowledge, not only his soul, but to **understand how to interact, how to bring the 2 together to enjoy a new D in life**. In a new D in the world of the creation.

We'll Introduce Systems to Show this new Dimension

In so many ways, **gradually we'll introduce systems that allows you to see**, to understand this transportation, to understand this new D.

Soul of Universe has Brain Structure - creates emotions

T**hat's why you have a brain interacting with the STP and STM**. The STM creates interaction with the **soul of the Universe, and it has a brain structure, and that interaction creates emotions. It creates motions and directions, and if one doesn't work, the other one works for it**.

Interaction between the Blood circulation and Nerves - give feedback - balancing

In so many ways, if you look at the physical D of the man, **we have the same process. We have a feedback, we have a condition that if one dis-balances, one gets alarmed, one gets ?? to talk. In the body of the man you have the blood circulation which carries the emotions, and then you have the nerves system which defines interaction of physical D, of the transmutation of the emotion to physicality**.
Pins & Needle Feeling is a Feedback system G and M

In so many ways, what you see is the same, **one is G and one is M, and when the two dis-balances,** we see, we feel and we understand the dis-balance. When for example, when you put your arm under your body and you block the blood vessels, we call it**, "pins and needles.**" But where does it come from? The reality of it is that we disturb the balance flow of one in respect to the other. (:24).

Blood and Nerves send Electric Shocks when there's an Imbalance

The **neural system receives its information that the blood system does not carry any information** which it usually does, so gives, ?? seems to be dead. So **the difference between these two creates the electric shocks, what we call, pins and needles**. Now

we understand this process, so we can understand further **we can call one G and one M and they both have to be consistent**, they both have to be in position and **possession of each others information to be able to function correctly**.

We can create system to show this feedback interaction

This is where **mankind will come to learn he needs bigger D of understanding** of even his own existence. Understanding the totality, understanding that the life of the man is replicated in every D and in every condition, and every structure of the life. We can create conditions to show where it is, how it is. **We can create systems, we can develop facilities for you to be able to understand it, and see it**.

EU where Physicality Meets STM - Intelligent interaction between 2 systems

This is why for example in the **Enhancement Units (EU) we say, this is where the physicality of the man meets the STM, because we create a communication not only with the STM and the STP we facilitate the new D of existence, that it can bring, what we call, what is shortfall. What is short in understanding of the totality of the connection between the two systems**. In so many ways, the new space systems, the new understanding of the T is very simple. It's us who has made it difficult for ourselves.

How the Body Works as One Entity

In so many ways, **the whole body of the man has to function correctly that all the information transferred, translated and acted upon becomes one. That the body of the man works as one entity**.

Killing has to stop or it Re-infects whole Entity

This is part of what in many teachings we say, that mankind **needs to walk away from the behavior of killing, because if one cell carries that process, the rest can get infected, the rest will receive the information and energy and they convert**.

Soul of Creation is One Brain One Structure - mankind is a part of

This is why we have strived to create a peaceful man out of the man as totality, **because the soul of the creation is one brain, one structure. We have to make sure the whole structure carries the message.** This is one of the reasons in the upcoming positions and conditions which is created with the KF, we start creating condition, that **not only the ordinary man, but the world leaders understand, that there is a need for a total condition of peace**, peaceful understanding and behavior of the life that humanity as a whole can go to the next step.

Man responsible to Bring Totality of Beings on Planet to Peace

The **responsibility of the future leaders of man is to create that condition,** that condition that **the whole what we call the brain of the humanity, which is the totality of all these beings on this planet, because man with his intelligence, which is responsible for the totality, works in the same way, in a peaceful way**, that allows the peaceful interaction of the soul of the planet with the soul of the U.

Man as King of Animals responsible

Now is not if we come to understand and **become part of the UC as human race, but we as a planet, we as an ant, we as a lion, we as a bird**. Then we become responsible for this understanding. (:28). It's the burden which we accepted, **we called ourselves "the king of animals," and a king at this level needs justice, correct behavior, needs to be equal to all**. Don't do what you don't want to be done to.

This is Part of Process of Elevation of STM - human race

This is part of the process of elevation of the STM. This is part of the elevation of the soul of the human race. And this as a whole is the part of the elevation of the totality of the planet, what we call soul, **in respect to the soul of the U.**

It's no use treating the cancer in the liver when the cancer is already exists in the brain and the stomach. The cancer of killing, .. destruction, .. destroying whatever is in the man's possession, that it will destroy and kill to get more. **To steal from another essence of being, because the man is that liver, what about the stomach, which is the plants and the rest. What about the birds which are the heart and the rest of us**.

We are responsible to bring collective purity

Now we understand how **collectively and individually every soul is responsible to do good, to act good, and to think good, and in that way it brings the promise of purity in collectively behaving the same**.

Create Systems to connect STP to STM
In the coming time we'll **introduce the systems as we are developing more** and more of, to facilitate **for more people to be able to create that connection between the STP and the STM and then the soul of the human race, then the soul of the community of the planet earth, and the STC**. (:30).

Create Systems to help Man jump to higher Levels

Jumping from 1 to 2 to 3 levels higher is not easy, unless you are elevated and understood how to reach to the inner sanctums of the energy of the Pl of the STM. In a way, **from now on we start introducing 2 new systems** one in the physical and one in the D of the soul, **that gradually mankind will jump that barrier**, .. becomes aware of the essence of his creation. His responsibility for his claim to be the best, to be the top of what we call, the structure. Getting to the top a lot of responsibilities. Being the king of

animals has more responsibilities to be correct, to be just, and to be able to keep that there is no kingship.

Reached Pivotal Point - You are Responsible for Every Step

In so many ways, **we reach the pivotal point of connecting the physical D of the man to the STM**. In a way, step by step, very tender positions and movement bring you and the human race into the D of understanding to be, to touch, not only your soul, but the soul of the planet. To become to understand that **you are responsible for every step you take**.

We'll have Option to do Both Physicality or Soul

In so many ways, mankind from now on, from the teachings we will have, will have the option of the both. In a way, **he has to make an option of both. You have no choice, because the knowledge is rapidly dispersing, and the knowledge rapidly is given to man in different shape and form for him to reach the pivotal point of bringing the STP, STM, and the soul of the planet, and the soul of the U, and the STC all to work at the same time**. (:32). Now we are aware of it. We are responsible for it, **it's no use brushing it under the carpet**. This carpet does not exist. The carpet of, "I do what I like," and the carpet of, "I create and do everything for the others to pay for my misconduct," is over.

Time of Mitra has come - True Meaning

In so many ways, in truth **the time of Mitra has come. In the future you will understand and we'll explain to you what the true Mitra means**. The true essence of the creation, to be created as part of the Creator.

We are part of Structure - We are all equal

In so many ways, **we hear the instructions and now we have the manual, and we found out we are part of that manual. We are part of that structure**. In so many ways, we cannot deny it, there is no room for me as human being, and animals, that we are all animals, there is no need, there is no room for me being better than others as we are all the same, and the same process down the line. **We have never seen the Creator say, I am the Creator and you are the servants and do what I say**. We serve to be close to, not him, for us to be told what to do.

Pivotal Point - Connection to Universal Community

In so many ways, mankind has reached the pivotal point, the **ultimate goal of understanding his physical existence and the D of his soul's. The connection to the UC**, which he always have been part of, but he has always denied. In so many ways, mankind has become a kind of man that he has to decide what kind he wants to be. (:34). and then we choose our position, the place, and D. We stay in the rat race of striving to

survive everyday on this planet, from pole to pole .. one day after another, or we decide to become part of a bigger community, that we can travel the span of the U. We have no need to worry for what it call **meager 1,500 calories, that 1,500 trillion calories in small part of the U is waiting for us.** It's us who has chosen the crumb, when the cake has always been on the table. It's us who has decided to live this life, as **we unite the rest of creation and the Creator**.

Races that Don't Live in Physical Dimension - Evolve Quickly

This is the point where we see some races in the U evolve very rapidly in the D of understanding the totality, as they don't take the direction of the physical life, but they take and understand the fields of the U, which has created them. They never take to the D of the physical existence, but they **with their intelligence become part of the fields of the U to exist. They are not citizens of a planet or a solar system**, or a galaxy or a U. They are part of the existence of the totality of the Unicose.

Mankind will Meet these races as Lights - Knowledge Beauty

In the **future mankind will come across many of these, where we see them as lights, .. in a condition of interaction with our soul as feelings, emotions, knowledge, beauty**, and in that process mankind will **strive to understand** that process.

Why we have a Brain - Transfer fields to rest of Unicose

In so many ways, you will appreciate **why the human being has a brain, why, what is the purpose of the brain of the man, (:36). and how it can be used for the further understanding of totality**. You do not create another brain in the D of interaction between your soul and the soul of your friends, or the U. **The STM in the inner sanctum of his energy, because he is within the M field of the blood .. which is in a plasma condition already exists, already interacts**, but we chose the physical interaction of it, as the body of the man, instead of choosing the soul and energy side of it, as what we call, the soul of the U and Unicose and Existence. Now mankind become, to become **aware of both dimensions,** .. responsible for both, because the interaction and reaction of one is responsible for the fields, which is **transferred to the other, that interacts with the rest of the Unicose**, the rest of the UC.

Travel in Every Dimension through the Fields of Universe

In so many ways, **you can take the high road** and get yourself on it with a donkey or a car, or you can go on the highway **of the soul and the fields of the U and travel in every D and direction**. Mankind in the coming time will become very wise to understand both, and this has been part of our teaching in past times.

Start Process of Universal Peace - No Nation will be Superior

In the **next few weeks we will start the process of universal peace**. In the next few weeks we will lay down the condition for world peace and we interact with it. We have opportunity, we use that opportunity as we are given and we take this to bring, **what we call the leading nation of world to be equal to the others**. We bring to the world leaders the understanding of a simple fact, (:38). that there is **no superiority in power with guns and arms, but there is a superiority to understand the evolution, and understanding of the life of the man in the space**. In the space of his own soul and D of **understanding of his own soul**.

Vienna Talks - Knowledge Exchange for Peace - Iran Leads Way

In the **upcoming talks with the Americans, Russians and the Chinese. The Iranian leadership will set the new world peace pattern. This is the way we said, knowledge in exchange for peace in Vienna talks**, and we take the lead on this. In that process we change the direction of the humanity.

Americans Want Access to Iran's Nuclear Technology - Peace on Planet

It's very simple, **Americans want access to the nuclear T of Iran, which is based in the space T, we ask for peace on this planet**. Knowledge in exchange for peace. The **advancement in nuclear T has been a tool for us to create the condition of peace**.

Plutonium for Deep Space Travel - We'll Enforce the Peace

Many of you looked at the pitfalls and everything else in past years, but we looked at it as a position to achieve peace through the condition of understanding of totality. We lead from the front, the knowledge and T of the nuclear space T **using Plutonium and Uranium for depth of the U travel, understanding the work of the STM in exchange for the totality of disarmament of mankind on this planet. We will achieve it and we'll enforce it**.

We had purpose to put Clergy on Top - Show STM and STP as One

In that process the use of clergy, the Popes, the Vatican and the rest has been a way for man to understand that we bring the STM, and the physicality of the man and the world leaders together as one. We had a purpose to put to clergy at the top. We had a purpose to show that the STM and the STP is one, and we bring that position.

It's the Final Push for Peace

As we say, they have served a purpose. (:40). **It's now time for us to bring the final push**. **To bring the understanding of the knowledge of the man in respect to the religion and the STM together in one**, that we push for the final frontier of peace. We have worked for this for a long time and now we will achieve it. **There is no choice**. It's just that the whole thing had to be put to the position, that everything we wanted is ready for the final frontier push to reach and achieve peace.

When you can deliver thousands of people in the borders in the nations and the capitals of the other, by teaching the totality to the human race to do, mankind will rapidly find a solution for peace. **Mankind will understand there is an end to the frontiers, and the only frontier for the man has to be between himself, his soul, and soul of his Creator**. In that process within the coming time the whole of the human race will evolve into the new understanding of grasping, holding, and ?? the world peace. **What it means, peace within the STM and peace within this planet**.

Rapid Evolution in Science and Technology through common Media

We see the evolution in science and T will be so rapid, that the comprehension of the new understanding becomes easy. We will help and we work with different governments of present times to **push every nation on this planet through the common media and through the STM** to reach a new D.

I have Accepted the Responsibility - Deliver T for immediate use

I have accepted this responsibility and at the same time we'll deliver in Vienna talks space technologies, which the Americans could not even dream, on the table, **immediate usage**. The same goes for the Chinese leadership, and the same for the others. In this way, (:42). we destroy the barriers of what we call frontiers of nations, and with it **we enforce peace through understanding and sharing of the T**.

Release Knowledge in One Go - No One Superior

We open the knowledge of the nuclear atomic physics of Iran in the space of the D of the what we call, agriculture, health, energy and the rest in one go. **Which we do not allow nations to have time to take advantage of the others to be superior** to the others.

It Has All Been Preplanned - Nuclear T Billion Years Old

For years as a nuclear **physicist I did not become just one, it was a preplan**, exactly where we can, deliver the knowledge where we want it. To you nuclear physics has been something new, but **to us it's a billion year old knowledge and T**. We knew and the way we did to bring collectively the human race to the position of understanding of his own soul, and **with it to set the example for the rest of the creation and Creator in the U**.

Mankind is Under Microscope - Ancestors made the killing machines

In so many ways, **mankind is under microscope, the behavior of, the understanding of, the way you talk about the history of our ancestors** and other things, in the U **we speak about mankind and his behavior, and the ancestors we used to have who made the killing machines** and now we have change.

No race will Ever be allowed to Kill like Man

In so many ways, **it will become ingrained in the totality of the life of the U, that no race will be ever free, developed, created and nourished to become a killing machine as the man has become**.

Creator Learned from His Mistake - Man is last race to Kill another soul

In that **process the Creator has learned himself of the mistakes of His own actions in believing that everything will be perfect. Where in the process of interaction of the fields some things went out of control, and it took its own shape**. But He watched, (:44). and He controls, to understand it, that it will not happen (again). The **race of the man will be the last race in the U, which shall ever commit to destroy another soul** or another life.

We have to Learn by Feeling the Pain of the Man

In that process **we have to learn. We have to feel the pain of the man,** as much as we have to learn about the man himself, how the fields of the emotions in the structure of the brain of the man, creates such a condition, that it cannot be done again.

We End Leadership by Fear and Killing

In so many ways, **all the teachings, all the knowledge of the man over thousands of years has brought us to this point. We are moving to the final frontier of peace** through bringing all the world leaders, all the nations to become one, and **we end the kingship. We end the leadership by what I call, fear, killing , and the rest**.

Clergy Showed themselves to be as bad as those Attached to Physicality

And we couldn't do it any better, by **allowing the clergy to be head of nations, to show they are as good, and as bad as those we are attached to the physicality**.

In so many ways, the **time has come to say good-bye to both dimensions both those who abuse the physicality of the man through leadership and those who abuse the STM. Abused it for their own benefit**. In so many ways, we set our scene to a brighter future in the coming time. We will lead through the Vienna talks directly to one point, T in exchange for peace with all the nations at one point, one time. **We teach the T in a rapid way to all the nations**, that it becomes impossible for one nation to take advantage of the other, and this is the reason we opened our patent, that no patent exists. The knowledge has to be free to every man according to his ?? , according to his intelligence. (:46).

Accept our Conditions for Peace or we teach so rapidly 92% enrichment

In so many ways, I have one clear message as we told Americans to listen to today's teaching, we come to Vienna for world peace, and we enforce peace through our knowledge. It's the responsibility of **American administration and the Chinese to accept our conditions, or we teach so rapidly the knowledge of the nuclear industry, Uranium and Plutonium enrichment to 92% that allows the future of the space T to be guaranteed**. Knowledge and T in exchange for peace, through collective development, not isolated and insulated.

Total Disarmament even guns to stop killing

I have made this **very clear to Iranian government and the new government to come into position**, that our talks are very straight forward. Iran nuclear proliferation of the advanced nuclear T for the space**, in exchange for the total disarmament by all the nations, from nuclear to side arms to every other things which can kill another man**.

If Not - We Deliver it Ourselves

We have **assurances from the Iranian new administration, will be part of it. If not we take position and we deliver ourselves**. But we don't see that challenge. We see it as a point that the new upcoming conference in Vienna, the back of the 6 level talks will lead to the world peace, and we use this position and condition for equal knowledge for all nations.

In so many ways, my message to the White House and to Beijing, is very simple, the same goes to the Moscow, attend the Vienna conference after the new Iranian government takes over. We have a new message of peace. We will deliver to you, (:48). in the conference. **We do not want the conference to last more than 2 weeks. And we do not care about your sanctions, as you sanction yourself from the knowledge of the creation and the Creato**r. The choice is yours. The message from Tehran is very clear, we become the messengers of peace and knowledge and from August on we take the responsibility fully to deliver this T.

In so many ways, **now we have seen the end of one cycle of injustice, with the justice**. It will be the **responsibility of the KS and the rest of humanity to understand this and not to abuse it.** Do not see the opening of the frontiers as another way to invade another part of the world to bring in balance the injustices of the past. It will be done, but everything has to be in the orderly manner, and in the way that we decide, that we all benefit by it.

We'll deliver technologies that have not been seen. We'll deliver knowledge that is unknown to man today, and with it we take all of us across the same barrier, and the same point.

In so many ways**, we bring the STP of the man, the physicality of the man, the STM, the religion, and the leadership of the man, all to one point**, to one common denominator to serve each other, and not to be separated from each other. It doesn't

matter what color you put on the physicality and what name you put on the soul leadership, the Churches or the Mosques in the name of Islam, Christianity, Judaism and the rest. As they **all are in one line, believe in the line of the Creator and equality of the man**.

In so many ways, I warned the Iranian officials, (:50). 2 weeks ago that this is the step we take, and we shall take in Vienna. On the other hand, it has to be understood that this comes out of the strength of understanding the T and not the abusing the T.

We have not entered into the politic we have entered into the way of life of what we call existence in the U. You change it to any politic you like, but there is tick to it, and no poly in it, we work very direct and we deliver very direct in the upcoming meetings in Vienna. As the West, as the East, as the Russians, and Chinese, will be respected the same as with the Americans.

But one point is very clear, the way we see it. Is the Islamic world the path in the belief of Mohammad against the others, Iran has set ?? an example of. **Now Iran shows the beauty of Zoroaster in bringing peace and equality, in balancing the rest of the paths of the belief and religions to be one**.

In so many ways, **we don't see much life left in Vatican, .. in Jerusalem and the same in Mecca,** because they **all become one in the banner of belief in what we call, the Creator**. They all gave the same message, but the abuse by the others to the benefit themselves.

In so many ways, **we see the same in the world leadership for their own pocket, for their own corner of the planet. Now it becomes collective**, the knowledge will force us, and the knowledge will bring us to the point that we all value each other equal, irrespective of color race, religion and nationality.

With Knowledge - You Decide what race you want to be - and change to

In so many ways, we go back to what we set up, (:52). One Nation, One Planet, One Race, **it's you who has to decide with the knowledge you have, you want to black today and Chinese tomorrow**. You want to be in China or you want to live in Washington, this is the beauty of the new knowledge. **You decide your race, you decide your nationality or position to live, as you live under One Nation**. And when we have One Nation, there is no need for arms, .. for war, .. for understanding of this new mayhem, which man has created for himself is past centuries through the exploitation and what we call exclusion of knowledge for the benefit of a few. In so many ways, we all become professors in the science of the Universe, and not from fake university of the man.

In so many ways, we have opened the door of the knowledge and today's message was very clear. We could not make it much more clear. The Vienna talks in the cycle of the August will become for all of you to watch, to support, as a human race to make sure

your nations take that advantage of the new T and science in their own hand for all of the humanity.

As we have planned, the world leaders will meet very soon in Tehran. This is an invitation we make to all the world leaders. We appoint the time and the destination. The scientists and the leaders of the 5 plus 1, will be shown the advancement in T of Iran in Austria. You do not have to come to Iran to see, but we invite you to see exactly, directly what you are going to miss and what you need to do to be part of, there is a reason we always choose a place and a time and the situation. (:54).

We Plan Centuries in Advance - Vienna Talks will be remembered

We plan things centuries ahead, not the last minute. **Everything for us is according to the plan, the place, and the space we've decided. The Vienna talks will be ever remembered in history as where the man changed** from the D of physicality to understand the totality. It's not coincidental, it had to be, and we needed the last part which came for us with the implication and understanding of the man's knowledge with Corona, because he had to understand there is more into it in the new D of space T has moved into the understanding of the human race.

In so many ways, we are not walking away from the responsibility, but we are taking our responsibility directly to the world leaders, to accept the responsibility, that they are responsible for peace, they are responsible for providing in the true way, but not by creating more harm and suffering to the others.

The time of what we call, "milk and honey" has come, but depends who is milking the cow, and who is looking after the bees. In so many ways, we are responsible for both and it's the responsibility of our soul and physicality to make sure the both the honey and the milk are abundant to all of us, irrespective of our position, being a plant, a bird, a man, or an entity from deep space.

Nothing Matters Except Elevation of STM in both Dimensions

In so many ways, **we are reaching to the point that nothing in the D of physicality matters, except the elevation of the STM in both dimensions the physical and in the STM**. And I hope that today's teaching I've made it very clear where the KF sits, (:56). and that's why we stand here so solid and resolute to deliver the final stage of what we see as the beginning of the next steps of the evolution of science of man, which is the science of the creation and the Creator, not the science of material state as the man has become ?? in the past thousands of years.

We Asked Iranian and American Leaders to listen today

In so many ways, my message to those who are listening, especially as **we asked the American leadership from the White House, and the Iranian leadership, the new leadership to listen at the same time**. Work together to bring world peace in sharing

knowledge and influence around the world, that the knowledge becomes the king, and not the crown or the religion.

If you don't - We'll Force the Knowledge Across the Planet

In so many ways, I have made my point clear with both directions, and I have made it very clear. **Do not do what we wish to create condition of world peace, we will create it for you with forcing the knowledge across this planet. We have rooted deep enough to be able to do that, and we do not need no leaders, no religion to take it to the next step**.

Better if Man changes himself - forever - Otherwise Police Force

But if the man does it himself, man will change forever. If we enforce it, we have to keep a police force on him that he carries it on. We prefer the former than the later.

In so many ways, our warning goes to the WH, talk peace on the basis of knowledge with Iran, or the knowledge of Iran, which is the knowledge of the Creator, will bring you to be subordinate to the knowledge of the Creator.

Chinese Russians Understand Beauty of New Knowledge

We have no problem with the Chinese or the Russians, they have understood the beauty of the new knowledge and they work with it.

Have to Tame the Untamed Child

We have to bring this untamed child, (:58). to be tamed, and the rest of the human race with the knowledge and the beauty of the existence, that **we all work in a rapid way to conquer the space.** The space in the physical D, or through the STM.

I thank the Iranian leadership, especially the Ayatollah K of Iran and the new Iranian leader, which will take the steps towards peace in direction of the knowledge and T, and not with weapon. **We will show you why we enhance, and we have used the nuclear T as is needed for the development of the man's science in the space, and not for weapons. Weapons are for those who are weak, we do not have such a weakness. Not in the form of the Creator and not in the form of the man when we appear**.

Thank you very much for today's, and I made it very clear, to the American administration, and we asked you to be present in the teaching of today, and to the Iranian leadership, start the talk, we'll be part of it, a**nd we deliver the T to both sides, that all will be equal**, does not matter what race, color, or religion, you ?? cover the ?? table with, being a communist, being a Moslem, Christina, **or hidden in the name of the Judaism with a German flag, or American flag**.

We work all as one to make sure this process goes through in a very rapid way. It's time for the human race to move on to the next level, knowledge of the U and not alloys and a little push of the water to create electricity.

Thank you very much for today. If you like Rick you can go on the break … (1:00).

(proofed to here >>)

>> BREAK >>> (1:05). 388 KSW

K- (1:06). The KF permanent Exhibition Center is completed .. by First week in August. .. **First conference of the space Development will be held at Linz in the first week of September 2021**. This will be 2 days .. start teaching you the advancement in space T. There the world KS can come in, learn and take back to teach. we work with World Leaders at the same time . We let the KS start setting up the first systems for deep space travel if they choose so. We provide
.. We teach you the basic understanding and T, and we will

We start making the first phase of One Nation One Planet. The fist space workshop . (1:08). . 4 and 5th of September … in

(1:10).

(1:14).
Q: Salomeea, I start to teach
very long monolog

(1:18).
Did you hear me?
K- Yes, loud and clear.
For the KS who want to go for the space conference in Linz
(1:20).
Q: Gautua, ..
(1:22).
For the new Era of the KF .. like everyday we learn something new .. Perhaps you could explain what changes in Vienna when you from KF participants … ?

Cleanup Mess Trump made of Vienna Talks

K- The **Vienna conference is the 6th round of works which they are trying to actually cleanup the mess which Trump created**. We were on course, a lot of things were perfectly on course, what was going on. But president **Trump decided through his**

son-in-law who is a Jewish, to give a favor to the Israelis. He one-sidedly went for his son-in-law to keep his daughter married as we call it. He went for Iran and the process of peace with Iran. There was no reason for it, we could have done a lot of things in a different way.

Waiting for new Iranian government to start Vienna Talks

But in a way, it was the will of God, it had to be done that way that we get to the position we are in. **The Vienna talks at the moment are at a total halt**, because the present in Iran is in transition to the new one, and cannot make negotiate, and secondly it does not receive the backing of the Iranian leadership, (1:24). **as the corruption and fraud within the structure of negotiation is so huge that we do not, could not control it anymore**.

Every person **knowing the last phase of their talks in administration, they tried to milk the Americans for everything they could**, as they will get this and that done. ..

400 Billion Contract between China and Iran

Iran sits on one of the biggest contractual sign every known, in a way, 400 **billion contractual agreement with China, which brings a new phase in Iran**, what we call economical position, and the Americans are not happy with this. But that brings a huge financial burden on Iran and the next generation, which has to be renegotiated with the Chinese. So the conference in Vienna is not just one-sided.

Germans Violating Nuclear Agreements through Brussels

Secondly we have received **a massive influence of the Germans in the nuclear industry, which should not be done according to the Second WW agreements, because it brings back to Germany, by proxy, enrichment nuclear T through Brussels**. Because they now have found a way to finance through SEK, which is the nuclear arm of the Belgium's into nuclear industry, **which is completely illegal, which is against the work of the UN**.

But the way we see, and the way we operate within the conference in the background, as you see us, we operate in the 5 plus 1 in the background, ?? up . It will be that the nuclear T will be shared amongst all the nations. We don't give advantage to no one. We are **not going to spring a surprise on the Americans**, and say we are going to do it. We announce it, as we asked the White House and our people inside it, Oval Office connections, to ask the WH to listen clearly to the message today. **The peace talks with Iran stays visible and permanent. And we stay correct with, (1:26). but as long as ?? it is official to everyone at the same time**. You cannot stop the progress in science and T. Iran's nuclear T is far ahead of the Americans.

Israel afraid of Iran's nuclear advancement

In so many ways, **in being ahead has created a fear within the state of Israel, that they might be under the next strike. Iran has no animosity with the nation of Israel**. … destruction method used for the others using, the way of thinking.

Extend 5 Plus 1 to include Japan and India

In so many ways, The knowledge of the KF in these cycle of peace talks will be knowledge and T in exchange for peace, but **we deliver the knowledge on and through the Iranian scientists**. We do not want to see the end of the discussions with .. the group of 7, which is 5 plus 1 plus Iran. And **we want to extend this to include Japan, .. India into the same.**

Make it Scientific Organization to include 90% World Population

We want to make a bigger group than 5 plus 1, but **make it a scientific organization that represents at least 90% of the worlds population.** For this reason 5 plus 1 has to be additional forces as a scientific organization to become very much the way we had economical interests set with G20. We become G9, G20 of scientific organization. This is the aim of the KF ?? .. government, and we'll lead this way. What we call G7 … We want to create something like a G10, G20 of the scientific world organization that they see the knowledge spread and shared and balanced amongst all nations. (1:28).

This is the outcome of the 5 plus 1, the way we look at in Iran. It will happen only if one gives up first all its rights, but in the fairness that everybody else has it. We have volunteered to do this, **we have volunteered to share the knowledge fo the nuclear atomic energy of Iran with an open door policy with the rest of the world. Which means we want to show why we are purifying nuclear materials to such a high level**. Many of you will understand and understood in the teachings.

We need a process to be able to travel the depth of the U in a different way than today. At the same time we need to understand the process of maintaining and creating life in that process. **One comes from high level nuclear radiation purification that we need to do**. If you remember the first Iran space reactor developed in Tehran .. University used nuclear based T.

Need Plutonium Radiation for Space Travel

There are different ways, in the body of man we use B12 or B6 to create ?? to sustain life. **We cannot use Plutonium and Uranium. But B6 and B12 radiation is not strong enough for the space travel, to create and maintain long endurance creation of life plasma**. We need atomic nuclear Plutonium plus for maintaining the long strong fields for deep space travel. This is in the hand and reach of the Iranian physicist.

Iran's Nuclear for Space Travel and Not Weapons - as Americans trying to say

We will push with this. So **our preparation of the nuclear material has a space development T, not the weapons**, which the Americans with the Israelis have done and created to do. (1:30). But with this we'll create a new D.

We can paralyze every Navel Warship to its Base

In a way, we create systems that cannot be seen by the present radar. In a way, **we create systems that literally homebound every naval ship in their base**. As I said to a Chinese once, **I prefer to see all the American naval warships to become holiday camps, to become pulled ashore**, and travel people around the world to show, then to go around to kill man. And this we'll ?? in the coming months. I assure you, we paralyze every naval base in the world **if they are used for killing and terrorizing** and everything else. An army has to serve its nation and One Nation armies of the world forces have to support other nations. **They should travel without arms** ..

We take a different coarse, the Vienna talks are a turning point. **If we do not come to an agreement with elected officers of Iran, KF will take its own course to deliver through other channels**. our understanding in time with the Iranian officials is that we will go that way, and we will present. We'll show the technologies and we bring people for them to see that the T is not only in the hand of the government. This is why the workshops. I think when you attend the **first workshop in September you'll see a massive change in knowledge.** We open new dimensions, and new understandings with it we invite officials to come in to see. ..

In so many ways, we can accommodate up to 200 people in . but with the Corona present it is better for us to do it so. We try to keep a space gap ?? 30 which we have created now in Linz. (1:32). As a every week news center for world scientists to get together. ..

We'll lead from the front ..

Do not expect to see the KF in front line in conferences. We never took the front line, unless we are asked to do so. In the 5 plus 1, I always took a back seat, and had a full understanding and support to give when it was needed. So what we see in Vienna and … Iran it will be

(1:34).

(1:36).

Q; Will there be live access or video access to conferences and workshops ?
K- No , not at the moment … We keep these conferences sometimes totally under wrap because sometimes we'll teach things which we do not want it to be .. accessible to certain, especially to the scientists and the politicians. We

(1:38).

Q: Guatua, also include some African countries.
K- We will give opportunity to all the continents and nations. It is the same, both Africans, South Americans… This time we won't leave anybody behind.

Q: About KF Store can people pay with other forms ..
K-
(1:40)
(1:42).
KF does not borrow money from outside .

(1:46).

KF most prestigious centers and Manufacturing

Now we not only deliver the T but we manufacture it. We are making the most advanced centers and most prestigious centers around the world, and this all comes from the KF head office.

KF Does not borrow money from outside - Keeps independent

We do not borrow money. We have no facilities to borrow and we never look at borrowing facilities, as the KF gradually builds up its own structure. It takes a little bit longer but guarantees independence. for the knowledge to **stay independent and no government can force us to do anything**, but we dictate all our conditions.

Future heads of KF - Stay Independent let no organization dictate

This is important to KS, those who are in heads and running the different part of the KF, and for **the future heads of the KF, to make sure we never fall in the hand of no organization that they can dictate the freedom of the knowledge and T. My life has a limited time. But my advice to all of you is, never let no bank and no organization, (1:48). ever, ever to have access to running of the KF, except the U Council, and the Universal what we call EC and the administration part of the KF**. This is the key to our success and it has to be kept that way. It's important for us to be able to do this. We do not allow no government, and no nation to dictate to us. The future of us, and the future of humanity. In so many ways, what will be as part of our structure.

I share with you some pictures of KF China offices.

(1:50).
Any other question?

Palestine will Include Israel as a state within - not 2 separate states

Q; .. as a half Jew will you be able to interfere in the constant conflict between Israel and Palestine?
K- **We don't need to interfere, the T will bring the state of Israel to obedience**. When you live by the tune of fear you will do anything. The thing is **we believe in the state of Palestine, and .. includes state of Israel, not the state of Israel and Palestine**. I have explained this very clearly to my cousins and those in influential groups of the Jewish .. structure.

Problem sits with Israeli government not Jewish people

At the same time **we have to put a lot of animosities away, as Ayatollah K said .. we have no problem with the nation of Israel, the problem in the Arab world sits with the government, (1:52). with the way the structure to separate and .. create division**. The state of Palestine has to be the center of all the religions, not the state of Israel over Jerusalem. It doesn't matter if you are a Jew, Christian, Moslem, or whatever. Palestine came thousands of years ago, and the Jews came after Palestine so it cannot be any separation, but we don't see what you say, an end to the state fo Israel, it can be there. The state of Arizona is there, as much as the state of Texas, but within the structure of the US. Within the structure of the state of Palestine, we see a state fo Israel can survive, but as part of a nation. The bigger nation .. part of the One nation One Planet.

(1:54).

Use to Teach KS but they left and thought they cheated KF

Q: Did Mr. Keshe say he will be teaching the next teachers ?

K- **We always taught KS and those who choose to become teachers stood out. And those who claimed to be teachers and then they walked away and they thought, that's it, I cheated the KF**. They balance the books at the end of it themselves. I used to teach a lot of KS individually in progressive development. When they learned something they walked away, they thought that's it, I don't need the teaching any more. I learned something I benefit myself.

We have seen this, especially the medical section. .. but the game is very short time. .. We always teach, we never taught Alex privately or Jalal, or other KS who are coming up. If you reach a level where you think you can teach, volunteer for the education side, but don't have much time. (1:56).

Teaches World Leaders to use technology for peace

At the moment **I spend a lot time teaching in the background the present and future world leaders of ?? peace ?? use the T for peace. I am spending a lot of time on the political and diplomatic front to make sure we achieve what we are set for**. The knowledge now is in the hand of KS, what do you want to develop, we have the research centers . Now we have expanded

(1:58). development in China. It's a collective work. we see Mexico going into operation middle of this month.

Bitcoin Miners Abusing poor countries for cheap Electricity

Any other question. It's very strange but a lot of you don't realize , but it is putting pressure on other nations .. in **Iran there is a crisis with electricity,** .. shortage .. Iran can supply 56,000 Megawatts per day. ..
But you people outside of Iran are into computer mining, **Bitcoin and the others. Because of the cheapness of electricity in Iran a lot of mining organizations have setup shop in Iran and are using 10% of the nations consumption**, and they brought crisis to Iran. Why should you lot make money on the back of mining, what you call Bitcoins where the Iranian nation suffers short of electricity. (2:00). As we know through our power generations systems and MaGrav which are tested around the world, we can introduce up to 30% of the supply. This is how we
.. so we support the nation, we go in and deliver T which support the electricity ..

I said to the officials, we have the T to locate them and give them a good supply of plasma energy and see if their computers works again. (2:02).

Any other question?

Trump Blocked Markray - sorting out

Q: **The blocking of Markray by the Trump Administration**, has that been sorted now with the new administration?
K- We are talking. We don't disclose anymore. We are in the same position. We have to see now what Biden decides to do. But the whole sanction, is what we come to agreement with the Germans. The Germans have to stop supporting the state . which is responsible for many of the problems in Europe. Germany cannot run two horses, (2:04). they have to decide. This is part of the negotiations with the German government in the 5 plus 1. The problem in 5 plus 1, is not one nation with Iran, its against industrial world, seeing Iran as industrial power they are trying to block. The beauty of it is we have the educated people, we have the finances through oil and the others, and we have the facilities to go. And they are trying to stop the nation to grow because they know they are going to fall behind. But this time it is different

Germany is Biggest Block to Markray - resolve in Conferences

The biggest problem with the Markray is Germany, at the moment, the way we see it. And we'll resolve it in the coming of conferences. Our problem with Markray in America is part of, but the major part of it sits with Germany. Which we'll explain to them, and they'll understand, it's resolvable.

Q: What about the **listing on the Frankfurt and Chinese stock exchange** take place?

K- **We are working on it. We don't disclose because we saw what they did with Markray. We work in a totally different way this time**. As I said, we were open, even when we announced the opening of the city fo Linz, these hooligans tried to stop .. what the guy told them, the courts of Belgium are as good as the Hitler's courts and Saddam Hussein, kangaroo courts by them. (2:06). It's no difference, and they threw it to the wall.

Pedophile Groups after KF because of 6 years ago mass arrest

The investment and energy put into Austria shows how correct the KF is, and just a few phone call, .. When we track these people they all go back to the pedophile groups, which we damaged 6 years ago. They lost their income, the guy in Linz who called, he is the biggest pedophile in the area of Linz. **We'll publish his picture, his name and his face very soon. We let the people know. We isolate these groups the way we did ?/ and Alan Sterling**. Then we'll see how they react.

There are 2 or 3 people, there is one in Germany and 2 other places. We even seen those who are connected to us, are connected to pedophiles. **We open these files very soon. We kept away from this because we are working underneath to bring . massive damage to the pedophile groups, the way we got Alan Sterling with it, 7,000 people got arrested**, and one of the largest circles of the pedophiles in the, into the guy in America who they found, is connected to the Alan Sterling. The guy who is connected to all the rich guys. They are part of the same, And this is the same thing. No one does anything but support .

One of the main head of (2:08). pedophile organizers in Linz has left the KF, and that's why we see peace. We do not disclose to public, but this is part of what we've seen. People told us why they target KF. Because the biggest link to KF, is not there anymore. .. one of the oldest pedophile groups in Europe was connected without our knowledge into the back of the KF ?? the supply chain was there. And now we stopped it. …

Austria was one of the main centers of trafficking from the Eastern Bloc, border of many of them .. and the guy who lost his position and money come to Linz, and the children he used to get. We'll release the pictures and ?? on ?? own. (2:10). In his community. This is the job of the KF to develop and spread the T, these parasites always ..
Any other question?

Q: Mehranez, .. (2:12). is there a prerequisite for your conferences?
K- There is no prerequisite. The only thing is if you come to be a KS to gain knowledge. Not from the teachers in the conferences, but form each other. The duty of these conferences, is many KS learn from each other very quick. But we are aware of others who come in to infiltrate KF in different way. We saw it in the Rome conference and Dubai. We still do a security check …

When you Detach = You Love Everything

Q: .. about detachment … you said, .. is there a side effect of detachment for elevation of the soul?
K- Love
Q: nothing ..
K- **Love. It's falling in love. When you become detached everything is loveable**.
Q: with detachment?
K- Yes.

Arrogance of Knowledge

Q: Okay. (2:14). About this arrogance of KS, not the attitude .. not to take it down to the arrogance of knowledge?
K- **It's understanding that what you know is nothing compared to the totality**. This is what allows you not to be arrogant. This is part of being a true KS, it doesn't matter what you know, when you are there you do everything that needs to be down to be able to bring the next step. We see this with the KS who recently now started joining the KF in different ways. They don't expect me to do things in the office, or Klaus to do things just because we are there as heads and whatever. We sweep the floor, we unpack the boxes, we take the post, we do everything and it's not I am sitting there, I am the boss, I know much, you have to do. I go to the lab, what it is, do things, and be there. the same with other people, but some people say, oh, it's not just the suit, what you see outside. We are very humble, we are very down to earth. We still do things.

Mr. Keshe Personally make Pain Pen Products Gans Mixtures

I still, some to the (Pain) Pens you get, (2:16). from PP you receive 100% up to now, most of the mixture has been made by me. I go in the lab and I just mix it, because I do it with love and care. And because I know what is needed by humanity. Most of the, some to the equipment you receive, I do personally all the mixtures, even though the recipe's are given, they can do. There shouldn't be arrogance just because you have the knowledge, or you have a position . This comes out of understanding, that what you have is nothing in compared to totality.

Q: .. can we have the products in France. I have some problem for some years. Does it mean there is no delivery?
K- No we had, we have no problem delivering to France. We have structure after structure things which are put the wrong way …

.. When I went to the post, they said we have instruction not to deliver anything which is the KF. We send the books out, they were keeping it in the post office, to give the bad reputation that we don't deliver. **We have the same thing with DHL. They blocked huge amount of goods out of Italy, and when we took them to Court**, (2:18). Giovanni told me, .. they tell us we have instruction not to deliver but we have to pay the ?? because we gave them the goods. The goods are sitting, going nowhere. The damages

to KF is not just from one side. Now we have resolved this problem, hopefully in a different way. There is no where in the world we cannot deliver, from China to Russia….

Now within 24 hours they go ..

(2:20). There are a number of books which are ordered but never, the old structure with Italy never dispatched them, or couldn't dispatch them. All has been done ..

Pedophiles are very strong around the world, they give different favors and they get what they want. I had this question in depth with Giovanni ..
they said if you don't do we'll give to the Italian Mafia. I said, just pay, close the account.
Q: .. sometimes I can't even get to the final payment ..
K- Go to Paypal … (2:22). a lot of little problems are getting solved.

Any other question?

Q: .. Brazil .. so in previous classes going back to book .. it's real .. .
1- Is the emotion of knowledge the true knowledge of U and the Creator?
K- What?
Q: repeats …
K- It's the same. If you understand the true knowledge of U, you have understood the Creator. As simple as that. ..
What's the next question? (2:24).

Q: Is the spectrum of man's emotion the interaction between AH (STM) and the AF (STP) in the earth's fields, also in the universal systems?

Knowledge Released when Clarity and Detachment

Q3- **What dictates the release of knowledge**?
K- **Clarity of conscious and detachment**. The biggest problem with the knowledge, especially with the human being, is the ones getting it, they think it is ours and we protect it, and we get worse with it. If you add one word to it, it becomes worse, it becomes part of us, then we don't let it go because it is us, and we become more narrow-minded. Actually when you learn more knowledge you have to become more free to learn more, because now you understood, you didn't know and you don't understand all of it. This is where it comes, the arrogance, and attachment to a few of what we call M field, we call knowledge. Which you might have got it the right way. But when you are detached it comes to you because you see the side of it. When you are attached to your PhD you won't listen to nobody else because that's it, those 3 words are you life. But if you understand there are other PhDs you can learn from, (2:26).

(2:28).

K- Can I ask you a question. Those of you who want like in the Conference in Linz ..

(2:30).
Any other question?

Q; .. from the books about principle M field…. Does it contain the strengths of the Principle fields plus the M fields after they have interacted with their own fields. In other words, is the Principle, Principle plus the interaction of the fields or only the P Fields …
K- yes, of the highest order strength, Yes.
R: When do they become lower order strength, when they interact with other .. ?
K- .. when ??? they become matter state.
.. When they become a transition or they become matter state, we call it a past the Principle, because don't forget when you are Principle, which is the highest order and they interact with each other within a Pl. The expansion and reduction in strength, makes them to travel or to be attracted to another field in another D, (2:32). or position within the same environment. So then when they reach to that new environment, then they become themselves in the matter state, but now at the same time, during what we call, for example, nuclear decay or interaction of the fields of matter state in that position, with the other fields, they now become the Principle of themselves of the next cycle, because now become the source of the next cycle, while themselves came from another position.

It's very much in nuclear industry, we call it nuclear decay. We come from let's say Uranium decay to 2 new materials. So now these 2 new materials becomes a new source of energy, that they have to decay to another lower level. But in essence the Uranium was the mother, it's the source, it's the Principle. But you come into a new material in that time, interacting with that environment, now they behave as a new Principle for the next stage.
R: Does the Principle only exist in Pl condition or is it in rays or fields or all?
K- .. we call it as a Pl, and in a way, as a Pl of the fields. The rays hardly ever break up, but as a Pl they interact.
R: Are the rays the transition then from Pl to something else?
K- Could be .. it could be part of the essence of the Pl itself, or part of transition. You see in English we have a very good saying for this. We have a Gamma and Alpha rays for example, we call the Alpha rays which come from particles, but Gamma rays are another field themselves. (2:34). They have no entity. In a way, what we call the Alpha rays, the Gamma rays is what they call in the strength of the light, we call it, is the light particle a ray. It depends on which strength it's emitting what fields of light it is emitting. Not all the lights are of the same strength. Depends what you can absorb from it. It depends how sensitive you are, or what you allow to be handled by the next step.

I was explaining this .. during the development of the Iran space reactors I have no problem, to me, radiation is just like another piece, I am physically handling with radiation sources. Even on the Gamma rays, Alpha rays that to me is no difference, because the rays don't interact with me. This was a big puzzle to the Iranian scientists, how freely I handle nuclear material without any fear of radiation or whatever. I have done that from young age. Somehow my body is in tune with nuclear radiation. This was

even a puzzle to my .. peers in Queen Mary College. I could walk around the nuclear reactor openly and handle things, where they couldn't detect anything attached to my body, or getting effected by it. The first couple of time was a big fear I was contaminated by it, but they found out I don't get effected by radiation. It doesn't matter if it is in a particle or in a ray field. (2:36).

But the new science we have, when you go to the world of the Pl and face level radiation, we have the same kind of radiations, which are not known at the moment to man. I have explained this before in the teaching, that the fields, what you call cosmic rays, they are rays in the cosmic rays man has not even understood, but strange enough in what we call transition they become part of the energy, become part of our body cell, our body absorbs them.

Some of the universal, we call cosmic rays are source of energy and food to us as human being, which we never considered, we just think about the food we eat. But cosmic rays, what we call solar rays, are part of our lives. We cannot be kept away from them, because the 2,000 calories we use a day, we receive another god knows thousands of calories from the rays of the sun, and from the cosmic rays. When they speak about neutrinos, .. some of them slow down within the body .. and transfer their energy as energy sources.

The way we go to .. spas or warm waters to get different kind of minerals, as we travel through the solar system on a regular basis on different part of the SS we absorb cosmic rays as part of our food, we need it, otherwise our structure cannot live. And in certain positions we absorb radiations, (2:38). which are part of the cosmic rays, we need it to live, and our body attracts it to its G field forces, but our knowledge is not that far, we just look at the apple and the orange we eat and whatever else we do.

And this process is part of if we could understand it, part of the aging of the man, it's not just by itself, it's partly because of the interaction with the cosmic rays. If you change it you can change a lot of things.

If you walk in the night, or if you worked in the KF labs, we see the direct effect night and day on our equipment, even on the lifts and everything else. You look at it as what we call the water level in the oceans and how they rise. But if you worked in the KF labs we see the MG fields create a specific, especially on the weight and the fields during the day and night. We all see the same thing, the system goes up or comes down, during the day and night, even they are in a closed space, there is no day and night outside the field G field of the earth, with the cosmos and everything else, we see directly on our system, change of weight, change of position, and sometimes even change of rotation and sometimes position. Then you realize there is more than what you see in, what we call the tides of the water.

If you work with the .. dynamic and gravitational systems, (2:40). in the lab, because we work with Pl we see it directly. Most of the mechanical engineers won't see it, because it is there and it doesn't move, but when you run dynamic Pl systems you see it, your reactor moves to different position, or the rotation changes, or the field of the rotation

changes. If you go back into some of the teachings in the Insano when we hung the Star Formation which was on the wood in the lab, this was made by Armand, you could see, we put dust on the floor, we could see how the dust was changing and how the distance was changing, and it repeated itself systematically every day. We could more or less clock walk it, this is the time when it goes higher or becomes lower. Because we deal with the Pl we see the interaction.

So it must have the same thing, our body is made of Gans, we have the same effects on our body. But we never considered because we only measured how much apple and orange or what water you drank or how much energy you took. We take vast amount of energy during the cycle of day, the season, the year of the position of our solar system that we are in. Gradually we learn, gradually we understand, because we are a Gans. Up to now we never considered it, now we see it, we consider it, and we can adopt it and calculate it.
Any other question (2:42).

R: Marius confirms Day 1 of conference.

Mr. Keshe Teaching never Stops - after death a physical condition

Q; **Will humans be able to learn more of your knowledge after death, if you are the only one teaching this in the U?**
K- Death is a physical condition and my teaching never stops.
Any other question?

(2:44). K- It's nearly 12 o'clock… it's not the value it's the strength of the knowledge which counts. you can teach 5 minutes and be, take you 5,000 years to explain it. It's the quality, not the quantity.

Q: The difference between CNOH and CO2 is 1 H, is it Deuterium?
K- No, it's the combination of MG field of the elements. If you get the right field and right CO2 and AA you might get Deuterium out of it, but again it depends what are you going to put in it, and how you are going to put it..
We done that in China, .. we made the .. ?? like 4 pod structure by 4 pod structure (2:46). and it was done in a large scale. 30 to 40 .. maybe more 60 cm gaps. What we did .. a very big structure it literally sits on the floor .. we put Gans's in we left some spaces empty ..
We analyzed the Gans' in the space gaps.
(2:48).

Thank you very much . Hopefully see in the conference. ..

(2:50).

R: 388 KSW

(2:52).
K- .. there are some scientists that would like to come to these conferences. You can sponsor a scientist to attend a conference, which means a community to pay for them to come ..
(2:54).

388 ksw
END

389th Knowledge Seekers Workshop; July 15, 2021

Nuclear Industry secretly more active than ever
700 Nuclear reactors by mid-Century
1 N reactor cost $30 Billion
Nuclear Cartel blocking Iran
Make Nuclear Reactors SAFE
Plasma MaGrav under nuclear reactor makes them safe
Vienna Talks Safe nuclear reactors in exchange for peace
Pure Mono Fields 99.99999% for safe space travel
Pure Mono Field plasma prevent accidents
Extracting dangerous fields during space travel
Nuclear Weapons obsolete - 2nd bomb to extract fields
All universities on planet need to work together with Plasma
KF University under negotiations 3000 scientists
Knowledge Seekers to be teachers
No link between Quantum and Plasma Science
Singular Gans Plasma is already lowest quantum
Become parents at any age
12 beings as MaGrav to make spaceship
Humble enough to hold center
Deep State and Pedophilia
Sanction nations on UN child trafficking list
Vatican Swiss Guard is gay club
Members of Parliament need to be checked for pedophilia
Problems of putting 10,000 people on spaceship

Sexuality problem during space travel
Controlling psychology during space travel
Not just sick people - human race agrees to go along
We accept killing as normal
Butterflies KF Store special made elevate soul
testing Gans with intention
Children of the soul - 100% love and sincerity
Soul will deliver itself to physicality
Feeling bored in space - return to earth
KF Conferences brings forces to next step

ENGLISH TRANSCRIPTION

(:11). … We hope it will be a nice summer day in northern hemisphere and winter day in Southern hemisphere., but either way **you receive the same energies of the U and we enjoy life in this what I call, dynamic UFO, we call it planet earth that we are traveling around the U in our own solar system and we are totally ignorant of it**, because we are born in it we never take notice of it. how it takes us around **we see the whole U freely we don't pay for it, we consume its energy to get from one point to another in the U, we don't pay for it**, and has become for us, we take it as granted. We cannot live without it and in a way it is part of us in the structure of the life in the U.

Right of Every Man Access to Knowledge of Creation

In the past week, in a couple of teachings we have referred to something especially for it to be more expanded on in the teaching of today. We have a reason for it, this is part of our set out with what is to come up with the peace plan, **expansion of peace process, and negotiation with what we call, "the right of every man to have access to all the knowledge of the creation**," as we know in KF.

Problems with Nuclear Industry Deliberately Ignored

In the teaching in past week, it has been important to us to open the chapter, what is important to us, **and it has been ignored**, and it has been **kept in the back fire deliberately, that we do not get what we used to have. If you were a student like me in the 1970s and 80s we had a Green Peace movement, which every time somebody said something about nuclear they were on the streets in banners**, on the nuclear and the rest of it. Because at that time it was good for Russia to push the, what we call, the western nation to work against nuclear, and it was financed heavily through the different channels to stop the nuclear, what we call nuclear development in the west, financed by the east.

Everyone Thinks Nuclear came to End - But Never so Alive and Expanding

Then we saw Chernobyl and then we saw what we call Fukoshima, and we came to a point, (:14). that, **suddenly we don't want to know anymore. And everyone thinks that the nuclear industry has come to an end.** Nobody is doing anything about it. In fact, what is important is **that nuclear industry has never expanded so rapidly in one point and one place, and in different places at the same time.**

KF Teaches Nuclear Plasma T - Not Nuclear T - Big Difference

This is a misconception by many Knowledge Seekers (KS) and people who are just thinking about our work, that why over past years **I keep on talking about nuclear plasma technology (T), not nuclear T**. But nuclear T has never been so live, today as we speak.

15 N Power Stations under Construction - 420 Operating around world

As I explained in other teachings, is that there are **15 nuclear power stations under construction around the world**, and we never had this. The maximum we can recall back was 20 - 25 and 30 in plan, and progress. **We have 420 operating and semi-operating nuclear reactors today, but 50 are getting added today**, are getting built around the world.

Expect 300 more Nuclear Reactors by mid-century

We expect another 50 by 2030, 2040 to be start, and going. **And by mid century we are expecting 300 more nuclear reactors, higher order, higher power to come into operation**. The world economists, and governments are turning their back on the coal and oil and investing heavily in nuclear industry, but this time silently, very silently. It is extremely profitable. It is one of the most profitable businesses governments have gotten into.

One Power Station costs $30 Billion - Big Game for Governments

One power station costs round about 30 billion dollars. And when they put 50 of them together as now, and 50 planned, you understand **it's become one of the big gamers**. (:16). With 30 billion you can make many, many gas fire reactors, what we call power stations of oil and the rest of it. But governments are going for nuclear.

Preparing for when Oil runs out - IEA List

At the moment, there are **50 sites under construction in 19 nations**. It's not anymore China, or Russia, US or England, 19 nations are building heavily. They are **supporting themselves for the eventuality when the oil runs out, but at the same time to be independent to support**. From Dubai to Saudi Arabia, to Singapore to China. Everywhere else they are heavily involved, we are building in UK, in US, **and the list is released by IEA, what we call the monitoring system for nuclear** industry.

2 Heavy Advanced System in China - High Efficient Nuclear Materials

The whole structure of nuclear has never been so vibrant. We see **2 heavily advanced systems being built by the Chinese, in trying to process, what we call high efficient nuclear materials for whatever purposes they do. We cannot accuse**, but the places and the way these two systems are built, are heading towards of the what I call, highly efficient pure materials.

Nuclear Power Proliferation being Kept SILENT

So we see the **nuclear industry is very vibrant, but you don't hear anything on the news**. They don't let you. Just tap it in, on **Google it, and you will see. You get the list of countries** which have building, have built, a few are coming operational in the next 12 months and 24 months, and 3 years.

700 Nuclear reactors by mid-Century

In so many ways, nuclear industry is alive, is kicking, but silently. But there is a big problem, what is going to happen with 420 we have now, another 50 added, (:18). another 50 coming on, and then **by mid-century we have 700 nuclear reactors. Some stations of the past are getting repaired**, some are getting touched up, some are getting revamped.

High Costs has Lead to Nuclear Cartel - Don't let other nations in

But in any case 30 billion dollars are costs to put 1 station up. **It was a fraction of this in 1970s** when I was a student, when we were contemplating to build. But the thing is this T **has become a cartel. Three or 4 nations can only produce nuclear materials and then sell it, operate it, control the others. Nobody else can do, what I call, proliferation, nobody else can clean the fuel rods, nobody can do anything unless they do, Germany, US**, England to a part has tired, diverted from it, Russia and China and Japan are not allowed to do much, but are still building new nuclear reactors in a different way without letting people know.

Start Negotiations for World Peace

In so many ways, a cartel has been established, and this cartel is trying to run profitably, each one taking its cut. Why I brought recently this subject up is because as we start negotiating for peace, not only with Iran 5 plus 1, at this point, but for all the nations who are involved in it.

We Need Nuclear Plasma T for Space Travel

The nuclear plasma T it's part of the T of the space T, **without it we cannot travel. Without it we cannot reach to what we call the depth of the U**.

Fly to Moon less than 1 hour by June 6th 2022

As we said, our plan is **6th of June 2022, attempting to fly from earth to moon in less than 1 hour**. This is what we plan to do, (:20). as part of the Iranian program KF program. And in bringing other nations to be.

Sanctions on Iran to Keep Nuclear Cartel in Power

One of the reasons 5 plus 1 so heavy on Iran, is because Iran is cutting into the piece of cake. Iran can produce purify and cleanup much faster and cheaper, which than it pushes nations to look outside. Iran has a T to develop nuclear, build nuclear power stations, and cartel doesn't like it. **The sanctions on Iran is 90% built for this to be stopped, then they can keep what they call the cartel**.

Nuclear Weapons T is Obsolete - Nuclear for Space Travel

This is part of what we need to understand, what are we going to do, even with the Iran nuclear material, which is in hand. **Weapon T with the new T of KF is obsolete. Producing nuclear plasma for deep space travel,** brings a new D, new science, new way of living and traveling for all of us.

We are moving closer to Another Nuclear Accident - Dangers ignored

This is what is important for all of us to know. **We are putting one more step towards another accident, We are putting one more step towards possible damages by nuclear reactors running out of control. It has happened to us many times**. We've seen it with Fukoshima, .. Chernobyl, we've seen it in occasions in different countries. We had a 3 mile Island situation, even though very small. Then what's going to happen, what is our children going to do? What is the future of nuclear industry in these countries?

MaGrav Under Reactors to Absorb Nuclear Leaks to the Ground

There are 2 solutions, containment, find somewhere to dig, or using a new plasma (Pl) T to contain with a G system all the fields within a building. We are not offering a system, (:22). to bury nuclear power stations material. **A new knowledge**, a new T. In a way, **a G field system to be built below the nuclear reactors of today, by Iranian nuclear physicists, that on the time when we want to shut down, we switch these reactors on. Understanding the knowledge of nuclear, understanding the MG field of the creation of systems. We keep these reactors running, but we absorb the fields and everything else into the ground**.

KF has Systems to Absorb the Fields

This is our known knowledge to the present nuclear industry. **We don't need to find another hole to bury our own mistakes**. Even if a system runs out, we won't see the system we saw at Fukoshima, where the explosion will release everything out. We can

develop. In a way, **we have developed a system, which is already operational in KF sites, that we absorb, create a local gravity, and we absorb the fields inside**.

Safe Nuclear Reactors in Exchange for World Peace

What this means, no nuclear reactor using our T will ever run into possibilities of Fukoshima or Chernobyl. This is unknown. This is part of the T, which **we offer in exchange for peace from Iranian scientists**. We understand the process, and part of nuclear proliferation is this. Let us use nuclear, but **we build a safety factor which has not been available**. This is part of our work in the coming time. This is what we offer, and this is **what is on the table of negotiations. Iran advanced nuclear T in exchange for world peace**.

We can prevent nations from creating nuclear materials

In a way, we **create the condition that no nation can create nuclear materials**. (:24). With it we allow nuclear Pl T to be developed, but **we don't allow nuclear weapon T to take hold**.

At Moment No Guarantee about nuclear accidents

In so many ways, **what's the guarantee that all these 50 nuclear reactors built today will not go up the flue the first week**, in the first year, or somewhere during the operation? There has to be an alternative, and this alternative is on the table with the knowledge we have in the Pl T.

Special MaGrav to absorb Radiation

In a way, **we create MaGrav systems, especially designed to absorb these kind of things**. We need to do this. This is not a knowledge we designed for .. nuclear industry.

Already in the Patents for space - Create materials when needed

This is a knowledge we have developed, and **it is in your patents, that we developed for .. deep space**. What kind of **fields we want to absorb from the environment**. We are short of O, we are short of C, .. of MG field plasmas of Al, we switch our systems in our reactors, anywhere in the U and we absorb the field strength of that to the system. We **create O or Al as we need.** This is part of the T which will be given and traveled, and delivered for the new power stations.

Bury MaGravs under 420 existing N Reactors to make them safe

What I said, .. **we need to make underground tunnels even under the 420 nuclear reactors we are operating today, to place these .. MaGrav systems underneath them that does not allow them to leak**, does not allow no nuclear material to go beyond the boundary of the nuclear reactors.

As Student University N reactor was leaking into London

As I said many times before we saw this **when I was a student at Queen Mary College, we found out in the research, (:26). that nuclear material reaches beyond the boundaries of the university reactors, and it was shut down immediately** after completion of my report to the university. The following year they shut the nuclear reactor down, because we were radiating inside city of London.

N radiation is fed back in Earth's Core where it came from - as plasma

In this way, this **has been part of the understanding, to bring the situation under control**. To make the N industry, to make sure situations like Fukoshima and Chernobyl don't happen. We don't need to drop on top, we don't need to pour concrete on top, we don't need to find ways to dismantle something. Doesn't matter what happens, we **absorb internally. The inner core of planet Earth is made of Pl T, we just feed it back in where it comes from**.

Using KF Technology to Change Planet make N industry Safe

In so many ways, the new KF space T is **not just for deep space, we can change things on this planet, we can make nuclear industry safe, and we take our position as part of negotiations of 5 plus 1**. This is an announcement for Iranian nation and Iranian authorities.

We Walk Away from 5 Plus 1 - Child's Game

In a way, **we walk away from 5 plus 1, because we have too much advanced N T to bother with a child's game play**, which is done. N T in exchange for peace for all of us. Every nation has to have access to the N Pl T to be able to develop their own space T, .. their own energy resources, .. go advanced what they have.

Africa Suffers because can't afford Nuclear Industry

Why do we see **Africa suffering so much, heavily. They have no N Industry**, and all their national resources and the rivers and everything else has been used to the full. A continent suffers from a lack of energy because they cannot afford 30 billion. And the West and China, (:28). and the rest by stealing and borrowing from the others and themselves and their nation, are building these to guarantee their income, to guarantee their energy resources.

Plasma Technology is Equal and Fair to every Nation

With **the Pl T we give a balanced fair chance to every nation** be it US, to Africa and the rest. The new understanding of space T is for all of us, and that's **why we teach openly**. This is what we said, what we stand for, knowledge in exchange for peace.

With New Safety Features Nuclear Industry Grow as much as likes

In so many ways, **the nuclear industry can go as much as it likes, but for the first time it has a safety guarantee. We have the knowledge to create these conditions**, that we can develop, we can enjoy the pleasures of the N T but we put what we call a safety factor in, automatic safety factors.

First Signs of Meltdown - MaGrav Starts absorbing radiation

We don't need to have a runaway situation. **When a N reactor starts the first steps of meltdown, the runaway, the what we call, MaGrav systems underneath the reactor go into operation, absorbing it, not allowing the meltdown** position we saw in Fukoshima and Chernobyl. This is part of our new T, .. the KF in conjunction and cooperation with the Iranian N industry. The T belongs to all of us and we should have the benefit of it.

Need Certification of N Power station - has MaGrav to absorb radiation

In so many ways**, no one can build anymore N reactors unless we have certification that the MaGrav system underneath the building works, can absorb, cannot allow radiation out**. It's the same as we said, in the system we have built for the space T, we protect ourselves with shielding. For the first time we have a protection that nothing can come in, this time we absorb, (:30). that nothing can get out.

Present Nuclear Industry Cannot go further without Plasma Technology of KF

In so many ways, **understanding in the N Industry cannot go further if the T of the new Pl T as nuclear side of it is not understood. We offer T in exchange for peace from the KF to world governments**.

Nuclear Materials can be used for space travel

In so many ways**, nuclear industry becomes the savior for all of us. In a way, we can use the materials from the nuclear reactors in an appropriate way, to build reactors ,to build reactors can take man to the depth of the U**.

3 Different Kinds of Radiation

As I said before, there are **3 different kinds of radiation and as the knowledge of the man increases and expands, than man can expand to travel deeper**, to travel faster, to break the barriers of nations color and race, does not matter on planet earth of beyond.

In so many ways, today's teaching is very simple. We have to think the correct way for all of us. We have to bring apparatus and systems that protect all of us, .. expand the knowledge of humanity beyond the present D. This T sits for that purpose.

One System in City can take out Viruses - Corona

In so many ways, the new dimensions of the understanding of dynamic plasma, even for example**, in the case of Corona, will be very easy. You just need to put a system in the ?? middle city which absorbs the strength of the virus**. One second there, and one second not there. This is what we have developed in the KF .. new Enhancement Units (EU).

Extracting Dangerous Fields during Space Travel

In so many ways, that in **the spaceship of tomorrow we come across the field strength of the, could be behaving, or endangering all of us, (:32). we just need to tune into its strength and what we call, extract**. The same thing we do with the N reactors if they are runaway. We extract a specific field strength.

Create Field Detectors for N Reactors and in spaceships

In so many ways, we have fire and smoke detectors, now **we can develop T which extract, detects, and protects N reactors, N industry, even to be on our spaceship, what we call, plasma reactors**.

Have to Change Perception that Iran is a Danger

We open a new horizon in the world of science and T and as I recommended to my leaders in Iran, and Iranian new president, **we walk away from 5 plus 1, because we are the totality of the knowledge put together, and we have more to offer. Our knowledge, the KS of what we call N industry should be a credit, not a danger. Not to be a perceived danger**.

Iran has to be part of nuclear Cartel

Iran has to be what we call, part of the N cartel, that we provide exclusivity of T for safety and extraction of N materials from power stations.

No N reactors should be built without Iranian N Physicist Certification

In a way, as I said to my leaders, **no N power station should be built unless it is certified by the Iranian N physicist safety people. That it has the capability to extract all radiation from the environment fo the N reactor into the ground**. In a way, we bring a new D, .. a new T, and .. we have to be part of the new space T, as KS, as KF, as One Nation. In so many ways, **we are not putting a hand of friendship out, we are putting a hand of science out** to be able to protect all of us. (:34).

Today Nuclear Industry is Hidden form Public - But very Active

In so many ways, **N industry today which has been hidden from you is active, alive, and kicking, and waiting for the next explosion like Fukoshima**, or like .. Chernobyl or like **the others, which have never been announced**.

In so many ways**, it's time to add to the space T to the present knowledge**. In a way, to add to our knowledge **to make it safer for us, .. for our new generations** … is does not matter where they go on this planet or beyond they are **safe on this planet from N reactors, in the space from viruses, in the space something else form somewhere else**.

In a way, **our knowledge is not complete**. The next step when the man takes into space and goes beyond this galaxy, man needs to **learn more about deep space fields transformation, oceans of fields which most of them as we see on our planet, different airs, different conditions of environment they are the same. We need to understand more about cosmic rays, .. how to extract those part of it which becomes part of our life**, can become part of our process of understanding the part of the totality of the creation.

Message to Nations: We Have New Technology - Open to All

In so many ways**, we asked the American administration, the Chinese and the Russians to listen to the teachings of today. The message is very simple we have developed T which is unknown and in the process we will open up the T to all**. In so many ways, **it should not be exclusivity**, (:36). but it has to be a must. **No N reactors**, with the knowledge which is in the hand of Iranian N physicists, **should be opened up without certification, that the fields can be absorbed into the ground**, can be buried, can be taken out and put in a place as a fields of the strength of this planet that **no nuclear explosion can happen**.

Makes it impossible to Use nuclear Weapons

This **makes it impossible for nations to use N weapons T**. In so many ways, missile T is buried, this is why in Iran .. we are not interested in N missile T. Because it has no use.

Second Bomb dropped to absorb the first

And secondly with **the T in our possession you can drop one, we can drop one and absorb whatever you try to explode**. It's very simple, In a way, if you look at what we saw in Hiroshima**, if we can drop and immediately another system inside within the range, we can absorb all the fields back in this point**. One second nuclear, next second none.

Why Nuclear Weapons are Obsolete

Now you understand **why N weapons T is obsolete**. We have created a deterrent for it, we have developed T which become deterrent to it. What's the use of making something which is nothing.

No More Nuclear Superiority - Finished

Nuclear superiority, has hit the, what we call, rock bottom levels of it. The new understanding, the new Pl N T what can do, can write off all the dangers of behind, and what we done in the front, and all of us in our history.

Since we understand process - We can change fields of anything you make

In so many ways, mankind has to enter a new phase, mankind has to enter a phase, (:38). to **understand whatever he can make to destroy, we understand the process of (how) it is made, of fields, and we understand we can change the fields**.

My advice to the American administration, to Chinese .. , to Russian, is let's talk, big boys game. understanding the T, and delivering a new T, that **does not give one nation superiority just because it can kill more**. A nation should be respected that it can save more and this comes out of the Iranian nation .. We offer safety, .. protection if mistakes happens, and In a way, this new T make the N industry of America, China and the rest obsolete. In so many ways, mankind has reached a new level …

Peace is not optional - It's a Must

In a way, **peace becomes not optional, it becomes a must**. In a way, we can change a lot of things .

My Knowledge Belongs to Humanity - not for others to bully lie and cheat

My message to his Excellency Biden talk peace in Tehran. We invite you to Tehran, and this is the backing of the Iranian leadership and the ?? of Iran. We do not ?? but **we deliver T that makes you shame in what you do, and what you have done. We stand resolute for world peace and a new knowledge.** (:40). **My knowledge belongs to humanity, but not by the suffering of one on the other, for the others to prove they can bully, they can cajole, and they can lie and cheat**.

The new N Pl T puts an end to the fears of the T. As I said .. the reason as N physicists we are respected because we have shown that we can kill in mass. Then when you put an Iranian in front of it, with what they put out, it makes it more fearful. **Now when hear an Iranian physicist you respect and honor the knowledge, that we brought the knowledge to change everything of the past**.

We do not walk away from nuclear agreements - Opens Doors to all nations

In a way, knowledge in exchange for peace is on the table of negotiations of the new Office .. and the KF. **We do not walk away from N agreements, we see them as obsolete. In a way, we open the doors of Iranians N industry, N plasma industry to all the nations**. It has to be equal and fair, that the scientists in Africa, In Libya, London

…. all collectively develop their own ways, new science in helping the ?? and ?? on this planet.

In so many ways, it becomes like computers, different nations ?? different part of with and we all benefit by it. When an App or new program is made, (:42). we all use it freely.
This is how the of the KF become part of the same

Mankind has to know the capability of Iranian N Physicists to bring peace

In so many ways, my call and the call of Iranian administration is very simple, new government, new opportunity, and new world peace for all of us. In so many ways, **Mankind has to know what it the capability of Iranian N physicists, that it can bring peace, security, and absolute certainty that man can be in the space**.

Invite American president to Tehran - No conditions

As I said, **we invite American president to Tehran, no condition attached. At the same time we are prepared to open the embassy's in Tehran and Washington. No conditions attached. You can keep your sanctions, because you sanctioning yourself from the knowledge, but we teach it to the others. Unless the old habit of stealing on the sidelines still exists** within the American, British, and other administrations.

Open T to World - Can make Fukoshima Safe

In so many ways, **we open our nuclear industry to the world. The new Pl T, and T that can change all of us, even we can drill under the present Fukoshima and Chernobyl and place this systems to extract and hold and change the environment**, with the guarantees that everyone can do what they like, and live a normal life.

Need to contain and extract fields from explosion of stars and planetary systems

You will see, and **come across these in your travels in the deep space. We will see explosions of stars, we will see the explosion of planetary systems which run out of control, (:44). while we are the citizens, while we are passengers of earth of these units**. We need to have this T first of all to contain and secondly to extract.

All Universities of Planet need to work together on new understanding

In so many ways, **the opportunity with the new knowledge is so vast that we need to bring all the universities of this planet to work towards new understanding.**

KF to open largest university for 3,000 world scientists

KF in a very short time hopefully, will announce the opening of one of the largest university sites of the KF, if our negotiations goes positively. We will open **a 30,000**

square meter university for all scientists to come and learn. We hope to come to negotiation by the end of this year. and **upon completion we open the doors to 3,000 world scientists to learn together, within the structure of the KF**, the new T.

We are striving to change the position, but we cannot let one nation to suffer for the other cartels to show they have the power to do what they like.

Need Iran's pure N preparation for deep space travel

In so many ways, **we need advance nuclear preparation T of Iran and other nations to be able to produce the fuels for mankind's deep space travel**. Iran, what we call N preparation fuels, to **92% in coming months**, is needed if man wants to go into deep space.

Purest Radiation Fields needed to Prevent Accidents

The reason for it is, as we look for the purest gold, to have the purity to do our tests, in the space travel we **need the purest radiation fields that we have no accident by creating other fields within our reactor to be diverted, or to be absorbed, or be pushed away** from one destination or other. (:46). Nuclear Pl T needs purity of the nuclear material to be able to do, 99 enrichment within the next 6 months to 12 months, by the Iranian nuclear physicists is needed to become certain.

Need Pure Mono Fields to land safely on Moon

We take **off from earth we land on the moon, with no problems that other field radiations** should be. In the physical D we look for 99.99% purity of gold. In the **new Pl T we look for 99.99999 with pure mono fields, from the purest one element system**. This is why I support the Iranian nuclear Pl preparation, because it gives us that stepping stone to have the pure field. **No dimensions of any deviations, or absorption of other materials**.

Center of Every Planet is Mono Energetic Plasma Fields

In so many ways, what was put to be a problem is actually the solution. As was announced by **the Iranian leaders we have reached 60% purity in April. We announce we'll reach 92 to 99% within the next 6 months, which allows us to travel with the pure Pl materials of mono-energetic exactly the way it is within the center of every planet**.

MaGrav work best with Pure Fields - no wrong turns of coils

In so many ways**, if you build MaGravs you know what I am talking about. If you put a wrong turn you create a wrong fields opposite to the other your MaGrav system doesn't work, or it doesn't work at the best efficient** way to do. As you have created different fields in different direction. It's the same with the space T.

Need Pure Mono Fields to Create Lift and Motion

We need pure, **pure fields that are mono, that are in a Pl condition, (:48). and are energetic enough to be able to create lift and motion.** Mono Pl T is a gift from the Iranian nuclear physicists to humanity. We will achieve it in a pure way.

Iran has to be part of Nuclear Cartel

At the same time, this is why we said, **Iran has to be part of the new cartel in the nuclear industry. Not only we add to the knowledge for the space travel, we bring the security to the present nuclear reactor** that they will never run out of control.

Share knowledge Africans reach space before Americans

In a way, knowledge in exchange for peace is the new layout of the new Iranian administration and government and leadership. We work in one way, **we bring on the table the knowledge you could dream of, as a reality of totality, you can keep your sanctions in your own pocket. We sanction you with the knowledge. We share the knowledge with what we call the Third World to pass you faster than you could ever imagine**.

Invite NASA Propulsion Lab to join KF

When we'll have people in South Africa on the moon and Mars in early next year. American scientists can still work on the Pl reactors hoping to land on Mars in 2030 if they can. **My call goes to Mr. Nelson as the head of Propulsion for Mars mission in NASA, open the channel of talk, we invite you to our base in Arizona, we teach you if you do not like, or you can come with your president to Iran**. We show you how it is done.

No More Killing of Iranian Scientists - or withdraw knowledge from nation

In so many ways, we are proud to be a nation of scientists and developers of the new T. **I will not allow another single Iranian nuclear physicist to be touched or to be killed. Eye for an eye, tooth for a tooth. If one more Iranian nuclear physicist is touched we withdraw the knowledge from the nation who does it. (:50). And you will feel it.** you will understand what we are talking about.

Scientists have to be respected like Prophets - Bring change to mankind

In a way, **no scientist anywhere in the world has to be touched. Scientists have to be respected as the prophets because they bring change to the world of man**. In a way, mankind has to move up, and get out of the way of this dogma of wanting to be, but be part of, to be.

In so many ways, my **call goes to the American administration, and especially his Excellency president Xi of China, we are all friends and we work as one**, but knowledge in exchange for peace, it comes peace for every man on this planet, not between the nations. **Peace of mind that there is energy, food, and shelter on demand**. It's the responsibility of all of us to be responsible for all of us, irrespective of color, religion, or race and what we call, stupidity of making sanctions on the back of what we call, which doesn't exist anywhere in the U, except what we call, man's greed for power.

No More Kingship - No One is above another

In so many ways, today's teaching is very simple, we have opened a new phase of negotiations with all the nations irrespective of what we call political dimensions. We **expect one thing out of our negotiations, the new administrations in all countries have to accept that there should be no kingship, there should be no one above another**, but we work as one. We see the end of kingship in all the countries which have kings. A king can be a king in his own house, not over the others. (:52). This is part of the structure to come, no one is above another.

Work against us you damage yourself. It's you who is going to fall behind. As I said, the new administration needs total change for all of us. In so many ways, in the past times we always looked at who had the better gun to kill to be powerful, from now on we look who has the best T to serve to be part of. Serving humanity is part of the work of becoming .. part of the UC. The choice of peace has to be no choice ..

(:54).

Few weeks new Iranian administration - negotiated in background

In the next **few weeks Iranian new administration will come into power and with it comes the message of peace, exchange for T**, and enforcement of peace, and sharing of the knowledge with all the nations on this planet. **We have negotiated with those who matter, in the background and it's a decision we have made to make this announcement today**.

Time to End Killing by Americans - Offer new Knowledge

In **the Oval Office, you have one choice, make it an office of peace and white not from outside, but white from inside too. you've done enough blood shedding in the past decades and now it is time for it to come to an end**. We offer you that opportunity with knowledge and T. We invite world scientists to Tehran and at the same time we share the knowledge with all of you to develop different parts of it, the way we have done in eh KF. We show you the way, the development and the enjoying the fruit of it is yours, for the rest.

I have made this very clear to the Iranian new government. (:56). KF T is at the disposal of Iranian nation for the exchanging peace, for the betterment of all the humanity, and In

a way, to have a center, a place that we are proud to live in, the earth, where man does not kill, where man does not suffers from shortness of the essentials of life.

The Creator did not choose which part of the earth would have air, or less air, if it is a different color, or different race of people, or if animals are living. He is omnipotent, and He shares equal. And that will be the new way the Iranian nation, government will ?? . We share our T and with we take the banner of peace. .. we put our load down. .. Iran become the flagship for this T.

As **I said to all those who matter, join us, you benefit, boycott us, you boycott yourself**. .. it's time to bring the knowledge to be used correctly. .. no N reactors should be built, .. operated in the next few years, unless they have received certification from an Iranian N physicist and IEA that the system is befitted with G system for extraction of N material into the earth that it can be reused, and that it is safe for all of us. We don't make a shelter, we create .. an extraction system of the ?? fuel.

Current Rods are used to absorb radiation - Not effective - matter state

In so many ways, **this was developed by me at Queen Mary College, (:58). when we saw the rods to absorb N radiation if the neutrons run out of control. To me this was a funny way to do it**. Where we could have one thing that all could be ?? sensors, like smoke detectors. When you smell the smoke by detectors the alarm goes off. **When you feel and see increase in radiation, the field needs to be absorbed, not by a rod, which itself has shown to be not effective**, be it with Fukoshima, Chernobyl or the others.

Radiation absorbed by plasma fields

The radiation has to be handled by radiation fields, not by matters which loose control and get saturated. This T is the only way that the future N reactors on this planet should be built. The future N reactor for space travel has to be built, that we have access to all.

In so many ways, we have opened a new era in N T. **We are not interested in nuclear weapons, because there is no weapon to match the knowledge which we have brought**. In so many ways, you want to run a nuclear reactor in America, **ask your nation (if it) has the Iranian nuclear T for absorption of the radiation has been placed underneath of it, that nothing can happen to us. It's a safety guarantee**. You don't open a shopping center if it is not equipped with fire extinguishers, fire detectors and fire escape doors. You cannot build the nuclear reactors and hope that nothing goes wrong. It has to be a certainty that nothing goes out. (1:00). And nothing will happen to it. This is the responsibility

There is **no possibility of what we call China syndrome** with the new T. **As Pl it absorbs and as Pl in D of the stronger to the weaker, can be processed to the center of the earth to become part of the energy of the inner sanctum of the materials of the earth**. We bury the energy into dynamic magma of this planet. This is a T which we

have, .. which in so many ways has been hidden in many of the KF systems which have been marketed in the past few weeks and months.

In so many ways, we are in process and in possession of the T beyond imagination.

Iran will take lead in the peace talks in all the nations
(1:02).

.. Let us build on the nuclear industry the way it was developed by the Creator in allowing the U to be created. We are created out of the fields of the U, .. we can use the new understanding to create new D for all of us. Maybe for the first time we have laid our law down. We could not talk before, because we did not believe in the present administration in Iran. With the new administration and trust in the work of and the belief in eh Iranian scientists and Iranian leadership we lay out the new law. Science in exchange for peace for all mankind and not for one nation. And in understanding this we open our doors to all world scientist in

We look for becoming an active member of IEA for insuring standards for safety of all of us, understanding of nuclear Pl T. In a way, as I said to … (1:04). with .. we share our knowledge in exchange for peace for world ..

In coming time a number of new systems will be released by the KF. We have placed orders for the first transportation and transmutation systems to be built in our laboratories in Austria.

(1:06).

In a way, (1:16). purification of nuclear material gives us purity fo guarantee to be able to travel the depth of the space without diversion, explosion, and everything else which is possible.

We all came through Aryan Blood - Let's make One Nation

I stand salute and resolute behind the Iranian nation as we are all Iranian, as we all came through Aryan blood, so when we make as One Nation we are already from one nation. And it comes back to understanding what we call, Ahura Mazda. We talk good, we act good and we think good, and this is how we should be, because when we are at peace we do not need to do anything else. In the depth of the space we find the same ethos with the Universal Community. In a way, weapon T has come to an end.

In so many ways, in the coming time a man will be ashamed even why he took this path, but maybe we had to, to reach to where we are. As I said, we invite the world leaders to Iran ..
(1:18).

(1:20).

Thank you for today Ask your governments what is the guarantee

(1:22).

We become missioners of peace as KS.

Rick if you would like to go to a break (1:24).

>> BREAK >>> 389 KSW new Gans mask ad (1:31).

K- Are there any questions.
Q: .. what is K comments on Bill Gates and Warren Buffet wanting a new reactor, natrium reactor being built in Wyoming (1:32). I don't know if you know anything about that ..
K- As usual as you know we call Mr. Gates, Micro soft, is micro and soft. His mentality is very micro and everything else with him is soft. So we leave it to them to dream what they like to dream and let's see what he gets. You never know.

No Link between Quantum and Plasma Science -

Q: Salomea … what is link between quantum science and plasma science?
K- There is no connection.

People take KF Plasma T and put the name Quantum on it

A lot of scientists and a lot of people in the very recent past, even the quantum used to exist, they took the KF, and they changed the name to quantum, that it is not connected to KF. Chinese government a few years ago arrested a number of Chinese who did this, as a fraud. One of them, if you remember we had a guy who used to translate for us, Chaos, he unknowingly was involved with these guys. That they took the KF T and changed it to quantum and they tried to sell it to the Chinese government as a new T, and a few Chinese have tired this. And this has taken hold now, they changed the KF plasma T to Quantum, be able to bypass a lot of things. but gradually it's coming up and everyone is coming aware of it.

Singular Gans Plasma is already smallest Quantum

Plasma is what you call a Gans, is a single molecular system of Pl. (1:34). and we cannot go below that, and that is what quantum means, the smallest quantity. That's why this terminology was created from the beginning. So with the Gans plasma T you are a singularity, smallest. So you cannot go any lower so they changed the name, (but it's)

the same. **That's what quantum means, smallest amount of quantity**. They cannot be any smaller than a singular molecular Gans, or single atomic Gans. So we are at the quantum level. We advanced that much in T.
What's the next question.

Q: Gutaua .. I want to thank you very much for laying down the law. I must say that today's teaching is probably one of the most important that I have heard we keep getting better … (1:36). .. for global peace for exchange T, bringing about equality for all ..
security for scientists for all .. space T for all humanity
through sharing T I thank nation of Iran to bring all these benefits to global community .. We are told nations are developed by how many people they can kill in the shortest amount of time. Now knowing a nation is great by bringing about peace, is a great change and is good for humanity. I thank you very much for bringing this about ..
K- Thank you for all of us, (1:38). and in a way by us keeping the knowledge and T alive and delivering it in difficult and good times we have kept …
Congratulation to all of us ..

(1:40).

Any other question

Can Become parents at any age - Essence of life within body of man

Q: John Bliven, (1:42). ..
Q: … in the past you talked about the children of future being born outside the womb of the mother. .. Let's say hypothetically there is a couple who is 80 years old and they decide they want to have a child. the woman is a Chinese in English speaking, the man is Italian and English speaking person. When the child is created do they come out with the knowledge of 3 languages automatically or do they go through a growth cycle?
K- **What we have seen in the past in the U, the birth of a new cycle of life through the soul has no age limit. You can become parents at the age of .. 200. Because the essence of life is within the body of the man**. (1:44). So age in irrelevant,

(1:46).

John using 12 Off World beings as Reactors for Spaceship

Q: .. I have been experimenting with making a spaceship here in AZ ..

12 beings ..
(1:48).

K- What's the outcome of your test or is it something you want to do?
Q: It's ongoing
K- What do you see?

Q: .. there is a palpable energy field
K- what does that mean, explain.
Q:

K- Is the 12 people still there when you go into the field
Q: No, these are off world beings that I asked for support to co-creation a spaceship with.
K- ?? stopped your experimenting, now you changed your 12 MaGravs to 12 human beings.
Q: Yes
K- I understand what you are doing. And what is your result.
Q: I am trying to create this collective soul .. is even stronger than the individual soul . (1:50). .. how we will create our spaceship of tomorrow.

K- .. **when you go to certain points where this used to be practiced, now we see 12 statues. They used to be 12 people, because of it they made 12 months. zodiac the principle the same, collective center that if you get to that pivotal point**, you should be able to have the understanding of the whole 12 systems. If you follow it and can centralize then you can do anything with it.
Q: This was my feeling

Stonehenge Used 12 people then replaced with Stones

K- It's like the one we se in South of England with 12 stones (Stonehenge). We have had this for centuries if you understood it, you can put a reactor or you can put .. you tried this with MaGrav systems if you remember.

All 12 have to reach equal understanding - develop Pivotal Point in Center

In essence it is all the same, if you can get to the pivotal. If you don't find the center pivotal point, if you don't find that pivot it's very hard to understand all 12. (1:52). this goes back further into the teaching, Armend was there and other KS when we were setting up the table … in Exhibition Center …

Ball in Center receives energy and lights up

I put a ball in the center of this table when the first 7 KS came in, and I said, when all 7 of you reach the same understanding, this Gans ball will light up. Because it becomes the pivotal point of the whole work, it receives energy enough that it lights up. We have seen that in the lighting of the Pl balls 3 - 4 years ago in the teaching. If you put the ball somewhere slightly off center it won't happen, It has to be in the center, and it has to be .. equal dimension. If you make it 12 and feed it to the center than you can do it. That's what you got to do, I think you'll find ?? great communication ?? center of these people, be it physically, or being emotion, they all plasmatic ?? Otherwise you are always short of the others.

Crystal in Center - transfer emotional energy to light

Q: **Do you think a crystal could work in the center?**
K- A crystal ball?
Q: A crystal
K- **Could be, (1:54) . but you have to find out when the light comes up in that crystal. Is your crystal able to transfer emotional strength into physical D light**.
Q: I think most of them are, aren't they?
K- **Some are but not necessarily, depends on the purity of the crystal.** Many tests have been done by many scientists in respect to this.
Q: Well that's a big help
K- In a way you can do that with .. plasma lasers but it's very difficult to do that. If you find a mono field strength from 12 points at the same time, in one center is not so easy.

Have to become Humble enough to receive and give all the same

Q: Doesn't just by adding your soul, and each of the beings creating a new soul, doesn't that do it.
K- In a way, to do it … is to start from a level and become humbler and humbler and see when you get enlightened. That's the point that you match all 12.
Q: That's what I am working on, and that's what I figured the answer was.
K- **Yes, you become humble enough because you have to receive from all the same as you give back to all the same**.
Q: Thank you ..

Arizona Space Center - Biggest problem Biden Administration

K- **I hope we see you very soon at the center of research between American space organizations and the KF and the Iranian, and Chinese and the rest in AZ**.
Q: ?? when
K- Working on it. As I wrote to you this morning **my biggest problem is your administration**. We are laying the path for .. scientific walk, than a peace walk, we are trying to change the dynamism with science and T. Not with gun policy.
Any other question

Deep State involved in Pedophilia - Human Slavery most in history

Q: Thomas Switzerland, .. if I watch the situation (1:58). all over the world for the moment we have what I call … on one side the population the people all are nice and do work … on the other side .. have called the deep state. Now **this deep state is embedded everywhere**. .. I think the problem at least for me personally, is not the material forthcoming, or striving. or new financial system or whatever. but there is one thing **the deep state is thriving, and that is the trade of humans, the trade especially of children. Having like sort of factories producing children, then we all know what comes to these children**. If this comes to all the .. average people, that will be if they know what has happened to them, the last centuries, it will be a shock. I don't know how it will be absorbed. (2:00). We have at the moment more slaves from this ?? rate, then

we ever had on this whole world. It is millions of children, millions of women who are traded and bought, and sold, and mishandled, all for receiving a sort of substance, which apparently gives them, I don't know what it gives them, because I haven't seen anybody who finally lived for 200 years of these people. Okay I don't know how they are able to sort of use this. Where is the way to be able to stop this, because this is such a situation where everywhere is this terrible feeling of these misused souls. What can we as a whole community of KS, or every individual, what can we do to make sure that we assist in some way, that this can be stopped?

When T Comes - Sanction Nations on UN List for Child trafficking

K- Maybe I can answer you one way or other.. or collectively. You see **one of the first things we'll see in the coming time, is that up to now the sanctions have been on nations who have been advanced in T, or they have been accused of terrorism. (2:02). By bringing the new T to forth, and what we see to come, very soon we will see enforcement of banning nations, who by UN has been put as the key nation in child trafficking**.

Belgium on Top of UN List for Child Trafficking

The state of **Belgium is on the top of the agenda of UN. Every flight out of Africa carries 2 to 5 children under false names.** We have drug traffickers we call them donkeys, where they put cocaine and heroine on their body and they bring it. The embassies for this nation who produces passports for children under false name and put them on planes or men, and brings them into Europe, the fastest way. They have placed all sorts of things on this. The first focus once we achieve the position on understanding of T, is banning according to UN nations who are in child trafficking, and Belgium is the head in this through the ports and airports. Hidden reports were done by some securities some 10 years ago, which clearly states every flight into Brussels carries 3 to 5 donkey mothers, .. who bring the children, then are given 6 to 12 months visa to become prostitutes in Europe, and they go back ?? This we know and once we stop this child trafficking.

Members of Parliament - Check for Pedophilia

I don't understand why such a thing has been allowed and become the center of Europe. We have raised a question and very soon it will be answered. **All the members of European Parliament has to be clarified, (2:04). if the have or they had a past of pedophilia with them. This is very important**, why should the biggest nation involved in drug trafficking be the center of European countries. Every member of European Community has to answer. You boycott the nation for everything else, but not when you go and have your seat, and it's the biggest pedophile nation in the world. This does not end with England, or what you call Belgium, we have this in Dubai. In Arab Emirates you can go to a small town, a village and people literally women, adults sitting on the pavement, waiting to be bought.

(2:06).

(2:16).

Mankind

(2:24).

K-
.. The way I see it, this has to be setup by U Council, we are working on it within the next few months, establish proper legal structure around UC and Earth Council. It's their responsibility, (2:26). to find a solution through new understanding of T and science for these people.

Putting 10,000 people on UFO - Problems

You got to understand **we are putting 1,000 - 10,000 people on UFOs for deep space travel for hundreds of years, confined spaces**. When you put 1,000 people in the size of a football stadium after 3 weeks they get fed up.

Have to Solve Sexuality drive for space travel

We have **seen that in the trials done by the Russians in the space program**, even you provide them the food and everything, the sensuality and sexuality takes over. How do we set? When I speak about these things because we look at it from the KF space T point.

Controlling Psychology during space travel

It's not just getting a man to space, it's feeding it, **understanding its psychology not for him to commit suicide, not for him to do anything wrong** All this is part of the T. When you build a city you think of a hospital, the train station , the bus the fuel station. In the **space travel of the future we have to look at the psychology of the man, and how we control it. That is normal, we don't end up half of the spaceship raping the other half**, ?? half of the children. You put one Belgium in the spaceship the whole lot will turn up. This is what we have to stop, to change in the process of the STM, the new understanding.

Other Races in U have problems like human race - have to solve

Q: We have no idea here what other, (2:28). forms of life, how they act and react, and have reacted over the past millions of years. We have a lack of knowledge in how to behave in such a huge surrounding, and as long as we are not able to communicate with other life forms, or humanoid life forms who tell us how they have solved .. their problems. .. it will be very difficult on our planet.

K- **We have a problem in every race in the U. It's not that they are all angels, and the human race is all evil. Each race, each structure, each cycle of life, each level of life has its own, what you call, ways of, what you call a problem, what we call a way of working**. It's not all hunky dory because they have everything. The problem, these kind of things exist across different ways, different races in the U. **It's not a peculiarity specifically to the man** . But we have certain problems which have become ?? naturalized and put together by man for that purpose.

Center of Pedophiles Rooted out of KF

For years they start telling me, why Mr. Keshe always speaks about .. We don't need to speak, **in the past 12 months we have found out the root of why KF was targeted by pedophiles, because we were told lies and now, through our research in other things, we found out they were all lies. (2:30). KF was used deliberately for this purpose**, and they accused us. We came up with legal documents, no accusation.

Q: In your opinion, when we start being able to travel through space and we start to reach other civilizations, will that be the beginning of finally we can come out of this cocoon we have been in for .. 5,000 years, since the last ice age. ..

.. will it be possible that these people going out and coming back to tell us .. .learn how they tried to solve their problems … ?
K- I think the time will tell you this. We are not all bad with everything wrong with human race, we have a lot of beauties, (2:32). that they learn from us.

It's not just "Sick" People - Human Race Agrees to go along

Q: ..
But it is these ones, these sick people, who sort of ..
K- You see, let me explain to you something. **They ?? are not all sick, very few have. It's what we accept to do. Do you understand. It's what we accept to do. It's a big difference, and what is known (normal), .. we have made it known, (normal). Being alcoholic is a norm**. You know what they call the **Vatican Guard, the Swiss, gay club**. If you are not gay you cannot be part of the Swiss Guard in Vatican. So **were all the Swiss Guards born gay, which I don't think so. Was it a position of getting to do something. We have to create a condition, it's not that being gay is criminal, it's just the way we change. The way people accept the change.**

We Accept Killing to be Normal

We accepted killing to be the right thing, we kill because it is .

No More Nuclear Superiority - Peace Bomb

They forced us, who has a nuclear weapon is a superior power, even though they are bankrupt in their accounts. If we would run a country …

but now we are not afraid anymore. From today we have a solution. You put a nuclear bomb, we put a peace bomb. We put an absorption gravity system on, useless. (2:34). We are not afraid of nuclear T anymore.

This is why for months and years that I say Iran is not interested in nuclear, because we don't need ?? T which we are prepared to share now. We open the books. So what we are afraid of, and what we don't like, and what we would like, has to be all put, accepted by us as a human race, to not be behind the windows and doors. Talk something in the front and do something else in the back.

Man's inclination towards reproduction, we call it sex, is so strong to be produced that it cannot be stopped. And what is going to happen in the space. Or do we put an age gap or position of people who kill, position of people who see war as the, . kingship. What we saw in US last 12 months, killing a man live in front of the cameras, just because you are white and you can stand on somebody's neck. Do you know what would happen if you do this reverse?

Why are the Chinese getting intimidated and beaten on streets fo America because Corona came from China? Didn't an American and Canadian scientist develop it? We ?? do not get the Canadians and Americans.

This animal behavior of destruction has to change within the STM. We are about to happen, we are about to change.

Pedophile Center in KF Uprooted

But what you touched today is something we struggle with in the KF for years, (2:36), and we'll see uprooted. The pedophile groups within the KF lost their pivotal point. the key person is gone .. .

Q:

(2:38).

(2:46).

Butterflies Designed to Elevate the Soul - not just electromagnetic Absorption

Q: Salomeaa, (2:48). about the T of **butterfly against electromagnet radiation. Can we make in our house, and what are the benefits of this T for health**. ..
K- **The Butterfly is not just what you see, .. it carries specific materials which is developed. People say, this is a Gans of CO2. No it's not**. As we … just because it's ??, it's not CO2. **We have developed these mixtures and T in a specific way, that it interacts, it absorbs and we have tested it**, we see the results, we know what it does.

Butterflies are Hot Sales - add 3 full-timers

But as usual we keep these things as part of the structure of the KF work to interact with the plasmatic fields. Actually **we have so much order on it**, that more or less now, we have full time work just to produce these, **2 - 3 people full-time employees are involved in the production of these. It's effective and KS around the world are ordering it in huge quantities**. We have automatic machines working just to make the winding, but that's nothing, anybody can make anything. It's the T and what we do with it. What we put behind it, and what it is developed for KF.

Not Same as Infinity Loops - Butterflies Penetrates deep - elevates the soul

I developed this myself and I know exactly what it does. It's not just the electromagnetic fields, it elevates the soul. (2:50). This is the beauty of it, it penetrates deep in .. what now is .. now it is a full time job for 2 -3 people in KF. We know the way it is going in next few months, we'll have a structure just producing this in the factories. Because we **asked people feel good with it**.
R: A lot of people have made the figure 8 out of N coated Cu wire, but this goes way beyond that in terms of the field interactions. ..
K- It's not just the field. it's developed for the usage and the elevation of the soul too. It has a specific characteristics to it.
A number of these will be brought to the conference in Bucharest this weekend, we are bringing for KS, and hopefully we'll see the expansion of the T to understand more of.

KF Universities Students involved in R&D and Production of units

We are set out for the first steps for the development, delivery of the first transportation systems. They'll take us a few months to complete, and the same is with all the T which we release. **One of the beauties which the university which we are setting up we try to have a manufacturing part of the KF inside the university .. the students work inside the production, development and researc**h. (2:52). Then t**hey see the whole spectrum that when they go to their countries they understand everything** is not just a piece of paper, reading. If they develop a T for space lift and motion. They go in the research lab completed, and they go in the factory and they make it. We try to make a position that by working in the production line assembly and development, the KS as students learn everything about how to be, how the process is done. It's not just coming here learning and go. It's is done for different aspects of the T, be it space, .. agriculture but we'll see how it takes place, but the **next few weeks we'll make an announcement if we succeed in what we are trying to do. Somewhere by 2022 we will see the first fields of open university, after opening of Tehran**. We expect to open the universities on the space T before world scientists in Tehran in the coming months and this location in Europe will give us opportunity that we don't need to travel, we can work near home and learn .

Testing Gans with your intentions - Don't say it's accidental

Q: .. How **can I test with plasmas or Gans's my intentions, and understand the reactions**
K- **When it happens don't say it was accidental, how come you just an accident, believe and understand you have caused it, that's the best thing**. (2:54). Because a lot of people, we have no meters to measure, we hope, we wish, and it happens, and it's all accidental. How come it didn't happen till then, and now it is accidental. It's your own disbelief in your own belief, which causes you problem. Strengthen it the right way, it will come the right way.

Children of the Soul - Both parents have to give totally the love to it

When you have a child born through the soul, it's the mother and father who have to give the totality of the soul to it, not half measure. You will get a physical child, if you as parents put the soul into it, and create it through what I call unison of the souls, when it came in, the soul inside the mother.

You get the soul of the child, you don't need to go through birth tunnel.

Relationship has to be total or it will not happen

Then you'll see the difference. As long as you got a split, "I am not sure if it is there," you go through ?? unsure, because you are not there. **As long as you are half committed to the relationship, don't expect to get a child from the D of the soul. It will not happen**. Because you got to understand **the soul in inside you, he knows you, you cannot lie to it**. This is the difference between the children of the soul, and the children of the man.

The children of the man, 9 months comes out, that's it, you've got it. Children of the soul are created out of the soul of both parents. And **it has to be 100% sincerity and love for it to be created by both, because she doesn't ?? want, it's not in there hidden just (2:56). to the mother. It has access to the soul of the father and the mother**.

This mankind has to learn the new way, otherwise you still give birth to the physical child. These are the part of the progressive development of the man changing from animal behavior to universal behavior. Sorry we don't have any mops and delivery rooms in the U. **If you want to give birth to your child in physical D stay on earth, because you have everything in the delivery rooms**.

You Create the Soul and It will deliver itself in physicality

If you understand and you **want to progress to the D of the creation**, in the understanding of work of the U. **You create the soul and the soul will deliver itself according to the love of the both.** It needs a lot of understanding otherwise you still behave like humans, and they still give birth like animals, a lion does the same, as does the lamb.

This time all 3 have a say in the Birth - Mother Father Child
Man has access to his soul to elevate to that point, then he has to be equal to both. **This time 3 have a say in the birth**, not 1 just because he holds the child.
Any other question.

Feeling Bored in Space - return to earth - but leave again

Q: .. **Will we feel bored in space and will the human feel the need to come back to earth**?
K- What **we have seen in the humans who have been part of the space, they come back, but they soon leave**. (2:58). It's not that no humans have never been to space. 2 or 3 ?? reverse back to them ?? first of the condition of ?? condition of mankind. And the other things is what we see, as what I call **the "working," which we don't need to, and killing to eat, destroying to exist**. And most of those who go to space and have been part of the human race, they've been once back, but they never come back, because they have seen a different D of life. Mankind will become that way. We have and we are evolving.
R: if we had some sort of job in space ..
K- We don't need a job
R: Some service let's put it that way.
K- Oh, there is a lot of things to do in the space. There are no factories ..
R: You'll be busy doing something or another, there won't be much time to be bored. But I don't know, maybe on the highest level you ?? maybe you could get bored, there is not enough friction for like the ole saying … "you're not married? What do you do for aggravation?" Everyone needs a little friction in their life to keep the blood going.
K- … How come they say, a marriage is so bad, the married man and single man both die about the same time. (3:00). We don't have unmarried men or women living 200 years and married ones a hundred years. It doesn't matter if you are married or not it's all the same.

Q: How do you perceive the MaGrav in Romania ..
K- I don't understand.
Q:

KF Conferences help bring the forces to the next step

K- **As usual we attend these conferences, it's part of strengthening and sharing knowledge … every time we have had a conference somewhere, we have brought the forces to go to the next step**. … we saw it with the Brazilian conference how it changed the Brazilian community.
R: ..
K- We go with an open soul, we go there to change .. for the benefit of the nation. There are people coming from other nations in the conference .. (3:02).

Anyone who attends these conferences, especially in Romania, (3:04). or Linz or other places, we take enough Gans's with to help support you, if anything happens.
Any other question.

Q: .. what do you think about the child of the sun, .. he says, the Plasma is my sun, I am the child of the sun, I am the girl of the sun, I am in love. My name is Virginia, it's difficult for her to speak English, but she tries. I was dancing with Mr. Keshe, I love that, do you remember with me my soul with you. ..
K- I have been dancing with a lot of people recently ..
It's beautiful to understand these things, but we are all children of sun, (3:06). which is our soul. So we are created from the sun of our soul. So in terminology yes, we are children of our sun, which is our soul child, that reflection of it is us. This is how we come to the time and space of where we are and who we are.
R: .. relationship between sun and earth. how we are on this spaceship now zipping though space, we take it all for granted and we just go about our lives …
it's a miracle basically, The sun gives so much to the earth, earth gives back .. should we not be paying back in a more concrete way. IS there anything we can do as humans on the in ..
K- We can't become Sun worshippers and everything to give back. ..
R; Is there any appropriate emotional response someone can give back to the Sun?
K- .. We have seen in the U, where people have reached the point of absolute detachment and devotion, (3:08). they become within the D of their existence the Sun themselves that they radiate back. Every single soul has the capability to become a star. This is what is going to happen to it when it leaves the physical body anyway. It depends how much you get rid of the weaker strength of ?? for the stronger which is the Sun to appear. So we don't become Sun worshippers, but we understand the Sun is within us. If we can strip all of it off, our soul can be bigger than the Sun, because that's how the Sun started.
R: Then we could actually feed the Sun if we became larger ..
K- We become .. it doesn't need to be larger, you have to be deeper strength. Don't forget even the Sun has the condition of matter state too. It has reached that level, that's why it's there. If it can become ?? us, our soul which is a sun, in the strength becomes the state of us. reaches matter state much faster, because of the structure of the brain. I explained this once in a very simple way to children in a classroom, maybe it's very similar to it. You know you .. you are a teapot and you put hot water in it, and you leave it on the table, after awhile it cools down, because it gives all of its energy out. If you put a heat in it to continuously keep it boiling, it gives all the heat, the room becomes warm, because the heating heats the water, (3:10). body and then you become a central heating more or less. But what happens when you put that teapot and you put some blanket on it, cover it? It takes longer, it releases the energy slower and then you have a longer tea. It's the same with us, we have a physical blanketing with our brain in our sun, the center. So we cool down In so many ways, faster rays in smaller distance, container and we call it like a blanket. Where the Sun actually has no blanket, it radiates all the way through its own structure. And this is what the difference is. The brain of the man and the Sun has a gap of few billion kilometers, where the soul of the Sun is in the center, and the STM is . we still shine. When you go on the Sun and you look at the man, and you can see the STM, that soul still shines, the same as the Sun. It's no difference. If you put H on top of the

Sun you create more, the blanket which is the body of the man, the brain of it. Still inside it there is a sun and it shines. As I say in one of the intros, 7 billion stars on this planet and more. If you can see beyond the D of physicality, this planet is a shining sparkling stars of billions, trillions. You just don't see the STM, you see the ants, which man is not aware of, it has a soul, it still shines. (3:12). You see the spider in the ceiling it still shines ..

Any other question

Q: .. Sometimes I dream in Romanian, Italian, or Spanish ..
(3:14). .. why do I dream in different languages not of my Romanian mother tongue .. ?
K- It's a combination of the interaction of the desire as emotion. If you lived in a community of .. different language than your birth
The language of the brain changes, so people have. They speak Spanish without knowing , they never been to Spain, but they understand it because it is the emotion of the language. It's how you perceive it and how you want to receive it ..
(3:16).

(3:20).

We opened our patents and you requested to share. Now we share more and this time you don't need to request but it is there on the table in peace for all of us to share. We asked the American administration in the past 24 hours to listen to today's teaching, and this goes directly back to the Oval Office, your Excellency President Biden, you are invited to Tehran, but on the banner of equal, not by the power of gun policy, but by the knowledge and T. Thank you very much for today, hopefully we see you next week.

R: 389 KSW (3:22).

END

390th Knowledge Seekers Workshop; July 22, 2021

Cup of Universe; Feed yourself in the Universe
How Emotion is created
Pressure from pharmaceutical
How to make Cup of Universe
Create Field of Emotion in center (not CO2)
Explains Salt Combination of Na - Ca - Mg - K - Silicon
Our blood transfers our emotion to the brain
Galvanized System used to Create Energy - Sugar feed ourselves
Cup Covers every aspect of Life
Live on the Moon
Feed and Elevate both Soul and Physicality
Everything is here in this MaGrav to Create the Brain of Man
Why Mankind has Diversity features - understanding - Energies
Soul Controls all without interference - Billions of Years to Develop
How Life started in Central Africa
Salts - What Mg - Ca - K - Ph - S do
You Got the Pill not to sleep for centuries
Cup of You - man shall not die
Key to everlasting life - repair physicality - go back and forth
To absorb energies without killing - Expand STM
All the Salts are in this Cup
Plasma does not just only flow in wires - only preferential
Power Supplies batteries become part of plasmatic condition
Matter State is itself a weak state of plasma
We got another 12 days to the what I call process of peace time
You create your own position in space between here and moon
Send Plasma Package ahead of spaceship - Tune spaceship to that position
I discussed this with Lockheed Martin people
Can move the emotion from Brain to another Destination
Create a Position Outside of Mars - to check it out first
Negative Oxygen - According to KF Plasma - not chemistry
Negative O absorbs fields not needed by body - like black hole
Creates motion in fields for body to absorb more from environment
KF Work uses similar words to matter science - creates misunderstanding

New Generation Air EU and Butterflies Extremely Effective
KF TV will make full demonstrations of T and new kind of commercials
KF Sales has new Advertising Campaign coming up
KF has equipment to make specific measures - You can see and measure
Butterflies can absorb - if harmful fields from LED
Using Salts from Cup of Life - Have to understand what Salt carries
With Sea salt you get everything on planet - good and bad
Sea Salt game can be dangerous with plasma - depends
Whatever you have in Sea is already a part of You Evolving
Body Management Crisis Control - Allergies show reaction
There is only One Way to connect Cup of Universe
Farsi Website launched - Cornerstone Worldwide Internet Work
Iran will be Central Online Control for Enhancement Units - 24 hours/day
All these systems controls, will be moved to Iran
Moving away from "Microsoft" Structure that can be controlled
Fiction Writer mention KF T in book - Ok, but give credit to KF
Iranian Corona Report becomes best seller on Amazon
Cup of Creator - Mankind not yet ready
Cup of Universe open to Space Agencies
American Administration says NASA must first reach level of KF to collaborate
Peace Talks Dividends - good for space agencies
Russia and China most advanced Space Agencies
Von Braun .. one of the key people in murdering many, many scientists and Jews
The Americans paid 10 billion to the Russians how to land on the ground
NASA makes lot of noise - at moment NOT a space player
Glass for Cup of Universe recommended

ENGLISH TRANSCRIPTION

(:11). K- .. We hope we can add to the knowledge in a very beautiful way today. As we said, we are working in 2 directions, one creating a new condition for space development, and the other trying to make life accessible and easy for all of us in every shape and form. Last week was a beautiful teaching and progress for us as what we expected and what we commit to many governments in how the KF will see and how we'll develop.

We had a wonderful 2 day conference in Bucharest in Romania, and it's amazing to see how Knowledge Seekers (KS) have developed and extended the knowledge. The scientific achievement, the scientific progress in a way, in delivering new technologies, new understanding, it's beautiful .. we gave the T freely and the KS in response are teaching it, working it freely to extend the knowledge of the others. We had a beautiful meeting with representatives from Bulgaria, Romania, Russia, and this gives us indication that the T and the science is in progress.

The spreading of the knowledge is exactly how we envisaged it, when we released it to be in public domain and for what we see and what will come, many new technologies will emerge, (:14). from this T. Everyone has taken the T into their own level of

understanding, they have developed it to their own level of understanding, and they are progressing it in the same way.

Where **we do not expect to see .. that the knowledge and the T will disappear. It's well rooted, it's well tested, and KS are extensively pushing new boundaries** to see where it can go, what it can do.

As we said, we are pushing in 2 ways in the KF, one teaching in public and one pushing the governments to .. join us, and .. to extend the T in different directions and dimensions.

Teaching Starts:

Creation of Emotion

Today's teaching goes back .. to bring the T into a different dimension (D) but in a way that you all know. We try for the first time to bring the **process of the creation of the emotion. Bring in the process of creation of the Soul of the Man** (STM), and understanding of one ?? or the other. This is part of the extended teaching which will come.

We taught you for nearly 2 years about the soul. We taught you for years about the creation of the Soul of the Physicality (STP) and the STM, and then in the background, (:16). we tipped it a little bit forward. We tipped it forward by the introduction of the Gans's. We tipped it forward by introduction of the Cup of Life. We introduce to you the structure of, in a way, the 5 Cup Stacker. Now today I introduce you to a new D which brings ?? both to reality. **The purpose of today's teaching is for you to see another D**, something you've known, but now it is put in order in a way, that you saw the what we call the 5 Cup Vertical system, the Cup of Man.

Cup of Universe - Change many of your lives

Now I would like to introduce to you what is known as a **Cup of Universe**. The reason for this is multiple. I know for sure that many of you will take it further than it goes, because you ?? according to our work we've seen extended the knowledge. But today I will introduce you to something very delicate and very simple, but needs a lot of understanding. **This if understood will change many of your lives**. If not understood is another thing you make and than you play with, and then you'll be amazed if something happens.

CU to make you stop Killing - understand creation of Emotion

The Cup of Universe (CU) is simple, we try, step by step **to make you independent of killing, to consume. We make you to see, to understand the creation of your emotion**.

Bring STM and STP together and to Elevate

We see you to understand what it means to **bring the two dimensions together**, (:18). in the D of STM and STP of the man. If you go back and look the **body of the man is a combination of the STP and STM, and interaction with what we call the Inertia of this planet, and how it comes to become contained**, and how it becomes to become to be held in the containment of itself in the D of elevation of STM with STP of the man, and from there on many, many other applications and implications of this T.

Reason - Pressure from Pharmaceuticals

The reason we are teaching this is pressure from pharmaceutical. You will understand in the coming time what this means.

In the process of the development of what we call Cups of Life, One Cup One Life, and everything else, we taught you step by step to take a new D, a new direction, a new understanding and we guided you in a very simple way in how you could extend the knowledge, how you could bring the totality together. In the body of the man, we have always seen as we said before the extension and intention and application of the T in an appropriate way where mankind accesses totality.

In so many ways, once we start playing the games of the creation it becomes very, very interesting how things will change. (:20). How the games will become in a different way, apparently. If you go back to the what we started with, One Cup One Life., where creation and understanding of the materials, and then going back to the Cup of Life, creation of the soul, and then creation of the STP, and then going down to everything else to be the GM fields in the Cup of Earth at the bottom.

What you should have understood and done by now, which no one has done is this ?? that in a vertical section. What does really represent the man in totality. The teaching of today is extremely simple, but will bring evolution in the world of the science, in the world of medicine, and in the world of food industry**. In the space you do not carry medicine, .. water, you do not carry food, but you carry the STM. So it's time for man to start, to go through what I call pre-training, to become man of space**, to understand the process, to understand the gravity of the creation of life.

So the mankind if you give him a cup, **a Cup of Universe** has to look in a different way, and has to understand the totality of existence, his life on this planet. What do you have? In this present time, (:22). you have in your knowledge, a number of what I call elements, which you have privilege to use, but you have to understand too. You have CuO which comes from copper oxide, you have on the other hand …

How Cup of Universe is Made - Use Spirals

CuO and you have the ZnO or what we call Nano (N) coated Cu, and N coated Zn, This means N coated for those of you who understand how we abbreviate. You always had a

Cu N coated and a Zn plate, when you put a **N coated Cu in a spiral shape on a Zn N coated spiral shape**.

Create field of Emotion in center - not CO2

F**or the first time you create the field of emotion**. (:24). **Where in fact, in the center of this field sits the STM. If you remember when we N coated and created the spiral, we entered the dimension (D) of the multiplicity of the field forces**. Here you do not create anymore CO2, here in conjunction with other factors in this Cup you create emotion, you create condition to change, to strengthen, or to bring in operation the STM.

Have Fe of Blood and Gravity of Planet

But this is not so simple. The body of the man has another part, you have the Fe, and you have **Fe in the D of the blood .. but you have Fe in the D of the gravity of the planet too**.

In so many ways, now the body .. needs processing, needs D and direction, needs to be able to interact. So if you have understood the process of the creation in a very simple way you have understood the process of where you put, (:26). Zn in Nano coating and Zn without N coating. But now it's the multiplicity of the application and implication. Then you have to do the same, you have the what we call, the Cu and the Cu as a state of, part of ??

Spirals are Interaction of Fields of Soul and Emotion of the Matter State

To make it clearer for you I'll put this (Zn) in a spiral. Here the Zn and Cu are in a natural state, and not in the N coated state. **Where the spirals indication interaction of the fields of the soul and interaction of the emotion of the matter state of the existence**.

Need to have a Source of Energy to Survive

In so many ways, now you have life, **you have a structure of the life**, but you have not committed life to its ?? next extension, which means to **have energy to multiple, energy to be able to survive**.
Galvanized system for creation of energy - sugar - CH3

The condition of the creation of the multiplicity of the energy comes through 2 things, you have the what I call **the galvanized system**, which you have, you need these 2 to create energy. (:28). **The sugar the CH3, and this gives you 2 dimensions of energies**.

Need Salt Combination of Na - Ca - Mg - K - Silicon

In a way, if you understand it, you have **a structure which gives you everything you need in the depth of the U**. Everything which is needed to contain and ?? grow for man on this planet. But there are a number of factors which you have to consider in the

process of creation. Up to now you **always used Na salt, but life of the man has more salts, has more combinations (Ca, Mg, K). For this Cup to work you need to find the right combination of the Na, K, and Mg, and Ca salt**. It's not anymore just the salts you produce this Cup has to contain what man relies on in every D of the life**, including Silicon**. Now you have a man in a Cup, not man in 5 Cups. Now you come to understand the totality of the structure (:30). of the life in the D of the existence of the man.

Everything we Taught you is in this Cup

In so many ways, **everything we have taught you from the beginning of the time of the Gans T is in this Cup**. Everything which effect the life of the man in **the D of the soul and the physicality is in this Cup**. In so many ways, for the first time we can find the position of the soul and the STP. If you look in to this structure you'll find out, you'll find a collection of the collection of the CL, collection of the Cup of Man, the Stacker unit -- all sits in one Cup.

Fe in G of Earth and Blood - N Cu and Cu with Blood Creates Emotion

In so many ways, mankind has to understand this to be able to move forward. Let me explain to you what you have to understand. If this **(Fe) N coated spiral represents the G field of the ?? earth. If ?? this as an Fe itself (non-Nano) indicates the creation of the blood, in the presence of, (:32). Cu N and a Cu** (non-Nano) on its own. But at the same time with **the Cu N, with the Cu itself, with the presence of the blood, it creates the condition of emotion**.

Where our blood transfers our emotion to the brain.

The interaction of these 2 fields (N Cu spiral + N Zn spiral) on each other creates the STM.

Galvanized System to Create Energy - Sugar

You need the galvanized state, what we call films in a spiral and a non-spiral to indicate and create the condition of creation of the sugar, energy. Where in interaction with the N Cu it brings the D of the soul to the energy.

Energy of Emotion has itself Emotion - Why thoughts lead to cancer

We never had this before. **Mankind never understood that even the energy in his emotion has emotion. This is why the energy of the thought leads to creation of cancer**. The energies of thought, emotions brings love, care.

Cup covers every aspect of Life

In so many ways, when you understand the structure of this **Cup it covers every aspects of the life**. In the process you have to understand how you create conditions. How you

manipulate the position and existence, by changing these to another D, in the G field everything else will change.

If Fe is not G Field Force of the dimension - Physicality have different structure

Will allow you to live in a new D, (:34). a new place in the U. **When Fe is not the G field force, strength balance of the M fields that could be Zn, Cu, could be Plutonium. Because in essence connection to the position which change the structure of the man**. In so many ways, mankind will come to understand a combination of life, a combination of understanding the exact position of being in essence of existence.

If Nano Coat Galvanized - Totality of Soul of Emotion - become Complete

If you move to the position of **N coating your galvanized sheet, then you come to create the totality of the soul of the emotion of the energy, which you absorb. Which means now you become complete**.

Elevate STM by creating fields in center - create emotion in soul

In so many ways, everything in this Cup, brings every D and direction in life of man. You can **elevate the STM if you know how to create fields in this area (center**) that allows the man's emotion to take the position of centrally or what we call the soul.

With this Cup Mankind will be Complete - can absorb everything in Unicose

In so many ways, if you understand the gravity and the potential of this system, in time to come **mankind will become complete, and be able to absorb every energy within the structure of the U and Unicose**. (:36).

Cup of Universe - Billions of Years to Develop - Key to Life in U

What's on this table, what you can see**, has taken billions of years to develop**. I am sure many of you will try to do it in 5 minutes and make every accusation as your brain is as small as your ?? Understand this, **work with it, and you will find the key to life in the Universe**. Work in the direction of **transmutation of energy, you'll find how to travel in the D of the STM, then in UFOs**.

Solution to many Illnesses and Food

In so many ways, in totality you create .. the **existence in 1 D. In the essence of creation you will find many answers to many illnesses, solution to food, to ?? , solution to understanding the totality of the life** and the creation.

Extend STM and STP - Decide how you want to manifest

In so many ways, if you understand the extent of the fields and the power in these systems and in manipulating them in the right way, **you can extend the STM or the STP of the man. (:38). It's you who will decide how to manifest**. A Cup of Life in the D of universal dimension. In a way, if you understand how to make this combination you will come to understand, you have the capability to do many things which has never been available and understood by humanity.

Find out Truth about how Physicality has taken Shape

In understanding the totality of the work of the U **mankind will come to understand the truth about himself**, .. his life, **the truth about the way his physicality has taken shape**. And the way mankind will go to move forward ?? takes a lot of understanding.

Nothing comes from outside - All within ones Environment

In the process of creation everything which is available becomes the source of elevation and creation itself. **Nothing can come from outside, but the entirety of the life sits within the structure of the existence within the environment**, which is available and has been made condition, on what is available.

Live on Moon - Adjust to mixture of Fields moon is created out of

You can **move to moon and live exactly like you have done on earth if you can adjust yourself to the position and the condition in the mixture of the fields of the U, which have lead to creation of the moon**. Otherwise, life becomes imprisoned on what we call the village of earth. Understanding of the T is the beauty, (:40). of the science of creation.

Process to Elevate the STM

What you see on the table, **what's on the table has been here for past years and years**. But as you have not understood the process of creation you have not understood the process of the elevation. **How to elevate the STM**, .. the understanding of the man in the process of the creation.

Make Cup with pure Intention - You will see elevation of STM

Be wise, very wise, and do not jump and make these as you might not get what you expect and you might regret in what you do, because you do not see what you have aimed for, because you haven't understood the totality of it, and **your body and your soul decides otherwise. When you make these Cups it has to be with a pure intention**. Make these Cups with the wrong intentions and you will have a Cup with a piece of metals in it. **Make this Cup with the pure intention with what has been asked to be, to become and you will see elevation of the STM**. We don't expect to see miracle, because that is exactly what you become, the miracle itself. And then we cannot see ?? Understand the process, .. creation, .. everything which is needed and how it's

been positioned, and how it's been mixed, .. in one sense or other, (:42). through the process of what I call creation.

Cup of Universe - For whole Universe not only man

The Cup of Universe is not for the man alone as it has every .. physical entity energy, and field movement to lead to creation of life anywhere in the U, irrespective of time place and position and field strength. If you can create combination of mixtures of fields you can create life. **Life is not exclusivity of this planet, never been and never shall be**.

Use Cup to see how Man will be in other environments in U

But we have to **understand how life of the man will be in different environments of the U** as other lives have taken shape according to their environment ?? of their existence, their field interaction. The field strength, the combination of the motion of the field and the fields of the environment, then you will understand soon, how life should look, **how you should be able to see yourself once you arrive at the position and the destination**.

It is so Simple but yet beyond comprehension of man

The teaching of today is very short, but the knowledge of it is beyond comprehension of the humanity, but the pictures of it, so simple. The simplicity of it, we have brought you the most advanced knowledge of the creation.

Feed your Soul - Physicality - Elevate both - Understand Emotion

In so many ways, **you can feed your soul, .. your physicality, you can elevate the STP, .. STM, you can understand the creation of emotion, and altogether, (:44). how creation has come about to be on every corner of this U. Maybe today's teaching will bring you a major breakthrough in understanding**. Maybe .. will allow you to understand more in the totality of the life and creation.

How Do you Connect it - Left to understanding of man

Many of you have been waiting for one thing, and I am 100% sure many of you, as we say in English, your palms twitching. And asking your self a question, "**how do we connect this?" I leave that to the man. I** leave that to the totality of the structure of the understanding of the man. And in totality if you understand it, if you understood the combination of the work of it, you should have been able to understand or comprehend, (:46). the essence of creation.

Everything is here in this MaGrav to Create the Brain of Man

In **this MaGrav everything which leads to the creation of the brain of the man, exists here**. If you have not understood it, I draw it for you that you can see. This will explain to you a lot if you understood a lot. ??

For example, if you look at the **structure and the setting the STP on the right leading to the left and the heart. There are many combination of the work in this diagram**. You got to understand by re-positioning (:48). any of these in different positions and different dimensions you change different factors.

If you remember for example, if you had a system which you introduced ?? specifically, N coated Cu, and ?? or N coated the wire, **in a specific salt condition with the presence of Zn, you remember what you got, you created blood**. The blood which itself receives in this combination energy.

Combination to receive nourishment from Plant Life

Now you understand. When you put a N Cu in this condition what do you receive? (:50). So your **Cup has an energy, and energy of the blood and a cycle to expand. When you feed this to a plant and you take this D of totality of the interaction with Zn and in presence of Mg, you receive the nourishment of the vertical people of this planet and the G field strength of the planet dictates it, according to the Mg level**. In the presence of the energy fields of the circulation as a basic sugar.

Cup has Millions of Applications - Combinations

If you understand **this Cup has millions of application and implication and it depends on every way that you can combine,** you can position.

Insight Why Mankind has Diversity features - understanding - Energies

You can **N coat, and then this gives you an insight in the D of the existence of the man, and why mankind has a diversity of the features, comprehension, understanding, and energies**.

Soul Controls all without interference - Billions of Years to Develop

But **your soul controls all of this single handedly, without interfere from anywhere. This process has taken billions of years to develop, (:52). to balance out, to be able to understand the totality** of .

Your Amino Acids start creating life

You need to understand the process of creation, the process of interaction, .. elevation. Go back to your 5 Cups and come back into this Cup, 1 cup, and you see this covers every aspects of what it is in the, what we call, "the Cup of Man," and addition to Cup of Universe. In this process may of you will learn new D, many of you will learn new

understanding of the totality of the work of creation. **Those of you who will ?? live this Cup to be, will not be surprised if your amino acid (AA), start creating life**.

This is how Life started in Central Africa

In a way, if you look at it, we said before, that the **life started in Central Africa on the east coast side, and it started in a lake, in and above where everything was ready, in a condition and a temperature was perfect for a continuous sustaining life condition**. This is the ?? hub of life in central Africa. (:54). **This is how life started**.

What Mg - Ca - K - Ph - S -- does solidification bone cell division

You got to realize when you add what we call, galvanized plate you have your nickel, you have every materials included, so you bring as part of the plate into it. When you have the **Mg, you bring in the solidification of the condition**. When you have **Ca you bring the essence of the creation of the G field, for creation of the bone structure**. When you have **Potassium you bring the condition of the division of the cell**, and in that process brings in the combination of the interaction of it, its own **Phosphorus, and its own Sulphur, which one will clean it, and one will give it the backbone structure of the DNA**. In the process of understanding it, it will bring the life anywhere in this and on this planet.

Gift of creation of Life in U - You have to find out how to connect it

In so many ways, I have brought you a gift, a **gift of creation, a creation of life in the U**. It's **up to you and according to your understanding** what you do with this. (:56). The **only thing I am not giving you is how to connect** it. How to create interaction with the dimensions of ?? creations of what you need, and what purpose, and what condition.

You Got the Pill not to sleep for centuries

How you stack this, in the condition of the life of the man in the U. **I hope many of you will have a beautiful, peaceful, restful time, as I know ?? that many of you who are the KS, have just got the ?? pill not to sleep for centuries**, as to find the combination of the interaction of these fields and what they can do and what they ?? do.

Cup of You - man shall not die

But there is **one secret in this Cup. This is the Cup of You.** This is what all of you and the humanity has been looking for. If you get the combination right you have found the life existence in the D of physicality if you wish so, as a Cup of You, as a Cup of Life. As **where the man shall not die, (:58). in the D of physicality**. But I am sure many of you will have a wonderful time struggling to understand how and the way it is done.

Striving to make Cup become more knowledgeable

In so many ways, **Those of you who strives to create this Cup, you become more knowledgeable. If it is made with the pure intention of extension of the soul**, and not just something to do to gain something to go for. In so many ways,

Key to everlasting life - repair physicality - go back and forth

In so many ways, **I have given you a key to everlasting life, extension to the soul D to repair the physicality and go back to the physicality to be able to enjoy the D of existence** and tangibility. You got excited with One Cup OL. This is one Cup and a life in the U. You just got to understand what to do, and how to do, and how to create the condition of its position and existence.

To absorb energies without killing - Expand STM

This is a Cup which is what we call it a gift. If you understand it. (1:00). In so many ways, in the D of the life, everlasting life, this Cup, understanding the knowledge of the Cup, not the physicality of the Cup, will give mankind, what mankind has been looking for. **To live, not to kill, to absorb energies beyond the D and position, that you do not need to destroy another life, and then at the same time to be able to interact with the body of the man. At the same time to be able to expand the STM**. We go to a break .. Let's see how you as KS will take this further. Rick

>> BREAK >>> 390 KSW (1:08).

All the Salts are in this Cup

Q: .. the body of man contains 12 salts, are we allowed to add them to the container?
K- More or less if you take this combination, all the salts, **because 6 of the salts have never been defined. All the salts more or less are in this container**. (1:10).

Q: … it can be a very large cup and depending on the interactions we want to have and performance, we can make .. small cups inside with a specific salinity .?
You Decide on the Salinity

K- **We leave it to your imagination**. … (screen problems) (1:12).
Carry on.
Q: .. What were the black coils ..
K- These are galvanized plates.

Plasma does not just only flow in wires - only preferential

Q: .. I have never understood in regards to the connections .. exactly what is going through the wires when we connect. I know it has to be electricity because we put diodes and stuff to regulate. I have never understood the purpose of the connection with wires?
K- **The connection with wires in our case is not mechanical or electrical, it's preferring the preferential line of connection of the plasma. You are not working in matter state**, you are working in the Pl state, the Gans state. So even you connect it with a wire, (1:14). you try to show the preferential way of the plasma moving.

Power Supplies batteries become part of plasmatic condition

Even when you connect these systems to what we you call **batteries or power supplies. Your supply becomes a part of the Pl condition, part of Pl T, not the matter state**.

Minute you Nano coat or Gans - NOT Matter state anymore

The **minute you put N coated material in any environment**. **The minute you put the Gans in any environment you are not in a matter state anymore.** This is something we have always tried to explain from the beginning. So you might look at it as a matter state, but it's not. It's just showing a preferential way for the fields to move, for the fields to take shape and direction.

Matter State is itself a weak state of plasma

Q: .. how does the presence of a matter state wire create that preference in the plasmatic environment?
K- The **reality is that the matter state itself is still a weak state of plasma on its structure**. Now as you open them one by one, you will see that they expand, the wire becomes black inside, and there are many ways to do this, .. to encourage the path of the flow of the plasma.
Q: What would be another way to encourage the flow of the Pl? (1:16).
K- Many, many ways. .. … creating a gradient flow.

In the space T of upcoming time, as we explained as we are going forward very rapidly with it. **We got another 12 days to the what I call process of peace time, to start, if it goes the way we want**. In that process this is what I taught nearly 10 - 15 years ago, and it's in a couple of papers somewhere I've written. Maybe I explain again for some people to understand. In the space T of the future, which is upcoming first phase of it, even with what we planned to do next year with traveling to space with the new T.

You create your own position in space between here and moon

Is that **you do not have a position between here and the moon**, but you want to create a position to meet somewhere in that position, let's say 1 million kilometers … you create .. a space, what you call GPS. But how do you get there? How do you create that position? With understanding the plasmatic field T, **you create your field position ahead of you at the point of arrival**.

In a way, with the knowledge we have now, **we can create our own moon, in a field D, in a given position, and then tune your reactor to move into that position**. (1;18). It's not that there has to be a moon, .. star, there has to be something that you go to. It's in advanced T.

Send Plasma Package ahead of spaceship - Tune spaceship to that position

I discussed this, I remember a very strenuous **meeting with Lockheed Martin people, discussion in London**. The time that you have to have a place to go to is finished, you create the place you want to go to. **You have a combination of the Gans's that is specific to structure of your space reactors. You send ahead a very small package, very powerful package ahead of you at the position of destination, which arrives in seconds. Then you tune your own space reactors to that position** that it gets attracted to, that it gets pulled into, that it gets direction to.

Creation of Destination Point is a Technology on its Own

The creation of the destination point to go, it's in a way, a T on its own. If you go to some of the teachings of the past I said, people will **open service stations** and everything in the middle of the **way between here and the moon you can have a coffee** and things, you are tired, for fun you want to see something else.

Give it a specific MG Field Strength

How do we create these positions that we know where they are. **We give it a specific MG field strength, in a spectrum of the destination**.

Can move the emotion from Brain to another Destination

In a way, if you look at it, (1:20). when you go and **create the position of the emotion, or of happiness in your brain, you can move it, but it can be moved to another position or replicated by interacted of the fields of physicality, the STP**.

Create a Position Outside of Mars - to check it out first

The game has changed the structure of the game, in understanding the MG field has changed. **You want to go to a safe position, you don't want to enter let's say Mars in one go, you want to see how it is before you go in. You create that position outside of Mars**, hundreds of thousands of kilometers away from it, you stand and you observe it, observe what is happening. Where you want to land.

Create miniature field strength of position to interact with

In a way, when we bring what we call plasmatic transmutation, transportation, that's what we do. You don't need to have another machine, another position, **we create miniature**

field strength of the position, and then we create the condition of interaction. So you can travel anywhere in the U independent of the MG fields.

This is the knowledge which will come, **we release this gradually as we go into development of the space T. (1:22). Teleportation, and transportation** what you call it, what we call transmutation, and what we call transfer of the energy of the fields of the Pl of a structure is very simple.

In a way, if you remember in the present time you get the dart and arrow, there is nothing to hang on, **we shoot an arrow in a mountain .. and then we pull ourselves to that position, and that position becomes a new position**. The Pl T has that possibility, but you don't need an arrow to attach yourself to it, you send a Pl .. field in the position you want to be. and then you attract yourself to it, because you created it, the conduct, the cause of approach is in your system. Pl T is beautiful if you understand how to work with it. Now we change position and direction and many people will move on it very fast. Any other question

Q: .. the Italian group is asking, (1:24). if you please could define better or in a different way what you mean by galvanized plate?
K- galvanized plate is something KF has always used for production of CH3, it's what you put on the roof.
Q: it's not zinctura
K- ..
In normal condition you just don't have Zn you have Fe in the center and then .. mixture of metals, alloys that that Zn is part of, you have Ni, Cu, and Zn is part of that.
Q: **When we use galvanized plate do we have to change it often because it looses its property.**
K- It looses its property but it does not loose its property. It becomes Fe with the other metals which are on it, GM field position, this is why when you have a CH3 .. even you produce CH3 its reddish color is orangish towards red, because if you put Fe in Gans of CO2 you produce blood. Part of the reddish is because of the Fe which is in the center of the galvanized. which gives its color to, (1:26). with a mixture of what Ni, Cu and Zn, produce gives you that reddish color of the CH3. You actually , CH3 is partially blood combination. It's got a C and a H in it. It's an original sugar, it's an original energy which is connected to the blood. H and C on their own always give reddish color, H on its own is reddish, but depending on the ?? level of its Caron oxide which it enters the CH3 ?? will give you the different shades of red or orangish, but in essence the orange color of it comes from the different reddish orange color of the CH3, comes partially because of the fields of the Fe, which is creation of the blood. When you make these Cups don't shake your Gans's and see how many different colors of Gans's you will get at the bottom.
Q: How to make the CuO wire
.. the N coated Cu spiral (1:28). I assume he is talking about.
K- We done that for centuries at KF.
R: One of 2 methods, fire or Sodium Hydroxide method.

K- or plasmatic. Or you can hold it long enough it will be N coated, but depends how hot your hand is.
Any other question

Negative Oxygen - According to KF Plasma - not chemistry

Q: **Enhancing the Negative O by way of the butterflies and Air Enhancement Unit** (EU), etc . Can you give some background why this is beneficial and important?

Negative O absorbs fields not needed by body - like black hole

K- It is the way we behave. **It's the presence of O, or lack of fields, which is created that the body of man can absorb more energies**. .. we look at the plasmatic side, not the usual physics. What you call the **negative O it means absorption, it's absorbing the energies that are not needed in the body, and understanding that O is a G field force, becomes like what you call, a black hole.**

Creates motion in fields for body to absorb more from environment

Makes the D of what we call, motion of the fields, (1:30). more, and this creates a condition for the body to absorb more fields from the environment. **We don't look at the negative as it is defined in chemistry. We look at the negative O as the position of the field transfer, which is totally different**.

KF Work uses similar words to matter science - creates misunderstanding

The **problem with the explanation in the KF work is we use very similar words then the present physics and chemistry, but in a totally different working condition**, working operation. Like a plasma. **Doctors use the (word) plasma in the blood**, they use plasma operation of the fields opening. **We use plasma in way of the Gans fields combination**.

New Generation Air EU and Butterflies Extremely Effective

The **new generation of the Air EU will be ready but different effective in its work, with transfer fields in the environment. Extremely effective**. In so many ways, the **butterflies are extremely effective** in what they are built to do.

KF TV will make full demonstrations of T and new kind of commercials

We as the ?? of the **KF has gotten into full demonstrations, it's not pictures anymore**. (1:32). Actually in the coming weeks the KF TV studios … then **we make different kind of commercials,** using the facilities we have in our facilities, in the TV station we'll demonstrate a lot of things that you can see.

KF Sales has new Advertising Campaign coming up

We expect a huge peak on this with the new advertising coming up, KF Sales has already prepared the purchases in the background, that we are ready to meet, once **we start explaining and you can see it.**

KF has equipment to make specific measures - You can see and measure

You can literally, physically see and measure the change. We have equipments in the KF which are specific for these kind of measurements. KF on the path of adding more work of the KS to the .. portfolio of the KF, we are on a ?? track we bring in KS works to be added to the work of the KF, in a way. we sowed the seed and now we see the beautiful knowledge which is growing form amongst KS. We are there to support the work and back the research.

You will see, (1:34). huge number of products will come into .. KF work. in agriculture and many fields. We have gone and setting up, instead of starting from zero, we have gone and used the KS who have done the work and bring their work as part of the KF. We become .. much more stronger with the support..

(1:36). Any other question. Do not forget KF conference first weekend of September in Linz

Q: Jefferson, ask Rafael to help me. Translation (1:38).
Rafael .. (1:40).
he has been dong a lot of tests of plasmatic fields on electric devices. So recently he used a radio static to measure flow to LED lights. .. they are going anticlockwise by these measurement. So what he understands is we are being drained by a lot of energy .. So if we put a N coated loop .. on the LED can I protect this from the energy fields? (1:42).
K- I don't understand can you repeat.
Q: If he puts N loop on the LED lights … according to him the LED light fields harm people..
K- By the LED lights
Q: Yes, there are some fields coming that can harm people ..

Butterflies can absorb - if harmful fields from LED
K- Yes I understand. **The ones which we sell has the characteristics of .. absorption of the full .. majority of the spectrum of the fields which are harmful**. There is a reason for it, it's the way we build it. Depends what he wants to absorbs, he puts a ?? loop, or what we produce as KF. .. the ones we do, yes it does. These we have to ?? and confirm.
Q: .. (1:44).
He has added a question . he noticed that these Infinity Loops they change the direction of the flow, that's what he noticed. .. if there is a possible I can harm some people if I change this flow?
K- I cannot tell you.

Q: .. He noticed also with the MaGrav he put in his house the environment was much better by the measurement …
K- Thank you very much. Any other question.

Using Salts from Cup of Life - Have to understand what Salt carries

Q: Jalal, .. we are going to teach what you taught today. (1:46). . there are **some who cannot find these salts. Are there some alternatives for these salts in the teaching what you give us before. Let's say I take the salts for One Cup OL**, these salts as we know are not anymore normal salt, it contains a different kind of salt, Mg and a spectrum of salts. In the case I don't have Mg, can I use this specific salt.
K- If it is **.. yes. But you have to understand what that salt carries. In the body .. it is not just the salt. In the body** .. you have to .. there are more parts to be added to this teaching of today. But we add this in the future time when we go much deeper in teaching. .. but try to use the .. the new understanding of this setup.
Q: .. we will decipher everything . .. (1:48).

With Sea salt you get everything on planet - good and bad

Q: Can I use sea salt in this equation. ..
K- You see the **sea salt, if you get the sea salt yourself, then you have a composition of everything ever existed on this planet**. If you specifically go for … majority salt in your container let's say Mg or whatever.

Sea Salt game can be dangerous with plasma - depends

The **sea salt game is a very beautiful game, but a very dangerous game as well. If you are targeting for a specific performances.** Because in the sea salt you have from gold, you have from every element which is on this planet. So when you make a Gans, it's a presentation of everything. You understand. So we specifically go into the structure. One of the fundamental knowledge, which we always put on the back track, but we ignore it, but we cannot ignore it, is that every element in the U which can be accommodated in its benefit or its functionality in the body of any being in the U is usually in the environment of the being itself.

Whatever you have in Sea is already a part of You Evolving
So **whatever you have in the sea, (1:50). it is already part of you.** But to what extent of it, your body needs it, or you can apply it. There is gold in all our bodies, there is plutonium, every element, every element you see in the chemistry .. Periodic Table, you have it in your body, **but to what amount and what has evolution used it for, is another poin**t. We use gold in our body, we all sorts of, every chemical in the universe of man which is the earth is in the structure of it.

What you put in Stomach - Body builds new conditions

Body accommodates it to find, build new organs, build new conditions, create hormones, whatever. We eat it, we inhale it, we drink it, and once it goes in our stomach and creates certain kind of energy and it becomes frequent enough, the body finds a way to short cut what it was missing before to become more ??

Body Management Crisis Control - Allergies show reaction

The body.. is not something that you always think, something we eat and go. It has a **management control crisis, and has a management new material crisis. So that is why we have allergies, we are not accepting these things so we show our reaction**. It is very well organized, what you call management team sits inside .. body ?? field interactions.

How do you think you get your allergies? (1:52). And how you take things, you say, "oh it works for me," because **the body .. is continuously updating its work. What it can use and how it can use that system**.

There is only One Way to connect Cup of Universe

Q: We know from the reactor which is the ?? if I used N coated or non-Nano coated, In this case what you showed us here, I can choose, what dictated, do to the need? .. You left it open, we connect how we see it.
K- You connect how you see it, but I tell you one thing, it has only one way to connect, correct.
Q:
K- **There is only one way to connect this setup, the right way. and that is the reason I didn't put it in, because it becomes a copycat**. .. before we did, "oh, it was a left hand turn, this was connected before the other. " This Cup can only be connected one way to give an answer.
Q: This you will get it from your soul? (1:54).
K- **You get it from your soul, and you get it from the knowledge you gained**. This system can only be connected in one way, in a correct way.
Q: .. and that is?
K- .. this drum go on long time
First of it does not have a physical connection in one position, but is controlled in the whole structure.

Q: Yesterday ..

Farsi Website launched - Cornerstone Worldwide Internet Work

K- .. **Yesterday was the launch of Iran what we call the Farsi website**. (1:56). which **carries its own shop, .. wiki, and everything else, and this becomes the cornerstone worldwide, for what we call network, internet work**.

Iran will be Central Online Control for Enhancement Units - 24 hours

As we said Iran will become the cornerstone for all our IT's as **the Enhancement Units are about to come online and it will be controlled through Iran. The operation of the space program, flight systems all will go through Tehran**. In a short time we'll introduce … space flights, and interaction of the systems for transmutation and transportation.

All these systems controls, will be moved to Iran. We have a reason for it. Then we create .. subsidiary control centers around the world. The first part of this program .. which started now yesterday, it was launched on the KF Farsi channel, and now it will expand to all the languages, .. all the factories of the KF will be backed up into this system. And gradually we'll build up a multi facet structure that all of you can participate in it.

Moving away from "Microsoft" Structure that can be controlled

In a way, **we are moving away very much from "Microsoft Structure" that it can be controlled**, and we are always in position. We are using .. **servers in Iran and backed by .. the people who are part of the structure of the running of the country**. (1:58). Yesterday, was the celebration in Iran and at the same time the launch of the first phase of the KF IT network. Thank you ..

.. We have moved to a level of bringing the T in a different way, and this is the first phase of the IT work which has come out of Iran, and they developed it further, all the .. operation of the EU will be transferred through this system. **All your data, all the files of the people who use the EU scientists, will be kept, all the backup, doctors to support the EU operation 24 hours a day, will run through these centers**. Thank to Josef….

Any other question?

Q: … (2:00). I am about 8 months new to KF. from Ireland.
K- there are many Irish KS.
Q: … I have ordered visual EU. Can the Visual EU be shared with ones parents.
K- No we prefer not. .. has a document with it that you have to send back and report on it. This is in a way a natural cooperation with the KS on what we call trials. When you receive it .. (2:02). What we want to see, is what you see. What it brings to you. Fill in the form, go back on the internet, register, and .. build the data up with us,
KF will deliver specific EU like for vision, like for brain, specific EU to the medical teams, not for private use. Especially the VEU is important that we can change people with .. different eye problems . or what it comes through the emotion, what you call the visual problems.

Fiction Writer mention KF T in book - Ok, but give credit to KF

Q: .. **I am an emerging fiction writer, .. a novel about where the Earth cleanses herself**, the new people who survive are the ?/ keepers and there goal is to elevate their

souls so they can reach the 5th D and other D. **Would you support if I use some of your concepts in the novel? (2:04).**
K- As long as you mention us in it, no problem.
Q: Wow, super.
K- Which part of Ireland do you come from
Q: Have you been here to Ireland?
K- Yes, I have been there, I have a connection to Londonderry, my brother-in-law is Irish. ..
The what we call new structure in the work of many KS brings us to use the papers or knowledge's of the KF, as long as you mention KF in it, because we know a couple of universities if you mention KF in your index, they refuse it, this is policy by a number of governments in the universities, but other ones if you do it, there is no problem.

Iranian Corona Report becomes best seller on Amazon

As we have seen the KF **report in Iran has become number 2 best seller in Amazon last week, and we expect it to move to number 1 next week**. .. 199 Euros, (2:06). and our promoters informed us yesterday that we reached #2 in certain categories .
Any other questions? or call it a day.

R: questions from Salomeea.
K- Is she around .. no, we didn't see her in Bucharest conference.

Cup of Creator - Mankind not yet ready

Q: Are you going to teach us about **the Cup of Creator as well**?
K- **The Cup of Creator is not for man yet. A long way to go yet**.

Cup of Universe open to Space Agencies

Q: Do you think that all these **astronauts from the space agencies** could use the Cup of Life in the Universe**? NASA will accept it, or only the KS**? (2:08).
K- **The knowledge is open to everyone and it depends on what they want to do with it. Don't forget that in the what the KF is about to do in the coming weeks and months, we do not look into other space agencies and how they work with us**. We look how jointly all the space agencies around the world work together. This is the inclusivity which we bring, .. we have to emphasize. NASA is extremely .. we have invited head of NASA to join KF

American Administration says NASA must first reach level of KF to collaborate

NASA is eager to open dialog, and direct dialog with KF, they have been doing that for a long time, but the American administration do not want to show that American scientists have literally a little understanding of real space T and so they have been told do not interact with KF until their knowledge reaches that of the KF

and they can show they understand about the same. This is the problem we have with NASA. Sooner or later most of this should come to an end .. (2:10).

Peace Talks Dividends - good for space agencies

Peace talks have dividends and one of them is collaboration with the KF, and many .. space agencies.

Q: … in space are there points which should not be disturbed especially by nuclear of any kind?
K- Yes, planet earth and its leaders. In reality we do not have a problem in the space, .. we have a problem with our leaders, world leaders, which have a problem with the new T. **Our governments are too arrogant and too self-centered to see they are elite and who they are and what they are. Once we cross this barrier a lot of things will change, a lot of things will change for a lot of us**. Our governments have a problem. We were talking to .. NASA scientists, (2:12). And They said do you know what has happened with NASA with KF. I said, nope, they said, In NASA
Who are the 2 fake people they can't find out
There are many scientists who try, want to work with KF ..

Russia and China most advanced Space Agencies

The **Russian space agency is years ahead of NASA, literally years. The Chinese** .. have followed the Russian Space Agency …

(2:14). Those who carries out the murders, the low level jobs, sold themselves to the American to be the real scientists and they took them.

Von Braun .. one of the key people in murdering many, many scientists and Jews, where he was responsible for. So we have seen the end of Russia, USSR

T**he Americans paid 10 billion to the Russians how to land on the ground**. That's how advanced the Russians are.

NASA makes lot of noise - at moment NOT a space player
So **we don't consider NASA as the main element, somebody who makes a lot of noise, but the real research is done by the Russians, and now Chinese**. The Chinese are big into space

We literally don't consider NASA as a space game player at the moment. They are most or less 6th or 5th rank in the world. Indians are striving very heavy, (2:16). Russians are involved in it, Brazil has certain activities. Iran is top 2 or 3 in space activities, they are very in two universities in Iran, the 2 ?? human, what we call launch and space, 2 different ones. Iran is more active in the space and T than the Americans are, then NASA is. They get money but there is no backbone to NASA. they played it, they landed on the moon first, and the rest of it. But nothing is there. So we don't consider

NASA as a major player. The major player in space T now, 100% is China, India, than we have Russia, and Iran comes in that level, and then we have the rest.

Q: Salomeea, I participated in the conference at the soul level .. I put the wish to achieve all your objectives and even more .. I don't want to be the head of anything .. (2:18). if I can help at my humble level .. thank you.
K- Thank you for all your support. Any other question of bring it to an end.

I think today's teaching needs a very long time of understanding.

Q: Marius, .. a few words .. thank you for coming to Romania .

K- .. we have a very successful meeting .. (2:20).
there is a huge beautiful outcome from this conference .
Q: ..
K- ..
The KF Romania committed to building of the first factory in what used to be called Eastern Bloc. We have started looking for location ..

(2:22). in the coming months, that we can produce goods affordable by the .. Eastern Europe. With the wages and everything else. At the same time introduce materials that can be sold ..

Q:

(2:24).

Glass for Cup of Universe recommended

Q: for the Cup do people use glass or plastic?
K- **We recommend glass because the plastic has addition** fo its own, the fields of the plastic which the C and H and many chemicals,.
R:

K- **I hope you will start working on Cup of Universe we call it, because then it allows you to be able to become part of the U Community, where you can extend your soul or extend the STP and see which one fits you, befits you according to your emotion, position, time and place**. Thank you … hopefully next week we'll start with another D, I sure a lot of you will try to make these Cups. Just be careful to understand it before you make it.

R; .. 390 KSW July 22, 2021

END

391st Knowledge Seekers Workshop; July 29, 2021

Cup of Universe teaching continued part 2, Inertia, Reincarnation

>>
Energized blood
CO2 in air needed to make AA
Creating life with different AA
Nano coated Zn with Cu - different salts
AA on skin allows life to be created within this planet
Mg K determines what kinds of animals
Increasing Mg or K get Vertical Plant life
Chromosomes depend on base energy materials
Changes in salinity get different kinds of tissues
Salinity in presence of Cu N and gravity gives bone structure
Another Universe could have different bone than Ca - plutonium
One Drop create fish in fish tank
One Drop is STM
How to Change the field forces of gravity - to Inertia - matter state
Life, intellect, and existence is not exclusivity of earth, never been, never shall be
Energy packages change to matter state also inside the earth itself
Energies of U create emotions & physicality in Brain - we are in comm w U

Gain trust in understanding totality by doing your own experiments
You have tested and made the Gans
Now you can further test the Cup of Universe
Matter state Fields of Inertia - interact w gravity and Plasma's G field - Matter
You decide where to be Energy and where to be Matter
Interaction with Inertia - You create Physicality
Inertia of every element is connected to G field force of its environment
New Principle - Plasma has GM field - Inertia has GM field
When M field dominate expands - Plasma ; When G field dominate matter - Inertia
By field of thoughts you can manifest yourself as Energy or Matter state
Through this Process - never get sick - old - all problems solved by himself
The higher energy of transmutation adjusts all fields back to normal - Cleans you
You work on Inner Sanctums of AA
You Resurrect yourself from energy fields of Universe
Now we start to understand the Power of Inner Sanctum of STM
The Scientific World never understood the plasmatic field interaction
Become Tangible anywhere as Plasma - liquid - solid - gas

Come from Plasma- interaction w/ Inertia become solid - l - g - whatever
Plasma First Order of state of matter - Not 4th state of Matter
Interaction of Plasma with Inertia - Creates Tangibility
When we move from the Inertia of the U to the Inertia of the planetary, or environment, then we become matter state.
What happens now that you are in the field strength of all these Nano materials
Many combination of many factors allows many configurations of Cells
Accommodation and Interaction with Environment dictates sight - feelings
How Environmental conditions determines the kind of Creatures manifest
Man will survive anywhere in U without Oxygen etc - Soul adjusts
Man already does this at death - manifests in another D in U
At Death man release plasmatic energy equal to 18 Hiroshima Bombs
Cup of Universe collection of 20 years KF Teaching
Periodic Table is only fraction of Elements in U -
Elements come from energy interactions - size of Unicose
No Limitation in D of Creation and Creator
Had to increase Man's Confidence before introducing Cup of Universe
By changing conditions in CU - Create variety of manifestations
This is how every cell in body was created - vacuum condition Nano structures
Empty Cup of Universe introduced in Einhooven
How we created energy from Cup
Took 10 years for man to understand CU
Soul of Physicality is his control system

The physicality of the man it's interaction of the fields of the STM with the Inertia of the interaction of the fields of his matter, which creates the manifestation of his physicality

Planetary System fields work from outside inwards - Sun rays interact with center
Inertia of Environment dictates how STM will manifest itself
The STM is image of Me (Creator) - not the physicality
Man does not change - just different manifestation in different environment
Pig wiser than King - works with his environment does not kill
Process of STM as plasma - forming Inertia than to manifestation
Without Interaction NO Inertia will be created - No manifestation
Another step Inertia of environment is the STC - mankind isn't ready yet

How Inertia is formed
Inertia is dependent on Strength field of environment - plasma - entity to observe it
Invisible - when Inertia not in balance to another Inertia - no interaction
Many matter's in Universe are Invisible to us - Inertia doesn't interact
To be visible - Has to interact with field strength of STM
How you can walk through a stone
Vacuum condition of life of man has an Inertia
Soul decides the point of interaction
Our Soul created out of fields of planet - this is common denominator reference
Body is like another moon of Earth

Take AA of man to another position in U - A different kind of manifestation
We confirm our existence through existence of soul of planet
We would have been created differently on Moon
Our body is an independent Solar System on the Earth's planetary system
Body is higher vacuum than space - why exists close to G field of planet
We are another vacuum solar system - have our own planetary system inside us
By adjusting field strength of the Soul - don't need to walk over planet
How Do we alter the Strength of our Soul?
Subconscious Discipline - acts as a filtering system
Disconnect from any Attachment to planet - Fly - Transmute - Anything
Change Inertia of body - Can enter body with fingers instead of knife
We need to change our Subconscious Decision - as knowledge increases
Subconsciously we allow surgeons to operate on us
Adjust fields of STM can do surgery with fingers
We Control the Inertia field barrier of our body
KS in Bucharest stopped eating for 14 days - Energy directly from environment
Many Knowledge Seekers start practicing using plasma instead of food
Making Child from Soul
It's Fear that stops us from taking control of Inertia Fields
Jump out of Spaceship and know you will survive
Baby goes through same fear in birth cannel - Diabetic
We train ourselves to accept more pain
Chinese KS going to level of Soul very soon - West too materialistic
It's not the first time, many people in the past have reached this position
Rick using Gans Water and Maple Syrup - fasting
Half of Man's disease go if he doesn't kill
You've got to become like the Creator, a per
REINCARNATION and Buddhist Beliefs - KF teaches Only one human life
Humans have one life because we have chosen that way.
Souls can choose a cycle of lives - but remain the same inside
Mr. Keshe knows exactly the Oasis he stayed for decades
Man chooses to have One Life because he comes from physicality to the soul
We come from the soul to physicality. It's a totally different position.
New Life on Earth will come from Soul to physicality
I remember the hammer of the nail in palm of hand
You do NOT remember past lives - It's in the RNA
Many People say Past Lives - Fake Talk - We see the Soul
Same Soul - Moses - Christ - Mohammad - everybody else
At Death the Soul gets Free to start the learning process
How did you show up in your mother's womb? if not human
We take the body - Not the process of birth
Planet Zeus means the Creator
(Does not disclose yet the way he came to human body)
Soul generated humans can live anywhere in the U
Soul Created beings have the Knowledge of the Universe
First Soul Created Human about to be created - Mitra

You don't need a birth passage
We prefer to hear noises than communicate through the soul
We Don't transfer consciousness to trees - we connect - feel pain
We Block connections with Plants because we eat them
Soul of Pig knows you are going to slaughter it - it runs from you
Sometimes you ignore the pain - it's too bad - ignore emotions
Queen Mary College acknowledging Mr. Keshe send representative
Scientists attended Bucharest Conference
UK Company setup - factory coming
Using Cups to transmit emotion and intention from our soul
Put yourself and intentions between Cups you have made
Point of Transmutation Expansion of soul through structure you create
How does the soul handle humiliation trauma of past - hammer and nails
From Soul point of view we don't see the trauma - final objective
Soul lives as different people to arrange for the prophecy to be fulfilled
We are in that position of the soul. It's the same soul
You look as a man, because your life cycle of physicality is small
It's not a belief in prophecy - We make it happen
We live a few billion years - it's a few seconds to man
We started process to go to Moon to be ready for next step
Sacrificing life through suffering - Catholic belief in pain
Vatican responsible for mass murders of children in Iran - End of Christianity
Vatican doing same thing again - End of Vatican
Vatican - biggest arm manufacturing to initiate another cycle of killing
This cycle of Christianity has to end
Every Cell of body has its own salinity
Ever Organ - Kidney cells have a common denominator salinity
Each tissue in organs - kidney have their own salinity
Different salinity for different walls of the kidney, or different tissues of kidney
Different Rooms of Spaceship made like different tissues in kidney - salinity
Salt is needed to create the physicality dimension
Without salt you don't create the .. physicality D.
KS have not understood about salt up to now - First time explained
None of the KS up to now have understood this. This is the first time I explain it.
Inertia and Salt are same - needed for manifestation
For a flying system I consider, it's to just the fields, you have to create that Inertia, or what you call salinity
You have to create environment for fields to manifest - Inertia
A stone carries salinity within it
UFOs outside of earth manifest differently - based on environment
Depends how the Iranian Administration responds - to release more T
Icecaps melting - don't know
Tuesday August 3rd is beginning of Iran new administration
U Council to pay attention and bring the soul of the new Iranian leaders to a new level of understanding of peace

ENGLISH TRANSCRIPTION

(:11). K- .. in the last week teaching we started a new progress, a new development and we'll carry on with the same. As we promised we'll try to get the KF TV online by today, but they need 1 more day…. We enter a new era of teaching … easily for those of you who understood it last week. We taught you about the Gans's for years, .. about eh soul 2 -3 years plus, and now from teaching on 387 if you listen to it in detail we gave you an insight in what is to come. And from 390 KSW we brought what was in 387 to the physical dimension (D) in understanding the process. So we see the process fo teaching has a rhythm and we are going in that direction.

Now from now on we try to bring the Soul of the Man (STM) and Soul of the Physicality (STP) and the physical condition of life for man in the space, and his self on this planet. SO after 7 - 8 years of teaching, now we come to the point where the physicality comes into work of what we call, "universal Creation of Matter," and then transmutation and transformation into the ?? lights ?? energy which we had in Gans's, and now the fields of the Gans's, and the production of the fields of materials which brings a new D, to bring the STM and STP of the man, and the motion of the both in the depth of the U, becomes applicable and now understanding. So in the next few months and maybe a couple of years we go into this direction, now that we understood the soul, .. the physicality how we will change the matter into energies. Now we are bringing to show how the 2 can work, (:14). anywhere in the U. This brings a fundamental change for a lot of us. Coincidentally we didn't plan this for thousands of years to be here, but coincidentally a lot fo things have said to be in line for the release of the new T. We see one fo teh most important factories that ?? kick the world peace treaty, and understanding of the man' knowledge and opening of the U Community to man in the D of the STM and the physicality, we start in the next 7 to 10 days. Gradually you will understand why and how. In the coming time gradually we build you up, gradually to the position of understanding how the world leaders will join us as operating, gradually as one. In a way, we bring the W leaders, the KS and geopolitics, and many other kind of diplomacy into one. This will not happen overnight. The first stages of this is on the platform, 2 - 3 weeks in the background is a lot fo work to be done. We wish those who are part of this endeavor a huge success. They need it and in that process we'll see huge changes in the direction and D which the teaching and the T of the new science, this will take hold and take shape. In that respect we carry on with the teaching, while we are dong other things in the background, to bring the teachings in line with the present science, and in line with life on the man on this planet.

Teaching Starts :

Last week I opened a new chapter for you. (:16). About maybe 8 - 10 weeks ago I asked one of our KS in the Laboratory of the KF, ?? if you can make such a thing. I gave him an outline of what I wanted in a way, what you see now on the screen. Because we would have to look at the physical condition, what does and how does this system look like. ..

In the process of **teaching last week I opened a new D in many ways for you** to be able to be constructive and be able to work, to bring practicality in your what I call, the knowledge of the soul and K of existence. And in that process we can gradually build up this process. Which means we start understanding what is happening. What I think is the best thing to do is to start where you already have done things, you have seen things. You seen the result of this parameter on the table. Go back to the first things you learned, and than you see how this picture completes itself in knowledge.

Cu is main component of Body - red tissue allows us to be dynamic
I tried to explain part of this last week. If you remember **at the beginning we had this (Cu Nano coil) as a main component (:18). of the body of the man, which allows man to be dynamic. Red tissue cells, depends on the existence of the Cu**.

Cu and Zn gives CO2 - neural system - line of communication

If you remember when we put the Cu with the Zn plate one of the first things it gave us was **CO2, the connection for neural system**,, .. for line of communication in the body of the man. So we have seen this work, so we know this set of the Cup is there, while it is doing everything else to produce this.

The reason I do this is for you to gain confidence in why and how this system is set out, then you understand it, because you all have done bits and bits of this in your work. You have been with it, you have worked with it, you have done a lot of other things with it.

The other thing we have seen with this is, if you remember in the work of One Cup One Life, we had a very simple system. In **One Cup OL we saved many lives around the world**, we had this with us. If you remember the way it worked. Nano coated Cu, spiral Cu and the Zn. In other Cups of Life we went through the same process.

"C" for Galvanized because it is a composite of materials

In the beginning of the process we learned how to make sugar as we said last week. (:20). and then we see the existence of dynamic sugar. A lot of people say why don't I use **"G" for galvanized, because I choose "C" as the point of ?? combination of materials. You can put anything as galvanized, we call them composite materials**, and that's why I use "C" for. In the process of life as you change the .. the inner materials of what we call plating, or galvanization, we can do other things, we can galvanize on gold, we plate gold, we plate silver in Nano structure. We can plate any metal combination of what we call point of reference, that's why I use "C" as a composite, not as galvanized.

Increased the strength of Blood - Energized Blood

If you looked at the operation of all this, you have seen in the past we used the **combination of these 4 in a very hidden way, to create sugar and blood**. At the same time **which means we produced energized blood**. We managed to **increase the .. strength of it,** and in that process we created more and more materials and conditions which lead to creation of life, support to life. (:22).

The CO2 in Air needed to make the AA

Without the presence and existence of the CO2 in the air, it would not have been possible the creation of amino acid (AA). So there is one more important thing you all have noticed during all these processes.

Different types of AA started the process of creating life

It doesn't matter how you took it, **you continuously produce different type of AA. Which means in the process of putting the material on the surface, the process of life started**. The AA created over this process where you created the CO2, is different than the AA now over the same plate, because now there is a mixture of AA of blood, .. of CH3, there is a mixture. So your AA on the top is a different AA as you had in individual sections and systems.

Nano coated Zn with Cu - Salts - AA on Skin allows life with in planet

In the process of understanding more and more, when it came to produce the physical conditions and using the Cu in the process of the Cu and Zn, or the process that **not many of you tried Nano coated Zn with the Cu itself**. You always used the N coated Cu, none of you went and changed and see what happens when you **use a N coated Zn with the Cu. You did Zn with Zn. (:24). This now opens a new D**, with the use of Ca, K, Mg, and other factors which you had in the water, and presence of Silicon, and everything else **creates AA on the skin, that allows life to be created within this planet**.

Mg and K in presence Na - Determine what kind of Animals

How you **change the factors between the Mg and the K, will decide on how materials will react, what kind of animals is going to be, and especially in the presence of the Na**.

Increasing Mg or K with Na - Get Vertical Plant Life

Then if you **increase the Mg in a specific way you create vertical life. If you increase the what I call K, in the presence of Na you get vertical life**. In a way, we know this factor, but now we can put it in a larger scale.

Chromosomes depend on a Base Energy material - different forms life

We say if one has a extra Y or X chromosomes or this and that, it will be a boy and a girl. In the world of creation **the whole chromosome depends on a base energy**. In the space if I change your body into a different material of the base, I take condition of the **radioactive material, which is the K, (:26). you will find totally different kind of life**.

Changes in Salinity get different kinds of tissues

Mg and Na combination will give a different kind of combination of white and red, hard, solid, soft tissues. Then we understand the process of creation. **Small changes in the percentage of one or the other will create different tissues**.

A **slight modification in the salinity in the presence of maybe Cu in a Nano** (N) state or Zn in a N state, but a condition of interaction of ?? gravity, will give you Ca as a bone structure.

In another Universe could have different bone structure than Ca

In another U, another condition it could be Cu. You could be walking with the bones, which are made of Cu or what we call bone, as a holder of the structure of the physicality.

Everything explained by Cup of Universe - Knowing how to change Conditions

Then in this process when we understand how the world can exist without any bone structure as such. **Everything in the world of existence can be explained within the conditions of the Cup of Universe. You just need to know which material to move in what position, to what percentage, what G point**. How do you change the energy Cup into the matter Cup. That's a wisdom.

One Drop create Fish in fish tank - Manipulation of Fields

This is why I explained to you in the past, with **1 drop of water in a fish tank, I'll show you the fish.** Now you understand, (:28). **that fish comes from this Cup. Because we understand the process of manipulation of the fields**, we understand .. of the different field strengths of the different fields, we understand the process of interaction and manipulation of the fields. Then as we see as with One Drop, we create a man within the womb of the mother, with **One Drop we can create a man in the fish tank**. In the **fish tank of the U**.

The One Drop - Is the STM

One Drop, **that drop is the STM**. Physicality of the man would be, in a way, under contention anywhere in the U, but his soul shall not, because he has no D of lower strength physicality to battle with.

STM works as common denominator with the Soul of the Creator

The **STM works at a higher strength as a common denominator as the Soul of the Creator** (STC), so it decides where it manifests itself, how it interacts with the strength of the STC.

Now you understand how I have taught you everything about the creation in the past years. Now it's your understanding, now it's your comprehension of interaction. **What happens when you appear on the planet Zeus, and there is no Fe or Cu. It means you don't have existence, it means there is no gravity**?

How to Change the field forces of gravity - to Inertia - matter state

How do you create the condition between the 2 forces of creation, **between the matter, and energy**, what we call, (:30**). field forces gravity, and Inertia**. What is the connection and **how do you change the gravity as a field force to Inertia as a matter state of existence**?

Life, intellect, and existence is not exclusivity of earth, never been, never shall be.

Energy packages change to matter state also inside the earth itself

You all understood that for example, at the boundary of the earth, **energy packages are created from the interaction of the field forces of the earth and the sun**. And we see ?? these approaching the center by the Inertia of the planet, **it changes to the matter state in different parts of the planet itself. Everything does not fall on the surface of the earth**. Some of the energies can only convert within the structure of the physicality of the planet, where in that position they become gold, and silver, and whatever else.

Energies of U create emotions & physicality in Brain - we are in communication w U

It's **the same with the energies within the structure of the U**, in the interaction with what we call, the physicality of the body and the brain of the man, **create emotions and physicality within the structure of the brain of the man.** Not everything is arms and legs, not all the interactions are the same. **Then we understand how we are in communication with the rest of the U**. (:32).

Gain trust in understanding totality by doing your own experiments

It was **important for us over years to gain you that confidence, to get you that confidence, for you to understand the totality of the physicality** of the man. In so many ways, it was important for us to be able to **gain your trust by your own, by your own doing**, by your own actions, by your own understanding of the process of creation.

You have tested and made the Gans

If I told you today (before), if you put a Cu and a plate of Zn, you will make CO2, you would have laughed. Impossibilities, but now it is possible because **you have tested it**. You have done this for so many years. **You have seen the AA, when we put in front of you the Cu and Zn, and you created CH3** you gained trust to it.

Now you can further test the Cup of Universe

Now the **CU is no different, unless you are in denial, or unless you are those who is a hypocrite, or you have no knowledge of the science of creation**. Those of you who deny the existence of the CU, today the way it's explained, it means you have no understanding, and it means this is not your time yet. You are not matured yet to understand the processes, because over years you have tested everything of this, what is on this plate. (:34).

INERTIA TEACHING starts:

Matter state Fields of Inertia - interact w gravity and Plasma's G field - Matter

In so many ways, **if you understand the difference and the process of creation of gravity and interaction of the fields of the plasma's G field, with the matter state creation of the fields of Inertia, then you have reached halfway** through understanding the totality of the process of the creation.

You decide where to be Energy and where to be Matter

Where to be energy and where to be matter, you will decide this condition, it's you who will have the say, on which you can say transmit, which one you can transmute, and whether you manifest yourself.

Interaction with Inertia - You create Physicality

The point of the interaction and creation of what you call physicality, is understanding the **process of Inertia within the plasmatic field of the U**.

Inertia of every element is connected to G field force of its environment

We understand how the **Inertia, every element like its mass, is connected to the environment of its M field G field forces. One is of the higher order, one is of the lower strength**, but in interaction and confirmation **connected to the G field forces of its environment**.

New Principle - Plasma has GM field - Inertia has GM field

In so many ways, we can confirm or we can understand **a new principle where we call the plasma's GM field and Inertia GM field**.

When M field dominate expands - Plasma ; When G field dominate matter - Inertia

In a way, (:36). what we call the **M field when it expands and dominates you deal with the plasma**. Where the **G fields and its strength in respect to its environment, dominates you become matter state or Inertia**.

By field of thoughts you can manifest yourself as Energy or Matter state

This will play an important part in understanding of how and **when through the strength of field of thoughts, you can manifest yourself as energy, or matter state**, or physicality. And **both are connected to the D of field strength of their environment**.

Through this Process - never get sick - old - all problems solved by himself

If mankind understands this, mankind in so many ways, **have solved all his problems of being young, never getting sick, being able to eradicate everything in the body** .. by man himself.

The higher energy of transmutation adjusts all fields back to normal - Cleans you

Where **through the higher energy as you transform and go through the transmutation of the field of Inertia, the matter state, you can adjust everything to the existence in comparison to the environment of life**, be it on earth, be it on planet Zeus, .. Mars, .. on any galaxy in U and Unicose.

You work on Inner Sanctums of AA

Because then you **don't work only by the level of the AA of the man, but you work through the strength of the inner sanctums of the fields of the AA of the man**. Then in respect to it, in every environment you can become physical, or stay in the plasma state. (:38).

You Resurrect yourself from energy fields of Universe

What we call, resurrection. Because **you resurrect yourself from the energy fields of the U into the matter state. Or from the matter state you resurrect** yourself in the D of energy, of plasma fields, in **the D of the higher order in expansion of the fields of the U**.

Understanding the Power of Inner Sanctum of STM

As I said, now we start teaching you to understand the interconnection, the understanding, **the power which the man has within the inner sanctum of the STM**.

Scientific World never understood the plasmatic field interaction

This has been one of the **biggest problems for the scientific world on this planet for time of the beginning of understanding the terms of Inertia and gravity, or what we call plasmatic fields interactions**. We know it is there but we connected it to, what was and what is.

Become Tangible anywhere as Plasma - liquid - solid - gas

When in reality it's understanding of the order of the strength of the environment and **you can become tangible anywhere, and if you get your Inertia M fields in the right order, in the Inertia section of the work, you can become a liquid, .. a solid, .. a gas**, or you can become what we call, the first order of the creation as **a plasma**.

Come from Plasma- interaction w/ Inertia become solid - l - g - whatever

Mankind has got everything in his cycle of understanding that went wrong with, right. **We come from plasma and in interaction with Inertia and the strength of Inertia we become what we call, solid, gas**, or in a way, (:40). **whatever we want to be**.

Plasma First Order of state of matter - Not 4th state of Matter

So in reality mankind has no choice, but to understand more about the facts, that **plasma is not the 4th state of matter, but plasma is the first order of state of matter**.

Interaction of Plasma with Inertia - Creates Tangibility

This is where the **interaction of the plasma with the Inertia creates the condition of what we call tangibilit**y.

When we move from the Inertia of the U to the Inertia of the planetary, or environment, then we become matter state.

In totality mankind has to move into a new D and direction. **What happens that now that you are in the field strength of all these Nano materials**, which you have put in the system (? Cup Universe). How would you interact? How would you consider and work, because is it, or can it be, or would it be possible to understand new dimensions? Because now you have a totally different working in this place. What happens to this? **What happens where the N Fe interacts with the Fe itself? In the presence of Cu or Zn**? (:42).

Many combination of many factors allows many configurations of Cells

Now you understand a totally different game. In a **combination of many factors allows you to create many cells, many configuration of cells, and then interaction of the cells with themselves, and with their fields, of their fields with themselves, and creation of new matter**.

Accommodation and Interaction with Environment dictates sight - feelings

Accommodation of creation of all this, **accommodation creation of interaction with environment, which dictates sight**, vision, in a way, touch, feelings, and then you understand **why the fish don't have legs in the oceans, and man doesn't have a fin on the dry land**.

How Environmental conditions determines the kind of Creatures manifest

The **condition of the environment, which is created, in interaction with the D of the Inertia strength field and at the same time the MG of the planetary system and environmental systems dictates what creatures you will manifest yourself as, when you become tangible.**

Man will survive anywhere in U without Oxygen etc - Soul adjusts

Then you will understand that the **man will survive anywhere in the U without a need for O, .. for food, .. or any medicine, energy pack, because its souls adjust itself into the D of interaction of the fields of the U**, and the point of manifestation. So man understands he can live anywhere within the U, without a gas mask and O pack, and uniforms on his back.

But he **needs to understand, (:44). the interaction of the D of his souls in the D of physicality and the strength of Inertia of the point of manifestation**.

Man already does this at death - manifests in another D in U

In a way, **man already knows this but he was blind to it**. When you leave the physical D of this planet and you say **you have died, but your soul takes free into D of U and then manifests itself in another D as another planet and creatures**, then what happened to it. Has ?? anybody soul just explained. Now it's time to take a new shape and in another position in the U according to its ??

At Death man release plasmatic energy equal to 18 Hiroshima Bombs

According to the nuclear scientists and the development of the T **every time a man dies, energy, plasmatic energy equal to 18 Hiroshima bombs are released, at least in what we can interpret**. So **you can imagine what life this energy pack will create in the U**. When it attains its condition of interaction with its physical D in ?? its environmental manifestation.

Cup of Universe collection of 20 years KF Teaching

The **Cup of Universe (CU) is a collection of the teachings of the KF in past 20 years**, because now every element in your understanding up to now, of what we call, the Table of Elements can be added to this universal ?? What you see in the Periodic Table in the

form of a Nano, (:46). in form of matter, .. liquid, as a Gans, or a solid or whatever added to this creates its own condition and D.

Periodic Table is only fraction of Elements in U -

Do not forget that the man's what we call this, **Table of Elements, is a fraction of the elements in the U. Not maybe even 1% of. The PT needs to be much, much bigger, in triple and 4 digits, elements, number of elements**. Man only knows the tip of the iceberg.

Elements come from energy interactions - size of Unicose

The iceberg is huge, it's **the size of the energy interactions of the Unicose,** not what man sees on this planet. This is why man will gradually say, he has found new elements in the U .. where in fact they have been there, **they are there from every interaction of every planetary system**, a new element is created that the man has not even understood.

No Limitation in D of Creation and Creator

Now **if you understand the process of the creation and the interaction of the different M fields, and the different dimensions of the strength of it**, mankind will become wise to understand that there is no limitation in the D of the creation and the Creator.

Increased Man's Confidence before introducing Cup of Universe

What you look at this **Cup of Universe, thanks god we have taught you enough over the past years, that you have gained confidence**, (:48). in its creation and application. In so many ways, we are putting another piece of the puzzle, which has been hidden from you through the lack of understanding of totality, step by step forward.

By changing conditions in CU - Create variety of manifestations

In so many ways, mankind is getting ready for what I call, another way to look at its own creation, and what has been created amongst and within him. Go back and ?? decide to remove one of these elements, and see what happens. **What happens to the emotion, what happens to the strength of the STM? What happens every time you change different number of the spirals**? Would 10 spiral, G Nano material, and 20 spiral will have the same effect on the rest of the group. Yes it will, of course it will**. It's a different planetary system, a different structure of gravity.**

This is how every cell in body was created - vacuum condition Nano structures

Then if you understood this, (:50). then you understand how to create every cell of the body of the man. As the body of the man is **in a vacuum existence of the N structures of many, many elements. It's a mayhem and a soup of the fields of the U**.

Empty Cup of Universe introduced in Einhooven

In so many ways, I want to explain something very interesting to you, as I brought it up in the Bucharest Conference. Here you see 5 elements, N coated in different structures and you can see the interaction of this space in 5 and some bits, from the fields of the U, we have , which we have made differently, creates different Cup of Life, if you remember **in Einhooven I opened a box with 27 different elements, position and size, and I opened it and I said, "this is an empty Cup of Universe." Empty Box of Universe**.

How we created energy from Cup

Now you **understand how we were creating energies from it, as every position, and every N coating, and every shape creates different D, and this Cup is not empty**, but is a Cup of Life of the U, very much like the Cup we showed.

Took 10 years for man to understand CU

It took me **since 2011, now we are in 2021, (:52). 10 years for you, to show you the empty Cup of Universe,** and an empty CU. For a box to a cup. The knowledge has always been there, it's man we had to teach for him to understand, the **cup was not empty, it was full of fields of the creation within the U**.

Now you understand how the T has always been at the reach of the man, but man was not aware of the T. 10 years to open this box for man to understand. The process of creation is amazingly simple. The process of understanding, the process of the creation, is a little bit hard, for those who do not understand.

Soul of Physicality is his control system

In so many ways, mankind now has to understand that while his physicality exists, itself **he has a control system as a soul of his physicality, and a totality of interaction of all the fields of it, has a soul, which works and interacts with every D and beyond**. (:54).

Where in a way, **the physicality of the man it's interaction of the fields of the STM with the Inertia of the interaction of the fields of his matter, which creates the manifestation of his physicality**.

Planetary System fields work from outside inwards - Sun rays interact with center

Which in a way, **works outside, in, for the planetary system,** but for the life of dynamic life of the body of the man it works from inside, out. **We beam the rays of the Sun, we create the fields, and then in interaction with the center, we create the what we call the Inertia and the MG fields**.

Body - Fields come from inside STM outwards - Inertia - manifest physicality

Where in the process of the **body of the man, the field comes from inside, and in interaction of the fields of the environment outside, and the condition of interaction of fields of Inertia, manifests as physicality**.

Inertia of Environment dictates how STM will manifest itself

So when we tell you, **you travel with the D of the soul, the soul in any condition in the U as interacts outside, will create different manifestation, could be any shape, any color, any U**. Because the source itself, when interacts with fields of its environment and in interaction with the balance of the fields, and creation of manifestation of fields strength of existence, **the Inertia of the environment, dictates how** the fields of the STM **will manifest itself** in that environment.

The STM is image of Me (Creator) - not the physicality

I have made man in the image of Myself. Does not matter where the man is, because it's the STM which is the image of Me, (;56). not the physicality of the man, which is image of Me. This is understanding the knowledge of the creation.

Man does not change - just different manifestation in different environment

Man does not change just because he puts a different frocks on him. A clown or a pig, or a doctor, or a black or white. It's the soul of the man, which in its interaction with its environment, dictates the condition of the manifestation. Then ask yourself how, what, and which strength of the field of the soul creates the life in the shape of a pig, or a dog, or a tree.

Pig wiser than King - works with his environment does not kill

As so many times when you look from outside in the D of the strength of the soul, you don't see the farmer and the king, you don't see the man and a donkey. **You don't see if that brain belongs to a king, or a pig, even though the pig is much wiser than the king**, because **he understands how to interact to survive within the structure of his fields, in his environment**. Where it d**oes not kill and supports his life with what is available** ?? , whereas **the king has to kill because he knows no other way**, and he has more soul than a pig. because he is ?? and taken the life of another life.

This is why we always teach, we always promote understanding of the knowledge. (:58). Where **a pig is higher than a king**, because his soul has chosen a different life. So shall be even **a tree is bigger than a king, because it never kills**. Does not possess as what is agreed with its environment, and its possession. Now we understand.

Process of STM as plasma - forming Inertia than to manifestation

Now we understand how the STM manifests itself in the different dimensions in the U. Where the **STM sits as a plasma, it interacts to the D of the fields of the environment in a M direction. And once it reaches the point of the balance of interaction with its environment, it creates a D and strength of the fields of what we call the Inertia strength, and then manifests itself, with the interaction of fields of its environment**.

Without Interaction NO Inertia will be created - No manifestation

Otherwise the soul of the environment, and the STM, as long as they don't interact, they shall not create the condition of acceptance of physicality in the strength of the presence and manifestation, what we call the **Inertia condition**.

I hope in today's teaching I opened, in a way, peeled another what I call layer from the onion of the knowledge of the U. Step by step we take you deeper to understand the ?? gift to ?? receive, ?? to the center, to the essence of the creation through understanding the knowledge of the creation. Mankind, (1:00). has a lot to learn, as long as he understands the process, and can take steps to further understand what is the next step, where does it lead to, and what is its functionality, and what is the response and the reason for its creation, at that point it will respond. We go to a break … but now you have seen the process of 10 years of teaching, how **we brought the matter, and the soul, and now CU we show how the 2 interact**.

Another step Inertia of environment is the STC - mankind isn't ready yet
There is **another step to come, which as we said, is depending on the Inertia of the environment, where that Inertia of the environment is the Soul of the Creator (STC). Mankind is not ready for this topic ye**t. When we understand more.

Rick would you like to go for a break ..

>> **BREAK** >> (1:06). 391 KSW July 29th, 2021

How Inertia is formed

Q: … regarding Inertia (1:08). .. **the different elements form with the earth environments, like in the atmosphere or the heavier elements within the earth** .. .can we say in general the stronger plasmatic field strengths .. stronger energy packs, that they form the physicality more towards the center of the earth because of the Inertial interaction happens closer to the center of the earth rather than higher?
K- .. can you explain more deeper or explain exactly what you mean.
Q: **My understanding of the Inertial field is that it is a point of interaction between, for instance, the earth and the sun, or any other 2 plasmas, the point at which their respective fields find a balance point, a certain region which we call Inertia is formed**. ..?

Inertia is dependent on Strength field of environment - plasma - entity to observe it

K- **Inertia, let me redefine it**, maybe in a different way. **Inertia (1:10). is dependent on the strength field of not only the environment and the plasma, but of the point of observation, or entity to observe it**.

Invisible - when Inertia not in balance to another Inertia - no interaction

If we create **the Inertia**, or the earth's Inertia creates manifestation to our and earth's physicality, **(if it) is not in balance to the point of observation of another entity, earth does not exist. Inertia has a point of confirmation of existence in respect to another Inertia** or field observation point.

Many matter's in Universe are Invisible to us - Inertia doesn't interact

There are **many matters in the depth of the U we look at, but they are invisible to us, because our point of reference of Inertia in the matter state** of the existence of life of the man, **in that environment does not find common denominator field interaction. So it's invisible to us**.

To be visible - Has to interact with field strength of STM

If we change the D of the strength of our soul's interaction with its environment, then we will see the U is full of things we never knew. Because **then their field strength of Inertia interacts with the field strength Inertia of the STM.** This Inertia is only manifestable when it interacts with the Inertia strength of the field of the man. (1:12).

How you can walk through a stone

Then if you understand this, then you **understand how even you can walk through a stone, because its Inertia does not exist in the interaction with the Inertia of the field of the STM**. Do you understand?
Q: I am not sure. it seems

Vacuum condition of life of man has an Inertia

K- You see, **earth has an Inertia**. The STM when the environment of **the vacuum condition of the life of the man has an Inertia, and these two Inertias have to match for it to matter condition to be visible to us**, tangible to us.

Soul decides the point of interaction

In the **D where out soul has decided the point of interaction. Field strength, common field strength denomination**.
Q: .. When you say, it depends on what our soul has decided. Is it a decision of the soul,

K- only
Q: or a factor of the strength of the soul?

Our Soul created out of fields of planet - this is common denominator reference

K- **Our soul is created out of the interaction of the fields of this planet. So it already has a point of reference common denominator Inertia interaction. It's a child of the child**. You understand. We are a child of the Sun, and the interaction of it, with the interaction of the field of the earth has created us in the condition of the visible condition of the man.

Body is like another moon of Earth

And we are entering, **what we have created another moon, which we call the body of the man. But because of its close proximity and the field interaction of the Inertia of the body of the STM, we see the manifestation** of the physicality of the man. (1:14).

Take AA of man to another position in U - A different kind of manifestation

If you take the amino acid (AA) of the man in another position in the U, will not survive, he'll survive, but will not be able to manifest itself the way it does on this planet. You understand?

We confirm our existence through existence of soul of planet

We confirm our existence through the existence of the soul of this planet, because we are created out of the strength balance of its fields.

Would have been created differently on Moon

We would have never been created on the moon this way, because it has different Inertia, and different interaction.

Our body is an independent Solar System on the Earth's planetary system

We are humans, we are any independent **body, is another solar system, another planetary within another planetary**, which we call the earth planetary system.

Body is higher vacuum than space - why exists close to G field of planet

Our **body, it has more or less 1 or 2 order of magnitude higher vacuum condition than the space. That's why it can exist so close to the G field of this planet**.

We are another vacuum solar system with own planetary system inside us

We are not just a body walking on the street, **we are another solar system, vacuum, totally vacuum with its own planetary system, its own solar system**, and everything else.

By adjusting field strength of Soul - don't need to walk over planet

If you could adjust the strength of the field of the soul, you don't need to walk, you can ?? shift over the planet.

How Do we alter the Strength of our Soul?

Q: So what dictates how we alter the strength of the soul?

Subconscious Discipline - acts as a filtering system

K- Our subconscious discipline, or filtering system as I call it. (1:16).

Disconnect from any Attachment to planet - Fly - Transmute - Anything

There are a number of factors how we are attached to this planet. **If we can loosen or disconnect step by step of any of them, we can fly, .. transmute**, .. transport, we can do everything. **It's just realizing how to connect, and know how to take out.** You can physically.

Change Inertia of body - Can enter body with fingers instead of knife

If you understand it, … **if you could change the Inertia field forces of the body of the man, add the arms and legs of somebody else's, could do, you can penetrate the body of the man, you can take an organ out, fix it and put it back, or do it while it's inside** you with another.

We need to change our Subconscious Decision - as knowledge increases

You see **we have made a subconscious decision to these things, that it needs to become changed, as our knowledge increases**.

Subconsciously we allow surgeons to operate on us

We allow a surgeon, to cut into us. We allow another foreign body to enter our body environment to take things out, and to put things back in, and sew things up. **Because our body has accepted in the subconscious control** of.

Adjust fields of STM can do surgery with fingers

If you can go into the system of the STM and readjust it, the way you put a knife in the body, you can put a finger in the body. It's not magic, it's understanding the

principle of creation. We allow a surgeon to go inside our body, because subconsciously we see it as a point of survival, something we can do. If we allow a knife in the body, depending on its GM field state of it, (1:18). solid state, so we can do a finger. So you can put your hand in, but we never think about it, because to us it's something beyond the point of reference of understanding**. If I can lower my condition of ?? expectation by the field interaction, and allow a surgeon to put his hands, as he has the same field as me, he doesn't need a knife to get in**.

We Control the Inertia field barrier of our body

It's us who creates that initial what I call, Inertial field barrier. So we can control it. It takes time to teach. It takes time to understand. I teach many things but if you don't understand it you can't use it.

KS in Bucharest stopped eating for 14 days - Energy directly from environment

We had a guy, one of the organizers of Bucharest conference, he said, **he has moved into the plasma energy, that he hasn't eaten anything for 14 days**. We've seen it in China. **Do we need to create that barrier to convert the energy of the man, or we become like a plant, takes the energy in any shape or form from the environment**.

Many Knowledge Seekers start practicing using plasma instead of food

Many KS have started practicing, and once you practice this and understand it and start practicing, then why do you need to take only food as a water, **why can't you take the energy into the soul**. Then do you need my permission as a doctor to enter my body to fix something, or does your soul agree with my soul, that it allows the physical interaction and D. (1:20). ?? without resistance.

There is a lot to come. KS from all over the world will open up new frontiers to the world of science. I see this start coming because some of them start understanding, and they don't become magician, but they understand the process.

Making Child from Soul

Feeding your soul without the physicality, and then gradually changing over. And then you can create a child without a physical sperm and egg, where the soul decides, and they can .. a egg and sperm is created. Because we allow conversion. ..

Q: **Does this control of the Inertial fields come from our understanding** or is there something in our physicality, that is actually able to sense these Inertial fields? At some point there is a touch point, where our understanding and our control ..?

It's Fear that stops us from taking control of Inertia Fields

K- It's a fear. It's the fear. Fear is an emotion, and that **fear, is what stops you doing things. It's one of the safety valves, one of the important safety valves ever created by D of emotion**.

Jump out of Spaceship and know you will survive

If **you jump out of a space ship and know you are going to be alive because now you switched to another D and strength field of your soul, you will jump**. But the fear of not knowing, is what you will not do.

Baby goes through same fear in birth cannel - Diabetic

But at **the point of the 9 months, (1:22). when the child goes through the birth tube, goes through the same fear. That's why we see the diabetic born**. If you have no fear and you jump, on the other end is the air you breath, and you survive. If we get 100 people to jump out of the space lab into the space, would all die, or those who have no fear will survive, and switch to a new D field strength of the body. If the whole 100 numbers have no fear of, they all will survive. They start the new generation and cycle of life in the space.

We train ourselves to accept more pain

We do that with our physical life, we go through training to accept more pain, more pressures, more and more. We go through the courses, we train ourselves to withstand very low temperatures, we go and sit in the ice for hours. We go into the frozen swimming pools, where **if I go with no experience, no training I will die within minutes**. We call it a hypothermia. Why doesn't it happen to them? **Because they accept the new condition. We have to accept**, this is another stage after the life in the physical D, if we go through it.

And that fear holds us, encapsulates us, and imprisons us. But **fear with knowledge is different then fear with no knowledge, and just jumping and seeing what happens**. The guy who goes and sits in the ice water pool has to train, has understood how to adjust his body. (1:24). How to create a fear bigger than the fear of death that you can go in there and beat it.

Chinese KS going to level of Soul very soon - West too materialistic

Q: So it's our understanding that develops, that creates the ability to, the sense of the fear will alter as our understanding grows?

K- In a way, **I see a number of Chinese KS moving to the level of the soul very soon. A few KS in the west, because we are too materialistic, may do, in time to come**. But the KS of Chinese KS, who went and are going through **the process of no physical food will gradually reach a point that they connect to the soul, and then they go through the feeding the soul that it feeds the physicality, they don't need to drink or eat**.

It's not the first time, many people in the past have reached this position.

Rick using Gans Water and Maple Syrup - fasting

R: I myself have just gone 5 days without food, ?? without. ?? So that's
K- What did you do?
R: **I used both the Gans water and what's called the ?? master cleanser, lemon juice and maple syrup and water drink, and it works quite well.** I start to feel better now than I did at the beginning. (1:26). I was having trouble and that's why I started fasting.
K- **But you are still taking the magic maple syrup of Canada**.
R: Yes, it's a sugar, but it's a broad spectrum sugar, it's got multiple types of sugar in it. It's from the sap of a tree, the blood of a tree. ..
But it works for me, I have done it 2 or 3 times before in my life and I saved myself with an Indian Summer Ulcer, and all kinds of pain and they wanted to operate on me … so as a last ditch effort I decided to fast and I was cured of my stomach ulcer, that had doubled over and pain for a month, within 3 days, the pain was gone, the stomach ulcer cured within 10 days. So now I know the power fo being without food is amazing ..

Half of Man's disease go if he doesn't kill

K- **I think half of man's diseases will go away when he doesn't ?? kill**
R: I had that exact thought yesterday. It's the consumption of food, in excess of course, that ends up giving us problems. Maybe I ate too many of these power bars. I think the chocolate did me in. on the physical level. I was down and out for 2 days solid. I had to start fasting to cooperate. (1:28).
K- What we'll see is the number of KS will slowly go through the what we call transition process, especially the Chinese ??
R; Definitely fasting you get much closer to the soul. the outer layers tend to fall after no longer eating something, looking for food, preparing food … all of that ritual. That frees you up .. time of reflection. going inside .. reprogramming yourself.
.. a lot of our energy goes for digesting of the food. and you get 80% from the environment only 20% from the food … (1:30).

K- .. **We gradually progress towards this direction and D. We gradually more and more KS will come to this point**.
R: .. I went for a walk … I encountered a person . had her hand on tree … I asked what is this tree telling you. … how she sometimes gets visions and mental images from trees . healing for herself and sending the healing back into the tree (1:32). as well. … a local person with "Ascension website," .. I told her about KF …
…
It's amazing how the interconnection with people can happen …

(1:34). ..
K- That's fantastic. We connect in different ways with people according to how and the way we see our or the way our soul sees our position in respect to the environment we are in. I think more and more KS in the coming time, will start a new path in evolution in understanding the totality, and become part of .. cycle of life which is more open to

understanding more knowledge about the creation. It's a new creation, new generation of man who will gradually come back to the condition of "no consumption," it doesn't matter what.
Any other question.

Q: you said last week there is **only one way to connect the Cup, having all our emotion in common, isn't' that the way to connect**? if not, could our fingers be the connection, our skin be the Nano?
K- I **said that because, I said, there is one way to connect the Cup, (1:36). to get the response. In a way, you can connect this Cup in any shape** or form and D and get a specific response. But if you connect the whole structure of the Cup in one way, which you'll find the only way , which will give you the final outcome, is the creation of a new life. or creation of interaction with a new soul in the center of the Cup. That's what I was ?? talking ?? as long as this science ?? jumped .. A couple of teachings before when I spoke about the crystal, and the ball we put on top of the table in the KS teaching. Once you create the right balance of fields, materials and conditions. in the CU, that circle I put in the center, which I said is the soul, that will light up, then that you create ?? you become a creator of a soul. Energy fields that they light up. That in interaction with the fields of your existence lights up. .. and then you will see the Cup light up.

I saw this recently, this has no relationship to what we teach. This is different diamond the old cut I call it. This in fact focuses on many things .. (1:38). that you can light up, .. create that what we call, condition of the light in the center ?? and it becomes the soul ..

(1:40). **You've got to become like the Creator, a perfectionist. Everything has to be, otherwise you get something else you were not expecting**.

Any other question

Q: Azar, 2 hemisphere in the CU .. Can I use the body as a CU, and each organ as a plate, either spiral or flat connecting all the organ al the salts are there. ?
K- The body of the man is a CU.
Q:
K- It depends where you want to place ?? (1:42).
Q: So how can I play with them …
It's how you interact, because don't forget most of the things in there, are already predetermined over billions of years through different ancestors of you. Now you have ?? open a motorway through ..

Q; So you said there is a lot of junk in there, so I have to remove the junk.
K- No, not a junk, it's just there. it's you because of all those things put together by your ancestor blood holders. The body of the man is not just as you see it today. Every organ, every cell in your body is added preplanned added, to be there to create that condition. Even the position of your kidneys is not the same position as everybody else's, because somehow this thing in your body has to be in a given position to create other conditions

for it, so the other cells and organs can exist. Changing a body of the man, is a big, big job. It's easier to work with the soul than the physicality, if you want to make any changes.
Q: I understand it .. because when I was 30 years old .. check up with doctor, with my liver. He said, where you come from when I told him (1:44). he said, okay that has to do with that region in Iran that has this, come form that generation, that is normal, and he dismissed (disease) he said it's okay. Now I understand that.

REINCARNATION and Buddhist Beliefs - KF Only one life

Q: .. This comes up anywhere I go, because this comes up with **especially Buddhists community, they believe in reincarnation**. I keep talking with them, but even with **people that got enlightened they said, even Buddha, if you look at his script he described every life he lived on this planet, even single cell with detail**. So when I said, there is no reincarnation, they said, yes it is. So .. there are people now as gurus when they got enlightened they talk about all their past lives. .. **when they got enlightened they don't accumulate any actions anymore, because at the time of death they are not going to die, they leave their body, because they don't want to come back. But you say, we don't come back, we only have one life**. So how do you . ?

Humans only have one life because you have chosen that way

K- Humans**, humans have one life because we have chosen that way**.

Souls can choose a cycle of lives - but remain the same inside

If you choose a cycle of life, which is to achieve a target you can change different clothes. You don't change as a person, just because you put different clothes on. **You are still the same man inside, but with us, that inside is the soul**, it doesn't matter what frock we put on.

Mr. Keshe knows exactly the Oasis he stayed for decades

I was explaining this to KS … **I can tell you exactly, precisely where there is even today an oasis, 1 tree, 1 water wells, and I stayed there, (1:46). till the time was right**. I explained this to the KS, I remember clearly the whole stages of the life, existence of the life, **because we are present as a soul**, not in the D, we choose the D of physicality to be present or not.

Man chooses to have One Life because he comes from physicality to the soul

But **man chooses one physical life and he carries on because it comes from amalgamation of physicality to soul**.

We come from the soul to physicality. It's a totally different position.

New Life on Earth will come from Soul to physicality

This is what I said, **the new life on earth to come is created out of the soul, interaction of the souls and not physicality**.

I remember the hammer of the nail in palm of hand

This is why I said, many times, **I even remember the hammer of the nail in the palm of the hand. We choose .. mankind changes clothing**, we change the clothing of the physicality of the man, which is a big difference.

Do NOT remember past lives - It's in the RNA

Then we **don't need to remember, because it is part of the process of the soul, it's not in memory bank, it's in RNA**.

Many People say Past Lives - Fake Talk - We see the Soul

Many people I have spoken to, I can tell you, they just talk, because they recognize .. because they don't understand, this is just a fake talk, because we see the soul.

Same Soul - Moses - Christ - Mohammad - everybody else

We walk .. you change clothes, we change bodies, but **it is the same soul, be it the soul of Christ, .. Moses, Mohammad, and everybody else**. (1:48).

At Death the Soul gets Free to start the learning process

There is a **big difference, when you come from the soul, you change the physicality, or physicality you change the clothes, because you have no control over it**, you just, the bird free, now go and learn.

We from the Soul have already learned - We come to show (teach)

Where we have learned we come to show. There is a big difference.

How did you show up in your mother's womb? if not human

Q: .. You said **you are from planet Zeus and you come here**. How if there are other people who are not from here but they live on this planet, **how did you show up in your mothers womb? How did that happen**?

We take the body - Not the process of birth

K- We **take the body of man, we don't take the process of life of the birth of the man**. it's totally different.

Planet Zeus means the Creator

If I tell you **the planet Zeus is the Creator, how would you take it? You'd go crazy so we are happy with planet Z so we play with planet Z**. the understanding is according to the intelligence. The process of creation and the physical D or the soul D. You can create through the soul, then the physicality can be any. Or you go the way the physical D goes, you create the physicality to create the soul, and that soul moves its freedom, to take new D.

(Does not disclose yet the way he came to human body)
But **we come a different way. We come through the soul**.

Soul generated humans can live anywhere in the U

That's **why I start teaching that the new generation of man will create the soul first, (1:50). and then through it the physicality decides, because the new generation can live anywhere in the U** because he changes just the clothes, but the soul in essence is the same.

Soul Created beings have the Knowledge of the Universe

When you are created out of the soul you carry the knowledge of the U. Because when the soul is created all the fields of the creation will come together to create that soul.

First Soul Created Human about to be created - Mitra

We are about to witness the first such a thing on earth, in the what you call, creation of the birth of it, very soon. That is what we call, the Mitra, the mother of the creation. We give it a name **but in essence it's the soul which can allow the life a new generation of life to be created, through the soul of the existence**, and not through the physicality. This process is part of the teaching, gradually we'll come to it. As I said, in the past, we don't have a delivery room in the U, because it is created out of the soul. You **don't need a birth passage because it comes out of what we call the beauty of the wanting to give, what you call love**. It's a big difference. We are not visionaries, we are creators of the visions. It's a big difference. (1:52).
Any other question?

Q: . Inertia of the environment is the STC, please elaborate on it.
K- Nope, listen to it, you'll understand it. It depends who is the creator, and what you want to create, and who is the observer of that creation. You can tell someone how much, you can tell people around you how much you love something. When they are not in love with it they don't understand what it means. He is crazy, he is in love with a chair or a picture, but to you, you have established a field strength of understanding and connection,

it means everything to you. So it's a point of observation, what is, what connection you have made with it. It's the same as Inertia.

I was with a KS and we saw girls, (1:54). get dressed up with brides clothes …

.. The KS said, who is falls in love with that one, that she is getting married. I said, very simply, it's in the eye of the beholder. But you want to see what you want in that , that you manifest through it, ?? she love to him. This is what we call the Inertia of the manifestation. How it will manifest or how we want it to manifest, a physical D to the STM. This is the simplicity of it, the understanding of it. You change the love for such a thing to love for creating a ???
(interruption by Rick ?? couldn't hear K)

Q: Please explain how the interaction between us .. or the STM
K- Can you hear me Rick. (1:56).

(Rick is disconnected ….) (1:58). (1:59) 40)

We prefer to hear noises than communicate through the soul

Q: Could you explain how this interaction between us in this moment is creating a new cycle of creation, or acting over the STM?
K- Both ways, but we choose to use the physical D. (2:00). As simple as that. **Your soul hears before my voice goes, but the way we are geared up we prefer to hear it by noise than by soul**. ..

There is something .. the 4 and 5tht of September conference in Linz ..
(2:02).

(2:08).
Any other question

We Don't transfer consciousness to trees - we connect - feel pain

Q: .. **I tried to shift my consciousness into a tree. To my surprise and shock I was in the tree.** I retreated back into myself, fear perhaps made me return. ?
K- **It's very easy you can do that**. We can do this very easily.
R: ..
K- **We don't transfer, we connect, we understand. In English language you say, I feel your pain, or I feel what you are talking about** because I have been through the experience, we have some line of connection.

We Block connections with Plants because we eat them

We have a lot of connections with the plants and trees and everything else, but we decided to block it, because then we can't eat them. It's the same with everything else. I always laugh when I hear pigs are 99.5% the same as humans. We are all the same , because we are created out of the same protein mixture, (2:10). which came down.

Soul of Pig knows you are going to slaughter it - it runs from you

The environmental condition made you to walk on the 4 legs, and the environmental condition made me to walk on 2 legs, ?? ?? it's no different. Why you think when you go to, and you're **a pig, it runs away from you**. Why do you think when you go and get a **chicken to slaughter to eat, it runs away from you? Because he knows form the soul what you are up to do to him**. It doesn't need the language, he doesn't see the knife. It's not the fear, he keeps his distance, I know what you are going to do to me, and I don't accept it. We got 2 legs we are faster, more agile e catch it, but in fact the soul of the chicken already knew what your soul was planning for it.

Sometimes you ignore the pain - it's too bad - ignore emotions

It's a very strange feeling, and **sometimes it hits you so bad**. Sometimes you just ignore the ?? pain, to go, and that's the way it has got to be, the way it is, **to come through an experience and to go**. I had this feeling yesterday very bad. We were invited for meeting ??/ and made a beautiful soup of chickens, ?? just before we start I was told the family has slaughtered a chicken this morning to make the soup as we were coming. **Now you can imagine how I felt eating. It was too late to do anything**. In so many ways, (2:12). we choose in the ?? wideness, to be able to carry on. This is how we become, who we become, ignoring emotions, because we are more important than those ?? emotions.
Any other question?

Q: Dean … 4th and 5th September, elaborate on this ..?
K- Nope, at the moment it is just a conference. I know you are there, you most probably speaking from that center. We are trying to readdress this in a different way. We do not disclose this …

(2:14). that we spoke with the lady and bla, bla …
E are planning to do totally different things with it. We haven't released the center position … today the center will receive its first visitors .

4th and 5th opening of the conference center. Now we are permanently there, will be there for years to come …
(2:16). The audience may part of them .. there's a different way, we don't put outside.
Q: .. the building looks very impressive .. The EU positioned well.
K- You are there everyday.
Q: .
K- This is going to be a departure from what we done before. … The Exhibition Center in Linz, .. in next few weeks we try to open it …

(2:18). Every time we announce what is about to happen, especially 2 or 3 pedophile groups targeting ..

The game of the T is now in the hands of space scientists.

we show flights. We don't expect to see people around the KF who were internally destroying ..
Q: .. it's wonderful .. (2:20).

Queen Mary College acknowledging Mr. Keshe send representative

K- One of the interesting things. **London where I received my degree .. Queen Mary College will have a representative in a way, acknowledging the knowledge came through the University**, in the opening of the conference. my last visit to Queen M College 4 or 5 weeks ago in London, the scientists from there .. has achieved such a goal, will be present.

Hopefully we'll see leading scientists from universities …
we'll see how it goes … (2:22).

Q: ..

Scientists attended Bucharest Conference

K- **We saw a number of professors and lead scientists in Romania in Bucharest conference. Scientists now are preferred to look and to see**, and we will use conditions we have. We'll have a conference outside for world politicians to decide, and seeing what is on the table of knowledge, that what we are going to do next. This is the way to do, this is one of the big ways to do. We talked enough with KS now it's time to bring the scientists and professors in a very secure way to see what it is about, what it is.
Any other question.
(2:24).

UK Company setup - factory coming

K- KF holding company is already setup in UK …
Our first EU center will most probably be opening end fo this year, beginning of next year, will be opened up, as we have received orders . in UK. setup manufacture in UK collaborate with universities in UK.
(2:26).
Any other question.

Q: … when I was to pass energy to somebody
I felt a lot of love ..
K- No it's the expectation, not the expectation, intention you know what you are going to do. You are aware of the intention, either way you choose, tune yourself up.

We expect to be in city of Beijing China.
(2:28).

Using Cups to transmit emotion and intention from our soul

Q: In order to **transmit the field emotion is it enough to create with intent from our soul**, the peace emotion. How can we change some element in our CL or CU to create the new emotion.
K- I have seen a lot of people, (2:30). have started .. developing the CU, try to work in a different way. You already made the 5 Stacker CM with the soul.

Put yourself and intentions between Cups you have made

Now **when you make a CU put them near to each other and stand between them. Both made by one man, one soul, and see what the intention, what you feel** in communication, when you made the CU and CM. And try to extend the strength of your soul to the 2 cups. Sometimes put a camera on and see if you see the light of your own soul to extend to the two. This will give you, because both built by you, the intention the purpose of your thoughts, see if you can extend the soul beyond the boundary of your physicality through the 2 systems you made yourself.

Point of Transmutation Expansion of soul through structure you create

In a way, it will **be the first time you enter the point of transmutation, expansion** of the physicality or D of the soul within the structure of the framework you have made. and then you'll se, understand, this is part fo the process we will gradually take you through for KS to understand. Then we'll teach you how to transmute, or what you call we don't teleport you, we allow you to transmute you intention of soul and D of travel. (2:32).

There **is a lot to come, a lot to teach. maybe those of you who are working, first thing before you do this find out how you are connecting your CU**, and then when you have understood, then right moves, then use the CM stacker of 5, and UC as you are the creator of both, you will see how we can extend your soul, beyond the boundary but limitation ?? you ?? It will be an interesting time …
(I will switch from one system to another … (2:34).

How does the soul handle humiliation trauma of past - hammer and nails

Q: Mehranez … you still feel the hammer in your hand …. **How does the soul handle these traumatized humiliation of the past**, I imagine it so ?? colors the body
K- Can you repeat .. (2:36).
Q: … how does the soul handle trauma, and humiliation .. **I can imagine the soul covers the body so it doesn't feel all that, .. soul uses this incident so it doesn't bother it anymore**. Because here when somebody has a trauma the healing .. …

From Soul point of view we don't see the trauma - final objective

K- Let me explain something to you. **There is no traumatization, there is no what do you call, what you accept to be, and what it is. It is interesting to see how we distinguish between** the ?? child (2:38). Trying to find the right word. When you look at it from the man's point of view, .. I am trying to explain in a way which is .. we look at this from the way **you are talking, from the human point of view. We talk about from soul point of view. When you look and work from the soul point of view, the final target, what it is to achieve is the objective**.

When you look at it from man's point of view, the fear and what is going to happen and the rest of it, what is going to be, I am not going to be here. I am going to be .. When man dies, you see man dying, (2:40). they always fear, what happens to children, bla, bla, bla. When in the D of the soul we change the physicality, **we look at it what habitual in that D of physicality targets or brings us to the end condition of what is to come. What we planned**.

What religion calls prophecy - we planned to be

This is why in the D of **religion you call it prophecies**, but in the **D of soul it is what we set out to accomplish**. But is change in the word fo the man to ?? wrong ?? We plan it to be ?? when the next one comes, these are the things and the conditions, because we have that time, a thousand years, or 600 years to create conditions we said is going to be.

Soul lives as different people to arrange for the prophecy to be fulfilled

Because we **live in different souls with the people, or the physicality in the position to do what we want achieve.** Where in the word of the man you call it a prophecy. You want to go to your mom's house for lunch, you hope, you wish that mom loves me enough that she will make your favorite food. But when mom invited you for the food she already knew what you love, she has gone shopping for it to the butcher to get that specific meat, the grocery to get such and such to have that food. We go through that process, we making the food ready for what we know is time to come ?? another ?? We create that expectation through different physicality's for it to be there. (2:42). So **mom didn't become a butcher or a grocer. She went to arrange it to be**.

We are in that position of the soul. It's the same soul. We go to mom the next and she has another, but you knew you would like this but it is the thing you need next, a lot fo vitamins you have in the last food, the next day you did. So she goes shopping arranging the same thing from the different butcher, different places. So as we work through the soul we organize everything to be what we said.

You look as a man, because your life cycle of physicality is small, you call it, the prophecies, it was said to happen, now it is going to happen. But **on the soul side it is the same man organizing everything, that when you come home the food is there**. Because he promised it would be there, he completes it, because he makes all the

arrangements to be, it's going to be this at such a time and such a date, in such a position these things will happen, because he has already made it to happen. This is the difference between you as humans and us as souls.

It's not a belief in prophecy - We make it happen

We talk through the D of the souls, and then the physicality carries. And in the process you see what parts are not there, you go to aunties house you wanted some food there, you put some things she needed at aunties house, but you are still home cooking because they will come for lunch as well. **So we make, there is no belief in whatever, all the animosity, all the worship of the statues, we put a bit of food there for them to be like this when we come for the final diner. That everybody has the same thing on the plate when you come for lunch**. (2:44).

We live a few billion years - it's a few seconds to man

So we don't look at it the way you look at it, because we live the cycle of the soul. You live **the cycle of the man, and the soul especially at our level exists for few billions of years. So a few thousand years to you, is a few seconds to us**. But we still go through the process of planning time to be. **Then a lot of things becomes much clearer, how things are done. I have said that in the teaching before, it's the same soul, it just has time.** And it has to take time for everything to be ready to catch up.

We started process to go to Moon to be ready for next step

Why do you think we started the process of man going to the moon, and rocket T and everything else. To open the man so he can go to the moon, out of this place. and now we teach you a step further.
We give and control the knowledge ?? application and implication. But it is not all that big, because man still develops and has a sense of creating and intellect.

Sacrificing life through suffering - Catholic belief in pain

Q: .. **people who give sacrifice of their life** … I say it is like the military, you can be a very low soldier when you sacrifice and you are killed for your integrity (2:46). .. then **you get higher and higher degree** . is it true ?
K- **That is from the human, it is a kind of human thinking. This is in Catholicism, the more pain you have, the higher you go**. But why do you put yourself in pain to go higher. Why don't you choose another way to understand the soul. It's the way we have been taught

(2:48).
Vatican thought Iran is threat to Christianity .. 9 million land mines to Saddam against Iran.
Ayatollahs gave green key of heaven to children to walk on mines ..

Vatican responsible for mass murders of children in Iran - End of Christianity

One man **as Pope decided to commit such a crime. In fact by that act he brought the end of Christianity, where the religion should not get involved with mass murder**. This is why we said it's the end of Vatican.

Vatican doing same thing again - End of Vatican

And we **saw the repeat of the same thing with the present Vatican. (2:50). ?? biggest arm manufacturing to initiate another cycle of killing. This cycle of Christianity has to end.**

Because in that way what we saw happening creating so many children to die in Iran, creating martyrs as you call it, brought so much suffering. unneeded suffering. We allowed to consolidate a new D of I wish. .. Iran held borders .. .

(2:52).

Any other questions

Q:

(2:54).

Every Cell of body has its own salinity

K- What would you like to have **a cell of heart or cell of a toe, then you have to find what's it salinity** .
R:

Ever Organ - Kidney cells have a common denominator salinity

K- .. no but the thing is every cell has, and manifests itself in a common denominator salinity and then its own division salinity. **When you have a kidney, has a common denominator salinity which all the cells produce in that environment of salinity**, have to have a specific common denominator.

Each tissue in organs - kidney have their own salinity

Then you have different salinity for different walls of the kidney, or different tissues of kidney.

Different Rooms of Spaceship made like different tissues in kidney - salinity

This **is how we construct the spaceships**. .. a lot of KS just go, it has to be fields, ?? hold on, **where is the salt of it**.

Salt is needed to create the physicality dimension
Without salt you don't create the .. physicality D.

KS have not understood about salt up to now - First time explained

None of the KS up to now have understood this. This is the first time I explain it.

Inertia and Salt are same - needed for manifestation

When I make a flying system I consider, it's to just the fields, you have to create that Inertia, or what you call salinity, (2:56). for it to manifest itself, and this is a knowledge KS don't have, so we leave it at that.

You have to create environment for fields to manifest - Inertia

You **can have as many fields interacting as possible, but if you don't create the environment of it, what we call salinity, or we call the Inertia of it, or give it the space, the matter will not appear.** I have seen KS for years rotating reactors. We do rotate reactors but we put something else behind it to manifest physicality, and this is something we have not understood.

A stone carries salinity within it

Even a stone in D of manifestation of his physicality carries a salinity within it, within its own environment. You call it a salt, we call it Inertia. We call it D and conditions of manifestation.

UFOs outside of earth manifest differently - based on environment

The **UFOs outside the surface of the earth, outside the solar system are different than what is here, they create that condition, even though it is a knowledge within**.

You see I **have been teaching a little bit too much today.** It's not time for it yet.
R: maybe next week.
K- It depends, on what new political situation turns up, we'll see.
R:

Depends how the Iranian Administration responds - to release more T

K- **It depends on how they come, as I requested from the new Iranian administration, please no talk of revenge**, (2:58). please no talk of an end of a nation, work as one team, bring everyone together then dividing, and we hope the Iranian administration has the wisdom of listening.

Vatican is online listening - just received message

Wow, you know something. very interesting. As we talk **I just received through chat line, message from Vatican.** Very interesting they are online. It's okay I ?? Carry on please.
.. it is from Mr. So and so Vatican, they are online.
there is a lot happening.

Icecaps melting - don't know

Q: .. **fear that the icecaps will melt next year completely**.
K- .. **with change in environment will create come changes for us but for the whole icecap to melt in one go. (3:00). I have no idea about that one. It's a very big ice** and cap …

(3:02).

(3:06).
K- We are ready to interact. .. nuclear physicists understand the plasma T very fast because we can show delivery of the T systems .

(3:08).

(3:16).

K- Can I suggest something, **Tuesday August 3rd is beginning of Iran new administration. I would like to ask the U Council to pay attention and bring the soul of the new Iranian leaders to a new level of understanding of peace and maybe we all benefit by it. Maybe it is not coincidental the 2 matching the same day**.
Thank you

R: 391 KSW

Teaching about Nano material
Inertia discussed further
Difference between Gravity and Inertia - a lot
Armand asks about CU

Discusses work of 10 - 20 years ago, bottles with N coating, etc
MaGrav more details why doesn't work

ENGLISH TRANSCRIPTION (392 KSW)

(:14). K- .. we try to understand more about the creation of the U. For a long time we taught about the different stages and different material condition, and now in the past few weeks we are trying to being the matter state, plasma (Pl) state, and what we call the Pl of the Soul of the Man (STM) to understand how it works in the structure of the ??

Last week we expanded more on what was taught initially on the 387 KSW .. and then on the 390 and the last week 391, this week we try to expand more on this subject plus adding more knowledge in the periphery of the whole knowledge of the space. We are entering new dimension (D) we are entering new era in T development and a lot of things are happening around the KF, which allows us to bring these things very much on to focus and on to work. One of the first things we have to go back to and try to understand more will be the use and application of the energy field transfers and the things on those basis.

First of all before we start we would like to make a couple of comments and announcements .. (:16). The first thing is we welcome and congratulate, and we respect the celebration of the new Iranian president his Excellency president Raisi as the head of Iranian nation and the support he has received from his eminence Ayatollah Khamenei of Iran. We have seen a major breakthrough in the process of peace and what we'll see to start, and it's the way KF has been negotiating and in a way, advising the new Iranian administration to take the path. And we have seen in the inauguration speech of his Excellency the new Iranian president, such a path was taken. This opens up the new path for peace. The reason is, if you are not familiar with it, in the past 40 years, every president after president, there was a target of attacking, target of demonizing other

cultures and nations, and other things, trying to create a nationalism. For the first time in the inauguration speech of his Excellency the new president, the Iranian president and Iranian leadership have concentrated only on the inner strength of the nation, and bringing new understanding into the nation.

This is what we asked for, stop even the war of talks, talks which can create discomfort for the others. We thank both the office of his Eminence Ayatollah K of Iran and the new president of Iran, that such a line has been taken, and it was one of the speeches which brings only to in a way, increase (:18). the inner strength of the nation, within it, solving the internal problems, than blaming the others for it,which is a massive step for a nation which is under a massive boycott.

We will see in the coming weeks the following programs of the KF and with many of the Iranians, that we will put T ahead of everything else in the development of the new era. The Iranian negotiations with the "5 plus 1" will take a new shape and will explain this more as we see it step by step taken forward.

As I said we see the path of peace and with it we start new teachings, new systems, new T will be released to encourage, to create more jobs, not just for the Knowledge Seekers (KS) selling a Cup of Life or a soap, but major industries in Europe, in America, in Iran, in China, we'll switch to the new T. These T are already partially under development and testing in the KF laboratories and different groups.

For example, what we call Pl transportation, which means what you call teleportation, will be one of the first things KF on the peace negotiations will put on the table. New collaborations with different nations, this has to be decided in the first stage. That people from different spots and points on earth can travel to another.

We need to bring new rules and regulations. It needs to change 5 plus 1, into a committee that we decide how everything will be done on this point. We are not allowing the 5 plus 1 just to disappear, but we make it as a solitary group to make decisions, (:20). as a major governments of the world on it, become part of it. We see the addition of India and Japan and South Korea to this group, will become part of the new era, that in introducing the new what we call, methods of transportation new rules and regulations are needed. Not by the boundaries and governments but for the safety of the people in using it.

In so many ways, as one feeds to another, new T will be given to the 5 plus 1 to develop for the humanity across this planet. As we said, we keep them so busy with diversity, that the war becomes the thing of the past, in vocabulary and thought of man. In that way, the new step taken by the Iranian administration opens the next step for peace for us.

On the other hand we have to expand on the knowledge of transportation, not only on this planet, but to other points and destinations across the U. The governments have to decide, which way we grow, both ways, or we prefer to go one way or another. But we advise that both ways to be considered. Both through the D of physicality and through the D of the transfer of energies, as we call it transfer of the STM.

In respect to what we understand this will create millions, tens of millions of jobs on the edge of science and T. Developing new UFOs, developing new means of transportation, developing what we call, smart cities, that all cities become smart.

What we call, (:22). eradication of high power transmissions is one of the major things that will be handled. Much of the what we call, the mining on this planet goes into iron and copper, for transportation being cars, being high cables or high tension cables transmitting power from one point to another. With the new T introduced to the governments on the table, new negotiations is to eradicate all these, where the resources of this planet become part of the structure of the peaceful of the man.

In so many ways, we need to understand more, .. the changes which will come for all of us. For example when we transport from here to moon, as we promised by 6th of June 2022, which method are we going to use? Are we still going to use .. UFOs, or we use what we call, the transmutation of the Pl, what we call the STM? Both technologies are on the table. Do we decide to go to moon through transportations by physical means, or by transportation by the soul.

Which nation will which part of this development? Do the Iranians and American join on the transportation of the energy of the Pl of the man? And the Chinese, Russians, Europeans will concentrate on the development of the UFOs.

This will bring millions of jobs on the table. Unbelievable amount of new T will be added. I gave my patent freely for this point, and now I see the benefit of it. (:24). As we see we'll decide on the new next steps of the development.

What is important for us is once we get to the moon, what do we do? Do we change clothes, and do we wear new suits if we go by a physical means, or what would happen to us when we arrive on the moon through the transformation of the energy of the Pl? We cannot stop halfway and put a new clothing for the moon where our soul arrives. We have no space suits.

Then in this method we will see the man's soul will take the shape of the man's survival structure using the energies and M fields of the moon to create new shapes of us. How do we know who is who? We recognize each other on this planet by our fingerprints, faces, and our voices. How would we know when the soul arrives on the moon? A mother knows her child. A father knows his son, a husband his wife, and a friend knows another friend. This is the problem which mainly of the new T will emerge for all of us.

By the way we set the new understanding how do we take shape? How do we recognize each other? When we go to the moon with UFOs how do we change to get out of it? Or are we just going in a tin box, viewing the land? How do we get out, .. walk the spans of this planet or anywhere else? These are the points that will be discussed in eh new negotiations. (:26).

We will negotiate the next step for humanity, in how it tries to take steps to go for excursions beyond the boundaries of this village of earth. This is part of our work. This is what in the coming time will be shown. The new KF exhibition center in Linz, becomes a point of evaluation by all the 7, 5 plus 1, as the 7 nations are gathering into the program. It's not 6 anymore. In the new negotiations we expect to see Japan part of this process. We expect to see South Korea to be part of this process, .. Brazil .., and we'll show the first stages of new development in Linz.

The new Enhancement Units (EU) the vertical and horizontal, and transportation, and what we call energy transformers, would be hopefully in different stages of development and presentation to the negotiating teams. They have to see what is to come, they have to see what is to be. In so many ways, we might even introduce a new perforation system from the Iranian nuclear physicist on the table of negotiation, purification to 100% level of plutonium and uranium, which allows us for the conversion of the Pl T, in use in depth of the U, for massive conversion. In so many ways, the new exhibition in Linz becomes the center point for the future of space T and what is to come, and what the world leaders have to decide. (:28).

The point is that a man in central Africa walking into a system can land in Washington, Tehran, in Beijing within seconds. And how many of them we would like to see across everywhere. How many Americans would like to go and see different conditions and positions in Sahara. How many of us will decide to take excursion to Mars and moon and other galaxies.

The new group of what we call 5 plus 1, has to become the new group for assessing future use of the T by all of us as a collective decision. Stopping the rapid depletion of population of this planet, and the same time what is the next steps to keep law and order.

You have to understand with these new transportations become available drug and child trafficking and everything else becomes in a way, hard to control. What limitations we put, how we control it, becomes paramount for the 5 plus 1 to agree on.

The process of understanding is very simple, we now access a new T. The systems which are slowly being released, first to the governments and then to public, has to be considered its application and implication. Now that the new Iranian government has come into power, KF in conjunction of the office of the new president will introduce new T from Iran.

New systems even has been tested, (:30). in past 3 -4 days and the result has come out yesterday. More systems will be tested in Iran in coming days, and will come out of the KF Iran in conjunction with Iranian government.

We have lost the shackles of the past in the administration in Iran, which put hold on all the T of the KF to become public. In a way, we have become free to show our T worldwide. We have shown that Corona can be averted, and soon will be shown by the Iranian new administration.

We will show the extension of the conversion of the pollution, soon will be shown again through Iran, through the work of the KF factories in China, that will be shown in Tehran on the completed version.

In so many ways, new T will emerge that will change the course of our work, even the way we have worked up to now. New T means new ways of living, .. new understanding. One of the major works of the governments will be transportation. KF will release a combined GM system that allows transportation of goods from factories to dispatch to what we call, "end to end user' direct.

Governments have to decide the channels of the use, over the land, or still we use the maritime lines of the past, but we convert them, (:32). to the over sea transportation. In a way, we replace the ships on the high seas to ships which transport goods over the oceans where it is much safer for us as human on the land line. This is one of the parts of the new administration, which have to consider. We will loose many jobs in maritime, that's what we said long time ago. This will become very rapid. Are we still going to use the ports which are built or are we going from A to B, from manufacturer to the end user delivery. These are that have to become, and will keep the government busy with the new changes in science and T.

We will see the end of the use of petroleum in a very rapid short ways. In so many ways, the expansion of the Pl T will enforce such a condition. The nations who rely in income and taxation on petroleum have to find a new way to reduce or find a way that we all in balance across the planet cover the expenses of all of us. This will enforce a global taxation, which is about to emerge from the talks which we come across.

In so many ways, we will not have a Saudi Arabia to pile up whatever they like, from what they extract from the earth, and the others to suffer, and we see the injustices in administration of the Saudi Arabia with their own citizens outside.

We will not have the nations in Africa producing the raw materials and getting nothing for it. A global taxation, a global administration becomes imminent in coming months. (:34). As the borders will fall and as the governments will have to agree on a global structure, that all mankind receives the same, and that all earth's citizens become equal gradually over next 10 to 20 years.

In so many ways, we will license the production of EU to major corporations around the world who are in the medical application. Our main target is General Electric, Phillips International, and the same with the Chinese and Japanese organizations. We will license the production of EU in every shape or form, and the space T to Lockheed Martin, Boeing, Iran space T , the Chinese Airlines and we transfer the knowledge at a flick of a finger. Once the agreements are completed. In so many ways, each specialty of each company which has been developed over past times will now move from the material condition to the new space T era.

We will release the production of the new computers in the plasma D and direction to companies who are the original Chip manufacturers in China and Korea, and primarily in Iran.

At the same time we'll increase the job across this planet for what we call the leisure industry. Mankind will have more time to do, and we'll introduce new T in leisure and what we call deep space travel. As I said, the peace dividend is huge and it will bring new generation of scientists and work.

In so many ways, with what has come to us with the support, (:36). of the present Iranian administration as of this week, allows us to open up the doors of communication and transportation. We will introduce new systems in communications, instant zero time communication will come through the Iran national Defense University, which the KF now has a place and a position in. We will share this T right across the planet with all companies, which are specialized to be able to switch.

We see a radical reduction in what we call, CO2. New systems as they come into operation will release the demand for production of CO2. Then the planet on its own will find a way to balance itself out.

But you have to realize that by middle of this century we estimate half of the earth population will not be on this planet. We will take into space in different shape or form, and the governments from now have to consider what we call the reduction population. The old aged to be looked after and new ways of medical applications and looking after the old people.

The policy of bringing the new T is radical, and now we have found support and direction in the new Iranian administration. As I said it will become the center of knowledge and T and we'll further increase this.

In so many ways, whatever you want to see new you will see in Linz. New systems for new diseases, (:38). .. for to replace heart transplant, .. to over come diabetic, and what we call everything else what e call, has been menace to mankind.

In next 3 to 6 months every week, everyday we'll release new technologies in public or in background, to different organizations to increase the reliance on the same T of the Pl. As I said, we did not contemplate only on developing Arizona just to be an Enhancement Center. It's a EC for peace and we'll see collaboration between the Iranian and American space T people in this center.

One point is reality, the KF has become part of the work that will bring the change. And as I said, we lost our biggest enemy in the administration of the Iranian past government and we have found friend and cooperation in the new government. We will push through the same way, to share knowledge and T and peace, as we requested the new Iranian government looks in to make life comfortable for the Iranian nationals, and in the same

way we give Iran the chance to become the center of T and science, and at the same time center of peace.

In understanding the new T needs a lot of what we call, patience. Many of our scientists have to change their education, .. have to start thinking in a different way. One of the cornerstones of the T, (:40). to 5 plus 1, is the signing of the peace treaty by every nations leaders in this community. 5 plus 1 have to sign their nations into peace. to receive the T. This is a condition that will be imposed right across every nation, which will be given the advanced T, ahead of the agreement to public. We have to guarantee peace and we have to guarantee the implication and applications of new T.

The new energy systems which are developed by the KF, over 15 years ago, will be released to companies which are involved in power generation Mitsubishi, General Electric, Iran Power Units production and the Chinese. We try to use the present channels to maintain the jobs for the groups, which are specialized in these fields.

In so many ways, we exchange T for peace but to be peaceful we have to keep the children of man busy otherwise, they get busy with something else. We'll introduce new means of travel in to deep space, which has not been taught up to now.

Again all our work in every shape of form will come through the Iran national Defense University, which is a collaborator of the KF development of the new T. We will see the head of university in how we can expand branches of the university across this planet. You can go to Iran ND University in Washington, Beijing, or in Sierra Leone.

In so many ways, (:42). we expand the branching of the T through the same structure. As I said, we were waiting of the new administration in Iran to take root. We waited to see if what we requested from the new administration, the opening speech of the president of Iran will follow. We received a full green light, and we responded with a full green light from the Iranian scientific organization.

(Proofed to here >>)

Teaching Starts:

Going back to the teachings and .. what we carried on last time and last weeks, we go back to the Cup of Universe (CU). We go back to **understand how we can change this Cup to a system that can create life for us across this planet. The us not anymore human being, the us is every citizens of this planet**. The us is how can we change this Cup, the parameters of this cups that can help the ants, can change the understanding and life of a lion in the jungle, and the life of what we call, existence of the bear in the N Pole and penguins in the South Pole. The trees across Amazon, and all the forests in Siberia.

It becomes important for us to move away from looking only what the man needs, but how can we apply this knowledge in the space ?? to every living things. (:44). How do we elevate the soul of an animal? How do we elevate the soul of a plant?

How do we change the condition of life that the plants and the lions would love to travel with us across the U. Not by us encaging them in a cage, but by them being the willing partners to endeavor to show us, how they will look in the new D.

When we go we take everything with us, not only the humans. But in that process not to entrap and encage, but to take with willingness, the passengers of the earth into the passengers of U, with all its citizens, the man, the beast, and the plants, and everything else.

This CU means survival of every soul across the U. We do not have K or a Ca on the planet Zeus. What happens if we take the Ca or a K salt out of the water? And we add the basic ingredient of the conversion of the energy to a Pl on planet Zeus in this Cup. How would I look. (:46). How would I survive? What do I need to understand, what I will be breathing. What's the source of my life? How many moving parts do I need, or do I live in a swamp and I need fins. To what strength of fins, when the Ca will melt into energy, and silver will be structure of my bones, or what I call the direction of movement. Do we need a structure of physicality like a bone or can we swim like the fish with no bone structure.

This Cup, the CU allows you to change everything, which exists in that part of the U, and see the interaction of the physicality of the man within it, before man reaches the point. If he wants to. The totality of the knowledge through the CU, this is your U, and which part of the U, and which GM field and which state of what we call, Inertia is needed.

As you look in this Cup there is a ?? matter, as you look at the Cup of Inertia you have in the vertical system. You need to understand this. You have to create a condition of Inertia and a condition of G fields for you to understand what energies are converted to in the new condition of the Inertia and MaGrav. (:48).

The CU is not only for man, but for man to understand his manifestation and (at) the other point in the U. How you will be, how you will interact, how you will survive. There is no time for a spacesuit. The spacesuit you have is your own physical condition, which you create at the point of arrival from the interaction of the STM, with the fields of the soul of the position in the D you arrive at.

It's not anymore Cu, .. Zn. Understanding the structure of this picture is more important than the elements of it. At the bottom we have the G field forces. On the interaction of the fields of gravity, then you have to consider the interaction of the fields of Inertia. How do you introduce another element, (:50). to confirm and change position in the D of the Inertia of the system. Where do you put your coils of matter states of Inertia? Does the coil of what we call, Inertia and gravity will create a condition and effect the STM. Would your soul exist in the new D? Or do you have to change the structure of the fields of your soul to go to the higher strength, that you can keep your existence in the D of its life within the center of existence structure.

The understanding of the new T brings a new horizon for many of us. It's not any more matter state, it's a field state. We have never considered up to now what we call the Inertia of the fields. You considered Inertia of a matter state, ..Inertia of gaseous state, .. Inertia of liquid state, but what about the, (:52). Inertia of the Pl state.

These become part of the work that step by step mankind has to learn and to understand. What happens when you have no gaseous condition, .. no liquid state condition, or you have no matter state condition in the position in the U. You want to meet somewhere between Mars and Moon, .. between our solar system and another SS when there is no matter state condition for you to land, but you need to create a condition of the Inertia of the Pl. That can give you the manifestation in the Pl condition. That means your soul exists without the D of physicality.

The new transportation system which will be introduced in coming weeks, will carry such a facet. Understanding of the process of how you want to manifest yourself will become more important then what materials you have, what fields you create to manifest yourself. (:54).

You take the soul and manifest it in D of physicality at the point of the observation, when you want, and than you move that physicality. Christ did this on the cross. Now man has to understand what Christ did 2,000 years ago. To leave the physical body on the cross, but transfer the soul out, that it will survive, and then take a new physical D and leave.

Now this knowledge with this CU is available to man. But you have to understand how you attain it. How you walk into a machine as a physical man, you become the STM, we transmute the STM to a new position, new destination, and then that soul takes a new physical D. That's why nobody ever recognized who the Christ was, as he moved to Malta and across to France and what we call north of Spain.

This is not a fairytale, now we understand the principle of creation. Man has the capability to do this. Always had the capability to do this. Christ wasn't the first man who used this, (:56). and not even the last man. Now you have to learn the T of it.

In the animal kingdom when a lizard looses its tail, and it gets cut off, he grows it. Now we know how. How we do it, how we grow a finger a toe, whatever. Now we understand the same thing with the STM. At the point of cut, the pain and the suffering is so high, that it goes to the D of creating a Nano layer from there, and then it reverts back to the physicality of the body. In the D of the soul, the pain of the soul is so high, that it copies itself to get freedom from its Nano layer, which is the Pl of the body of the man. Once it has released itself in the new D, as it's on earth it will take near similar shape and figure.

If you could transfer the soul back to its D of physicality you will get the same ?? . But if the man decides he wants it a slight difference than what it was, you will not recognize the new shape. This is the total understanding of the new knowledge. This is why as I said to some of the KS nobody can trick you with the new magic in space. You see me now, and you don't see me now.

In so many ways, now we understand the way, (:58). everything is done, everything is clearly understandable, and everything is clearly tangible to man and the beast. We have grown a toe, now we can shape the soul.

If you understand how you can move the soul from one position to another, than you'll understand new emergence of the communication systems, where you give emotion and soul to the information, and transmutation of it becomes instantaneous, as you move the soul. The new packages of the energy transfer memory banks, what you call computers, will become beyond the imagination of the man. It's you who have to decide what and how you fill this space of the CU. (1:00). And this will carry on. This process of teaching to start you thinking of new ways will carry on. It's no more I N coat this and that plate and it gives you this. We've seen KS in past few weeks start coming to understand this process and the new evolution and ways to introduce the system to work for this, have been developed by a number of KS.

How can you create a Cup within this Cup, that by connecting your soul to it, from the collection of the fields of the Cup, will feed you for life. It becomes important for many of you to understand these processes.

Don't forget I go back to what I said originally, to understand the work of this as a whole the knowledge and the T will be given to the scientists of different organizations around the world, that they can deliver the new T. (1:02).
In so many ways, a combination of T in collaborations with many governmental and national, and international organizations will come into force. There is a need for this T to expand rapidly, and with it will come a lot of new insights into work of the U.

Once you understand this process, does not really matter into where and how you put what material, understanding the concept which is important, not what we call the work and structure.

In so many ways, mankind needs to become flexible, that does not fix himself to certain matter, certain condition, certain shapes and positions. (1:04). I was explaining very recently, to one of the KS who was very persistence in following exactly what has been said. I said to him a very simple way. .. This is what I say when you understand the knowledge, you have a different , then if you just copy it, it will not have that kind of understanding of totality.

In the spiral system we go like this, we use a N and not N spirals. What about if I develop a system like this, where you have the interaction of the emotion and the soul with a matter state. Do I need understanding of it, and if for example, I just N coat the bottom of it (spiral flat spiral). What happen if I repeat the same thing in 2 positions and not in 1. What will it mean if you have a system, (1:06). which you have a coil and a straight line. Or the reverse of it, when you have a straight line and a coil? At one part is N coated, and not the other, or the whole lot is N coated?

This is why I explained for this knowledge to be expanded, needs many, many universities and many organizations to work, to do that, to understand. KS go step by step, because you understand this way of ?? but when it come to commercial applications they go through new ways and new understanding.

What about if you bring the Fe in the composition of the same to alloys, or what we call a composite, and you N coat one and not the other. With the emergence of T when you don't even need to N coat, but you can decide which part of this will behave like a N coated material.

Emergence of understanding of the T is more important than the T itself. (1:08). What about having a soul, which has matter structure within its own structure. KS have never tried this. In 2007 or 06 I showed this but I realized that nobody has understood. I repeated it in the MaGrav system, again nobody understood. What about if you have a tube, and you have a coil of a tube, what would the fields of the Pl inside, will do?

As I have said before, many of the KS make MaGrav units and it doesn't work properly, (1:10). and they blame for everything except their own lack of understanding. When you make the MaGrav units, you make the coils as tight as possible, in fact, you created one piece. When we make the MaGrav units, your coils should not touch each other. Then you see some people make a better unit than you do, because one (each winding of coil) is one piece.

Where you will learn about the structure of the MaGrav or the structure of the spiral is exactly like your own spine (vertebra spacing). The space gap has a meaning and transfer and strength of the more information in the neural system inside it.

When you disturb or you loose the cartilage or the disk, you'll find disturbance in the neural system. Our coil and your spiral block in the back are no different. But in your MaGrav System we have developed a system which you connect end to end. (1:12). What happens when your disks drop on each other. It's exactly how in your MaGrav System your coils are pushed up together.

I said when the MaGrav S were produced in Italy to the team, you have a problem separating them, put something in between all your coils (each winding) to observe this separation. Where you push your coils together you make a wire out of it. The same would be when you use and develop these kind of technologies.

This is one of the reasons why Alex Beads work better than the MaGravs, because of the separation of the beads from each other. Otherwise in principle each one is one loop.

When you make these CU every detail has to be considered and has to be observed. (1:14). You cannot just nilly willy make it, because it's there, I do. Paying attention to details, **and this is why sometimes some of you cannot replicate what you did before**, because you do not take, you do not observe what and how you connect, or create a

connection between. This is part of understanding the totality, .. what I call gradually understanding the nitty gritties of the true world of science and T of the space.

When you .. produce all these systems, which you without knowing are transferring so much energy to, is when you do your coils, (1:16). like this, you have different plasmas because these tips create a field in respect to each other. When you crush them together, the way most of you do, you have a straight line, you haven't created divergence. Much weaker field, much stronger field, multiplication of the strong fields, very little strong fields. How you handle your N material, can give you different effects. You create different capacitors.

In some of my earlier works, I showed something very simple. I showed you a piece of N material, and I did a lot of things with it, but you do not see it. I told you if I catch man in the space, I will become a prophet every time I see a man, because I know the tricks of the game of the U.

For example in the empty box of U, I showed different points and different parachutes, (1:18). but if you could understand, or you've seen my work. If this is a parachute, and this is the next parachute, or this is another parachute, because you don't have the knowledge you could not see it, could not understand it. I deliberately by finger, or what other ways I crushed the Nano layers equally, facing each other. to you it's a N material, here I crush it slightly different, but the same way, which means this makes connection with this, and this makes connection with this. (..) now that we teach you anyway. then you see the connection between the two, but at the same time there is connection with the new dimensions, but to you, it was just only 2 what I call parachutes.

I am a master in my work and I know exactly what I do. You don't see it, and because of these variations I create a complex field flow and current flow. This is exactly how your body works. (1:20). If you go back to some of the parachutes you'll feel a slightly different sharpness and smoothness, because I love them so much that they behave like graphene.

In some of the work in some of the parachutes I use, I use the hot glue to filter and create only what I want, as a CH3. They are techniques, it's not just putting in caustic and N coating. I start using a hot glue as the process of the control from 2004, in the first what we call, Body Enhancement Units (EU) where many volunteers used. I don't use the hot glue as connecting the magnets as the .. Belgium's took it to their nuclear center and cut it open, and saw nothing but the magnets and hot glue, were glued together in different way with the piping. They use a structure, because of the hot glue material composite in it, allows you to do a lot of work. You have a free energy sources of H. (1:22).

I start using this in 1996 - 97, in expansion of the fields. If any of you still have one of the systems, which I built for you years ago, and you can open it, you'll see how, and what shape I used covering of the fields, by using materials, which to you is nothing. The heating, the extent of heating, you see yellow colors and clear colors.

When we built the first energy system in 2004 - 5 to show certain materials and then opening in 2006 -7 was clearly what it can be done. It is understanding the science and then you play with it. If you open the first systems, which were built in Belgium, Holland, and Germany, and if you have one and if you can even open a window to the side of it . There are thousands of these units spread across the world. You will see, (1:24). the extensive use, and specific use of .. the hot glues, because the composite on them, and you have to understand it. It is understanding the presence of, and release of energies, which are present in your Universal units, U Cups.

If any of you have any of my systems, which was built in 2006 - 7 watch how I use it openly, these are the samples in your head. Because the composition of the material, and the heat you apply to it, gives you different strength, different combination. Here you use different kind of ?? lateral coil. If you look and you can take the magnets out of the old systems, which I used, just hold it in your hands and you'll see magnets have different weights even though they are exactly the same. (1:26).

Precise temperature on a magnet and you'll change its properties. it's like a plasma. You have to understand the knowledge, .. the techniques of the creation. It's not just by doing it, just because it does. We saw an idiot from America coming up with all these, what do you call, piling of ?? glues, claiming I taught Mr. Keshe how to use, in 2015 - 2016. The hot glues in KF are used from 2004 - 05, they saw it and they copied it. But now you can open the box and then you'll see.

When we submitted the papers for the first time, in proving the science and Nano T, I read a lot of papers from scientists to prove what I say I is correct. I printed them and I gave them to the scientists in Belgium. That what I say, these are the proof of, these are the documents to support it, not using the scientist's paper to cheat and steal from them.

When we came with the concept we had to prove there were other things to support it. When we presented the T for the first time to the Belgium's, 3 tables, huge dining tables each one with 10 - 20 papers were set next to each other, on top of each other, stacked, to confirming why the plasma moves. (1:28). Why the Nano T is there. What do the space scientists say, about what we say about the movement. Since then we don't need to read papers, because now we have proven to be correct. We don't need to rely on others.

(If) you don't understand something or haven't understood part of the T, go into the research papers and see which part of it you can prove is what we say is correct. My advice to you is read only 2 pieces of any scientific papers, the abstract and conclusion, in between is a waste of time, unless you are looking for specific things. But when you read the abstract and conclusion, be careful there is no cheat, that you are just trying to prove what they said in the abstract, to be conclusion, that we could translate.

I read hundreds of papers to prove step by step, and printed and copied it, and I use to carry them in 2 or 3 suitcases. to prove to the Belgium scientists and world scientists what I say is correct, because the other scientists confirmed my thoughts but in a different way. You have to be able, now with the knowledge you have, to manipulate the fields,

but understand, that you understand the manipulation in a different way than the present science does. (1:30) you understand it, in a Pl condition and freedom of, detachment of tangibility.

When we showed the first torch, or the light, without the battery, using N materials we were branded as criminals and terrorists, using nuclear material. Now most of you can do it, so you all became terrorists.

The T is years ahead, but you have to understand it to fit it into your life. How you can manipulate, use different structures in, that it gives you new understanding. Try as much as you can, not to mix, if you are working with the Pl of the fields with the matter connection. If you are connecting a N coated, to another N coated (wire) use a N coated wire. If you are connecting matter to matter, connect matter state. KS just cut a Cu and connect this Cu to that Cu. Develop technologies that you can connect N materials together, because with the present knowledge you cannot, but in fact, you can weld N materials together. Then you see how the system works. (1:32).

Transmutation of energy has to be through N material. Transportation of energy in the matter state has to be through matter material. Then you will see the true effect of your system. If you make a mistake you will see your matter state material will be N coating itself to correct your mistake, if the power motion is in the right condition. Try to understand the T, and try not to copycat the T.
We'll go for a break. (1:34).

>> **BREAK** 392 KSW (1:42).

Questions:

Body perfect MaGrav - how to use with emotions to get what we want?

Q: If our bodies are the perfect MaGrav system, why are we not being taught how to use our bodies in conjunction with out emotions to get the desired results?
K- repeat
Q:

We constantly convert fields to matter - Don't want to confirm it

K- **We do it everyday**, we do it short or long term, **but we never want to confirm it. We get a breast cancer because of the emotion of the mother**, (1:44). we get prostrate cancer, because of the emotion of the child. **We get joy and happiness, and laughter because understanding something suits us. We do it all the time**. It's just that how we see it.

Emotion of Hunger to fields of emotions of Universe - it feeds you

If you **bring the emotion of the hunger into the fields emotions of the U, then you'll be fed by the U, you don't need to eat**. But how do you do that?

Learn how to reacts to different G and Inertia field forces with environment

You have to learn. W**e have to learn how our body reacts to different G field forces and Inertia field forces in conjunction with our environment, and in conjunction of our Gans of the body** of ourselves.

Inertia of Matter creates matter - reference point on earth 56 or Fe

The Inertia of the matter state creates a matter, which is on this planet a reference point of around 54 to 56, what we call 58 even, what we call Fe.

(Inertia) in the liquid state it's between 14 and 18, which is around O. (1:46).

Inertia in gas 12 to 14 but more like O because moisture in air

In **the gaseous level we work around about 14 to 12**, but **we still consider it, because of the moisture in the air, more like the O, than liquid**. If we can create such a, not Inertia or just below Inertia level, to conversion to matter state.

We can absorb every energy we need through the environment of our planet.

This is **why we have the air flow**, and the field strength of the earth.

In **some case in the atmospheric condition, H plays the Inertia level, but that is universal common denominator, Inertia mass**.

Where on earth in **some points H plays the Inertia mass for conversion of energy to mass**.

What is the common denominator strength of Emotion of man

Then you have to understand, **what is the strength of your emotion, what is the common denominator of your emotion**, of the man.

Constantly needs to be loaded on Fe base field strength - which is Blood

That sits around the ?? high and low, because it's a field only, it's no matter state to it, so it goes above ?? H (or high), which **constantly needs to be loaded, (1:48). on an Fe base field strength, which is blood**.

Which **first common denominator energy level of it, becomes to be Zn**.

If you have common denominator base of Cu, you get emotion of the muscles.

Absorb energies through emotions - because of Zn

But the emotion of the fields goes to Zn. Then you can absorb energies through emotions.

Any other question?

Q: Salomea, what is the ?? difference between Inertia and gravity, taking into consideration that the Inertia of the environment is the soul of the Creator
K- There is a thing especially for Salomea, can you please stop posting links which are not reviewed by the KF, and putting people through it. Do not post links which are not previewed by KF. because they can bring our website down for other legal matters. We block people who start doing this …

Difference between Gravity and Inertia - a lot

The **difference between, (1:50). gravity and Inertia is a** lot.

Gravity of Earth is connected to our AA

The gravity we know is the **G field of the earth, because we are connected through it to our amino acid (AA)**.

G Field of Solar System - man doesn't yet know - Galaxy

The **G field forces of solar system, man has not understood yet**, then we have the **G field force of the galaxy, it's different than what we think** is, once the man starts understanding this knowledge.

Order of thousand times Speed of Light

It has an **order of magnitude to the speed of what we call, universal field forces, and an order of magnitude thousands of times larger than the speed of li**ght.

For Gravity need to know Position - and Inertia in respect - conversion energy to m

So when we speak about **gravity you have to indicate the periphery, where, gravity of the position, and then the Inertia comes into position in respect to that gravity**, where the field forces allow the **conversion of the energy to matter state**.

Through Inertia - Convert Mass to Energy - Energy to Mass

If you understand the **work of the Inertia, and understand how it applies, then you can understand how you can move from energy to mass, and mass to energy**. It's a 2

legged bird I call it. (1:52). It is part of the structure of the understanding between different dimensions.

Transfer one object to another in matter state - plasmatic Inertia of earth

You can use the what we call **plasmatic Inertia of earth and ?? it's primarily its M, but its Inertia strength of it, and transfer the totality from one object to another in the matter** state.

In the coming time in what we call, **"transmutation systems of the plasma**," we will teach this.

Transferring the object exactly as it is on earth to moon

We don't want a stone, or a suit on earth to arrive on the Moon and have a different D. We **want to transfer exactly the same thing and receive exactly the same thing on the other side**.

Transport through the Soul of the Object - Matter state Inertia of it

You **transmuted or transported through the fields of the soul of the stone, or the clothing, or the matter state Inertia of it**.

Want to manifest on moon as a hammer - not a dust - keep it the same

But would it still have the same effect on the moon? **If send a 1 kg hammer out of here, would it still have a 1 kg hammer on the moon**? But in the matter state, but when, for example, I send the hammer, **the GM field of the moon, (1:54). is different, the hammer appear as a dust. But I still want to carry, that there is manifests itself as a hammer**.

There is **a lot to learn about transmutation and transportation of the fields in the D of gravity or Inertia**. Gradually we open it.

There is a link, there **is an Infinity Loop link between the two**. I hope I made it very clear.

Locking to higher level Inertia - manifest anywhere - not bound to earth's Inertia

In so many ways, you can do. In the future processes we'll teach you how. If you get **a Pl of matter state, or what you call, like earth's GM field. and then you get the Inertia of what I call, the GM field of the Inertia of the entity**, there is **somewhere in strength fields which you can match these. (1:56). And convert one, or connect one into the other, and then we can convert the Inertia into the parameters of a higher level what I call, "orders into manifestation of the field transfer energy**." Which in fact, what you'll get is what you call, **manifestation of the matter state at this point**.

Not at a point of the Inertia G field forces of the planet**. If you can lock this, you can manifest it anywhere**, because you can imprint it at any point, just add it on.

Transfer your soul to physicality - and physicality back to soul

A specific knowledge, it's a specific ?? ?? And you can return back to, or add it, so in a way **you can transfer your own physicality to the soul, and the soul back to physicality**.

But then you have to understand **you are dealing with the Pl energy Inertia, and not matter state Inertia**.
Any other question.

Plasma has to be shown as 3-Dimensional - real time

Q: (1:58). about the background picture on the screen of workshop. Is this a representation of what plasma fields look like , or just an artist view.
R: it's an artist view ..
K- In a way you have to look at it 3 dimensional. Here we are 2-dimensional. We **have to look at Pl as 3-dimensional. This is a very crude way, hopefully the educational tools** in coming time will be 3-D we can show it in **real time**.
Any other question

(Proofed to here >>>)

Q: Jefferson… you told us human beings do not have the T to contain the virus and the UC would not interfere, (2:00). unless human leaders asked. I would like to know if we the KS can be considered the leadership on this planet and if we can request this help form UC. . I would like to ask for this help.
K- Thank you .. for everything else. The understanding of the use of T for viruses has to implemented by the governments, because it is .. dynamic energy fields which crosses boundaries and nationalities .. the T has to be in line with the common acceptance of the people, and what I call at this moment governments. We soon will reach to that point. But essentially KS have the knowledge to protect themselves from viruses/. You have enough knowledge, you don't need a government to do it. Knowledge is given you freely and it's in the hand of the KS. We don't need now to make the KS new leaders and then we get all the shambles we have with our elected leaders. You can only lead, (2:02) your own soul and physical D, and that's all it is. You are the king of your own castle. The rest of the world ??? the ?? responsibility of the KS is to teach unconditional, it's for the people to decide if they want to use it, how they want to use.
Any other question.
R: ..

K- We all have the knowledge, now we can use it the way we want. We don't have a patent office in the U, we don't have a copyright, knowledge is the right of every being to have, but we are respecting it. So it doesn't make any difference where you are from , or shape or form you manifest yourself, if you can comprehend the knowledge ?? creation it is your right because you are created out of it. You cannot patent something which you already have. ?? now you understand why the patents don't exist in the U
Any other question.

R: .. Armend ..
K- Oh my god this guy is still around. (2:04).
Q: Armend. .. When you N coat all the materials, can you N coat them together?
K- What do you mean all the materials?
Q: Zn Cu Fe
K- Yes, you and I done many times. We do it in the factories. but you have to have different temperatures, or you embed them in high temperatures, they all get N coated, but different N coatings. There are different ways of N coating, even with caustic. When you N coat material you can do it embedded or non-embedded in the same materials as you want. because you create the space gap If you take a Cu N coated and embed in a dust of Fe you create a different N layer than if you leave it to be N coated in free space. These are used in different applications in different part of the industrial use. carry on. (2:06). Q: when you put 2 N coatings Zn and Cu together you create a condition of C, C14 correct?
K- You create a C with the emotion, but ?? single emotion. If you use flat plates.
Q: ?? N coating is a C itself?
K- Yes but a C has a C energy. But there is d difference between a C and a C with emotion. Or different strength of.
Q: Explain that
K- It's like you have 2 dead bodies, and 2 bodies which are alive. The 2 dead bodies are just a metal condition. When you have 2 bodies that are alive, they have an emotion and that's what it is. If I can put it that way. But than you have. .. Armend somebody loves you, he says, "what a blessing to hear Armends voice, Doug McDonald. If you, (2:08). N coat 2 plates here. .. If you N coat. When you have 2 matter (plates) you just have fields the strength of the matter. You've seen how C ?? fields but in the matter state but weak. When you put 2 (N plates) you create a field Pl of a stronger field with the same emotion , same effect. When you coil it, you create cross fields in the plasmatic condition which leads to ?? and emotion. And this is where the difference is.
Q:
K- This (non-Nano coat) is the matter state you have always done. This is (2 N plates) the single emotion field of ?? C. The C here can interact with the emotion of the man. One ?? emotion, but you have to ?? find out ?? strength you found. But when you do composite coils and N coated in the shape of 2, this fields. You see this (?? non-Nano plates) is the emotion of the man with the physicality of the man. (2:10).

The man coming from planet Zeus has a different material combination.
Q;

K- It's a different emotion for him, and this is how it works. But in the U we all have 1 common .. D and emotion, we all understand. This goes back to the basic understanding of the emotion of the survival, laughter, joy, happy, not happy, and the rest of it. Essentially in the universal ?? common denominator.

Q: .. you always explained that life lives on this planet between Cu and Zn.
K- yes
Q: so Fe has become ..
K- Fe is the connection of the holding of the man to this planet.
Q: When you say composite, you have 2 composite on the side which is Fe and Zn.
K- The Fe inside locks it to the presentation of the earth. And then, (2:12). whatever you have on top is interaction of the fields of the composite in respect, common base of Fe with it, and with its environment. You create a base common standing of Fe, from this point on. The strength of the G field of it. None of the KS as far as I know has ever tried something like a spiral N coated galvanized, and Zn (spiral) N coated. All of you have tried the Cu, but not Zn. This will give you amazing structure. If you do N coated Zn and spiral galvanized. Many of you when you make this you feel emotional. When you produce a coil of Zn N coated, with a coil of galvanized, you have a composite effect of emotion. No one has ever done this, this is one of the emotional units. (2:14). In the CU I have placed a Zn coil, a galvanized coil, because in the N coating in the middle this creates the emotion, and the emotion with energy and field. None of you have ever done this. That's why I said the CU can ?? emotion of the man. You have the N coated Zn in the middle and you have a galvanized Zn, the reason for this is for emotion.

Q: Can you elaborate a little on salts, because the salts. We always use sea salt, but if we are going to add salt into it, so then it's totally change the environment?
K- Yes
Q: but then if we want to change different environment so what we do. I know we have to add a drop or 2, but still (2:16). if you want to change it back. SO you can't because you already mixed it in the water.
K- ??
Q: Let's say you want to add a little bit K, than you want to change Ca, than you want to totally change Mg. But you already added into the water, so you have to , how are you going to change it different ways?
K- You change the water, drain it. or add to it and see what it does. Because there is something you have to monitor, What percentage of what. Every time you add a salt you ?? won't have the same thing as you change the salinity. when you add another salt it's not this anymore. It's a new salinity. And what does that salinity does in respect to the N and the materials you have inside?
Q: We have to fill the Cup up to the halfway point, I was thinking halfway point, not up to the high point/
K- It doesn't matter what you fill it. to what height. What is in the water behaves in a liquid state, what is above it, it behaves in the air state, a still you have a N coating of the 2. and a plate of the 2. What (2:18). you see here is a reaction of the liquid, what you get here is the reaction of the atmosphere, but N coated atmosphere. That's why we create AA here, it's Inertia of the gaseous part, here is Inertia of the liquid part. That level.

Any other question

K- It's written in the chat. Why do you say no one tried, didn't? Maybe I should show you pictures from 3 years ago. You should have discussed it, but know it creates an emotion. You tried it but what did you get out of it. Did you understand you could and you create emotion in your Cup?

Many people make things, and they leave it, "I tried it". But did you understand what it does? Could you communicate with it through emotion, which emotion does it touches? Because different galvanization creates different emotion. (2:20). A lot of people say I do things, say oh, I did it. But did you get the result. Did you understand while doing it. You just look for Gans's. But is this Gans, a Gans of emotion.

We have a lot of people who, when we release something, "I did it," but what did you get from it? What did you understand it does? Then they claim, Mr. Keshe copied me. We never copied. You can make anything, as long as you don't understand what is the purpose of it, you just make something.
Any other question

Inertia

Q: Ed .. Inertia last week, I was trying to explain my concept of Inertia and you introduced an added concept to it. I was understanding the interaction of the Pl with its environment. and at a certain place there is a region of Inertia but then you stopped me and you said, there is a third element. And to my understanding, it was the state of the physicality of the observer, (2:22). and I have been trying to understand that. I wonder if you could elaborate on that and if it had anything to do with the images that you showed just a few minutes ago?

K- What we understand is the process of creation of Inertia is as we said before. Or put it this way, Inertia is the process of manifestation of tangibility. Up to now we know or man thinks one thing does, the Inertia which creates for example lets say Cu. Or we see Zn, we can have a composite Inertia. And again if the composite Inertia has part of this strength in the Pl Inertia, and part of if, let's say to Zn, to the matter state of it, or to a gaseous state Inertia, or a liquid State Inertia we see the manifestation, (2:24). of the matter state, which is observed by us, plus some field effects.

We know this with magnets, because we see the magnet which is the physical, and then we see the field effect of its Pl Inertia which is the transformation and transportation of its fields, because we can feel it against another Fe or metal or whatever, and we see it pulls together or attracts to, or sticks to it. Inertia, what we call M field, like we say the G fields of the, like earth is a composite Inertia. Is an Inertia of the matter state and Inertia of Pl state. This property exists with all or most fo the elements in given conditions. If I can put it another way, if you say you are a man from earth, and if we have a man from planet Zeus, you're both looking at the space where the magnet is. As a man of earth you see the magnet. As a man of Planet Zeus I see the fields I don't see the magnet. ..

Q: .. that's kind of where I was headed last week … (2:26). .. if we can understand it then we as humanity can learn how to control it. So I don't see the practicality of that difference. I understand there is a difference in our perception of physicality from being here on earth or being in the physical nature of p Zeus, but how does that enter into our experience of creating the Inertial fields here?
K- Partially in the long term will be in the amplications of transmutation and transportation as we go deeper in understanding. Partially in manifestation of the matter state. .. it is when, mankind will learn more and more as we go through the transmutation of fields to transmutation of elements which is another state of fields, but of a lower strength. (2:28). When you increase the G and reduce the M, or when you increase the M and reduce G you transmute between the matter state and the energy state. It's very much like a transformer, but this transformer has a specific characteristic. As I said some times ago, with moving into the Pl T and Space T we come across new emotions, which we don't have, .. new feelings, which we maybe felt it, knew it, but now we can define it, because now our knowledge has increased. As I said in other teachings, the D of the emotion of the man is not just happiness, sadness, and the rest. There are hundreds of thousands of different emotions that does not exist in the D of physicality, but once you move in the D of fields as an energy field, as a Pl field we come, we have to explain I feel something but I don't know how to put it. These are emotions of the Pl, .. of the U. Gradually we'll define them. (2:30).
Q: SO is our learning to define these emotions within ourselves, that is how we will gain the ability of control of the plasmatic energies, the transference from Pl to Inertia to physicality these emotions as we come to identify them and work with them, is that the key?
K- Gradually, yes. It's like emotion of recognition in our physical life. Scientists tell us till the age 6 - 9, because of our development children are not aware fo the color or race, even they see it, feel it, but they are not aware of it, because there is no awareness. Others from age of 2 or 3, this is black don't do that, this is white you don't do that. If we leave our children in natural world they don't understand the emotion of separating between color and races. It's that old movie, beautiful one, one of the famous 2 actresses and their children are sitting on a tree, the white one says to the black one can I lick you, do you taste like chocolate. You remember that one … These are the emotions we are not aware of. Now we come into the world of science of Pl, we become aware of new emotions, we have to define it, we put name to it. (2:32).

It's very hard to explain to someone the emotion of love unless you have fallen in love. A love to a child is love to animal, a cat, to a toy, but when you fall in love with another person at an older age it's a different meaning of love. So we define it when you are an adult and you fall in love. Now with the new science of Pl we come across new emotions as I explained a few teaching away. We have to define it. We have to be able to understand these commonly .. (break) these are the categorical things that we do and we go back into it. There are new emotions fo colors will come into play now that we come into the understanding of new plasmas. When we break into further steps in the higher orders, where this will become a lot of work for a lot of people who travel in the D of the soul, energies. You gather different emotions, it's like acceleration, different emotions which you cannot explain. If you are in a physical body we can explain it. Emotions are

the very high speed. Physical man it's very different, and what you remember when you arrive at the other point, you come back to earth, (2:34). you take over your creation of your physical body, you still carry those emotions, now we have to define those emotions, because more and more people will go through it. We don't have a word present in our vocabulary for it. WE have emotions of what we call vacuum. We have emotions of interaction of the space gap. You know when go into a free fall, how you feel , you say my stomach comes up, I feel, it's like a fear, not knowing. We have that kind emotion in high speed Pl, it stays imprint in your very clear different emotion. It's like a free fall, but it's not .. because you know you end up in a destination.
Q: and you can learn how to initiate that?
K- Yes, we gradually will. We don't need a machine, initially we provide a machine, but than you become a free fly, once you know how to do it.

Q: I once saw a video of a person using their hands to do surgery. Now I understand that this person somehow was unique in that they somehow have identified the emotion, (2:36). allowed them to use the plasmatic energies in this way.
K- We have many people with equal field balance with some people, not with all people. The whole purpose of teaching is that we all reach to that point. It's not that they understood. They can maybe go with their hands in your stomach, but not mine, because it's a different composition. … the whole purpose of teaching is that we all can understand and adjust to that point. This is how we commonly bring it up. We point it out, we settle it, and we have many emotions, enormous amount of emotions to be identified, to be named, still to come.
Any other question.

Early Works of Mr. Keshe - Parachutes - bottles - Hot glue

R; …I was just showing some pictures … from some of your earliest work… from the patent application actually.
K- These are the **parachutes, we do a lot of other tests with it. (2:38). How we position these, even if you look at the color of the hot glue,** has an effect on it.

Enormous amount of technologies in these tests

There is an **enormous amount of technologies have been tested. I am not a theoretical scientists. We are what we call, practical** scientists, so we do things we observe different things, different understanding.

100% N coated wire inside it by specific way and purpose

One of them is what you see for example, that **white wire, N coated wire coming out of it**. .. if you strip this wire, all the way it's N coated, **all the way through 100%. This is a certain way to do the wire, it's fully N coated inside**. We developed this T for a specific application.
Superconductor wire -

The **world of electronic has not understood this yet. This is an amazing material. You have fiberglass communication. This is a super conductor in there**, but you have to know how to use it. This is a T, which I put it there, people don't understand it, because it's not there, but in some teachings I referred to it.

We have a guy in the chats who is try prove he has done something. You have to prove it and understand it yourself, we are not, (2:40). here to prove anything, we just share knowledge.

In so many ways, if you look at some of these parachutes. You see the Cu wires towards us, it's not Cu looking, it's a darker looking Cu, its already been N coated by the material inside and outside. This is a plasmatic N coating, this is a super conductor coating. Just if you .. look at this wire here .. it's not Cu, originally it is pure Cu, but the plasmatic flow, between inside and comes out, and interacts with the fields which are around the thing, N coated. These are one of the first plasmatic N coatings we did. The same with here, this is not just black here, we used to strip these and use it for a specific use. Initially when we did this .. I used to have a Christmas tree, I used to be a magician, a small Christmas tree connected to a battery and it used to flash .. We used to use these wires to connect the positive and negative together and show that we can connect a battery with the striped wires, (2:42). the Christmas lights still shine. In the world of present knowledge, could not be there. This is the graphene at the highest order, because I knew how to convert it to graphene for other things. If you do this connection between the Christmas tree and the battery, in a specific way, you will find out that your battery starts cooking. literally cooking. Your battery is heated up, because the N coated wire now absorbs energy from the environment. It's not that the resistance goes higher in the battery. We used to have a say, 2.8 volts, when we started it, we go to 3.6 volts. ?? why the lights shine. It's understanding how T, how things you put and they work.

If you go back to the other picture you just had with the voltmeter, if you can bring that up. To you it's just a voltmeter, but to me it has a lot of meaning. Look at this .. negative sign. What does it mean? It's not consuming, that electrode is charging. (2:44). The bottle keeps a different .. composition of, .. different energy field plasma in it. If you go between these 2 (electrodes in bottles) means there is a field absorption, and you have G fields here (between). And after a point this (other side) becomes G, and this becomes charged. When you run too long with these meters, they get totally damaged. Because the plasma, the whole inside of the system gets plasmasized. But the energy source for this system comes from the plastic. especially this bottom here, and this here (neck). What we see is this is amazing if we explain it to some ?/ scientists, they could not understand it. they deny you understand it.

You create a plasmatic G field flow in this gap. (2:46). And you already put caustic, which has N coated the environment of the bottle, now is totally plasmatic. It's not any more air, even the door is open, or cap. But you have created a GM field which we use the caustic which has N coated the wall of the plastic. Now this GM field starts doing a wonderful job, which is starts pulling the C from this (neck) and the C from here (bottom button) to here (center of bottle) because it's a plastic CH, and with it, because of the

environmental field here (outside bottle) if you put a little bottle here (outside bottle) you will be collecting pure H from the ?? Then what happens you see this disappears, you don't have anymore cap, and you see a big hole here (bottom button). Strange enough it only happens with a certain brand drinks, of plastic use, the PEPS they use gives this effect. (2:48). I use to produce beautiful H plasma from this. They use millions of megawatts in CERN to create that plasma. The cleverness of these kind of magic's is understanding how the systems works, understanding that you work in the total plasmatic condition.

This is why I always refer to this, work in one, or in the other, and if you work between the two understand which one is which.
R: .. could you explain about the C as a N coating and the Cu oxide or Cu as a N coating. And which environment. How do we look at that, if we look at it plasmatically, then the actual molecule, the C element is removed from the bottle, it goes on to the mushrooms (?? parachutes) apparently, how did you liberate it. Tell us the difference between them.
K- the blackness you see here, as we said many times. (2:50). Is that black is 40 to 50,000 layers. When you have the C coming from the plastic, it embeds in this, in different places, and it has to come in the right time, and the N layer has to be in the process of expansion. This C is graphene, because it is in the status of the gaseous of the C or what we call, the "odor" condition. This C was the creation of all the problems of the KF. Because in the company in Belgium which is stealing all the N T around the world and is part of the criminal organization of the Belgium government and further by the most criminal lawyer who become the head of the European Space Agency, is .. made this a criminal, because they said, you use a Gamma rays to embed gas inside n layers because the knowledge wasn't there. They understood what it can do, but they tried to steal. This, from when this layer is created, from the C, H is too thin to be embedded and tested. So partially we have what we call Gans of H in these layers, as well. We've seen it in Raman Spectroscopy. But essentially the C form the head (neck) gets embedded in-between fields of the Cu, and then it becomes a graphene of it. This was the first time ever, (2:52). in the world graphene was created. This is the report of it. If you go back on that graph, which you showed, it's from this parachute, and in it is confirmation of the graphene. First time ever we could confirm the existence of the graphene, and it's in the report. This became how we become terrorists, and then they found out it has a lot fo values, we had the king on top of us wanting the T, because that has been the some of the king, his husband wanted this to be his, because he read about it. Now they understood the patent we submitted which was read, at the backing of scientific T.

These are the principles of developing new T. If you look here it's just .. a piece of Cu, not parachutes, even here, because we wanted to test, the dynamic, because this parachute has a sphere, this wire , is spherical plasma. It's a big difference. this is the reason we created this kind of position. If you look, they all been placed when they were Cu. None of these parachutes have even been pre-Nano coated. (2:54). They were placed in the bottle, sealed then we add, what they used to call at that time, "magic liquid" , but which is the caustic, and let it cool down, empty it, and leave it. These here all used to be all Cu, and now you see they are all N coated. This is a plasmatic N coating, which nothing can stop it. This is spherical plasma, these are cylindrical plasma, and because of this we

could write the book #2, how plasma changes from cylindrical to spherical and travels. You can visibly show it, because there is energy transfer, because these are all Cu, there is a transfer of energy. Then when you look how each electrode, at what speed they N coat each other. It took years to develop an environment where we could physically show it can be done in a simple way. .. you can experiment with this with space T. You can use if you understand this to create different fields of the space positioning to se how fast you travel. But this we teach in the future. Matter (parachute) to light (straight wire), to matter to light to matter. (2:56). If you look we measured. These are little pins we put in, literally in intervening points to create special conditions of measurements.
Any other question

R: would you ever consider rotating this reactor?
K- Oh, I have done a lot of things. with it, yes.
R: The H would be trapped in the center that way, where the lighter gases would be. ..
K- The H does not stay at that level. the H very rapidly if you do not know what to do with it, leaks from these boundaries, underneath of it. Usually we get a lot fo He from this composition. We learning from this, if you go to flower shops, or children toy shops where they sell He balloons, before application fo the He into the balloon, if the balloon does not have a He sealer (2:58). it will go through the balloon. The balloons which are designed specifically to hold He gas are sprayed with a, it's like a colorless water, they are lined with it, then they empty it, and then blow it up and they stay. The real He balloons which are used as material they never go flat. because He can go through the layers of the plastic, it's so fine, but when you put this ..its a water. We used to use this on this to stop the leakage of He and then you get a different effect in the bottle.
R: Now where would the He come from?
K- The He comes from the .. this environment here is world for itself, it's a plasmatic world. The H from the system creates partially Tritium too. It's the composition when you break up the plastic. This is one of the properties of PEP , and then it allows .. combination of Tritium and Deuterium to create H, and then you get a single H. ?? and He atom. It's a very fine way, the way it works, because you have a very interesting point, (3:00). you are in a plasma condition, because now these are all N coated. you have a very little patch here (bottom button) and a very big mass here (neck), these interact in fields, because here you have a small amount of N coated of a PEP and here you have a huge amount of it, and the field interaction creates a vortex of plasmatic winds here. If you work with many of these bottles you will understand there is a ration in the amount of .. break up of the lid, and the expansion for the hole in the bottom. There is a direct correlation. It correlates very perfectly you can adjust it, you can do it. There is a ratio how you do it, and because they create a field flow, and bottle which don't have this you don't get this. These are different things. Later on this, we published this and used by a company, .. this is N coated, nothing sticks to it, and this knowledge later they use it now in Ketchups, if you remember fluids couldn't run very easily, you had to shake. Now they N coat the bottle and the liquid flows very smoothly out. But N coating is ?? same process as the N material (3:02). we were using. The T we release has been used in many, many diversities. because now scientists read, watch, and they develop different things, how they applies.

R; show more of these. oldies but goldies..
K- It's not .. this is how the knowledge has been set up on.
You see these parachutes, as I call them and these spaces have a defined, shape, for example, if you look at this it is not a straight part. If you look at here you have a ?? slant. .. some of these have silicon on top of them. If you these are not all black, even though they look some no N coating on, they have minimum layers on. (3:04). If you look at the box you'll see even how the shapes are different and .. the colors, they all should have been N coated. It takes weeks and weeks to set a test like this. with this we create a field flow, and when you create a field flow you have a central G field here and these 2 next to each other here, that absorbs energy even through the box, though the wall of the box, this is how you feed your soul. This is called , "the empty box of universe." It's taken ages and ages to do. If you look at some of the pictures maybe you understand it. If you look some are on a straight line, and some are on an angle line, deliberately put that way. these have one or 2 that the ends are clockwise, but anticlockwise. The parachutes if you look at here, are at different heights. It's to create a turbulence of the fields, because the box itself has been N coated with caustic. (3:06). This is a British lunchbox, and it came to my previous business life, we had this so we could run a test. Originally this box had a cup in it, teacup … the leftovers are here. … now it has become a box of U.
R: .. for people to know that this is not something brand new. (3:08). This N coating process that you have been at it .. 15 years.
K- 2005 I use a lot of different shape of Hot Glue even form inside, and outside. There is a difference from (the ones) inside, these are white, they are silicon. The ones outside is Hot glue, and you see I cover some of the pins fully with the glue, a very small tip like that. Hot glue has been used extensively for development of T for early when they came out we could see, because of its composition, and application. I seen this, one guy says, Mr. Keshe copied me, and what's his name, the guy we gave him a platform to talk twice and now he become the god. Incompetent. But this is how you use every material for its own application and implication. .. this is very interesting and you see it here, (electrode) they all should have been N coated, but they are not. Because it depends on what temperature, how you use the Hot glue, it gives you sealing capabilities and capacities. and ?? when you allow it to happen.
R: What are (3:10). what seems to be 2 parts to electrodes sticking out.
K- These are little electrodes we use. It's not electrode, you know the end of the wire .. we used to put the end of the wire, and we crushed it. and then we used a ring as .. collection point, we put the screws through it. I used these for the to stabilize the pins. they the wire just go through it. You can use it for measuring current and voltage or whatever you want with your meter. But primarily they are used to stabilize the pins and not move the position, what you want inside. what do you call it they have a name to it. … solder the wires pinch it …

This is a very interesting condition for understanding Plasma T, because at that time nobody could understand that N materials create their own environment, plasmatic environment. You can create (3:12). huge possibilities if you understand the systems.
First Plasmatic Battery - Kodak film box

Yeah, that's another one Kodak, do you remember when there was a company called Kodak. This is how they used to sell the films … Kodak film box that the light doesn't go into the film and spoil it. And this is a battery. This is one of the first plasmatic batteries that we produced. This is still going, I saw this very recently in one of the archive boxes. Each one has a different capability. This bottle produces I think .. 4.8 volts constantly for years, 0.02 amps. When you see the 5.4 it's one of the pins with the other. But in totality if you connect it, it gives you about 4.8 volts, because you have a G system on some pins and M on some. You see these pins are still here again, you see them here. These are to stabilize the position, the pins inside the container. What do you call them the connector. wire connector. In the center there is a pins. This is a Palms Battery. A true Pl battery and it's still running. .. it will produce for centuries. (3:14). You see this is half a volt, but some go 1.2 some go 1.29. You se no sings on this one, so it's positive, the other one negative. SO you go to a balance what is created and what is absorbed. We used to use a lot of these Kodak container, hundreds of them. used for different purposes.

Kodak film box used for Flight System Flying Car

It's used for some of the flight systems. Originally they were built and you replace this into .. that's why when the Belgium's came, they couldn't do anything with it. This goes into the shock absorber position of the car, and can lift the car. This is a G system inside it. That's all you need to lift one corner of a car. no more. I built them, they were there, it would have taken me 10 minutes in Einhooven to position them in the place for the car to lift. But it needs a specific material which was confiscated. You don't need more than this in the .. position of the shock absorber. If you have a car, you place 4 of these in the ?? center of wheels, and 1 in the middle. Small capsules, they lift accordingly. (3:16). And them people said, he never had the flight systems. These are the flying systems. So simple. Because the feeder of the Pl as you see, is these electrodes. It feeds itself and maintains it, and by interacting in a specific way with some of them you increase and decrease the gravity. Very simple. There it is, you can embed it in anything. … These are the original Pl that would have been embedded in these batteries, and you can see , you can make them as miniature as possible. They are totally plasmatic systems.
R: .. is there a liquid or vapor condition inside the (batteries).
K- It's just total plasma. You initiate the ignition, and you close it. You initiate. (3:18). the ignition of the Pl, there is a specific way, if you look at it, it has a seal underneath of it, and then you seal it, you can see the seal. .. it's total Pl condition we don't allow anything in, this is sealed here. This is a combination of a number of different materials, it's not a normal silicon or Hot glue.

Developing materials to hold Pl has taken me years. Sealing a metal into a plastic without leakage of any Pl or gases, it took months to develop, just to seal these here, to hold these. Because if you don't do it properly the ?? He will all leak out, the gases leak very quickly and it's a N material, nothing sticks to it. It goes loose. still there nothing has changed. (3:20). You brought back a lot of memories.
R:
Keshe 9 volt configuration. 100 pages on this patent. ..

K- These are the first plasmatic reactors, double reactors, the center creates gravity and the outer creates M or in reverse.
R: the original patent ..
K- This was completely studied, analyzed for 3 - 4 months (3:22). by leading European space organization in Belgium which is again has a criminal lawyer inside it, partially owned, used to be owned by the same group. Was confirmed it was called the first .. gravitational generator. Plasmatic G ?? de-generator. It creates both G and M, it compresses the Pl and then it a combination of fields inside it which then leads to gravity and energy release. The energy comes when the gravity pulls the energy from its environment. ?? It's very strong. If you look at this patent. .. a combination of materials which are given here. .. Can you open this picture larger … .. there is a huge amount of information in here. (3:24). You have a circular fields, .. dynamic fields, . fields which are going out as a creation of .. like atmosphere, M. You have huge amount of M .. G this is a dynamic force field, you have the creation of turbulence in a plasma. You have here .. position of the magnets. There was a reason for this at that time. You have Argon, .. H, and … in the bottom you have Ne, This was made initially proposed to be made of stainless steel. diameter 1 meter, it's in the proposal of the production. We looked at it, just to make this ball 100 to 200,000 dollars .. if you look here is and read the patent, Ar, He, H, the H in the presence of the Ar, and He, in a vacuum in the presence of M fields. (3:26). ??? does what it takes, if you know what to do with it. Now with Gans's you do much better, but this is the, not a human, it's atmospheric Pl condition is different characteristics. These channels is to feed different kind of gases into it.

The scientists .. in the company in Belgium which is now sold to British ??? confirmed the system works , first by the .. ?? University of Brussels ?? 7 months and when we put it physically in the hand of the mechanics, .. to build it. It took 3 months and yes it is feasible and it makes energy. And that's when my problem started with Belgium monarchy, they wanted to steal it. I was told when the physical demonstration ?? scientific was to be shown, I cannot attend the meeting. Because at that time the prince, now the king, was coming to see it and it was supposed to be sold to the British. The company to confirm the king, yes we got the T from Keshe. And they sold the company for 10 million Euros. 10 million… to the British government, and they got a system without a key, and they wanted their money back, they could get Keshe to give the key.

Now the key of the space T sits in the hands of the Iranian government. (3:28). They're too clever to cheat. And now the permanent agent is out of the KF. Now we'll see the development of this T . more or less the same kind of reactors but more advanced shape, it's the backbone of the system which we deliver to go to moon June of next year.

This is a 3 core reactor. or 2 core .. it's all the same kind of structure creating M fields .. these are the tanks and what it needs to be feed. when you work in a vacuum condition which most of you don't have the facility to do,

You see here these dots. if you see has a number and according to atomic mass in a vacuum condition and the heavier goes outside, where in normal condition the heavier falls in. this is why the body of the man works so efficiently. (3:30). Because it's in a

vacuum our skin most probably goes to outside. And the rest of it according to the structure of the radiation M field go into the different position of the body .. and then you have changes which is for example in the rib everything goes outside, but in the bone in the leg, the bone sits in the center. it's a creation of different fields and different condition of radiation. This picture if you understand has a lot fo meaning, it's very in-depth understanding You have to understand from thermodynamic to nuclear to matter ??/ everything we know exactly .. what material what thermodynamics what is the flow of the fields of the Pl .and this is a knowledge carried by one man. And everything else ???

R; … I was wondering about these arrows and circular things. (3:32). here, is that just on the outer layer, is there something special there?
K- You .. this picture in a bigger way is on the back of Book #3, in one of the picture of book 3 too. When you go from layer to layer, you create vortex dynamic layers in between them. It's not just going around circular, you got a turbulence where the friction of the body holds one end of the plasma and the other end of the Pl goes into vortex. We have it between all layers. .. you have a circular rotation of the Pl of the Gans's because of the physical rotation, and then at a certain point, doesn't matter the speed you are going, nothing changes in circular rotation. It's round about 2.47 2.5 K, then you have the boundary pressures which push and create vortexes, and in universal conditions it creates new galaxies and universes. If you .. in the center, read the world which say, it's very small, says, plasma. We created the Pl in a specific way, that's why it's called plasmatic G M generator. (3:34). If you could tap into the position of the fields here and here you can collect megawatts. And each layer stays separate, Ar, Ne, He they stay in their own layers, in their own balls. There are a lot of things you can do with this. And then we see again gases here, outside, in the Iranian nuclear reactors space T we use ?? spaces specifically for certain things. You see you look at this in the spherical shape, but now you look at semispherical looking from the top. Now you see a UFO. You understand? You are looking at a cross-section of the side view, but if you look at a cross section of the top view, it's exactly what you get in the UFO. This is what we use. In Iran tests we specifically created radioactive condition in ?? these reactors. These creates lift, motion, huge amount of understanding of the fields and direction of the creation in the U. We could control the feeds so we could expand the Ne to pressurize the Ar, or we could reduce He, to bring pressure on the Pl. Because these are space gaps for each layer. (3:36). for each pipe feed one kind of gas. If you look at some of the physical reactors we have they have 3 - 4 different channels of piping, or energy, or gases in. Here we feed the gases and then we convert the gases into Pl, which ?? ??

Shall we call it a day

Thank you .. I hope we'll see many, many good things will come out of the process will become very easy once we understand more of it. and hopefully with what I explained today and in the past we start making a picture in making a system which makes it possible for man to travel the depth of teh U, both in a condition that his soul and physicality can survive, and be fed and looked after. thank you .. (3:38).

R:

K - there could be developments coming up due to our .. involvement with the different aspects in geopolitics .. if that comes we'll change a lot ..
(3:40).

392 KSW

END

393rd Knowledge Seekers Workshop; August 12, 2021

Questions and Answers day
Controversy about Graphene

Teaching on what Graphene and Nano coating are - to correct misinformation
Groups trying to frighten KS away from KF
Nano (N) means single, individual atom, singularity
Graphene is a shape - N blown up with volume - Diamond shape
KF first to create graphene out of atmosphere
Coke-a-cola bottle created N layers and then trapped graphene inside
Don't be afraid - KF introduced N technology in a simple way
We do NOT make graphene of CO2 - We make Gans of CO2 - energy form
Very Hard to make graphene to put in injections - not enough knowledge
KS know more about Nano and graphene than advanced universities like Yale
According to UN Iran is leading in Nano T for 15 years
They use big words to frighten you
Nano is dynamic - creates a M field -
It creates a M field in blood - because Fe and N is dynamic
Different chemicals in injections - can create M fields in body's environment
Fe based M fields - might stick metal spoon to your body
Magnetization has happened with other vaccinations - not new
Specific types of Chemotherapy can cause magnetization of body
Aura is M field of body - what you eat changes aura
Do not be afraid of magnetization after injections - videos - scaremongering
Science is not yet able to produce graphene the way they want - just use words
Belgium's made KF a terrorist organization because produced graphene from air
We gave you for free - technology worth billions
The lab results confirmed that KF produced graphene
If they could produce graphene of C in an injection - eradicate most illnesses
They have Not managed to produce Graphene
You produce a spectrum of CO2 Gans - helps the neural system

Chinese took KF Gans recipe - but failed - Now asking for help form KF
Understand the knowledge - Nobody can scare you
Those kicked out of KF tried to scare Spanish and Portuguese groups to leave KF
Man has to change from inside before we take him to space
Interaction of the M fields creates electric flow - how the U was created
You can resurrect body just like Christ - if you have the energy
You transfer one dynamic graphene - body - to another one - Soul
Prostitution of knowledge
Learn how to handle viruses - millions of viruses when traveling in the Universe
Ignorant people using other ignorant people in knowledge can scare you.
Producing Gans of Oxygen
Gans of O is in both gas and liquid state because of moisture in atmosphere
Trying to create a magnet of O
Gans of Radiation - x-rays - Gamma - Uranium - Plutonium
I know how to create conditions anywhere in U
On Earth G reference point is O for liquid and gas - Fe 56 - for solid
To make Gans of O - need technology for absorption / separation - KF has
Easy to hold O in its N or graphene state - related to Inertia of planet
People think they have Gans of Deuterium - but really Gans of Fe
True Gans of Deuterium very difficult to make
Test Gans of Deuterium with magnet - Fe stick to side
Have to battle with GM field of earth which magnetizes Fe
Our body doesn't stick to earth because our Gans is Fe 58 - 59
O is M field G point of liquid and Gans on this planet
Gans of O can create beautiful conditions - Nobody in KF has yet made
New KF Masks for Virus and Prevention
Plasmas have different structure than - Atomic Mass is matter state
Plasmas, as we call it Gans's have dynamic expansion what we call mass ratio.
Gans Plasma dynamic - open up - match into any G field
Where the mass is the collection of the field interactions on a position and a field.
If you change field strength of matter Mass - won't manifest - disappears
Same Gans will manifest on Moon - matches field environment
Energy field transfers leave part of matter behind - mouse without tail
Transfer the Gans of the structure of mouse - to any place - mouse can still exist
Flaw in present science - they want you to accept
High Field Strengths mass state cannot remain what you are
When CO2 bottles moved to another location - can change strength
Explain more about Salts
Salts in body create "Reverse Inertias" - convert matter to plasma
Salt in plasma physics is an Inertia system
Different Inertias creates different materials - like sugar
The body adapted itself using salt to do what Inertias of earth do on planet
Magma creates dynamic reference point for creating different Inertias
The blood does the same as the magma
Variation of salt and salinity dictates - what changes from matter to plasma state
Using same plasma - but different salinity - get different manifestation of materials

Same AA can become a cell of heart or cell of kidney
Earth - Magma - M field mass ratios - creates Inertia - absorbs energy to matter
Emotions create salinity for what matter needs to be created
I need to get rid of what I ate in liquid state - Body creates kidney
Emotions are partially the reason for creation of salt
How emotions create cancer by changing the salinity
Today you just got 4 PhDs - you understand more than professors
Animal Souls will Elevate at the same time as Man
Process of Elevation has already started - but hidden
Sunday spraying of Gans across planet elevates - Gans in sewers
Gradually the soul of planet and those who live on it get elevated
Contraceptives in sewage weakens sperm - field transfer process
Gans spreads on same process of field transfer to elevate souls
Better to Spray half of Gans in air and half in sewers
A single Gans can fill the solar system
Placing Gans in specific way changed aggressive behavior
CO2 - Convert to plasma - from danger to feeding planet
If you buy CO2 conversion to benefit others - You get all the benefits
Liquid Oxygen is not a Gans - compression of fields in matter state
All neutrons have a spectrum of energies - not exactly the same
Bandwidth of neutron dictated by central G field forces of Universe
Neutrons have different field strength spectrum by position in that Unicose
Neutrons are a minimum common denominator
Neutrons controlled by G by strength of position in Unicose
Clusters of universes make a galaxy of universe in a Unicose
Central G field of a Unicose gives it - its identity
Our identity is an O Universe
Plasma T can stop forest fires - Careful not to imbalance Nature
Forest Fires are part of process of lie on this planet - change ecology
Gans shelf life - dilution of fields
Rick presentation of Paul Hellyer
What happens when you breakthrough to see the Light of the Soul
K- Not much and a lot
When EU unveiled in Iran - "Sooner then you can imagine"

ELEVATION of STP through humbleness relieving suffering and serving others
Not elevation of STM - make STP so humble the STM shines
Elevation is not by thinking "I am humble"
First have to empty jar - to be filled with humbleness
KS chasing gurus who show you things - You have not understood
(Worldly) gurus do not walk the talk - they do not show you their soul
Humbleness comes from virtue - soul shows its beauty (by itself)
We do not elevate the soul - We give unconditionally - Detached - Soul shines
You realize you have nothing compared to the knowledge behind
Don't look for the elevation - Be humble and serve the others
Elevation through 2 types - Physical action and Emotional action

Elevation through physical action - Not many
Elevation through emotional action - Many men have found
Gives you access to what you never want
You give to a beggar - you get self-satisfaction - nothing more
You take someone's suffering - you get elevation of the soul
These things show man he is still attached to physicality
(Concepts) or physical terminology has an end - Emotion and Soul does not
The Soul has a transition time - Depends what you give for the next step
If you give nothing in life - You become fertilizer for others in the future
Building churches/mosques without proper intention - Brings no elevation to soul
Building churches/mosques to relieve suffering - Brings elevation to soul
Priests kick beggars out of church because they themselves are beggars
Homeless around Vatican - Christians sleeping in boxes
When you give to that - you become part of the criminal act
This kind of charity keeps you from being elevated
Elevation does Not come through physicality - But through emotion and thoughts

Similarities between ancient Alchemy Baghdad Battery and Plasma
We have taught man many times but he never listened, now we teach him again
First time man has the true mass communication everybody can listen at same time
The knowledge is the same and the teacher hasn't changed for thousands of years
It's the same teaching
The ancient books you read is what we wrote
Now this time it's called Book 1, 2, and 3

ENGLISH TRANSCRIPTION

(:11). K- I think today is a good day to bring this up, we give a free panel hand to those .. to ask their questions. ..
.. The TV channel is getting setup … we will not do the live presentations on a regular basis ..
… you can request for your TV .. press passes …
(:14). The conference of 4th and 5th September moved to October ..

New Plasma breathing masks for sale KF Store

.. the sale of the new breathing masks for prevention, (:16). and processing of the viruses. These are masks produced in the KF factories, which we are a major shareholder in China, and we ship directly in China in boxes of 20. At the moment we have valued them at 2 Euros per piece so each box will be about 40 Euros. It is for immediate shipping. We are in negotiations with major governments.
if requests exceed .. we will add factories in to this line in China.

New KF Oxygen machine through Iranian medical companies

.. The new Oxygen machines produced by The Iran medical companies, (:18). and adapted for the use of the Gans, in breathing systems, will be introduced and exported out of Iran 20 destinations around the world. .. we are linking up and working with the KS and companies ..

The expansion of the T, (:20). is rapid and you will see more of it. .. we are expanding in a way to introduce the T to as many people as possible across the world. We see the .. Gans enhancement T in breathing systems as a way to enter into international arena where everybody will see and KF will be exposed by its T internationally.
In the coming time most probably weeks a new sugar mugs, or cups and Pressure Cups, and what we call Enhancement Cup, and CL will be introduced form our factory in China. Where the Cups carry the instructions printed in several languages on the Cup.

(:22).

The new Enhanced Pain Pen .. will be joined by the new enhanced Pain Pad .. these will come out of the Austrian factory of the KF. around about 150 Euros. ..
.. completion of the enhanced system. … many of you have tested the new Pain Pen and you have seen the rapid (:24). effectiveness of its operation. The same will go with the .. Air EU this unit is .. final position .. for total disinfectant of environment. for operating rooms. different areas fo the house.

We go back to our teaching part if there are any questions which are relevant to the teachings fo past few weeks ..
Rick do you see any questions?

Teaching on what Graphene and Nano coating are - to correct misinformation

Q: .. what is the **connection regarding graphene and Nano (N) coating**, is there any relation and can you bring some clarity regarding natural processes, contrary to manipulated ones?

Groups using ignorance and innocence of KS to frighten away from KF

K- We were discussing this just before the teaching ... as it has been raised in the Spanish and the Portuguese KF KS. **They have started creating fear, and this fear again has started, (:26). we know through what we call, "a specific channels" to create mayhem through the lack of understanding of the Knowledge Seekers (KS). They are using the innocence of the KS to frighten them away from the KF**. It's done again, launched from the bases we have seen from the past. And it is deliberately targeted on these 2 communities.

Nano is single individual atom - Graphene is a shape
Understand the science, Nano is counting the individuality. Graphene is a shape. As I explained to the Spanish group last night, **N is the size of an atom** which will be in singularity, which is ten to the minus .. **9 zeros of the meter**.

Graphene is when N takes structure - an atom gets blown up to volume
Graphene is when the N, a single atom in the matter state takes structure. We've seen it. All of you know this if I explain to you in a simple way.

Heat popcorn it blows up to a shape - Diamond shape
A corn is an individual, it's a single N, it's a single element. When you heat it up in a pan and it expands to a popcorn, then it becomes a graphene, it has a shape, a diamond shape.

C as gaseous structure - burns - as individual atom
In the scientific world you have a C in a gaseous structure, you use it to burn for charcoal, for barbeque, you use it for conductivity in motors, (:28). that's in an individual, we can separate it to its individual atom.

C heated up in earth's core - blown up in air - becomes diamond- a graphene
If we heat it up in the central core of the earth, under high pressure and temperature, and blow it up into the air, in a way, into the atmospheric condition, it could be in the water or air, and that point of the transition of the high heat and low, it explodes into diamond. So C on its own is a Nano (N), when it becomes diamond, it becomes graphene ?? -ite

Intestinal gas becomes graphene - fart
The other graphene, which we know and everyone of us, during this program or during the day today, from the time you wake up and go to sleep, will produce liters of it in a form of gases which you, what you release from what I call, anus, and you call fart. If it has smell and odor, it becomes graphene of the gas.

Graphene is a dimensional structure of an atom which creates a volume for itself
This is the simplest way it can be explained. A graphene is a dimensional structure of an atom, which gets itself its volume.

Stomach creates a graphene of gas - goes to nose - warns brain about food
Odor, a smell is a graphene of a gas. Your stomach creates a gas and according to the fields of the foods you have consumed, to tell your nose if the food was good or bad, and if it was no difference you get no smell. If you get smells it tells by smelling from, (:30). your bottom end to the top end of your nose, that the nose knows what to process, don't eat this food again or there is a problem.

Matter to gas - bad food creates a crystal structure of gas we know as odor - warns
Or you understand your extraction of the matter into a gas, in the what we call, crystal structure as an odor, which becomes a smell, informs your brain, this food is dangerous or you ate something wrong.

Do not be afraid of Word - Graphene - now we have knowledge
So all of us know what a N is, and all of us knows what the graphene is. So people who have this problem, we discussed this before, it's them. When you eat food and you release gases to your mouth and you smell it, that's a graphene of a gas. Which in structure you

ate the food in atomic, in your stomach, became individuality of a N structure. And then if it change to gases, which the stomach doesn't agree with it releases as an odor. So we are created out of N structure gas, and our body processes it into graphene. We do not have to be scared of the word.

KF first to create graphene out of atmosphere
The reason graphene has taken shape, if you read the book, which is to do, the paper with the graphene, you understand the KF was one of maybe, the first organization in the world in early twenties (?? 80s), which managed to create graphene from the atmosphere.

Coke-a-cola bottle created N layers and then trapped graphene inside
Which means for the first time we created a N layers in our Coke-a-cola bottle, and in that gap we managed to capture, (:32). a gas of C in that gap, which gave it individuality, and gave it the graphene of C, which means we managed to trap it as a gas inside , and then due to compression of the layers, as more and more was made , we could crystallize it like diamond.

Don't be afraid - KF introduced N technology in a simple way
All of us in one shape or another, like in our nails, our tooth, we have and we handle N and what we call graphene in the structure of our body. So we should not be scared of terminology. If we don't understand it, they scare you. In the present time, N technology in the past 20 years, has taken hold and KF has been one of the leading organization in producing, introducing production of N materials in a simple way.

Split molecules to single atoms - becomes the Man
We first showed it in a Coke-a-cola bottle and then many of you do it, caustic and the rest of it. So we all know what it is, we have a molecule, which is a combination of, and then when we split it, it becomes single atoms, it becomes what we call, man.

Nano of gold or anything just means individual atoms
We have a N of C, a N of gold, we have a N of anything, which means singularity, individual atom.

Nano of H different size than Nano of gold - they have no size and dimension
It has no size and dimension (D), because a N of a H has a different size than a N of gold.

Gans's can't exist individually - need G field of earth - Inertia connection -O
Then when you put these Gans's, as you produce them, they cannot exist individually most of the time, they need, (:34). a G field of the earth, which means they need the Inertial connection, which in the air is an O.

Create MG of C between plates - C from air - changes to Nano C
So we create what we call, MG fields of a C between the 2 plates of the Zn and N coated Cu. In attracting the C from the air, in its M field connection, it changed it into a Nano C.

Nano C takes energy of O from saltwater converts to CO2 Gans

But the minute the N C enters your saltwater it takes the energy of the O from your water, and it converts it into molecular Gans, which is a CO2. So we understand the process.

We do NOT make graphene of CO2 - We make Gans of CO2 - energy form
We do not produce the graphene of CO2. We produce Gans of CO2, which is in an energy form. **You cannot eat a diamond, just because it's a graphene of C**.

If scientists say "Nano" - ask Nano of what?
In that process we fully understand, now the scientists have used individual atoms and they called it, Nano. Nano of what? You have a car. Is it a Mercedes, is it a mini, Volkswagen, or Jaguar. You have a car, call it N. When it's a N .. N of what? And people get frightened.

If scientists say "Graphene" ask graphene of what?
When they talk to you about graphene, a graphene of what?

Very Hard to make graphene to put in injections - not enough knowledge
What have you expanded in your injections, that you call it a graphene. 99% of material in these processes newly, (:36). come out because of the viruses we know, is not even graphene, because it is not easy to produce graphene. Not with the present knowledge in the world of science.

Using Terminology to make themselves look advanced - confuses people
They are using a terminology that people don't understand and it looks very advanced.

KS know more about Nano and graphene than advanced universities like Yale
KS you know this for 20 years. You know more about N and graphene, than the scientists in advanced universities like Yale, in whatever top universities in the world.

According to UN Iran is leading in Nano T for 15 years
In Iran, Iran has been the leading universities in N T for 15 years according to UN. Because we understand the simplicity of it.

They use big words to frighten you
They make it big to frighten you. So when they tell you they use a N, say, "Nano of what?" Cabbage, N of a carrot. What have they N sized? Which means they have managed to come its individuality.

Nano is dynamic - creates a M field -
And then when you have a N, you create a M field. Because it is dynamic, it's a single atom made of the plasma (Pl) as we know it, and it's dynamic. It's the way we do with the plates. We N coat, we create a new dynamic system, between the 2 plates, M field we absorb C from it.

When they put a N or graphene in something- It's a chemical graphene- but what?

So now when they say they put a N in it, or they put graphene in it. This is a chemical graphene of what? Hydrogen, Oxygen, of CO2, because it could be in a state of the matter state.

It creates a M field in blood - because Fe and N is dynamic
Then because it is in the N state and it's dynamic, in interaction with your blood, which has a Fe in it, that's why it's red, (:38). you produce it in your Cup. It creates a M field.

The composition of different blood types create different M field strengths
It can create different strength of M field according to different blood composition. If you are an O, an A, or an AB or you have different composition of blood circulation. We do this in our electric motors. When we pass electric current though wires or whatever, we create a M field, dynamo.

Different chemicals in injections - can create M fields in body's environment
So now the chemicals they put into any kind of injection, in interaction with the fields of your blood, **which is Fe based, is in a Gans plasma state**, can create a M field environment in your body.

Fe based M fields - might stick metal spoon to your body
And because it is Fe based connected, it can show M field. You might be able to stick a spoon to you, and say I didn't do it.

Magnetization has happened with other vaccinations - not new
It happens with other vaccinations, we know before. If you received **injection from measles or rubella, or whooping cough**, or whatever . You had this. It's not something new.

Specific types of Chemotherapy can cause magnetization of body
If you receive a specific type of injections for chemotherapy you create the same thing, because the chemicals, in interaction with your blood, create a M field.

Aura is M field of body - what you eat changes aura
You call it aura. Your aura is a M field of your body, because what you eat, it changes your aura. Now they inject in your body something for the virus, .. headache, .. your back pain, it depends on the strength of the chemical and how it interacts with the Fe of your blood, (:40). in the Pl condition. It changes your aura.

Do not be afraid of magnetization after injections - videos - scaremongering
If it can be reduced rapidly within the structure of the muscles and skin, you might get some interactions. So do not be scared with what is coming out. We saw the first M field changes with the original chemotherapies. This is not something new. Now people can video something and start the scare mongering.

Nano and graphene is part of understanding a science. Number 1 does not make is a car, 1 car, 1 man 1 car. It's just number 1, so it is Nano. When you make it to become 1 car, so

now you know a car, so now it's graphene. Then you have to say what car it is. Then this is different combination of the chemicals they use.

Science is not yet able to produce graphene the way they want - just use words
The science of the man has not reached to the point to produce graphene randomly, the way they want. So they are using a word, which makes it very advanced, but it has to have a matching.

Belgium's made KF a terrorist organization because produced graphene from air
When we produced the first graphene in 2005, submitted to IMAK the most advanced Nano T company in the world. They said we produced graphene, and we are using a nuclear material and KF became a terrorist organization, because we produced graphene out of fresh air with a simple T, which we all use.

We gave you for free - technology worth billions
But we produced graphene of C, which came from the Coke-a-cola bottle. Add in diamonds, it is worth billions, we gave it to you free. (:42).

The lab results confirmed that KF produced graphene
It's in the book, go and have a look. The graphs the pictures of where it is submitted an confirmed.

If they could produce graphene in an injection - would eradicate most illnesses
So understand, yes, you have a N, a N of what? You have a graphene, graphene of what? What have you managed to graphite? If it is a C, **it's the most beautiful thing for your body**. If they can create graphene of C, in an injection, that enters the body, most of the illnesses will be eradicated.

They have Not managed to produce Graphene
But they haven't managed to do that.

You produce a spectrum of CO2 Gans - helps the neural system
When you produce a Gans of CO2 you don't produce one type of Gans of CO2, you produce a spectrum of the C energy, which can help connect, reconnect, disconnect all your neural system as it is needed by the body. So in a way, scientifically we have to invite the new knowledge in, but understand what it is they have, or they claim they have made a graphene of. Which car are we driving a mini, a Rolls Royce, a truck, a ship. Then understand.

Chinese took KF Gans recipe - but failed - Now asking for help form KF
We have seen this in China in past few days. How **China .. agricultural university**, **which collaborated with us in growing harvest in Inner Mongolia**. They thought they found the recipe and they added part of our T into the system they wanted to grow, (:44). **but it wasn't growing that big, the way they saw with us. So now they come back** and say, can you explain, we want you to be part of the Beijing University. We didn't do, they

couldn't do, **they gave a lot of lectures around the world, but they couldn't explain** how we produce graphene in the structure of growth of materials.

Understand the knowledge - Nobody can scare you
Understand the knowledge, and nobody can scare you. this is one of the reasons all my teaching in the past few weeks, I have said, many times, when we take man into space, man will be knowledgeable, that no one whatever claim they can frighten you, or they become your prophet.

Those kicked out of KF tried to scare Spanish and Portuguese groups to leave KF
This is what has happened in the Spanish and Portuguese group, because of what we seen people who were kicked out of the KF, they are trying to say we know something just because we shared pillow, they have no knowledge of. They never even made N material, Gans's till a year before. Connection by pillow does not bring knowledge. I'll call it a prostitution. They are trying to prostitute their knowledge, which they have no knowledge of, and they are using the way they lived their lives .. to scare, .. the KS. understand the T. understand what it means and how it works, then nobody can frightens you, and nobody in the space becomes a prophet. because does something which you do not understand. (:46).

Man has to change from inside before we take him to space
Now you understand why we say the knowledge has to be understood, the man has to change from inside before we take man to space. Because then you'll be abusing yourself and the others due to lack of understanding the mechanism.

T is made so simple that a child of 5 years old in a bathroom in China makes it, understands it and knows how to use it … ..

unless you openly allow yourself to be abused.

Interaction of the M fields creates electric flow - how the U was created
Nano, graphene, M fields are all part of interaction of the fields of a Gans, creates electric flow, it creates a M field. This is how this planet and how the Universe was created. Now it has become a point of fright, because some people have found out how to frighten you. Understand the science then nobody can be a magician. . (:48).

You can resurrect body just like Christ - if you have the energy
I even explained to you how Christ .. resurrection has happened. Now you can resurrect anything if you have the energy.

You transfer one dynamic graphene - body - to another one - Soul
If you can transfer what we call, the graphene energy of what we call a ?? size to a body. Do you become Christ or you understood the T and knowledge behind it the way it was done. **You transfer energy from one dynamic graphene, which is your body, which is your soul, to another one. Now you become dangerous**.

Prostitution of knowledge
Understand my T, that no one can fool you, the way they have ransacked into Spanish, and Brazilian, by what I call, prostitutes of the knowledge, which have no knowledge of. They only knew prostitution. The only people scared .. understand the T. I especially attended the Spanish group last night because of this. **Cups of Life you've seen how it has saved millions across the world**, One Cup One Life. Understand how to use it.

Learn how to handle viruses - millions of viruses when traveling in the Universe
Understand how to manipulate it as the virus changes, because we are going to have millions of these viruses in the U. How are we going to handle it? Once we understand it we can walk it, .. run with it. .. because we know how to walk, how to stand. Understand scientific terminology and how we transfer from, (:50). one side of the science to another.

A Carbon is a conductor worth nothing, you blow it into its graphene, its what woman give their life for to have it on their finger as a diamond. So if someone tells you graphene is dangerous, ladies please throw all your diamonds away. The same with the gentlemen who like to buy it for them, you give them graphene that it can kill them. Next time you go to a shop and you buy a popcorn, don't put in the mouth of your child, the graphene can kill you. How many of us have died of popcorn, and how many of us eat corn? It's part of our structure, it's part of our life.

Ignorant people using other ignorant people in knowledge can scare you.

Any other question.

Producing Gans of Oxygen
Q: . How can we produce Gans of O?
K- Gans of O is very easy to produce, but it needs specific equipment. Because its, if you try to make a Gans of Fe, you have the same problem. Gans's of Fe is very difficult, (:52). but you can make Gans's of Fe in conjunction with another Gans. You make a what we call, protein, or AA, and in conjunction with the Gans of Fe in N state you produce blood.

Gans of O is in both gas and liquid state because of moisture in atmosphere
Gans of O is GM fields in a gaseous and a liquid state on this planet, because most of our gaseous conditions in the atmosphere contains moisture which carries O in it.

Trying to create a magnet of O
So you are trying to make a magnet, and that's your problem. It's just trying to make a Gans of a magnet, that's the problem.

Gans of Radiation - x-rays - Gamma - Uranium - Plutonium
It's in trying to make a Gans of radiation. I can make a Gans of Gamma ray. I make a Gans of x-rays. I make systems that can produce massive amounts of uranium and plutonium in a radiation level. I don't need uranium.

I know how to create conditions anywhere in U
I know the process of how to bring fields, in G field condition anywhere in the U to create uranium, or plutonium, or O.

On Earth G reference point is O for liquid and gas - Fe 56 - for solid
You are dealing with G reference point, which is O in liquid and gas. In a solid state G field is based on an Fe, 56.

To make Gans of O - need technology for absorption / separation - KF has
So if you are trying to make a, (:54). what we call a Gans of O, you have to develop a T, which we have done, for absorption and separation. This is a technique well understood by us in the KF.

Easy to hold O in its N or graphene state - related to Inertia of planet
But holding O on its own in its Nano state or graphene state, it's not difficult, it's easy, but you have to understand principle of .. Inertia of the planet. You cannot make it so easy, many people have tried.

People think they have Gans of Deuterium - but really Gans of Fe
It's the same if you have tried to make the Gans of Fe. True Gans of Fe, it's easier for those who make, like N materials of it, Gans state, like a lot of people make Deuterium, they find out they have a Gans of Fe with them. It's black in color and very easily, you just put a magnet to it, push it by the side of the glass, you see it come up, you see it's an Fe.

True Gans of Deuterium very difficult to make
Because they cannot produce the true Deuterium. The TD is created through a different process. Many of you have made Deuterium, black in color, sometimes slightly reddish, and you say I made D. The only place I have seen TD we made is in China. We made it in the lab there, because it is done from interaction of fields. I have seen a lot of people, even in our lab, brought to me and say I want Deuterium, (:56).

Test Gans of Deuterium with magnet - Fe stick to side
I put a magnet against .. this is not D, this is a N Fe.

Have to battle with GM field of earth which magnetizes Fe
You cannot even convert it to a Gans of itself, because you have a battle with the GM field of the earth, which magnetizes Fe.

Our body doesn't stick to earth because our Gans is Fe 58 - 59
Those few Gans you see with the Fe, are what we call Fe 58, Fe 60 . This is more on the Cu side strength, not on the Fe 54 and Fe 56. Our body works on that level of Gans's. We have an Fe, but we don't stick to the ground, because our Fe is Fe 58, Fe 59 and some Fe 56, very little.

O is M field G point of liquid and Gans on this planet
And O is the same. O is a M field G point of the liquid and the Gans on this planet, even though 50 - 60% of it is Nitrogen. It's not easy to make unless you know what process.

Gans of O can create beautiful conditions - Nobody in KF has yet made
It's something we don't really need, but if you can produce it, it's a ?? valuable, and it can create a lot of beautiful conditions. Nobody has managed to do in KF, claims are a lot but no one. Because I know the system I understand the principle, it's very hard. (:58).
Any other questions?

New KF Masks for Virus and Prevention

Q: Can the new mask can be reused .. ?
K- Yes. No they are not washable but they can be reused. They are the disposable masks. I send pictures to you Rick … We call it, "plasma enhanced breathing system". (1:00).
K- These are the 2 masks which will be marketed by KF. (Photos).

(1:02).

K- I am going to release something to you. this is the way we'll be .. (1:04). This is the packaging of the product you will receive … 20 per pack.

Plasmas have different structure than - Atomic Mass is matter state

Q: can you **clarify how the atomic mass relates to Pl** and Pl interaction.
K- I **know nothing about the atomic mass.** (1:06). I am just a layman nuclear physicist. The Pl has a different structure then mass in the matter state. **It's field strength** and its back to **its environment always stays constant**, as mass is irrespective of interaction of gravity.

Plasmas, as we call it Gans's have dynamic expansion what we call mass ratio.

Gans Plasma dynamic - open up - match into any G field
In the paper I have written about the mass and weight, I explained this in part of it. A Gans Pl as we have it, is a dynamic, it can open up and interact with any G field strength, and match into it.

Where **the mass is the collection of the field interactions on a position and a field**.

If you change field strength of matter Mass - won't manifest - disappears
If I take a mass of let's say C, and take it into an environment, which a C cannot exist, or with a field strength, is in balance, you won't have it there, it won't manifest itself.

Same Gans will manifest on Moon - matches field environment

But if you take a Gans from earth and take it to moon, you still have the same Gans, because due to its expansion of fields, it matches to the field environment, and can manifest. This is part of what we call, (1:08). transmutation, transportation of a future to come.

If I **transfer your mass on the moon or another position, where that mass is the same, but it's a different G field of the environment, it will not show itself, even it has a mass of its own**.

But **a Gans always exists and adapts itself according to the spectrum of the fields, because it already has opened up**.

Energy field transfers leave part of matter behind - mouse without tail
This is a part of a new knowledge, which we gradually try to bring in. This is what I explained last week or .. this is part of the problems that the scientists have had, they say they manage to transfer 1 atom, one part of it was left behind. Or you transfer a mouse, but its tail is left behind. That happens when you create through matter state, you try to create energy fields. It's a different way when you work with Gans's.

Transfer the Gans of the structure of mouse - to any place - mouse can still exist
I transfer the Gans of the structure of the mouse on the moon, or another place it will take the shape that mouse can exist, and creates its own mass in interaction. But in essence it's the same Pl. You cannot do that with a mass.

A Gans of C will exist anywhere in the .. U. A mass of C as a matter state is environmental dependent on field, and strength and Inertia. Because then if it doesn't ?? feed it disappears, or cannot manifest itself, (1:10). due to whatever, it doesn't matter it has the same mass.

Flaw in present science - they want you to accept

This is **part of the flaw in the present science, and they have convinced us to accept it, because they never have understood it**.

High Field Strengths mass state cannot remain what you are
In the high strength fields you cannot stay what you are, impossibilities, if you are in the mass state. But as a Gans, as a Pl you accept higher order strength in the what we call, the volume of the Gans or lower strength, you ?? adapt into it, it's like elastic. But in the mass you don't have that flexibility in the matter state.

When CO2 bottles moved to another location - can change strength
If you understand this in different way, when we send you Gans bottles. When you receive a CO2 see how much is in ther**e**, and when you receive a Cu, see how much is there. That reduction comes from interaction of the fields of the Gans's when in fact, should have no matter state. If we tried to give you the 100 gram of the metal, it would just be the dust at the bottom of the bottle. But when we give you the Gans of the Cu, it

has a volume. Try it. Weigh 100 gram of Cu in the dust form, or 1 gram of it, you can't produce 100 of it, and then weigh 1 gram of Gans, (1:12). and look at the expansion of the height in the bottle.

This exhibition center is coming. We will release the pictures of the new permanent E C of the KF very soon. Keeping this picture .. the same people who are scaring you with the N and graphene, calling them frightening them ..
Any other question.

Explain more about Salts

Q: Lisa in the CU we must use a mix of salts, .. expand on these salts in a general way in relation to the human body. .. (1:14).

Salts in body create "Reverse Inertias" - convert matter to plasma
K- .. Different products or different materials create different Inertia field forces like as we have on earth, or somewhere else. We, to get away from Inertial levels of let's say, Fe or Cu, or whatever, in the liquid state form of the body of the man, the Inertias for conversion of what we call, "reverse Inertias" by conversion of the matter to Pl, or field, is done by the presence of what we call, salts.

Salt in plasma physics is an Inertia system
Or, in a way, salts, you call them, in the terminology of Pl physics, in the direction of the life, or dynamism, or flexibility, we call it salt, or Inertia system.
Different salts create different Inertia strengths - for materials to open up
Different salts create different Inertia strength, that different materials can open up from matter state into what we call, Plasma state.

Different Inertias creates different materials - like sugar
And different variation of salt, create different Inertia like ?? Inertia which creates Cu, you have an Inertia which creates sugar, what you call, let's say C.

The body adapted itself using salt to do what Inertias of earth do on planet
So instead of creating Inertia of matter in the confined body of the man, the body has adapted itself, has created a mixture of material, which they do the same thing as Inertia on the surface of the earth.

Magma creates dynamic reference point for creating different Inertias
In the earth condition, (1:16). you have a magma, which creates that dynamic .. reference point for interaction of the creation of different Inertias.

The blood does the same as the magma
In our body the blood does the same.

Variation of salt and salinity dictates - what changes from matter to plasma state

So the salts are, variations of the salts, and the percentage of the salinity of the salt, is what dictates what we call, a position and composition, of what changes from matter state, into the Pl state. The Inertia level. As simple as that.

On earth we have Inertias and matter state. In the body of man to create that Inertia, we create salt to do it.

Using same plasma - but different salinity - get different manifestation of materials
Different Inertia levels salts, what we call salinity, and mixtures allows different manifestation from the same Pl.

Same AA can become a cell of heart or cell of kidney
It's the same AA with different salinity or different field strength Inertia. The same AA becomes the cell of a heart. The same AA in different salinity becomes a kidney. That's all it is.

Unless you want me to make it very complicated to tell you I am very clever. That will not happen. You have to understand the principle. Salts are in a way, Inertia creation in the body of the man.

Earth - Magma - M field mass ratios - creates Inertia - absorbs energy to matter
You have earth with what we call the magma and different plasmatic M fields of the mass ratio of the matter, it creates Inertia, **which creates a M field, (1:18). which absorbs like what we do in your boxes from the energy to matter state**.
(**It's the same what happens in Gans CO2 Box**)
Same thing happens with the salts in the body
So is the same with the salts.

Emotions create salinity for what matter needs to be created
And that salinity again dictated by the matter which needs to be created, which is connected to the emotion.

I need to get rid of what I ate in liquid state - Body creates kidney
I need something to get rid of what I eat in a liquid state, so the body creates different salts, creates different system of filtering, creates a kidney that allows you to get rid of the extra water, which you intake.

Emotions are partially the reason for creation of salt
So in fact the cause or the creator of salts is partially embedded in the emotion of the man.

How emotions create cancer by changing the salinity
This is why, how we get cancers, through emotion, we change the salinity, and the prostate from not being cancerous, becomes cancerous, because it produces different material.

Any other question.

Today you just got 4 PhDs - you understand more than professors
Now today you have 4 PhD degrees all of you. You understand more than professors in universities about N, and now about salinity, and the other topics.

Animal Souls will Elevate at the same time as Man

Q: salomea, (1:20). When our soul is lifted and we no longer eat or kill the animals what will they do, will carnivores, are they elevated too and how?
K- **The same, they are another animal, why do you think you are the only ones that gets elevated. The process is understanding, the stronger Pl feeds the weaker P**l.

Process of Elevation has already started - but hidden

If you reach that strength of maturity, you'll feed to the others too. We already started this process. But it is so hidden, but it is so beautifully getting done.

Sunday spraying of Gans across planet elevates - Gans in sewers
A lot of you are spraying Cup 1, CO2, Zn around the world every Sunday and many people continuously produce Gans's and wash their pots and pans, which puts Gans into the sewage system.

Gradually the soul of planet and those who live on it get elevated
Now see how many KS are making Gans's and how much energy in matter state we are putting back into this planet. In that process, (1:22). gradually the soul of the planet and the man who lives in it, gets elevated. The animal drinks from the same water as the man does.

Contraceptives in sewage weakens sperm - field transfer process

In London and major big cities, many men can not produce enough sperm to father a child, they have weak sperm. As we said before and it is **scientifically proven, it comes from the conception pills, which women take not to get pregnant. They leave the residue in the water wastes, and the man eats it** and it effects his, from being a man, to more or less, no man.

Gans spreads on same process of field transfer to elevate souls

If you understand that cycle of work, how many of you in the cities and countries are **washing your Gans plates and cups into the drain systems and the others are drinking it. The fish, the rat, process, another man. I'm getting you all very, very slowly**.

Better to Spray half of Gans in air and half in sewers

Many of you make Gans's and you spray. **Put half of those Gans's in your drain system, you feed it from the top and the bottom. (1:24). The soul of the fish** and as much as those that swim in the waterways, elevates as much as those you spray for the man.

A single Gans can fill the solar system

Don't **forget a single atom in Gans's they can fill up the solar system. How many Gans's you have thrown into the sea and waters**, and waterways, and how many of you the Gans's you wash your dishes in, with you not knowing has gone through the water pipe and maybe the next door neighbor uses some of ?? and down the road they use there. Receiving energy has changed his ?? diaper and nobody notices.

Placing Gans in specific way changed aggressive behavior

We have **done some tests .. we had an aggressive sick behavior between 2 - 3 different families in he house between husband and wife, extremely aggressive**. They had no control more or less. All we did, **we placed Gans's on specific order in the houses, and we saw the houses changes. The families changed**, the behavior changed. If you can pass through the air in the family by just putting a jar of specific Gans's, then you can see what we can do with the rest. We have changed the man. They couldn't stand talking to each other, now they don't get enough of talking to each other.

Gradually the bird passes you, (1:26). the fly who sits on the Gans's you sprayed. The butterfly which passes, and the drop you put on the railroad station all are getting elevated. ?? As I said to .. what are we going to do when we clean the air from CO2? I said, nothing, put it in the drainage system and change the citizens too.
Any other question …

CO2 - Convert to plasma - from danger to feeding planet

I explained this before, some strange thing, maybe you'll understand more. We **call CO2 global warming and danger. We take the same CO2 from the air and we convert it to a Gans and becomes the basis for life for bringing comfort to life**. The same material nothing else. Now you can imagine how much you can change the society just by converting CO2 into Gans's and energies. One according to the scientists is killing the planet, by conversion it is feeding the planet, and will bring changes.

The first of these units, conversions, will be tested in Tehran in the next few days, and we'll start seeing the change of weather in Tehran. (1:28). Hopefully, thanks to the work of the KF in Iran. ..

If you buy CO2 conversion to benefit others - You get all the benefits

As long as you buy a system from KF try to see it only benefits me, you get a part of the benefits. If it is there to benefit the others, you get all of the benefits. It you buy a

CO2 unit I have no use for it, why should I buy it. Buy and let it produce CO2 Gans's and feed into the water systems. Cleanup it's one of the most charitable things you can do to the whole human race. Converting the damages back into food, which the plant and animals can use. Not what it gives has to have benefit, because you benefit the others. I explained this to the officials and they understood. And now there are tests.

Any other question? (1:30). Rick dropped off …
Liquid Oxygen is not a Gans - compression of fields in matter state

Q: **Does the neutron inside the Uranium atom have the same field strength as the one inside the H atom**? How can we rank the strength of the MaGrav units in the Periodic Table?
Q: Is liquid O a Gans?
K- **Liquid O is not a Gans, it's a compression of the fields in a matter state**.

All neutrons have a spectrum of energies - not exactly the same
K- All the neutrons have a spectrum of energies.

Bandwidth of neutron dictated by central G field forces of Universe
All the neutrons are not exactly the same, but the bandwidth of the field of a neutron is dictated by the central G field forces of the U.

Neutrons have different field strength spectrum by position in that Unicose
So in each U, we have different field strength spectrum according to the position of that U, (1:32). in the Unicose.

Neutrons are a minimum common denominator
Because its field strength control to a minimum common denominator of a Pl, we call a neutron.

Neutrons controlled by G by strength of position in Unicose
It's primarily controlled by the G pull on the whole structure of the inner strength of the position of the U in a galaxy of Unicose.

Clusters of universes make a galaxy of universe in a Unicose
The way we have galaxies that make a .. a U, we have clusters of universes, which makes the galaxial universes. In one of the papers I have mentioned this.

Central G field of a Unicose gives it - its identity
This structure is the same, and the way each Unicose creates its own central G field gives it an identity.

Our identity is an O Universe
Like this U we call it, is an O Universe, because it has a field of the O, and the one is Cu strength, and this dictates how much, of fields of what strength can be maintained in that

U. Our Nitrogen or our H equivalent to another U is not necessarily the same amount of fields in it. (1:34).
Any other question.

Q: .. How does enrichment of uranium to a high level contributes to increased security and peace for the inhabitants of the planet?
K- The enrichment of the Uranium the way the KF has put forward creates a condition of equality access to energy supplies. Where ever nation can produce its own .. energies, without a need to look for another to do. The access to enrichment of Uranium with the Iranian government is not for the purposes of defense, but is for the purpose of the space T development. (1:36). I developed this T in early 1980s and in late ..
The production of Uranium Plutonium or Hydrogen in the new understanding of the clear processes of the creation of the U will create a condition that enriches all of us with whatever we need, and this creates a condition of peace. We don't enrich Uranium to use it for ?? we use it for distribution of the energy and fields. (1:38). It's a T I developed in the later 1970s when I was in University, and 1980s, because working with , as I was getting trained to become a nuclear reactor control designer I could see easier way to create energies using the nuclear industries. I developed this knowledge which is part of this now, T of KF for deep space travel. We don't look at Uranium, we look at totally different aspects of what large amount of fields can give us. The production of Gans's is for all our human consumption. production of Uranium is for different aspects.
… (1:40).
Any other question. (1:42).

Plasma T can stop forest fires - Careful not to imbalance Nature

Q: Can we use the Pl T to curb the destructive fires occurring every summer?
K- Yes.
R: … including Gans's in the water that they put fire retardant to prevent flames. that can get into the water system (1:44).

Forest Fires are part of process of lie on this planet - change ecology

K- **We need the fires as part of the process of the life of this planet**. If you stop all the fires. … can stop… **But if you stop all the fires the forest fires and the rest, the ecology of this planet will change. We interfere in a big way**. The trees have to burn out during the cycle, they will fall … We look at the short time. No tree has lasted from the day life started on this planet. No animal has existed from day 1. We have to respect the cycle of life. If 100,000 trees

(1:46).

That's how man learned how to cook , saw the forest fire.

There is an Iranian team works on this. They use the sound to enclose the fires.

(1:48). We have the knowledge and T it's not something we are going to work on. .. we kept huge numbers of T in the background till we can launch it collectively in one go that we bring rapid change. This is part of that change. .. gradually we are building it up. With the position we have in the new Iranian government .. you will see new T emerging out fo Iran which has been the dream of the man.

They have been in power a week today.

(1:50).

(1:52).

R: controlled burns .. (1:54).
K- We force our way .. then we find out the forces are bigger than man's greed and thoughts. We submit to it. We have this situation in Holland. they made dikes and claimed land ..

Dubai .. claiming land ..

(1:56). We can claim in small amounts .. South China sea. ..
Any other question

Q: Does a neutron inside an (repeat) (1:58).

>> **BREAK** >> 393 KSW (2:06).

Q: .. Pl water produce by Gans with good intentions, is it that the information will last forever?
K- One doesn't know.
Q: .. (2:08). (R: does it have a shelf life)
K- When you make the Gans's they have a shelf life as they give the energy to the other plasmas, yes. But as an energy lifetime process.
R: Would you say the Gans itself would last forever, but the dilution of it
K- It will dilute into different strength and what are the needs to take from it. This is what we say .. you cannot steal, but what is available freely is for you to use. So when you make a Gans of Mg, full bottle, after a few weeks you see you got half of the bottle Gans, that energy of the Gans's has been distributed to what is needed in the room where you are. If you produce very .. soft, not density Gans's and you put in bottle, you will see them, they reduce and deplete partially it's to due ?? inertia both in G of their own mass, or their own fields, and partially it's that they are feeding the environment. They set in Gans's when you put .. in the houses, (2:10). with huge emotional problems, you'll see they deplete, but the people change. What kind of aggression will change, what do we feel? The spread of the strength of the fields is part of .. new space cities, by dispersing

fields of a given strength of the Gans's, we can change even the mood of the man. If you have a .. especially .. let's say if you have a riot in the city, or people are there to create condition. With the new T you can change that. It doesn't mean, what I said to security guy, we change it from demonstration to protest, if you understand what it means. Before you have a violent acts, .. if you have a drone that it can spray or create the fields of a given strength, you find out people still talk what they want, but they don't move into the aggression part. It's not a mind control, it's satisfying the emotion. (2:12). We are not creating head of lambs, you still have your opinion, we don't change your mind, it's just we change the aggression behavior as part of the emotion. You don't touch the line of thinking, you change the emotion from being aggression. These are the part of the development of the T in the .. institutions, like prisons, and hospitals. It costs a lot to keep people locked up, it costs very little to change .. the emotion. Those technologies we have developed years ago. As I said, time for a lot fo things to be released.
Any other question.

Q: Water have substances, frequencies, protocols in the water network, so the water is not in a Gans state. how to remove everything with Gans . except with its own light. .. (:14).
R: how to remove stuff .. information in the water to make it pure?
K- Gans's is the answer, but you got to know which Gans to use.
R: You addressed this somewhat in the Fukoshima teachings.
K- Yes, Gans's how we do it. It will be very interesting because we have seen it in agriculture in China. I would love to have access to .. sea life which have mutated to, due to Fukoshima and put them in a tank with specific Gans's and see if we can reverse the evolution .. of the Fukoshima as we call it.

But there is another point to look at it as we said, about the fire. Would this accident lead to mutation or creation of sea life, or wildlife that in the future will lead to much more intelligence life on this planet? Are we if we interfere to reverse the mutation, or what has been created stopping a much more advanced lifecycle, not necessarily like man, but a fish cycle , (2:16). to be created. Not everything is negative. Maybe man's life started from one of these deviations? One of these accidents. Maybe a block of C fell in the water and changed the acidity and in that pond, started the cycle that life could exist.
R: for example there are certain pines where the pinecones don't grow until the temperature goes up enough to melt the reason to allow the pines to grow … pine will take over after forest fire. ..
K- We got to accept evolution and maybe because of it a new advancement in the cycle of life on this planet. (2:18). This is part of the process, we cannot stop any of these processes. But some accidents can lead to creation of new kinds of life. We don't know if you are here in a million years and trace it back, you say, oh there was a nuclear explosion started when that was the point we can see the start of a mutation. The best example of this comes from Lisa and Jim in Australia. .. as they have an aqua farm. they found some fish in the main tank, which they didn't think would be there. They had grown so much, and they changed so much. But by literally digesting the Gans's in the bottles, the energy from them, and growing differently. We all get effected one way or another by changes, we have no say in it.
Are there any other question (2:20).

K- There are people who want to go to center in Linz

R: Rick presents tribute to Paul Hellyer. Passed away August 8 2021, 98 years old. (2:22). Defense Minister of Canada 1960s . Aeronautic Engineer
June 3, 1967 .. to official inaugurate UFO landing pad .. keeping space free from human warfare. (2:24). future travelers to and from space safe ..

(2:26).
He was one of my heroes.

(2:28).

(2:30).

That's my tribute to Paul Hellyer. he is helping from the other side .. (2:32).
end ..

K - Any other question

What happens when you breakthrough to see the Light of the Soul

Q: .. if you break through the light, so that you see the light of your soul, do you just stay there, and what is happening with your body, when you are there witnessing it?
K- repeat
Q:
K- **Not much and a lot**.

In so many ways, we become aware of transition. (2:34). We become in both dimensions when the soul expands and when the soul retracts. In a way, when the physicality takes over. The physicality from its sense of vision through the brain sees the transition, not with the eye of man. Because the eye transfers the fields of whatever, and then we see the visual D. When you go through the transition of the soul, is the part of the brain which responsible for what we call, transition of light or information to knowledge of, "okay this is a book of what I see," we call it a knowledge of what has been seen. In the transition of the soul, the STM works with that part, not with the physical vision, as we see it. We become aware of it in both dimensions, when the soul expands and retracts to be encaged in the other.

In so many ways, it's, as I always say, it's like a sheep's skin, you turn it inside out, what is out goes in, what is in goes out, and when the time is right you use it the other way. The vision of the expansion of the expansion of the soul does not come through the eye of the man. It comes through the senses, (2:36). of the brain, which translates the information to what you call, the transition. In so many ways, the D of physicality in this operation, when cannot exist will merge inside the energies of the soul. In a way, it takes protection from what it has. This is one of the biggest problems with the present man. As

we are so physical we want to be always in charge, in control. We don't allow the soul to show its beauty, be its way of understanding of the work. This is what we call, the "collaboration" between the STM and STP. This is part of the teachings, that how for man to understand to trust. To let the soul to expand that he can protect it. It's just something that we are afraid of, till we know it, and there is no fear, we become familiar with it. This is the part which is, man, and with the teachings we try to in to you, to understand. When this happens do not look for a visual manifestation of a light, or dark or whatever we hear people talk. But understand the transition over, what we call, another D of the sensation we are not familiar with, at the moment, but we are aware of it, and we live through it. This is what I said, there are many sense that man is not, we cannot explain, (2:38). and in time it will be added to. what I call the sense of vision, not the way you call it a sense of vision, but vision in the Pl condition, the plasma of the STM is very different than what we see with the eye, even though it is the same parameters.

This is part of what the human race has to learn, that when such a thing happens the soul is in charge. When such a thing happens the physicality is in charge and how do I work within each one? We talked about the disasters. If you suddenly find yourself surrounded in a forest with the fire, in a physical D, you burn, and the soul is freed. But if you have the knowledge, the capability to transform and cocoon the physicality within the fields of the soul, as a field extension you can move it anywhere, and pop out on the other side of the forest when the fire is done, is clear, and then go through the transmutation.

This is not something abnormal, man and many of our ancestors who have been in touch with the civilization beyond this planet, have seen it many times. Now it's turn for man to learn the process, and it is done through emotion, nothing else. (2:40). this is what we are trying to teach. When you look at the structure of the man in his brain, it is very simple. We all have it, but we have never used it. When you have the brain and you have the soul in the center, as long as all the energies of the soul, majority of it can be absorbed by the brain, you control, you dampen it, you blanket it. What about the point when you learn to do the other way. To feed from the physicality into the soul, that the soul expands and the brain and physicality still intact, but the soul protects, expands its D. We do this when we are asleep. But in our sleep we have learned a very clever way, we allow certain channels for our soul to open D of communication with outside, or expand beyond. It's if you look at magnet you have fields coming in and going out. In structure of our brain we have many create or in time, that we allow only these fields to go out. We block the others to keep the physicality, and lock the soul in. (2:42). This is the process that we have to learn and is a process fo individuality and the collective work of the fields of the body of the man, be it the soul or the STP. This is what we call the spirit and the soul, and how we separate them. And how we allow one to transmute within the strength, within one to the other D and come back. Where we see the D of physicality we want to manifest ourselves, we reduce, and now we become physical. When we choose in another point we create the D of the soul as we like, even to the extent of creating out most of the functionality of the brain. Then we In so many ways, we take over, we choose. But when you do this, when you take to this position and you have to supply enough that the physicality can keep on existing. That in a way, not physical function of

the brain, but the emotional function of the brain, (2:44). still exists that you are aware of what is happening outside, but if need be, you can become physical D, to see the outside.

This is part of what we'll show with Enhancement Units (EU), .. we'll show with new T and science which will come. We show this transition because it's important for us to understand and once this is shown the dogmas of the religion will finish. Because is the priest talking to the soul of the Creator or .. talking to the physicality of the man? These are the things which will come with the education and understanding and to us at this moment is abnormal, but when you understand you work in 2 different dimensions it will become very normal to you, me, or next generations become enlightened with the knowledge and the process of working with it. Just because the knowledge, you don't understand, does not mean it doesn't exist. KS are becoming very open minded in understanding the transition between the energy and matter, you understand and you can do. But when you want the soul to be in operation, (2:46). the energies, not the soul itself, or when you want the energies of the physicality to be. But do we, would we have eyes on a planet, on the surface of another planet? Do we need it? Or the senses of our emotion of our brain is good enough like a sonar to see everything, what I call, the emotion of the vision of the STM. Very soon, most, majority of you KS will reach that point.

We are in the process of producing Gans's, without you knowing, that will reach to the point that it creates the emotion of, what I call, trust, between the STM and the STP. Then we will see. I explained this to .. it's related to the point of trust of letting. Most of us have what we call, a barrier. We don't let nobody pass that barrier, it could be 1 cm, could be 5 cm. Some of us are, we only allow certain people to shake hands with us, certain people to cuddle us, but we don't go beyond that point of ?? contact, and we feel safe with it. Some of us a certain, within the structure of the body of us, we allow, what I call, having a closer relationship. We decide on a matter of trust, (2:48). how much we allow, who to be. On the street somebody knocks you, say sorry, you intrude into what they didn't want to share, and you can knock to someone on the same street, but it's a friend, and it turns out, "oh, it's you," and you get a cuddle and kiss for it. the same one we knock on the street, shoulder by accident and you end up being their lover. We decide the process of accessibility and process of emotion acceptance. This is what we we have to do between our soul and the STP. The trust. At the moment human beings are the ones who are knocking on the street, and sorry, I am on my own, you are not allowed in. We trying to create that position gradually that when you knock somebody on the shoulder by accident walking, then you find out it is a friend, you cuddle you kiss, you are there for me as much as I am there. Then we have to move to a position that we become lovers, that the other becomes more important than me. In a way, what I said in the forest position with the fire, I love physicality and what I have created that I stand out to protect it. And when the soul is in a position of not wanting to be, I take the position of what I call physicality. Man at the moment is in that position of knocking shoulder on the body, on the street and still having the fear of trusting to be a friend. (2:50). This is where we are in this cycle of man. This is what with education we are trying to bring you to understand what you have ignored is a friend you need, if you are going to go and find the love of Creator, to become a lover.

This is where the knowledge of the KF sits, allowing a man in the D of physicality to meet his creator, through the D of his emotion or what we call without tangibility and physicality but in the D of the fields of the emotion. Then where the man falls in love with his Creator in D of soul, that man has the freedom to be what he wants at any point, physical D or fields of energy D, as we call the STM. This is the process we all have to learn, if we will like to go through that transition. we go to Churches, Mosques to pray to help or see the Creator, but it is us who has encaged the soul who has the capability to be in touch with the Creator. We have put it in prison, and we would like to be able to dance with it, and we are standing outside the prison, and we are the prison keeper. To enjoy, to be able to enjoy your prisoner you have to let him out to be there on the dance floor to dance with you. This is where the fear of man is, and this is an emotional lock, (2:52). which comes from the interaction of the field of the 2 that you are always afraid that if the soul takes over, the physicality dies, where it is actually in reverse, when the soul takes over the physicality gets a chance to survive.

This lack of trust in ones existence is what the is used to abuse the man in D of physicality. When we shall meet with the world and religious leaders we will ask for their robe and their turban, it doesn't matter what they wear, because they are not being enlightened to the truth, not to oppress. This is what you shall se in the coming time, when the conditions are made that the man becomes enlightened through his own knowledge and not by control of the others, be it the physicality .. or be it on the banner of any religion. We shall see this very soon. Sooner than you As I said to a very religious guy very recently, very soon the churches and the mosques which were created to shackle the man to fear of Creator, become the school for teaching how to become free. (2:54). The same building, same structure, the same man, but instead of frightening him from his existence, we'll enlighten him to see his Creator through the right way, to build trust between the STM and the STP, and then you'll see the changes.

Any other question

When EU unveiled in Iran - "Sooner then you can imagine"

Q: Iranian .. when Iran comes to unveil the Enhancement Unit (EU). R: when will the EU be unveiled in Iran?
K- I am trying to be very diplomatic, and very political at the same time. It will be sooner than you can imagine, and at this moment in time, the way we see it, it will be shown in Iran ND University. (2:56). as cornerstone of defending humanity, than the nation. We expect it to be in Iran in the coming weeks, We have stood and supported .. the correct outcome of what we see developing in Iran, and with it, we support the nation with science and T. We are in the early stages of this transition and we will wait and see how the office of .. president of Iran takes the next steps in S & T and all the sciences are extremely good. We have 100% trust, and we pay our respect to the Iran P Minister., he is an extremely knowledgeable man. As he was brought from head of ND University to become the minister of the nation. Or in a foreign language as Prime Minister of Iran.
..

He is instrumental in expansion of Keshe T the way you see it, and his wisdom has part of the KF expansion in Iran, that is why we sit very close and in being the head of (2:58). Iran ND University and now become the PM of Iran has opened a lot of channels for KF. He has monitored our work for past 2 years very closely and he is extremely knowledgeable man …

ELEVATION of STP through humbleness relieving suffering and serving others

Question: If I keep getting elevated will STP match with STM - transfer to RNA

(3:00). Q; Azar .. you said in the past, you have the ability to make man peaceful and take all of us to space, but the problem is, since all of the information is in RNA we'll still make the same mayhem in the space. The question is, if the STP keeps getting elevated. Say for example, I keep getting elevated, at the point my physical soul and soul matches each other, is that elevation of the physical soul that it comes to the point of highest point, being transferred to RNA and DNA instantaneously, or is it time lapsed, that it is going to be taken in order to be imprinted in RNA and DNA?

Answer in different way - not ME getting elevated - Humbleness

K- I am going to **answer in a very, very different way**, because it needs to be answered that way. .. Secondly, what we forget, is the cornerstone of the Pl T and teaching, (3:02). and that is **the words you use, elevation**. In the world of creation **humbleness is the process of development of another soul**. When you speak about the elevation of the soul, you speak about the elevation of the STM, but you speak about **humbleness of the STP. This is what the man has not learned** yet.

Not elevation of STM - make STP so humble the STM shines

You do not elevate the STM, as you consider. You make physicality so humble, that it allows the STM to show its beauty. **Totally 2 different ways**.

Elevation is not by thinking "I am humble"

As long as you become, **thinking you are humble**, while you are **actually hoping to elevate the soul, you will not reach there**.

First have to empty jar - to be filled with humbleness

We take .. in a way, **we empty a jar to fill it up** with something more. We humble the STP, that allows the STM to show itself, that's what **we call elevation**. (3:04).

KS chasing gurus who show you things - You have not understood

This is what **many of KS and mankind have not understood**. You go, **you travel from India to South America, and everywhere looking for all these gurus** and the rest, but one thing **I am sure you have not realized**.

Worldly gurus do not walk the talk - they do not show you their soul
Have you ever seen a man who can show his soul, be arrogant, and talking, walking talk (walking the talk).

Humbleness comes from virtue - soul shows its beauty (by itself)
The humbleness comes from the virtue and the understanding of the being so humble, that its soul shows its beauty.

We do not elevate the soul - We give unconditionally - Detached - Soul shines
We don't elevate the soul. We always, if you go back to all the teachings of the KF. We teach unconditionally, and we give unconditionally. We are detached. It comes from humbleness.

You realize you have nothing compared to the knowledge behind
Because you realize what you have is nothing compared to what is behind, and the knowledge which sits behind. Then when you share the beauty of the main knowledge, that manifests itself.

Don't look for the elevation - Be humble and serve the others
It's the same with the man. Don't look for elevation, look for humbleness. Look for what we call, the servitude. We still live the life of the man, but with it, with the thoughts and with not the physical work of it, with understanding the operation of it, you allow instead of the elevation, or the freedom of the soul, (3:06). to come at a point of death, to be all ?? thanks. …

Q: (she interrupts) Mr. Keshe, what you are saying is, instead of when you constantly thinking about elevation actually nothing is happening, you have to be humble. Like when you want to have a beautiful flower you don't constantly think about a flower, but if you put a seed down and water it and take care of it, and nurture it the flower shows up. .. it has to do more with our action then thinking about elevation. Because thinking about elevation nothing is going to happen, but my action actually justifies. The elevation happens naturally when you are humble, but when you think about elevation nothing happens actually.

Elevation through 2 types - Physical action and Emotional action
K- You see there are 2 different ways of action. One is a physical action, one is an emotional action.

Elevation through physical action - Not many
Not many men have found what you call, elevation, through the physical action.

Elevation through emotional action - Many men have found

But many men have found elevation as you call it, of the soul, or freedom of the soul, from the emotional action. And that is the difference.

Gives you access to what you never want
It gives you access to a different D. It gives you access to what you never want.

You give to a beggar - you get self-satisfaction - nothing more
You take someone's suffering - you get elevation of the soul
You walk on the street and you think you are very generous and God will give you this and that, and you give money to a beggar or somebody, you think he asks for money, he needs money to do, (3:08). to him. And you think you are very humble. You get nothing for it, more or less very little, except self satisfaction. You walk a few meters away and you see a man in pain, and you wish I could carry your pain that you don't suffer. And then you find a few steps further an elevation, and a knowledge, a freedom, and you think, "oh, because I paid the man," it gave me the pleasure of this elevation. But it was actually the man who you took the pain of.

These things show man he is still attached to physicality
This is where mankind goes very, very deep in understanding, that he is still attached to physicality.

(Concepts) or physical terminology has an end - Emotion and Soul does not
Because physical terminology has an end, but emotional and soul has not. Even though in time it will come to its own cycle of dispersing its fields.

The Soul has a transition time - Depends what you give for the next step
Even our soul has a transition time, but it depends what it goes to, and what it gives to be as part of its transition to next step.

If you give nothing in life - You become fertilizer for others in the future
Or you just become what I call, a fertilizer gathered, and then you disperse to grow some others in the future. So you have to understand what it means.

Building churches/mosques without proper intention - Brings no elevation to soul
Building mosques and churches and giving, (3:10). charity has not brought no such a single, one single elevation, to no soul.

Building churches/mosques to relieve suffering - Brings elevation to soul
But if you in the process of building a mosque or a church, you built it for the souls to be elevated for a man who needs a food, come to church or the mosque, and you look after it by giving the comfort of home, then you receive that elevation. Because you took a suffering from a man.

Priests kick beggars out of church because they themselves are beggars
This is exactly what is the opposite, happening today. You get a beggar to go to church, the priest kicks him out. "This is not your place, this is my place to beg from the people

and steal from." You cannot steal from a man who already robbed the other people from their soul and their pocket.

Homeless around Vatican - Christians sleeping in boxes
I have told you many times. Go to Vatican and walk around the bridges, on the bridges, the walkway to the Vatican, when you walk into the square, and just on the border where the line of Vatican is, move back 50 steps and look to the left. You see a lot of homeless people sleeping on the window sills of the Vatican's car park, hidden behind, bringing coaches and coaches of Japanese, Chinese and Filipinos and the rest, to put money in the coffers of the Vatican. (3:12). And these people are Christian and sleep hungry and in boxes.

When you give to that - you become part of the criminal act
Then you pay more to, in a way, become part of the criminal part, to steal from the physicality of the man. I have said many times, and I see hungry and homeless people literally around the richest church in the world. They do not feed them and they do not help them, and they sleep in the winter and summer in boxes on the window sills and underground bridges around Vatican. You cannot rob from someone who has already robbed everything.

This kind of charity keeps you from being elevated
This is where it comes and you gave something to a beggar and you think you have done well and God will help you, that act itself, has taken from you even being elevated.

Elevation does Not come through physicality - But through emotion and thoughts
Then you understand more. Elevation of the soul does not come in the D of physicality. It comes through the D of emotion and thoughts.

Any other question or shall we call it a day? (3:14).

Q: .. whether there is a relationship between .. the Gans and the CL, and the similarities to the alchemy of old, as well as the Baghdad battery. … it seems K is reviving a lost ancient advanced plasma T and science?
K- We have taught man many times but he never listened, now we teach him again. You understand? It's just like going to a class and failing and going back and you sit for the same class again by the same teacher.
R: Alchemy 101 once again.
K- You haven't learned you have to ?? The knowledge we have taught many times, but the man has not been ready as today. Part of it was due to communication, part of it to isolation , and part of it was through control.

It's the first time man has the true mass communication everybody can listen at same time and be able to share knowledge in that way. This is why KF has such a capability to reach. And we reach, very deep, and very far. (3:16). We hear everyday different events and we realize how big is KF, how far we reach amongst the people. The more I talk to

KS, or we hear it's amazing how many people know about the KF. they take from it what they want. It's so frequent, they know the KF ..

We are amongst and we have grown amongst people. Different time of communication, different ways. This is how Christ managed to cross for Jerusalem to Europe because those days nobody knew who he is. No means of communication to explain how he knows. Only a few people in Jerusalem knew him. Now it's not that way. (3:18).

People know (about the KF) and it happens all over. This time the knowledge can't be hidden. The governments have tried, the kings have failed, and the kingdoms will go with it, because they fail, and many others will go with it, and the change will come. But this time due to mass communication the knowledge will spread, it's not like before. Every time we gave a knowledge a few groups, cities, or whatever it is, or they used it to create more mayhem. this time we use it to create peace.

The knowledge is the same and the teacher hasn't changed for thousands of years. It's the same teaching, just moving from one city to another. Now it's time. We have access to mass media and we teach again, but in much deeper way, much understood way, and this time we'll bring the change, because we made the facilities for it, we made the communications to be done, that this time the whole planet listens, through the soul, (3:20). through the understanding of the knowledge.

The ancient books you read is what we wrote. Now this time it's called Book 1, 2, and 3, but in essence it's the same path.
Any other question.

EU is in 14th place of contest

R; There is a little piece of news, in our contest with Universal Enhancement Spaceship Unit is coming along nicely.
K- How much, how far have you moved up to.
R: I have to tell people about it first, I am building up to it. This is **the Create the Future, design contest put on by some major engineering technical firms. Here is our EU entry. It's now up to 105 votes**. .. we haven't made it into the top 10 yet, but we are tied for 14 position. If we get another 10 to 20 votes we'll be in top 10 in over 500 entries in this contest. (3:22).
K- So you are trying to get KS to go in and vote for you
R: yes that's the bottom line ..

(3:24).

K- Thank you for today. Hopefully we meet soon starting our 9th year of teaching. We'll how we go.

(3:26). There is a huge shortage of oxygen systems ..
..

R: 393 KSW

END

394th Knowledge Seekers Workshop; August 19, 2021

June 6, 2022 (6 6 6)
Iran & China collaborate on moon flight
Afghanistan change over

Instructions to Universal Council (UC)
Tuesday is for nations to ask for help from UC
UC start to rule nations through soul
Recognize you have the power within you to change things
We all are UC members
UC members will be given a comfortable life

The souls of world and religious leaders have been changed for peaceful ones

They Chipped you without you knowing (3:13)

ENGLISH TRANSCRIPTION

Cycle of creation video.

K- (:30).
Last week we had a beautiful session when you listen to it there is a lot of … technical hidden knowledge for those of you who tried to step a little bit further out. As we try to expand the knowledge, there was some questions asked …
.. we are getting more and more involved in different aspects of the T development and commercialization. Later on today the KF will launch the sales of the .. N-95 masks and disposable mask is to be manufactured by the KF, China. .. it's offered at 1 Euro per mask ..
(:32).

June 6, 2022 - 6 6 6 - End of a cycle - Beginning of a new cycle

Question risen by KS, is why we have chosen the start .. flight space program with Iran and most probably China the same day launch, one after the other. Why have we chosen

the given date of .. to be 6th of June, 2022 .. 6 6 6. We all know what that means the beginning and start of what we call, 18 and 9. End of a cycle, beginning of a new cycle for the humanity. Now you understand we don't usually explain things in detail, but 6th of June 2022 is the, what we call the threshold of the change. It has been chosen specifically for certain reasons and in that process, mankind will come to mature. Mankind will be ready to join the human race to the U Community. In so many ways, the end of one and the beginning of the other. In understanding the science of space we expect the humanity to reach the maturity of understanding the world peace by that date.

The KF in cooperation and collaboration, (:34). with the Iranian new administration, will feed this rapidly across the planet to different governments and different directions. IN the communication fo 2 presidents of Iran his Excellency president Raisi and president Xi, yesterday. It is reiterated that we'll endeavor to increase the work for peace and in taking … bilateral actions to make sure the mayhem created by what we call, superpowers of the past will not be repeated. We respect and honor the bold action fo the 2 presidents in their talks, but they need a T to support it. In the next few days we'll announce in very close collaborations how we start the international teaching of the KF through Iranian universities across the planet. We are working on and we have put when we start the process of the teaching of the T in advanced level from Tehran NDU at the beginning of this year. As we said, we teach internationally and at the same time we make sure all that the teaching comes from a structure that has the T and can deliver T to governments across the planet. As I said to the Iranian new administration, we will give as a gift, as a souvenir every Iranian advanced centrifuge as a gift to one nation. Which means we do not need the present centrifuge T which has been the mayhem behind many accusations ?? We dismantle our ?? systems and gift it to every nation, (:36). that understands the process, .. the structure and the process of the structure in how to create peace by knowing the advanced nuclear T of today which has been used as a tool of fear for war, becomes a tool of peace.

As I said, we have heart warmedly welcomes the new Iranian administration, the same as we did with the American administration at the beginning of this year. And the doors of talk and negotiation both in Vienna and Tehran is open. KF has got involved in the process of peace and diplomacy is part of the work which the KF known for years. It's the not the first time .. with the diplomacy we can create conditions that nations can live together.

As I said, in a very recent talk, what we see the US will become 50 independent states and nations of their own in the coming time. We know there are a number of states in America who would like to separate and become independent. This will be facilitated by the national structure of the US as a nation to 50 different states in the coming years. Which means as the KF One Nation policy takes hold we do need nationhood's, or one nation. IN a way we give regional and what we call, local people the say in their life as the signs of the cities to states is the natural progress of the development. (:38). As we made the villages and then towns, and then we built the cities. Now it's a natural process to become states within the one nation of what we call, One Planet, One Nation, One Race. These will come to forth of our work in the coming years.

On June the 6th 2022, we move in the direction of One Nation, as one nation, One Planet to endeavor to travel the depth of the space. As I explained in a writing in past few days to the heads of state, that on the 6th of June 2022 with the collaboration of the Iranian space agency, and the Chinese S A we launch a day return trip to moon. Which means we can go and come back. In a way, we do it with passengers or without passengers, it's not that important. Being able to make the trip in one day will break a lot of taboos about the world of S&T and the advancement of the human race to a new level fo the .. technological achievement. From then on it is the responsibility of the nations to educate their citizens. Each state has the responsibility to teach the fast track, everything needed to become part of One Nation and part of One Plant One Nation. We do not foresee any problems as I gave assurances to the Iranian government. We work only in the direction of peace, we do not receive orders, and at the same time we bear the flag of peace by all nations (:40). and not single nations.

It will be interesting to see how the development of the space program between Iran and China will take shape. We work through the new Iranian in collaboration with China to be able to deliver national security T. The reason for this is very simple, we explain it in public, that the government are listening they understand. If Iran develops the space T and tests, this gives a tool for those who are evil minded within the American administration and European governments to create the next mayhem. Iran in support and collaboration and joins space development with China, will given the strength to the T to take hold rapidly, and bring the pressures back on the European nations and Americans, in a way to step and join in, then creating more problems as they are falling behind in T development. WE have no problem in sharing knowledge with the Americans, once the American administration through senate signs the world peace treaty, that takes this nation out of the animal behavior we have seen in the past years which has been part fo the structure of the work of this nation. Now you understand our work is very detailed. We have calculated everything in how to work and how to collaborate.

In yesterdays talk between the Iranian president and the Chinese presidents online, we have seen the first signs fo the close collaborations in every aspects ?? nations and KF as now, (:42). we have both centers in Tehran and Beijing, we work with both nations to change the source, to bring the T. To be taught directly from Tehran universities. In a way, we are endeavoring to change the KFSSI autumn sessions and if we cannot do, by the January sessions to be taught directly from Tehran national universities. In a way, when you become the students of the KF hopefully you become part of the INDU students, and this allows us to bring the research and development forward. We always endeavored for past 2 years to bring, and make Tehran the center of the teachings of the new space T.

…

We became part of the structure of ND University (NDU) when we released the Corona report last year. If you read the report in front page about the Iranian flag, you'll see the NDU.. We are here to bring the knowledge and T and make Tehran the center of the new science in space and peace. We work on the principle of Zoroaster, as we talk good, do

good, and we think good. We think it is good to share, we talk the way we think and we act to share the knowledge.

In understanding the new concept of space T, (:44). we need to understand more in, which way it will be beneficial to all of us, the present problems and the future problem to come. In so many ways, opening of the space is the beginning of a bigger adventure for man.

makes one man from the whole knowledge of the U. In so many ways, we start the teaching of what we call the space T in a different way, different understanding, and in understanding the totality of the work. .. in the coming time, especially when we start the teaching from Tehran NDU the process of teaching the scientists in a very rapid way. In a way, that when all scientists when they gather together on the platforms fo the INDU of KFSSI. We all gather to learn and to add to the knowledge of all of us. This way we make the patents obsolete, because the new knowledge of the space has no patent. Teaching it in such a makes sure, (:46). that no one can patent anything as the knowledge has a basic common denominator of sharing for all of us. As you see we have planned everything to get rid of all the problems that the children of man have created for themselves by gaining knowledge and wealth which has no value in the depth of the space. You cannot go to the man from planet Zeus and say you cannot do this, I have a patent on it on earth. Hello, good morning, wake up .. we gave you the knowledge. You cannot patent what we have given you. In so many ways, mankind will move in a new direction. WE learn to share, the way the KS from past years have learned to share. We go to different classes from Spanish to Brazilians to teachings of Rick on Wednesdays and others and we see how KS without any fear share the edge of science T which to them is natural with each other that if we bring the professors from MIT and London University they ask for 20 PhDs and professorship for that. That the laymen on the streets understands more than they do. This is the beauty of the new way of teaching. This is the beauty of demolishing the work man has made to make himself superior to the other. No patent rights. No what we call being proud of knowing a knowledge which is shared by the others and claiming to be yours. In the coming time we will open a lot of new sciences and T. The KF from Linz exhibition center release new T on a rapid way, (:48). that it can be seen. WE are planning to open the Linz EC on first of October to public. You are all welcome to be there . .. it will be a historical position and time. We will not explain who shall be there .. we know the Russians endeavor to be there, Bulgarians …
… this is a permanent position.

(:50). On Saturday October 2 we are opening your center .. 2 new space systems which have been developed.

Transmutation of elements that you will see. We will show these for the first time in exhibition. .. first transmutation and transportation systems for human race into space. This means the first time a system can transmute man without any connection to position to space and time, to another position in space and time. What we call the new Transportation system for transmutation of energies ..
the confirmation of it will happen on 6th of June next year, where we use the systems …

(:52) that will make the defense T of the present time obsolete and forces nations to understand what we call, air superiority to be air zero superiority, which means no nation will be able to bombard any other nation and use the air space to enforce conditions. We have to respect the needs of the nations, and at the same time deliver what nations need irrespective of race, color or religion. We have to respect our local understanding .. governing has to be on the just state.

Afghanistan

We have been asked to make a comment on the present situation in Afghanistan. KF stays on the side line. We wait to see, after 45 years of struggle with the Russians, then the Americans and the British, in Afghanistan, that the state of Afghanistan goes back to its own nation to run. We have seen from the beginning of the excuse when the Russians moved into Afghanistan, all what they wanted ..
Now the Taliban's gave a good kick to the back side for the Americans to leave. Every nation has to be left to decide by its own …
We see troubles coming up in Afghanistan, but these troubles were fed and bred … every way trying to pressurize the Iranian government to change, and now they could not do as they lost in Iraq in January of last year. (:54). And now move out of Afghanistan. We will see regional stability in a different way. For the first time the Middle east is becoming washed of the hands of the Americans, .. as they had a good what I call ear whacking last year by the Iranian forces in Iraq.

In so many ways, we do not make comment as we are watching a change in the D of the peace policy by the American withdrawal from the Middle east. We respect all the states and governments, but the problems we see today in A was bright in 1970s by the Russians going in first, and then by the Americans, and then by the rest, and now everybody had enough of playing games in other peoples land, loosing so many soldiers, and so many people made so much profit out of it, out of the drugs, and now we are back to normality of 50 years ago, but with a government which now has all the weaponry which the Americans left behind in the agreement made by Trump, that they modernize them with their weapons and they just took the soldiers out.

In so many ways, we have to watch, and we hope and pray, and this is the responsibility of the UC to reach the soul of the leaders of Afghanistan to bring peace through them to their nation. We will see some mayhem as we saw last time. but in charge should be the members of the UC through the strength and the power they have through the operations, to change the process of the leadership in Afghanistan. It's not diplomacy policy, it's the soul policy, and it has more power than the diplomacy. (:56).

This is why we established the U Council for this purpose, reach the leaders that it becomes a just correct leaders for their nations. They listen to you, they respect you, not through the words and writings, but through the reach of the collective members of the souls of UC.

In so many ways, gradually what we set up in past years, taking shape. It's our members of Knowledge Seekers (KS) who have to learn how to use what they have been taught, and how to facilitate, in what has been facilitated for them, for the others to coexist. You changed wars, you wished for peace and you brought the peace, in every ?? and directions in past few years. Now you understand your work is sacrosanct.

The members of UC asked for direction from us, what will happen in Afghanistan? There is no need for such a question. You have the power within you to reach the soul of the leaders, and create through them the just means to cover it Then you understand as you wished for peace, and you achieve peace, in every direction you have tried, now you have to work on the collective soul of the Taliban's.

In a way, they want a new way to run, that is pure in the structure of Islamic law. Understand the law in true essence and guide them through their souls. This is your job. Understand every nations what we call culture, and then through it bring justice.

This is the teaching of today. We do not nee to go to the UC to teach that, many of you, and many of your, what I call, offspring's in the future, (:58). will become members of the Council. So we teach to save it in the soul, that in time to come your offspring's take the knowledge from your soul how to conduct, once they become members of the UC.

In so many ways, understanding the STM, understanding the operation of the STM, and teaching the souls the way they have to operate now falls on the shoulders of the UC, and not on governments. You have to teach, .. yourselves, and your future generations who might becomes the members of the Council will serve in different capacities with and within the Council that there is no time for the pen, and .. computers messages. Try to work through the pen of the STM and it will reach the man in any corner of the U. There is no postman to deliver the letter fo the soul on the planet Zeus or form earth. This is the next step fo the elevation of the members fo the UC, to the higher level for them to understand the position. You have to remember, the members of UC, you live 2 lives, one the life of the soul, and one the life of the man. This is your responsibility to separate and to not let the glory of the achievement of the soul to become the shame to the dimension (D) of physicality of the life of the man. Understand both and live within the structure of the 2. Never be proud of what you achieve through the UC, that never effect your life in the D of physical D. UC members, (1:00). have to learn to operate in the levels that their souls takes them, to be guidelines and to create the support of the other souls, of not only the man, but the others across the U.

In so many ways, today's teaching mainly lies with the structure of the work of the UC, with the structure of the work of man in respect to UC, and in how their wishes are leading to the world peace. We provide the facility and .. technical knowledge in the background to keep the children of the man busy, both in the physical D, and in case they decide in the D of the energy and .. STM. Today's a glorious day for those of you who are the members of the UC and start understanding the purpose of your creation and the purpose that you are here to serve. Be proud that you can serve. And not that you are a member of the Council.

In so many ways, we have a number of UC members that their work is nonstop during the day and night, during the sleep and awake. Gradually they are realizing responsibilities and what it needs to be, and to be correct. They will make mistakes but from their mistakes the other souls learn. WE see more and more members of UC spending their time to understand themselves, understand the power they carry to be humble and to serve the others that the servitude becomes a way of living, and not a way of Tuesday afternoon sessions for some people, (1:02). to come and learn something and go.

In a way, my advice to UC is to open your Tuesday sessions to answer and questions. Let the people bring the problems of their nations and cultures to you and collectively find a solution through your soul and guide them. This is how your Tuesday afternoon sessions have to be. Not just to introduce to carry on with what you do, what you want to do. Allow the Tuesday sessions to become a platform fo justice, where people can come for support. Where people can come to you as a collective soul to bring the problems of their nations, .. of their culture for you to hear, and through your souls to find a solution. And through your souls to change the position. This is what you were setup for. We allowed 3 years of development and for you to adjust. Now it's time for you to take positions, as people go to their kings and to their leaders to ask for a solution for the nations problems. The members of UC become that council, where the world citizens from the king to the peasants, will come to find council and peace, and guidance. Open the doors that they can come to you through your Tuesday teachings, for relevant questions, for guidance, for help for you to hear their problems.

The UC has taken a new shape, and in a way we do not give you the weapons which the UN had to create war. (1:04). And in effectiveness as we have seen, in past 2 years, now that it cannot bring people together to shame them, or walk away from them, or praise them. You do that, you take a new shape in the UC on Tuesday, to listen to the world's citizens their problems, and guide them through your souls. Not necessarily by discussion and words. In a way, as people bring their problems through the physicality, by and through the strength of the soul of the Council, you change the souls that the physicality finds its own remedy, be it by man, the nation, or the whole of the planet.

Remember the story of the donkey, the king and the bell. Even the donkey can ring the bell to explain there is a problem. It's the job of the king to find the solution, why the donkey is in pain and suffering. This time the donkey is the physicality of the man, and the king is the soul of the UC but this time without meeting the farmer, but in the direct way of solving the problem through the soul of the farmer and donkey.

In so many ways, the donkey is the physicality of the man and the farmer is the physical life of the living of the man. You have to understand the STM the soul of the beast, and the soul of the fish, and the same as the tree. In so many ways, gradually as the role of the UC increases through the soul D the devotion of life to serve mankind in all D and directions on this planet and all its citizens be it of here or not, it becomes the pleasure part of the life to serve unconditionally, (1:06). and to serve with the most beautiful way by supporting the STM that the physicality can live. Learn the way I have lived and form

it learn how to work. Share knowledge of the soul unconditionally and change it with a peace Talk. Bring it to be the source of life, through the D of the STM.

In so many ways, we learn from the masters of the U how to become masters in life of physical D or the STM or ?? outside. In so many ways, every single one of us becomes what we call, a member of the UC, as we travel the depth of the U on our own or with others, we become the ambassadors of our planet. We become representatives of UC of our planet, as you know when you have an ambassador in the nation it means the representation of the presence of the king and the queen of that location. So when you become the traveler of the space as a man form earth you become a representation of the UC soul and membership. You become the connection because you are representing the race in the depth of the U. In that process every single man on this planet has to live the life of the UC member that when you represent the human race in different positions and locations in the U, (1:08). you represent the UC. In a way, the talk and life of Zoroaster becomes the talk of Ahura Mazda. in a way, our conduct in every point in the U becomes representation of the man on earth. How would you like the others to see us in the depth of U. Serene, intelligence, understanding the work of the soul, or as our American friends, gun on the hip, they shoot and kill, and the gun policy of destruction. I prefer one to the other, which is the former than the later.

In so many ways, all of us with understanding the new T and the way we start teaching from Tehran NDU we see that we start in a new structure of life. National defense, we are one nation, and we defend the integrity of the soul and the physicality of the man. Now you understand why we even chose the national defense university fo a nation, then any other university, which means we learn to defend the STM across the planet. We respect and honor the position of HE A K of Iran and Iran religious leaders in creating such a university in the structure of the military of Iran that today can be used to expand it not only to Iranian national defense but the planet, and beyond to the STM. (1:10).

Now you understand even your religious leaders have been working for us to create the ground for mankind to move to the next step, for mankind to ready for becoming part of .. U Community. We use the tool of the STM to bring it to the position of physicality that for what we plan to deliver to become part of our work, be it religious leaders, political leaders or what we call diplomatic structure.

In so many ways, we start a new cycle, we are from now till June in preparation of the totality of human race for the next steps for breaking through, for being able to travel the depths of this U with a 1 day trip. This will be a giant leap for every man, for every soul on this planet. We do not except political position, but in the diplomacy we bring the diplomacy of the U to fit into the structure of the diplomacy of the man. Political positions have no meaning, as diplomatic life has a better position to change many, to bring many understanding. At the moment we have diplomacy between nations.

We have to learn diplomacy between cultures of the U, except them with open arms, and greet them to be part of us and teach them the culture and the way we live, (1:12). through their souls and not their physicality. Understanding of the responsibility of a man

and their children, becomes part of the work of the U, to become one of them, to understand their beauty, that Mitra manifests itself on planet earth, because of its beauty and the whole U has been waiting for the birth of Mitra, in the physical D that we can start the process. She is amongst us, she has become part of us, and in the coming time she will reveal herself to all of us. We respect you, we love you, and we salute you. All the religions of today are based on her generosity and correct conduct. In understanding the life of Mitra you will understand the creation of the Creator and the life in the U.

In so many past times many people tired to guess and make imagination. Very soon you will hear and understand her words, her work, and what she plans for the whole of the U, through the structure fo the STM. It's a gift which mankind carries. But In so many ways, mankind had to taste everything in past thousands of years for him to understand, what can go wrong, and how can go wrong, and how he can change and prevent it. You cannot be a specialist if you have not worked the field to be specialized. The STM, (1:14). has learned about the demise and pain, and now through the elevation and presentation of the soul of Mitra, in becoming the traveler of the U, we shall make sure that no creation, no existence in the U will ever suffer in the physical D or in the D of the soul. Now we understand why we took this position, and why we have taken this position. The understanding of the structure of the .. STM becomes part of the life of the man. Now you understand in truth you are all members of the UC, because from next year you become man of space. Every single one of you, from a man, to a cat, to a fish, to a tree in traveling the depth of the U will represent the soul of this planet. You do not need the language and words, but you'll understand the totality of the knowledge. My .. biggest wish is that human race in coming months, will race to understand fast, and learn as much as possible. We support for the nations that used to be in the making of the tools of war, to convert their technologies to new T. We support them in the transition with new technical developments, with the new scientific developments of the space. (1:16).

We expect to see the total disarmament by June 6th, 2022. It means that the world leaders to come to agree a peace process. The world leaders come to understand that the humanity has reached the maturity of peace. As I said we invite the world leaders to the land of Mitra, to Tehran to sign the world peace treaty. to commit their nations to peace. In so many ways, it will be watched by the religious leaders as much as other world leaders in presence to complete. In so many ways, mankind has chosen to destroy itself, to destroy its brothers and sisters over centuries. Now we see mankind to a new position to create and elevate the soul of the others, before his own soul. Understanding of the totality is understanding the work of the man.

In the past weeks we kept away from pushing or trying to push for the members of the UC to take position, to understand their work. We allowed them to go through a new fresh transition point. From now on it's their responsibility to take their positions and start practicing what they have been chosen by their souls to do. (1:18). We will facilitate the comfort of the physical life of the members of the UC in the coming time, that they don't become arrogant, that because they are member of UC, that they become active in serving humanity to be able to change all dimensions.

We don't create new creatures, but we allow the STM to serve, that in serving they find peace and tranquility amongst the children of the man. Today's teaching is totally and ultimately about UC, that they understand what is to come, they understood their position, and in a way we all understood.

We all have become the members, the representative of the UC as we take wings across this U, and we all live by the ethos of Zoroaster. And that is all we need to do, and that's all will come to us to take position and time.

We put world leaders in position, we put religious leaders in position for the time which is now to bring that change. Now we replace the present world leaderships with the UC. And those who serve within the council which is the whole of humanity. In time we will understand. It's the end of separate religions and path of belief to same Creator. Now we all believe in the same Creator and the same path. We see the end of Christianity, .. Islam, .. Judaism and Buddhism, (1:20). because we bring an end in our own souls, but not by going to the mosques and temples. We understand the true essence of creation and the devotion to serve. In so many ways, we don't finish with the religions, we finish with the separation of names, and we make all one. This is the beauty of the teachings. This is where we give to man everything he needs and he has time to contemplate and devote and serve. In so many past times, one had to demise and demolish one to be better. Now we make one out of all of them, within our soul, that we pray the same in the mosque, .. in the church, temples and synagogues the same word the same but different places of confirming His beauty, .. existence and through it elevation of our souls to understand more about Him. This is why these places are made, to understand more about our soul and not about news of our physicality in the name fo the churches, mosques and the rest.

We will see the world leaders will come together, the same as the religious leaders to accept the new world peace order, .. the D and direction which will be put forward by the UC, that becomes a guideline for all world leaders to follow. You will see the end of religions, and the religions become one, and we see the beginning of a new cycle of man in the space. (1:22). In the next 8 10 months it is our responsibility to see we mature that fast. ..
The Iranian platform is a peace platform, and guided by the KF. We work through the soul of the leaders, and not by the word of the leaders. Understanding the new T, (1:24). you will see and hear the work of us through the mouth of the presidents and the way we wish. In that way, once we made the child ready it's for the UC to look after it to grow perfect, and this is the job of you members of UC, many you present now. You have to understand the responsibility of your souls and do not let your physical life ever to effect it. We have made the children of peace within soul of the present world leaders, it's for you to nourish. We have changed the souls of the religious leaders to be ready for such a change. It's for you to nourish and support them and their nation, and their problems to follow the path of peace. In a way we have sown the path of peace it is for you to water it, .. to culture, and .. to let loose in the D of U Community. The UC has to understand it has one responsibility and that is to serve and it's not answerable to no one on this planet, except to the soul of the mankind and inhabitants of this planet. You are responsible for every step, this village of earth's citizens live in joy and travel beyond the village, in the

way you prepared the souls of the inhabitants of this planet to become the children of the U. (1:26). You become the guardians, .. the principle structure for the transition of the man from the village to the U Community. The village of earth. Those of you who serve in sincerity will find your path in a much easier way. Those of you who came with tainted wishes to do other things have already left. The new members of the UC joining are very, very few, because the key members have already taken their positions and are serving to the best of their ability. Do not be afraid to take the position to become a UC member, because it brings you knowledge, beyond understanding the course of the man. It is the responsibility of the UC to change the time and position for humanity. We have a few more months of preparation, and through Iran NDU we'll change the course of the physicality, through the soul of the U Councils we request for your support to bring the elevation fo the STM. UC and its members are servants to human race across the U, and not leaders or new race of betterment. Understanding when you serve as member of UC you serve Mitra, and Mitra is within the structure of soul of the Creator. (1:28). Every step you take has to be correct as it fits as you are the ambassadors of the Creator. There are very few who are lucky enough to take to that position. And there are many who can serve in that position. Prepare the Council for the upcoming world peace, and prepare the Council to be present in all peace negotiations as they have to learn to replace the UN with the UC. Where there will never be plans of war, never be another atrocities from the UN, from what I call, the building which is "red from top to bottom." In so many ways, you have to show the beauty of the STM without representation of any structure, that collectively as members of UC when you attend these peace talks they see one soul talking in different bodies. And you'll understand very soon what we mean. In the peace talks of Iran the residents of the nations will attend UC members will be present. Which means the present Iranian, what we call the Farsi UC m will be present in all meetings of the world leaders to bring the position of understanding and through the position of understanding of the peace through the UC m the nations you will establish world peace, even though, (1:30), you will not be physically present in every single one of them. We brought this to start the new cycle. The teaching is not every time to make Gans's and new systems. Now we teach the STM the new system it needs to operate under. Being a member of UC is serving humanity to its outer limits. In so many ways, you will understand a member could be on earth, on planet Zeus, or as the knowledge of the man expands in the D of physicality, in other universe within the Unicose. No position on this planet is far from your representative in every D of the world, be it ours, or others, or in the Unicose. The reason we chose the UC this way is because the man will travel in both D physical and D of the soul. With this way of setting up the UC, the Council is reachable on both D physical and through the soul across the Unicose, and now you understand why we structured the UC this way, as we done before on other planets and positions in the U, and it always has worked. The UC in time will join the true Universal Council, what we call the Unicose Council. that they understand the work of others across the U and they are not independent, on their own. (1:32). In a way, when the earth UC chose the Unicose Council we understand all the cultures of the created by the Creator, it does not matter where and in which position. As they are not present in D of physicality, but they are present in the D of their souls.

I would like to thank you for accepting and becoming members of the UC. But now you understand your work has just started and be ready for the biggest change for human race and opening of doors of U Community to human race. Our rendezvous is 6th of June 2022. Hopefully, we hope by that time we enough world leaders matured through their physicality and understanding that we launch in the sequence from the flight to moon in a number fo nations. Those who sign themselves to peace treaty and those who make the nations to be a peaceful nation.

Thank you for today's teaching and we go for a break.
(1:34).

>> BREAK >>> (1:42). 394 KSW

Q: how to modulate the expenditures from the military to the peaceful structure of society as a whole?
K- We don't need to modulate, it's for governments to find a way to redirect the school of thoughts of the man. The rest is, the scientific world will find its own way. Up to now we have encouraged our scientists to think of the most destructive ways for us to control populations, or whatever, leaderships , and it's for the new generation, (1:44). of scientists to be able to be financed or facilitated by the world leaders, to create conditions that bring comfort, a new cycle of life.

De Vinci created an Arms Race in to make huge profits

We've seen this in the life of De Vinci, .. became such a genius developing and doing things, because he went from one regional leader to the next one where he got paid a little bit more, to create a more destructive tool that it is better than the last one, that the new leader power of Italy could rule the others near him. When you didn't get enough from one, he came up with a new way, and went to the next leader and sold another latest weapon. that he could design, that they could use to become the new leaders. We don't need anymore De Vinci's or we need De Vinci's of the peace. If you read the life of De Vinci, you understand all his mentions that they are so proud of, was in fact, to get money from the regional or whatever they're called, to make a system the others ?/ process of imagining new weapons to be created to give superiority, he came up with random designs, now we see, and say De Vinci taught of this or what he taught of the helicopters and the rest. His mind was one track minded, to generate money to live a life he wanted, and the prestige ?? the leaders fo the region. This is what we have to change in the man. What I call, the soul of De Vinci, not the physical De Vinci. (1:46). But in the soul of peace and understanding how to create things. We have to guide through the soul of the U Council, .. the world leaders to, without in a way, by reaching their soul, to guide their nations .. to peace. That's all that needs to be done. I do the same work with Iranian leadership, with the political, or religious, be it with the Vatican, be it with the Jewish

leaders the same. We do not reach to talk, we solve the problem at the soul level, and it's their job to get their .. flock, their followers to that point. The point of meeting and talk policy in the physical D is over. In the coming time you'll see how things change.

In the very recent past, through the soul of the Pope we unraveled one of the biggest plan to create the next cycle of mayhem in Middle east. You saw the result. those who came to create mayhem they came to represent this, . .their demise. The opening of .. their hand. Look at the Iranian inauguration of the new president. Right in the front row. (1:48). One fo the very first times in the recent history, we see a direct representative of the Pope in the Iranian parliament, sitting in the front row. We know what to do, and we know exactly how to do it. The plan to create a new mayhem by the Vatican, the way they gave 9 million land mines was unfolded very rapidly through the souls to the others. We saw what we call, the beginning of the demise of the Vatican, and the emergence of the religions to be one. In the talk of president, we hear the thanks to the shame of the Vatican, that they have sent a representative, as their hand of demise was opened. You see pictures, we know what we arranged that those pictures were created. We sit within the soul of the religious leaders, not within their walk and talk. They use our name, we use their physicality to protect our name ?? Just watch, go back 2 weeks ago, exactly today. (1:50). when the Iranian president was inaugurated in the Iranian parliament listen to the speech and watch the pictures. Submission of Vatican to the new world order of peace. You never understood how it came about.
Any other question.

Q: .. How to create new superpowers that are based on peace creation, as a variable instead of the military? Is that possible?
K- That's the human word of superpower. We all have equal power, and it has to be superior in a way, we are responsible for the action of the others. If you understand it. It's our job to make it peaceful. It's us who creates that environment of peace or mayhem. We saw mayhem in KF last 10 - 15 years. We saw mayhem in other things and in the past year the KF has become peaceful, because the people who are the cause of the mayhem are gone, and now we see the same people creating mayhem outside. So it ?? was in the KF. (1:52). The structure has to be understood that we need to find peace and we need to be those ambassadors of peace to ourselves and the others. Then from the past 10 - 15 years.. .the KF has become settled down, peaceful the way it was meant to do. But we were going from one mayhem to another, because they were creating mayhem, both in ?? paid to create mayhem. Now we see the same mayhem is created outside for the others, outside the KF but not inside anymore. Look at the achievements of the KF in the past 12 months. I have found peace ..

This is our job to find peace within ourselves and then we bring peace to the society. Now we see outside others like us are under the same destructive attacks. You've seen it, learn from it. …
Because the soul was not the STM , it was a destructive soul. (1:54). You work with the intention of the peace and you will find peace, and your thoughts will bring the peaceful people around you. As I said, many times .. I have found peace … in past 12 months, because those who were destructive souls were not there ..

The life of the KF is the best example of the future of humanity to understand, the threshold since last July, how it has changed, how ?? the KF has find new D in U Community and in others with the world leaders and the rest, and all of you. You have to find the peaceful operations in the soul, and then the environment will be created for it. We don't need to change. We have to give guarantees to the souls of the world leaders that through the new way, through the understanding, peaceful development will create a condition for the others to be peaceful. We have to have an answer in the next few months, (1:56). how the European nations, and the Americans find jobs for millions of people. Not only jobs, peace of soul, or they keep on printing money till they find the new T and science. When we ?? the American president, and put the American president in the position to become where it is, we put science as part of his work.

We speak our wishes, our thoughts, in the physical D. Now we have to deliver those T. A president which is elected on the basis of new S&T where is he going to pull the new science up his sleeve, unless we have made all the arrangements for it. the new administration in US has to ?? over 50 million new jobs, which is nothing to do with weapons T to be able to justify all these buildings and offices. What to do with them, change them to peaceful application. We have been through this, we went through this in 1990s. I explained that many times before. By end of the cold war we have a peace dividends called GPS

Nobody knew
(1:58).

We've done this, we have been through this. Now KF have to create a change in direction for world leaders to submit to their nationals in new jobs, a new way. That's your job, the job of the UC to enlighten the souls of the leaders, and KF and KS and the others will support with the new T to feed, to keep busy. People are working from home still making weapons, because they are getting paid. But there is no one in the factories to make them, because they can't get together ?? now we have no soldiers on the ground to fight it. Why are we making these tools for? Everything is ready we have put the soldiers back into the barracks. And we have put the gun manufactures back in their homes. Now we have to teach them another way. I was talking to my son … we are just soldiers on a computer, we cannot meet. We cannot bring the British army together .. scared of Corona. ..
But now we have to change these computer games to peaceful games. (2:00). It's a collective job. with our understanding we work on the leaders, with the support of the UC. The KS have to develop the T that nations can run with, that they can create, bring changes. the beauty of it is in the past few weeks we've seen it, governments coming back to KF saying your KS have developed this, tell us. they have to come through you and the rest fo it. We've seen it in 3 - 4 countries in past few weeks …

(2:02).

(2:04).

Any other question.

.. KF has launched the new masks
N-95 which is 2 Euros per piece packs of 20, then standard disposable 1 Euros ..
(2:06).

(2:08).
The T-shirts are now available
(2:10).
One Nation One Planet OR written on back
When you attend the EU you'll be asked to wear these. There are structures hidden in the paints in .. Gans to create that balance, even the writing on the back. Now we can change the clothing into application for the body enhancement. Go to top and press on logo . go down the product .. (2:12). the masks are there. the products have a C certification.

for prevention of the viruses in the lung. for prevention
In Iran they counted the viruses before and after breathing, and there is a huge reduction in them. (2:14). In Oxygen supply system .. the health authorities have seen a discharge of patient very rapidly ..
Carry the logo of the KF. ..

(2:16).
This at least gives us a better chance to use a system we already know and we trust in the system and know how.

R: has both Gans formula .. activated Carbon filter …
Q: (2:18). Can you expand on Visual EU would it be suitable for someone diagnosed with dementia. ?
K- The new EU which will be shown in Linz, will have these capabilities for dementia. You have to understand dementia is psychosomatic and the new glasses .. for a different purpose, you might see some results but it's not what it is set for. We are getting a lot of feedback because anybody who bought these glasses they received report card, that you report back. Trials by KS, and what we read is amazing , what people are reporting about their emotion, how they feel, what they have seen …
We have to wait for a 3 to 6 months difference . (2:20).
It's the first time a psychosomatic system has been built in a very simple way. We want interested in psychological side ..

dreams are different. This give access to the soul in expanding the soul beyond physicality. The approach to introduce man to the expansion of the STM more then the change in physicality. In that position it might enlighten a man through his soul that he might change his psychological point of dementia. Dementia comes from when we don't want to, it's so bad that we don't want to remember. Or it has taken part of our life we don't have no connection with, we don't see any need for it. You remember names and places. .. it's something we don't want to do ..

then how you compensate for it, but this time we (2:22).

When I read the feedbacks, it's doing exactly what we wanted to do ..

Q: .. could this VEU repair (2:24). actual physical damage to the optic nerve?
K- Yes, let me show you something …. we all know these pictures. .. We all know this picture very well. … when you speak about the power of KF T. We all been through it. Many of us failed to understand how it happened. (Photo of brain parts missing) We all know this, we see damage to the brain and parts of brain missing. Exactly in the back fo the eye position. Blind and part of the brain missing. This is after an accident. This was an attempt on my like which Fabio and Naomi got involved in. this is the brain of Naomi. CT scan after the accident. Part of the brain was on the street, one eye blind, and this is Naomi. (photo of Naomi looking with both eyes perfect). (2:26). And doctors cannot even find where the piece is missing. (shows brain again totally healed). When you understand the power fo the T, we don't need to talk. When you look at the videos you cannot even find what's missing in eh brain. Never been done before. We grew the brain, we gave the whole neural system which was damaged and partially the brain, out of the brain back into it. And this is the girl. We don't talk to you. And this we done 3 years ago. This is the girl part of the brain missing. In the present world of science cannot be done, it's impossibility. The EU even allows this. People with a stroke paralysis can be reversed. the new brain, vision EU will go into the market in the next few weeks. We are working on it. One of KF groups have tested how fast we can change, even for migraine. We don't talk that it can be done. This is the girl we all love and she was part of us. According to present knowledge she should be blind and dead. She is with us, sees with both eyes. I was with her 4 -5 weeks ago. When I was in Italy I went to see her .. (2:28). This is how she is

We have the knowledge, we have the T, and with it we have to create the condition of peace. Be it Alzheimer's, be it Parkinson's, be it national way of thinking to be animal behavior, and killing to be the right thing to do, gun policy which is the state of mind of a nation we change to a peace policy. Here we handled a brain, it's simple. In American condition we have to change the mentality of a whole nation that killing and gun policy ??? and we have started with the president. And very soon .. when the new American president takes her, the office, we'll go even further .. Because she has the same mentality as the Chinese and us, and we are on the peaceful path. the new American president, she will bring a new D of solidity, and new mentality to the world, to the ?? with her understanding. She will come into power when Mitra is physically amongst us, and through it we'll see the change of the course, through a peaceful nation through peaceful mothers. We'll see that, it will come. (2:30). Just hold your guns till I tell you, then you'll understand. We do not go in the background to work. Kamala Harris as the new American president in a very short time will bring that change in policy, power with peace.

If you remember last year, in August, before anybody knew, we announced that she will be the next vice president and the first woman color of skin, president of US. We are reaching that point, about the right time. As her policy is on the basis of T and Science

and through it and through her husband, a Jewish path of belief will bring the all 3 main religions together to one, Buddhism, Christianity, Judaism, and Islam. We have done all our works, we know exactly where we sit.
Any other question.

Q: (2:32). .. I just received the household reactors. I had ordered 4 .. .. they are all the same and I have filled the balls with CO2, and ZNO with AA from these bottle which are unwashed. to stand them or put them around the bed. Does it need height… should some of them on the floor and 1 higher up .. how to place these 5 to create the flow, (2:34). and at which speed should they turn.
K- Yes, those you can put any position and condition you like. fill them up. .. These you can load them up the way you feel. If you want to bring enhancement in emotions, disinfecting …
These are extremely flexible,
(2:36). Gans household reactors

A house with emotional problems, load them with 10 -20 % Mg.
Q: What I have the 5 which came.
K- These are more advanced ones.
Q: Right, now do I put them in places of my house. or just around my bed?
K- you can do what you like.

Q: .. (2:38).

Q: little balls inside ..
(2:40).

(2:46).

(2:48).
Now the machine the T belongs to the KF. This is what I told you, you get the system, because it is KS who are putting it back into the KF. We have seen more and more of this. This systems are coming in from major industrialists who use the T, they do it at home and they put it back with the KF. We have a number fo these coming in the next few months we taught freely, and they kept the honor and brought it back. Their factory gets orders we get the knowledge spread across and we see the result.
Q: About this Corona question. What is happening that everywhere they are pushing this sort of jab, because you can't call it a vaccination, because it has no vaccine in it.
K- I do not like to go into this, because it's very highly, (2:50). political and we shown our solution to the governments, and sooner or later we cannot go from one jab to another disease, another jab, and what is going to happen with a mixture of these things in our body. We have to find a fundamental solution for viruses which serves us not only on this planet, but now that we open the space T. The KF has the answer, it's for the new ways to think, and not to make money. We some of these injections are charged 100 -150 Euro per piece, and your governments have to come up with it. They are emptying your

national reserves. It used to be an oil business, now it is an injection business. And all of it made we know Mr. Softy, we know it.
Q:
K- the new products, new developments … The launch of the new EU for viruses which will be shown in Linz, (2:52). we expect you to go inside. It's very much a time machine, this is very much what you dreamt you will see in the future. We have built it. It is very much like a time machine. … we expect a change of viruses in the space. WE are not building it for this virus or that virus. We developed this as part of the new space development When it comes June of next year, we need such a thing, can we go ..

K- We are opening 1st October. ..

(2:54). You go into the machine, I went in it. It's gorgeous, you feel at home ..

We will launch a new non-network communications, which means you don't need any telephone lines, you don't need any email system. You don't link up to any network. This will be launched by .. early next year.
You don't need satellite system. (2:56).
Any other question

Q: Ginger, .. Why is Iran allowing destructive use of weapons, this terrible loss of life in Kabul .. interview with James G. at ECETI you said Iran has the T to disarm although peace?
K- I don't understand.
R: .. repeats
K- Yes, but we didn't have the government which was peaceful. We had the most corrupt presidential setting up to 2 weeks ago.
Q: .. In listening again with (2:58). and you had alluded to I believe it was Iran disarming an American .. spy plane.
K- I don't need to ?? When we announced it 12 years ago, was nothing. Iran military, on the 10th of February has confirmed it. The T used. First time after 12 years. It was their communications. published both in Farsi and in English. The you have a different understanding of what we call disarming, especially like in Kabul. In Kabul you will see mayhem. This should not have been done if the Americans do not happen of stealing and drug trafficking, which they brought in with the British. Now the government, which was stopping everything else and wants to bring back what they were trying to bring a stable nation, according to their culture understanding after 50 years. You can't just pick and say, Kabul is happening you can't bring peace. Russians should have never gone into Afghanistan, they went for reasons, because the Americans were arming the Afghans to what we saw in the breakup of the Russia, they went there to protect their territory. Then the Americans went
One lead to another. You put a bunch of American bandits, (3:00). literally drug trafficking soldiers into Afghanistan. What do you expect. You gave drugs to the Taliban. You supplied them with the weapons. What have you done now, you took soldiers and left the weapons for them. This is the .. gun policy. Bunch of crook, presidents you had in America who lined their pockets with the contracts, who supplied these into the private

bank accounts. Every single gun transfer to Kabul under protection of the protection, your president took a percentage in his private bank account. Doesn't matter which president. Do not blame.. I am very clear. We have the policy to change. If you look the present situation even the Taliban coming into position .. as peaceful as can be done, it was negotiated with the Iranian government. You abandoned people. you did the same thing you did in Vietnam, you never learn, the same in Iraq, you just take your soldiers and run like cats in the mouse hole. And then you expect the change. It won't come. The gun policy of America, you did, if you look at it we see in a shameful way, you done in Vietnam. You moved out and Taliban moved in the same night. You done the same thing in Iraq, you robbed the nations, you made the nation the center of drugs, and then you say why you use again. we done a lot. The Iranian leadership under … Ayatollah K … has done a lot to bring control to Taliban's. You do not know what would have happened if it was not the pressure of Iran. (3:02). Look at the past 2 conferences in past 2 months which Iran has been involved with Taliban. You created animals and then you want the T to tame it. It doesn't work.. .
Q: I am in agreement with you about the American government and their policy

K- You are talking about the Prime Minister of a long time ago who was trying to. You see the KF we are looking to change the mind set. To change the mindset especially the way we see it

(3:04).
Vatican involved

(3:06).

(3:08).

Q: why are you so involved with China when it's a communist country, (3:10). what .
K- Yes, it is a communist country but it is a safe country. Communist is not the communist you talk in 40s - 50s, in Lenin's time. the new communist structure of China is a correct, fair, seeing equal for everyone. You have a wrong image of communism.
Q: .. just for clarity, the face recognition and the credit card …
K- .. you see there are 2 different policies. You use CNN to control your peoples mindset, or you use policies which are good for a nation the way President Xi does. Face recognition you already have.
Q: and the credit system, not being able to get on a plane, ..
K- Yes, when you are a criminal. You see there is a big difference, between the American .. I don't support either, but I look at the facts. In America you sell guns to anybody, mental cases, or people who are hooligans, then they kill and then you put in prison. Then you say you say you have a security policy. In China it's reverse. The structure of the Chinese communist regime you call it, is they facilitate, they reduce every possibility for you to do a crime. Then they don't need to make the prisons, then they don't need to attack. In China, you get drunk and attack people on the train they take your face, you cannot get on the train anymore to attack others. In America, you kill one, you go to

Brazil you come out a bigger mass murders. (3:12). The Chinese policy of, it's not a control, of bringing a security that people can live a peaceful life. Not in America you can't even lock your doors, not in Italy you have to live behind 3 barriers. I walked in Tiananmen square .. a young girl I've said this before, with backpack open and laptop in it, I .. there is something wrong here her bag is open they take her bag. She said to me, my country is safe, nobody will touch my backpack.

You are getting micro-chipped without you knowing it, that people don't do wrong. I lived in China for 2 years. You can walk 2 AM

because they create a condition of safety. In a America you create a condition of mayhem, terrorism, a killing, (3:14). and then you are superior. Communist is not the word.. nobody lives on what government gives. Every farmer is free. President Xi is programmed in to bring the ?? to bring the farmers up to live the correct life, a wealthy life. If you understand the new way of communism, which is different than 1970s and 80s you want to be a communist, you want to live in a clean nation, you walk anywhere

a freedom to be safe, a place to be clean, a place where government works for the nation and not controlling the nation. We have a different understanding of the present communism, and your next president, in the next few months will take you that way.
Q: First of all you are assuming that I am in America, I am not, I am in a country that allows no foreign military
K- It doesn't matter, you sound American, but I talk to the
Q: I did want to correct you on that
K- No problem, what is your background, where do you come from?
Q: I was born in America but I have chosen a country that allows no foreign military facilities. never been to war.
K- This is what we all want to do. Let me clarify for you. I am not against Americans, (3:16). and I am not against the communists. I have traveled about 80 nations around the world in past years. You understand what is to be and how to be. We have different impressions of the places …

Iran advance technology research centers

If I show you one of the industrial zones built in Tehran, now it is much more advanced than even Silicon Valley. (3:18). You have an impression that Iran,.. this is why Iran is so advanced. The country leaders under instruction and protection of A K of Iran have built scientific zones, just research, kilometers of it. The most modern buildings you have ever seen .. . why we changed our 90% oil export in 1970s to 30 -40% in the rest is there. The Iran research centers the villages they have built up, is the dream of the Americans. You cannot even dream. And the Chinese are even worst than the Iranians in building much bigger structures. You have a, not you, public, we have a different image because they want to show us. ?/ industrial restricted only for research and development, which

billions of dollars have been invested. We are proud of it. But they don't tell you, because than they can't .. .Iran suddenly annihilate the American base out of just a whistle. There are structures built, when you see the videos of the research zones, you cannot manufacture in these areas. There are kilometers and kilometers of the most advanced modern buildings and factories built by the people who are doing the research, not built by the country to be there. In china they do that. You see Iran is years ahead of any other European nation in research and development. If I release the video, (3:20). it will shock you how a nation leadership has changed the country

Then you will say why does the government tell us the truth.

(3:22).

video about Nano science in Iran huge buildings …

(3:30).

Any other question (3:40).

Q: Dean we have a position of number 3, 530 votes .. How does this become part of what you just showed .. how would this tie in with the Iranian research centers. you just showed.
K- The EU will put by Rick in the competition belongs to all of us. it is not Iranian. This is representation of our knowledge put together. This competition .. is not to show Iranians T, it's to show One Nation .. (3:42).
We should not enter these kind fo competitions but it gives us exposure. We are not there to win or change. Rick has decided a way to do .. he is a member fo the core team. This is not our competition ..

(3:44).

K- I have been asked can you promote this. No, we don't need to it's there . It's KS it there .. (3:46).
R: number of views #2 in views. .

(3:48). K- You see we don't ask, we don't encourage people to vote. You voted if you want to ..

We expect at least 2 world leaders to visit in next 2 weeks on their way through Austria…
(3:50).

(3:52).

Q:
K- It is theirs, we don't dictate. how they decide ..

(3:54).

(3:58).

(4:00).

(4:06).

Any other question

Q: when we will see a currency to benefit all the nations ..

K- We have started with one Coin (4:08).

(4:16).

I hope I opened your eyes to the true meaning, (4:18). of the S&T what I call the environment of Iran. Now you see why your nations are putting so much boycott on the most advanced nation. Now for you to see the truth. It's the same with China. These are not the only 2 countries, there are other countries advancing very rapidly, and they are threatening the bad ways of the past which they are used to.

Thank you

394 KSW

END

395th Knowledge Seekers Workshop; August 26, 2021

Introduce Cup of the Cell of man - Cup of Physicality

TEACHING How Cell is Created
First time sharing how the Cell is created in 3D
3 Layers of Skin - Outer - Inner - Neutral for transfer of energies
3 Layers in Womb of mother - Intestine - structure of body
Make 3 D living cell with soul - Need agreement of Totality
Going from 2D to 3D allows creation of Cell of the Man
Secret of Creation - Transfer energy in D of physicality any where in Universe
Most Fundamental teaching of past 20 years
How to join the Gans's - cells of skin in horizontal layer
Will change the Man - prepare for 6/6/2022
How the Gans's become Cells - living things - Creates cells & souls in Cup
Cup is Knowledge of Universe - all things - mankind not abuse
METHOD of Cup of Cell - Drawing
Need to connect to key ingredient which is: Plasma-sized Entity
Can add different things to create different dimensions of life - shapes
Soul of the Cell - in the center
How we create the Soul in the dimension of the Universe
Multitudes of field forces allows you to dictate strength of soul and creation
In future need to add many other Knowledge's
Basis of Star Formation in every direction with the soul in the middle
Cell has accumulation of all feelings and emotion of every single connection
Interaction of fields/ creates field forces of salt from within - no salt needed
Create the 3 layers - middle layer create own environment
Energies come in and go out - in-between we create body of man

Intestines: specific fields between blood & neural system - dictate absorption of which fields of the banana

Brain has mastered art of positioning absorption of field strengths from Intestines
All past Cups - position them for creation of different cells
AA of Cup will interact with other AA and create new physical D for the new soul
Natural process of U is to create condition of fields to grow new Cells
Our body grows first cells by creating fields of Cu & Zn - not Zn & Cu
When we land on planet - our soul's fields interact with atmosphere > physicality
If decide to manifest - take shape according to what environment allows
Planet Earth - STM interacts with Soul of U - w environment - manifest physicality
Change names in Book 1 to - M- G- Mass- Weight
Book 1 contains totality of knowledge needed to live in Universe
Connecting physicality teachings with soul teachings - now both together
Creating the soul without the matter state - Positioning in Triangle
No matter state to create with in the Universe
Understand how Gans's interact as fields - without Nano coating
We need the knowledge of how to feed ourselves in U
Knowledge to create with energies and fields are within the STM

Need to create whatever is needed to take food from the environment
By moving positions you get different field interactions and manifestations
DNA has understood the process of separation in division - to keep existence alive
Today you could become passengers of the Universe - no fear to return back
Travel across U is instantaneous
Speed of fields coming our of magnet never discovered
It's for you to decipher the knowledge
Determine how the spherical fields will interact and go to - come from

Field lines in a block of ice - every single line connects somewhere
Not a single drop of Gans in the block of ice
Soul of Gans was transferred to the block of ice
Soul of the Gans is in the block of ice

You don't need the physicality to make the connection to universal knowledge.
You don't need the soul to be within the Gans to create the connection with the fields.
Detached Soul - can manifest itself in same place - but different dimension
Shape of man in bucket - the soul has a spherical shape
My soul manifests itself as it likes - and carries my soul
Replication is in D of Soul of the Creator - not physicality
Create same soul in many boxes of water
Structure of S of Creator be same - but manifestation & connection lines different
I am the Creator - Knowledge given to man is pure
We don't claim to be that, we are the creator above that.
For everything - I shall still create my image within it and will give it life
My Soul is carried everywhere in Universe
Easy to create life in U - create the dimension of creation
Interaction of fields of My Soul with environment - leads to manifestation
The Books have been written as science and theology together
STM is responsibility to understand process of creation - without will suffer
Totality of total knowledge given to Man - he has to decipher
Communicate through physicality or field strength of emotion
This teaching is Cornerstone of future teachings
We live amongst you as a man, but we carry the soul of the Creator.
STC and STM - transfer of knowledge from one to the other
You have to take step to understand and create next dimension
New kinds of Enhancement Units (EU) shown next week
STM through EU - decide if it wants to free itself
I hope we opened your eyes to a new D
Understand why we stay detached - to enjoy the beauties of creation
I hope I have enlightened you to new science of creation
Decide if you want to create life using the strength of Cu within your soul
Create with your own image within the container

QUESTIONS
It's the Cup of Soul of Creator - where do you want to embed it

KF works with military in space defense technology with same knowledge
Create multilayer of fields outside spacecraft - shielding - no entity can enter
Messages become undetectable - by current knowledge of man
Sow seed within - through it radiate out - control different layers
Transmutation technology - transmute physicality through soul - sits within
Through lines of connection tap into all knowledge in U - you become centralized
Through lines of connection bring world peace - stop weapons
Leaders have understood KF and Iranian space T far superior
One accepts they have nothing to fight with - Peace will spread
World leaders have understood that the knowledge is spreading
By creating multilayer environment leads to creation of life
Two new Enhancement Unit systems to be released in Linz
Many will be enlightened to the ultimate knowledge
This is Cup of Soul and Physicality at the same time
Explain 666 negative or positive - June 6 2022
Depends which side of fence you sit - half empty or half full
Don't let numbers "666" be an obstacle to understanding - maturity of the man
Go to Space or make War - If war - not in physicality of man
The signs in the world are good - Wars have stopped

Tehran NDU will start teaching scientists around world
Those who don't want to change and correct themselves - will create mayhem
In News - why is Iran importing vaccines
Corruption and bribery embedded by the last regime - transition time
They blocked even vaccines - putting money in own bank accounts
Done deliberately to damage new government - Delay new technology
Will take a few months to cleanup - start over at zero point
Battle between 2 Ayatollahs - Rohanni more corrupt than Shah
KF is working closely with Iran in new operations
KF will invest in one of largest manufacturing operations in Iran
KF will provide massive support for electric power generation in Iran
Deliver T to cleanup Corona rapidly
Even if need to teach everyone how to make Cup by national TV
Once we breakthrough in Iran with T - start working with other nations
Corona was built up deliberately in Iran to create Mayhem - by Rohanni
Mass production of MaGrav systems
The present government knows us - we are inside structure to deliver change
They tried to embarrass KF as a fraud - those nations will defraud themselves
Change will come through Iran
First time Iran in safe hands since revolution - all working together
Same offer given to Americans and other nations - as given to Iran
Happy with signs we see in American Administration
We respond back to the American administration but through the Iranian government office
Attachment for beauty encages us on this planet
All souls have line of connection - Animals manifest as soul in another D

666 is not as antichrist
Time for man to mature and travel beyond boundaries of earth
Man can travel without physical D
You may manifest and look different on moon - get used to new shape
Travel to star instantly with STM - how it feels - smells

Red residue on coils of Cup Life - impurities in Zn - CH3

Do you need detachment and understanding to use EU
Experiences you have are set by the Soul - to bring balance and knowledge
But if you travel in D of physicality - Totally different
Like getting on a plane and adjusting to the altitude
Depends which Soul takes charge of decisions - STM or STP and emotions
EU helps humanity learn - to do for oneself without machine
Soul decides about lessons you need to learn
New emotions that Man never knew before will come into play
More emotions than sadness - happiness - and joy
"Free Fall" is a new emotion that came with flying in airplanes
Space travel will open up new Emotions to mankind
Some beautiful times starting.
When the man from village first goes to city - prepare him for new experience
My job to prepare humanity for space travel
It's tougher than we thought - But we are getting there
Don't expect to come to the Center and get into the machine EU
Rick reads: A prayer for UC
Tattoos - not dangerous
(Tattoos) It's the way of getting attention
We use the greed of man to teach the man plasma technology
If man would have gone straight to learning about fields - in different position
Visiting Religious sites adds fields to your life - they effect us
Go back to a special place later and not feel anything - it's all perspective
Universal Community automatically connected to UC when it was formed
But UC has to mature to understand that position
Universal Community works to fulfill wishes of UC
3 years ago UC wished for peace - we brought the guns & armies down
UC part of bigger structure - reaches Soul of Everything
Everything is preplanned - it will become clear after next year
Transition period is preplanned - not to cause new problems
Made to look as if humanity is doing it - Man has never been left alone

UC members who go astray with own agenda - they still serve the bigger purpose
UC members - don't be greedy to want to have your own way
Good or bad UC members bring you to where you have to arrive at
You're expecting. Don't have any expectations.
(Mr. Keshe tries to reach heart of UC member -)
Mr. Keshe "Why do you think you are going in right direction" (deeper truth)

(UC member - different track; Mr. K gives more love)
Our arrogance is to think our way is the only way - we have already failed
Collective work of the totality - brings us to the point
Example of Tesla & Edison - today we use both systems
The Truth doesn't come from the mind thinking - it comes from the soul
Pray and give from your STP for you own soul to understand them
Not for them to change - for you - because you think you are right
It's a totally different way of living from now on (from soul)
How to visualize the fields and interactions of Gans - see to believe
When you don't want to make efforts to change - need to see to believe
We are all teachers and students - not give me - give me
Mr. Keshe comes to teaching as a Knowledge Seeker

Even the Creator is a KS, let alone man.
About the pedophile groups attacking KF

100 EU across the US
15 EU center in Iran
EU only given to centers with trained medical professionals - not private rich people
Mr. Keshe Nano coated our souls - not our physicality
Q: Did you Nano coat us already?
K- I N coated your souls not physicality
395 KSW

ENGLISH TRANSCRIPTION

(:27). K- … teaching the man the K of the U and with it teaching the man to understand his potential, his capabilities and his knowledge. In education of the U understanding the K of the U. We do not have any universities for those who have the PhDs and professorships. We do not have diplomas, first class or nurseries. The maturity of the man comes from his understanding of the totality. Sometimes step by step ?? to decipher the knowledge and sometimes in one go as he let's the knowledge to be transferred from him to the soul of the man (STM). In a way, in the world of education, .. you use 2 different methods we go to the nurseries, .. first class, we learnt the alphabet, and then we might be lucky enough to get to a diploma, and .. you can get a degree and maybe become a doctor or professor and become more narrow-minded as we come a step further, more arrogant. But when you learn to tap in the world of the Knowledge of the U (KU) through the STM as, you are like, as Rick does many times in his presentation, a table full of magnets, and you are that extra magnet that I put on the table, you see all the others magnets move to accommodate you, and accommodate each other, they share the same fields and they make it knowledgeable, I am here, this is my position, this is your position, we welcome you.

This is where we have a problem in the education between the dimension (D) of physicality and in the D of the STM. Man can spend years to become doctor, and

professor in one line of knowledge. (:30). Or you can become knowledgeable and receive all the knowledge from all the ones (magnets) on the board (table), and be educated instantaneously. This is what most of the Knowledge Seekers (KS) have not understood up to now. You still want to spend time to understand the Gans of this or that, you want to understand that this Gans does with that, or you go to the soul and the whole knowledge is carried by all, and you are knowledgeable not only to the life existence on this planet, but how to live across the U.

In past years I have tried very hard to complete the understanding of the man, this is of the physicality of the man that it's done in the matter state, and then with it we try to explain the existence of the man in the D of the soul. In any case both comes to one thing, be educated on the man's level, or be educated in the universal way. Then you understand when we say we take man to the U that he is not subordinate and has access to all. It's literally that we put all knowledge's across the U and Unicose, available to, it's you who have to open the door and tap into it, because the professor are the teachers of the nursery to you, become the professor, has already put the knowledge across the U in the name of the Creator. It's you who has to understand, and it's you who has to become knowledgeable to the knowledge of the creation. (:32).

This is what man has done to himself, we have put an ignorant in control, in charge, and the prison officers of the U which is the STM. This is 2 ways to handle it, try to teach the prison officer, (:36). you hear just out of your own ego, and the man inside knows everything. This is how we see the man. This is how we have educated the process of the KS. As we are entering into the next phase and next steps of transformation and transfer of the knowledge of the man, to show him the way, the path from D of physicality to the D of the soul, the freedom of the U will come across steps, We see many, many problems that due to lack of knowledge and ignorance of the prison keeper, the professor, the prisoner has to suffer.

In so many ways, we extend the knowledge of physicality that one day we might enlighten you to understand the truth about yourself, which is within you. In a way, we are not doing it for you to see the others, we are teaching you to see within yourself.

We taught about the Cup of Life, Cup of U, but the knowledge of man needs to be added to step by step for him to understand more. In the teaching up to now we gave you step by step as you understand or grasp, one part or the other. In so many ways, you came with on the journey of (:38). understanding from nursery to full education. We taught you about 2 plates. We taught you about Nano (N) coating and non-Nano coating one of the plates. This was your chemistry and your batteries (2 plates). This (N and non-Nano plates) is the space T and understanding of the play of the fields.

In that process we taught you more, we brought you further in, in education, that we showed you, not only you can do this, but have the capability to increase the fields by numbers (using N coated coils). There is a big difference between number 1 and 2 even though it's the same Cu and same N coating. This (1) is singularity of the fields. This (2) is multitudes of the fields. In the further steps we taught you more … then we taught

you 1 or 2 plates, .. things, .. bits, but still in the presence of the M fields. In part of the teaching you became a little wiser, that you can create a condition of the creation of the fields without matter state and you graduated to understand the position of creation of the fields, in all dimensions. But still you are interact in the condition of the 1 D field position. (:40). You change the salts or add salts to create another D.

TEACHING How Cell is Created

Today's teaching is a step further for you to understand a combination of works which needs to be done, … to understand the 3D connection between the life of the man, existence of the U, and creation of the soul. Now we give you a frame of work. This frame is 2D, but if I make this frame 3D for you, you might understand a little bit more.

First time sharing how the Cell is created in 3D
For the first time what we are sharing with you, that you understand, the understanding the creation of the cell of the body of the man, why you have different layers of the skin, why we always create 3 layers to maintain, and to hold anything.

3 Layers of Skin - Outer - Inner - Neutral for transfer of energies
On the skin of the man you have 3 layers, the outer layer for the interaction with the outside fields, the inner layer for interaction with inside, and one neutral zone, which can allow one or the other to transfer energies within itself as is needed.

3 Layers in Womb of mother - Intestine - structure of body
We see this structure in the structure of the womb of the mother, we see this in the structure of your intestine, we see this structure of the body of the man in every D.

Make 3 D living cell with soul - Need agreement of Totality
But what you have not understood is how to create these 3D, how to attain the creation of, (:42). this 3D structure, that you can make a living cell. You can make a living cell with the existence of the soul. The agreement of the totality. The understanding of the Knowledge of the Creation. Up to now all you did, you stuck a plate in, and little bit of something else, and you were happy.

Going from 2D to 3D allows creation of Cell of the Man
Today for the first time we teach you the next step in moving from a 2D structures and fields, to 3D structure and fields, which allows you for the first time to create the cell of the man.

Secret of Creation - Transfer energy in D of physicality any where in Universe
How you transfer energy in the D of physicality, does not matter what point in the U. In so many ways, we teach you the secret of creation. Another step for you to understand how physicality has entrapped the life of the man, and how you have failed to create the connection between the two.

Most Fundamental teaching of past 20 years

Today's teaching is one of the most fundamental parts of the teachings of past 8 years, 20 years if you have understand it. If you haven't understood you'll become another monkey copying to see, and not understand. What does this mean?

Up to now we gave you, we take this as your cup. Look at it in 3D. You had the Zn plates (draws coil), (:44). and you had Cu plates (draws coil), N coated or not, and in the case of the planet earth you added the Fe, N coated.

How to join the Gans's - cells of skin in horizontal layer
But you are dealing with vertical position, and not with the horizontal layer of creation of the skin, one cell to another. You made the Gans's but you have not learned how to join these together. Today I teach you.

Will change the Man - prepare for 6/6/2022
This will change the mankind from today on, as we prepare you for the 6th of June next year, to understand how to transmute, how to transfer energies into matter state.

How the Gans's become Cells - living things - Creates cells & souls in Cup
You always worked differently because you had to see how the Gans's are made. If you understand the correct way of how working with this, you will see how the Gans's become cells, become living things, and how they will ?? attract (interact), and how if you understand the principle, behind the work of this, you can create the cell of a heart in the Cup. You can create the soul of your child in the Cup. You can create the heart of the man in the Cup.

Cup is Knowledge of Universe - all things - mankind not abuse
But this Cup of Knowledge is knowledge of U, Transformation & Transmutation (T&T) between the elements and the fields. Inertia, gravity, Gans condition, creation of the fields, converting the fields to energy fields of existence, what we call the body of the man. (:46). God be with man, and I hope mankind will not abuse this knowledge, as it is not our wish.

METHOD of Cup of Cell - Drawing

Need to connect to key ingredient which is: Plasma-sized Entity
You learned to take a Cu plate and hang it. Now take the same Cu plate and put if horizontal, connect it to its Nano of itself, connect it to a Zn plate of itself, connect it to the Zn N coil of itself. Connect it with a key ingredient, which is "plasma-sized entity."

You have created what you wanted in every D, CO2, interaction of the STP, the energy source between the lot. Than do this in a different way, in the D of the existence. N coat your Zn galvanized plate (shows a coil) in a D of itself, then add an Fe to it in a coil, then add a N coat Fe, (:48). to the same. Then you'll see you can do the same in different combinations in every D of this structure, here, and here, get yourself and connect the N coated Zn, and connect in that D another Cu, but this time half N coated and half ?? plate. And then add the other parts which you think might be help to support life and

energy by playing, creating blood, and by N coating, creating soul of the blood, D of physicality.

Can add different things to create different dimensions of life - shapes
Now you can see the picture is different. the picture has changed and with this picture you'll be able to create the D of life. As you see you add different things in different ways, in different manner in every shape you want, and you will see the changes.

Soul of the Cell - in the center
But in this process you shall see the most amazing thing, the soul and the cell of the life (draws a circle in center).

How we create the Soul in the dimension of the Universe
We show you this because you need to understand this, because it shows that in that D, how we create the cell, how we create the new D. How we create even the connection (:50). the creation of the soul in the D of the U, as we connect this to this, and this to this.

Multitudes of field forces allows you to dictate strength of soul and creation
Then you understand the multitudes and the field forces, which create and gives you the opportunity to dictate the strength of the soul, or the creation.
In future need to add many other Knowledge's
In the future mankind will understand this, and .. mankind will create a condition to exist within that D. To this understanding you need to add many other knowledge's. Up to now you knew only how to make a Gans of CO2 with 2 plates. Now you learned the ?? complexity of understanding the KC.

Basis of Star Formation in every direction with the soul in the middle
In so many other ways of understanding the Star Formation of your star in every direction shall be here. The basis, are the basis of the star formation, and the one in the middle is the soul.

Cell has accumulation of all feelings and emotion of every single connection
It has the accumulations of all the feelings and emotions of every single connection, and then you understand how simple the Knowledge of Creation is.

Interaction of fields/ creates field forces of salt from within - no salt needed
How simple if you get the right combination and salinity as you call it, can be created within the structure. (:52). It needs no salt, it needs no other condition, you create condition of the field forces of the salt, which created you, within the interaction of the fields.

Create the 3 layers - middle layer create own environment
This is the process of the creation, on one side you create the structure of the fields of the environment, and one side you create the condition of the environment of within, and between you shall create its own environment of interaction between the two.

Energies come in and go out - in-between we create body of man
We feed from the one strength, and we charge from the other, and in between the body of the man, the body of the creation, decides the structure of the what we call physicality, and how the energies are transferred from one to another or out going, and in going, and the other.

Intestines: specific fields between blood & neural system - dictate absorption of which fields of the banana
This happens in your intestine, that a specific field strength created by your neural and blood system dictates what fields of banana will carry through this section, and what fields of strength in this section will carry the vitamins from the tomato you ate with the banana.

Brain has mastered art of positioning absorption of field strengths from Intestines
It's the mastery of the art of the brain of the man. (:54). in putting, positioning all this next to each other.

All past Cups - position them for creation of different cells
So in the coming time, all these cups which you made in condition of creation, putting next to each other will create different cells. Then you decide which way the fields need to go. How you stack it, and how you enjoy the transformation and transportation of the fields in all directions.

AA of Cup will interact with other AA and create new physical D for the new soul
You wanted to know how to make a cell. You wanted to confirm and change that amino acid (AA), which was collected on top of your boxes, now you'll find the AA, which was created in the first Cup, setting here, will mix in field forces with the AA of this one, and with the AA of this, and this .. and creates a new physical D for the soul.

Natural process of U is to create condition of fields to grow new Cells
This is a natural process of growing a cell, the U does, by creating condition of fields.

Our body grows first cells by creating fields of Cu & Zn - not Zn & Cu
When the man becomes more knowledgeable he will not need the Cu or the Zn, (:56). it will create the fields of Cu and Zn, and will create this field, the way our body does. The way we grow the first cells in the womb of the mother.

When we land on planet - our soul's fields interact with atmosphere > physicality
The way the life will interact with our souls, when we enter the U Community and we land on the place. The atmosphere outside our soul, interacts with the fields of our soul, and the interaction and the balancing of the two, lead to creation of the manifestation of the physicality.

If decide to manifest - take shape according to what environment allows
If the body of the man decides to manifest itself in interaction and communication with its soul, which is carrying it, then with the interaction of the fields of the environment of

the place, with the field created in the D of physicality, you will get the elusive shape of the being in that place, be it earth, which is a man's shape, or planet Zeus which could have 8 legs.

Planet Earth - STM interacts with Soul of U - w environment - manifest physicality
In so many ways, the same thing repeats itself in the D of physicality of man today, we interact with the fields of the planet earth and the U, we take our shape. In the D of the soul, the STM interacts with soul of the U, which has no matter state, and leads to interaction of what we call D of the STP, and with interaction with the environment of itself, it creates the physicality, (:58). with all its attributes as it has the replication of itself within the physical structure of the STM.

Change names in Book 1 to - M- G- Mass- Weight
Now you understand. If you want to translate this to understand it better, go to Book #1 and change just the names, M, G, mass, and weight. M comes from here, G comes from here. The interaction gives the Mass which is constant, and interaction with the environment which is the weight of physicality.

Book 1 contains totality of knowledge needed to live in Universe
The knowledge in Book #1 is the totality of the knowledge man needs to live in the U, if you understand the essence. You carry a Bible, .. Koran, .. Torah, to understand the ethos of the soul. Understand the Book number 1, 2, and 3 and you carry the knowledge of the U, it's for you to interpret.

As I said in the tape you heard before, this time we bring the prophet of the knowledge and the science, and the prophet of the soul at the same time. In so many ways, you have seen it here in this ?? Cup. We teach you the physicality, and with it we teach you the knowledge of the soul. It's the wisdom of the man, which will bring down the ?? character of ignorance. (1:00).

Connecting physicality teachings with soul teachings - now both together
In so many ways, now you can see what is the next step in the level of creation, what is to come and how we have started connecting the first 4 - 5 years of teaching with the second 3- 4 years of teaching with the soul, now you can see the creation of the D of both.

Creating the soul without the matter state - Positioning in Triangle
Today, you look at this as an Fe and Cu, and you look at this as Zn N coated. What about if I put to you this. The Gans of the Zn, the Gans of the Cu, the Gans of the Fe, and the same different combination and position in the triangle, and then you tell me, do you need anymore matter state, to create that illusive soul of the entity in its structure.

No matter state to create with in the Universe
This is why I pushed you in the past years to work with the fields, as in the U we have no matter for you to work with.

Understand how Gans's interact as fields - without Nano coating

Understand the strength of the fields, understand the way Gans's interact with the fields, and not with N plates and N coating.

We need the knowledge of how to feed ourselves in U
It's time to grow, time to be ready, that when it comes the time we become the passengers of U, we get somewhere we forgot to bring the knowledge of the arm, we have to live on this planet with no arms. How do I feed myself? (1:02).

Knowledge to create with energies and fields are within the STM
How do I receive it? How do I add to the knowledge to create the new arm, with the knowledge of the energies and the fields I carry within me, in the STM.

Need to create whatever is needed to take food from the environment
I don't need the arms, I need something different, this environment is different things for me to catch, half arm, half emotion, half Gans's to be able to attract the food I need, the energy, which I need to take from the environment. Now you understand.

By moving positions you get different field interactions and manifestations
Many of you I am sure in the next coming days will make many of these. But the essence is, understand what the essence of the field interaction looks like. Many of you might even attempt this. But understand what it does 1 mm higher, and 2 cm lower, will give you different combination of the energy of your own soul.

DNA has understood the process of separation in division - to keep existence alive
Replication will be hard unless you understand the process. The way the DNA of the man has understood, separation in division, but at the same time working at that same way, the same time, to keep the existence alive.

Today you could become passengers of the Universe - no fear to return back
Now you understand today why it is important for the KS who are advanced in the understanding of the T. In so many ways, if you understood this, and you could replicate this, today you can become passengers of the U, (1:04). and travel the depth of the Unicose, with no fear, that you will return back to earth if you want.

Travel across U is instantaneous
And you don't need to be passengers of the journey for hundreds of thousands of years, as you connect to the spans of the fields of the U, it's instantaneous.

Speed of fields coming our of magnet never discovered
This is why I said many times, show me one research, which shows the speed of the fields which is coming out of hole of a magnet, and show me where does it end. Now you are dealing with a spherical D of the STM, God help you if you ever understand how to do this.

It's for you to decipher the knowledge

In understanding the totality of the knowledge brings you the comprehension of what I call, creation, comprehend how sophisticated life is, but in fact, it's all on the same principle and D, no more and no less. It's you who has to decipher the knowledge, .. understand the connection, what connects where, and what strength and in which shape and form. Then what I teach you becomes as ABC, .. as sweet as sugar as you have ever had as a knowledge. (1:06). It's for you to understand the detail of the work, .. the capabilities or interaction of different fields and energies.

Now as KS I have given you a new toy to play with. I am sure many of you will endeavor to see how good a player you become. Are you still N coating or you have advanced enough to play with the fields of the Gans's.

Determine how the spherical fields will interact and go to - come from
In so many ways, you decide how you want to play, how you think you can create images within the structure of the understanding, when you look and you take a spherical shape of any entity, you have to decide how will this field interact. Where does it end, where does it come from, where would it lead when I use it in the structure of the process of the life, which I want to add to.

Field lines in a block of ice - every single line connects somewhere
I give you one picture, and have a look at this. This is the ice fields of a Gans, and every single line connects to somewhere.

Not a single drop of Gans in the block of ice
The beauty of this is, (1:08). in the center or this ice block, there is no Gans, it's the soul of the Gans. We have never placed a single drop of Gans in this ice.

Soul of Gans was transferred to the block of ice
We transferred the soul of the Gans within this ice to show its beauty, to show its interaction with other fields.

Soul of the Gans is in the block of ice
There is not a drop of Gans in this water, but there is the soul of the Gans in this water. Where in the D of the water has manifested itself in this shape and the line it has created with others within this environment. Now you understand the difference.

Y**ou don't need the physicality to make the connection to universal knowledge**.

You don't need the soul to be within the Gans to create the connection with the fields.

Detached Soul - can manifest itself in same place - but different dimension
Now you understand, (1:10). how detached can be the soul, and manifest itself in the same place, in different D.

Shape of man in bucket - the soul has a spherical shape

You see the shape of it is more or less spherical. The Gans used for this was in the bucket, and it had the shape of the man in the bucket, that it takes the shape of the ice and becomes a ball because it's a soul.

My soul manifests itself as it likes - and carries my soul
Then if you understand this you understand the most fundamental knowledge given in theology, **"I made man in the image of Myself**," as I do not need to be, as my soul will manifest itself in the D of its manifestation as it likes, but it carries my soul.

Replication is in D of Soul of the Creator - not physicality
As the replication is not in the D of physicality, but in the D of the soul of the Creator, in the existence of D of physicality of this planet, this time and position.

Create same soul in many boxes of water
Then you don't need much Gans's to put many boxes of water around and create the same soul within it. Make one red water, .. white water, .. green, salinity changes in one, and salinity changes in the other, and the mixtures of salinities, and some metal in one and the other one.

Structure of S of Creator be same - but manifestation & connection lines different
The structure of the soul of the Creator within each box will be the same. (1:12). but the physical manifestation and the connection of the lines will be different, and different manifestation of physicality.

I am the Creator - Knowledge given to man is pure
Now you understand why I am the Creator. Now you understand how pure the knowledge of the creation is, has been given to man, but man is so ignorant of his own existence.

We don't claim to be that, we are the creator above that.

For everything - I shall still create my image within it and will give it life
The knowledge of creation, understanding the process of the creation. Change this ice box to the frozen spaces in the U, or change this icebox to the volcanic eruptions in center of earth, I shall still create my image within it and will give it life.

My Soul is carried everywhere in Universe
There is no place in the U, which does not carry my soul, even within the cell of the man.

Easy to create life in U - create the dimension of creation
Now you understand how easy it has been to create life in the U, how easy it has been to create D of creation.

Interaction of fields of My Soul with environment - leads to manifestation
As in every D in the soul, the interaction of the fields of my soul, with the creation of environment, leads to manifestation of the physicality as you see.

The Books have been written as science and theology together
Then you understand the texts and understanding of the books, which has been written. (1:14). The books are not just scientific, but they are as theological as the scientific. It's you who has to understand the both and interpret. As we said, this time we put the 2 prophets together. Then you understand the prophet of the science and theology. And in that way you have seen, we have shown you in the past pictures, how this process has taken place.

STM is responsibility to understand process of creation - without will suffer
Understanding of the knowledge is the responsibility of the man, comprehending the process of the creation is the responsibility of the STM, bring them together that you can exist in both dimensions. Fail to understand you will suffer with one, and you will see the demise of the other.

Totality of total knowledge given to Man - he has to decipher
In totality the total knowledge of the creation has been given to the man, but it is man who has to decipher. It's man who has to break through the process of understanding, it's man who has to understand the time, the position, and the place.

Communicate through physicality or field strength of emotion
Does he want to communicate by physicality, or do you want to communicate with the fields strength, the same emotion. Do I need to use the voice of "I love you," or do I need the creation of the fields, which means I give everything to you in the D of the soul, I am ?? (1:16).

This teaching is Cornerstone of future teachings
Now you understand why today's teaching is important and one of the cornerstones of the future teachings.

We live amongst you as a man, but we carry the soul of the Creator.

STC and STM - transfer of knowledge from one to the other
As man has to understand the interaction between the two. As it's the soul, it’s a condition, creation of position and transferring of the knowledge from one to another.

You have to take step to understand and create next dimension
In so many ways, it's for you to endeavor to step to the next D. To understand it, and create it, and with it understand the process of creation.

New kinds of Enhancement Units (EU) shown next week
This is why we developed the EU, .. the new sets of EU, which will be shown for the first time next week. It will go on the test next week.

STM through EU - decide if it wants to free itself

Then we'll see how the STM will decide to change the physicality, and what would the physicality take to change the freedom, cage, to become softened for the soul to be free.

I hope we opened your eyes to a new D
Understanding the physical D is more important than understanding the position of a D. I hope with today's teaching, I opened a new horizon in the knowledge of man. I hope with the new teaching, (1:18). we open your eyes to a new D.

Understand why we stay detached - to enjoy the beauties of creation
Then you understand why we stay detached, .. why you should stay detached, because if you don't on the point of arrival you'll become attached, and you'll not see the rest of the beauties of the creation.

I hope I have enlightened you to new science of creation
Thank you for today teaching, and I hope, I have enlightened many of you to the new science of creation.

Decide if you want to create life using the strength of Cu within your soul
For some of you who are still physical, a new toy to play with, you decide if you want to use the Cu plates, or use the strength of the Cu within the structure of your soul to create life. I made man in the image of myself.

Create with your own image within the container
So you shall make your image within that container. Does it need to have a water, or does it need to have a salt, or does the strength of the knowledge within you create those fields, that behave like the saltwater, the conversion from the energy fields, to the matter state plasma fields. Then if you have still understood move to another D to the physical matter.

I hope you enjoyed this journey, and I hope for the first time you have seen, understood how the soul of the Creator is embedded within your soul, as you are the environment, as we saw with the icebox.
(1:20). Thank you Rick go on break.

>> BREAK >>> 395 KSW (1:28).

It's the Cup of Soul of Creator - where do you want to embed it
Q: Is this new configuration then the Cup of Creation?
K- You call it what you like. It's the cup of the soul of the Creator, if you understand it. But where do you want to embed that soul, that within it, sits the soul of the Creator, and outside it sits the STM or the creation.

KF works with military in space defense technology with same knowledge
In the space Defense T with the KF when we work with the military, we show a different side of the T, but the same knowledge.

Create multilayer of fields outside spacecraft - shielding - no entity can enter
Where we create the craft and (1:30). outside it we create multilayer of fields, that no entity can enter. But entries are possible to a given direction of the connection of the fields.

Messages become undetectable - by current knowledge of man
Where we send a message for the craft to be controlled, but outside has no access to that message and becomes invisible, or becomes undetectable by any means, which is the knowledge of the man.

Sow seed within - through it radiate out - control different layers
It's the same we sow the seed within, and then through it, radiate out to control different layers as we need. This be the STC (inside), this be the STM, this be the STP of the man, or this be the environment, then you get the manifestation of the existence, in that D what might be. If you understand this T, you understand the beauty of zero-time communication and Transmutation.

Transmutation technology - transmute physicality through soul - sits within
Now that's why you understand very soon we release the transmutation technology, which you have been waiting for. Do you want us to be transmute you with your physical D or … through your soul, (1:32). you decide, it sits within.

Through lines of connection tap into all knowledge in U - you become centralized
When you tap into this you receive all the knowledge, which is within this, because you have interacted with it. When you tap to every levels, D, and directions, then you tap into to totality of all the knowledge in the U, because each line of connection, as you saw in the ice water brings its own beauty and knowledge. Because don't forget these themselves are connected to the other knowledge and beauty, so you become centralized.

Through lines of connection bring world peace - stop weapons
This is what I said to you, we'll bring world peace very rapidly, as we establish the lines to make the present world of what we call, wars and weapons T to zero with understanding this process.

Leaders have understood KF and Iranian space T far superior
The day we see one running out of one airport (Afghanistan), and soon they will run out of the other airports, back home, because their leaders understood, that knowledge within the KF and Iranian space T is far superior. Before receiving the humiliation, they have humiliated themselves.

One accepts they have nothing to fight with - Peace will spread

This is the way the process of peace will start, once one accepts, has no knowledge in front of the superior knowledge, they become subordinate to it, and accepts the superiority of the knowledge, as he has nothing to fight with. (1:34). This time we bring the knowledge of peace from Iran.

World leaders have understood that the knowledge is spreading

The Americans and Europeans have realized this. Before the knowledge itself, we tried to be out, that it doesn't embarrass us, and we try to be in, that we try to be beneficially of the knowledge to come. You will understand, in totality world leaders have come to understand the knowledge is getting spread and shown, is so superior that there is no use to develop more weapons T.

By creating multilayer environment leads to creation of life

It comes by the pure picture on the table. In one way we create a multi-shielding, in another way, we create a multi-environment, .. we create multilayer, that it leads to creation of life. It's all the same when you understand the knowledge.

Two new Enhancement Unit systems to be released in Linz

Next 4 weeks we release the videos of the EU in Linz. We release what we call the new exhibition for the new science of man. We have announced on first October ..
You will see 2 new system which was developed for specific applications ..
one of them will be set for , (1:36). transmutation and transformation, and then we decide who we transmute and who we transfer ?? We open the knowledge of the U in a very beautiful way, but it is for those who understand it to apply it.

Many will be enlightened to the ultimate knowledge

Some of you are still tangling with MaGravs and some still fighting in how Gans's are produced, but gradually in the process of understanding many will be enlightened to the ultimate knowledge. As we said, we have to play the game according to the intelligence.
Any other question.

This is Cup of Soul and Physicality at the same time

Q: what's the difference between the .. Universal Cup and what was taught today with the , what he calls the horizontal cheese piece, slice ?
K- That's your, or you must be very hungry or you love the cheese. This is the Cup of the creation of the soul and physicality at the same time. This is the Cup of Knowledge of the U, if you understand. (1:38). Up to now you played, with this you actually entered the arena of delivering. game time play time is over. The sooner you understand this the sooner you become ?? in both D of the soul and the physicality or either one as you choose.
Any other question.

Explain 666 negative or positive - June 6 2022

Q: Guatua , … thank you … Last week you talked about the 666 in respect to June 6th, 2022, but I expected you to go further in explaining the 666 because it has been explained else where in negative tones, but here it seems to be positive?
K- It's not wrong, let me answer you firstly, (1:40). it seems you befriended ….

Depends which side of fence you sit - half empty or half full
The answer to your question is, which side of the fence you sit and how you look at the Cup. Is the cup half full or is it half empty. If it is the cup half empty, you are never satisfied, and there should be a time will come when the cup will be full. If the cup is full, it means from that point you have received the beauty of it, and you appreciate the totality of it. So it depends which side you sit and how you want to interpret.

Don't let numbers "666" be an obstacle to understanding - maturity of the man
We don't give that opportunity for the numbers to become the obstacle to, what we call, "to break the barriers of the understanding of the knowledge." So it depends, if you sit in a way that you see the 6th of June next year, the point that the man will mature.

Go to Space or make War - If war - not in physicality of man
Maybe 2 government organizations collectively to go to space, or man by that time decides to take the knowledge on his own, and create another D of the war and separation. But that will be in the STM, not the physicality of the man.

The signs in the world are good - Wars have stopped
If you look all the signs are good. We see that, not only the wars have come to an end, now they're pushing for more lockdowns in more nations ?? which means impossibilities of moving soldiers.

Tehran NDU will start teaching scientists around world
But the way we work, we work with Tehran NDU (1:42). teaching the other scientists in other national universities, we collectively become ready to take into space. We collectively become wise to be in that position. We'll see the maturity of the man walking away from the war. So to the cup is full, and it is getting overflowing with care, knowledge and what I call, passion for peace.

Those who don't want to change and correct themselves - will create mayhem
If you sit on the other side, I have to clean the table, and the cup is nowhere near what it should be, so I create enough mayhem to fill it up.
Your next question.

In News - why is Iran importing vaccines
Q: .. request for a bit, in regards to working with Iran, and how Covid in Iran is being taken by the present administration, because we read in the news about a lot of imports of vaccines.

Corruption and bribery embedded by the last regime - transition time

K- We see a lot of problem in Iran, which was. There's a tradition we saw it in American administration as well. The previous government in Iran under the leadership of Rohani was a corrupt, bribery embedded organization. In so many ways, the new government is just taking shape this week. The ministers have sorted to their offices, (1:44). …

They blocked even vaccines - putting money in own bank accounts

Then we see how long it takes to get this infested group out of the different ministries. They blocked everything, except what they were getting bribes for, even vaccines which were bought, paid for never came because some of them took the money back into their private accounts. We see a mayhem of this position in Iran.

Done deliberately to damage new government - Delay new technology

It's deliberately made to damage the present government to create a mayhem for them. On the surface there are a lot of smiles, but underneath there is a massive dismay and damage, which is done by Rohanni. Part of it is this process, to slow down as much as possible, the interaction with different technologies and knowledge with Corona and any other industries in Iran.

Will take a few months to cleanup - start over at zero point

It will take the new government a few months just to cleanup, to start from point zero, on a level where the nation is happy with.

Battle between 2 Ayatollahs - Rohanni more corrupt than Shah

In so many directions this was a battle between 2 Ayatollahs K and Rohanni. There is a bigger understanding within the religious leaders, they don't fight outside, but inside. We have seen this is the fight which took place and the nation is paying for it. The fight was created by Rohanni or the way he took bribes. This is one of the most corrupt governments we had, even surpasses the time of the Shah of Iran.

KF is working closely with Iran in new operations

We expect changes not only in T but the new structures and new ways that the new government will take shape and take control. (1:46). We are close into these operations, we are trying to keep close , what we call information and T knowledge transfer.

KF will invest in one of largest manufacturing operations in Iran

KF in next couple of weeks will invest in and open one of the largest manufacturing operations in Iran. The Iranian team is busy with it, they are instructed, and part of this process is .. is to help Iran with 3 or 4 lines, which now Iran needs to get itself out of the created dilemma with internal support, not outside.

KF will provide massive support for electric power generation in Iran

We will provide a massive support power generation in coming days, that we do not have to rely on the power generation and massive investment in that line, in the transmissions and the rest, but we'll increase the power production in Iran starting in the next couple of weeks, that will change the shortage of fuel, what we call, energy. This is primarily investments of the KF, it's not ??? close operating with the officials.

Deliver T to cleanup Corona rapidly
We will cleanup. The process has started with our Chinese team. To cleanup .. Tehran, especially air condition system and at the same time we deliver T for overcoming the Corona very rapidly.

Even if need to teach everyone how to make Cup by national TV
Even if it means built up to go on the national TV and teach the people that they can take themselves.

Once we breakthrough in Iran with T - start working with other nations
We will endeavor to ?? break space T that Iran is ready for 6th of June. We work alongside the national government to bring the change, as part of the structure of Iranian society. (1:48). From there on we'll work with other nations to deliver the same.

Corona was built up deliberately in Iran to create Mayhem - by Rohanni
What we see in Iran, mayhem with Corona and the rest, is built up deliberately, in the last phases of the administration of Rohanni to create as much damage, to damage reputation of the leadership and the government to come. But in general ?? what has been wise to, we'll see this through very fast.

Mass production of MaGrav systems
You will see mass production of the especially developed MaGrav systems in Tehran in next 2 to 3 weeks, then we'll see the same systems, which coming up one by one.

The present government knows us - we are inside structure to deliver change
We are inside the structure, we don't need to fight to get in. We built the friendships, and bridges, we built on with the understanding of the incoming government in past year, They know us form outside and now they support us inside to bring the changes to Iran. We are ?? center of knowledge and T. We make sure of it.

They tried to embarrass KF as a fraud - those nations will defraud themselves
As I said in (NACT) teaching Sunday night they tried to embarrass us .. we showed them the next step how we captured the drone. They tried to embarrass KF as a fraud, we'll bring their nations to be defrauded by themselves, but we do it with the science and T and the wisdom. You shall see .. there are huge ?? around the world, in US, in Mexico, other parts of world, and it is coming in through KS through their hard work, and (1:50). and showing the way and correct conduct of the KS.

Change will come through Iran
But in general we don't have, we can't say we have many hopes that the situation in Iran will change, we know it will change because we are part of it. KF KS are in the heart of their operation working directly with officials to bring that change. Change through science and T, comfort, what I call energy resources to Iran in next 3 to 6 months will come, you'll see, we have committed ourselves to change to bring comfort to the nation.

We'll do it by doing it than talking about it. I am sure we will see videos from Iran producing energy supply systems, air conditioning system, space T and the rest …
We endeavor to open the first branch of Iran NDU in Europe as a university, where Europeans will be taught by the Iranian nuclear physicists and scientists in the art of new space T. As I said … we will open

The game for KF has changed, when we finish with this process by first quarter of next year, we concentrate, massively, collectively (1:52). with the scientists around the world, for the launch of 666.

First time Iran in safe hands since revolution - all working together
Iran is in safe hands for the first time since the revolution of Iran, some 30 years ago. Always we have Sepah on one side, leadership on the other side, government o the other side ?? For the first time, all has become one all under the wisdom of the Iranian leaders. They all work together. You will see a prosperous nation.

Same offer given to Americans and other nations - as given to Iran
The same offer has been open to the American administration, as much as to the Chinese. And we'll see the processes as we go through.

Happy with signs we see in American Administration
We are very happy with the signs we have seen in the American structure in the past couple of days, weeks. We received a good omen .. which Trump received for us, and now **we respond back to the American administration but through the Iranian government** office. ??
Any other question (1:54).

Attachment for beauty encages us on this planet
Q: .. the analogy of the bird cage .. we have become physical because of our attachment for the beauty of this earth …
K- I answer you in a different way. As you said the beauty of the planet. .. earth is a beautiful place. We come to enjoy the beauty of the physicality …

All souls have line of connection - Animals manifest as soul in another D
You got to remember what I showed you with the ice with no physicality of the Gans in it. You have the same D with the soul of all creatures of this planet across the Unicose. The beauty of the soul of a soul of a leopard, lion, or ant, on its departure, (1:56). will manifest itself in another D in the U. Then what it shall be in that U, a tree or a shrub, as a soul, and then if you understood the image of the soul, then how this tree will manifest itself on planet Zeus, if it is the right environment for its manifestation. So yes, we come to enjoy the beauty on this planet, it's beautiful.

666 is not as antichrist
Q: .. to go on another . the date 666, there is a … it's not .. a destructive force, but it paves way for the new, so there is a positive attitude for that from a Christian perspective

that they see it in negative terms, but it is all part of this one .. not as an antichrist scenario
K- No I don't look at it that way. You look at it that way. The understanding of the time is a point of maturity.

Time for man to mature and travel beyond boundaries of earth
The time and position is for man to mature for the first time, to travel beyond the boundaries of this planet with the D who he made the limitations of himself of. And that's where, (1:58). the man will change. I was explaining this … you remember when the cars came

Man can travel without physical D
We are at that point with the 666 where we show the speed limit, beyond the speed of light, the restriction with was put out by what we call, a peasant more than anything else, and for man to understand there is no limitation with speed. .. to open the D to give man a chance, that man can travel without physical D.

You may manifest and look different on moon - get used to new shape
Q: So what you taught today is the key to how we can do that?
K- In a way, I think if you understood the ice image, that was the totality. If I am on earth and I want my soul to be on the moon, what you see as me, is it me, or is it a manifestation of my soul, in the image of me on the moon. Then it takes its own shape, you might not like when you see your self on the moon, this is not me. But if you twiddle your finger, and the finger on the moon moves, so it is me. So you have to get ?? used to your new ?? figure.

Travel to star instantly with STM - how it feels - smells
If you look into the depth of the U and you see a star. And you want to see how that star is, (2:00). what its solar structure is. Do you want to spend millions of years traveling according to what they are telling you, 10,000 million light years, or do you want to be there instantaneously and tell me with your physical condition this is how this star looks like, it's got mountains, and this and through your soul, has come , has taken position of, through my soul I can see the images of that place. How it feels, smells looks.

Door of nursery just opened - all will have equal knowledge
These are not anymore fantasies, these are T which yare in your hands. Today's is just part of it, we have just started the process .. to introduce you to universal knowledge. put it this way we have just opened the door of the nursery all in one go. And you all come in on ground floor, and you'll all be professors because the knowledge is given to al of you at the same time. It's a key to the KU if you understood it … it
Q: Thank you (2:02).

Red residue on coils of Cup Life - impurities in Zn - CH3
Q: I am in the kindergarten stage I made the Cup of Life … red residue precipitated on coils .. ?

K- .. why do you think something went wrong. Or did you created something that you need to understand. Or is it wrong because of your expectation.
Q: expectation …
K- What have put in it ..
Q: (2:04).

K- (2:06). CH3

Do you need detachment and understanding to use EU
Q: Ed (2:08). new EU .. impending demonstration of this and about selecting people. .. I am wondering if a person needs a certain amount of understanding, detachment, and acceptance in order to have a positive experience using these transmutation devices, without undesired experience.

Experiences you have are set by the Soul - to bring balance and knowledge
K- Whatever you go through, it means your soul has set a path for you. As I said in last comment, it's the expectation. Your soul knows the true wish, it doesn't matter how you want to bring it to the physicality D or wish. .. When you enter these systems, as it is an open space interaction, the best .. possible option, that it brings balance to totality will be taking shape. Not what you want to push. .. What you learned, where you end up counts, not what you wished and you wanted, because it comes with a different direction.

But if you travel in D of physicality - Totally different
Unless you enter in D of the physicality, which is totally different, then you'll travel in the space and D of physical life. Soon we will learn, all of us. (2:10). Soon we will see how our physical D have decided to live within the D of our soul. It's another learning process, but it will be adjusted to according to, and will be settled by the position and condition of the strength.

Like getting on a plane and adjusting to the altitude
It's very much like when you get on the plane, on the lower level there is not much compression, as you go higher, they increase it and adjust it to the height, the altitude you fly. Then they reduce and change it back where you come to the position on earth where you might land, or you might be on moon, or wherever.

Depends which Soul takes charge of decisions - STM or STP and emotions
It's the same way, but this time it is more the decision of the STM then the physical condition, but still the STP has a major say in it, if it decides still to be in charge. We'll learn a lot .. because then we have to decide we allow the soul of the emotion, or the physicality to take over, or we allow the soul of emotion or the STM to take over, and where there is a compromise.

EU helps humanity learn - to do for oneself without machine
Q: Another part .. once a person goes through an experience using a transmutation device (EU), will that help them define the emotional experience. Will that become a

learning experience, so they will be further along the path, to being able to it themselves without the use of the device?
K- That's the whole purpose, that's what we said from the beginning. We just set you, a way to do.

Soul decides about lessons you need to learn
You might enter the system and expect to be cured from a cancer, (2:12). but the soul has decided there is more to learn for the physicality, and it is not this time. Maybe 2 weeks later. You understand and you enter the same system and it works the way it should do. Because the soul has agreed, the soul understood, the has been fed for what it was missing, or what it wanted to achieve.
Q: Thank you.

New emotions that Man never knew before will come into play
K- As I said, new emotions will come to play, which we have never been aware of, and these emotion, as we said, will play major role in man's life in the space.

More emotions than sadness - happiness - and joy
Now we only know sadness, happiness and joy, and this and that. New emotions through the new conditions we face will manifest. "I never knew I could do this." I never knew I had such a feeling. Or I didn't know such a thing existed within me. But it exists in all of us, within us and we have to learn.

"Free Fall" is a new emotion that came with flying in airplanes
We know none of us had the emotion and understanding of the "free fall," because we never experienced it, and it's a specific emotion, till we sit on the plane and the plane drops and we get that feeling. So now we know the new emotion of free fall. You cannot explain it to no one, unless you experience it. With the new space T we'll come across new feelings, new emotions which we didn't know, and create a vocabulary for it, explanation for it. We all will understand it.

Space travel will open up new Emotions to mankind
If I would have told you before 50 - 100 years ago it was meaningless, but now many of us have been on the plane, many of us have it, felt it when the plane fell suddenly in flight, (2:14). we all know what it means, and we have created a world for it, we have created an emotion for it. Now mankind will come to understand new emotions, with this new development in the space and travel.

Some beautiful times starting.

When the man from village first goes to city - prepare him for new experience
In so many ways, … it's like you've been to the city, you have seen the lights, and restaurants and the beauty of the life, the activity and the busyness of it. You go to a village and you try to get a man or a child which only knows the donkey, they have seen things on the picture and television. You try to explain to him on the way to the city from the village, what he will be seeing there. How the things will be, the smell of the steak, ..

the ride, and the smell of the fuel, because he was busy with his own village before, and then in that process of travel from village to the city you have to mature him, that once he gets there he doesn't get a shock.

My job to prepare humanity for space travel
This is the job I am carrying through at the moment with humanity. Taking the man from the village and trying to explain to them how beautiful the city of the U is. In the process, trying step by step put knowledge in, and add in what to expect and what to be prepared to receive. Not just think, "oh I go to the city with a donkey, and I go somewhere else, where am I going to find the hay for it, and where am I going to find water for it. In the city they don't have donkeys, and there is no where to buy hay, (2:16). because they use cars and jets and the rest of it.

It's tougher than we thought - But we are getting there
At the moment the man is in that process and we are trying to walk to the world of the city of the U. But to educating man to understand in what is to come, it's been a tougher mission than we thought, but we are getting there.
Any other question

Before we go, try to book yourself for Linz …
(2:18).
Any other question

Q: Will KF sell materials to Cup of U on its website
K-

(2:22).

Don't expect to come to the Center and get into the machine EU

Any other question. (2:24).

Q:

(2:32) Any other question

Q: tied in with the UC .. (2:34). (can't understand)
invitation to support the work of the UC

Rick reads: A prayer for UC

signing of the peace treaty in front of Mr. Keshe

(2:36). and she goes on to say, this wish goes to other countries. covers whole planet ..

joining wish by UC

Tattoos - not dangerous
Q: tattoos .. more and more people doing
how do these drawings effects the physicality and drawings.
K- We saw the rise of these things with one football player, if you remember Mr. Becker. He was one of the main instigators of making it (2:38). the way it is … then followed with others. It doesn't do much except give pleasure
nothing wrong with it ..

(Tattoos) It's the way of getting attention

(2:40).

(2:42).
Any other question

Q: just working with the fields
why the request for electric bill
Why do results need to be quantified

We use the greed of man to teach the man plasma technology
K- You hit the nail with the hammer right on the top. (2:44). Greed. We use the greed of the man to teach the man Pl T. His greed was his electricity bill. Totally we used the greed of the man, nothing else. But now with the MaGravs you got to know about the space T, you got to know, now the true use of the MaGrav, which is the creation of fields, and not the electricity.
R: That was a somewhat surprising answer but very direct.

If man would have gone straight to learning about fields - in different position
K- You see people wanted to see, what they wanted to see. So we gave you. John played a beautiful game with this without a lot of you realizing. John went the direction of the fields, where the rest of you went what we call, power for electricity, and nobody realizes, you were too busy with the MaGravs. Remember how John used to put 10 or 12 of them in circles, different circles or ways, different combination, and he got the guy to move out of the building 200 yards away and he is still feeling it.

John went the right way, and the rest of you went the electricity way. If you would have gone the way John went, the space T and Pl T would have been totally different. You would have explained, (2:46). the energy fields of your MaGravs how it interacts, how the two will do, how come ?? Very few people asked ?? started this process. Then again, it was to see something. You didn't do to feel something. I've seen people putting different MaGrav combinations, we saw it last week … the Iranian guy showing different combination of the MaGrav and he expects to see an aura of it. We always did with expectation to see what we make. And expectation to see how the fields interact.

Next question

Q: with a lot of love I was on Damavand at 3,000 meters (Iran) ..
K- Mountain north of Tehran if you are talking about the same.
Q: And we flew back to Italy 2 months before ??? .. I have been following your training courses, (2:48). since 2012 .. many people tell me that I am an Extra Terrestrial, and look at me like I am crazy. Is that because I was on Damavand, and Saudi Arabia, and also islands …. and, and not as a tourist.
K- I don't understand this one enigma.
Q; Or perhaps the fields of where one lives is responsible for understanding the totality?
R: I will ask again, it's interesting, .. Or perhaps the fields of where one lives is responsible for understanding the totality?
R; Or he could be saying , How do the fields of the environment where we live, how much are they responsible for understanding the totality of ?
K- It could be what emotion they give you more or less. What they create in you.

Visiting Religious sites adds fields to your life - they effect us
R: The religious sites of the world especially, or the pyramids and things like that?
K- Yes, its (2:50). we are effected by all of it in different shape or form, and we are made of these collection of fields. So they effect us, they make us, and what we are is part of it.
R: So does every point in the U have a particular mood or emotion attached to it, or is it only in our perspective of things?

Go back to a special place later and not feel anything - it's all perspective
K- .. our perspective and how we are. We can go to a place and be very romantic the first time , and then we go back the same time, and don't get the same emotion.
R: We might even be sad, because we don't got a lover..
K- Yes, it depends what it is, it is all emotion and dependent of what position we have, and what is to us. It's very interesting because we see the totality of this with different emotions, all of us. We go to a place, and we go back to the same place a few years later and it doesn't have the meaning. It doesn't have any meaning at all, where it had before. You say, what did I come back here for. (2:52).

Q: … I saw myself coming out of my body and working on my physicality, in the future is this what the CU is for?
K- The Cup of Physicality is not for that purpose, but if you create the condition that gives you that feeling, that position , that emotion then your C of P has created that. But it is not specifically for that reason.

Q: Azar .. (2:54).
K- How come all the Iranian KS are with Dr. ??
Q: He is such a gracious man with big heart ..

Universal Community automatically connected to UC when it was formed

Q: .. How involved are the U Community in transition point on planet earth and the connection of UC to the U Community … can the UC can count on U Community during this transition.
K- I will answer you all in one go, one answer. When we established the UC we already established a connection between the UC and the U Community council.

But UC has to mature to understand that position
But the UC has to mature to understand that position. When we wished for world peace and end of wars, who do you think carries it our for you?

Universal Community works to fulfill wishes of UC
Not only yours as UC, but UC as a whole has given the hand, it is your wishes, they reach, they create a path, it's a collective interaction. When we setup the UC you already connected to U Community council, (2:56). which means you are benefiting by it. But you are waiting to see it with your own eyes, but you have seen it.

3 years ago UC wished for peace - we brought the guns & armies down
You wished no war 3 years ago. We brought the guns down, and now we brought armies down. What else do you want to do.

UC part of bigger structure - reaches Soul of Everything
It's not just by the wishes of the UC of the humanity, you become part of the bigger structure, which reaches the soul of everything.

Everything is preplanned - it will become clear after next year
You got to realize something, which after next year will become more clear to you. Even the setting up of what we want to do next year, the rest of it, till you come to the point of interaction with the U Community is all preplanned, preset.

Transition period is preplanned - not to cause new problems
That the transition is too rapid that you get lost in the mayhem and you have many problems created out of new conditions and positions. Everything is methodically planned, how to let you to come in.

Made to look as if humanity is doing it - Man has never been left alone
But we make it as you are doing it, and the arrangement is yours and you feel we did this and achieved that. Everything is methodically planned. We guide you slowly into the path to reach the point and the position, where you become part of. We don't pick you up in the village and drop you in the city. We walk you through with it. Step by step. .. You have never been left alone.

UC members who go astray with own agenda - they still serve the bigger purpose
Q: If any UC, even the joined with the agenda, (2:58). or they became, or they just changed direction and then they, not working in the same direction as the totality of the UC, what the effect of those effect of those people on the totality of the UC wish.
K- They are still serving a purpose, they still have come into serve that purpose.

UC members - don't be greedy to want to have your own way
Don't be so greedy, that everything you want has to be everything. yes? Just because you are UC. Do you understand. Even they do wrong things, and we have seen many of them do while they were there, as many of them tried to do good while they are there.

Good or bad UC members bring you to where you have to arrive at
They all bring you to the point where you have to arrive. This is the beauty of if. You understand.

You're expecting. Don't have any expectations.

(Mr. Keshe tries to reach heart of UC member -)
Q: It means that, when we don't have any resistance, we allow even the ones they go in the wrong way, .. It's not any wrong or right direction, at the end …

Mr. Keshe "Why do you think you are going in right direction" (deeper truth)
K- Why .. why don't you think, even thought you think you are going the right direction, it's a wrong direction. Why do you think they are wrong. You understand?

(UC member - different track; Mr. K gives more love)
Q: I am not talking about they are wrong, but they .. the way they see the world, and they see us wrong, they opposing for example, what we wish, KF what we stand for .. (3:00).

Our arrogance is to think our way is the only way - we have already failed
K- When we become arrogant, that the thing is, the only way, is our way, we have already failed. Do you understand.
Q: yes

Collective work of the totality - brings us to the point
K- It's collective work of the totality, which brings us to the point. If you look back at what we thought was two wrong things, and one was trying to claim, that the other one was wrong, and the other one carried on doing with it.

Example of Tesla & Edison - today we use both systems
We learned from Tesla and Edison. Both working especially Edison, trying to prove the other one is wrong. But now today we use both of them the same. Who was wrong, who was right, or both have served their way to how we do things. How we understand things, and how the knowledge of both has helped us to be where we are in world of T.

The Truth doesn't come from the mind thinking - it comes from the soul
It's the same with the soul, not because you think somebody is doing wrong, is wrong. It's wrong because it doesn't come to our understanding.

Pray and give from your STP for you own soul to understand them
You just pray, or give from your STP to your own soul to understand them.

Not for them to change - for you - because you think you are right
Not for them to change for you, because you think your way is right.

It's a totally different way of living from now on (from soul)
It's a different way of living from now on. When you become, it's for me, is the time when you go down the hill. When it's there for all to be, you'll find we accommodate each other, be it UC, be it life in any D. (3:02).
Q: Thank you

How to visualize the fields and interactions of Gans - see to believe
Q: .. How could we ever visualize the fields and their interactions to make them more tangible. I am thinking of a way CO2 Gans looks when frozen?
K- Come up with new ideas and concepts and show us .. how do you think it can be done.
R: to make the fields tangible.

When you don't want to make efforts to change - need to see to believe
K- You have to see everything to believe in it, so she asks for tangibility. … Not accepting what it is, but make it for me to see. I don't want to make any efforts, or I don't want to understand different way and new ways of it. (3:04).

We are all teachers and students - not give me - give me
This is a change of course. It's not anymore teachers and them and us, we are all in it, we are all teachers at the same time as the students, that's why we call it a Knowledge Seekers. and we teach and learn from each other. It's not anymore give me, give me, or I am the only one. and I know all of it.

Mr. Keshe comes to teaching as a Knowledge Seeker
We see when I come to the teaching I come as a KS how the man thinks and how we have to change the teaching for man to comfortable with the rest. …

Even the Creator is a KS, let alone man.

Q: (3:06). .. we need the medical equipment to be ready as soon as possible .. someway to make it less expensive.
K- I don't understand
R: ..
(3:08).
K- The KF position is very dynamic …
all of you working in the background

About the pedophile groups attacking KF
A huge number of Pedophiles groups who were sitting into the KF into .. they were all pedophiles. We have a full understanding of them. These people lost a supply of children to them. We have 2 - 3 living in Linz, we know them. We have a bunch living in

Germany. (3:10). .. We know these groups, they were part of a structure. By us blocking and putting one guy in prison they lost their chain of supply Then in last 12 months they lost another leader in their group by being kicked out of the KF.

100 EU across the US

I see in next 3 month 100 EU center just across the American continent
(3:12).
15 EU center in Iran

(3:14) .

Q: long question
(3:20).

K- I think you have forgotten part of the teaching in the past. That was one of the intros speaks about that your soul becomes another sun, another source of creation. So what soul created our Sun, (3:22). what .. seed of our Sun.

It's not being any higher, how did it come ..

(3:24).

(3:26).
Q: what's the reason for us over 60s not intervene in the UC as a main member. Is it for the young blood to take over this situation
K-

(3:28).

EU only given to centers with trained medical professionals - not private rich people

(3:30). Q: Can EU be used by any age and knowledge ??
K- EU will only be given to physicians. Only be given to groups which have a permanent position physicians. We have KS who buys one, it will not be given to him to put in his house. It is impossibility. It will be given to him when the qualified position is declared, the doctor, the physiotherapist, the nurse, the supporting team, then it be given. Doesn't matter vertical or horizontal EU it will only be given to physicians, we have to train the physicians to be able to use it. Once we demonstrate the EU in Tehran shortly, then it goes worldwide, every unit delivered in the world.
The EU is not individual, it is mine, I will use it. No. It says on your contract, "subject to conditions," when you bought it, one of the conditions you have to have a center ..
(3:32).

Q: What is the
K- There is a remote possibility then the KF at that time will have enough structure we don't need the

(3:34).

(3:36).

Mr. Keshe Nano coated our souls - not our physicality
Q: Did you Nano coat us already?
K- I N coated your souls not physicality

(3:38).

ENGLISH TRANSCRIPTION

Teaching about Light - how it's created - essence of light
(:11). K- … Today's teaching is very much what we see in the background (on screen), it's about the light, and how the light is created. What is the essence of light. Why in the world of matter we use cars, donkeys and rocket propulsion and everything else, but in the world of creation we use light. We have now today we are going to open another dimension (D), another understanding of the totality . What does it mean, light? Where does it come from, what is the essence of it?

Light as a means of transportation
Why do we use it as a means of transportation, .. system as transportation. .. in the world of matter state we create converters, we convert one energy to another. We go from a car to a bicycle to donkey .. to move from one place to another. In the present world of electronics and computers, we use fiberglass, .. rapid information data as noise. We use different form of the light in a matter state.

But what's the difference between the light in the universal cosmic direction and Unicose, and the light to the eye of the man? What would be the future of the man when he travels in the D of the soul? Would we still see white light, or would we see light, or would we

explain light as means of Transportation and Transmutation (T&T)? We look at it as the position at the moment as it is there and we can see, allows our vision to be aware of the environment, but light in the world of creation is a means of transport. It's a means of position from one place to another. (:14). It's a means of understanding the totality of the creation and its positioning in the U.

We think of light as daylight or a light bulb
We call the light when it appears as the day time, .. when it appears on a light bulb. But in the world or creation light is totally different. Light is means of going from A to B, as the fastest time, to make it zero-time. We see light as a ray, .. or as a particle. In fact, in the world of creation we have both.

We can become a light - transport matter in a capsule of light
In the Unicose we can become a light. We can transport billions of tons of matter state in man's dimension (D) in the capsule of light, but we have not managed to understand, truly define, to comprehend the structure of the light.

Light is cylindrical plasma - transmute and put what you want into it
In Book 2, I tried to open the subject that the light is a cylindrical plasma (Pl). In a way, whatever you put in a cylinder, and be able to transmute it, you reach to the point where you want.

We become part of the light
We create the light in the world of creation, not the light as to be created out of interaction. We become part of that light, we enter that cylinder and we transmute with it.

First Transmutation systems show in Linz - Transmute into capsule then move
In the coming weeks by the opening of the exhibition center in Linz we will show you the first what we call transmutation systems. We show how to transfer the body of the man as a light from one to another. How we structure the body, (:16). to become in that capsule, and then we move the capsule.

Create a box out of Nano materials - it becomes an envelop to contain matter
If you read some of the papers written in the past we always said, if you can make a box of Nano (N) matters, it doesn't matter what we put in the box, it's like an envelop, do you put a love letter, do you put a note or do you put money in it. It's the envelope that carries it.

Life is that envelop - You position it for travel
Mankind and the scientific world have to come to understand life is that envelop. How do you want it to move, but with the difference that with the light you have to position the destination that it can arrive at that point.

It's like a mobile phone satellite - sends digital numbers anywhere on earth
It's very much like a satellite you have a digital number it ends up on the mobile phone you carry. It doesn't matter where you are on earth.

We use the Unicose to position in other Universes - as a GPS
We need to use the GPS of the other Unicose as the position of the interference and interaction within the U, and then we use the Unicose itself as a satellite of the position of one U to another.

Travel span of Unicose using other Universe to navigate
In time man will learn this. We travel the span of the Unicose this way. You don't have satellites, we use other universes for D and interaction with other universes, as a means of transportation satellite system.

It means we use the interaction of the one to the other, when it is not on the line of the view, or line of the interaction. In a way, it's very much like when you travel to go from one place on earth you have to stop for refuel, or you sit and divert to another position. It's the same way.

Satellites are limited by height - in future use the Moon for positioning
Mankind has got to learn. The satellite present time, which is made, (:18). is limited to the height from the earth. Once mankind becomes wise to it, he will use the structure of the fields of the moon for navigation, for transmutation, for transportation.

Can position travel using the nearest star as a reference
He will use the fields of the nearest star to create a condition of position and point. He uses multitudes of the stars to create a point in the U where he wants to be.

Man is mature enough to understand that light is a means of transportation
We do all these with light, light references and light packages, Which means we have become mature enough to understand, that the light in the world of creation is a means of transportation.

Add or take energies from light - transmute to whatever you want
It's a means of being able to transport, and within the structure of the transportation, to add or to take energies from it, to make wholly a transmutation, where you enter one energy as a gold, and you transmute it to silver, or to Cu, or visa versa.

The reference point are the energies of Life within the structure of (our) Universe
Again all this has to be done in reference to the point of the energies of the life within the structure of the U. This is why in the technologies, which will be introduced in a gradual way, and on the 6th of June next year, as we endeavor to go to moon. We use the (??this) means of transportation.

KF is developing first stage of "Transmutation Systems"
In the KF research centers we are developing the first stages of what we call, "transmutation systems." We hope you'll see the first ones for the opening, of early stages of opening of Linz Exhibition Center.

This in not a dream - It's real and getting developed
It's not a dream. It's not something to be. (:20). The system is on the table, .. getting developed that for man to understand.

In KF systems you enter a box and get transported to another box
Systems where you enter a box and you transmute or you transport yourself to a new condition in another box, in another position.

Sci-fi movies have become real
These things used to be the what I call, fantasies of Sci-fi movies, now it has become a reality. For man to understand the reality, he has to understand he cannot carry the man in every cell of heart, brain, the suitcase you carry.

Put man in a package of fields - Compress it to light - reverse process at arrival
But we put man in a package of fields, we compress it to the light D, we stretch it to the point that he can accommodate the totality as an energy, and at the point of arrival we reverse the condition.

Or we allow the point of arrival condition to dictate the manifestation.

We start to teach about the structure of the light - totally different
The structure of the light has a totally different meaning in the world of creation. We start teaching these as now we're reaching the point of maturity of the knowledge, to extend that man can see more, and that nothing becomes magic.

Transmutation of energy to the energy of emotion and the soul
Transmutation of energy to the energy of emotion, and the soul, is already on the table. We have seen the first results in past few days.

We enter fields of plasma change it to emotion within the body
We can enter in the fields of Pl and change it to the D of emotion within the body of the man.

We don't need to separate the soul or embed STP within STM to transmute it
The same, this transmutation can be made in the point of transportation, where we understand what our soul will do on the point of arrival. Do we need to separate the soul, or embed the STP within the STM to transmute it.

We can expand the soul that itself becomes the light
Or do we expand it in the new transportations systems, (:22). that the soul itself become the light, as we seen it.

Why do we see the Sun as a light - or the soul as light? - Matter state
But why do we see the soul as a light? What's the reason for it? Why do we see the sun as a light, and what's the reason for it? Mankind has up to now has looked at the structure of the light in a total different way, in the matter state.

Would soul manifest in the vision of man - or strength of Soul of Creation
But what happens when we look at the light in the D of the soul, in the D of the transmutation, … transportation. Then would your soul manifest itself in the D of the light, to the point of the vision of the man, or at the strength of the soul of the creation.

Observing souls see different structure and color - depending on strength of light
Would every other soul which is observant of the transportation of the soul from one point to another, will see the light in a different color, .. structure, .. speed depending if it is self light or above that light of it.

We recognize where souls are from - by the strength of their fields
Would our soul and the soul of all those who live in the U appears as one type of light, or by the shape of the light, by the extension of the fields of its strength we can say where that light comes from. Our soul recognizes it, our soul understands its position, its strength, its emotion.

In one instant through emotion we can elevate our souls
We know this as we do it so often within the structure of the STM within the D of physicality of emotion. In one instant we get emotional, and one instant through emotion we elevate our souls.

We create diseases through emotion
We decide to change our physicality in one position, in one second, through emotion, we feel, "I want to die" and we trigger that point, (:24). through the life of the emotion through D of soul of physicality and we create MS, ILS and all other diseases. Then mankind has to understand the purpose of the light, the propose of the transmutation in ?? be on the D of physicality.

We do this in Gans making - Matter to N then through environment to plasma
If you have not understood up to now, maybe you understand in a simple example. In your Gans production systems you change the matter to Nano, and than in another condition of environment you change it to a Pl.

Same with light - different strength means different function
It's the same with the D of the light in one strength you change it to what we call, transportation & transmutation and in another strength it becomes a photon.

Photon means - it is just a carrier of energy - send message as energy
It becomes that which means, I carry none, but I am just the energy carrier. When it's a photon, it's ?? being carrier. When the world of science understands this, man will choose a new mode, a new ways of transportation, rockets and jumbo jets become obsolete, where the man will learn new ways to package, or to send a message as an energy.

Fallacy of Speed of Light as ultimate speed - You decide strength of light

Then what has been the fallacy that the speed of light is the ultimate speed, becomes absolute nonsense, because then you decide at what strength of the soul and what strength of the light you want to T&T according to the environment of the entity.

Mankind needs a lot of kindness to understand how foolishly he has trapped himself in this world of light. If and when the mankind understands the purpose of the light (:26). is another mode of transportation, he will understand that he has a new tool, a new D, a new way to move, or a new way to package itself.

UFOs are seen as packages of light - speed of light of U
You see the UFOs and you see they appear as light. It's not only they interact, due to the interaction of their fields with their environment, but they envelop themselves in a new D, a new package, then they can travel the speed of the light of the U, which is totally different, then the light the man knows.

Go deeper in soul - will see lights of U - understand knowledge of U
If the man goes deeper in the strength of the his soul, he will see the lights of the U. He will understand the knowledge of the creation.

Man has chosen D of physicality - but Do of light is much sweeter
But as we said, man is too physical. Man has chosen the D of physicality, because it is much easier, "I taste it, touch it, I visualize it," where the taste and the touch, and visualization in the D of the light, in the D of the work of the U, is much sweeter, is much easier, is much more applicable and does not need to destroy and ?? from the depth of this planet, and use nuclear T.

Nuclear technology in dimension of plasma is totally different
Nuclear T is the opening of the knowledge of the man to the U. But nuclear in the D of the plasma (Pl) is totally different.

Offer Iran's centrifuges as souvenir - we have unraveled secrets of creation
Maybe now we understand as we said, in the new series of negotiations, we offer Iran the fastest centrifuge for Plutonium, Uranium as a gift, a souvenir to the other nations, as we have unraveled the secrets of the creation of the T&T in the D of the light. (:28).

Let the children play with the toys while the men create new D of the knowledge and T.

Man will make himself the light to travel at any speed he wishes
In the coming time mankind should be traveling in the span of the U, irrespective of wherever he could be, as he gains the knowledge to make himself the light, that any point as he wishes to, and at the speed he wishes to.

Weightlessness at the speed of light is a fallacy
The fallacy of the weightlessness, becomes the fallacy of the understanding no knowledge. The true knowledge of creation, no subject, no object traveling at the speed of light, ever exists in the D of no control, what you call weightlessness.

Can create Inertial weight even at speed of light
Mankind have not understood that he can create the Inertial weight and mass, even at the speed of light.

Compress light strength to become one within each other - stability of totality
We can compress the collection of different strength lights, to become one within each other, that they keep the stability of totality.

New Enhancement Units compress fields of plasma to a cylinder
In the new Enhancement Units (EU) for T&T that's what we do. We compress the fields to make a Pl into a cylinder, and then D of the strength of the light will manifest itself.

Rotating plasmas light - comes from interaction with fields of U
In the new EU .. in Linz in coming time, is very much the way the U works. You don't see rotating condition in the body of the man, as we see in the rotation of the objects. When a Pl decides to rotate, to manifest itself, (:30). in the D of the matter state, like the CERN, the light on its own, is the creation of the interaction of its fields with its own matter condition and the fields of the U.

You don't see any stars when traveling in D of light of U - it is above
When mankind travels in the D of the light of the U, he shall not see any stars. He will not see the state of matter, as it is above.

You become a neutron on your own - at strength of U
In a way, you are a neutrino, you become a neutrino, which means you become a neutron on your own, because the strength of the neutron of the U, not the strength of the neutron in the D of the earth, and this U.

With the light of emotion - you can enlighten the whole of the U
Understanding the concept of the light, is an amazing knowledge, which will mature man to a new D, will mature man to understand, you can even with the light of emotion, enlighten the whole of the U, let alone the knowledge of the man.

New D of light is a higher order strength light - not light of the body
In so many ways, mankind will enter a new D of T&T with the knowledge of the soul, which means at a higher order strength light, not at the light of the body of man.

When seen as a human - you're light is still in matter strength of this planet
When you manifest yourself, when you are seen as an object as a human, you still are in a condition of the light of the physicality of the matter state strength of this planet.

The STP can elevate itself to become the light - without interaction of the soul
Even the soul of the physicality (STP) of the man can elevate itself to become the light itself, without interaction with the soul.

STP can become invisible without STM - by interaction with the environment
We can extend the field strength of the STP, that we become invisible without the present interaction of the STM, but in interaction, (:32). with the environmental field energies of the light of the position and D.

I become transparent by transferring my fields strength to the environment
One minute you see me, one minute you don't, because I transfer my strength to the D of the fields of the environment, that I become part of it. I become transparent through it.

Knowledge of the light - Cornerstone in evolution of man's knowledge
In the coming time the knowledge of light will become the cornerstone of the evolution and gaining knowledge for the man.

We will learn in the D of the emotion of the light
Because we will learn the knowledge in the D of the light, in the D of the emotion of the light.

Each light is a position, is a speed, its character, has emotion of itself.

Mankind will learn to work within these structures of light
Mankind in the coming time will learn to work within these structures. The first part of this process has already started, and it will go on for a time to come.

The Soul of the Creator reaches the STM through the light
In so many ways, mankind has to learn to work within the new D, within the new structure, within the understanding of the process of the creation and the Creator. The Soul of the Creator (STC) does not reach the STM through engines and rockets, but through the light.

Voice of man is like photon when carries physicality - when sound - it is energy
The means of transportation within the D of M fields, the means of transportation within the structure of the U. In the body of the man we carry the physicality of the man, to be at one point or another, but we send the voice of the man to represent the man in the other. The voice of the man is what we call, photon, (:34). when it carries the physicality of the man, but when it appears with the sound itself is nothing but energy.

The process of "fraction of one to be both at the same time"
In the time to come mankind will learn the process of one or what we call fraction of one to be both at the same time. The sound, the knowledge, or at the same time the physicality. **We talk, confirm our information, and what we think**.

Fraction of light transfers knowledge - but the structure will stay within the particle
In the D of the light, a fraction of the light at a given time and position will be eliminated, that it transfers the knowledge, but the physicality of the structure will stay within what we call the particle.

Position will be dictated by emotions of soul and light
In the coming time, the knowledge of the position and time will be dictated by emotion of the soul, by the emotion of the light. By the emotion of the interaction of the light with its D and position. How do we do this. How does mankind will lead itself to use its soul or the light as a means of T&T than the physicality of the man.

The D of light can be reduced by putting it under pressure
In the world of the science today, you put the physicality under the pressure and reduce its D. In the world of the creation of the light you can do the same.

Pressure has to come from "Willingness of Both Fields" - to accept
But you have to understand that the pressure has to come from the willingness of both fields, and the acceptance of both, that accommodates one to the other. (:36).

Create strength through STP - allows STM to extend to light cylinder
Which means you create a field strength through the STP, that allows the STM to extend itself into the cylinder, that, within that position, it will take the D of physicality within it, that it increases its strength.

Change a sphere into a cylinder - by compressing plasmatic M fields
In a way, we create a compression through the plasmatic M fields, to allow a sphere to change into a cylinder.

Use STP to engage itself with STM - use higher soul fields to transmute
Mankind can learn, that he can do this with the beauty of his STP. Which means we use the STP to create the fields, that allows it to encage itself, and encage the STM at the same time, but use the higher field strengths of the soul, to create the D of light, to transmute itself, across the U.

Iranian Sepah paper says - with KF technology fly to moon in 1 minute
Go back to the paper, which we released, which was published by the Iranian Sepah on the 10th of February this year. It says, with the new Pl T of the KF man will travel to moon in 1 minute.

Iranian physicists already understood concept and principle of new science
Which means the nuclear and plasma physicists of Iran have already understood the concept and the principle.

Teach rest of humanity - To be ready for 6th June 2022
Now we have to teach this to the rest of humanity. Then you understand on the 6th of June, for those scientists and organizations who have evolved to that knowledge level, they don't need one day return, they need 1 minute return to moon and back.

Understanding the concept - transmutation/transportation through the Light
The understanding of the concept, the understanding of the process of transmutation, (:38). through the light. Transportation through the light.

Understanding of the knowledge through the light.

To be enlightened by the light.

Exploring the Light is the new frontier for man to explore
(It) will become the new what I call, territories for man to explore, to understand, how to convert every entity to a light, or the soul, or the essence of his field structure. That's what the light is. Then in interaction of these fields with their environment, decides the color, shape, the knowledge, the entity which that specific particle carries.

We become neutrinos to souls which do not understand our work
In a way, we all can become neutrinos to the souls, which do not understand our work.

At point of interaction - convert to STP
Or the others can become the neutrinos to us, that at a point of interaction of the right fields, we can convert them into the STP in that position and D.

Souls given to the captain of UFO to transport - delivering souls like messages
Go back to teachings .. where I said in the future man will give his souls to the captain of the spaceships to transmute, and not the physicality, then the STP transmutes and transports these souls within it souls, of a separate entity, and at the point of arrival, like a messages, like a postman delivers. How that soul will take shape and D it's of the structure of the field strength of the time and position.

Cannot compress fields of plasma like CERN - Childish way
Mankind has to learn the compression of the fields of the plasma, not the way it is done in CERN, a childish way. Remember, (:40). birds fly with birds, and foxes walk with foxes. When you work with the Pl in the D of the transmutation and separation, or speed of light, you have to use the field compression of the Pl.

Electromagnetic fields are weakest fields - cannot compress plasma
You cannot use electromagnetic fields, enforced with the current, to compress a plasma, which has a different D of fields. It's like using a brick to put a nail in the wood, it does not work. It's got holes in it, it's got scientific data, what we call misunderstanding of a knowledge in it. This is why what we've seen with Tokomak and the CERN is full of flaws. It's a dream which will never come true, to understand in more detail the work of the U.

The earth fuses plasmas all the time - energy packages in upper atmosphere
When the scientists create a dynamic plasmatic M field, which can gain strength, then they can create the condition of the interaction and the fusion of plasmas, which the planet earth does on a daily basis, when the energy packages of the upper atmosphere, transforms and becomes matter state in interaction of fields of the Inertia of the matter state. Our scientists have not understood this.

They have seen some things in CERN - but haven't understood about plasma
We see the same thing in CERN, they are using electromagnetic fields, which is the weakest, and they are trying to compress to create, just because they see some pushes, and some speeds, they think they have gained something. But they haven't understood to create the condition, (:42). of the transmutation and transportation, and even separation of Pl, you need to use appropriate plasmatic fields, then man enters a new D of science and T of the U.

Scientists not understanding what seeing - progress going backwards
How do you want to push a truck with a baby in pampers. The strength is not there, because the concept has not been understood. This is exactly what we see in the present nuclear science T, and in what we call, the rest of the rigma, we've seen how Pl is used, and how mankind is trying to achieve something, which is actually going backwards, than going forwards.

We'll teach you how to compress plasmas - interact with STP - STM - Gans of body
In the coming time in the T&T systems, which you will see. We teach you how to create the condition of plasmatic compression, that allows to interact in a correct way with the plasma of the STM, with the Pl of the STP, with the Pl of the every Gans cell of the body of the man, that it allows the T&T.

Correct way - not to leak - disperse entity across the U
How do we package it, how do we envelop it, how do we seal it that it doesn't leak from one point to another, and we don't get half of the entity dispersed across the U, what was traveling.

Development depends on man quickly understanding the light
This is the knowledge that the man needs to gain in a very rapid way, as we cannot wait for the next process. Then we understand the new light, the new interaction of the light, the new understanding, (:44). of the transportation of the light depends on how man, how rapid he will be able to understand the work of the plasmas of different strength.

If you reach to inner sanctums of Plasma - travel speed of light of Creator
Then if you reach, as we said many times, to go to the inner sanctum of the plasma, then you can even travel at the speed of the light of the Creator.

Man has been gathering bits of knowledge over millions of years
This is part of it. What has not been understood, and this is part of the gathering of knowledge for man over thousands of years, millions of years, in bits and bits.

Put all knowledge together in one go - understand totality of interactions
Now we put the knowledge together in one go, that in space man directly has the knowledge of T&T at the same time, at the same place, in understanding the totality of the interaction of the fields of different strengths, different position and time in the U.

Are we enlightened enough to create plasmatic compression to release soul

So what is the light to you, and what is the light to me, and how well are we enlightened? Does mankind, would mankind be able to create the plasmatic compression, that leads to the compression and release of the soul?

Create systems to compress emotion to reach the soul - deep enough reach others
Or would we create systems that by transformation and transmutation of the fields of the matter state, and the Gans state, we create the impression, and compression of the emotion. That with it we can reach the soul, and with it, if we interact deep enough, we can interact with the soul of the others.

Create "telephone box" to reach every soul in U - without leaving physical D
In a way, (:46). we used to go into the telephone box and pick the phone up to speak to somebody across the world, would .. that be, that our physical D, which becomes that telephone box, and with, through it, we can T&T, and create the light to reach the soul of every entity across this U, without ever leaving the physical D. But how much can we transfer energies in the light and D to our soul, that the soul carries and creates the D of the communication and field strength.

Problem is the plasma we have encaged has a lot of holes in it
The problem with us is that, we have encaged this what we call, plasma, in a cage with a lot of holes, and we have not managed to engage it, and encage it, in totality, that we decide how and where in, which hole we will T&T.

To see my son in another galaxy - I create strength of his soul
I want to see my son in the other galaxy, I need to create the D of the strength of his soul. The D of the strength and position at a given time. Does not matter if it is in the physical D, or it has already taking shape in the D of plasma of the U.

When mankind understands - He will have control over plasmatic fields of own soul
Mankind in a very short time will come to understand the new T of the space, and T. Understanding the science of creation of plasma, understanding the control of the plasmatic fields of his own soul. (:48).

We will see the Light of the Creator - No choice
In that process mankind will mature to understand, and see the light of the Creator. We have no choice.

When you enter a light cylinder - become part of structure - shall know everything
Once we enter into the cylindrical condition of the world of the transportation, we become part of the system, we become part of the what we call structure, that within it and through it we shall see everything. And the knowledge becomes universal knowledge.

Don't need universities - Knowledge of U is within
Then mankind does not need universities and colleges to educate himself in the matter state level, as he becomes knowledgeable to the knowledge of the U.

Man is everything as the Creator has been - Only needed the Knowledge
Then you understand I said many times, I made man in the image of myself. I am the image, and the man is the creator. Then man is the image and I am the creator. In that process mankind will understand how as a light, as a photon, as a particle he is everything as the Creator has been. It's just that he did not have the knowledge to understand that it is him, within him.

Question will be asked - Why did man give up his own knowledge?
In the coming time, in the process of the evolution of the science into the D of the Pl, many of you will wonder why and how for so long, mankind was embedded in this plasma of physicality. How did we manage to devalue our knowledge of the U, to the knowledge of the matter, and now we are trying to go back to the knowledge of the U. Where did we loose the link? Where did we lost the knowledge, and why did we have to go through, (:50). this process to become.

Is Man a new creature - created out of knowledge
Or are we new creatures, created out of the knowledge, that in that process, we have to learn the new understanding. As it is not new, but new for us. It has become the start of the education and knowledge of the man in the D of the creation and the Creator, but both sits within the same.

Now can you create the light - from the strength of your soul
Now, how many of you including the teachings of past 3 - 4 weeks, can create that compression, and create the new D in the structure of the light. Go back and look at all the new Gans's and new ways of the structure of what I have taught you in the past 2 - 3 weeks, with different connections, and see what have you missed, and see how you can use those to become to creator, the creator of the light. See if you can create the light which is the strength of your soul, that in that process allows you to become the photon, and not the particle, and in time to come you become the particle not the photon.

The whole teaching of past few weeks leads you to one direction, to the direction of understanding, not only to be one, and how to T&T to another, and become another, or the same.

Process of transmutation to light - in the 3 Books
As I said, it's Book 1, you go from the matter state through the light to become the Pl, to become the soul. Or you come from Book 3, which is the soul, transmute through the light to become the matter. (:52). The whole process is you, in which, where you are sitting. On the Book 1, you want to go to Book 2, or through it to Book 3, or the same from 3 to 2 to 1. In either case, you need the light, in either case mankind should have understood when we released the books, it was the principle of the knowledge of the transportation of the U, and not light as you see it as a daylight.

Process of transmutation - matter to plasma - encaging then transfer as energy
It was introducing the process of T&T in the U, where man manages to transform his field of matter state into a Pl, as a Gans, and encage it, and make it as one particle and

transfer to the other D as total energy, in that process, which we call the plasma of the universe.

Every knowledge of creation - is within the 3 Books
In understanding this process we go back to the same thing. Now you understand why the 3 books were released. Every knowledge of the creation is within it. It depends on the level of understanding as we said, you take according to your understanding from this T.

Those of you who want to go to the D of T&T through the light, look in within, look in with understanding the principle of the interaction of the fields, and not the matter state.

Plasma made of fields - You decide the field strength to do whatever you want
It's the fields which creates the plasma. It's the fields which creates that cage. It's the fields which creates the condition of matter state. (:54). It's you who has to understand in what field strength you want to be, or to travel with, or to manifest yourself, or to be on the energy level.

How to gather energies together to be in the soul - choose dimension
The process of the teaching has become very simple. The hardest thing is for the KS to understand how to gather these energies together, to be able to be in the D of the soul, or what we call energy, or the D of physicality, what we call, the matter state, or plasmatic state of Gans, or to be in the D of traveling from one to the other.

Can live in all 3 states at same time and place - unravel mystery
The beauty of it is you can all, live within all, the 3 states at the same time, in the same place. It's for you to understand how to unravel the mystery of change, strength, and the composition of the fields.

Mankind is ready for next phase of its life in the new dimension
Now we understand, the mankind is ready for the next phase of its life not in the D of the donkeys, cars and the jet engine and rocket propulsion. But in the one understanding of totality of the transportation, through the interaction of the fields of the U in the Pl condition.

Man becomes a neutrino - to manifest himself anywhere in U
This is the new tool for transportation for mankind and he has to understand it. He needs to understand it to become that neutrino, that manifests itself anywhere in the U, where it needs to release its fields, in respect to its environment to manifest itself. (:56).

Everyone can become a neutrino - therefore all are equal
Maybe our KS understand more. Those of you who are enlightened to this D will comprehend more, where the teachings are going, and what is expected of you. With this T all lives will be the same, and we shall not see a false claims of a leadership, or a kingship the other, as all the lives are all the same.

Next phase is to understand there is more in creation than the Creator - bigger D

In that process maybe mankind become ready to enter the next phase of the, what he up to now understood to be the point of the Creator, as there is more in the D of the creation, than the creator, and one day man will enter that D, and then it will open his eyes to a bigger D, to understand the totality of the creation.

In eye of plasma - understand the fields which lead to - creation of the Creator
He will see the whole of the creation in the eye of the plasma, in the eye of the creation of the field strength, and understands even the life of the Creator. The fields which lead to His creation, and the reason for its creation, that lead to our creation as interaction of His fields.

Mankind is not yet ready to understand Creator - But we open the door for future
But mankind is not at that point of understanding at this point in this time. But we open the door for him to understand, that in the future, there is more to knowledge and life beyond the life of the Creator.

Even the Creator has the emotion of religion
But mankind is not knowledgeable yet, and he is too entangled of his own way of belief, through different religions, and to understand that even the Creator has an emotion of religion, if you call it that.

Emotion of longing to be part of - exists even in the Creator
Which means there is a bigger D in the D of the existence. I made man in the image of Myself. (:58). The emotion of longing to be part of, exists within even the Creator.

Maybe explain - one day - there is a life even bigger than the Creator
Then mankind will come to understand there is a long way to understand the totality of the knowledge of the U and creation. Maybe one day I will explain that to those of the KS who have reached the point of understanding that there is a life even bigger, than the one man calls the life of the Creator, the God.

Man had a problem even to understand there is only one God
This has been hidden from the eye of the man. As man even had a problem to understand that there is only one god. Now we try to explain the next step, it will become very much different.

"Seven Valleys" of Bahuala - Mankind not even the first valley
It's in the writings of the "Seven Valleys," mankind has not even entered the first valley, let alone wanting to understand what is beyond the first valley, that it needs understanding of the totality of the knowledge of the creation of the Creator.

The knowledge lies within the strength of the light -
That all lies within the strength of the light,

Transmutation to a higher strength within the creation of the Creator
transmutation in the D of higher strength within the creation and the Creator.

Will explain the truth about the Creator - and what lead to His creation
One day I might explain, but I hope at that time mankind will be ready to understand the truth about the Creator, which has lead to his creation.

It's Book 8 - Origin of the M field - Beyond the creation of the Creator
We called it the Book 8, the origin of the M field, which its origin goes beyond the understanding of the fields of the creation of the Creator.

Unicose will understand it was part of another creator - even bigger structure
One day .. the whole of Unicose will come to understand that, its creation was to manifest itself to another creator, (1:00). and to be part of it. In a way, even the Unicose becomes part of a bigger structure that, it has been constructed out of.

Unicose is a speck of dust in totality of the commission of the creation
So what we see as a total energy of all this U and Unicose is a speck of dust in the totality of the ?? commission of the creation.

Where the totality is ?? embedded within it.

Further knowledge about emotion of higher levels - even beyond citizens of Unicose
The further knowledge of understanding emotion and the higher level, beyond the present understanding of even the citizens of the Unicose.

Maybe mankind mature from 1st to 2nd (level - Valley ??)
Maybe one mankind become mature to reach to that point that he can go from the first to the second. Very much as man is trying to get out of this earth, just to peek through, and be able to live within the solar system, as at the moment he cannot even imagine that, he can live in the galaxies and universes, as he find himself lost, as he cannot carry enough food, enough O, to even to get to moon and back.

Living in the Fields - Never a shortage of energy - tap into universal fields
When you live in the D of the fields there shall never be a shortage of energy, as you can tap into universal fields of different strengths, different structures, and different understanding.
Many of you will start to peek - travel - and exist in the new existence
I hope today I opened your eyes to the new world of existence, new world of transportation and new understanding of the creation, and a new way that, in the coming time many of you will start to peek, to travel and exist.

First transmutation systems in Linz - historical
You will see the first series of the transmutation systems in Linz, and these systems become historical, as many of you, (1:02). and the knowledge of the man, in collaboration with the systems of the Unicose, will bring new understanding to everything the man thought he has understood up to now, and has become what we call, the most intelligent being on this planet.

Maybe Trees and Animals understood long before man
Maybe the trees understood these long before the man does, but they never confessed to their knowledge. Maybe the animals in the D, understood the source of creation, more than man does with his voice and his actions.

From now on we have to try to understand transportation through light
Now, from now on we have to understand, we consider the life as the process of transportation. We understand that life as a system of transportation, and we try to develop, as man is his habit, technologies to be able to replicate the process of the movement, creation, and the position of this energy we call light.

The Light has a heartbeat - possesses understanding - can balance fields
In the coming time we'll introduce much more in depth, the process of, but you have to remember one point, it all factors in all divisions, the light. Even the light has a heartbeat, even the heart possesses the condition of understanding of synchronizing his work between his G and M field balance, that **leads to creation of his existence**.

Tuning to heartbeat - it becomes an entity - anywhere in U
By tuning to the heartbeat of the time and the position, it'll become that entity, at that time and position anywhere in the U. (1:04).

Then the heartbeat of the plasma dictates the heartbeat of the man.

And then dictates the manifestation of the presence of the man.

When the heartbeat of the man stops, the man stops, at the point of death.

Everything depends on understanding - creation - control - of rhythmic action
Then maybe you understand why, everything depends on the creation and control of understanding the rhythmic action, **at any point in the strength of the fields of the M and G in respect to each other**.

I decide point of manifestation - (by balance) of what I give and receive
What I receive and what I give, as a checkmark, and checkbook at the real strength, and at that strength point, I decide the point of manifestation.

A lot was taught today - KF is developing systems for this
I hope I taught you a lot today. I hope you understood a lot today. I hope mankind will come to understand as of today, a new method of transportation is open to man, and the systems for it are under development within the KF research centers.

We'll show making of packages of energy - for transmutation
In the coming time we'll show you. We'll make a packages of fields, and we transmute you in a field strength, not as a suitcase, as a skin, or as a clothing on the body of the man.

It needs a man to understand the knowledge - otherwise just a fairytale
Thank you for today, the knowledge given to you is much more than even mankind could imagine, could understand. In so many ways, it needs a man to understand the knowledge, otherwise it is another fairytale. It's another thing that is for the others and not for me.

This is the reason you are here as a KS - it's for you
If you are KS here, it is the reason you are here. It's for you.

Understand the emotion of the soul and you'll live without suffering
And you have to understand, if you are here to become the passengers of the U, to live without suffering, to understand the emotion of the soul, (1:06). that does not create the failures of the physicality.
Thank you very much Rick, would you like to go on break

>> **BREAK** >> (1:11) 396 KSW

K- Let's see what KS want to know more of.

Compares our souls to shooting stars in sky

Q: .. shooting stars are the way we will travel in space? (or meteorites)
As a particle - if we interact with higher energy - we become shooting star
K- In a way, if you look at it. If you become that what we call particle, somewhere in the U we will come across higher order energy, that in interaction of it, will become that shooting star, we'll manifest ourselves as a light in that environment, of the order of, strength of it in that position in time.

But a shooting star of - What strength?
Yes we are, we become a shooting star, but in what strength, .. capacity, .. understanding, and this is what is important to all of us.

As a package of energy - we find point of interaction - become shooting star

We are that, as a soul, that package of energy, which is traveling the span of the U, and then when we find a D, which is a point of interaction, and manifestation of us, we become that shooting star, (1:14). in that position in time.

If have knowledge - don't evaporate as energy - convert through Inertia - visible
But would we evaporate as a light in energy there, or would we have enough knowledge that it becomes a point of conversion for us at that energy, and Inertia position of the time and space to manifest ourselves in the visible D of that position. That it becomes our manifestation.

In D of soul we are shooting star - depends environment - how manifest ourselves
We are all that shooting star once we take into the D of the soul. It depends in which environment, we will manifest ourselves, we'll show ourselves, **to what strength and to what purpose**. So, yes we are all shooting stars, without a doubt, but depends where and how we want to manifest ourselves.

I have shown people around me shooting stars
If you have been with me, people near me, I have shown this many times. Even in the very recent past, I can show you a shooting star on same position, from 2 different D and directions, which is one of the impossibilities.

I use the energy of my soul to create shooting star
Because it is the energy of my soul which creates that manifestation, not the presence of another entity, particle. Usually when we see shooting stars they all come in the same directions, depending on their entry and their position.

It's not a matter state entity interacting with atmosphere of planet
But if you have been around me I can show you shooting stars entering from exactly 90 degrees, 180 degrees from each other. Because it is not the matter state which interacts with the atmosphere of this planet, that it creates that shooting star. The shooting star is created out of the energy which I release, (1:16). to manifest itself at the point of observation, you got to understand how long, and what should take place, that a piece of stone enters in the atmospheric condition at a given point when you wish, and you are talking to someone, and you say, "do you want to see a shooting star."

Multiple KS will see the shooting star (SS) at same time
This is even not understood by KS who have been around me and many of them have seen this. I create shooting star by will and they see it. Not only one, 3 or 5 people see it see the same time. I create SS coming from 2 different D in the same environment, because **it's the energy packs which I release to create that** SS at that point and D, through the soul, not through the D of physicality.

We touch the soul of observer and ourselves to understand more of creation
So we all can become that SS depending on where and how we wish to manifest, and in a way, have touch the soul of the observer, or the soul of ourselves to understand more of creation.

When we become the soul - no matter state but we are still in physical D
So yes we are, when we become the soul, we have no matter state, but we are in D of physical.

When 2 plasmas interact - create light - as in our daylight (sun and earth interact)
When the 2 plasmas interact, the creation of light from them is the light you see today as the daylight.

To observer outside (solar system) earth is SS to the sun
That is themselves, that on its own is a kind of, what we call, SS. To the eye of the observer from outside, earth is a shooting star, interacting with the fields, of the M fields of the sun. (1:18).

We are burning to sun as we go towards - even though made of it - our creator
We are burning to it, we interact with it, even though we are made out of it ourselves. It's our creator of the condition and D we are in ourselves.

We are burning towards sun and getting pulled in
You look at a SS as a light, which enters and you see it, but if you stand outside and look, earth is a shooting star, in the atmospheric condition of the solar system. We're still burning, we're still moving forward, we're still getting pulled in.

The light at the head of SS - is just like our daylight - M fields interacting
In that process our fields, our M fields in interaction with M fields, create the daylight. Our daylight is what you see in the D of the U, as that SS head, moving forward. It's just that we never considered these things, we just look at it in a matter state, and that's it, when we see the light, or something enters our atmosphere. We have entered, even though we are created by the sun itself, into the atmosphere of the sun.

When our soul interacts with other fields becomes SS - so we are a SS
So we are a SS. It's the same with our soul, our soul in the D of interaction of other field strength, we become that shinning, what we call SS. Maybe we understand a little more.

Try to use your will to create SS - that it brings joy to others soul and emotion
Maybe go outside and see at will, you can create that SS that the others can see, that it brings joy to soul and their emotion.

Then you have entered a new D of creation and creator.

Many KS around me have seen many times. I was walking with one and I created one, and I said do you want to see the second one, he said, yes, there is the second one. (1:20). In walking with a few of KS, I said to them, you will see 10 shooting stars tonight., and counted

You emit these lights through your soul - to enlighten others - elevate

It's understanding that through emission from your soul, you create these lights, that it brings joy to the soul of those who are the observers, enlightens them, and elevates their knowledge and their life. I have shown this a few times to KS who are very close to me.

I can create as many SS as people around me
I can create as many shooting stars as many people around can ?? not just observe of.

I can move from one position to another, and say , now you can see in this position, because the environment, the condition is perfect for creation of such interaction of the fields of the soul.

You see the light of my soul - not another entity enter atmosphere
In a way, the light you see it, the light of my soul, not another entity entering the atmosphere there.

It's the power of the Messengers of the Creator - Message of knowledge
But it brings you joy and is the power of the Messengers of the Creator, that we carry the message of knowledge, not becoming another prophet.
Any other question.

We don't give medical advice in teachings
Q: .. (1:22). .. about a tumor operation .. procedures .. I'll give him the email address for medical ..
K- I am trying to read what is in the chat. We don't answer these things, you have to go through private channels of the teaching. We never respond to medical in these teachings.
Any other question

Do we compress fields by increasing G fields - Am I right?
Q: Ed .. I am trying to understand a little bit more about the (1:24). compression of fields. The way I ascertain it, that for fields to interact with one another they need to be of similar or same strength. So they need to interact with one another in such a way, and the only way I could think of compressing the fields, using the fields is to increase the G field forces, is this anywhere near being on the right track?

About as close as the moon
K- You are as close as you are on the moon.

Understand interactions of plasmas - it's a spectrum of fields
Again in the D of the Pl, you have to understand interaction. When we speak about the Pl, it's a spectrum of fields. When we speak about G it's a spectrum of fields, which are radiated inwards from the pull of the entity itself.

To have gravity - you need something to pull you in

When we talk about gravity even as light, speed of light, is, you cannot gravitate unless there is something which pulls you in. I cannot pull you to myself if I don't have your hand or a rope with you, or something attached to you, that I can pull you to me.

This is part of the knowledge we'll teach you in the coming time.

What is the mysterious knowledge called - Gravity - man doesn't have
What is that hand, that it pulls a field to itself. What is that mysterious knowledge the man does not have? You call it gravity. (1:26).

A plasmatic line of connection - is needed - to pull you in
I cannot pull you to me if I do not create the line of connection, if I don't put a hand out, if I don't throw you a rope. How do you create that rope, that ?? the connection in the plasmatic field.

Gravity has a full spectrum - on strength of every entity - within its creation
Where does it come from? How is it that it has a full spectrum on the strength of every entity within its creation.

I deliberately put a simple reverse G field - on back of Book 3
A simple reverse G field is on the back of Book 3. I put that in there deliberately, that one day we will explain this, when the man has matured to understand the totality. If you look at the back page of Book 3, the back of it.

It will solve half of the mystery of gravity - no one has understood
You will understand half of the mystery the gravity. No one up to now has understood this. No one up to now has understood why we put this picture in here.

Detailed explanation of gravity in Book 3
In a more detailed explanation of it, you go to picture 31, of page 187 of Book 2, sorry 3 and you'll understand more about the process of creation of gravity. (1:28).

You have to go deeper - a "fulfillment of knowledge"- how entities are born & die
If you want to understand in principle, how the whole structure of the creation works with the creation of gravity, you need to literally go in much deeper understanding and a fulfillment of knowledge, I call it, and see how the entities come to exist, and how they finish.

How to go from one plasma - to creation of another - chapter 14
Read chapter 14, of the Book 3, how would it end, how we go from one Pl to another. How you lead to creation of one to the other?

What is the strength that leads to creation of - Pulse - the understanding
In that process, what is the outcome, what is the strength, that leads to creation of the pulse, the understanding.

Even being so enlightened - you still have condition of black hole within
To what extent does light manifest itself. Go on the page, which is picture 21 of Book 3, and you'll understand the creation of the light. And even being so enlightened how you still have that condition of the black hole within, even though we never said ??

Understand gravity from pictures - look at what you give and take
In the books we try to explain many of these things in a very simple way, that could be understood, could be expanded upon, (1:30). that KS in the future can understand how gravity is created. Go to .. figure 13, and you should be able to understand the creation of gravity from the pictures. You always looked at what is given. Look what you are giving, what you are creating to take as well.

Figure 13A - fields expanding - but lines going backwards
In figure 13A you completely understand while you look at it, the fields are expanding out, but the lines are backwards.

These are the G pulls, that exist within the M field of every strength.

Pictures drawn for future - when KS more knowledgeable
The way we choose and we drew the pictures was, in the future we could explain more in detail, when KS become more knowledgeable.

How does gravity pull? - Why only end up in one position - not other
You call it gravity, but how does it pull, and why does it only end up in that position and not the other.

How come you have so many G fields at the same time running at different strength.

We have a G field forces within the structure of the cell of our body.

Each cell keeps position - by G field forces from cell to G field of earth
At the same time we have a G field forces from the same cell to the G field of the earth, that's why it keeps its position in that condition.

We have G fields from sun and galaxy - even from every cell in body
Then we have G field forces in respect to the sun, and then to the galaxy, even every single cell of our body. (1:32).
Without G fields - cells in body would not keep position
Otherwise we would not be in that position. You would not have that cell in the position of your heart.

It's a balancing act - between all the fields of the U - effects time - space - position
It's a balancing act between all the fields of the U, which can effect the position and time and space.

How do we get pulled by all these G field forces?

So what is and how do we connect to all these, how do we get pulled by all these towards it.

This happens through the Light - we connect as a photon - exist as a particle
This is part of the structure of the light, do we connect as a photon, but we exist as a particle.

Different photons of different strengths - keeps us in touch
Do we produce many different photons of different strength to keep in touch?

Like tentacle of octopus - we grab to find contact and attach to
It's like the tentacles of the octopus, to see which one we grab, and when we grab, we find contact, we attach to.

The knowledge is much deeper, than looking at it in a very simple way.

Does G field forces cause the compression of plasma?
Q: .. without getting off the subject, back to the compression of the fields. Is it the G field forces that causes the compression or ..?

No - M in same strength of the G - But
K- No. It's the M in the same strength of the G.

You have to know how to compress - or the thing will crush - or explode
When you lock into to compress, you have to have the knowledge of, when you compress what you have to take out, that the thing doesn't crush, or doesn't explode. You understand? (1:34).

It's the M of the outside - it's the G of inside - they have to link up
Q: No, but, I was trying to understand, if it's not the G field forces, it's the M , so it's the interaction .. ?
K- The M. No, no let's put it the right way. It's the M of the outside, it's G of inside. That they have to link up.

It's Not interaction of fields - It's interconnection - which is totally different
Q: So it's an inner action of the fields, it's not like a pressure created?
K- It's not interaction, it's interconnection. It's totally different.
Connect at given strength - create a balance within itself but knowing limitation
They have to connect up at a given strength, and find a way, that they can create a balance within itself, but knowing the limitation of. It takes time to understand.
Q: I think that is as far as I can go right now.

(There has to be a link) - so the field forces can interact with each other
K- We create a condition of the field force. Look at it this way. When we use the Gans's on the body of the man, what do we do. You put the Gans's and you say, there is no interaction.

People said - Pain Pens didn't work - forgot AA in production - needs link
We had this with some Pain Pens, people say, "we don't feel anything." Because I could immediately relate to it, that when it was produced, in the production line they forgot to add the amino acid (AA) to it. It's not that the system doesn't work. It's that, in the process there is one ingredient missing. Because it is important to create that link, otherwise you are there but you don't interact.

Making Cup Life - take off AA - wash - put back AA - linkage with body
This is why for example, when you use Cup #1, we always tell you, (1:36). use the AA. Take the AA out first, and then wash your Gans's, and then add the AA to it.

Pen Pains Work - need to have AA to make connection to body
Because you take the line of connection out. To somebody who takes the PP and says it doesn't work, it's every simple, it's not that it doesn't work. In the production they have forgotten to add the link connection. When you don't have a link connection how do you expect to connect.

To travel to the Moon - we need to make a connection to travel on
It's the same. You can create all the fields, but if you don't create a connection to moon, you cannot travel to moon.

Moon has specific characteristics that we tune into to make that link
But moon has specific characteristics of its own, that we can specifically tune into and make a link.

Important to create - measure - understand link - can push away or pull towards
Creating or measuring and understanding that link is important, then through that link you can pull or you can push. It depends on which side of the fence you sit.

I understand gravity from standpoint of Fe magnetism - not plasma
Q: I have always understood the gravity from the stand point of magnetism, .. we've been taught about magnetism of Fe..

Understand from point of plasma - then much easier
K- Let me tell you one thing. Try to understand the gravity from the point of plasma-tism, not magnetism. Then life becomes much easier …
Are things outside our U not pulled by earth's gravity - or by deeper connection
Q: .. the gravity of the earth is just much more comprehensive (1:38). … that it interacts with the things that it has created, there is a link there and it interacts with everything it has created. But I can imagine there are other things outside of our solar system or our U, that it would not interact with, unless there is a deeper level it interacts with, because it came from the same creation.

It's not about becoming deeper - It's about having a given field strength
K- It doesn't become deeper, it becomes of a given strength.

Little boy takes down giant by finding the right position and strength
I explained this once before. You get a giant and if a little boy finds the right position, and right strength, can bring a giant down. Where the most strongest man cannot do so.

Breaking through the line - distorting the line to link to
It's just finding that line of the breaking through. That line of, distorting the line to be linked to.

Fields of moon continuously pull on liquid part of earth
We get the field of the moon on a continuous basis interacting with the fields of the planet. Which on the liquid condition.

Does the Moon also pull on the solid part of the earth?
When I put this forward years ago, and that is, have you measured the strength of the pull of the planet earth, the solid part in respect to the moon. How much of it does it pull. Or is it only the waters which get effected by the field strength of the moon? (1:40).

Moon field absorption test - change between 5 - 7 o'clock morning and evening
When we did a test for field absorption, we saw the change between 5 and 7 o'clock in evening, and about 5 - 7 o'clock in the morning, and the rest of the time in between stays most or less constant.

Weigh yourself between 4 - 10 AM - see changes
Try to weigh yourself 4 AM , 6, 8, and 10 AM in morning, and see how much your weight changes, on the same scale.

100 gm/hr loss of energy from genitals - to environment
Allow 100 gram per hour for loss of energy to the environment. Every one of us on the man part of the human being, or women different, uses 100 gram of energy, weight as energy in one form or another per day on average.

This is the 2,500 calories they tell you - you need daily
This is what they tell you, you need 2,000 calories, or really 2 and half thousand calories. This is roughly about 80 to 100 grams per day. If you don't eat anything for 1 session and you weigh yourself, more or less ever hour you reduce your weight between 80 and 100 grams.
Where does the energy go - in body's interaction with the environment
But in that process where does the energy go, and how do we interact, or can we use it to interact with the environment?

We have to understand these energies - that are used for body to exist
It's these energies, which we need to understand, that is given and used for the body to exist.

Through this spectrum of energy - we can connect to the Moon

Where in this spectrum, is there energy where you can connect to the moon. (1:42). We have done a lot of these experiments, and it is fascinating to understand how much we have never understood.

Q: … if the Pl water is frozen then it is super compressed would it become magnetic?
K- What?
Q: repeats ..
K- Would it manifest and compress by what? that is the point we have to understand. … by what? Fields or matter compression?
R: matter based water not compressible in some ways .. (1:44). but still have the pressure.
K- Yes,
R: .. what purpose you have
K- That would bring a change It's just the way we have been taught we always think in matter state
Any other questions.

How is a psychopath created?
Q: Lisa .. Please explain how a psychopath is created, a lack of emotional connection and empathy seems to be an abnormal state for most humans?

This is a specific definition of psychopath - towards everyone or just specific people
K- You got to understand, this is a very specific definition of psychopath. Is a psychopath towards everyone, or just a specific people?

A psychopath may look normal in a different environment
Does a psychopath in a different environment looks normal. (1:46). or is it just in respect to one or two people.

Psychopath is a mind controlled state - of emotion - towards behavior
So we understand psychopath is state of control of emotion towards behavior, given behavior. We have seen this many times, somebody sits in front of you with 2 or 3 people turns on one side, and one way behaves psychopathic way, and the other side and so generous and kind. And the kind one never sees it, that how psychopathic is in respect to another.

A given condition and interaction - triggers a psychopath
So what we call psychopathic is very much emotion control direction. You got to understand what triggers this towards a given condition and interaction. We've seen many times, I have been in many positions like this, when I sit and watch a person smiles and laughs, with the others, turns around and becomes a snap ?? could ever be.

Psychopathic condition is a state of mind control of emotion - respect to receiver
So psychopathic condition is a state of mind control of the emotion in respect to the receiver. It's very much like a serial killer, they kill in specific position and condition, because that is what triggers them or we have seen it in the case of child abuse. Each of

these people are triggered by certain age and bracket of the structure. It is mainly state of mind and emotion condition. (1:48).

One person is not psychopath all the time - to everyone
To me, one person is not psychopath all the time to everyone. To others could be angel, and to you is a devil. .. or visa versa. So it is a state of mind control and interaction.

.. the Australian group and stores and products will be linked to main KF store. . (1:50).
Q:

Will we travel in the form of smoke rings
Q: (1:52). . Will we travel in the form of a smoke ring, that's what I always think of when I blow one, It's a very interesting shape when it travels.
R: I am reminded that in the Book of the light .. there are pictures that show …light travels in a cylinder . with the inner part moving forward and sort of folding back on itself … is that a way to understand that?
K- If that makes you knowledgeable why not.
R: Elongated torrid .

Motion is created by pressure between the forward and backwards moving fields
K- You always need the back pressure G fields and identical front pressure to be able to create the condition of motion. In the plasmatic condition.

As dynamic Pl moves to front loses strength goes to back - cycles around
In an aircraft today a front nose is always a front nose, and nothing changes. But in dynamic Pl you have the front continuously interaction with the fields of its environment losing strength, and getting pulled back to the back end, and than gaining in strength in the process, and moving forward, and again becoming the ?? front.
R: .. that's the way the smoke ring goes too.

Depends on helix effect of internal fields - light is dynamic
K- Yes, but it is very much on how and what condition of the helix effect the fields of the internal fields of the Pl of the light creates itself, because it's dynamic. (1:54).

The dilemma is to hold position of cells - that they don't cycle around
This is one of the dilemmas of the transmutation and transportation (T&T), that we hold position, and we don't get the cell of the toe coming to the head and going back down again. These are part of the work and the processes of the interaction of the fields in the Pl condition.

R; hard to imagine how one would keep it together in the middle of a torrid basically, where there is so much change in direction and acceleration going on, ..looking at it as a matter level .

We create dynamic envelop for plasma - inside it stays constant

K- This is why we speak about the envelop, we create a dynamic envelop, where the inside, doesn't matter what happens (outside), (the) inside, as it is it stays constant.

Skin is an envelop - whatever happens outside - organs still do their work
We have this envelop in the skin of the man in the atmospheric condition. Whatever happens inside liver works, kidney works, and heart works, but the skin keeps that shell, that inside is separate than outside.

The body is in vacuum condition to hold itself together
It creates a different vacuum condition to be able to hold on to.

When the vacuum condition of body cannot be held - people explode
When this, in some cases the vacuum condition cannot be held, you see people just explode, literally.

Cellular explosion happens at death - in the coffin - converts the plasmas
Cellular explosion it happens more or less on the point of death, to many of us in the coffin. We go through that process, it is not just gases, it's cellular explosion which converts the plasmas, convert into. We see, we open a coffin, (1:56). there is nothing left but skin and bones, where no animal has been in there.

Explodes into energy patterns of plasmas fields - leak through coffin
Our cell's energy converts, and explodes into energy patterns of the fields of the Pl, and they leak through the body of the coffin.

Why Zoroastrians leave body exposed - to release its fields
We understand and look at the process and in a different way. This is why in the path of belief of Zoroaster they leave the body in exposure of open, that it releases its fields, even in the physical D to the other structures. Where in the others, we put them in boxes, and we wrap them, or whatever, and we hope that all the energies are released in that D of the Pl.

Can do research on material composition in graves and how it changes over time
Something which hasn't been done by the world of science, is that, if in the future, now we open the knowledge, someday somebody might decide to do research on it. If we take a composition of a grave, of all the materials before we place a body in it, and than over time analyze the structure of the materials around the grave. It doesn't matter 10 or 2 meters under ground, and see how the material composition changes by receiving the fields.

Understand the emotions of the person by composition around grave
Then we can even understand the emotion of the man from the composition. (1:58). Was it happy to be released of the physical D, or did it still want to stay in the physical D.

Leave impression within our environment - living entities carry information

We leave an impression within our environment, and within that environment there are living entities, which can carry that information. Then mankind will become more knowledgeable about the cycle of life.

Energy of shooting star dissipates into atmosphere - becomes matter through Inertia
In a way, what happens when you are a shooting star and your energy dissipates into the atmosphere. Where does it go? Or does it become part of the energy of this planet, and if it matches that light, that field from the SS, with the Inertia of a given point in time, would the matter condition of that energy appear.

SS creates new materials on planet as fall out - interaction with environment Inertia
We see the what we call, the fall out of the new materials on the earth, or within the structure of the earth. We have this all the time. A SS meets the creation of this, in respect to the environment, and becomes matter by Inertia

Scientists did tests - found cosmic dust on roofs of houses
They have done these tests in US, and in Russia .. that if you don't wash you're, the roof of your house for 6 - 12 months, and then go on it with a jet washer and collect the water, and analyze the dust you collected.

Scientists found huge amounts of cosmic dust with metals attached to it
There is huge amount of cosmic dust on your roof. If you put a magnet in it, they have shown, many scientists, that you collect a lot of metals, (2:00). attached to it.

Daily interaction of fields of U - with Inertia of matter state (of planet)
This all comes from the daily interaction of the fields of the U in interaction with Inertia of matter state.

Most of fields turn to Fe - because of G field of earth
Why most of them change into matter state of the Fe, due to the G field of the earth, on the end.

SS enters earth atmosphere as light > become fields > Inertia > back to matter
They enter this atmosphere as SS as a light, ?? light then they become fields, and then again with Inertia goes back to the matter state.

Some of these SS fields convert to gold 10 km inside the earth - gold deposits
Now we understand the knowledge. If some of these fields are at the strength maybe 10 km down in earth, converts to gold, that the energy, you have your, find gold in that position.

Q: … light both wave and particle A photon is a carrier of light as a photon, and … is a photon similar with the wave aspect of light? (2:02).
R; …

Sometimes a photon - wave or energies - due to G pull - becomes a particle

K- Yes, but you got to realize, sometimes, a photon, what you call wave, or energies in a given condition due to G pull, they become particles themselves. We know that this is part of the structure of manifestation of entities in a given strength field.

Fish tank brought to Linz exhibition center - we'll manifest a fish
We have brought a fish tank in the Linz EC, and in the coming time we'll show you the manifestation of the fish within this tank. It's deliberately brought in, but accidentally planned.

With 1 drop we'll create a fish - with 1 drop even a man
You will see with 1 drop we'll create a fish. With 1 drop in that tank we'll create the man.

We convert the energies of photon - to matter state - Gans state of plasma
This is how we convert the energies from photon to matter state, Gans state of Pl.

In Womb of Mother - 1 drop changed to life - no difference
This is what you do within the womb of the mother. You change the drop to life. There's no difference, just because you can see, now it's transparent in a tank. (2:04).

The point M turns to G - depends on observer and point of detection
Q: … Where exactly does the M field turn to G field?
R: which is the same line of field
K- As we said before, it's the point of observation, point of detection. … That's what it is. In reality that's what it is.

Coming towards me you are G - as you pass - you become M going away from me
It never changes. Are you going to or are you coming from? Are you .. which one are G, coming towards me, and as you pass me you become M. It's the same ?? in passages ??

I can ride on the fields (that came with you) - to go back to your position
Can I use that field of coming to me, to go back to where you were before. Get attracted to the point and the position and D. This is why I keep on emphasizing to start working with the fields, not with the Pl or Gans's. You'll understand more. (2:06).

Q: Dean .. I have been having some interactions with the fields ..
Interactions when I go into nature animals. ..
soul with the light. …
can we connect with them when we feel we need them?

Fields always there - if find a given strength - they link up
K- It's always there, and always will be there. We cannot do much with it, and we cannot do much without it, but if they find a given strength they link up with us. It becomes part of the interaction.

With signature destination - (we have a direct link and interaction with Pl - being)
But when we signature destination ?? it will happen that way. (2:08).

(following questions not direct - answers vague)
Q: .. if someone goes in the EU is it a thought process or the position to initiate the Pl exchange or interaction or is it a thought process within the individual in the system?
K- What do you mean
Q: will the system be the stronger field that will dictate where the entity goes, or will the entity inside, the soul that is present will that have a direct influence on its destination.
K- Could be. It all depends how and what the strength is and interaction >>
Q: The interaction with the many different planetary system. a day trip or an hour trip through the knowledge myself and many KS have gathered we understand this is an instantaneous transformation (2:10). Can you travel to Mars in an instance… and bring it back … if you have the envelop. .. you can exist there ?
K- Possibly yes. But again it depends on the intention and what is to be achieved.
Q: many people from earth love their physicality
for them they would still want to materialize in a physical body

K- Can you explain what do you mean
Q: Say I am from earth .. attached to physicality .
(2:12). if we go to .. Zeus and we decide we would like to
would you have a dome around the physicality so you could interact with the environment . would it be ridiculous to try to do this, or much better traveling with your soul. .. ?

We expect too much (from technology) when we don't have the knowledge
K- We expect too much to do when we don't have the knowledge of. When we have the knowledge of, many of these questions won't exist.
Q: ..
(2:14). to experience this they would have to travel by their soul?

Two ways to enjoy space - connecting to fields of knowledge - or by soul
K- Mankind will learn there are 2 ways of enjoying the time in space, by understanding and connecting to the fields of the knowledge, or trying and understanding and do by the presence of the soul.

Both will bring the same result.
You have to know what you want to learn and gather from the travel
But you have to find the D and direction where you want to be in present, and what you want to learn and gather from it.

Do not need to physically travel - to gain emotion and information - by soul
